P&H's RESPONSE TO THE COMMISSIONER'S MOTION TO STRIKE

PART 1. GROUND ON WHICH THE MOTION IS OPPOSED

Overview¹

1. Parrish & Heimbecker, Limited ("**P&H**") opposes the Commissioner of Competition's (the "**Commissioner**") motion to strike certain paragraphs (the "**Disputed Paragraphs**") of the witness statement of John Heimbecker dated October 13, 2020, delivered on behalf of P&H (the "**P&H Statement**").

2. There is no ground to declare any portion of the Disputed Paragraphs inadmissible as improper lay opinion evidence or hearsay.

The Disputed Paragraphs are Not Improper Lay Opinion Evidence

3. The Disputed Paragraphs challenged by the Commissioner as improper lay opinion evidence testify to Mr. Heimbecker's observations and perceptions regarding P&H's market position in the Canadian grain trading industry, P&H's rationale and objectives in undertaking the Transaction, Mr. Heimbecker's observations and perceptions regarding excess capacity among rival Elevators, Mr. Heimbecker's observations and perceptions relating to P&H's own previous rail and storage expansion projects and Mr. Heimbecker's observations and perceptions relating to the value of the increased throughput at the Virden Elevator following the Transaction.

4. The paragraphs in issue are either evidence of fact or, alternatively, they satisfy the test for admissible lay opinion evidence.

The Disputed Paragraphs are Not Inadmissible as Hearsay

5. The statements in the Disputed Paragraphs alleged by the Commissioner to constitute hearsay are admissible under the corporate subordinate exception recognized by the Federal Court of Appeal. Under that exception, an affiant is entitled to give evidence that is corporate in nature on information and belief from a subordinate for which he is responsible.

¹ Defined terms in this Memorandum of Fact and Law having the meaning ascribed to them in the Witness Statement of John Heimbecker sworn October 13, 2020, unless otherwise indicated.

In the Alternative, the Tribunal Should Defer its Ruling on Admissibility

6. In the alternative, if the concerns raised by the Commissioner with respect to the Disputed Paragraphs were found by the Tribunal to have any merit at all (which is not admitted), this is not a clear case in which the Tribunal should rule on the admissibility of evidence on a preliminary motion. Rather, the Tribunal should exercise its discretion to determine whether or not the Disputed Paragraphs constitute improper lay opinion evidence or inadmissible hearsay at the hearing of this matter or at the time of its decision on the merits, after Mr. Heimbecker has been subject to cross-examination by counsel for the Commissioner and questioning by the panel. No issue of procedural fairness arises if the Tribunal rules on the admissibility of the Disputed Paragraphs at a later stage.

PART II. DOCUMENTARY EVIDENCE TO BE USED AT THE HEARING

7. The following documentary evidence will be used at the hearing of the motion:

- (a) the P&H Statement and certain exhibits thereto;
- (b) the pleadings and proceedings; and
- (c) such further and other evidence as counsel may advise and the Tribunal may permit.

PART III. ORDER SOUGHT

8. P&H respectfully requests that the Commissioner's motion be dismissed with costs or that the Tribunal grant such other relief as may be just and reasonable.

Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.		Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.		
As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.		Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1 ^{er} août 1984.

Construction continues on G3 grain network

By **Brian Cross**

Reading Time: 3 minutes

G3's dream of building a coast-to-coast grain-handling network in Canada is moving closer to reality, with key elements under construction and additional facilities likely to be announced in the future.

Brett Malkoske, G3's vice-president of business development and communications, said construction of G3's new high-throughput export terminal in North Vancouver is ahead of schedule with the first grain expected at the facility in 2019.

"We're very pleased with progress at (the West Coast) terminal to date," Malkoske said in a Feb. 2 interview.

"We're now on track to start receiving grain into the facility ... in 2019, to start to settle the bins and it looks like it will be an early 2020 commissioning."

Located on the North Shore of the Burrard Inlet, G3's export terminal is being billed as most efficient grain export facility on the West Coast, capable of handling eight million tonnes of grain annually.

It will be the first new export terminal built at the Port of Vancouver, Canada's busiest, in the past 50 years.

Thirty-two of the facility's 48 concrete grain silos have been poured and work is starting on the scale house attached to the silos.

"The site is really starting to take shape and you can really start to see the vision coming into a more tangible (form)," Malkoske said.

G3 officials told Reuters that as much as three million tonnes of annual export capacity at the terminal will be made available to other grain companies and exporters under commercial agreements.

Most of G3's west coast capacity will be reserved for grain collected through G3's inland terminals, including recently opened loop-track elevators at Pasqua, Sask., Colonsay, Sask., Bloom, Man., and Glenlea, Man.

Two additional high throughput elevators are under construction near Melville, Sask., and Saskatoon. The company has also identified five additional sites in Manitoba and Saskatchewan, although G3's board has not formally announced plans to develop those sites.

The five potential sites are Vermilion, Alta., Morinville, Alta., Wetaskiwin, Alta., Carmangay, Alta., and Maidstone, Sask.

"Certainly, no final investment decisions from our board have been made (related to those sites)," Malkoske said.

"But I can confirm we have secured land in those areas and are progressing quite rapidly through the different regulatory processes, as well as engineering and design processes that we have to go through," he continued.

"But I'll stress again that no formal investment decisions have been made."

G3 Global Holdings, the parent company of G3 Canada Ltd., announced in late 2016 that it would go ahead with plans to build a grain export terminal in North Vancouver.

Construction began in early March 2017 with a completion date initially scheduled for early- to mid-2020.

G3 Global Holdings is a limited partnership between the Saudi Agricultural Livestock and Investment Company (SALIC) and Bunge Canada.

It is the parent company of G3 Canada, which controls assets that were formerly owned by the Canadian Wheat Board.

G3 Terminal Vancouver will feature a rail loop track capable of holding three, 134-car trains, a component that's unique among existing grain export terminals in Canada.

The facility will include more than 180,000 tonnes of storage and will be able to handle cereal grains, oilseeds, pulses and special crops.

The design will allow prairie grain trains to travel to Vancouver, unload while in continuous motion and travel back to G3 Canada's primary elevators without detaching from their locomotives.

With loop track access at its inland elevators and at its future export terminal, G3 will have the ability to load 134-car unit trains in the country, move them directly to port, unload in six hours, and return to the country for another load.

"This will reduce cycle times by up to 40 percent and increase the velocity and volume of grain that can move through the port," G3 Canada's chief executive officer Karl Gerrand told the Western Producer in 2017.

PRINCE RUPERT GRAIN TERMINAL

[Home](#) / [Terminals](#) / Prince Rupert Grain Terminal

The largest grain terminal on the West Coast.

With a capacity to ship in excess of seven million tonnes a year, Prince Rupert Grain's modern terminal has the highest throughput of any grain-cleaning elevator in Canada.

Prince Rupert Grain owns and operates Canada's largest grain terminal on the West Coast, handling primarily wheat, barley, and canola from the Canadian prairies. The facility has an annual export capacity in excess of seven million tonnes, offering the highest throughput rate of any grain terminal in Canada. Prince Rupert Grain Ltd. offers the best route for Canadian grain bound for Asian and Middle East markets. Opened in 1985, the terminal was built to improve Canada's ability to export grain and oilseeds. Prince Rupert Grain handles wheat, barley, and canola shipped by rail directly from grain elevators on the prairies to the terminal. The terminal also processes and exports by-products such as grain screening pellets, feed screenings, mixed feed oats, and associated commodities.

This state-of-the-art terminal cleans grain as fast as it can be unloaded from rail cars, in excess of 13 cars per hour. The eight shipping bins and three tower-mounted loading spouts can load up to 4,000 tonnes an hour into vessels.

Richardson Doubles Capacity at Vancouver Port Terminal and Sets Shipping Records

May 16, 2016 (Winnipeg, MB) — Richardson International Limited has nearly doubled the storage and receiving capacity of its export terminal in North Vancouver following the successful completion of a \$140-million expansion project.

Richardson added an 80,000-metric-tonne concrete grain storage annex to its terminal, increasing storage capacity to 178,000 metric tonnes. The terminal now has the ability to handle in excess of six million tonnes each year to meet growing demand for Canadian grains and oilseeds. Richardson also upgraded and enhanced its rail yard and receiving system to handle and process railcars more efficiently.

Building the new grain storage annex was no easy feat. Not only was it challenging to construct the new annex on a narrow strip of land along the North Vancouver waterfront, Richardson's terminal remained in full operation while construction took place.

“For us to complete this project on time and on budget, not only continuing daily operations but exceeding expectations by setting new shipping and receiving records, is an outstanding accomplishment,” says Darwin Sobkow, Executive Vice-President, Agribusiness

Operations and Processing. “Our Vancouver project has been a tremendous success story from start to finish and that speaks volumes about the commitment and dedication of our team.” **PUBLIC**

Despite ongoing construction, which began in September 2013 and concluded earlier this year, Richardson managed to set both rail and shipping records at its busy port terminal. While the facility typically ships about three million tonnes of grain each year, it set a new handling record in 2015, shipping 5.2 million tonnes. Richardson shipped 551,000 tonnes of grain in April 2016 alone, beating the previous record of 489,000 tonnes. That same month, the Vancouver terminal received 5,400 rail cars – 200 more than it has ever received in the same time period.

“Our

Vancouver expansion was a significant investment in our business to ensure we have the appropriate capacity on the West Coast,” says Curt Vossen, President and CEO of Richardson International. “As Canada’s leading agribusiness, we have positioned ourselves globally to efficiently move Canadian grains and oilseeds to emerging markets in Asia-Pacific and other areas, further enhancing our ability to serve our farm customers at home and international buyers around the world.”

Richardson International is proud to be truly invested in Canadian agriculture. Recognized as a global leader in agriculture and food processing, Richardson is a worldwide handler and merchandiser of all major Canadian-grown grains and oilseeds and a vertically-integrated processor and manufacturer of oats and canola-based products. One of Canada’s Best Managed Companies, Richardson is headquartered in Winnipeg and has over 2,500 employees across Canada and the U.S.

Viterra Hosts Grand Reopening of Pacific Terminal at Port of Vancouver

REGINA, SASKATCHEWAN--(Marketwired - Oct. 27, 2016) - Viterra Inc. ("Viterra"), today hosted an official grand reopening event at its Pacific Terminal at the Port of Vancouver. The event recognized the successful completion of Viterra's \$100 million investment at the terminal, including a new ship loader and other state of the art enhancements. Viterra customers, employees and industry officials gathered to commemorate the company's investment.

"Our goal through this project was to create a highly efficient port terminal in Canada with unprecedented capability for processing a diverse range of commodities," said Kyle Jeworski, Viterra's President and CEO. "Our significant investment, which exceeded \$100 million, will enhance our strategic position on the west coast, as well as our ability to connect the production of our farm customers with our destination customers globally."

The enhancements at Pacific Terminal will create the ability to handle in excess of 6 million metric tonnes annually. This is three times the handling capacity it previously had. It also allows for the loading of "post-Panamax" vessels, the largest vessels capable of navigating through the recently expanded Panama Canal.

"This added capacity is basically equivalent to adding two additional port facilities in Vancouver," Jeworski added. "And while this extra capacity is important for our industry, we have also created further efficiencies by improving our current handling and processing procedures."

The majority of the company's focus at Pacific will be on pulse crops, with the upgrades supporting the efficient handling of delicate products. This involves the use of a fully enclosed system with soft handling of products direct to the vessel.

"These upgrades coincide well with work we've been doing in other parts of our asset network, such as our new pulse cleaning facility in Tempest, Alberta, allowing us to capture the increasing demand for pulse and specialty grain products from customers worldwide," said Jeworski.

In addition to the new ship loader, other improvements include the installation of new bulk weighers, upgrades to shipping conveyors and rotary cleaners, and improved electrical and dust control systems.

Decrease in the number of primary elevator licences. /
Diminution du nombre de licence de silos primaires

Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.

Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.

Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1^{er} août 1984.

**Decrease in the number of primary elevator licences. /
Diminution du nombre de licence de silos primaires**

Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.

Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.

Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1^{er} août 1984.

**Decrease in the number of primary elevator licences. /
Diminution du nombre de licence de silos primaires**

Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.

Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.

Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1^{er} août 1984.

Notes explicatives

Tous les exploitants des silos énumérés dans les présentes ont reçu leur licence pour la campagne agricole 2017-2018 en date du 1^{er} août 2017.

La capacité d'entreposage indiquée en regard de chaque silo se rapporte au silo lui-même et à toutes les annexes qui forment une partie intégrante de l'exploitation et qui sont situées sur la voie ferrée telle qu'en fait foi l'inscription auprès de la Commission canadienne des grains.

Aux fins de la présente publication, on entend par «région de l'Est» la partie du Canada qui est située à l'est du méridien qui coupe la limite est de la ville de Thunder Bay, et par "région de l'Ouest" toute la partie du pays qui est située à l'ouest de ce même méridien.

Decrease in the number of primary elevator licences. /**Diminution du nombre de licence de silos primaires**

Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.

Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.

As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.		Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1er août 1984.

Elevator type/ Genre de silo	Province	Crop year/ Campagne agricole	No. of elevators/ Nombre de silos	Cap. (Tonnes)
Effective the 1984-85 crop year the Canadian Grain Commission allowed operators of primary elevators to licence two or more adjacent facilities, which were under the control of a single manager, as a single primary elevator.		Dès le début de la campagne agricole 1984-85, la Commission canadienne des grains a accepté de délivrer une seule licence aux exploitants de deux silos ou plus lorsque ceux-ci étaient gérés par une seule personne et étaient attenants.		
As a result of this policy and the continued rationalization of the primary elevator system, the number of licences issued declined dramatically, going from 2,800 in 1983-84 to 1,967 on August 1, 1984.		Suite à cette nouvelle politique et à la consolidation du réseau de silos primaires, le nombre de silos agréés passa de 2 800 en 1983-84 à 1 967 au 1 ^{er} août 1984.

THE COMPETITION TRIBUNAL

IN THE MATTER OF the *Competition Act*, R.S.C. 1985, c. C-34, as amended;

AND IN THE MATTER OF the acquisition by Parrish & Heimbecker, Limited of certain grain elevators and related assets from Louis Dreyfus Company Canada ULC;

AND IN THE MATTER OF an application by the Commissioner of Competition for one or more orders pursuant to section 92 of the *Competition Act*.

BETWEEN:

THE COMMISSIONER OF COMPETITION

Applicant

– and –

PARRISH & HEIMBECKER, LIMITED

Respondent

WITNESS STATEMENT OF [REDACTED]

I, [REDACTED], of the City of [REDACTED] Saskatchewan, Canada, state as follows:

1. I am a farmer in Saskatchewan, Canada. [REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
2. A map showing the location of my two farms is attached as Exhibit 1.
3. I have personal knowledge of the matters in this witness statement, except where I have otherwise indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

4. I make this witness statement in connection with the application by the Commissioner of Competition against Parrish & Heimbecker, Limited (“**P&H**”) in proceeding CT-2019-005, relating to the alleged anti-competitive conduct by P&H through the acquisition of Louis Dreyfus Company Canada ULC (“**Louis Dreyfus**”) in Western Canada.
5. I am providing this witness statement because the Commissioner has served me with a subpoena.

WHEAT AND CANOLA SALES

6. I grow wheat and canola on the two farms that I operate. Last year I grew 3100 acres of canola and 4300 acres of wheat.
7. My farms currently have capacity to store 80-85% of my grain which allows me to sell my wheat and canola throughout the year. When I sell my grain is dependant on when cash flow is required, for example, I need a positive cash flow after each year end (December 31), so I will haul from December to March.

8. Since harvesting my crops in November 2019, I have sold all of my crop to Viterra's elevator in Fairlight, SK. In 2018, I sold 20% of my commodity crop to Louis Dreyfus' elevator in Virden and the balance of my commodity crop to Viterra in Fairlight. I also grew some Nexera canola which I sold to Louis Dreyfus/Richardson's crush plant in Yorkton, SK.
9. When I sell my wheat and canola I usually consider three elevators: Richardson's elevator in Whitewood, SK, Viterra's elevator in Fairlight, SK, and Louis Dreyfus in Virden, MB. Whitewood is approximately 110 km or a one hour and fifteen minute drive from [REDACTED] and approximately 70 km or a 45 minute drive from [REDACTED] Virden is 40 km and 25 minutes from [REDACTED] and 100 km and a one hour drive from [REDACTED]
10. Occasionally I will contact Ceres' elevator in Northgate, SK but it is located approximately 1-1.5 hours south of the farm. I also cannot sell my crop from last year because it does not meet Ceres' moisture requirements.
11. The elevator owned by Cargill in Oakner is also not an option because it requires taking secondary roads with a 23 tonne weight limit that is in effect all year. As described in more detail below, I haul my grain in a semi-truck with a 30 tonne capacity. Transportation costs mean that Oakner is not a viable option for me.
12. Depending on the price of commodity canola, I will also consider selling my grain to the Yorkton and Harrowby canola crush plants but have not sold any of my commodity canola to these plants in the past two years.
13. I will sometimes call P&H's elevator at Moosomin but my experience has been that the Moosomin elevator has not offered competitive prices. Since P&H acquired the Virden elevator from Louis Dreyfus, I have been told to take

samples of my grain to P&H's elevator in Moosomin. Given my experience with P&H's prices, I am concerned about the loss of competition caused by P&H owning both the Virden and Moosomin Elevator.

Transportation costs

14. I haul my wheat and canola to the elevators myself in a semi truck that has a capacity of 30 tonnes per load. My cost to get to the closest elevator to my farm, Viterra in Fairlight, is 8 cents per bushel. Any additional 15 minutes of driving, round trip, costs approximately one additional cent. As I produced 13,000 tonnes of grain last year it will take me 433 trips to deliver all of my grain.
15. Given the time and cost associated with hauling my grain, more distant elevators would have to offer a higher price for me to consider selling to them. For example, the Moosomin Elevator would have to offer me 10 cents a bushel above what the Fairlight Elevator offered for it to be worthwhile to drive past Fairlight.
16. If I were to lose ten cents per bushel, this would cost my farm approximately \$45,000 (using the figures in paragraph 6, 70 bushels of wheat per acre for 4300 acres is 301,000 bushels and 50 bushels of canola per acre for 3100 acres is 155,000 bushels. Ten cents per bushel for 456,000 bushels is \$45,600). We need every penny to be able to hit the profitability levels that we need to operate our farm. This is money we use to support four families and is a material amount for me.

Signed this 11 day of August 2020.
