Respondents

AFFIDAVIT OF MATHEW MCCARTHY
(Affirmed April 22, 2022)

I, Mathew McCarthy, a Competition Law Officer with the Competition Bureau (the "**Bureau**"), of the City of Ottawa, in the Province of Ontario, **AFFIRM AND SAY AS FOLLOWS**:

1. I make this affidavit in support of the Commissioner of Competition's (the "**Commissioner**") application for an Interim Order pursuant to section 104 of the *Competition Act*, R.S.C., 1985, c. C-34, as amended.

2. I have been employed as a Competition Law Officer with the Bureau since January 2019. During this time I have been involved in the review of mergers and proposed mergers to determine whether such transactions prevent or lessen or are likely to prevent or lessen competition substantially.

3. I am part of a case team working on a review of the proposed acquisition of Shaw Communications Inc. ("**Shaw**") by Rogers Communications Inc. ("**Rogers**"). Except where otherwise indicated, I have personal knowledge of the matters to which I depose. Where I do not have personal knowledge, I have set out the grounds for my belief.

I. SPECTRUM HELD

4. I have compiled, from various sources listed below, a list of spectrum purchased by Shaw Communications Inc. ("**Shaw**"), Cogeco Communications Inc. ("**Cogeco**"), Quebecor Inc. ("**Vidéotron**"), and Xplornet Communications Inc. ("**Xplornet**") in Eastern Ontario and Outaouais, Southern Ontario, Alberta and British Columbia. This spreadsheet is included as Exhibit A.

II. SOURCES

5. I gathered Shaw's spectrum from its response to specification 9 of the Bureau's Supplementary Information Request ("**SIR**"). The SIR is attached as Exhibit B, Shaw's responses to specification 9 are attached as Exhibit C.

6. The Vice President of Cogeco, Paul Beaudry, made an affidavit in connection with the Commissioner's present application. This affidavit includes Cogeco's spectrum

holdings and is appended as Exhibit D.[1] I used the Cogeco affidavit as the source for Cogeco's spectrum holdings.

7. In assembling spectrum holdings for Vidéotron and Xplornet I used an Innovation, Science and Economic Development Canada ("**ISED**") list of spectrum auctions since 2014 (The 2014 auction of MBS/700MHz are the oldest results available) on ISED's website, an excerpt of which is attached as Exhibit E:[2]

   a. for 700MHz spectrum I used auction results from the 2014 700MHz auction (MBS), attached as Exhibit F,[3] the 2015 auction of residual 700MHz and AWS-3 (1755-1780MHz & 2155-2180MHz) spectrum, attached as Exhibit G[4] and the 2018 auction of residual 700MHz, 2500MHz (BRS), 2300MHz (WCS) and PCS-G (1850 MHz) spectrum, attached as Exhibit H;[5]

   b. for AWS-3 spectrum I used auction results from the 2015 AWS-3 auction, attached as Exhibit I,[6] and the 2015 auction of residual 700MHz and AWS-3 spectrum;[7]

---

[1] Exhibit D: Affidavit of Cogeco Communications Inc., sworn February 24, 2022.

[2] Exhibit E: ISED website excerpt, "Auctions" (last modified March 25, 2022), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf01714.html.

[3] Exhibit F: ISED website excerpt, "Final Results – 700 MHz Auction (2014)" (last modified March 25, 2022), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11086.html.

[4] Exhibit G: ISED website excerpt, "Auction of Residual Spectrum Licences in the 700 MHz and AWS-3 Bands – Final Results" (October 22, 2015), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11079.html.

[5] Exhibit H: ISED website excerpt, "Auction of Residual Spectrum Licences in the 700 MHz, 2500 MHz, 2300 MHz and PCS-G Bands – Final Results" (June 29, 2018), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11400.html

[6] Exhibit I: ISED website excerpt, "AWS-3 – Final Results" (March 6, 2015), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf10954.html.

[7] *Supra* note 4.

c. for 2500MHz spectrum I used auction results from the 2015 auction of 2500MHz, attached as Exhibit J[8] and the 2018 auction of residual 700MHz, 2500MHz, 2300MHz, and PCS-G spectrum;[9]

d. for 600MHz spectrum I used the auction results from the 2019 auction of 600MHz spectrum, attached as Exhibit L;[10] and

e. for 3500MHz I used the results from the 2021 auction of 3500MHz, attached as Exhibit M.[11]

8. I gathered this information between February and April 2022. I have checked that none of the public sources have changed over this period and the data on ISED's websites reflects what is in Exhibit A as of April 20, 2022.

9. ISED divides spectrum licences into tiers, with tiers covering larger areas having the smallest number. Like provinces and cities within a country, a Tier 4 is a part of a Tier 3 area and a Tier 3 area is part of a Tier 2 area. In order to map licences auctioned at ISED's Tier 2 and Tier 3 areas to relevant Tier 4 areas and associated populations, I used ISED's data titled "Service areas for competitive licensing". Attached as Exhibit N is a screenshot of the website I accessed.[12] By clicking on a given tier I was able to view the respective tiers at a lower level (i.e. Tier 3 or 4 areas within a given Tier 2 or 3 area, respectively). Therefore, for licences auctioned at the Tier 2 level, I was able to map those to their respective Tier 3

---

[8] Exhibit J: ISED website excerpt, "2500 MHz Auction – Final Results" (June 25, 2015), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11030.html. For the quantity of spectrum in a given 2500 MHz band see: Exhibit K: ISED website excerpt, "Auction of Spectrum Licences for Broadband Radio Service (BRS) – 2500 MHz Band, available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf10939.html.

[9] *Supra* note 5.

[10] Exhibit L: ISED website excerpt, "600 MHz Auction – Final Results" (2019), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11499.html.

[11] Exhibit M: ISED website excerpt, "3500 MHz Auction – Final Results" (December 20, 2021), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11722.html.

[12] Exhibit N: ISED website excerpt, "Service areas for competitive licensing" (2020), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/h_sf01627.html#tierMap.

area, then onward to the relevant Tier 4 area. For licences auctioned at the Tier 3 level I was able to map them to the relevant Tier 4 area.

10. An ISED online document, attached as Exhibit O titled "Transfer of Spectrum Licences Held by Vidéotron s.e.n.c. to Freedom Mobile Inc." that I accessed on ISED's website, states that 700MHz spectrum originally purchased by Vidéotron in the areas of 2-008 Southern Ontario, 2-018 (2-012) Alberta, and 2-013 British Columbia, as well as 2500MHz spectrum originally purchased by Vidéotron in the areas of 3-025 Toronto, 3-044 Edmonton, 3-047 Calgary, and 3-052 Vancouver, were transferred to Shaw (Freedom).[13]

11. An ISED online document, attached as Exhibit P titled "Deemed transfer of spectrum licences held by Corridor Communications Inc. to Xplornet Communications Inc." that I accessed on the ISED website states that spectrum in the 2500MHz band originally purchased by Corridor Communications Inc. ("**Corridor**") in the areas of 3-045 Medicine Hat/Brooks, 3-046 Lethbridge, 3-048 Red Deer was transferred to Xplornet.[14] An ISED online document, attached as Exhibit Q, titled "Transfer of Spectrum Licences Held by Corridor Communications Inc. to Kian Telecom Inc." that I accessed on ISED's website states that that the remainder of spectrum purchased by Corridor in the 2500MHz[15] auction was transferred to Kian Telecom Inc..[16]

12. ISED's results from the 2500MHz and 3500MHz auctions indicate that Bragg Communications (Eastlink) own 2500Mhz spectrum in area 3-049 Grande Prairie[17]

---

[13] Exhibit O: ISED website excerpt, "Transfer of Spectrum Licences Held by Vidéotron s.e.n.c. to Freedom Movile Inc.", (July 10, 2017), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11311.html.

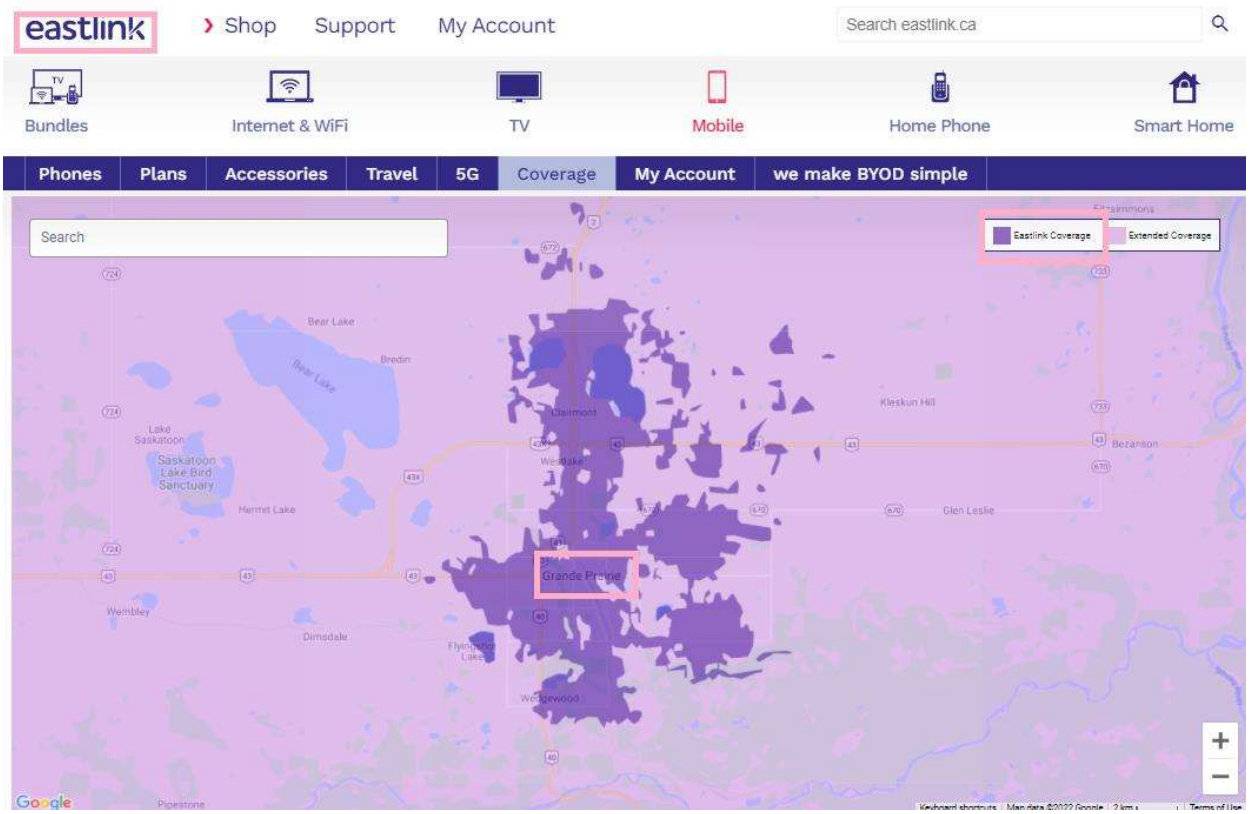
[14] Exhibit P: ISED website excerpt, "Deemed transfer of spectrum licences held by Corridor Communications Inc. to Xplornet Communications Inc." (October 30, 2020), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11644.html.

[15] *Supra* note 8.

[16] Exhibit Q: ISED website excerpt, "Transfer of Spectrum Licences Held by Corridor Communications Inc. to Kian Telecom Inc." (June 22, 2017), available at: https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11305.html.

[17] *Supra* note 8.

and 3500MHz spectrum in area 4-148 Grande Prairie.[18] On February 19th 2022 I accessed Eastlink's coverage map on their website, a screenshot of which is attached as Exhibit R,[19] to confirm that they operate a wireless network in the area of Grande Prairie, Alberta as highlighted below in a screen capture I took from their website:



13. ISED's spectrum auction results, available on the ISED website, indicate that ECOTEL Inc., Comcentric Networking Inc. and Thomas Communications Inc. all have localized spectrum holdings of 2500MHz[20] or 3500MHz[21] in the Overlap Areas as indicated in Exhibit A.

---

[18] *Supra* note 11.

[19] Exhibit R: Eastlink website excerpt, "Coverage Map", available at: https://www.eastlink.ca/mobile/coverage

[20] *Supra* note 8.

[21] *Supra* note 11.

III. METHODOLOGY

14. I began this process by constructing a spreadsheet mapping relevant Tier 4 areas back to their respective Tier 3 and Tier 2 areas using the sources described above. I then analyzed each of the sources described in Section II herein to identify the Tier 4 areas, type and quantity of spectrum owned by Shaw, Vidéotron, Xplornet and Cogeco. Using Excel formulas I then tabulated the spectrum owned by each respective company. I have cross referenced these results again with the sources listed in Section II to ensure the results were not altered in any unintended way and to minimize the risk of error.

IV. LIMITATIONS

15. In the auction of 2500MHz[22] and the residual auction of 700MHz, 2500MHz, 2300MHz, and PCS-G[23] spectrum Xplornet acquired spectrum in the "H Block". A page on ISED's website titled "Auction of Spectrum Licences for Broadband Radio Service (BRS) — 2500 MHz Band" explains how the H block is auctioned in the 2500 MHz auction.[24] It states that it is 25MHz but often auctioned in two distinct pieces. For the purposes of my tabulations I have counted any spectrum in the "H block" as 25MHz, likely an overestimation of 10-15MHz.

16. Finally, spectrum holdings for Vidéotron and Xplornet in Exhibit A are based solely on publicly posted auction results and official records of spectrum transfer. This Exhibit therefore does not account for subordination (lease) agreements between carriers which may not be publicly available.

    a. I accessed ISED's spectrum management database,[25] which I understand contains information on spectrum held for various purposes across Canada. The database stated that Vidéotron holds some AWS-1 spectrum in Ontario. It is my understanding that AWS-1 spectrum can be used to provide

---

[22] *Supra* note 8.

[23] *Supra* note 5.

[24] *Supra* note 8.

[25] Available at: https://sms-sgs.ic.gc.ca/eic/site/sms-sgs-prod.nsf/eng/h_00010.html

mobile wireless service. However this database is not in a format able to be mapped Exhibit A. Therefore, AWS-1 Spectrum owned by Vidéotron is omitted from Exhibit A given the results of the AWS1 auction are not available on ISED's website.

b. I accessed ISED's spectrum management database,[26] which stated that Xplornet does holds some WCS spectrum in Ontario. It is my understanding that WCS spectrum can be used to provide mobile wireless service but that Xplornet is using this spectrum to provide fixed wireless broadband. Therefore, WCS Spectrum owned by Xplornet is omitted from Exhibit A given the results of the WCS auction are not available on ISED's website.

SUPPLEMENTARY INFORMATION REQUEST
Shaw Communications Inc.

A. INSTRUCTIONS

In order to facilitate the handling and orderly maintenance of Records, including data, provided in response to this Supplementary Information Request ("SIR"), the following procedures shall be observed:

1. *General*

(a) Subject to subparagraphs 1(b) and 1(c), unless otherwise specified, this SIR requires the production of all responsive Records, including data, in the possession, custody, or control of the Company on the date that this SIR was issued.

(b) Notwithstanding subparagraph 1(a) above, and subject to subparagraph 1(c) below, the Company may be required to produce information and Records in response to certain paragraphs or subparagraphs of this SIR up to thirty (30) calendar days prior to the date of the Company's full compliance with this SIR, except responsive Records that must be translated into English or French, for which the date is forty-five (45) calendar days prior to the date of the Company's full compliance with this SIR ("Continuing Production Requirement").

(c) Unless otherwise specified,

(i) if the Company's full compliance with this SIR occurs within ninety (90) calendar days of the date of issuance of the SIR, then only paragraph 2 of Part D of this SIR are subject to the Continuing Production Requirement; and

(ii) if the Company's compliance with this SIR is completed more than ninety (90) calendar days after the date of the issuance of the SIR, then the entire SIR is subject to the Continuing Production Requirement.

(d) Unless otherwise specified, each paragraph and subparagraph of Part D of this SIR that requests Records, other than data, requires the Company to submit all responsive Records that were created or received by the Company during the two (2) calendar years immediately preceding the year of issuance of this SIR. The Company shall also submit Records for the period from January 1 of the current year to the later of either: (i) the date of issuance of this SIR, or (ii) such time as specified by a Continuing Production Requirement.

(e) Unless otherwise specified, each paragraph and subparagraph of Part D of this SIR that requests data requires the Company to submit such data for the period of three (3) calendar years immediately preceding the year of issuance of this SIR. The Company shall also submit data for the period from January 1 of the current year to the later of either: (i) the date of issuance of this SIR, or (ii) such time as specified by a Continuing Production Requirement.

(f) All responsive Records are to be produced in their entirety. If any portion of any Record is responsive to any paragraph or subparagraph of Part D of this SIR, then the entire responsive Record, as well as any other stapled or otherwise attached Records, shall be produced with privileged material redacted and recorded in a manner set forth in paragraphs 2(g) and 3(b) of Part A of this SIR.

(g) The Company shall provide an index that shall include an entry for each paragraph and subparagraph of Part D of this SIR, and a corresponding reference to all Records that are responsive to such paragraph or subparagraph. Records that are responsive to a particular paragraph or subparagraph may be referenced as a group. For example, a statement that the Records in "Binder 1", "Tab 1", "Box 1", or "CD 1" are responsive to paragraph 1 of Part D is acceptable. In the alternative, the Company shall provide a list of search terms used to identify potentially responsive documents and information or to eliminate potentially non-responsive documents and information provided in response to each paragraph and subparagraph of Part D of this SIR.

(h) Where a Record is responsive to more than one paragraph or subparagraph of Part D of this SIR, the Company may produce it only once, but must indicate in the index required in subparagraph (g) all paragraphs or subparagraphs to which the Record is responsive.

(i) The Records produced are to be either original Records or certified by affidavit of a duly authorized representative of the Company to be true copies.

(j) Those Records written in a language other than English or French must be translated into either English or French. The foreign language document must be submitted with the English or French translation attached thereto.

2. *Electronic Records*

(a) All electronically stored information ("ESI") (i.e., information readable in a computer system) should be produced free of computer viruses or malware, be accessible, readable and printable, and be devoid of passwords or encryption.

(b) All ESI should be produced in its original electronic format (i.e., native format) except where near-native format is required by subparagraph 2(c)(ii) and paragraph 2(f) of Part A of this SIR. Detailed instructions are set out in Schedule A of Part F for production using computer systems without application export capabilities and in Schedule B of Part F for production using litigation application exports. The Bureau's preference is to receive ESI in accordance with Schedule B of Part F.

(c) Where a Record being produced is part of a family, all parent and child Records should be produced and the parent/child relationship should be preserved. A family is a collection of pages or files produced manually or by a software application, constituting a logical single communication of information, but consisting of more than one single stand-alone Record. Examples include:

(i) a fax cover, the faxed letter, and an attachment to the letter, where the fax cover is the parent and the letter and attachment are each a child;

(ii) email repositories (e.g., Outlook .PST, Lotus .NSF) can contain a variety of Records, including messages, calendars, contacts, and tasks. For purposes of production, all parent Records, both native (e.g., documents, spreadsheets, presentations) and near-native (e.g., email, calendar, contacts, tasks, notes), and child Records (e.g., object linking and embedding items and attachments of files to emails or to other parent records) should be produced with the parent/child relationship preserved. Similar items found and collected outside an email repository (e.g., .MSG, .EML, .HTM, .MHT) should be produced in the same manner; and

(iii) archive file types (e.g., .zip, .rar) should be uncompressed for processing. Each file contained within an archive file should be produced as a child to the parent archive file. If the archive file is itself an attachment, that parent/child relationship should also be preserved.

(d) Hard copy or paper Records produced as ESI should be produced as single page TIFF images with a resolution of 300 dpi (dots per inch) and OCR generated text. The Records should be produced as they are kept, reflecting attachment relationships between Records and information about the file folders within which the Record is found. Where colour is required to interpret the Record, such as hard copy photos, and certain charts, that image should be produced in colour. These colour images are to be produced as .jpg format. Hard copy photographs should be produced as colour .jpg, if originally in colour, or greyscale .tif files if originally in black and white.

The following bibliographic information, if it is available, should also be provided for each Record:

(i) document ID
(ii) date
(iii) author / author organization
(iv) recipient / recipient organization

(e) Each database Record submitted in response to a paragraph or subparagraph of Part D of the SIR:

(i) should be produced whole, in a flat file, in a non-relational format and exported as a delimited text file where fields are separated by the pipe character (|) and a caret (^) is used as the text qualifier (e.g. ^Field1^|^Field2^|^Field3^ etc.); and

(ii) should include a list of field names; a definition for each field as it is used by the Company, including the meanings of all codes that can appear as field values; the format, including variable type and length, of each field; and the primary key in a given table that defines a unique observation.

(f) The Company may use de-duplication or email threading software if the Company provides the Bureau with a written description of the proposed process to be used, including what is considered a duplicate, and the Bureau confirms that the deployment of such processes permits the Company to comply fully with this SIR.

(g) Documents requiring redaction pursuant to any claim of privilege should be produced as single-page TIFF or multi-page PDF images and designated "Redacted" in the field as described in Schedule B of Part F of this SIR. Appropriately redacted searchable text (OCR of the redacted images is acceptable), metadata, and bibliographic information must also be provided. All documents that are part of a document family that includes a document withheld pursuant to any claim of privilege will be designated "Family Member of Privileged Doc" in the field as described in Schedule B for all other documents in its family. Placeholder images with BEGDOC#, FILENAME, FILEPATH and reason withheld (e.g., "Privileged") should be provided in place of the document images of the privileged document.

(h) All ESI should be provided on portable storage media appropriate to the volume of data (e.g., USB/flash drive, CD, DVD, hard drive) and should be identified with a label setting out the matter name, the contents and the date of production. Each medium should contain no more than 250,000 files (e.g., native ESI or images or a combination of both).

(i) In the event that ESI is delivered in a format that is not one of the formats set out in Schedule A or Schedule B of Part F of this SIR, the ESI should be provided along with all available instructions and other materials, including software, as necessary for the retrieval and use of the ESI (subject to any software licensing restrictions, which the Company and the Bureau should discuss in advance of production).

3. *Completeness*

(a) In accordance with section 118 of the *Competition Act*, the information supplied to the Commissioner pursuant to this SIR shall be certified on oath or solemn affirmation by:

(i) an officer of the Company supplying the information or other person duly authorized by the board of directors or other governing body of the Company; or

(ii) in the case of any other person supplying the information, by that person;

as having been examined by that person and as being, to the best of his/her knowledge and belief, correct and complete in all material respects.

(b) For each Record or portion thereof or any other information withheld under a claim pursuant to section 116 of the Competition Act, including:

(i) information that is not known or reasonably obtainable;

(ii) information that cannot be supplied because of the privilege that exists between lawyers and notaries and their clients, or information that cannot be supplied because of a confidentiality requirement established by law;

(iii) information that could not, on any reasonable basis, be considered to be relevant to an assessment by the Commissioner as to whether the Proposed Transaction would or would be likely to prevent or lessen competition substantially; or

(iv) information that has been previously supplied to the Commissioner;

the Company shall inform the Commissioner under oath or solemn affirmation of the reason why the information cannot or has not been supplied, as applicable, and where information has been previously supplied, the date such information was supplied.

B. QUESTIONS RELATING TO THIS SIR

Any questions you have relating to the scope or meaning of anything in this SIR should be directed to Laura Sonley at (819) 639-5839.

Please contact Trevor MacKay, Associate Deputy Commissioner, Mergers Directorate to discuss any objections regarding the scope of this SIR or compliance with this SIR. Where any objections remain unresolved following such discussions, the Company may submit a request to have such objections reviewed in accordance with the appeal procedures outlined in section 3.7 of the Bureau's *Merger Review Process Guidelines*.

C. DEFINITIONS

For the purposes of this SIR, the following definitions shall apply:

a. "5G" means 5th generation technology;

b. "Act" means the Competition Act, R.S.C., 1985, c. C-34, as amended;

c. "Affiliate" has the same meaning as in subsection 2(2) of the Act;

d. "Backhaul" means the infrastructure used to connect wireless cell sites to one another and the core network, including but not limited to fibre and microwave connections;

e. "BDU Services" means the sale of video content to subscribers by a Distribution Undertaking by wireline or direct-to-home satellite;

f. "Broadcasting Act" means the Broadcasting Act, R.S.C. 1991, c. 11, as amended;

g. "Business Wireline Services" means Wireline Services provided to business consumers excluding, where feasible, small office or home office customers who subscribe to Wireline Services offered primarily to residential consumers, for business use;

h. "Bureau" means the Competition Bureau;

i. "Carriage Terms" means all terms and conditions related to an agreement, expired, contemplated, or existing, between any combination of Distribution Undertakings, Program producers, and Programming Undertakings for the right to carry the Programming Undertaking or Program;

j. "Company" means Shaw Communications Inc., its domestic and foreign parents, predecessors, divisions, Affiliates, and all directors, officers, and employees of the foregoing;

k. "Corus Entertainment" means Corus Entertainment Inc.;

l. "CRTC" means the Canadian Radio-television and Telecommunications Commission;

m. "Data Dictionary" means documentation of the organization and structure of databases or data sets, including, for each table of information: the size (number of records and overall volume); a general description; a list of field names; a definition for each field as it is used by the Company, including the meanings of all codes that can appear as field values; the format, including variable type and length, of each field; and the primary key in a given table that defines a unique observation;

n. "Distribution Undertaking" has the same meaning as in subsection 2(1) of the Broadcasting Act, but excludes radio stations;

o. "dollar" means Canadian currency;

p. "ISED" means Innovation Science and Economic Development Canada (Industry Canada);

q. "MVNO" a wireless communications service provider that does not own the Wireless Network over which it provides Wireless Services;

r. "Non-Linear Services" means services for which a subscriber selects the viewing time, such as video-on-demand;

s. "Over-The-Top Platforms" means a transmitter of content directly to a Person without being transmitted or licensed through a Distribution Undertaking (e.g. Netflix, Amazon Prime, Disney+, etc.);

t. “Person” means any individual, partnership, limited partnership, firm, corporation, association, trust, unincorporated organization, or other entity, including Company;

u. “Program” has the same meaning as in subsection 2(1) of the Broadcasting Act, but excludes radio stations;

v. “Programming Undertaking” has the same meaning as in subsection 2(1) of the Broadcasting Act, but excludes radio stations;

w. “Proposed Transaction” means the proposed acquisition of Company by Rogers Communications Inc. as described in the Arrangement Agreement dated March 13, 2021;

x. “RAN” means radio access network;

y. “Record” has the same meaning as in subsection 2(1) of the Act and, for greater certainty, includes any email or other correspondence, mobile phone text messages, messages using third party messaging applications, memorandum, pictorial or graphic work, spreadsheet or other machine readable record and any other documentary material, regardless of physical form or characteristics;

z. “RDU Services” means services provided by a Distribution Undertaking to another Distribution Undertaking for purposes of retransmission to consumers;

aa. “Relevant Area” means (unless otherwise specified in a particular paragraph or subparagraph of this SIR) Canada;

bb. “Relevant Period” means (unless otherwise specified in a particular paragraph or subparagraph of this SIR): in respect of Records, January 1, 2019 to the date of issuance of this SIR, inclusive; and in respect of data, January 1, 2017 to the date of issuance of this SIR, inclusive;

cc. “Relevant Products” means, individually and collectively, Wireless Services, Wireline Services, Business Wireline Services, Transport Services, Wholesale Wireline Services, RDU Services, BDU Services, Programming Undertakings, and Programs;

dd. “RFP” means a request for proposals, requests for bids, requests for quotations, or any other similar solicitations, formal or informal, for the supply of any specified product or service, by any potential or actual customer;

ee. “Senior Officer” means the chairperson, president, chief executive officer, vice-president, secretary, treasurer, chief financial officer, chief operating officer, general manager, managing director, manager, or any individual who performs their functions;

ff. “Set-Top Box Data” means viewership data that is obtained through a set-top box or by comparable means;

gg. "SIR" means this request for additional information made by the Commissioner pursuant to subsection 114(2) of the Act;

hh. "Spectrum License" has the same meaning as in section 2 of the Radiocommunication Act, R.S.C., 1985, c. R-2, as amended;

ii. "Transport Services" means a point-to-point telecommunications service having the same meaning as the term transport in CRTC TRP 2015-326 and for greater certainty does not include services provided over a last mile, access level connection;

jj. "TRP 2021-130" means Telecom Regulatory Policy CRTC 2021-130 issued by the CRTC on April 15, 2021;

kk. "Wholesale Wireline Services" means the provision of a wireline telecommunications service to a service provider for the purpose of resale;

ll. "Wireless Network" means any infrastructure used to provide Wireless Services;

mm. "Wireless Services" means the provision of mobile communication services including voice, text, data, mobile broadband internet, and applications to consumers and business users of mobile devices;

nn. "Wireless Relevant Period" means January 1, 2017 to the date of issuance of this SIR, inclusive;

oo. "Wireline Services" means any wireline telecommunications service including voice services (i.e. telephone), data services, television, internet access, or bundles thereof provided to consumers and excludes Business Wireline Services, Transport Services and Wholesale Wireline Services; and

pp. "Wireline Network" means any infrastructure used to provide Wireline Services.

SPECIFICATIONS

D.1 General

1. Provide a current organizational chart and personnel directory and identify the individuals searched for the purpose of responding to this SIR, including their name, title, and a description of their roles and responsibilities.

2. Provide all Records relating to the Company's assessment of the Proposed Transaction with respect to competition, competitors, market shares, markets, pricing strategies, investment including related to 5G, implications for pre-existing or potential future network sharing agreements, the potential for sales growth or expansion into new products or geographies, and alternatives considered to the Proposed Transaction.

3. Provide descriptions and maps of the Company's existing and planned infrastructure for Wireless Services (distinguishing between 3G, 4G, 5G, or other generation of technology and distinguishing between spectrum frequency bands) and Wireline Services (separating access and transport components and distinguishing between optical fiber, coaxial cable, or other type of network) including actual or potential infrastructure available to the Company through network-sharing or network-leasing agreements (including, for greater certainty, those that route through the United-States or any other country). Where applicable,

   a. include descriptions of build commitments or joint build commitments included in any network-sharing or network-leasing agreement;

   b. indicate which components of this infrastructure are used for Wireline Services, Wireless Services as well as shared infrastructure; and

   c. indicate which components of this infrastructure are uniquely used to serve business customers, and indicate how those components are used for that purpose.

4. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period with respect to Wireless Services and Wireline Services in the Relevant Area for the purpose of Company's short term and long term network planning and network cost modelling including but not limited to factors like traffic, costs, quality, the introduction of new products and services, and including such reports prepared by equipment vendors.

5. Provide any training materials, scripts, frequently asked questions or other guidance materials provided to Company's sales staff and customer service representatives relating to Wireless Services or Wireline Services during the Relevant Period in the Relevant Area.

D.2 Wireless

6. Provide all Records prepared or received by a Senior Officer during the Wireless Relevant Period, with respect to Wireless Services in the Relevant Area relating to:

   a. the market share of Company or any of its potential or actual competitors;

   b. the strengths, weaknesses, or competitive position of any Person, including but not limited to network capability (e.g. coverage, quality, RAN, spectrum, Backhaul, and 5G deployment), bundling, distribution, pricing, and device offerings;

   c. Company's considered or actual competitive response to any Person;

   d. Company's considered or actual response to outcomes of the CRTC proceeding that resulted in TRP 2021-130;

e. potential or actual introduction of new products or services by any Person, including costs or impediments to the introduction of new services by any Person;

f. promotional activity specific to any region within the Relevant Area including but not limited to geographically targeted promotions, retention offers, and selling tactics;

g. analysis of costs and revenues including average revenue per user, customer acquisition cost, customer variable cost, customer lifetime value, return on investment, number of subscribers, subscriber gross additions, subscriber net additions, and subscriber churn;

h. negotiations regarding actual or potential agreements, including agreement renewals, to share or access any Person's Wireless Network including but not limited to MVNO access, spectrum, towers, Backhaul, or roaming; and

i. price monitoring, pricing policies, pricing lists, pricing forecasts, pricing zones, pricing strategies, pricing analyses, price competition, price matching, and discounts of any Person, including with respect to devices.

7. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Wireless Relevant Period with respect to Wireless Services in the Relevant Area relating to:

a. customer segments, customer profiles and brand positioning including but not limited to customer preferences such as technology (3G, 4G, and 5G), network quality, bundling, usage levels, payment type (pre-paid vs. post-paid), and devices; and, customer characteristics such as demographics and geographic location;

b. customer exit surveys or interviews;

c. demographics of customers switching to or from the Company;

d. competition with alternative technology forms (e.g. satellite, Wi-Fi, fixed wireless, wireline, etc.);

e. potential or actual investments in Company's network, including to enter new geographic areas and improve network quality;

f. plans, or existing agreements with manufactures, for the launch of 5G devices, including timelines, expected customer take-up, expected competitive responses;

g. customer complaints, customer retention, and customer switching;

h. potential or actual entry or expansion by any Person including entry or expansion in the provision of home internet using a Wireless Network, and including costs or impediments to entry or expansion by any Person;

i. Company's considered or actual response to changes in market demand or market trends; and

j. responses or anticipated responses of customers to changes in price, quality (including the introduction of 5G), service and innovations by any Person, including any estimated market or firm elasticities.

8. Provide a copy of all agreements in force at any time during the Relevant Period with respect to Wireless Services relating to:

a. actual or potential sharing of any component a Person's Wireless Network;

b. resale of Company's Wireless Network; and/or

c. jointly building or expanding a Wireless Network.

9. For each Spectrum Licence that is currently held by Company, identify:

a. the licence number;

b. the geographic scope of the licence, expressed as the "Service Area ID" assigned by ISED, including maps;

c. the frequency range or ranges in which Company is permitted to provide services;

d. the approved use of the spectrum (e.g. Wireless Network, fixed wireless, radio broadcasting, etc.);

e. the type of mobile wireless network deployed over spectrum (i.e. 3G, 4G or 5G);

f. indicate whether the license is subordinated to or from another carriers, if so which carrier; and

g. indicate if the spectrum is currently in use, if it is not in use indicate if there are plans to deploy it and when.

D.3 Wireline

10. Provide all Records prepared or received by a Senior Officer during the Relevant Period in respect of Wireline Services in the Relevant Area relating to:

a. the market share of Company or any of its potential or actual competitors;

b. price monitoring, pricing policies, pricing lists, pricing forecasts, pricing zones, pricing strategies, pricing analyses, price competition, price matching, and discounts of any Person;

c. the strengths, weaknesses, or competitive position of any Person, including but not limited to network capability, product offering, bundling, and pricing;

d. the geographic service area of any Person;

e. analysis of costs and revenues including average revenue per user, customer acquisition cost, customer variable cost, customer lifetime value, return on investment, number of subscribers, subscriber gross additions, subscriber net additions, and subscriber churn;

f. Company's considered or actual competitive response to any Person;

g. potential or actual customer acquisition or loss, customer retention, or customer switching behavior between any Person; and

h. actual or contemplated use by Company of Wholesale Wireline Services and/or Transport Services to provide services to customers.

11. Provide all Records prepared or received by a Senior Officer during the Relevant Period in respect of Transport Services in the Relevant Area relating to:

a. price monitoring, pricing policies, pricing lists, pricing forecasts, pricing zones, pricing strategies, pricing analyses, price competition, price matching, and discounts of any Person;

b. the strengths, weaknesses, or competitive position of any Person, including but not limited to network capability, product offering, bundling, and pricing;

c. Company's considered or actual competitive response to any Person;

d. the geographic service area of any Person; and

e. actual or contemplated use of the Company's networks by any Person either by commercial agreement (including off-tariff agreements) or by mandated access regimes, including any negotiations for such use and any alternatives to the Company's networks.

12. Provide all Records prepared or received by a Senior Officer during the Relevant Period with respect to Business Wireline Services in the Relevant Area relating to formal and informal RFPs including but not limited to Company's evaluation of, and considered responses to the RFP and any ensuing negotiation.

13. Provide all Records prepared or received by a Senior Officer during the Relevant Period in respect of Wholesale Wireline Services in the Relevant Area relating to actual or contemplated use of the Company's networks by any Person for the provision of Wireline

Services, either by commercial agreement (including off-tariff agreements) or by mandated access regimes, including any negotiations for such use and any alternatives to the Company's networks.

14. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period with respect to Wireline Services, Transport Services and Wholesale Wireline Services in the Relevant Area relating to any considered or actual entry, expansion, potential entry or potential expansion, potential for sales growth, or expansion into new products, including but not limited to, any acquisition, divestiture, joint venture, alliance, or merger by any Person.

15. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period with respect to Transport Services and Wholesale Wireline Services in the Relevant Area relating to any considered or actual cessation or severance of supply relationships.

16. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period with respect to Business Wireline Services in the Relevant Area relating to:

   a. the market share of Company or any of its potential or actual competitors;

   b. price monitoring, pricing policies, pricing lists, pricing forecasts, pricing zones, pricing strategies, pricing analyses, price competition, price matching, and discounts of any Person;

   c. the strengths, weaknesses, or competitive position of any Person, including but not limited to network capability, product offering, bundling, and pricing;

   d. the geographic service area of any Person; and

   e. Company's considered or actual competitive response to any Person.

17. Provide a copy of all agreements in force at any time during the Relevant Period between Company and any other Person related to the sharing, leasing or wholesale access of Wireline Network or related assets used to provide Transport Services, Wireline Services and/or Wireless Services to any customers in Canada.

D.4 Media

18. Provide all Records prepared or received by a Senior Officer during the Relevant Period in respect of Programs, Programming Undertakings, Over-The-Top Platforms, and BDU Services in the Relevant Area relating to:

   a. the market share of Company or any of its potential or actual competitors;

b. the strengths, weaknesses, or competitive position of any Person (including Company, Program creators, owners or vendors, Distribution Undertakings, Over-The-Top Platforms, and Programming Undertakings), including the current competitive position of, and potential future competition from any Person;

c. Company's considered or actual competitive responses to any Person;

d. Company's considered or actual competitive responses to changes in market demand or market trends;

e. Company's considered or actual competitive response to CRTC regulations, policies, notices or decisions;

f. the geographic service area of any Person;

g. analysis of costs and revenues including average revenue per user, customer acquisition cost, customer variable cost, customer lifetime value, return on investment, number of subscribers, subscriber gross additions, subscriber net additions, and subscriber churn;

h. price monitoring, pricing policies, pricing lists, pricing forecasts, pricing zones, pricing strategies, pricing analyses, price competition, price matching, and discounts of any Person;

i. potential or actual customer acquisition or loss, customer retention, or customer switching behavior between any Person (including Company);

j. any considered or actual entry, expansion, potential entry or potential expansion, potential for sales growth, or expansion into new products, including but not limited to, any acquisition, divestiture, joint venture, alliance, or merger by any Person (including Company);

k. negotiations for carriage of any Program or Programming Undertaking between any Program creator, owner or vendor; Programming Undertaking; Distribution Undertaking; or Over-The-Top Platforms, including, but not limited to, impact of CRTC regulations, policies and decisions, Carriage Terms, channel placement, rights for Non-Linear Services, and the use of benchmarks in the course of such negotiations;

l. access to subscriber data (including Set-Top Box Data), including third party access to subscriber data, Company policies regarding access to subscriber data, and the value of subscriber data;

m. past, current or potential withholding or disruption of a Program or Programming Undertaking signal to any Person by any Distribution Undertaking or Programming Undertaking;

n. potential impact to a Distribution Undertaking or a Programming Undertaking if they fail to secure access to a Program, Programming Undertaking or a Distribution Undertaking; and

o. licensing or sublicensing of content rights with respect to Non-Linear Services.

19. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period in respect of the geographic trade, catchment areas, or network coverage of any Program, Programming Undertaking, and BDU Services in the Relevant Area.

20. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer during the Relevant Period in respect of RDU Services in the Relevant Area relating to:

a. the market share of Company or any of its potential or actual competitors;

b. the strengths, weaknesses, or competitive position of any Person, including the current competitive position of, and potential future competition from any Person;

c. Company's considered or actual competitive responses to changes in market demand or market trends;

d. potential or actual customer acquisition or loss, customer retention, or customer switching behavior between any Person (including Company); and

e. formal and informal RFPs including but not limited to Company's evaluation of, and considered responses to the RFP.

21. Provide a copy of all agreements in force at any time during the Relevant Period between the Company and any:

a. Distribution Undertaking;

b. Programming Undertaking;

c. Program creator, owner or vendor;

d. Over-The-Top Platform; and

e. RDU Service customer.

22. For each radio station owned or operated by Company, provide:

a. the address of the physical location of the radio station;

b. a description of the target audience (e.g. demographic or other common characteristics);

c. a description of the category of programming (e.g. rock, alternative, jazz, etc.); and

d. a list of the top 10 advertising customers by annual revenue, including company name, the name of a contact person, telephone number and email address, if available.

23. Provide all reports, studies, surveys, analyses, strategic, business, and marketing plans prepared or received by a Senior Officer from January 1, 2018 to the date of issuance of this SIR relating to Company's sale of its interest in Corus Entertainment.

D.5 Data

24. Provide any managerial accounting report and financial statement (e.g. profit and loss, income statement) that records financial data on Company revenues, costs, margins, and profits for lines of business that include the Relevant Products, except Programs, in the Relevant Area during the Relevant Period at the most disaggregated regional level (e.g. provincial) and national level.

25. Provide any Company data, including all relevant Data Dictionaries, that records the following for each of BDU Services, Wireless Services, and Wireline Services separately in the Relevant Area during the Relevant Period:

a. Average revenue per user;

b. Customer acquisition cost, including a breakdown;

c. Customer variable cost, including a breakdown;

d. Customer lifetime value, including a breakdown;

e. Return on investment, including a breakdown; and

f. Number of subscribers, subscriber gross additions, subscriber net additions, and subscriber churn.

26. Provide any Company data, including all relevant Data Dictionaries, that record sales data related to the Relevant Products, except Programs and Business Wireline Services, in the Relevant Area during the Relevant Period in the most disaggregated form available (e.g. transaction level, if available). The response should contain, but should not be limited to, the information found in Appendices A-1 to A-7.

27. Provide any Company data, including all relevant Data Dictionaries, that record purchase or cost data related to (i) Distribution Undertaking's distribution of a Programming Undertaking's signal, and (ii) a Distribution Undertaking's utilization of RDU Services in

the Relevant Area during the Relevant Period in the most disaggregated form available. The response should contain, but should not be limited to, the information found in Appendices B-1 to B-2.

28. Provide a list of all cellular sites, spectrum, and retail stores that distributed Wireless Services during the Relevant Period in the Relevant Area. The response should contain, but should not be limited to, the information found in Appendices C-1 to C-2.

29. Provide a list of all promotions for each of BDU Services, Wireless Services, and Wireline Services separately in the Relevant Area during the Relevant Period. The response should contain, but should not be limited to, a description of the promotion, the brand under which the promotion was offered, the time the promotion was available, the area the promotion was available, and the number of customers who subscribed to the promotion.

30. Provide any Company data, including all relevant Data Dictionaries, regarding customer opportunities won and lost related to the Relevant Products, except Programs, in the Relevant Area during the Relevant Period in the most disaggregated form available. The response should contain, but should not be limited to, bidding by Company, customer switching to competitors, customer switching to different products within the Company, surveys of exiting customers, demographics of switching customers, cord cutting/shaving, and wireless number porting. The information should contain, but should not be limited to the information found in Appendices D-1 to D-2.

31. Provide any Company data, including all relevant Data Dictionaries, regarding supplier opportunities won and lost related to Programs in the Relevant Area during the Relevant Period in the most disaggregated form available. The response should contain, but should not be limited to, bidding by Company and supplier switching. The information should contain, but should not be limited to the information found in Appendix D-3.

32. Provide any third party data available to Company, including all relevant Data Dictionaries, related to the supply of the Relevant Products in the Relevant Area during the Relevant Period in the most disaggregated form available. Such data should include, but should not be limited to, pricing, revenues, quantities, margins, market shares, porting, switching, costs, capacities, quality, or location of suppliers.

E. <u>FORM OF CERTIFICATE</u>

CERTIFICATE

Pursuant to sections 116 and 118 of the Competition Act, R.S.C., 1985, c. C-34, as amended (the “Act”);

In the matter of the *[insert a description of the proposed transaction]* (the “Proposed Transaction”); and

In the matter of the request for additional information made by the Commissioner of Competition (the “Commissioner”) pursuant to subsection 114(2) of the Act on *[insert date]* in respect of the Proposed Transaction (the “Supplementary Information Request”);

I, *[name of person]*, of the City of *[name of city]*, in the Province of *[name of province]*, make oath and swear (or solemnly affirm and declare) as follows:

1. I am *[position title]* of *[name of Company]*. I have knowledge of the matters set out herein and am duly authorized to execute this Certificate.

2. I have reviewed the information, which is being supplied to the Commissioner in response to the Supplementary Information Request.

[Note: Where information required by subsection 114(2) is not being supplied on the basis of subsection 116(1), 116(2), or 116(2.1), including the following applicable paragraphs. Please refer to the appropriate section or subsection of the Supplementary Information Request when describing the information that has not been supplied.]

3. Pursuant to subsection 116(1) of the Act, the following information has not been supplied for the following reasons:

   (a) With respect to section [ ] of the Supplementary Information Request, information relating to *[insert description of omitted information]* cannot be supplied because *[Indicate which circumstance applies and the reason why information has not been supplied. E.g. it is not known or reasonably obtainable; of the privilege that exists in respect of lawyers and notaries and their clients; or it cannot be obtained without breaching a confidentiality requirement established by law.]*

   (b) With respect to section [ ] of the Supplementary Information Request, etc.

4. Pursuant to subsection 116(2) of the Act, the following information has not been supplied and could not be considered relevant for the following reasons:

5. Pursuant to subsection 116(2.1) of the Act, the following information has not been supplied at this time and was previously supplied at the following time(s):

   (a) With respect to section [ ] of the Supplementary Information Request, information relating to *[insert description of omitted information]* has not been supplied because it has previously been supplied *[insert details of when and the matters in respect of which the information was previously supplied]*;

   (b) With respect to section [ ] of the Supplementary Information Request, etc.

6. In accordance with section 118 of the Act, I have examined the information supplied to the Commissioner under subsection 114(2) of the Act and hereby certify that *[if information has not been supplied pursuant to section 116, then insert ", except as described above,"]* the information so supplied is, to the best of my knowledge and belief, correct and complete in all material respects and the records supplied are certified true copies of the original records.

SWORN BEFORE ME,)
[or SOLEMNLY AFFIRMED BEFORE ME],)
at the City of *[name of city]*,)
in the Province of *[name of province]*,)
this *[number]* day of *[month]*, *[year]*.)
)

A Commissioner, etc. *[NAME]*

F. PRODUCTION OF ELECTRONIC RECORDS

SCHEDULE A
Computer Systems With No Application Export Capabilities

1. ESI generated by office productivity suite software should be produced in its native format.

2. Emails should be produced in their near-native format. Where an email has attachments, the attachments should be left embedded in the native file and not extracted separately.

SCHEDULE B
Litigation Application Exports

1. A load file (e.g., Opticon (OPT), IPRO (LFP), Summation (DII) or Ringtail (MDB)) and all related ESI should be produced in native format, except where near-native format is required by subparagraph 2(c)(ii) and paragraph 2(f) of Part A of this SIR.

2. Within the delimited metadata file where fields are separated by the pipe character (|) and a caret (^) is used as the text qualifier (e.g. ^Field1^|^Field2^|^Field3^ etc.), and depending on the nature of the ESI, the following fields should be provided:

DOCID
BEGDOC
ENDDOC
BEGATTACH
ENDATTACH
FILEPATH
PARENTBATES (bates number of parent record)
CHILDBATES (bates number(s) of any child records)
MD5HASH (MD5HASH of the native format ESI)
TEXTPATH (link to extracted text on the production media for tiffs only)
NATIVEPATH (link to any files produced in native format on the production media)

The ESI produced should be indexed by using the ‘SPECIFICATION’ field as being responsive to the paragraphs or subparagraphs of Part D of this SIR. If multiple values exist for the specification, they should be separated by a semi-colon (e.g. 1a;1b;2a, etc.)

APPENDIX A-1: WIRELESS SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
   c) Carrier brand
2) Product information
   a) Product ID
   b) Product description
   c) Sales channel
   d) Sales type (e.g. sale or finance)
   e) Introduction date
   f) Product category and characteristics
3) Plan information
   a) Plan ID
   b) Plan description
   c) Device category (e.g. mobile phone, tablet)
   d) Pre-paid or post-paid indicator
   e) Whether the plan includes a device or device subsidy
   f) Shared plan indicator
   g) First or additional line indicator
   h) Plan limits for each included service (e.g. voice minutes, data, etc.)
   i) Plan speed limited (e.g. “3G” plans)
   j) Additional plan restrictions (e.g. data throttled when roaming or over plan limit)
   k) Any other plan characteristics
4) Bundle information
   a) Indicate the number of any other services bundled with the Wireless Services
   b) Indicate whether any wireline telephony service is bundled with the Wireless Services
   c) Indicate whether any wireline internet service is bundled with the Wireless Services
   d) Indicate whether any wireline television service is bundled with the Wireless Services
5) Usage information
   a) Minutes
   b) Texts
   c) Data
6) Additional service charges
   a) Indicate each additional applicable service charge (e.g. overage, long distance, roaming, etc.)
7) Sales information
   a) Number of units
   b) Unit of measure
   c) Rebates, discounts, promotion
   d) Final price (excluding taxes)
   e) Tax

   f) Cost of goods sold / cost of sales
8) Customer account information
   a) Customer account ID
   b) Customer account name and address
   c) Residential or business indicator
   d) Any other customer characteristics
9) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Remaining balance of device financing plan
   d) Any other contract characteristics

APPENDIX A-2: WIRELINE SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
   c) Carrier brand
2) Plan information
   a) Plan ID
   b) Plan description
   c) Plan technology (e.g. optical fiber, coaxial cable);
   d) Plan limits for each included service (e.g. data)
   e) Plan speed limited (e.g. "50 Mbps down / 10 Mbps up" plans)
   f) Additional plan restrictions (e.g. number of simultaneously supported devices, data throttled when over plan limit)
   g) Any other plan characteristics (e.g. email account offerings, installation type and charges, etc.)
3) Bundle information
   a) Indicate the number of any other services bundled with the internet service
   b) Indicate whether any wireline telephony service is bundled with the internet service
   c) Indicate whether any wireline television service is bundled with the internet service
   d) Indicate whether any wireline wireless service is bundled with the internet service
4) Usage information
   a) Data
5) Additional charges
   a) Indicate each additional applicable charge (e.g. modem or modem rental, overage, installation)
6) Sales information
   a) Number of units
   b) Unit of measure
   c) Rebates, discounts, promotion
   d) Final price (excluding taxes)
   e) Tax
   f) Cost of goods sold / cost of sales
7) Customer account information
   a) Customer account ID
   b) Customer account name and address
   c) Residential or business indicator
   d) Any other customer characteristics
8) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Any other contract characteristics

APPENDIX A-3: TRANSPORT SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) Transport Services information
   a) Transport Service ID
   b) Transport Service name and description
   c) Any other Transport Service characteristics
3) Sales information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
   e) Cost of sales
4) Customer information
   a) Customer ID
   b) Customer name and address
   c) Customer category and characteristics
5) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Contract characteristics

APPENDIX A-4: WHOLESALE WIRELINE SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) Wholesale Wireline Services information
   a) Wholesale Wireline Service ID
   b) Wholesale Wireline Service name and description
   c) Any other Wholesale Wireline Service characteristics
3) Sales information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
   e) Cost of sales
4) Customer information
   a) Customer ID
   b) Customer name and address
   c) Customer category and characteristics
5) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Contract characteristics

APPENDIX A-5: RDU SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) RDU services information
   a) RDU service ID
   b) RDU service name and description
   c) Any other RDU service characteristics
3) Sales information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
   e) Cost of sales
4) Customer information
   a) Customer ID
   b) Customer name and address
   c) Customer category and characteristics
5) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Contract characteristics

APPENDIX A-6: BDU SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) Plan information
   a) Plan ID
   b) Plan description
   c) Number of channels included by type of program type (e.g. conventional, discretionary)
   d) Any other plan characteristics
3) Bundle information
   a) Indicate the number of any other services bundled with the television service
   b) Indicate whether any wireline telephony service is bundled with the television service
   c) Indicate whether any wireline internet service is bundled with the television service
   d) Indicate whether any wireless service is bundled with the television service
4) Additional charges
   a) Indicate each additional applicable charge (e.g. pay-per-view, video-on-demand, Over-The-Top Platform)
5) Sales information
   a) Number of units
   b) Unit of measure
   c) Rebates, discounts, promotion
   d) Final price (excluding taxes)
   e) Tax
   f) Cost of goods sold / cost of sales
6) Customer account information
   a) Customer account ID
   b) Customer account name and address
   c) Residential or business indicator
   d) Any other customer characteristics (e.g. customer demographics)
7) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Any other contract characteristics

APPENDIX A-7: PROGRAMMING UNDERTAKINGS

1) Transaction information
    a) Transaction ID
    b) Transaction date
2) Program information
    a) Program ID
    b) Program name and description
    c) Program language
    d) Program type (e.g. conventional, discretionary)
    e) Program penetration rate with BDU
    f) Program tiering or packaging (e.g. basic) with BDU
    g) Any other program characteristics
3) Sales information
    a) Number of units
    b) Unit of measure
    c) Final price (excluding taxes)
    d) Tax
    e) Cost of goods sold / cost of sales
4) Distribution Undertaking information
    a) Distribution Undertaking ID
    b) Distribution Undertaking name and address
    c) Distribution Undertaking category and characteristics
5) Advertising information
    a) Advertising revenue
    b) Advertising costs
    c) Advertising margins
    d) Advertising quantity
6) Contract information
    a) Contract ID
    b) Contract start date and term
    c) Contract characteristics

APPENDIX B-1: PURCHASES OF PROGRAMING UNDERTAKING

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) Programming information
   a) Program ID
   b) Program name and description
   c) Program language
   d) Program type (e.g. conventional, discretionary)
   e) Program penetration rate
   f) Program tiering or packaging (e.g. basic)
   g) Any other program characteristics
3) Supplier information
   a) Supplier ID
   b) Supplier name and address
4) Purchase information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
5) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Contract characteristics

APPENDIX B-2: PURCHASES OF RDU SERVICES

1) Transaction information
   a) Transaction ID
   b) Transaction date
2) RDU Services information
   a) RDU Service ID
   b) RDU Service name and description
   c) Any other RDU Service characteristics
3) Supplier information
   a) Supplier ID
   b) Supplier name and address
4) Purchase information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
5) Contract information
   a) Contract ID
   b) Contract start date and term
   c) Contract characteristics

APPENDIX C-1: CELLULAR SITES AND SPECTRUM

1) A unique identifier for the cellular site;
2) Address;
3) City;
4) Province;
5) Postal Code
6) Latitude;
7) Longitude;
8) The spectrum service areas the cellular site is in;
9) Owner(s);
10) Operator (e.g. Rogers, Shaw, Bell, Telus);
11) Collocated carriers;
12) Number of available spaces including any limits on the spaces (e.g. weight loads);
13) Geography type (e.g. metro, urban, rural, remote);
14) Location type (e.g. tower, building, microcell, indoor);
15) Wireless standard (e.g. HSPA, LTE, 5G);
16) Number of sectors or cells;
17) Backhaul technology (e.g. fiber, microwave);
18) Available spectrum (in MHz) by band (e.g. PCS, AWS) and specific frequency ranges;
19) Deployed spectrum (in MHz) by band (e.g. PCS, AWS), specific frequency ranges, and wireless standard;
20) Backhaul capacity (incoming and outgoing) for each year during the Relevant Period;
21) Latency (e.g. average round-trip latency in milliseconds during the bouncing busy hour) for each year during the Relevant Period;
22) Upload and download speed (e.g. average user speed in Mbps during the bouncing busy hour) for each year during the Relevant Period;
23) Upload and download capacity (e.g. gigabytes per hour during the bouncing busy hour) for each year during the Relevant Period;
24) Upload and download peak traffic (e.g. gigabytes per hour during the bouncing busy hour) for each year during the Relevant Period;
25) Upload and download average traffic (e.g. average gigabytes per hour) for each year during the Relevant Period; and
26) Whether the cellular site started or stopped operations during the Relevant Period and the dates of any beginning or end of operations.

APPENDIX C-2: RETAIL LOCATIONS

1) A unique identifier for the store;
2) Address;
3) City;
4) Province;
5) Postal Code
6) Latitude;
7) Longitude;
8) Carrier brand;
9) Location type (e.g. mall kiosk, standalone)
10) Owner/operator type (e.g. corporate, dealer, franchise)
11) Store size (e.g. square footage)
12) Store revenue for each of wireless, internet, television, and telephony, separately and combined, for each year during the Relevant Period
13) Whether the store opened or was acquired during the Relevant Period or has closed or has been divested, is slated for closure, divestiture, renovation, rebranding, or expansion, and the dates of any opening, closure, expected closure, renovation, rebranding, or expansion.

APPENDIX D-1: RFP BIDS

1) Opportunity information
    a) Opportunity ID
    b) Date
    c) Amount of Company's offer
    d) Actual or estimated total cost
    e) Contract or transaction ID (if winning bid)
2) Customer information
    a) Customer ID
    b) Customer name and address
    c) Customer category and characteristics
3) Product information
    a) Product ID
    b) Product description, category, and characteristics
    c) Number of units
    d) Unit of measure
    e) Product price (excluding taxes)
    f) Tax
    g) Cost of sales
4) Competitor information
    a) Competitors
    b) Incumbent
    c) Prices bid
    d) Identity of winning bidder
5) Reasons for win/loss

APPENDIX D-2: WIRELESS NUMBER PORTABILITY

1) Date
2) Whether the customer is porting in to the Company or porting out from the Company
3) Which other Person the customer is porting from or to
4) Whether the customer is porting from or to a wireless or wireline service
5) Whether the customer is a residential or business customer
6) Whether the customer is a pre-paid or post-paid customer
7) Customer ID
8) Customer address
9) Customer phone number area code
10) Any other customer characteristics

APPENDIX D-3: RFP BIDS FOR PROGRAMS

1) Opportunity information
   a) Opportunity ID
   b) Date
   c) Amount of Company's offer
   d) Actual or estimated total cost
   e) Contract or transaction ID (if winning bid)
2) Supplier information
   a) Supplier ID
   b) Supplier name and address
   c) Supplier category and characteristics
3) Programming information
   a) Program ID
   b) Program name and description
   c) Program language
   d) Program type (e.g. conventional, discretionary)
   e) Program penetration rate
   f) Program tiering or packaging (e.g. basic)
   g) Any other program characteristics
4) Bid information
   a) Number of units
   b) Unit of measure
   c) Final price (excluding taxes)
   d) Tax
   e) Cost of sales
5) Competitor information
   a) Competitors
   b) Incumbent
   c) Prices bid
   d) Identity of winning bidder
6) Reasons for win/loss

THE COMPETITION TRIBUNAL

IN THE MATTER OF the Competition Act, R.S.C. 1985, c. C-34;

AND IN THE MATTER OF the proposed acquisition by Rogers Communications Inc. or an affiliate thereof of Shaw Communications Inc.;

AND IN THE MATTER OF an application by the Commissioner of Competition for one or more orders pursuant to section 92 of the Competition Act.

AND IN THE MATTER OF an Application by the Commissioner of Competition for an interim order pursuant to section 104 of the Competition Act

BETWEEN:

THE COMMISSIONER OF COMPETITION

Applicant

– and –

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondent

AFFIDAVIT OF COGECO COMMUNICATIONS INC.

I, Paul Beaudry, of the city of Westmount, in the Province of Quebec, state as follows:

1. I am the Vice President, Regulatory Affairs for Cogeco Communications Inc. (**"Cogeco"**).

2. My main responsibilities involve representing Cogeco and its subsidiaries in proceedings before the Canadian Radio-television and Telecommunications Commission ("**CRTC**") and other federal departments and agencies with respect to broadcasting and telecommunications matters.

3. I have personal knowledge of the matters in this affidavit, except where I have otherwise indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

4. I make this affidavit in connection with an application by the Commissioner of Competition (the "**Commissioner**") against Rogers Communications Inc. ("**Rogers**") and Shaw Communications Inc. ("**Shaw**"), relating to their merger (the "**Proposed Transaction**").

OPERATIONS OF COGECO

5. Cogeco is a communications company headquartered in Montreal, Quebec, that provides video, Internet and wireline telephony services in the United States and Canada. Through its affiliate Cogeco Connexion Inc., these services are offered in Ontario and Quebec to retail residential and business customers in addition to wholesale third party Internet access and transport services offered to Internet service-based providers.

COGECO'S ENTRY AS A WIRELESS MVNO

6. In 2021, the CRTC mandated the provision of a wholesale facilities-based Mobile Virtual Network Operator ("**MVNO**") access service by the three national Mobile Network Operators ("**MNOs**") and Sasktel where these MNOs exercise market power, in all areas where regional carriers have secured a spectrum licence at the Tier 4 level or higher (the "**MVNO Access Service**").

7. Terms and conditions for the service are to be filed for approval with the CRTC, while rates are to be commercially negotiated, with final offer arbitration by the CRTC as a recourse if negotiations fail. The MVNO Access Service is mandated to last for a period of seven years. In July 2021, the MNOs filed proposed tariffs to implement the CRTC's facilities-based MVNO Access Service and the CRTC commenced tariff proceedings in connection therewith (the "**Tariff Proceedings**").

8. Cogeco is interested in launching a mobile wireless service using the MVNO Access Service, subject to the approval by the CRTC of reasonable terms and conditions for the service and to Cogeco's ability to negotiate or otherwise secure satisfactory rates with one or several of the MNOs. Cogeco owns spectrum licences in 30 Tier 4 areas in Ontario and 25 in Quebec, which would in principle allow Cogeco to operate as an MVNO in large portions of both provinces. A list of Cogeco's spectrum holdings at the Tier 4 level or higher is attached to this affidavit as Exhibit "**A**".

9. As Cogeco has articulated through the Tariff Proceedings, from a business perspective, there are significant deficiencies in the MNOs' proposed tariffs that, collectively, significantly diminish Cogeco's ability to offer services and effectively compete in any Tier 4 area in Ontario and Quebec where it has spectrum. This, in turn, is likely to have the effect of impeding important investments by Cogeco in these areas.

10. Some of the proposed conditions would require prospective MVNOs like Cogeco to provide wireless services of inferior quality to those offered by the MNOs themselves. In other cases, essential conditions for planning and implementing competitive MVNO services are vague or entirely missing.

11. By undermining the possibility of providing competitively sustainable MVNO services in a timely manner, the proposed tariff conditions will discourage eligible wireless carriers from investing in MVNO services. Specifically:

i) The proposed tariffs do not include service descriptions. This makes it difficult or impossible to determine what service the MNO will actually be providing to prospective MVNOs;

ii) There is no provision for seamless roaming within Tier 4 licensed areas. Seamless roaming involves networks handing off and receiving calls and data sessions to and from other networks without any interruption in service. This is a key omission that would have a significant impact on MVNOs' plans for radio access network deployment. Carriers entering the market for the first time will deploy networks gradually, starting in denser population areas and expanding over the course of several years, much as the MNOs have historically done. As a result, as an MVNO's network is only partially deployed within a particular Tier 4 service area, it will be necessary for the MVNO's customer to seamlessly roam from the MVNO's network to the MNO's network within Tier 4 service areas to enable a mobile wireless service of similar quality as that of the MNO;

iii) Numerous restrictions are proposed on entities' eligibility to receive the MVNO Access Service. For instance, MNOs have designed their terms and conditions so that the mandated MVNO service is only accessible to existing mobile carriers that have an active public mobile network and are actively providing commercial mobile services within a Tier 4 licence area, which, if accepted, would make Cogeco ineligible to use the MVNO service;

iv) There are unnecessary technical restrictions on the availability of the MVNO service. These include, but are not limited to, a requirement to own at least 20 MHz of spectrum as a primary licensee in any given Tier 4 licence area, the MVNO's inability to access an MNO partner's network, no option to enter into direct connection with an MNO; limitations on the types of customers that an MVNO can serve and limitations on the types of end-customer devices the MVNOs can use for their customers. These restrictions limit the ability of prospective MVNOs to provide a service of equal quality to that offered by the MNOs;

v) The proposed tariffs require that MVNOs provide MNOs with precise traffic forecasts, and, in some cases, pay financial penalties for failure to meet such forecasts, which are overly punitive and unjustified;

vi) The proposed tariffs do not include service level details (e.g., latency for data services, percentage of dropped calls, etc.) for services to be provided by the MNO to their MVNO customers. They also include ill-defined requirements around the provision of technical support from MNOs to MVNOs; and

vii) There is an unjustified reduction of the Commission's 7-year mandate for MVNO access. At one end, the proposed tariffs cap user growth one year prior to the expiration of the mandate. At the other end, a number of additional agreements must be negotiated prior to MVNOs being able to offer service, which would unduly shorten the mandated period in which these wholesale services are available to MVNOs.

12. Also, even apart from these issues, the CRTC's recent decision to implement a limited, facilities-based MVNO framework in Canada is unlikely to be sufficient for Cogeco to produce meaningful competition in the wireless market in the short term, because of the following factors:

i) The MVNO Access Service tariffs are still not final, and are not expected to be final, until at least the middle of 2022 at the earliest;

ii) Prospective MVNOs still need to negotiate rates for the MVNO Access Service they receive from the MNOs. It is unclear to Cogeco when such negotiations will occur; and

iii) Cogeco expects that MNOs will attempt to delay the launch of, and frustrate the viability of facilities-based MVNOs at every possible juncture.

Notes:

- **Service areas are comprised of ISED grid cells.** ISED grid cells are 1 minute latitude by 1 minute longitude blocks, of which there are almost 8 million (7,976,986) covering the country.
- **Service area boundaries are based on amalgamations of ISED grid cells, defined primarily using Statistics Canada, provincial/territorial, and previous carrier service boundaries.** User-defined licence areas exist in some circumstances based on a single grid cell or amalgamations of grid cells.
- **Current service areas do not cover the entire official Canadian territorial limits.** Some Canadian offshore waters are not covered by service areas and are licensed on a case-by-case basis.
- **Population and dwelling figures may contain portions of people or dwellings – this is normal.** As Statistics Canada census data covering one area is imported into grid cells, this data is divided between the grid cells that cover that same area, resulting in portions of people and dwellings in individual grid cells. Individual grid cell data is then aggregated into totals for each service area.
- **Tier 5 values are to be considered draft** and are subject to change until import to ISED systems is completed.

- **Service areas for spectrum licensing do not extend outside Canada.** Due to the characteristics of grid cell sizes (based on minimum 1-minute latitude by 1-minute longitude), service areas along the border may appear to overlap with the United States, even though they are limited to Canada.
- **If you spot any errors or omissions,** please contact the Spectrum Management Operations Branch.

Transfer of Spectrum Licences Held by Vidéotron s.e.n.c. to Freedom Mobile Inc.

Transfer decision

Application

1. On June 13, 2017, Innovation, Science and Economic Development Canada (ISED) received an application for the transfer of three spectrum licences in the Mobile Broadband Service (MBS) band and four spectrum licences in the Broadband Radio Service (BRS) band, from Vidéotron s.e.n.c., a Quebecor Media Inc. (Quebecor) affiliate, through a series of Quebecor affiliate companies, [1] to Freedom Mobile Inc. (Freedom Mobile), an affiliate of Shaw Communications Inc. (Shaw). The licences are in Southern Ontario, Alberta and British Columbia and are described in annex A.

2. The application was reviewed under the relevant provisions of Client Procedures Circular CPC-2-1-23, *Licensing Procedure for Spectrum Licences for Terrestrial Services*.

3. Capitalized terms not defined in this decision have the meaning set out in CPC-2-1-23.

Decision

4. The overall transfer of the licences from Vidéotron to Freedom Mobile is **approved**.

Rationale

5. The application was assessed against the policy objectives and criteria set out in section 5.6 of CPC-2-1-23.

6. ISED notes that the requested licence transfers involve spectrum that is currently not being used to provide services and will provide an opportunity to Freedom Mobile to put such spectrum to use for the benefit of Canadians.

7. ISED has determined that the requested licence transfers will not significantly impact the ability of existing or future competitors to provide services given that the transfer will not substantially change the post-transfer concentration of commercial mobile spectrum in the affected licence areas.

Annex A

Licences to be transferred from Vidéotron s.e.n.c. to Freedom Mobile Inc.

Licence	Expiry date	Frequency range (MHz)	Tier	Geographic area	Service	Frequency block
010282987-001	02-Apr-34	746 - 751 / 777 - 782	2-008	Southern Ontario	MBS	Block C1
010283471-001	02-Apr-34	746 - 751 / 777 - 782	2-013	British Columbia	MBS	Block C1
010282989-001	02-Apr-34	746 - 751 / 777 - 782	2-018	Alberta	MBS	Block C1

Licence	Expiry date	Frequency range (MHz)	Tier	Geographic area	Service	Frequency block
010282447-001	23-Jun-35	2540 - 2550 / 2660 - 2670	3-025	Toronto	BRS	Block E
010282973-001	23-Jun-35	2560 - 2570 / 2680 - 2690	3-044	Edmonton	BRS	Block G
010283713-001	23-Jun-35	2560 - 2570 / 2680 - 2690	3-047	Calgary	BRS	Block G
010283991-001	23-Jun-35	2540 - 2550 / 2660 - 2670	3-052	Vancouver	BRS	Block E

Footnotes

1 The application included a series of spectrum licence transfers internal to Quebecor prior to the transfer to Freedom Mobile.

Date modified:
2017-07-10

Deemed transfer of spectrum licences held by Corridor Communications Inc. to Xplornet Communications Inc.

Application

1. Innovation, Science and Economic Development Canada (ISED) received an application for the deemed transfer of spectrum licences in the Broadband Radio Services 2500 MHz band and in the Fixed Wireless Access 3500 MHz band in areas across Alberta from Corridor Communications Inc. (CCI) to Xplornet Communications Inc. (Xplornet). The licences are described in the annex.

2. The application was reviewed under the relevant provisions of Client Procedures Circular CPC-2-1-23, *Licensing Procedure for Spectrum Licences for Terrestrial Services*, and in accordance with SLPB-001-19, *Decision on Revisions to the 3500 MHz Band to Accommodate Flexible Use and Preliminary Decisions on Changes to the 3800 MHz Band*.

3. Terms not defined in this decision have the meaning set out in CPC-2-1-23.

Decision

4. The deemed transfer of licences from CCI to Xplornet described above is **approved**.

Rationale

5. The application was assessed against the policy objectives and criteria set out in section 5.6 of CPC-2-1-23.

6. ISED has determined that the requested deemed transfer of licences will not affect the ability of existing or future competitors to provide services in the affected geographic areas.

Annex

Licences to be transferred from Corridor Communications Inc. to Xplornet Communications Inc.

Licence number	Expiry date (YYYY-MM-DD)	Frequency range (MHz)	Tier number and geographic area

Transfer of Spectrum Licences Held by Corridor Communications Inc. to Kian Telecom Inc.

Transfer decision

Application

1. On May 8, 2017, Innovation, Science and Economic Development Canada (ISED) received an application for the transfer of ten spectrum licences in the broadband radio service (BRS) band throughout Eastern and Southern Ontario from Corridor Communications Inc. (CCI) to Kian Telecom Inc. (Kian Telecom). The licences are described in annex A.

2. The application was reviewed under the relevant provisions of Client Procedures Circular CPC-2-1-23, *Licensing Procedure for Spectrum Licences for Terrestrial Services*.

3. Terms not defined in this decision have the meaning set out in CPC-2-1-23.

Decision

4. The transfer of the licences from CCI to Kian Telecom is **approved**.

Rationale

5. The application was assessed against the policy objectives and criteria set out in section 5.6 of CPC-2-1-23.

6. ISED notes that the licence transfer will not result in a significant change in spectrum concentration in the licence areas.

7. ISED has determined that the requested licence transfer will not impact the ability of existing or future competitors to provide services given that the transfer will not significantly change the post-transfer concentration of commercial mobile spectrum in the affected licence areas.

Annex A

Licences to be transferred from Corridor Communications Inc. to Kian Telecom Inc.

Licence number	Expiry date	Frequency band (MHz)	Geographic area

THE COMPETITION TRIBUNAL

IN THE MATTER OF the *Competition Act*, R.S.C. 1985, c.C-34;

AND IN THE MATTER OF the proposed acquisition by Rogers Communications Inc. of Shaw Communications Inc.; and

AND IN THE MATTER OF an Application by the Commissioner of Competition for an order pursuant to section 92 of the *Competition Act*;

AND IN THE MATTER OF an Application by the Commissioner of Competition for an interim order pursuant to section 104 of the *Competition Act*;

B E T W E E N:

COMMISSIONER OF COMPETITION

Applicant

- and –

ROGERS COMMUNICATIONS INC. AND SHAW COMMUNICATIONS INC.

Respondents

AFFIDAVIT OF DARIAN BAKELAAR
(Affirmed May 7, 2022)

I, DARIAN BAKELAAR, Paralegal at Competition Bureau Legal Services of the Department of Justice, in the City of Gatineau in the Province of Quebec AFFIRM THAT:

1. The Commissioner of Competition entered into an Efficiencies Timing Agreement with the Respondents, effective September 21, 2021 (the "ETA"). A copy of the ETA is attached as **Exhibit A**.

2. Paragraph 1 of the ETA states:

> The Merging Parties shall provide at least 30 days' notice to the Commissioner before closing the Proposed Transaction or any part of the Proposed Transaction, unless the Commissioner has issued a no action

> letter. […] After the Merging Parties have provided such notice, the Commissioner and Competition Bureau shall have no further obligations under this agreement, and apart from observing the notice period before closing the Proposed Transaction, the Merging Parties shall have no further obligations under this agreement.

3. Paragraph 2 of the ETA states:

> The Commissioner shall not file an application under s. 92, s. 100 or s. 104 of the Act in respect of the Proposed Transaction unless the Merging Parties have provided the notice described in paragraph 1 of this agreement or waived compliance with this provision.

4. On February 24, 2022, the Chief Executive Officer of Rogers Communications Inc. ("Rogers"), Anthony Staffieri, wrote to the Commissioner and advised as follows:

> To ensure such time is available, and for other reasons, the Outside Date for the Arrangement Agreement among Rogers and Shaw has extended to June 13". In addition, as you know, the merger cannot close until ISED approval is obtained and the Efficiencies Timing Agreement provides other protections against closing (and which the parties will respect). [Underlining in original.]

5. A copy of Mr. Staffieri's email dated February 24, 2022 is attached as **Exhibit B.**

6. On March 9, 2022 counsel for Rogers wrote to counsel for the Commissioner [redacted] This letter is attached as **Exhibit C.**

7. On March 9, 2022 counsel for the Commissioner wrote to counsel for Rogers. Attached as **Exhibit D** is the Commissioner's letter of March 9, 2022.

8. In a letter dated March 17, 2022, counsel for Rogers repeated that [redacted] This correspondence is attached as **Exhibit E.**

9. In its 2021 Annual Report filed on March 3, 2022, Rogers stated that it "has extended the outside date for closing the Transaction from March 15, 2022 to June

13, 2022 in accordance with the terms of the arrangement agreement".[1] An excerpt of this document is attached as **Exhibit F.**

10. I have reviewed the Arrangement Agreement between Rogers and Shaw Communications Inc. ("Shaw"), and attach an excerpt of the document as **Exhibit G**. The Arrangement Agreement states as follows in paragraph 1.3(a) with respect to the "Outside Date":

> Either the Company or the Purchaser shall have the right to postpone the Outside Date on one or more occasions (by at least 10 days or an integral multiple thereof, as specified by the postponing Party) ***up to a maximum of 90 days*** if one or more of the Key Regulatory Approvals have not been obtained and none of such remaining Key Regulatory Approvals has been denied by a non-appealable decision of a Governmental Entity [emphasis added].

11. "Outside Date" is defined as follows in the defined terms for the Agreement:

> "Outside Date" means March 15, 2022, subject to automatic adjustment in accordance with this Agreement, or such later date as may be agreed in writing by the Parties; provided however that if the Outside Date shall occur on a day that is not a Business Day, the Outside Date shall be deemed to .occur on the next Business Day.

12. June 13, 2022 is 90 days after March 14, 2022.

13. On April 29, 2022, Mr. Staffieri emailed the Commissioner, copying Brad Shaw, Executive Chair and Chief Executive Officer of Shaw. Mr. Staffieri advised as follows:

> Thank you for your time earlier today. [redacted]

14. A copy of Mr. Staffieri's email is attached as **Exhibit H**.

[1] Exhibit F – Rogers Communications Inc., 2021 Annual Report (March 3, 2022), p. 16 [excerpt].

15. On May 2, 2022, counsel to Rogers and Shaw provided copies of [redacted] A copy of [redacted] is attached as **Exhibit I**. A copy of [redacted] is attached as **Exhibit J**.

16. On May 7, 2022, Rogers issued a news release stating that the "Rogers, Shaw and the Shaw Family Living Trust have agreed to extend the outside date of the Transaction to July 31, 2022." This news release is attached as **Exhibit K.**

Affirmed remotely by Darian Bakelaar at the City of Ottawa in the Province of Ontario, before me on May 7, 2022 in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

Execution Version

This **TIMING AGREEMENT** is made as of September 21, 2021 between Rogers Communications Inc. ("**Purchaser**") and Shaw Communications Inc. ("**Shaw**", collectively with Purchaser, the "**Merging Parties**") and the Commissioner of Competition (the "**Commissioner**").

Recitals

A. Purchaser proposes to acquire all of the issued and outstanding Class A Shares and Class B Shares of Shaw by plan of arrangement (the "**Proposed Transaction**").

B. The Commissioner is of the view that the Proposed Transaction may result in a substantial prevention and/or lessening of competition, and desires to complete his assessment and, if necessary, implement an appropriate remedy, before the Merging Parties close the Proposed Transaction.

C. The Merging Parties expect that the Proposed Transaction will generate efficiencies in Wireless Services (as that term is defined in the SIRs (as hereinafter defined)), among other efficiencies, and desire that the Commissioner assess those efficiencies in Wireless Services for the purpose of s. 96 of the *Competition Act* (the "**Act**") before filing any application under s. 92, s. 100 or s. 104 of the Act.

D. The Merging Parties and the Commissioner desire to establish a schedule for the expeditious resolution of this matter as it concerns Wireless Services with a view to avoiding, or narrowing the scope of litigation if appropriate.

Agreement

In consideration of the terms set out in this agreement, the sufficiency of which is acknowledged, the Parties agree as follows:

1. The Merging Parties shall provide at least 30 days' notice to the Commissioner before closing the Proposed Transaction or any part of the Proposed Transaction, unless the Commissioner has issued a no action letter. The Merging Parties shall not provide such notice until at least 30 days after August 17, 2021, which was the date the Merging Parties certified compliance with the supplementary information requests pursuant to s. 114(2) of the Act (the "**SIRs**"). After the Merging Parties have provided such notice, the Commissioner and Competition Bureau shall have no further obligations under this agreement, and apart from observing the notice period before closing the Proposed Transaction, the Merging Parties shall have no further obligations under this agreement.

2. The Commissioner shall not file an application under s. 92, s. 100 or s. 104 of the Act in respect of the Proposed Transaction unless the Merging Parties have provided the notice described in paragraph 1 of this agreement or waived compliance with this provision.

3. The Merging Parties responded to the data specifications of the SIRs on July 29, 2021.

4. The Mergers case team shall continue to provide regular updates to the Merging Parties on the status of their review as appropriate. The Merging Parties acknowledge that the Mergers case team will prioritize assessment of SIR responses once they have been provided.

5. No later than September 24, 2021, or such other date that may be agreed as between the Merging Parties and the Mergers case team, the Mergers case team shall provide an update to the Merging Parties on its quantitative assessment regarding its assessment of competition in Wireless Services, including a description of the empirical methodology, model and preliminary findings.

6. No later than October 15, 2021, Mergers management and the case team will be available to meet with the Merging Parties (by phone, virtual meeting or, if permitted by current health and safety protocols, at the Bureau's Gatineau office, at the Merging Parties' option) and provide an update on its assessment including:

   (a) its assessment to date in respect of Wireless Services, including its preliminary view of whether a remedy may be required in respect of Wireless Services;

   (b) identifying any additional information or analysis likely to be of assistance in completing its assessment in Wireless Services; and

   (c) a preliminary quantification of the range of deadweight loss in respect of Wireless Services.

7. At any time, the Merging Parties may, on a without prejudice basis, propose remedies to address any or all of the Bureau's concerns. If, following the meeting described in paragraph 6 of this agreement, the Merging Parties request that Mergers provide feedback on its assessment of the sufficiency of one or more proposed remedies, Mergers shall provide its assessment to date of those proposed remedies within 30 days after the request. At the time of the request, the Merging Parties shall identify any confidentiality concerns regarding the proposed remedies, and the Bureau shall consider those concerns in market testing the proposed remedies. The Merging Parties acknowledge that a full assessment of proposed remedies may not be possible without market testing, and that nothing in this agreement restricts the Bureau's ability to communicate confidential information pursuant to section 29 of the *Competition Act*.

8. Following the meeting described in paragraph 6 of this agreement, the Merging Parties shall provide their submission on efficiencies that would be lost if a remedial order were made in respect of the concerns identified by Mergers management, together with all supporting documents and data, as it concerns Wireless Services. The Merging Parties acknowledge that the extent to which the Bureau is prepared to accept claimed efficiencies will depend on the quality of information in support of those claims, and that it is incumbent on them to provide complete information at this stage.

9. No later than 14 days after receiving the information described in paragraph 8 of this agreement, the Mergers case team shall provide a request for information seeking clarifications regarding the claimed efficiencies. The Merging Parties are encouraged to discuss this request for information and their responses, including potential rolling production.

10. No later than 25 days after providing complete responses to the Bureau's request described in paragraph 9 of this agreement, each Merging Party shall identify and make available a

representative to meet with the Mergers case team and be examined under oath on any matter relevant to the claimed efficiencies. Such examinations will be conducted no later than 35 days after the Merging Parties have provided complete responses to the Bureau's request described in paragraph 9.

11. No later than 30 days after the interviews described in paragraph 10 of this agreement, Mergers management and the case team will:

(a) identify the markets in which a remedy is required;

(b) provide an updated anticompetitive effects quantification and

(c) on a without prejudice basis, quantify the efficiencies that Mergers believes have been substantiated as likely to be lost in the event of a remedy.

12. After the information described in paragraph 11 of this agreement has been provided, the Merging Parties may propose a meeting with the Commissioner, and the Parties shall make reasonable efforts to schedule that meeting at a mutually convenient time. The Parties acknowledge that it may be productive to advance settlement negotiations and consent agreement drafting as far as reasonably possible before such meeting.

13. Nothing in this agreement precludes the Parties from communicating more frequently or earlier than required by this agreement. The Parties may amend any time periods in this agreement on consent, such consent not to be unreasonably withheld.

14. For greater certainty, information described in this agreement as being without prejudice is intended to be protected by settlement privilege. Other information exchanged pursuant to this agreement is confidential, but will typically not be subject to settlement privilege. Any positions or conclusions of the Merging Parties or the Commissioner expressed in relation to this agreement may change as they obtain new information or refine their assessments.

15. A day that falls within the period from December 24 to January 4, inclusive, shall not be included in the computation of time under this agreement.

DATED as of the date first written above.

Hi Derek – I'm forwarding an email that was sent to the Commissioner last night – please see below. John and I weren't aware of this email when we spoke this AM. The email below covers some of the topics we propose to discuss in greater detail with you and Jeanne on Monday. I wanted to make sure you had this email, so that you can be coordinated when speaking with folks internally at the Bureau.

Cc: Ted Woodhead [redacted]
Subject: Introduction - Rogers

Dear Commissioner Boswell –

As you know, last fall I became CEO of Rogers Communications Inc. While the past few months have been a busy period, I wanted to reach out personally now to express my thanks to the Bureau for its continuing review of the proposed acquisition of Shaw. I also wanted to provide you with some updates about the transaction that will be relevant to the Bureau's review, and invite you to reach out in the coming days so that we can discuss the matters described below in more detail directly. Some of these points have already been communicated to your staff, but others are new:

- Rogers and Shaw have, and will continue to, respect the Bureau's review process and mandate. We recognize the importance of your staff having sufficient time to complete their review. To ensure such time is available, and for other reasons, the Outside Date for the Arrangement Agreement among Rogers and Shaw has extended to June 13. In addition, as you know, the merger cannot close until ISED approval is obtained and the Efficiencies Timing Agreement provides other protections against closing (and which the parties will respect).

- While we respectfully disagree, Rogers understands the concerns articulated to date by the Bureau regarding the transaction's potential effect on competition in wireless. [redacted] Among other things, I note the following:
  - [redacted]
  - [redacted]
  - While timing is fluid, we have [redacted]
- We recognize that the need for efficiencies may depend on the remedy but that the Bureau has signaled that efficiencies may be important to the outcome of the case. The parties will work to recalculate their efficiencies analysis as soon as the remedy has been finally determined, and otherwise respond to the Bureau's remaining questions as soon as possible. One thing that would assist Rogers in this regard is further feedback from the Bureau's case team about aspects of its concerns about the transaction; we would be grateful if your case team would make arrangements for a meeting for these purposes.

Given the significance of this file, I would appreciate the opportunity to meet with you as soon as your schedule permits. As well, I am available to answer any questions you may have.

Regards,

Tony

Subject: Rogers / Shaw - Follow up

Protected and Confidential

John and Derek – Thanks again for yesterday's call, which we thought was very helpful. We've had a chance to confer with our clients and can advise as follows:

1. You inquired about the planned closing date. [redacted] We also note that the transaction is conditional upon other regulatory approvals (including ISED), and the parties will keep the Bureau apprised of those other regulatory processes (including the anticipated timing of any approvals).

2. You inquired about the Efficiencies RFI. Rogers intends to provide further responses this week, and then complete its response to the Efficiencies RFI by next Friday. At that time (or in advance, if possible), Rogers will also indicate which questions are, in Rogers' view, no longer relevant on account of the details of the proposed remedy.

3. The parties would appreciate the opportunity to engage with the case team about its substantive concerns, including the matters set out in the February 8 letter and the contents of the Term Sheet, so that the parties can respond in an appropriate and effective manner.

We're available to discuss this morning if you have any questions or if we can assist the Bureau's internal discussions.

Dear Counsel:

Re: The proposed acquisition of Shaw Communications Inc. by Rogers Communications Inc.

This is further to your letter dated March 2, 2022 and email of today. In spite of the assurance in that former that "Rogers intends to perform its obligations under the Efficiencies Timing Agreement ("**ETA**"), which should provide the Bureau with additional comfort that sufficient time remains for it to conduct its review" the email from Jonathan Wall dated March 4, 2022 provided responses only to question 36 (Appendix A) of the Efficiencies RFI (which contained 140 questions). That is inconsistent with your statement that "[t]he merging parties have performed, and will continue to perform, their obligations (including rolling productions) under the ETA". A response to a single question of the Efficiencies RFI in 107 days can hardly be considered "rolling productions".

We have set out in the attached Appendix a list of the correspondence in which we have provided notice to you of the Bureau's concerns with respect to your clients' failure to comply with the Timing Agreement by providing timely responses to the outstanding request for information on the asserted efficiencies. We have explained the reasons for our concerns at some length in that correspondence and will not repeat same here.

[redacted] and your statement that Rogers intends to provide further responses this week, and then "complete" its response to the Efficiencies RFI by next Friday and will on or before that date indicate which questions are, in Rogers' view, "no longer relevant on account of the details of the proposed remedy."

It took a month for the parties to provide this commitment from the latest request for same in our letter of February 8, which followed earlier such requests. The Bureau views this extended delay, without reasonable explanation, as inconsistent with your assurance that the parties intend to live by the ETA.

Please ensure that the "complete" RFI responses on March 18, 2022 include all relevant information, including that related to [redacted] and any updated information concerning all efficiencies that the parties intend to claim as a result of a proposed remedy.

Failure to provide the complete response in accordance with the above time commitment by the end of next week will be interpreted as an indication of your clients' further repudiation of the ETA, and we will govern ourselves accordingly.

Sincerely yours,

Derek Leschinsky
Senior Counsel
Competition Bureau Legal Services

Appendix A

1. On September 24, 2021, pursuant to paragraph 5 of the ETA, the Bureau provided the Respondents with an update on its quantitative assessment respecting Wireless Services, including a description of the empirical methodology, model and preliminary findings.

2. Following a request from counsel to the Respondents on October 6, 2021 to extend the date for receiving an update under paragraph 6 of the ETA to October 18, 2021, the Bureau provided the Respondents with an update on its assessment including: (a) its assessment to date in respect of Wireless Services, including its preliminary view of whether a remedy may be required in respect of Wireless Services; (b) identifying any additional information or analysis likely to be of assistance in completing its assessment in Wireless Services; and (c) a preliminary quantification of the range of deadweight loss in respect of Wireless Services.

3. On November 8, 2021, pursuant to paragraph 8 of the ETA the Respondents provided the Bureau with two expert reports respecting claimed efficiencies, consisting of a report by Andrew C. Harington of the Brattle Group and a report by Yair Eilat et al. of the firm Compass Lexicon.

4. On November 22, 2021, the Bureau issued an RFI to the Respondents pursuant to paragraph 9 of the ETA.

5. On November 30, 2021, counsel to Rogers sent a letter to the Bureau objecting to the breadth of the RFI and that its questions delved into the substantiation of the Respondents' efficiencies claims. Rogers' counsel however advised that the "parties intend to provide rolling production, and are tentatively planning to finalize their productions prior to December 24, 2021".

6. Also on November 30, 2021, counsel to Rogers sent an email in which it declined to provide the Bureau with an economic model [redacted] (RFI question 8).

7. On December 3, 2021, counsel to the Commissioner wrote to counsel to Rogers advising as follows:

> Should the parties proceed to not provide complete responses to the RFI, they must do so with the knowledge that in the Bureau's view they have failed to comply with their commitments under the Timing Agreement and the credibility of their claimed efficiencies will be impacted. Not only will this be so for the Commissioner, but in the event of an application before the Competition Tribunal we reserve the right to bring this letter and the RFI to the attention of the Tribunal to the extent that the issues arising therefrom are relevant. Further, we caution that should the parties fail to cure the deficiencies under paragraph 8 of the Timing Agreement and provide complete responses to the RFI under paragraph 9, the Commissioner reserves his right to

> treat the parties' breaches as ending the agreement and relieving the Commissioner of further obligations thereunder.

8. Counsel to the Commissioner asked the Respondents to identify the questions in the RFI that the parties intend to reply to as described in their general plan for response so that the Bureau could consider its next steps and at the very least the time required to review documentation in advance of scheduling the examinations under the ETA.

9. On December 13, 2021, the Respondents provided a supplemental report from Compass Lexecon respecting claimed efficiencies under paragraph 8 of the ETA.

10. On December 15, 2021, counsel for Rogers responded to the correspondence of December 3, 2021, denying it was in breach of the ETA.

11. Counsel to the Commissioner responded to Rogers' counsel on December 17, 2021. This response noted that the Commissioner had issued a proper RFI under the ETA and one that was proportionate given the size of this transaction, the magnitude of the likely anticompetitive effects that have been conveyed to the Respondents by the Bureau and the efficiencies claims now being asserted by the Respondents as likely to be realized. Noting the Respondents' refusal to provide the Bureau with the [redacted] model, or access to it, counsel to the Commissioner asked Rogers to answer specified questions relating to model so that the Bureau could better understand it.

12. The Respondents provided no further RFI responses at this time and did not answer the questions the Commissioner posed relating to the [redacted] model.

13. Following inquiries from the Bureau about the status of the Respondents' RFI responses, the Respondents provided the following statement to the Bureau on December 23, 2021, the day before their November 30 letter advised they would complete their RFI responses:

> Apologies for the delayed reply. We have decided to take some additional time with our responses, and so won't produce today or tomorrow. We will be back to you on timing after Christmas. In addition, we are not currently planning to produce using physical media.

14. On January 18, 2022, counsel to the Commissioner wrote to the Respondents, noting that the Bureau had not received any material response from them to the RFI and had no indication as to when the Respondents would complete their responses, or even to which questions they will respond, even though the Respondents informed the Bureau that it would receive a response by December 24, 2021. Counsel also noted that the follow-on requests that the Bureau had made to the Respondents on December 3 and 17, 2021 were outstanding. Counsel stated that:

> In our view, continued delay is indicative of failure of the parties to make good faith efforts to comply with their obligations under the

timing agreement and further delay in the receipt of complete responses under paragraph 9 may cause the Commissioner to conclude the Timing Agreement is at an end.

15. On January 24, 2022, counsel for Rogers responded to the above correspondence, indicating that the Parties would be proposing a wireless remedy, and as this remedy will have implications for any efficiencies claims, they intend on advising the Bureau which aspects of the efficiencies reports remain relevant.

16. On January 31, 2022, counsel for the Commissioner wrote to counsel for Rogers seeking information about their proposed closing date as the latest information the Commissioner had regarding the parties' planned closing did not provide enough time to complete the steps outlined in the ETA.

17. On February 3, 2022, counsel for Rogers replied stating that there was no date set for the closing but that "it remained the parties' intention to close their transaction as soon as possible". Rogers' counsel advised that "As the most efficient first step in defining the remedy package, Rogers is engaged in discussions with ISED about which spectral bands Rogers would be permitted to acquire and under what conditions. We intend to bring a proposal to the Bureau shortly".

18. On February 8, 2022, counsel to the Commissioner wrote to the Respondents as follows:

> This letter is further to Mr. Rosner's email of February 3, 2022. The Commissioner has asked us to communicate his serious concern that this correspondence does not even attempt to address the matters set out in my email of January 31, 2022 with respect to the compression of the time frames provided for under the efficiencies timing agreement ("ETA") before the parties' signaled closing date. That timing makes it impossible to ensure completion of the steps contemplated by the ETA to allow the Commissioner to assess the parties' efficiencies submissions. In fact, the parties provide no assurances at all that they will extend the closing date beyond March 15, 2022 to permit the same.
>
> The parties' lack of compliance with the requirements of the ETA is not explained by a need to adjust their submissions to any spectrum transfer limitations imposed by ISED. The risk of these limitations was foreseeable to the parties and the potential impacts of such restrictions could have been anticipated by the parties when they made their efficiencies submissions to the Bureau on November 8, 2021. The parties also have not provided any rolling productions of responses to the Bureau's request for information dated November 22, 2021 ("RFI"), as contemplated by the ETA, on matters which are unrelated to those transfers.

19. Counsel to the Commissioner also provided the Respondents with his update under paragraph 11 of the ETA, providing updates to the Bureau's competitive

assessment, quantification of anticompetitive effects, identification of required remedy and their substantiation of efficiencies. Counsel stated:

> We request a clear response from you on the following two questions which are required to signal to the Commissioner that the parties are prepared to rectify their ongoing breach of the ETA:
>
> (a) Are the parties prepared to extend the closing date to a date that would permit the steps in paragraphs 9-11 of the ETA to occur, and if so to what date?
>
> (b) When will the parties provide a complete response to the outstanding RFI, as the first step in such rectification?

20. On February 10, 2022, counsel for Rogers advised of Rogers' intention to extend the closing date on or prior to March 8, 2022.

21. On February 11, 2022, John Pecman wrote to the Commissioner, stating "I was hoping that Anita Banicevic and I could have a short call with you regarding the proposed transaction further to Derek's letter earlier in the week. I understand David Rosner spoke with Derek earlier today, we thought it best to have a short word with you directly to provide more comfort." The Commissioner directed Mr. Pecman and Ms. Banicevic to communicate with his counsel.

22. On February 18, 2022, counsel for the Commissioner wrote to the Respondents seeking follow up respecting the questions asked on February 8, 2022, which were (a) whether the Respondents were prepared to extend the closing date to a date that would permit the steps of the ETA to occur, and if so, to what date, and (b) when will the parties provide a complete response to the outstanding RFI.

23. On February 24, 2022, the Chief Executive Officer of Rogers, Anthony Staffieri, wrote to the Commissioner and advised as follows:

> To ensure such time is available, and for other reasons, the Outside Date for the Arrangement Agreement among Rogers and Shaw has extended to <u>June 13".</u> In addition, as you know, the merger cannot close until ISED approval is obtained and the Efficiencies Timing Agreement provides other protections against closing (and which the parties will respect). [Underlining in original.]

24. Mr. Staffieri did not provide any information about the date the Respondents were targeting for closing their proposed merger.

25. On February 25, 2022, counsel to the Commissioner wrote to counsel to Rogers and in respect of a confidential sale process underway, requesting documentation.

26. Rogers provided a response to the Commissioner's February 25 request by way of a letter dated March 2, 2022, which promised commencing "rolling production of

responses to the efficiencies information request this week." However, only one RFI question (addressing matters in an Appendix) was responded to that week.

This is **Exhibit "E"** to the affidavit of Darian Bakelaar, affirmed remotely by Darian Bakelaar stated as being located in The City of Ottawa in the Province of Ontario before me in the city of Ottawa in the province of Ontario, on May 7, 2022, in accordance with O. Competition Bureau
Place du Portage, Phase I
50 Victoria Street
Gatineau, Quebec K1A 0C9

Dear Derek:

Re: Proposed Acquisition of Shaw Communications Inc. by Rogers Communications Inc. Your Letter of March 9, 2022[1]

We are writing in response to your letter of March 9, 2022.

The parties disagree with your letter's assertions that the parties have "failed to comply" with their obligations in the Efficiencies Timing Agreement (the "**Agreement**") and that the parties' alleged breaches of that Agreement amount to a "repudiation" of the Agreement. The parties, who have not breached the Agreement, continue to view themselves and the Commissioner as being bound by their respective obligations under the Agreement. Indeed, the parties have recently gone beyond their obligations under the Agreement, by confirming that they will not close the Transaction before June 1, 2022 without the consent of the Commissioner. This provides the Bureau with the full opportunity contemplated by the Agreement in which to conduct its analysis after receiving the outstanding Efficiencies RFI responses today.

In addition, the parties disagree with the specific allegations made in your letter regarding purported "failures to comply with the Timing Agreement by providing timely responses to the outstanding request for information on the asserted efficiencies." Among other inaccuracies/omissions:

1. You previously asked for further information about the correct counter-factual against which the efficiency claims should be evaluated. Since that time, Rogers has repeatedly indicated its intention to propose a structural "fix-it-first" remedy in wireless (and explained that the wireless efficiency claims would necessarily be impacted), the Minister of Innovation, Science and Industry has issued a press release indicating that there would not be a "wholesale" transfer of Shaw's

---

[1] All information contained in and accompanying this letter is subject to footnote 1 of our letter of April 13, 2021 requesting the issuance of an advance ruling certificate ("**ARC Request**"). All capitalized terms in this letter have the meaning ascribed to them in the ARC Request, Derek Leschinsky's letter of March 9, 2022, or are otherwise defined herein.

wireless spectrum and that a "robust fourth competitor" would be required, and Rogers has submitted a Term Sheet describing a proposed divestiture of a wireless business. All of these developments are relevant to your inquiry about the correct counter-factual and will facilitate the evaluation of relevant efficiencies that remain relevant. Your prior inquiries correctly recognize that submitting information about efficiencies that will not be realized in the event of a divestiture would be irrelevant; your most recent letter does not account for this dynamic.

2. Your letter's chronology is incomplete.

For example, at item #6, you indicate that, on November 30, 2021, counsel to Rogers "declined to provide the Bureau with an economic model [redacted] that Rogers' experts had used to estimate spectrum-related efficiencies claims." This description is incomplete. Your letter omits the repeated explanations that were given by Rogers – both in the email of November 30, and in other correspondence and discussions – as to why the "provision" of the [redacted] "model" was technologically impossible, nor do you mention the repeated offers from Rogers, in furtherance of para. 9 of the Agreement, to provide a demonstration of the software, complete with an opportunity to ask questions of the knowledgeable personnel at Rogers.

As a further example, at item #24, you state that, on February 24, 2022, "Mr. Staffieri did not provide any information about the date the Respondents were targeting for closing their proposed merger. [redacted] While your email acknowledges this fact, the chronology makes no mention of it.

3. Your letter indicates that, on March 4, Rogers provided a response to only one of the Bureau's 140 questions, set out in the Efficiencies RFI – namely Question 36. Your letter fails to acknowledge that Question 36 comprises 34 different requests for information.

The parties remain available to engage in productive dialogue with the Bureau.

Yours truly,

Goodmans LLP

PUBLIC 10484

Rogers 2021 Annual Report

Rogers Communications Inc.

PUBLIC

10485

Shaw Transaction

On March 15, 2021, we announced an agreement with Shaw to acquire all of Shaw's issued and outstanding Class A Participating Shares and Class B Non-Voting Participating Shares (collectively, Shaw Shares) for a price of $40.50 per share. The Shaw Family Living Trust, the controlling shareholder of Shaw, and certain members of the Shaw family and certain related persons (Shaw Family Shareholders) will receive (i) $16.20 in cash and (ii) 0.417206775 Class B Non-Voting Shares of Rogers per Shaw Share held by the Shaw Family Shareholders. The Transaction is valued at approximately $26 billion, including the assumption of approximately $6 billion of Shaw debt.

The Transaction will be implemented through a court-approved plan of arrangement under the *Business Corporations Act (Alberta)*. On May 20, 2021, Shaw shareholders voted to approve the Transaction at a special shareholders meeting. The Court of Queen's Bench of Alberta issued a final order approving the Transaction on May 25, 2021. The Transaction is subject to other customary closing conditions, including receipt of Key Regulatory Approvals. Subject to receipt of all required approvals and satisfaction of other conditions prior to closing, the Transaction is expected to close in the first half of 2022. Rogers has extended the outside date for closing the Transaction from March 15, 2022 to June 13, 2022 in accordance with the terms of the arrangement agreement.

The combined entity will build on the strong legacy of two family-founded Canadian companies. It will have the scale, assets, and capabilities needed to deliver unprecedented wireline and wireless broadband and network investments, innovation, and growth in new telecommunications services, and greater choice for Canadian consumers and businesses.

The combination will also accelerate the delivery of critical 5G service across Western Canada, from rural areas to dense cities, more quickly than either company could achieve on its own, by bringing together the expertise and assets of both companies.

In connection with the Transaction, we entered into a binding commitment letter for a committed credit facility with a syndicate of banks in an original amount up to $19 billion. During the year, we entered into a $6 billion non-revolving credit facility (Shaw term loan facility), which served to reduce the amount available under the committed credit facility to $13 billion. See "Managing our Liquidity and Financial Resources" for more information on the committed credit facility and the Shaw term loan facility. We also expect that RCI will either assume Shaw's senior notes or provide a guarantee of Shaw's payment obligations under those senior notes upon closing the Transaction and, in either case, Rogers Communications Canada Inc. (RCCI) will guarantee Shaw's payment obligations under those senior notes.

In connection with our application for Canadian Radio-Television and Telecommunications Commission (CRTC) approval to acquire Shaw's licensed broadcasting assets, the CRTC held an oral hearing from November 22 to 26, 2021, during which Rogers, Shaw, and 31 intervenors (including Canada Public Affairs Channel Inc. (CPAC) as an interested party) had an opportunity to comment on and respond to questions from the CRTC regarding the application. Final written submissions from intervenors were accepted until December 13, 2021, and Rogers and CPAC submitted final replies on December 20, 2021.

In accordance with the terms of the arrangement agreement, Rogers and Shaw filed pre-merger notifications pursuant to Part IX of the Competition Act to trigger the Competition Bureau's review of the Transaction. Rogers and Shaw have worked cooperatively and constructively to respond to further requests for information, as required under the arrangement agreement. On September 28, 2021, the Competition Bureau issued a public request for information to help further gather and assess facts about the Transaction. The Competition Bureau invited interested parties to share their information or experiences confidentially by October 29, 2021. The Federal Court also issued orders requiring Xplornet Communications Inc., BCE Inc., TELUS Corporation, and Quebecor Inc. to produce records and written information related to mobile wireless services that are relevant to the Competition Bureau's review of the Transaction, which is ongoing.

In accordance with the conditions of Shaw's spectrum licences, Rogers and Shaw filed joint applications with Innovation, Science and Economic Development Canada (ISED Canada) for approval of the indirect transfer of those spectrum licences by the Minister of Innovation, Science and Industry. ISED Canada's review is ongoing.

The Transaction is subject to a number of additional risks. For more information, see "Risks and Uncertainties Affecting our Business – Shaw Transaction".

ARRANGEMENT AGREEMENT

ROGERS COMMUNICATIONS INC.

– and –

SHAW COMMUNICATIONS INC.

March 13, 2021

TABLE OF CONTENTS

"**Misrepresentation**" means an untrue statement of a material fact or an omission to state a material fact required or necessary to make the statements contained therein not misleading in light of the circumstances in which they are made.

"**Money Laundering Laws**" has the meaning specified in paragraph 36 of Schedule C.

"**No-Action Letter**" means a communication in writing from the Commissioner of Competition advising that he or she does not, at that time, intend to make an application to the Competition Tribunal under section 92 of the Competition Act in respect of the transactions contemplated by this Agreement.

"**Notice**" has the meaning specified in Section 8.4.

"**NYSE**" means the New York Stock Exchange.

"**officer**" has the meaning specified in the *Securities Act* (Alberta).

"**Orders**" means all applicable judgments, orders, writs, injunctions, rulings, decisions, assessments and binding directives, protocols, policies and guidelines having the force of law rendered by any Governmental Entity.

"**Ordinary Course**" means, with respect to an action taken by the Company or its Subsidiaries, that such action is consistent with the past practices of such Party or such Subsidiary and is taken in the ordinary course of the normal day-to-day operations of the business of the Company or such Subsidiary, including any commercially reasonable deviations therefrom taken in good faith by the Company as a result of or in response to natural disasters, calamities, emergencies, crises and any COVID-19 Measures.

"**Outside Date**" means March 15, 2022, subject to automatic adjustment in accordance with this Agreement, or such later date as may be agreed in writing by the Parties; provided however that if the Outside Date shall occur on a day that is not a Business Day, the Outside Date shall be deemed to occur on the next Business Day.

"**Owned Real Property**" means the real property owned by the Company or any of its Subsidiaries, together with all buildings, structures, improvements, and appurtenances thereon and thereto.

"**Parties**" means, collectively, the Company and the Purchaser, and "**Party**" means any one of them.

"**Partnership**" has the meaning specified in paragraph 8(d) of Schedule C.

"**Permitted Liens**" means, in respect of the Company or any of its Subsidiaries, any one or more of the following:

(a) Liens or deposits for Taxes or charges for electricity, gas, power, water and other utilities which are not yet due or delinquent or which are being contested in good faith by appropriate proceedings and in respect of which the applicable

(k) **Affiliates and Subsidiaries**. For the purpose of this Agreement, a Person is an "**affiliate**" of another Person if one of them is a Subsidiary of the other or each one of them is controlled, directly or indirectly, by the same Person, provided that in no case shall an "affiliate" of the Company or any of its Subsidiaries include any member of the Shaw Family Group or Corus Entertainment Inc., and in no case shall an "affiliate" of the Purchaser or any of its Subsidiaries include the Rogers Control Trust. A "**Subsidiary**" means a Person that is controlled directly or indirectly by another Person and includes a Subsidiary of that Subsidiary. A Person is considered to "**control**" another Person if: (i) the first Person beneficially owns or directly or indirectly exercises control or direction over securities of the second Person carrying votes which, if exercised, would entitle the first Person to elect a majority of the directors of the second Person, unless that first Person holds the voting securities only to secure an obligation, or (ii) the second Person is a partnership, other than a limited partnership, and the first Person holds more than 50% of the interests of the partnership, or (iii) the second Person is a limited partnership, and the general partner of the limited partnership is the first Person. To the extent any covenants or agreements relate, directly or indirectly, to a Subsidiary of the Company, each such provision shall be construed as a covenant by the Company to cause (to the fullest extent to which it is legally capable) such Subsidiary to perform the required action.

(l) **Consent**. If any provision requires approval or consent of a Party and such approval or consent is not delivered within the specified time limit, the Party whose consent or approval is required shall be conclusively deemed to have withheld its approval or consent. Without limiting any other basis upon which the Purchaser may withhold, condition or delay its consent hereunder, if the Purchaser's consent is requested with respect to any matter with respect to this Agreement, it will not be considered unreasonable for the Purchaser to withhold, delay or condition the Purchaser's consent to such matter if such requested consent, together with any other modifications, amendments or express waivers or consents with respect to this Agreement, individually or in the aggregate: (i) where consent of the Financing Sources is required in connection with the Purchaser's consent to such matter and such matter is materially adverse to the interests of the Financing Sources, and the Financing Sources condition or delay their consent to such matter (to the extent of any such condition or delay), or (ii) such consent would reasonably be expected to adversely impact the Purchaser's ability to participate in any spectrum auction while advancing the transactions contemplated herein.

1.3 Outside Date

(a) Either the Company or the Purchaser shall have the right to postpone the Outside Date on one or more occasions (by at least 10 days or an integral multiple thereof, as specified by the postponing Party) up to a maximum of 90 days if one or more of the Key Regulatory Approvals have not been obtained and none of such remaining Key Regulatory Approvals has been denied by a non-appealable decision of a Governmental Entity.

(b) A postponing Party shall give written notice of any such postponement of the Outside Date permitted in accordance with Section 1.3(a) to the other Party by no later than 5:00 p.m. on the date that is not less than five Business Days prior to the Outside Date (as such Outside Date may have been postponed pursuant to this Section 1.3), or such later date as may be agreed to in writing by the Parties; provided that, notwithstanding the foregoing, a Party shall not be permitted to unilaterally postpone the Outside Date (as such Outside Date may have been postponed pursuant to this Section 1.3) if (a) the failure to obtain a Key Regulatory Approval is the result of such Party's wilful breach of its obligations under this Agreement with respect to obtaining such Key Regulatory Approval, or (b) in the aggregate such postponements would exceed 90 days from the original Outside Date.

1.4 Schedules

The schedules attached to this Agreement form an integral part of this Agreement for all purposes of it.

1.5 Company Disclosure Letter

The Company Disclosure Letter itself and all information contained in it is confidential information and is subject to the terms and conditions of the Confidentiality Agreement.

ARTICLE 2
THE ARRANGEMENT

2.1 Arrangement

The Company and the Purchaser agree that the Arrangement will be implemented in accordance with and subject to the terms and conditions of this Agreement and the Plan of Arrangement.

2.2 Interim Order

As soon as reasonably practicable after the date of this Agreement and, in any event, prior to April 27, 2021 (provided that, if normal Court operations are disrupted in response to the COVID-19 pandemic, the hearing date may be extended until the earliest possible date on which the Court will grant a hearing (whether in person, via telephone or other virtual means) for these purposes), the Company shall apply in a manner reasonably acceptable to the Purchaser pursuant to section 193 of the ABCA and, in cooperation with the Purchaser, prepare, file and diligently pursue an application for the Interim Order, which shall provide, among other things:

(a) for the classes of Persons to whom notice is to be provided in respect of the Arrangement and the Company Meeting and for the manner in which such notice is to be provided;

Rogers and Shaw Remain Committed to Merger Following Notification by the Commissioner of Competition

May 7, 2022 • News Releases

Rogers and Shaw to respond to the applications to be made by the Commissioner of Competition to prevent proposed merger

Rogers and Shaw engaged in sale process for full divestiture of Freedom Mobile to maintain strong fourth carrier

TORONTO and CALGARY, Alberta, May 07, 2022 – Rogers Communications Inc. ("Rogers") and Shaw Communications Inc. ("Shaw") were notified this afternoon following the close of trading of the Commissioner of Competition's intention to file applications to the Competition Tribunal opposing Rogers' proposed merger with Shaw (the "Transaction").

Rogers and Shaw remain committed to the Transaction, which is in the best interests of Canada and Canadians because of the significant long-term benefits it will bring for consumers, businesses and the economy. The companies have offered to address concerns regarding the possible impact of the Transaction on Canada's competitive wireless market by proposing the full divesture of Shaw's wireless business, Freedom Mobile. Rogers and Shaw are engaged in a process to sell Freedom Mobile, with a view to addressing concerns raised by the Commissioner of Competition and ISED.

Rogers and Shaw will oppose the application to prevent the Transaction to be made by the Commissioner of Competition, while continuing to engage constructively with the Competition Bureau in an effort to bring this matter to a resolution and ensure that the Transaction's benefits can be realized by all Canadians.

The Transaction will provide a combined Rogers and Shaw with the capabilities necessary to invest in digital infrastructure, create jobs, drive innovation, increase choice, and bridge the digital divide. In addition, the Transaction will foster greater competition by creating Canada's most robust wholly-owned national network, and generating more choice for businesses and consumers so they may realize the full economic and social benefits of next generation networks.

Benefits of the Transaction

- Investing $2.5 billion to build 5G networks across Western Canada over the next five years;
- Establishing a new $1 billion Rogers Rural and Indigenous Connectivity Fund dedicated to connecting rural, remote, and Indigenous communities across Western Canada;
- An additional $3 billion to support further network, services, and technology investments;
- Creating up to 3,000 net new jobs in Western Canada; and
- Extending Rogers Connected for Success program extended across Western Canada to bring the first of its kind low-cost broadband program nationally to help seniors and low-income Canadians in every community where the combined company offers Internet services.

In order to permit continued engagement with the Competition Bureau, Rogers, Shaw and the Shaw Family Living Trust have agreed to extend the outside date of the Transaction to July 31, 2022. In addition, Rogers and Shaw will continue to seek approval of the Transaction from the Ministry of Innovation, Science and Economic Development.

The Transaction has already been approved by the shareholders of Shaw and the Court of Queen's Bench of Alberta, and the Canadian Radio-television and Telecommunications Commission (CRTC) has approved Rogers' acquisition of Shaw's broadcasting services, subject to conditions and safeguards designed to ensure that the Transaction benefits Canadians. In addition, the Transaction remains subject to the approval of the Ministry of Innovation, Science and Economic Development and other customary closing conditions.

Rogers standalone financial guidance for 2022, provided on April 20, 2022, remains unchanged.

Caution Regarding Forward Looking Statements

This news release includes "forward-looking statements" within the meaning of applicable securities laws, including, without limitation, statements about the parties engaging with regulators to resolve the matters described herein, including by opposing the Commissioner of Competition's application, the potential timing and anticipated receipt of required regulatory approvals for the Transaction or any related divestitures, the ability of the parties to satisfy the conditions to the closing of the Transaction (including any related divestiture), the anticipated timing for closing of the Transaction and any related divestitures, the expected continuation of Freedom Mobile as a viable fourth wireless carrier and the anticipated benefits and effects of the Transaction, including the timing thereof. Forward-looking information may in some cases be identified by words such as "will", "anticipates", "expects", "intends" and similar expressions suggesting future events or future performance.

We caution that all forward-looking information is inherently subject to change and uncertainty and that actual results may differ materially from those expressed or implied by the forward-looking information. A number of risks, uncertainties and other factors could cause actual results and events to differ materially from those expressed or implied in the forward-looking information or could cause our current objectives, strategies and intentions to change. Such risks, uncertainties and other factors include, among others, the possibility that the Transaction, or divestitures made in connection with the Transaction, will not be completed in the expected timeframe or at all; the failure to obtain any necessary regulatory approvals, including the approval of the Minister of Innovation, Science and Economic Development and any regulatory approval required in connection with any divestiture, in the expected timeframe or at all; pending or potential litigation associated with the Transaction, including any hearing or proceeding by or involving regulatory authorities, including the above-noted anticipated application; the failure to realize the anticipated benefits of the Transaction in the expected timeframe or at all; and general economic, business and political conditions. Accordingly, we warn investors to exercise caution when considering statements containing forward-looking information and that it would be unreasonable to rely on such statements as creating legal rights regarding our future results or plans. We cannot guarantee that any forward-looking information will materialize and you are cautioned not to place undue reliance on this forward-looking information. Any forward-looking information contained in this news release represent expectations as of the date of this news release and are subject to change after such date. A comprehensive discussion of other risks that impact Rogers and Shaw can also be found in their public reports and filings which are available under their respective profiles at www.sedar.com and www.edgar.com.

Forward-looking information is provided herein for the purpose of giving information about the proposed Transaction, its expected timing and its anticipated benefits, as well as proposed divestitures in connection with the Transaction. Readers are cautioned that such information may not be appropriate for other purposes. The completion of the proposed Transaction is subject to certain closing conditions, termination rights and other risks and uncertainties including, without limitation, regulatory approvals (including the approval of the Minister of Innovation, Science and Economic Development). There can be no assurance that such regulatory approvals will be obtained or that the Transaction will occur, or that it will occur on the terms and conditions previously announced. The Transaction could be modified, restructured or terminated. Similarly, there can be no assurance that Rogers and Shaw, will be successful in any hearing or proceeding related to the Transaction. There can also be no assurance that the outside date of the Transaction will be further extended by the parties. There can be no assurance that any divestiture proposed in connection with the Transaction will be acceptable to regulatory authorities and, if applicable, will be completed in order to permit the Transaction to be consummated. Finally, there can be no assurance that the combined company will achieve the anticipated benefits of the Transaction in the expected timeframe or at all.

All forward-looking statements are made pursuant to the "safe harbour" provisions of the applicable Canadian and United States securities laws. Rogers and Shaw are under no obligation (and Rogers and Shaw expressly disclaim any such obligation) to update or alter any statements containing forward-looking information, the factors or assumptions underlying them, whether as a result of new information, future events or otherwise, except as required by law. All of the forward-looking information in this news release is qualified by the cautionary statements herein.

About Rogers

Rogers is a leading Canadian technology and media company that provides world-class communications services and entertainment to consumers and businesses on our award-winning networks. Our founder, Ted Rogers, purchased his first radio station, CHFI, in 1960. Today, we are dedicated to providing industry-leading wireless, cable, sports, and media to millions of customers across Canada. Our shares are publicly traded on the Toronto Stock Exchange (TSX: RCI.A and RCI.B) and on the New York Stock Exchange (NYSE: RCI). For more information, please visit: www.rogers.com or http://investors.rogers.com.

About Shaw Communications Inc.

Shaw is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone, and video services. The Wireless division provides wireless voice and LTE data services.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

THE COMPETITION TRIBUNAL

IN THE MATTER OF the Competition Act, R.S.C. 1985, c. C-34, as amended;

AND IN THE MATTER OF the proposed acquisition by Rogers Communications Inc. or an affiliate thereof of Shaw Communications Inc.;

AND IN THE MATTER OF an application by the Commissioner of Competition for one or more orders pursuant to section 92 of the Competition Act; and

AND IN THE MATTER OF an application by the Commissioner of Competition for an interim order pursuant to section 104 of the Competition Act.

BETWEEN:

THE COMMISSIONER OF COMPETITION

Applicant

– and –

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondents

AFFIDAVIT OF BLAIK KIRBY

I, Blaik Kirby, of the city of King City, in the Province of Ontario solemnly affirm:

1. I am the Group President, Consumer and Small & Medium Business (SMB) for BCE Inc. (“**Bell**”). In this role I lead the teams responsible for sales, marketing, and product development for Bell’s consumer and SMB wireless and wireline businesses. From 2015 to 2020, I was President of Bell Mobility and prior to that I held a series of progressively senior roles in marketing and sales for Bell Mobility.

2. Throughout this time my main responsibilities have included, among others, understanding and responding to market and competitive dynamics in Canada’s wireless industry, including with respect to the pricing, competitive strategies, and market positioning of Bell and its competitors.

3. I have personal knowledge of the matters in this affidavit, except where I have otherwise indicated that I am relying on information from others, in which case I have stated the source of that information and that I believe such information to be true.

PURPOSE OF THIS AFFIDAVIT

4. I make this affidavit in connection with the application by the Commissioner of Competition (the “**Commissioner**”) under section 104 of the *Competition* Act against Rogers Communications Inc. (“**Rogers**”) and Shaw Communications Inc. (“**Shaw**”) relating to their proposed merger (the “**Proposed Acquisition**”) (“**Application**”).

5. The remainder of this affidavit is organized as follows.

a) First, I briefly describe the operations of Bell and its past integration of acquired companies.

b) Second, I describe how Shaw, operating through both the Freedom and the Shaw Mobile brands, was a successful and disruptive competitor in the Canadian wireless industry up to the announcement of the Proposed Acquisition. In this section I refer to data and documents prepared or received by Bell in the ordinary course of business that address, among other things, Shaw's success in winning customers and influencing the competitive dynamic in the wireless market including through responses from other wireless carriers such as Rogers, Telus, and Bell.

c) Third, I describe a particular feature of the competitive dynamic in the Canadian wireless industry – namely that Rogers and Shaw are usually each other's closest competitors. In this section, I refer to data and documents prepared or received by Bell in the ordinary course of business that address, among other things, the fact that Rogers and Shaw compete for the same customers and are most likely to generate competitive responses from each other.

d) Fourth, I describe my observations, made during the ordinary course of our participation in the wireless market, with respect to Shaw's competitive conduct since the announcement of the Proposed Acquisition.

OPERATIONS OF BELL

6. Bell is a Canadian communications and media company headquartered in Verdun, Québec that offers wireline and wireless telecommunication services, television distribution and media products. Bell offers mobile wireless services nationally through our Bell Mobility, Virgin Plus, and Lucky Mobile brands.

7. Bell has acquired MTS, Aliant, and other companies in the past, and has integrated telecommunications assets, which involves significant integration costs and can take a long time (e.g., five years or more) to complete. For

example, there are interdependencies between the wireless SIM card (i.e., the chip inserted in a wireless device to instruct the device on which wireless networks to communicate with), wireless network, and billing system. As a result, more than five years following Bell's acquisition of MTS, we continue to maintain the separate MTS wireless billing system given the material number of customers that have not yet updated their SIM card (and therefore must still be served by the separate billing system). In our experience, achieving integration efficiencies requires significant management focus and continuity, senior leaders with a long-standing and deep knowledge of the business, and a long-term focus and commitment to an established plan. Without these factors, it is much more difficult to achieve efficiency goals.

SHAW'S ROLE IN THE MOBILE WIRELESS SERVICES MARKET IN CANADA

8. Generally, Shaw had been a strong competitive force in the wireless market in recent years through both its Freedom and Shaw Mobile brands. Shaw's impact on competition is documented in Bell's internal strategic planning documents, [redacted]

9. For example, Bell Mobility's 2019 business plan, produced in 2018, recognized that [redacted]

---

[1] [redacted] produced to the Commissioner of Competition pursuant to the order of Mr. Justice A.D. Little dated August 1, 2021 and varied September 13, 2021, made under section 11 of the *Competition Act* (the "**Section 11 Order**"), [redacted] All Bates numbers cited below in my Affidavit refer to documents produced by Bell pursuant to the Section 11 Order.

[2] [redacted] I note that Industry analysists including TD Securities and Canaccord Genuity Capital Markets have also recognized Freedom's pricing strategy as "aggressive" – See Bell0403345 and Bell0046800, attached to my affidavit as Exhibits "D" and "E", respectively.

[3] [redacted]

[redacted] We specifically identified Freedom's [redacted] as Shaw's competitive strengths. We also identified [redacted]

10. Each spring, Bell Mobility produces a long-range plan (LRP). In those documents, among other things, we review the market, identify trends, risks, and opportunities, and establish a plan to meet our objectives for the coming years. Our recent LRP documents [redacted]

11. In both 2019 and 2020, our LRPs recognized the threat of [redacted] as a potential key development in the market.[7] [redacted] Considering those developments, our LRP documents in these years variously refer to:

---

[4] [redacted]

[5] The third page of [redacted] titled "Competitive Dynamics", reviews each major competitor in the wireless industry. For Shaw, it highlights [redacted] among others. For Rogers, the top competitive weakness it highlights is its [redacted] The fourth page, titled "Key 2019 Challenges", highlights as the number one challenge for Bell Mobility [redacted]

[6] [redacted]

[7] [redacted]

[8] [redacted]

a) [redacted]

b) [redacted] and [redacted]

12. We have observed, directly in our business, that the competitive performance of Shaw's wireless business has consistently increased over time. Our data show that, since at least the acquisition of Wind Mobile by Shaw in 2016, there has been [redacted]

9 [redacted]

10 [redacted]

11 [redacted]

12 [redacted]

Figure 1. [redacted]

[redacted]

Freedom Mobile

13. The Freedom wireless brand operated by Shaw originated as an independent wireless operator, Wind Mobile, which launched in 2009. Wind Mobile was acquired by Shaw in 2016 and subsequently rebranded to Freedom. Following the acquisition, Shaw made significant improvements to the wireless network, secured the ability to offer the iPhone to subscribers, and launched new wireless plans with large data buckets.

14. In response to these "Big Gig" plans launched in 2017, Rogers and the other national wireless carriers introduced significant discounts and promotions on their own wireless plans throughout 2018 and into 2019.[13] In our case, these included 10 GB plans (which was then the largest data bucket typically offered in the Canadian market) launched broadly for a brief time in December 2017 at prices $60 lower than those available before the Big Gig plans had been launched, [redacted]

13 [redacted]

[redacted]

15. According to data Bell obtained in the ordinary course of business from the Canadian Wireless Telecommunications Association ("**CWTA**"), which Bell relies upon as accurate in light of our own internally generated data and the publicly reported data of other companies, Freedom's share of net subscriber additions[15] in Canada's wireless industry climbed from less than 10% nationally in 2017 to 20% in 2020 and 2021 (based on CWTA figures for 2021 that exclude Q4 2021). Because Freedom and Shaw Mobile operate only in Ontario, Alberta, and BC, I believe that its share of net subscriber additions would be significantly higher if calculated specifically for those provinces.[16] The graph below was prepared by Bell using the above-referenced data obtained from the CWTA.

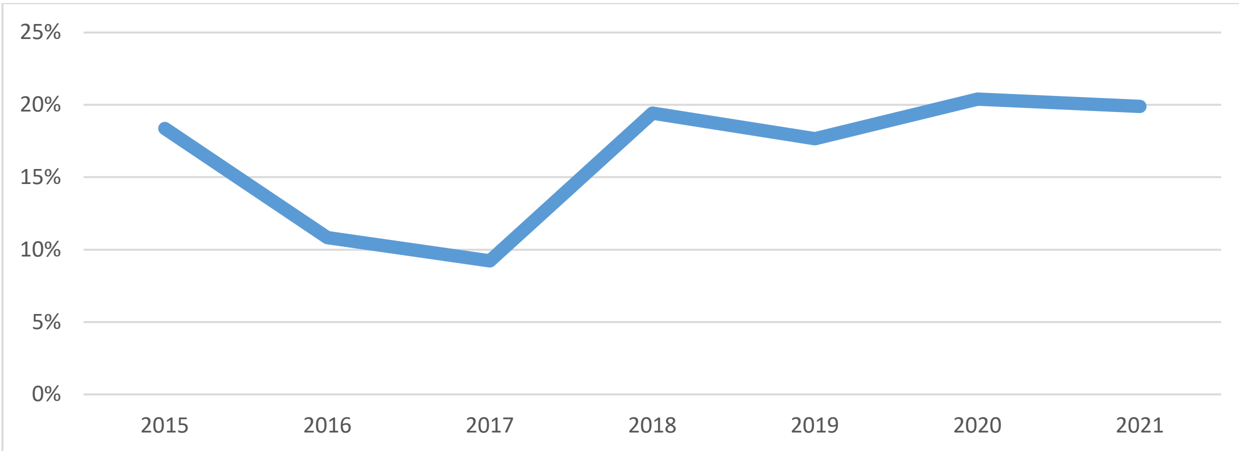
---

14 [redacted]

15 Net subscriber additions are a metric that is commonly used in the wireless industry to assess competitive performance. A company's net subscriber additions during a period is equal to the total number of subscribers gained by that company (i.e., new subscribers who signed up for service with the company or subscribers who switched to the company from another provider) less the total number of subscribers lost by the company during that period (i.e., subscribers who deactivated their service or switched from the company to another provider). A company's share of net subscriber additions is equal to its net subscriber additions divided by the sum of the net subscriber additions of all competitors in the market.

16 CWTA, "Facts & Figures, Industry Statistics, Canadian wireless subscriber numbers 2015-2021", online: https://www.cwta.ca/facts-figures/.

Figure 2. Freedom's Share of Net Additions (2015 to 2021)



16. Our documents throughout this period (2017 to 2020) consistently [redacted]

17. One of the most significant events in the wireless industry in recent years was the launch of large unlimited data plans by Rogers, and Telus in the summer of 2019. The competitive activity I describe above led to the introduction of these unlimited data plans by Rogers in the summer of 2019.[20] Leading up to the launch of these plans, Bell's internal assessment of these developments was that [redacted]

---

17 [redacted]

18 [redacted]

19 [redacted]

20 [redacted]

[redacted] We launched similar unlimited data plans at that time in response to Rogers and Telus.

18. Freedom's aggressive marketing initiatives continued up to the time of the announcement of the Proposed Acquisition. [redacted] This in turn led to competitive responses from others, including Bell[23] and Virgin Plus, which had offers directly identified as [redacted].[24] In 2021 Bell was also [redacted] and planning and targeting [redacted]

19. Our internal porting data demonstrate the impact of Freedom over this period. [redacted] The graph below was prepared by Bell using our internal porting data between 2017 and 2020 in British Columbia, Alberta and Ontario.

24 [redacted]

25 [redacted]

26 [redacted]

Figure 3. [redacted]

[redacted]

Shaw Mobile

20. The Shaw Mobile brand was introduced on July 30, 2020, offering discounted wireless plans to Shaw internet customers in British Columbia and Alberta.[27] [redacted] Rogers also immediately launched [redacted]

21. Shaw Mobile's launch was highly successful. As of August 2020, we estimated that it already had approximately [redacted] in British Columbia and Alberta.[30] Shaw Mobile's offerings were highly attractive to all consumer segments including price-conscious consumers and multi-line family households.

---

27 [redacted]

28 [redacted]

29 [redacted]

30 [redacted]

22. Shaw Mobile's growth was most prominent in regions where Rogers was the largest competitor, and it was gaining significant subscribers from the Rogers and Fido brands. Our internal analysis based on data obtained from [redacted] showed that [redacted] Our analysis conducted in September 2020 concluded that [redacted]

23. In 2021, Shaw Mobile continued to expand its competitive impact. Our 2021 plan for wireless (prepared in October 2020) identified [redacted] We noted that [redacted]

24. Based on my experience at Bell, operating as an integrated service provider has allowed Bell to spread common costs over a larger base, enhance the value of our brand marketing (which reinforces both our wireline and wireless offerings), creates more points of contact between Bell and our customers, and affords us the opportunity to create bundled offerings that appeal to consumers. My experience at Bell indicates that subscribers of multiple services from a provider (i.e. internet and mobile wireless services) tend to have a lower churn rate and a higher expected lifetime value proposition than

---

31 [redacted]

32 [redacted]

33 [redacted]

34 [redacted]

customers who only subscribe to a single service. Without our wireline infrastructure, Bell would not be as effective a wireless competitor as we are today;[35] my experience at Bell indicates that is true for all integrated wireless competitors in Canada, including Shaw/Freedom Mobile. While these factors apply most comprehensively to Shaw Mobile, they also apply to Freedom including in respect of its network build in Alberta and BC. [redacted]

Rogers and Shaw Are Often Each Other's Closest Wireless Competitor

25. Based on my observation of the wireless market in Canada since 2008, I consider that Rogers and Shaw are often each other's closest wireless competitor. By this I mean that Shaw's competitive behaviour (pricing, promotions, etc.) in the wireless market appears to be most heavily influenced by the competitive behaviour of Rogers and, conversely, that Rogers' competitive behaviour appears to be most heavily influenced by the competitive behaviour of Shaw.

26. In the ordinary course of my day to day responsibilities, I am regularly involved in assessing competitive initiatives in the market and, where appropriate, responding to them. This involves, for example, tracking changes to pricing or other changes to the offers of our competitors. In doing so, I have observed and Bell's internal documents reflect that the impact of Shaw on the market has most frequently been seen in the first instance through its impact on Rogers. [redacted] In other words, changes in the offers available in the market (such as the introduction of a particular promotion or a reduction in the cost of a wireless service plan) often

---

35 [redacted]

36 [redacted]

37 [redacted]

result from a change made by Shaw, to which Rogers then responds, [redacted]

27. Indeed, Rogers and Shaw have often [redacted]

28. [redacted]

29. I have also observed that Shaw has targeted areas where Rogers has long been the market leader – in particular, the Greater Toronto Area and the Greater Vancouver Area, where the combined market shares of Shaw and Rogers [redacted] Shaw and Rogers compete closely in other areas of British Columbia, Alberta, and Ontario as well, and I expect competition between them to continue and to increase absent the Proposed Acquisition.

30. In British Columbia and Alberta this increase in the level of competition between Rogers and Shaw would result in particular from the recent launch of Shaw Mobile and its strategy of aggressively selling wireless services to Shaw's existing wireline customer base. In July 2020, Bell estimated that [redacted] Our estimate was [redacted]

---

38 [redacted]

39 [redacted]

40 [redacted]

[redacted] These are the customers that we observe are being targeted by Shaw Mobile.

31. Data obtained from [redacted] which for the reasons set out above I consider to be reliable, indicates that, in the time period from July 1, 2020 to June 30, 2021, the number of customers switching between Shaw and Rogers nationally [redacted] These data are summarized in the graph below, which Bell prepared. They show that nearly [redacted] This leads me to conclude that, across the Shaw footprint, competition between Rogers and Shaw is disproportionately relevant to the competitive dynamic.

Figure 4. Shaw's Porting Activity by Carrier (Q3 2020 to Q2 2021)

[redacted]

41 [redacted]

32. This high level of competition (and customer switching) between Shaw and Rogers is a feature of the competitive dynamic that is well-understood within Bell and is frequently reflected in documents we prepare in the ordinary course of business. For example, a Bell analysis of data on market dynamics in April 2019 indicated that [redacted]

Shaw's Competitive Conduct Since the Announcement of the Proposed Acquisition

33. We have noticed a significant change in Shaw's competitive behaviour in the market since the announcement of the Proposed Acquisition. [redacted]

34. Black Friday (i.e., the day after the U.S. Thanksgiving holiday) and the full five day Black Friday period (i.e., the Tuesday before U.S. Thanksgiving to the Saturday immediately following it) is a key sales period in the wireless industry. Based on our internal data, on Black Friday in 2019 [redacted] In 2020, prior to the announcement of the Proposed Acquisition, [redacted] In 2021, the first Black Friday after the announcement of the Proposed Acquisition, [redacted] Similarly, over the full five day Black Friday period, [redacted]

---

42 [redacted]

35. Net ports are another metric that Bell commonly uses to assess competitive performance and the competitive dynamics in the wireless industry. A company's net ports over a period is equal to the total increase or decline in that company's wireless subscribers that results from customers switching to or from other carriers during the period.

36. According to data Bell obtained from [redacted] (which, as described above, I consider to be reliable), Shaw had net ports of [redacted] This means that [redacted] By Q3 2021 Shaw's net ports for the quarter were [redacted]

37. Rogers has been the largest beneficiary of the reduction in Shaw's competitive efforts following the announcement of the Proposed Acquisition. [redacted]

38. Looking just at the port outflows from Shaw in Q3 2021, Rogers accounts for [redacted]% (i.e., [redacted]% of customers switching to other carriers from Shaw switched to Rogers). Because Rogers typically captures just [redacted]% of wireless net additions, I understand the fact that it accounts for [redacted]% of Shaw's net port swing and captures [redacted]% of port outflows from Shaw to be a consequence of the particularly close competition between Rogers and Shaw prior to the Proposed Acquisition. These data are reflected in the graph below, which Bell prepared based on the data from [redacted].

---

[43] In other words, whereas in Q1 Rogers had [redacted]

Figure 5. Shaw Net Ports (Q1 to Q3 2021)

[redacted]

INFORMATION SUPPLIED TO THE COMPETITION BUREAU

39. In response to an order pursuant to section 11 of the *Competition Act*, RSC 1985, c C-34 (the "**Act**") on August 1, 2021, Bell supplied to the Competition Bureau certain records specified by their record numbers and listed in Appendix "A" ("**Records**"),

40. Copies of the Records listed in section a. of Appendix "A" are referred to above and attached to my affidavit as Exhibits "A" to "KK".

41. Copies of the Records listed in section b. of Appendix "A" are attached to my affidavit as Exhibits "LL" to "VV".

42. I am informed by Robert Malcolmson, Chief Legal & Regulatory Officer of Bell and believe that each of the copies of the Records attached as Exhibits "A" to "VV" are true copies of the originals that are in the possession, power, or

control of Bell and that the contents thereof are true to the best of my knowledge, information and belief. A certificate from Robert Malcolmson, Chief Legal & Regulatory Officer of Bell, attesting as to the authenticity of the Records described in paragraphs 40 and 41 above is attached to my affidavit as Exhibit **"KK"**.

43. In response to an order pursuant to section 11 of the Act on August 1, 2021, Bell supplied to the Competition Bureau certain data (**"Data"**) specified in Appendix "B".

44. I am informed by Mark Graham, Vice President, Legal & Regulatory at Bell and verily believe that the Data and any email clarifications sent by Bell to the Competition Bureau in response to questions arising from the section 11 specification responses were based on information collected and maintained by Bell in the usual and ordinary course of business.

SWORN by Blaik Kirby, of the city of King City, in the Province of Ontario before me at the City of Toronto, in the Province of Ontario, on April 28, 2022 in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

SHAW COMMUNICATIONS INC.

Respondent

AFFIDAVIT OF SAMEER DHAMANI

I, **Sameer Dhamani**, of the City of **Calgary** in the province of **Alberta**, state as follows:

BACKGROUND

1. I am an owner of seven Freedom Mobile (“**Freedom**”) retail stores across Alberta. These stores are in the following communities: Calgary; Medicine Hat; Lethbridge; and Airdrie.

2. Prior to my involvement with the Freedom brand, I was a representative of Wind Mobile. Prior to that, I worked in the telecom cell phone industry with WOW! mobile.

3. I am also a member of the Association of Freedom Wireless Dealers (“**F-Branded Association**”). This is an association of all Freedom Mobile retail stores across Canada who wish to join, which was established on April 7, 2021, shortly after Rogers Communications Inc. (“Rogers”) announced that it had agreed to acquire Shaw Communications Inc. (“Shaw”). The F-Branded Association has 22 members, representing 179 Freedom retail locations in Ontario and Alberta. The members represent approximately 80% of Freedom retail stores across Canada, including all Alberta dealers and the majority of Ontario dealers (18 out of 21). Our members, many of whom began operations before Shaw acquired Wind Mobile in 2017, own anywhere from 1 to 22 locations.

4. The F-Branded Association was established to work proactively to discuss collective business issues and concerns between Freedom retail stores and Shaw.

5. I have personal knowledge of the matters in this statement, except where I have indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

6. I make this Witness Statement in connection with an Application by the Commissioner of Competition (the “**Commissioner**”) against Rogers and Shaw relating to their proposed merger.

FREEDOM WIRELESS DEALERS – TARGET CUSTOMERS AND DEMOGRAPHICS

7. All Freedom retail locations (sometimes described as Freedom dealers) sign contracts with Shaw. Under the contracts, retailers are required to charge prices set by Freedom and must follow certain brand standards in terms of look and feel and design of stores, as set by Freedom.

8. Freedom dealers represent the Freedom brand in the retail distribution channel, carrying exclusively Freedom-branded offerings. Dealers sell Freedom products to retail customers and provide ancillary services such as troubleshooting and managing customer inquiries, as well as addressing issues such as buyer's remorse, warranties and exchanges. Freedom dealers also accept monthly bill payments and sell prepaid top-up vouchers to customers.

UNFAIR COMPETITION BY SHAW TOWARDS FREEDOM ALBERTA DEALERS

9. In Alberta, Shaw has been undercutting the Freedom brand with superior Shaw offers. We consider Shaw to be leveraging unfair advantages over Freedom dealers. Shaw negotiates our agreements and are not required to provide disclosure. At the same time, Freedom dealers are required to provide Shaw with operational data. Shaw has leveraged this information to support the Shaw Mobile brand and have been porting customers from Freedom to Shaw Mobile. For example, every Monday all Alberta dealers are required to submit weekly activation/upgrade reports which includes competitive offerings, described as "Market trends." This information is passed on to Freedom managers, and in turn, Shaw. Shaw has access to all of this data, while Freedom dealers do not.

10. Shaw Mobile was launched on July 30, 2020, just in time for back-to-school promotions. Shaw Mobile initially offered two plans: "By the Gig" and "Unlimited Data." "By the Gig" plans cost $0 per month and included unlimited nationwide talk and text. Under the "By the Gig" plan, customers could buy 1gb of data for $10 if they needed it, and the data would be rolled over for up to 90 days if it was not used. Shaw Mobile's "Unlimited Data" plans cost $45 per month for 25gb of data, followed by unlimited usage at a throttled speed. These wireless plans were bundled with Shaw Internet plans. Attached as Exhibit "**A**" to this affidavit is a copy of a press release from Shaw, dated July 30, 2020.

11. These wireless plans for Shaw Mobile, involving $0 and $45 monthly fees respectively, were more favourable than the monthly fees that we could offer as Freedom Mobile dealers. At the time, Freedom offered a $55 plan with a $10 discount, which was comparable to the $45 Shaw Mobile price. However, this plan could only offer 5-10gb data (the precise amount varied from time to time, depending on promotions), which are not comparable to the 25gb data offered through Shaw Mobile.

12. As a result, Freedom dealers complained to Shaw that they could not compete with these plans. Shaw responded that these offers were special introductory offers that would be time-limited, but Shaw Mobile continues to offer favourable plans that Freedom dealers cannot match. For example, Shaw Mobile offers a $25 per month “unlimited mobile” plan with 25gb LTE data paired with a Fibre+ Gig 1.5 Internet plan. Shaw Mobile aggressively markets its $25/unlimited plan, which appears to consumers to be highly superior to Freedom’s “Big Gig Unlimited” plan, which costs $50 per month. Attached as Exhibit “**B**” to this affidavit are photographs of Black Friday advertisements, comparing Shaw Mobile’s $25/unlimited plan to Freedom’s $50/unlimited plan.

13. Customers also perceive Shaw Mobile to be a discount premium brand, versus Freedom, which is viewed as a discount brand. As a result, customers who are deciding on a cell phone plan are much more likely to gravitate to Shaw Mobile versus Freedom, particularly when Shaw Mobile’s plans are better and cheaper than Freedom’s.

14. While my Freedom stores were growing by leaps and bounds from 2016-2019, this growth hit a roadblock in 2020. Historically, sales targets for my group of stores were approximately [redacted] new activations per quarter. Today, those targets have plummeted to approximately [redacted] The decimation of my business is reflected in plummeting targets for my store. Attached as Exhibit “**C**” to this affidavit are quota targets for my stores for the first quarter of 2020, 2021 and 2022 respectively. For Q1 2020, the target activations were [redacted] for eight stores. These targets dropped to [redacted] in 2021, and dropped further [redacted] in 2022. My business cannot survive on these diminished targets. As a result, due to significant losses, I recently had to close two locations. If Shaw persists in undercutting its franchisees through the Shaw Mobile brand, I will eventually be required to close all of my store locations.

15. Shaw Mobile has been increasing its activations significantly, at the expense of Freedom Mobile dealers. Attached as Exhibit “**D**” to this affidavit is a news release from Shaw, dated October 29, 2021. As described in the news release, Shaw “added approximately 60,500 new Wireless customers” in the fourth quarter of 2021. Of this amount, “postpaid net additions of approximately 48,100 in the quarter were driven by the continued momentum of Shaw Mobile.” This means that only 12,400 of the 60,500 were new Freedom Mobile customers. In turn, only a small percentage of the 12,400 new Freedom Mobile customers would be based in Alberta and B.C., compared to the 48,100 new Shaw Mobile customers,

all of whom would be based in Alberta and B.C. The October 29, 2021 Shaw news release confirms that Shaw Mobile has been increasing its activations on an exponential basis, at the expense of and to the detriment of Freedom Mobile dealers in Alberta and B.C.

SWORN OR AFFIRMED by Sameer Dhamani of the City of Calgary, in the Province of Alberta, before me at the City of Toronto, in the Province of Ontario, on March 3, 2022 in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

Shaw Mobile Has Arrived — Fast LTE and Shaw's Fibre+ Network Combine to Give Customers an Innovative Wireless Experience With Unprecedented Savings

July 30, 2020 06:00 ET | Source: Shaw Communications Inc.

- Shaw Internet customers in B.C. and Alberta can now add wireless to their Shaw Fibre+ Internet to get as many as six lines of unlimited nationwide talk and text for $0 monthly.
- Since everyone uses their smartphones and their wireless data differently, Shaw Mobile also offers an Unlimited Data plan starting at $45 a month with $10 a month US and Mexico roaming options.
- Shaw Mobile customers leverage the power of Shaw's Fast LTE, Shaw's in-home WiFi service and Canada's largest network of WiFi hotspots, powered by Shaw's Fibre+ network.
- Shaw Mobile is available across B.C. and Alberta in 19 Shaw retail stores, including 12 new stores opening in the coming weeks, and over 120 locations of Shaw's largest national retail partners across these two provinces.
- Building on the strength of its Fibre+ network, Shaw introduces the 'Brighter Together' advertising campaign focusing on the powerful combination of Shaw Mobile and Shaw's position as the new leader in gig speed internet in Western Canada.

CALGARY, Alberta, July 30, 2020 (GLOBE NEWSWIRE) -- Shaw Communications Inc. today announced the launch of Shaw Mobile — a new wireless service in Canada that leverages Shaw's Fast LTE and Fibre+ network to provide Shaw Internet customers with an innovative wireless experience that can virtually eliminate their monthly wireless data bill.

Beginning today, Shaw Mobile is available to all Shaw Internet customers who can easily add up to six wireless lines of unlimited nationwide talk and text for $0 a month on the most popular handsets.

Communications. "We are pleased to deliver what Canadians have wanted from their wireless carriers for years — innovation and technology that helps them save money without sacrificing connectivity."

Shaw Mobile customers can leverage the best WiFi experience both at home, with their Shaw Fibre+ Internet, and while on the go, by automatically connecting to any of Shaw's thousands of WiFi hotspots across Western Canada powered by Shaw's Fibre+ network. When customers aren't on WiFi, they can pay only for the data they need and connect to Shaw's Fast LTE network or to any of Shaw's roaming partners nationwide.

Shaw Mobile is designed around the fact that Canadians have been increasingly choosing to reduce their monthly wireless costs by using their smartphones on WiFi rather than cellular data. This long- term trend has been driven by the dramatic growth in the number of WiFi hotspots, the number of devices capable of connecting to WiFi, and more recently, the movement toward working from home.

As the new leader in gig speed internet service in Western Canada, Shaw's gigabit download speeds are available to over a million more homes and businesses than its closest competitor. Shaw's Fibre+ network, including in-home and public WiFi hotspots, provides great speed and coverage both within and outside the home to allow customers to spend more time on WiFi and less time on cellular.

"By leveraging WiFi powered by Shaw's Fibre+ network rather than LTE data, many Shaw Mobile customers can realistically eliminate much of their monthly wireless data expense," Mr. Shaw said. "It's 2020 and Canadians expect to be connected all the time wherever they are. With Shaw Mobile, that doesn't have to mean large wireless data charges.

"To our existing Shaw Internet customers, we're pleased to provide you with unlimited Canada-wide talk and text at no charge as a way of thanking you for your unwavering support and loyalty to our company," Mr. Shaw said. "For B.C. and Alberta residents who don't yet have their internet with Shaw, we invite you to take advantage of our Fibre+ Gig speeds available to more than 99 per cent of our market, and bundle it with a mobile service that will give you unprecedented savings exclusively available for Shaw customers."

experience by deploying new spectrum, expanding its lineup of premium devices, and building out a robust retail distribution network. Shaw has invested nearly $30 billion since fiscal 2013 to build, upgrade, and expand its Fast LTE and Fibre+ networks and services. Shaw's Freedom Mobile, recognized as an industry innovator and champion of wireless affordability, continues to serve almost 1.8 million Canadians.

Shaw Mobile puts customers firmly in control of their mobile data

Because everyone uses their phones and their data differently, in addition to being able to connect to Shaw's WiFi network, Shaw Mobile gives people the ability to customize their mobile data allotment with two rate plans — By The Gig and Unlimited Data — that can be mixed and matched to meet the needs of as many as six household members.

Customers who use only a modest amount of LTE data or who are mostly connected to WiFi can choose a By The Gig option and pay only for additional wireless data they need, starting at $10 per GB for use on the Shaw or Nationwide networks. By The Gig customers also get the benefit of unused data automatically rolling over for up to 90 days.

For those customers who need more data, Shaw Mobile's Unlimited Data plan option includes 25GB of our Fast LTE network data for only $45 per month — an abundance of wireless data at a price that's more than 40 per cent less than similar plans offered by other competitors. Beyond this, customers can choose to top their data up one gig at a time or have access to unlimited data at reduced speeds.

Shaw Mobile's launch comes at a time when Canadians are searching for better value and more features from their wireless provider.

"The launch of Shaw Mobile is the best example yet of how facilities-based providers can compete and innovate to deliver true wireless affordability," said Paul McAleese, President, Shaw Communications. "We are the only provider offering $0 talk and text to internet customers in Canada and our data plans empower them to find an option that fits their unique needs."

"Since the onset of the COVID-19 pandemic, telecom service providers such as Shaw, and its employees, have been working hard to provide high quality telecommunications services to Canadians in these trying times," said Navdeep Bains, Canada's Minister of Innovation, Science and Industry. "Now more than ever, Canadians rely on these services for work, school, finances and further reduce prices. We applaud Shaw for offering innovative options to help Canadians stay connected."

"Expanding our wireless infrastructure will enable economic development, spur job creation, and help get Albertans back to work," said Tanya Fir, Alberta Minister of Economic Development, Trade and Tourism. "Part of our economic recovery plan includes developing plans to support the fastest, most secure use of technology and data by Albertans, and today's announcement is a great step in that direction."

"Affordable wireless services ensure people can stay productive at work, connect with friends and family and unwind after a long day without worrying about unexpected and costly charges at the end of the month," said B.C. Minister of Citizens' Services Anne Kang. "The Province is a vocal advocate for the affordability and availability of mobility services for people in British Columbia. I want to thank Shaw for taking steps to reduce wireless bills for B.C. families."

More information about Shaw Mobile's innovative new plans can be found at www.shawmobile.ca/plans.

Customers can choose Shaw Mobile plans on Canada's most popular handsets

Shaw Mobile will feature premium and popular handsets from the world's top providers, including Apple, Samsung, Google, LG, and Motorola. When a customer switches to Shaw Mobile, they can bring their own device or purchase a new device using Shaw's MyTab program.

More information on compatible handsets is available at shawmobile.ca/devices

Shaw Mobile customers pay no data overage charges in Canada when using the Shaw and Nationwide networks and can leverage WiFi calling features on compatible devices to make calls from any WiFi network anywhere in the world.

While the biggest savings come from bundling Shaw's wireless and internet services, Shaw Mobile is also available as a standalone product at market rate.

locations across Alberta and B.C., including 12 new and enhanced stores in high-traffic shopping centres to be opened by the end of the summer. Shaw Mobile will also be available at over 120 locations of our largest national retail partners across B.C. and Alberta, beginning today, Thursday, July 30.

Shaw stores have been redesigned to provide customers with an immersive destination where they can explore, learn, and interact directly with the latest Shaw products and services, including Shaw's suite of in-home technology. All stores are designed with physical distancing in mind and will continue to adhere to applicable health and safety protocols to keep customers and employees safe.

Building on the strength of its Fibre+ network, the new stores reflect Shaw's "Brighter Together" advertising campaign and new visual identity. Shaw's new creative was produced in collaboration with Shaw's marketing agency of record, Rethink.

Brighter Together is a call to action suggesting that there is a brighter future for Canadians with Shaw. By bringing Shaw's total offering together, consumers get the two-fold benefit of constant high-speed connectivity and the reassuring feeling that they've made the brightest choice. The new visual identity expands the Shaw colour palette and uses fibre imagery as a symbol of connectivity and brightness.

"The language of our industry has changed, with more and more Western Canadians understanding that our value lies in the strength and capacity of our network. Our new refreshed visual identity puts Shaw's Fibre+ network at the forefront and reinforces the technology available to customers through our exciting products," Mr. McAleese said. "This new identity will serve as the foundation for all our new advertising and merchandising in the foreseeable future."

The new imagery will be extended across Shaw-branded business units, expressing a consistent experience across all customer touchpoints, including advertising and digital properties such as shaw.ca and social media accounts.

More information, including a complete list of retail locations, can be found at shaw.ca.

About Shaw

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone and video services. The Wireless division provides wireless voice and LTE data services through an expanding and improving mobile wireless network infrastructure.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

Caution Regarding Forward Looking Statements

Statements included in this news release that are not historic constitute forward looking statements within the meaning of applicable securities laws. Such statements include, but are not limited to, statements concerning the availability of handsets and the opening and timing of opening of new retail locations in B.C. and Alberta. These statements are based on assumptions made by Shaw that it believes are appropriate and reasonable in the circumstances, including without limitation, the availability of equipment and devices and the forbearance of governments in implementing any emergency measures or changes in laws or regulations that may impact Shaw Mobile, including retail store closures in response to the ongoing COVID-19 pandemic. Undue reliance should not be placed on any forward-looking statement. Many factors, including those not within Shaw's control, may cause actual results to be materially different reasonable terms; changes in the general economic, market and business conditions; emergency measures implemented by any government; changes in laws, regulations and decisions by regulators that affect Shaw Mobile or the markets in which it operates; and other factors described in Shaw's 2019 Annual Report under the heading "Known events, trends, risks and uncertainties" and in its Management's Discussion and Analysis for the period ended May 31, 2020. The foregoing is not an exhaustive list of all possible factors. Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described herein. Any forward-looking statements contained herein speak only as of the date of this news release. Except as required by law, Shaw disclaims any obligation to update any forward-looking statement.

NEWS RELEASE

Shaw Announces Fourth Quarter and Full Year Fiscal 2021 Results

- **Shaw delivers fourth quarter and full year financial performance and subscriber activity in line with expectations**
- **Fiscal 2021 consolidated results include adjusted EBITDA[1] growth of 4.6% and free cash flow[1] of $961 million**
- **Fiscal 2022 priorities include supporting the closure of the transaction with Rogers and planning for the benefits that the combined entity will provide to Canadians**

Calgary, Alberta (October 29, 2021) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended August 31, 2021. Consolidated revenue increased 2.1% year-over-year to $1.38 billion, adjusted EBITDA increased 3.4% year-over-year to $614 million and net income increased 44% to $252 million.

Fiscal 2021 consolidated revenue increased 1.9% year-over-year to $5.51 billion and adjusted EBITDA increased 4.6% year-over-year to $2.50 billion. Fiscal 2021 results include incremental Wireline Consumer revenue of approximately $20 million related to the release of a provision following the Canadian Radio-television and Telecommunications Commission (CRTC) decision on final aggregated Third Party Internet Access (TPIA) rates and higher equity-based compensation costs of approximately $24 million due to the significant increase in Shaw's share price following the Rogers Transaction announcement on March 15, 2021. In addition, fiscal 2021 adjusted EBITDA results include a reduction in bad debt expense compared to the prior periods of approximately $10 million in the fourth quarter and approximately $28 million for the year as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables.

COVID-19 continues to significantly impact Canadians and economies around the world as we experience new waves and variants of the virus. The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, reliable connectivity for our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. In fiscal 2021, Shaw's networks proved to be resilient and performed well despite the increase in usage and extended peak hours resulting from the impacts of COVID-19.

While the financial impacts from COVID-19 in fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves/variants. Shaw Business, which primarily serves the small and medium sized market, remains particularly vulnerable to COVID-19 related restrictions, including mandated business closures, capacity restrictions or further social distancing measures.

[1] Adjusted EBITDA and free cash flow are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standardized meanings, and therefore may not be a reliable way to compare us to other companies. Additional information about these measures, including quantitative reconciliations to the most directly comparable financial measures in the Company's Consolidated Financial Statements, is included in "Non-GAAP and additional financial measures" in this press release.

"This past year and a half has seen a number of significant events unfold that will undeniably shape and strengthen our industry and communities that we serve. While the COVID-19 pandemic continues across the country, strong and ubiquitous connectivity has never been more essential. Our customers increasingly rely on these services, particularly as technology continues to evolve. To deliver a seamless connectivity experience in the fast-approaching 5G era, we announced our combination with Rogers on March 15, 2021, followed by resounding support from our Class A and Class B shareholders at the special meeting to approve the combination. We recognize that we can do so much more by coming together. Canadians, regardless of where they reside, need access to these vital services which requires significant ongoing investment, supported by a steady regulatory framework. Throughout the extraordinary change we have faced, the entire team at Shaw executed on our fiscal 2021 plan, ensuring that we continue to meet the needs of our customers. In the months ahead, we remain committed to delivering exceptional customer experiences, investing in the strength of our networks and continued focus on execution of our strategic business priorities. As previously stated publicly, we reiterate our continued commitment to work with Rogers to close the transaction and it is not appropriate for Shaw to comment on recent events at Rogers," said Brad Shaw, Executive Chair & Chief Executive Officer.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. As at March 13, 2021, when the Arrangement Agreement was signed, the value of the consideration attributable to the Class A Shares and Class B Shares held by the Shaw Family Shareholders (calculated using the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021) was equivalent to $40.50 per share.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

On June 30, 2021 (the "Redemption Date"), the Company redeemed all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares" and, together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld. On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the CRTC in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Fourth Quarter Fiscal 2021

In the fourth quarter, the Company added approximately 60,500 new Wireless customers. Postpaid net additions of approximately 48,100 in the quarter were driven by the continued momentum of Shaw Mobile. Wireless service revenue growth of 10.4% is due to continued subscriber growth, partially offset by lower ARPU[2]. As the Company continues to scale its lower revenue Shaw Mobile customer base, fourth quarter Wireless ARPU decreased 5.7% from the prior year period to $37.39; however, an increase in customers signing up for bundled offerings and Internet migration to faster speed tiers continues to support Internet revenue growth. Wireless postpaid churn[3] of 1.49% improved approximately 8-basis points from the fourth quarter of fiscal 2020. In fiscal 2021, the Company added approximately 295,000 Wireless customers bringing its total customer base to over 2.1 million.

In the quarter, Consumer RGU[4] losses of approximately 50,000 improved over the prior year period, led by Internet RGU additions of approximately 5,100 as customers continue to bundle their Internet and Wireless service together. Fourth quarter Wireline revenue was in-line with the prior year at $1.06 billion and Wireline adjusted EBITDA decreased 0.4% to $508 million.

Selected Financial Highlights

	Three months ended August 31,			Year ended August 31,		
(millions of Canadian dollars except per share amounts)	**2021**	2020	Change %	**2021**	2020	Change %

Net income	**252**	175	44.0	**986**	688	43.3
Basic and diluted earnings per share	**0.50**	0.34		**1.94**	1.32	

(1) See "Non-GAAP and additional financial measures" for more information about these non-GAAP financial measures.
(2) Adjusted EBITDA margin is a non-GAAP ratio. Adjusted EBITDA margin is not a standardized measure under IFRS and may not be a reliable way to compare us to other companies. Additional information about this measure is included in "Non-GAAP and additional financial measures" in this press release.

Fourth quarter Wireless revenue increased 9.2% to $321 million and adjusted EBITDA of $106 million increased 26.2% year-over-year. Wireless service revenue for the three and twelve-month periods increased 10.4% and 9.3% respectively, to $233 million and $891 million over the comparable periods in fiscal 2020 due to an increased subscriber base, including significant Shaw Mobile additions. Wireless equipment revenue for the three and twelve-month periods increased 6.0% and 8.5% respectively, to $88 million and $381 million over the comparable periods in fiscal 2020. Fourth quarter ARPU decreased 5.7% to $37.39 reflecting Shaw Mobile customer growth. For the full year, ARPU of $37.35 decreased 4.1% over the prior year.

[2] ARPU is a supplementary financial measure which may not be comparable to similar measures presented by other issuers. Additional information about this supplementary financial measure is included in "Key Performance Drivers" in this press release.
[3] Wireless postpaid churn is a metric used to measure the Company's success in retaining Wireless subscribers. Additional information about this metric is included in "Key Performance Drivers" in this press release.
[4] RGUs is a metric used to measure the count of subscribers in the Company's Wireline and Wireless segments. Additional information about this metric is included in "Key Performance Drivers" in this press release.

For the twelve-month period, Wireless revenue grew 9.1% to $1.27 billion and adjusted EBITDA of $393 million improved 16.6%.

Wireline RGUs declined by approximately 45,400 in the quarter compared to a loss of approximately 71,200 in the fourth quarter of fiscal 2020. The current quarter was led by a gain in Consumer Internet RGUs of approximately 5,100 while offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 50,000 in the aggregate, partially offset with the addition of 4,600 Business RGUs. In fiscal 2021, the Company continued to focus on profitable Internet growth and retention, primarily through bundling with its wireless offerings.

Fourth quarter Wireline revenue of $1.06 billion and adjusted EBITDA of $508 million were in-line with the prior year. Consumer revenue of $910 million decreased 0.8% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue of $149 million increased 6.4% year-over-year with Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector.

For the twelve-month period, Consumer revenue decreased 0.5% to $3.66 billion and Business revenue increased 3.0% to $584 million resulting in Wireline revenue of $4.25 billion, which was approximately flat compared to the prior year. Adjusted EBITDA for the same period of $2.10 billion increased 2.6%.

Capital expenditures in the fourth quarter of $287 million compared to $307 million in the prior year. Wireline capital spending increased by approximately $29 million primarily due to higher investments in combined upgrades, enhancements and replacement categories as well as an increase in new housing development. Wireless spending of $66 million decreased by approximately $49 million year-over-year primarily due to lower planned investment in the quarter. In fiscal 2021, and in aggregate, consolidated capital expenditures of approximately $1 billion decreased 9.7% from the prior year.

Free cash flow for the quarter of $180 million compared to $152 million in the prior year. The increase was largely due to higher adjusted EBITDA and lower capital expenditures. Free cash flow for fiscal 2021 of $961 million was $214 million or approximately 29% higher than the prior year due to growth in adjusted EBITDA, lower capital expenditures and a $35 million reduction of tax related interest expense.

Net income for the fourth quarter of fiscal 2021 of $252 million compared to $175 million in the fourth quarter of fiscal 2020. Net income for fiscal 2021 of $986 million was $298 million higher than the prior year primarily due to the $109 million increase in consolidated adjusted EBITDA and $35 million reduction in interest expense as discussed above and a $133 million decrease in income taxes in fiscal 2021 compared to fiscal 2020. Tax expense declined in fiscal 2021 mainly due to a $125 million revision to liabilities for uncertain tax positions that became statute barred in 2021 as well as the recognition of a $78 million tax benefit associated with previously unrecognized tax losses in the fourth quarter of 2021 driven by management's expectations that sufficient future taxable profit will be available to fully utilize such losses, offset by the effect of higher pre-tax income.

As at the end of fiscal 2021, the net debt leverage ratio was 2.3x[5]. In fiscal 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 million. In connection with the announcement of the proposed Transaction on March 15, 2021, the Company suspended share buybacks under its normal course issuer bid (NCIB) program.

5 Net debt leverage ratio is a non-GAAP ratio and net debt, which is a component of net debt leverage ratio, is a non-GAAP financial measure. Net debt leverage ratio and net debt are not standardized measures under IFRS and may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for more information about this measure and ratio.

Shaw files Year-End Disclosure Documents

Shaw announced today the filing with Canadian securities regulators of its 2021 audited annual consolidated financial statements, related management's discussion and analysis and 2021 annual information form and the filing with the U.S. Securities and Exchange Commission of its 2021 annual report on Form 40-F which includes the Canadian filings.

These documents are available on Shaw's profile on the Canadian Securities Administrators' website (www.sedar.com). The Form 40-F is available on the U.S. Securities and Exchange Commission's website (www.sec.gov). All of these documents are also available on Shaw's website at www.shaw.ca/corporate/investor-relations/financial-reports. Any shareholder wishing to receive a printed copy of the 2021 annual report containing the audited annual consolidated financial statements and related management's discussion and analysis may request one at no charge by e-mail to investor.relations@sjrb.ca.

Caution concerning forward-looking statements

Statements included in this press release that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal," and similar expressions (although not all forward-looking statements contain such words). All of the forward-looking statements made in this report are qualified by these cautionary statements. Forward looking statements in this press release include, but are not limited to, statements relating to:

- the expected impact of the COVID-19 pandemic;
- future capital expenditures;
- proposed asset acquisitions and dispositions;
- anticipated benefits of the Transaction to Shaw and its securityholders, including corporate, operational, scale and other synergies and the timing thereof;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of applicable approvals under the *Broadcasting Act* (Canada), the *Competition Act* (Canada) and the *Radiocommunication Act* (Canada) (collectively, the "Key Regulatory Approvals") related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to the closing of the Transaction and the anticipated timing for closing of the Transaction;
- expected cost efficiencies;
- expectations for future performance;
- business and technology strategies and measures to implement strategies;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;

- expected project schedules, regulatory timelines, and completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators, or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented or withdrawn by governments or regulators;
- timing of new product and service launches;
- the resiliency and performance of the Company's wireline and wireless networks;
- the deployment of (i) network infrastructure to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- expected changes in the Company's market share;
- the ability of Shaw Mobile to drive customer growth;
- the cost of acquiring and retaining subscribers and deployment of new services;
- expansion of and changes in the Company's business and operations and other goals and plans; and
- execution and success of the Company's current and long term strategic initiatives.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this press release are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods. These assumptions, many of which are confidential, include, but are not limited to management expectations with respect to:

- general economic conditions, including the impact on the economy and financial markets resulting from the COVID-19 pandemic and other health risks;
- the impact of the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources, and/or financial results;
- anticipated benefits of the Transaction to the Company and its security holders;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of the Key Regulatory Approvals related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to closing of the Transaction in a timely manner and the completion of the Transaction on expected terms;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the impact of the announcement of the Transaction, and the dedication of substantial Company resources to pursuing the Transaction, on the Company's ability to maintain its current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the ability to satisfy the other expectations and assumptions concerning the Transaction and the operations and capital expenditure plans for the Company following completion of the Transaction;
- future interest rates;
- previous performance being indicative of future performance;

- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment and devices;
- industry structure, conditions, and stability;
- regulation, legislation, or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation or withdrawal of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company's access to sufficient retail distribution channels;
- the Company's access to the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including, but not limited to:

- changes in general economic, market and business conditions, including the impact of the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees in response to the COVID-19 pandemic;
- the failure of the Company and Rogers to receive, in a timely manner and on satisfactory terms, the necessary regulatory or other third-party approvals, including but not limited to the Key Regulatory Approvals required to close the Transaction;
- the ability to satisfy, in a timely manner, the other conditions to the closing of the Transaction;
- the ability to complete the Transaction on the terms contemplated by the Arrangement Agreement;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the Company's failure to complete the Transaction for any reason could materially negatively impact the trading price of the Company's securities;
- the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction may adversely impact the Company's current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;

- the failure of the Company to comply with the terms of the Arrangement Agreement may, in certain circumstances, result in the Company being required to pay the termination fee to Rogers, the result of which will or could have a material adverse effect on the Company's financial position and results of operations and its ability to fund growth prospects and current operations;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information, and communications industries;
- changes in laws, regulations and decisions by regulators or other actions by governments or regulators that affect the Company or the markets in which it operates;
- any emergency measures implemented or withdrawn by governments or regulators;
- technology, privacy, cyber security, and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects on a timely basis;
- the Company's ability to grow subscribers and market share;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in the Company's fiscal 2021 annual management's discussion and analysis (MD&A) under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors.

Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2021 annual MD&A and this press release.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this press release are expressly qualified by this statement.

Key Performance Drivers

Shaw measures the success of its strategies using a number of key performance drivers which are defined and described below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance drivers are not measurements in accordance with IFRS, should not be considered alternatives to revenue, net income or any other measure of performance under IFRS and may not be comparable to similar measures presented by other issuers.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.49% in the fourth quarter of fiscal 2021 improved from 1.57% in the fourth quarter of fiscal 2020. For fiscal 2021, postpaid churn of 1.41% was comparable to 1.40% in fiscal 2020.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is a supplementary financial measure and industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $40.29 in the fourth quarter of fiscal 2021 decreased 10% from $44.81 in the fourth quarter of fiscal 2020. In fiscal 2021, ABPU decreased 6.8% to $41.15. The ABPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is a supplementary financial measure that is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

ARPU of $37.39 in the fourth quarter of fiscal 2021 compares to $39.65 in the fourth quarter of fiscal 2020, representing a decrease of 5.7%. In fiscal 2021, ARPU decreased 4.1% to $37.35. The ARPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Non-GAAP and additional financial measures

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures or ratios. These financial measures or ratios do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure documents may also provide discussion and analysis of additional financial measures. Additional financial measures include line items, headings and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-GAAP financial measures, ratios and additional financial measures have not been presented as an alternative to revenue, net income or any other measure of performance required by GAAP.

Below is a discussion of the non-GAAP financial measures, ratios and additional financial measures used by the Company and provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, other gains (losses), amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business.

Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended August 31,		Year ended August 31,	
(millions of Canadian dollars)	**2021**	2020	**2021**	2020
Net income	**252**	175	**986**	688
Add back (deduct):				
Restructuring costs	**-**	-	**14**	14
Amortization:				
Deferred equipment revenue	**(2)**	(3)	**(11)**	(16)
Deferred equipment costs	**10**	14	**47**	65
Property, plant and equipment, intangibles and other (1)	**302**	301	**1,183**	1,168
Amortization of financing costs – long-term debt	**-**	1	**2**	3
Interest expense	**67**	68	**231**	274
Other gains (losses)	**6**	1	**2**	16
Current income tax expense	**38**	42	**30**	120
Deferred income tax expense (recovery)	**(59)**	(5)	**16**	59
Adjusted EBITDA	**614**	594	**2,500**	2,391

Adjusted EBITDA Margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Three months ended August 31,			Year ended August 31,		
	2021	2020	Change %	**2021**	2020	Change %
Wireline	**48.0%**	48.2%	(0.4)	**49.6%**	48.3%	2.7
Wireless	**33.0%**	28.6%	15.4	**30.9%**	28.9%	6.9
Combined Wireline and Wireless	**44.6%**	44.0%	1.4	**45.4%**	44.2%	2.7

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

	Three months ended August 31,			Year ended August 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %
Revenue

Pension adjustment	**(4)**	(3)	33.3	**2**	1	100.0
Preferred share dividends	**(2)**	(2)	–	**(8)**	(9)	(11.1)
Free cash flow	**180**	152	18.4	**961**	747	28.6

(1) Per Note 26 to the audited annual Consolidated Financial Statements.

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio.

The Company calculates net debt leverage ratio as follows[(1)]:

(millions of Canadian dollars)	2021	2020
Short-term borrowings	**200**	200
Current portion of long-term debt	**1**	1
Current Portion of Lease Liabilities	**110**	113
Long-term debt	**4,549**	4,547
Lease Liabilities	**1,135**	1,157
50% of outstanding preferred shares	**–**	147
Cash	**(355)**	(763)
(A) Net debt[(2)]	**5,640**	5,402
(B) Adjusted EBITDA[(2)]	**2,500**	2,391
(A/B) Net debt leverage ratio[(3)]	**2.3x**	2.3x

(1) The following contains a breakdown of the components in the calculation of net debt leverage ratio, which is a non-GAAP ratio.

(2) See "Non-GAAP and additional financial measures" for more information about these non-GAAP financial measures.

(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies.

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondents

AFFIDAVIT OF SUDEEP VERMA

I, **Sudeep Verma**, of the City of **Toronto** in the province of **Ontario**, state as follows:

BACKGROUND

1. I am an owner of 17 Freedom Mobile ("**Freedom**") retail stores across Ontario. These stores are in the following communities: Etobicoke, Toronto, Oshawa, Bowmanville, Peterborough, Lindsay, Kanata and Ottawa.

2. Prior to my involvement with the Freedom brand, I was a representative of Bell and Public Mobile.

3. I am also a member of the Association of Freedom Wireless Dealers ("**F-Branded Association**"). This is an association of all Freedom Mobile retail stores across Canada who wish to join, which was established on April 7, 2021, shortly after Rogers Communications Inc. ("**Rogers**") announced that it had agreed to acquire Shaw Communications Inc. ("**Shaw**"). The F-Branded Association has 22 members, representing 179 Freedom retail locations in Ontario and Alberta. The members represent approximately 80% of Freedom retail stores across Canada, including all Alberta dealers and the majority of Ontario dealers (18 out of 21). Our members, many of whom began operations before Shaw acquired Wind Mobile in 2017, own anywhere from 1 to 22 locations.

4. The F-Branded Association was established to work proactively to discuss collective business issues and concerns between Freedom retail stores and Shaw.

5. I have personal knowledge of the matters in this statement, except where I have indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

6. I make this Witness Statement in connection with an Application by the Commissioner of Competition (the "**Commissioner**") against Rogers and Shaw relating to their proposed merger.

FREEDOM WIRELESS DEALERS – TARGET CUSTOMERS AND DEMOGRAPHICS

7. All Freedom retail locations (sometimes described as Freedom dealers) sign contracts with Shaw. Under the contracts, retailers are required to charge prices set by Freedom and must follow certain brand standards in terms of look and feel and design of stores, as set by Freedom.

8. Freedom dealers represent the Freedom brand in the retail distribution channel, carrying exclusively Freedom-branded offerings. Dealers sell Freedom products to retail customers and provide ancillary services such as troubleshooting and managing customer inquiries, as well as addressing issues such as buyer's remorse, warranties and exchanges. Freedom dealers also accept monthly bill payments and sell prepaid top-up vouchers to customers.

9. Freedom dealers, including myself, started their businesses because we saw a market opportunity. We viewed Bell, Rogers and TELUS as focusing revenue growth on selling upgrades to existing customers. By contrast, Freedom dealers saw a chance to target an underserved market by gaining market share with new Canadians or customers who were first-time cell phone purchasers. Freedom dealers position their retail stores within local communities in which these opportunities are thought to exist.

10. Based on market research by the F-Branded Association and our knowledge of the in-store experience, the primary customer segments that rely on Freedom retail services are mid-to-low income earners, new Canadians, visible minorities, students and seniors.

11. Based on data from our customer postal codes and StatsCan, our customers live in areas with mid-to-low average incomes, with high concentrations of new Canadians and high concentrations of visible minority populations. Attached as Exhibit "**A**" to this affidavit is an analysis prepared by the F-Branded Association, which compares the postal codes of its customers in the GTA area and compares those postal codes to information from the City of Toronto as to average family income, concentration of new immigrants, and concentration of visible minority population.

12. The F-Branded Association reviewed marketing spend by its members, which suggested that 63% of average dealer advertising spend is through ethnic media channels such as booths at ethnic outdoor festival events and advertisements in foreign languages such as

Chinese or Punjabi. Attached as Exhibit "**B**" to this affidavit are examples of ethnic advertising by Freedom dealers, including marketing initiatives to international students.

13. Freedom also targets students with its advertising. Attached as Exhibit "**C**" to this affidavit is a sample Back-to-School promotional campaign dated July 25, 2019, which focuses on affordable plans for students and provides sample talking points to Freedom dealers to favourably compare Freedom plans to Rogers. Freedom stands for affordability in the marketplace, which resonates with student customer groups.

14. Attached as Exhibit "**D**" to this affidavit is an analysis prepared by the F-Branded Association to show the percentage of prepaid customers, versus postpaid. Based on this sales data, prepaid users make up 43.1% of F-Branded Association customers, a rate which has steadily increased since 2018 when they made up 22.9% of our customers. In my experience, prepaid plans are attractive for financial reasons and because customers may not qualify for post-paid, for example, due to poor credit ratings, and for customers with low phone usage requirements, such as seniors. The source of this data in the analysis is actual sales recorded in the point-of-sale software at the store level and an average across the membership of the association.

FREEDOM WIRELESS DEALERS - OPERATIONS AND COMPETITIVE BACKGROUND

15. Freedom competes with other wireless service retailers in many aspects that consumers care about such as price, talk and text, data, long-distance minutes, customer service, available devices, warranties, no surprises, no bill shocks, no data overages, and the ability to obtain the same plans on postpaid and prepaid. Attached as Exhibit "**E**" to this affidavit is a training document dated March 21, 2018, entitled "A Success Attitude – Pride in Freedom Mobile, and belief in the strength and future of the brand." The Exhibit describes certain core aspects of Freedom's brand and marketing, including unlimited and affordable wireless services; no data overage charges; and no fixed-term contracts.

16. Since the inception of Wind Mobile, and subsequently Freedom Mobile, the objective of the brand has been to be an innovator and a disrupter in the wireless industry, offering better plans to consumers at affordable prices and forcing incumbents to match Freedom's competitive offers. Attached as Exhibit "**F**" to this affidavit is an e-mail enclosing a message

from Alek Krstajic, the former CEO of Freedom Mobile, which states in part that Freedom has succeeded "against all odds as underdogs in an industry dominated by the Big Three – by providing an affordable, high-value alternative service for wireless customers." The e-mail further refers to the fact that Freedom "continues to upgrade our network […] and continue to provide customers with freedom from data overages, freedom from price-gouging, flat monthly fees – affordable everything."

17. Wind Mobile did not sell new iPhones because its network did not qualify for iPhone use. However, after Shaw acquired Wind in 2016, Shaw invested in network upgrades that eventually allowed Freedom to begin offering iPhones to its customers, in or about December 8, 2017. Giving Freedom dealers the ability to offer iPhones to its customers was a significant development which put Freedom on the same competitive footing as other wireless brands.

18. Wind/Freedom is a pioneer in industry-leading reforms, which the incumbents ultimately matched, helping Canadian consumers. Some examples of these disruptions include: (a) unbundling device pricing from rate plans, which meant customers did not have to continue paying for their hardware once devices were paid off (in a two-year term), and (b) introducing "Big Gig data" on rate plans, which meant consumers had abundant data as compared to incumbents who did not offer these plans, but which ultimately forced incumbents to follow suit. A summary of some of Freedom's pioneering competitive initiatives is described below.

19. In 2017, Freedom reduced deposit requirements, allowing customers that did not previously qualify for post-paid plans due to their credit score to enter plans with little to no deposit.

20. In 2017, Freedom introduced Big Gig, giving customers more data than previous plans at a reasonable price. Attached as Exhibit "**G**" to this affidavit is a Freedom publication dated October 16, 2017, which summarizes the details of this plan.

21. Attached as Exhibit "**H**" to this affidavit is a chart entitled "Big Gig – Steep Discounts Establish Freedom as Value Leader" dated November 1, 2017, which shows Freedom's positioning in the market by comparing the "Big Gig" price and data allotment for Freedom, compared to competing brands. Attached as Exhibit "**I**" to this affidavit is an e-mail from Paul McAleese, who was then President of Freedom Mobile Communications, dated

August 1, 2018. The e-mail discusses the launch of Big Gig data plans with no overage fees and describes "taking aim at the practices that charge wireless users astronomical fees when they go over their data limit" by promoting "our data-rich Big Gig plans."

22. Freedom heavily invested in advertising the new Big Gig promotion, which received favourable media coverage. A sampling of these advertisements and media coverage can be found at: https://strategyonline.ca/2018/08/07/freedom-mobile-tells-customers-they-deserve-to-be-free-from-fees/.

23. Freedom marketed a similar promotion in November 2018, called "Big Binge Bonus." This was a plan that offered up to 100gb of additional LTE data for customers who signed up to a Big Gig plan and a new smartphone on a two-year term. This promotion was not as successful as Freedom's prior year Big Gig campaign because in 2018, Bell, Telus and Rogers were engaged in a form of price war, in which these incumbents offered $60 monthly plans with unlimited data for both new and existing customers. Many prospective customers viewed Bell, Telus and Rogers' plans as superior to the Freedom "Big Binge Bonus."

24. Throughout our history as Freedom dealers, we have strived to make Freedom the most attractive choice for customers moving over from the "big 3" incumbent providers. Attached as Exhibit "**J**" to this affidavit is a chart from the F-Branded Association, which reflects that 61% of total Freedom activations are port-ins from Rogers, Fido and Chatr. The source for this data is a member dealer operating more than 10 locations in the GTA and who has been tracking port-in at the store level via the point-of-sale software. There has been a conscious effort on part of Freedom to position itself as an alternative to the "Big Three". Attached as Exhibit "**K**" to this affidavit is a "Freedom Mobile Competitor Comparison" document prepared by Freedom.

25. To communicate these advantages to customers, dealers use marketing and purchase advertisements and engage with customers in-store.

RIVALRY BETWEEN ROGERS AND SHAW

26. Freedom dealers view Rogers and its flanker brands as our primary competitors. As described in Exhibit "**J**", F-Branded Association data indicates that 61% of Freedom port-

ins come from Rogers, Fido and Chatr, with the remainder coming from Bell, TELUS and their respective flanker brands. Further, as described in Exhibit "**L**", 70% of Freedom retail store locations are within 1km of a Rogers, Fido or Chatr store. The source for this data is the F-Branded Association.

CHANGES AT SHAW SINCE THE ANNOUNCEMENT OF THE MERGER

27. F-Branded Association dealers have already felt impacts on our competitive position since the announcement of the acquisition on March 15th, 2021 (the "**Announcement**").

28. Since the Announcement, sales quotas from Shaw have decreased. Year-over-year quotas dropped in the first quarter of 2022 compared to the same period in 2021. Quota decreases vary by dealer, but range from 12-38% decreases for pre-paid plans and 28-70% for post-paid plans. Attached as Exhibit "**M**" are communications and quota numbers for the year 2020-22 (using Connexion as an example). Attached as Exhibit "**N**" is a summary of F-Branded Association data, showing the percentage range decreases described above.

29. For a dealer, the consequences of not meeting the quota are two-fold: (a) a loss of bonus payments and (b) it is considered an "Event of Default" under the dealer agreement.

30. From a competitive perspective, quotas have been decreasing because Freedom has not been as competitive with other brands, compared to its historical record as a market disruptor. Historically, Freedom's plans were between 25-30% cheaper than the "big three" and their flanker brands. This is no longer the case, and Freedom's plans are not perceived to be as attractive as they once were. Further, since the merger announcement, sourcing adequate amounts of inventory of sought-after cellphones has been a constant challenge for myself and other Freedom dealers. Although Freedom attributes these inventory shortages to issues like microchip shortages and supply chain issues, we know that our competitors have adequate levels of inventory. If dealers do not have adequate amounts of inventory, we can only offer BYOD plans with limited benefits to dealers. Further, when limited amounts of inventory are received, Freedom is no longer offering attractive subsidies on phones which it had historically offered. As a result, since the announcement of the proposed merger, the combination of (i) limited inventory, (ii) limited

subsidies and (iii) unfavourable wireless plans have led to a scenario in which Freedom and its dealers are no longer perceived as an attractive alternative to the “big three” cell phone companies and their flanker brands. The diminished attractiveness of the Freedom brand has led to reduced demand and reduced dealer quotas as a result.

31. Before the Announcement, Shaw had provided the Freedom dealers with promotional and training materials related to the upcoming launch of 5G. After the Announcement, on April 12, 2021, Shaw sent us a communication informing us that the 5G launch was paused indefinitely and requesting that we return the promotional materials. Attached as Exhibit “**O**” to this affidavit is a memo from Freedom Mobile dated April 8, 2021 with announcements about the rolling-out of 5G plans for Freedom Mobile. Attached as Exhibit “**P**” to this affidavit is a memo from Freedom Mobile dated April 21, 2021, which describes the indefinite pausing of the launch of the 5G network for Freedom.

32. Before the Announcement, Shaw had requested that Freedom dealers renovate their locations for a reimaging at a cost of $100,000 per store. After the Announcement, F-Branded Association dealers pushed back, due to uncertainty for the future in light of the acquisition. Shaw responded by proposing a reduced scope of renovations to $15,000 per store. F-Branded Association dealers have not agreed, and these discussions are ongoing. Attached as Exhibit “**Q**” to this affidavit is a memo from Shaw dated April 8, 2021 described as “Dealer Reno Program 2021.” Attached as Exhibit “**R**” to this affidavit is an e-mail from myself to Freedom Mobile dated May 12, 2021, stating in part that “on numerous occasions and calls (post Rogers/Shaw merger) we have been told to go month to month or 1 year” with respect to our store leases.

33. Freedom dealers are uncertain about long-term decisions given the uncertainty surrounding the acquisition. Many members have moved their leases to month-to-month contracts, increasing our costs. Attached as Exhibit “**S**” to this affidavit is an example of my store location that is month-to-month, in which the landlord has posted a large “for lease” sign on the window. This has impacted the business adversely and employee sentiment. This is an ongoing concern, as store leases come up for renewal and landlords expect clear communication.

EFFECT OF THE ANNOUNCEMENT ON THE DEALER BUSINESS

34. On December 31st 2021, two Ontario dealers collectively shut down five stores and two Alberta dealers shut down a total of four stores. Also, three more stores were shut down January 31st 2022. Apart from these permanent store closures, there are a few store locations (approximately five) that have been shut down temporarily, pending the outcome of the merger.

SWORN OR AFFIRMED by Sudeep Verma of the City of Toronto, before me at the City of Toronto, in the Province of Ontario, on February 24, 2022 in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

Ethnic Admats Provided by Freedom
(For Punjabi & Chinese Ad/Admats for Print Ads)

*The promotion is available for a limited time at participating Freedom Mobile retail locations only, and is subject to change or cancellation without notice. To be eligible for the promotion, you must activate a new line during the promotion period on an Eligible Plan. Eligible plans: Postpaid or Prepaid Freedom 5GB, Promo Freedom 6GB, Big Gig Unlimited 10GB, Big Gig Unlimited + Talk 10GB/12GB/15GB/25GB and Promo Big Gig Unlimited + Talk 11GB/16GB/20GB, Big Gig Unlimited + Talk 10GB + 3GB Canada-U.S., and Big Gig Unlimited + Talk 30GB + 5GB Canada-U.S plans. The promotion may not be combined with any other in-market offer, with the exception of any qualifying bonus data offers, and the Refer a Friend program. Your service will no longer be eligible for the promotion if you: a) Downgrade your rate plan to a non-eligible plan; b) Sign up for MyTab; or c) Port your number away from Freedom Mobile. If you are not eligible for the promotion during any month, that credit will be entirely forfeited and cannot be made up. If you qualify for the credit in the months following the ineligible month, you will continue to receive the credit as applicable. You'll receive: A $10 monthly credit applied to your account for up to 12 months to a maximum of $120. The credits will start to be applied to your account as a top-up credit before tax on your 2nd top-up date (for Prepaid customers), or as a bill adjustment before tax on your 2nd bill (for Postpaid customers). The credits will be applied as long as your account is in good standing (not suspended or cancelled) and as long as you continue to be eligible. All services subject to Freedom Mobile's Terms of Service, Internet Traffic Management Policy, Fair Usage Policy, and Privacy Policy.

*Freedom Mobile's Big Gig Unlimited data plans include (depending on your selected plan) from 10GB to 25GB of Fast LTE (full-speed) data on the Freedom Network, as well as from 500MB to 2GB of Fast LTE (full-speed) data on the Freedom Nationwide Network (see freedommobile.ca/coverage). Freedom Mobile's Big Gig Unlimited data Canada-U.S. plan includes 30GB of Fast LTE (full-speed) data on the Freedom Network, as well as 5GB of Fast LTE (full-speed) data on the Freedom Nationwide Network or in the U.S. Once your Fast LTE (full-speed) allotment is depleted, you will continue to have access to data services, with no data overage fees, but at a slower speed – of up to 256 kilobits per second (for downloads) and 128 kilobits per second (for uploads) on the Freedom Network, and up to 128 kilobits per second (for downloads) and 64 kilobits per second (for uploads) on the Nationwide Network or, in the case of the Big Gig Unlimited data Canada-U.S. plan, in the U.S. – until the end of your current billing cycle. Applications such as web browsing, email, instant messaging, voice over IP services, or low-quality audio streaming will continue to work, but at a slower speed. Applications that normally require greater bandwidth, such as video streaming or peer-to-peer file sharing will also continue to work, but the slower speed may affect application performance. We will send you a text message notifying you when you have used 70% and 100% of the Fast LTE (full-speed) allotment included in your plan, at which point you may choose to purchase a Fast LTE (full-speed) add-on to add more full-speed data to your plan. In all cases, usage is subject to the Freedom Mobile Terms of Service and Fair Usage Policy.

Freedom mobile

Welcome to Freedom's Back-to-School Season!

Marketing - Acquisition

Another year and another Back-to-School season is upon us.

Last month, the incumbents launched new plans, copying Freedom's long-existing unlimited plans. But despite their efforts, our rate plans remain to be the most affordable plans available in the market. We're still the original Home of the Big Gig, and for this year's Back-to-School, Freedom is going even BIGGER!

"Unlimited" Rate Plans

We will adopt the word "Unlimited" on rate plans with 10GB of data or more.
So, when customers come to stores asking, "Do you have those Unlimited Plans like Rogers?" or Retail teams can proudly respond with: "Yes we do! And ours are better priced too."

For more details on rate plan suite changes, check out:
N2098-GE - Rate Plan Refresh - Introducing Big Gig Unlimited

Amazing Deals on Devices

Our Unlimited Plans ….**INCLUDE A PHONE** !
Customers signing up for one of our new Unlimited Rate Plans will have a choice of devices for absolutely zero dollars.

Training & Learning

To ensure our customer-facing teams are ready to position our awesome Back-to-School offers to customers, the following training materials are available effective July 25:

Retail
Training materials are available on Fusion. To access, follow the path below: *Learner Zone> Discover> Selling our Products & Services community >* Freedom Mobile Back to School 2019
Customer Care
Training materials are available on the Learning Site. To access, follow the path below: *Find Learning> search for the "Freedom Back to School 2019" course*

Customer Messaging

To support our Back-to-School campaign, the following customer messaging will be deployed on July 25:

Update Type	Details
Website Updates	Home page, Special Offers page, and Samsung/Apple pages on freedommobile.ca will be updated with new rate plans and device offers.
Advertising	In our biggest Back-to-School advertising campaign to date, Will Arnett will continue throwing shade at the incumbents.
Media Relations	An official media release is available here: Freedom Mobile Lowers Monthly Bills With Absolute Zero Phone-Included Offers and More Affordable Unlimited Plans
Customer Base Messaging	Our Customer Base Management (CBM) team will be deploying multiple customer base communications to support our Back-to-School offers. For more details, check out: R168-GE - Freedom Mobile's Customer Base Initiatives

Merchandising

Merchandising materials for our Back-to-School campaigns will arrive in-stores starting July 25. Store teams are expected to install these items as soon as they arrive:

Arriving on July 25
Surface Signs Window Poster Dealer Poster New Kiosk Poster

Date Published: July 25, 2019

A Success Attitude

Pride in Freedom Mobile, and belief in the strength and future of the brand

Introduction

It's always an exciting time to be a Retail Specialist at Freedom Mobile: we are not just another wireless company but one that endeavors to truly meet the needs of all our customers. With that being said, we not only offer our customers great service and plans but also a great brand. A brand we can be proud of; one we represent and protect. Our brand should mean something – firstly to us then our customers – and by Retail Specialists having a sense of pride in the brand, it should be no surprise why our customers will as well.

Objective

Explain the Freedom Mobile brand: what it means and how it benefits customers.

How It Works:

Step	Action
1	The activity leader should begin by asking the Retail Specialist to quickly list some of positive things that they tell customers when it comes to the Freedom Mobile brand. **Reponses could include:** • Unbeatable value for the money paid for service • Truly unlimited and affordable wireless services • No data overage charges • No fixed-term contracts • Wide local coverage • Constantly growing and expanding • Flexible savings options for every customer type • A true change-agent in the wireless market place etc.
2	The activity leader will follow-up the previous question by asking the Retail Specialist to list the "four fixes" that make up the Freedom Mobile brand and then summarize how these points benefit our customers. **Reponses could include:** • Freedom from data overages. • Freedom from price-gouging.

	• Flat monthly fees. • Affordable everything. *“Gone are the days when customers get dinged with excessive data overage charges or monthly plans that just gouge people’s wallets. At Freedom Mobile, we offer our customers flat monthly rates that are not just affordable to some, but all our customers.”* *“Essentially, our commitment is to keep our service rates as low and affordable as we can, with no surprises or changes that would hurt the overall customer experience.”* *“Canadians deserve the freedom to communicate and at Freedom Mobile, we believe everyone should be just that – free! They should be free to communicate and keep in contact with their loved ones without having to worry about high costs or other barriers. No one should feel left behind!"*
3	The activity leader will then ask the Retail Specialist to summarize reasons for why it is important to have pride in the Freedom Mobile brand. **Responses to look for:** • Having pride in the brand shows the customer that we not only believe in what we offer but that we are willing to stand behind our products and services – now and in the future! • Having pride in the brand shows that we are confident about our offerings and that our customers can trust what we are presenting them will truly be beneficial to them. • Having pride in the brand can provide our customers comfort whenever they have concerns or hesitations.
4	The store leader can then celebrate and reinforce any specific wins Freedom Mobile has achieved in recent times with the learner. Furthermore, the store leader should gain commitment from the Retail Specialist to incorporate demonstrations of their belief in the Freedom Mobile brand their sale pitch. Discussions about the impact it has on their sales presentations will be done in their next coaching session.
5	The activity leader will ask the Retail Specialist if they have any remaining questions or concerns and then thank them for their participation.

<<This message has been sent to Dealer Principals and Off Shore Care Sites>>

Message from Alek

Communicated: April 12, 2017

Dealer & Off Shore Care Channel

This morning, Freedom Mobile's CEO Alek Krstajic shared that he will be stepping down as CEO of Freedom Mobile. See below for a message from Alek:

"What an amazing journey we've been on together. We've continued to grow our customer base to well over a million customers -- against all odds as underdogs in an industry dominated by the Big Three -- by providing an affordable, high-value alternative service for wireless consumers. We couldn't be happier with the confidence and resources provided by Shaw, and their support to your work has helped our value proposition resonate with Canadians. The future of Freedom Mobile is bright.

I'm honoured to have shared this experience with all of you and it's time for me to proudly pass the baton to my friend and wireless industry veteran, Paul McAleese. I will be retiring at the end of this month.

Paul brings to Freedom over two decades of experience in mobile communications in the U.S., U.K., and Canada. Reporting directly to Shaw's President, Jay Mehr, Paul will continue to apply his experience and expertise to leading Freedom Mobile into the future as a major player in the Canadian wireless industry for years to come.

Over the coming weeks, Paul and the Shaw senior leadership team will take key steps to further integrate Freedom and Shaw as we continue down the path to one converged wireless and wireline network that delivers seamless connectivity for customers.

It's been an honour to work alongside all of you over the past two years and it's your outstanding dedication, creativity and teamwork that have made Freedom Mobile the company it is today. You're ready to take the next step under Paul's leadership as we continue to upgrade our network, further integrate Freedom and Shaw and continue to provide customers with freedom from data overages, freedom from price-gouging, flat monthly fees—affordable everything.

Thank you for your hard work, commitment and friendship—I wish you all the best.

Alek"

New Consumer Rate Plan Suite Coming October 19

Type:	News	**ID:**	N1280-GE
Category:	Product and Service	**Published:**	October 16, 2017
Target Audience:	General Employee	**Last Updated:**	October 16, 2017

KEY DATES

Effective Date: Thursday, October 19, 2017

DETAILS

Summary

- Freedom Mobile has always offered great choices for customers; effective **October 19** we are going to continue that tradition, but in a new and **BIG** way.
- We're completely overhauling our rate plans and MyTab structure in a way that introduces more great ways for our customers to:
  - get more data to access our fast LTE network, and
  - save more on the phones they know and love.
- Building on the success of MyTab Bonus, we are offering more great savings on phones to our customers depending on the plan they choose. **This means more $0 phones**!
- See the sections below for a high level summary of the changes, then review the following resources for more details:
  - For a full breakdown of our 10 new rate plans' specifications/inclusions, review:
    - R042-GE - Standard Consumer Rate Plan Offering
  - For updated MyTab program policy and eligibility, review:

RATE PLAN CHANGES

We're building value in Freedom with 10 new, affordable, feature rich plans:

Plan Type	Plan Name	Details
Big Gig	Big Gig 50 ***Best Value***	Freedom Mobile's newest plans! Access our fast LTE network with more gigabytes than ever before – all at affordable rates that let you stream, snap, surf, post, tweet, and upload without worrying about data overage charges. Ideal plans for someone prioritizing data and savings.
	Big Gig 70	
	Big Gig 90	
Big Gig + Everywhere	Everywhere Canada 50	Get the Big Gig benefit and the added plus of Everywhere Canada talk, text & data. Ideal plans for someone wanting to stay connected in Home & Away Canada.
	Everywhere Canada 60 ***Best Value***	
	Everywhere Canada 75	
	Everywhere Canada 100	
Home Only	Home 25	Entry-level plans with good value and features that work within the Freedom Mobile Home network. Ideal plans for someone looking for Home only use plus good features.
	Home 30	
	Home 40 ***Best Value***	

For a full breakdown of each plan, review *R042-GE - Standard Consumer Rate Plan Offering*.

Grandfathered Plans

As part of this rate plan suite update, the following plans are grandfathered effective October 19: Talk and Text 25, Smartphone 30, Smartphone 40 (2GB and 4GB), Everywhere 49 6GB, and Everywhere 59 8GB.

MYTAB CHANGES

- Starting October 19, we are opening up more ways for customers to pay for their phones over time.
- Depending on the customer's phone and rate plan selection, they may be eligible for a MyTab Bonus (up front phone subsidy) for $0/month, no MyTab Boost required.
- Plus, by introducing two new MyTab Boost options ($40 & $50 tiers), MyTab now includes more options to pay off a portion of the phone cost (between $120 and $1,200) over 24 months instead of up front.
  - That's a $360 increase enabling;
    1. More customers to spread the cost of more expensive phones over time
    2. Stores to close more sales on the phones our customers know and love.
- **Important:**
  - MyTab Boost tier availability will now vary depending on the rate plan selected (i.e. higher Boost tiers are only available on higher priced rate plans), and
  - MyTab Bonus will vary based on both the rate plan and phone selected.

	Bonus	Boost							
MyTab Tier (cost per month)	$0	$5	$10	$15	$20	$25	$35	$40	$50
MyTab Amount (up front phone discount)	Varies based on phone	Bonus + $120	Bonus + $240	Bonus + $360	Bonus + $480	Bonus + $600	Bonus + $840	Bonus + $960	Bonus + $1200
	↓	↓	↓	↓	↓	↓	↓	↓	↓

Rate Plan	MyTab Eligibility								
Home 25	N/A								
Home 30	✓	✓	✓	✓	✓	N/A	N/A	N/A	N/A
Home 40	✓	✓	✓	✓	✓	✓	N/A	N/A	N/A
Everywhere Canada 50	✓	✓	✓	✓	✓	✓	✓	N/A	N/A
Everywhere Canada 60	✓	✓	✓	✓	✓	✓	✓	✓	✓
Everywhere Canada 75	✓	✓	✓	✓	✓	✓	✓	✓	✓
Everywhere Canada 100	✓	✓	✓	✓	✓	✓	✓	✓	✓
Big Gig 50	✓	✓	✓	✓	✓	✓	✓	N/A	N/A
Big Gig 70	✓	✓	✓	✓	✓	✓	✓	✓	✓
Big Gig 90	✓	✓	✓	✓	✓	✓	✓	✓	✓

Based on the MyTab tier option the customer selects, they can get their phone for a lower cost or even $0 up front! Customers will continue to pay off their phone over a 24 month period.

MyTab Fee for Rate Plan Downgrades

Available MyTab amounts are directly associated with the rate plan a customer subscribes to. Changes to a customer's rate plan may in turn cause a change to their MyTab Bonus and/or Boost eligibility. The chart below outlines the potential implications in a rate plan change scenario:

If a customer…	Then…
Upgrades their plan	No charge will apply
Downgrades their plan	The customer will; 1. default to the next highest MyTab tier that they are eligible for (if applicable) 2. be billed the difference between their current MyTab balance and 24x their new monthly Boost fee. i.e.: a. A customer who activates on Big Gig 70 with a $40 Boost, who then downgrades to Big Gig 50 will • default to a $35 Boost, • be charged a MyTab fee: [their current MyTab balance] – [$840] b. A customer who activates on Big Gig 70 with a $40 Boost, who then downgrades to Home 40 will • default to $25 Boost, • be charged a MyTab fee: [their current MyTab balance] – [$600] **Note:** Singl.eView, CAP and My Account will display the amount due prior to completing the rate plan change.
Changes their rate plan from a MyTab eligible plan to a non-MyTab eligible plan	The customer will be billed their full remaining MyTab balance

GRANDFATHERED PLAN MYTAB CHANGES

- We are also simplifying MyTab for grandfathered rate plans, and making MyTab Boost available for more customers.
- This means, beginning October 19, it will be easier to
  - identify the MyTab that an existing customer qualifies for if they remain on a grandfathered rate plan, and
  - compare existing MyTab with that available with one of the new rate plans
- The table below shows how to determine which grandfathered plans are eligible for MyTab Bonus and MyTab Boost as of October 19:

	Grandfathered Rate Plan MRC		
	$0-$25	$26-$35	$36+
MyTab Bonus Eligibility	$0	$0	$100
MyTab Boost Eligibility	No	Yes	Yes

- Existing MyTab balances are not affected.

Note: Refer to the second tab of *R032-GE – Rate Plan Matrix* to see the new MyTab structure as of October 19.

TRAINING

eLearning (All Employees)

- The following new eLearning course has been created to help all customer facing employees (Care and Retail) understand how the upcoming rate plan and MyTab changes offer value to our customers.
- All employees must complete the course below **before** the changes take effect on **October 19:**

Step	Action
1	Login to The Learning Site: https://learn.freedommobile.ca/
2	From the top banner, click ‘Find Learning’ and select ‘Courses’
3	Search for and select ‘**Our Rate Plans & MyTab**’
4	Scroll down to find the eLearning course titled ‘**Our MyTab Program and How it Serves our Customers**’ **Note:** Training will take approximately 40 minutes to complete

Infographic

- Also available on The Learning Site alongside the eLearning module is a new *Apps and Data Usage Infographic* for employees to reference for at-a-glance support. Follow the directions above to access this tool on The Learning Site.
- **Note:** this tool is intended for internal use only and must not be printed or shown to customers.

Store Team Meeting (Retail Only)

Stores are expected to conduct a team meeting at the store level with all staff between Thursday, October 19 and Sunday, October 22 to discuss the new rate plan suite and MyTab changes. (Store leaders will receive the Team Meeting Package in a separate communication this week).

Care Huddles (Care Only)

Team Huddle Agendas will be provided to Customer Care Leaders at each Site on October 16. All Customer Care Agents are expected to complete a Team Huddle between October 16 and October 22. The Team Huddles will reiterate the high-level changes, and provide an opportunity for questions and discussion surrounding the changes with all Customer Care teams.

MERCHANDISING

- New Price Cards will be available on RMS by end of day October 18 for printing and merchandising in store on October 19.
- All stores will receive new Rate Plan Brochures and Rate Plan Posters to support the launch of our new rate plan suite.
  - Shipment dates for these materials will be shared at a later date.
  - In the interim, stores must **remove** all old Rate Plan Brochures and Rate Plan Posters from the sales floor for disposal **before store opening on October 19**.

DEALER SOC CODES Dealer Principals must update their POS with the new Rate Plans' SOC Codes prior to opening on October 19 to ensure activations function in Carrier Integration.

Rate Plan Name	Pay Before	Pay After
Home 25	2000344 | 1000387	2000384 | 1000387
Home 30	2000344 | 1000388	2000384 | 1000388
Home 40	2000344 | 1000389	2000384 | 1000389
Everywhere Canada 50	2000344 | 1000390	2000384 | 1000390

<<This message has been sent on behalf of Paul McAleese, President, Wireless >>

Hi Team,

We're so excited to share our bold new advertising campaign with you today.

This campaign challenges the conventions of Canadian wireless industry by taking aim at the practices that charge wireless users astronomical fees when they go over their data limit. For context, data overage fees in Canada have recently hit new levels, with prices now reaching as much as $100/GB.

With this campaign, we're building on the tremendous momentum from our data-rich Big Gig plans, and now targeting the problems consumers face when exceeding their data limits. We have an opportunity be the ***only*** brand offering the value everyone deserves and that's exactly what we want to demonstrate with this new campaign.

Equally as exciting is our partnership with Will Arnett, Emmy-nominated Canadian actor, who will be acting as our spokesperson and champion for the average wireless consumer in Canada. Will's self-assured style, irreverence and impeccable sense of comedic timing makes him a perfect fit as our hero character. We expect his voice and character in this campaign will hit home with Canadians.

Check out his debut campaign <**here**>**.**

A huge shout out to the team who made this possible – we're so lucky to work with such incredible folks across the country. Thank you for all you do.

Here's to a great month, and a successful campaign.

Until next time,

Paul

Connexions Q1 2021 Sales Targets

Dealer Store

December 23, 2020

Hi, Sudeep:

Your Q1 2021 Sales Target is now available through this link: https://sjrb.sharepoint.com/:x:/t/ChannelCommunications/EZdvS3ms5TNBohMhvTmnagoBaonufiWh6w-tSFMnPxw63Q?e=s7Fbx4.

IMPORTANT:

Moving forward, your sales targets will be sent via a Sharepoint link, instead of being attached to an email, to provide more security to your data. You will be asked to enter a verification code when you click on the link. This code will be sent to your email address on file. Make sure to check your Spam Folder for the email. If you are having trouble finding the code or accessing your report, please reach out to your DBM.

For your convenience, the targets include a monthly breakdown of Prepaid and Postpaid activations.

Bonus Payment Schedule

- Overall quota bonus will be paid out as follows:
  - Postpaid paid with December commissions in January
  - Prepaid paid in March to allow 60 full days to collect second MRC
- For Dealer Quarterly Volume Bonus, refer to your Freedom Mobile Dealer Agreement – Schedule “A” for full program details.

Q1 2021 Bonus Criteria

Bonus Type	Details

Customer Experience Bonus	The following metrics will be used to establish a stack rank of customer experience based on your store performance:

Measure	Definition	Weighting
Fusion Participation Frequency %	Average number of Fusion login per month for the Dealership divided by the number of days in a month	40%
Customer Sentiment Survey	Of all responses to the survey, the percent of respondents with a response of “4” or “5” on a 5-point scale.	40%
Valid Email Collection	Valid emails (in the determination of Freedom) vs. total activations.	20%

Qualifications:

- A Dealer must be in operation the entire quarter to qualify.
- A Dealer must pass the SVR (>85%) in order to qualify.

Payment:

Dealer Percentile	Payment per qualifying activation
Top 25^{th}	$15
Top 75^{th} up to the top 25^{th}	$5
Bottom 25^{th}	$0

Policy

- Dealer sales targets are set solely at the discretion of Freedom Mobile.
- Dealers are paid quarterly bonus on their entire Dealer activation results, and not per store.

5G Launch Update

We have put a pause on our launch of 5G.

Details

We have made the decision to indefinitely pause the launch of our 5G network. While we know that this news is disappointing, this is the right decision for our customers and company at this time.

We operate in an extremely competitive marketplace. To launch our initial phase 5G service, we require a clear path forward for the later phases, including spectrum and infrastructure. At this time, this path is not certain. Our decision today stands by our commitment of transparency with our teams and customers of what products and services we can offer now and in the near term.

Merchandising

All stores will need to RMA back all merchandising material delivered on April 7. Please print RMA number **#RMAMERCH0421** along with your channel code on a piece of paper and include it in with the shipment for easy identification upon receipt at the warehouse.

Dealer Reno Program 2021

Update

April 8, 2021

Option A – Turnkey
Interior Cosmetic Upgrade

- Work timeline:
    - 8 to 12 days.
- SoW includes removal of existing fixtures, painting walls, install vinyl flooring, update lighting, install new fixtures/merch displays, other works TBD per site ie relocation of sprinklers.
    - Excludes – HVAC, façade, external signage, removing/building walls, upgrades/repairs to back of house and washroom.
- Dealer cost will not exceed $50K
- No permit

YOU DESERVE FREEDOM.

YOU DESERVE FREEDOM.

UNLIMITED

Option B – Phased Reno

P1 – Fixture Refresh + Vinyl Wrap
P2 – Interior Upgrade

- Work timeline:
  - Phase 1 - 3 to 5 days.
  - Phase 2 - 7 to 12 days
- SoW:
  - Phase 1 – remove old fixtures, install Freedom branded interior vinyl wrap, install new fixtures and merch displays
  - Phase 2 – remove wrap, paint walls, install flooring, update lighting, other works TBD per site i.e., relocation of sprinklers.
  - Excludes – HVAC, façade, external signage, removing/building walls, upgrades/repairs to back of house and washroom.
  - No permit
- Dealer costs:
  - Phase 1 - $12K -$15K site dependent
  - Phase 2 - $25 - $35K site dependent
  - *Dealer cost will not exceed $50K in this phased approach.*

Bcc: Sudeep Verma <sudeep@connexions.ws>

Good Morning Sir,

With reference to your text regarding a cheaper option for store renovation(s) we would definitely be interested in knowing more about it.

However, to make an informed decision we need the following information alongside;

1. What is the current policy on store lease renewals? On numerous occasions and calls (post Rogers/Shaw merger) we have been told to go month to month or 1 year.
2. Considering the above scenario how would the ROI on this store upgrade work out?
3. If the Freedom brand ceases to exist post merger what would happen to this cost ?

Also, we are reaching out to our dealer association's legal counsel for further guidance.

Thanks,

Sudeep Verma

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondents

AFFIDAVIT OF JAMES SENKO
Affirmed March 4, 2022

I, James Senko, of the City of Toronto, in the Province of Ontario state as follows:

1. I am the Executive Vice-president and President, Mobility Solutions of TELUS Corporation (“**TELUS**”). Since joining TELUS in 2001, I have held a variety of leadership positions in the TELUS wireless business spanning channel distribution, marketing, and product development. I am currently responsible for the overall management of TELUS’ consumer wireless business.

2. I have personal knowledge of the matters in this affidavit, except where I have otherwise indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS AFFIDAVIT

3. I make this affidavit in connection with the applications under sections 92 and 104 of the *Competition Act* made by the Commissioner of Competition (the “Commissioner”) against Rogers Communications Inc. (“Rogers”) and Shaw Communications Inc. (“Shaw”), relating to their merger (the “Proposed Transaction”).

OPERATIONS OF TELUS

4. TELUS is a communications company that provides wireless and wireline services to individual subscribers, governments, and businesses across Canada. TELUS’ mobile wireless business includes TELUS’ 3G, 4G LTE, and 5G network through which it offers subscribers voice, data transmission and messaging services across Canada and worldwide delivered on subscribers’ mobile devices, as well as TELUS’ smartphone, tablet, and mobile devices offered to subscribers across the country. TELUS also offers a number of other services, including Internet access, TV, and virtual health care.

COMLINK DATA

5. As of October 2020, TELUS commenced subscribing to Commiscent Technologies Inc. ("Comlink") for porting data and analytics for the Canadian wireless industry. TELUS believes Comlink is a reliable source of porting data and analytics for the Canadian wireless industry.

6. TELUS provides its porting data to Comlink. For context, a port occurs when a subscriber switches from one wireless carrier (e.g., Shaw) or a landline carrier to another wireless carrier (e.g., TELUS) and keeps their phone number. The term "net ports" refers to number of ports into a carrier minus the number of ports out from the carrier during the same defined time period. For purposes of my affidavit, unless I specifically indicate otherwise, references to Shaw relate to Shaw's wireless business which operates under the Shaw Mobile and Freedom Mobile brands. Comlink uses the term "Freedom" to cover both Shaw Mobile and Freedom Mobile.

7. TELUS utilizes the porting data and analytics provided by Comlink (via an electronic portal which TELUS can access at any time) in its regular course of business, together with other information, to better inform its competitive response. Most importantly, the Comlink data and analytics provides TELUS with directional insights on:

   a) TELUS' wireless performance relative to our principal wireless competitors (Bell, Rogers, Shaw, Videotron, SaskTel, Eastlink and Xplore Mobile) by, for example, identifying which competitors are gaining or losing subscribers on a daily, weekly, monthly or quarterly basis nationally and by province; and

   b) the competitive impact of promotional and advertising activities undertaken by TELUS and/or our wireless competitors (as listed above) in terms of which competitors lost subscribers and which competitors gained subscribers during the period where such activities were undertaken.

8. The types of business decisions impacted by the insight provided by the Comlink data and reports include, for example:

   a) During Black Friday 2021, TELUS used the porting data to understand how TELUS was performing relative to competitors after promotions were launched, and whether or not TELUS would match the promotions of its competitors.

   b) Post-Black Friday 2021, TELUS undertook a detailed post-mortem analysis using porting data to understand how TELUS performed during the Black Friday promotion period and more specifically what type of promotions worked and what did not work (i.e., did not drive the desired performance). This analysis informed TELUS' December 2021 Boxing Week promotional strategy.

   c) The data regularly informs TELUS' determination to undertake competitor-targeted campaigns and promotional activity to increase share and win back subscribers and it informs TELUS' actions during the time period of such campaigns. For example, in Q3 and Q4 2020 TELUS launched Operation Freedom which included: (a) win back offers targeting subscribers who ported out from TELUS to Shaw; and (b) promotions to win share against Shaw by offering Shaw subscribers incentives to port-in (i.e., switch) to TELUS.

CHANGES IN SHAW'S COMPETITIVE INTENSITY SINCE ROGERS ANNOUNCED ITS PROPOSED ACQUISITION OF SHAW

9. I believe that Shaw's competitive intensity in Alberta, British Columbia and in Ontario has decreased materially since the announcement of the Proposed Transaction on March 15, 2021. My belief is based on a number of data points and observations, including the following:

   a) The Comlink data: Attached to my affidavit as Exhibit A are true copies of three Comlink reports which show the net ports for Shaw on a monthly basis for the period commencing January 1, 2021 and ending December 31, 2021 on a national basis, on a combined Alberta and British Columbia basis; and on an

Ontario only basis. [redacted] More specifically,

i. The national report shows that Shaw gained [redacted] net ports in April 2021 and lost [redacted] net ports in December 2021. This is an approximate 235% decrease in the number of net ports.

ii. The combined Alberta and British Columbia report shows that Shaw gained [redacted] net ports in April 2021 and lost [redacted] net ports in December 2021. This is an approximate 103% decrease in net ports.

iii. [redacted] since the Proposed Transaction was announced. Shaw lost [redacted] net ports in April 2021 and lost [redacted] net ports in December 2021. This is an approximate 374% decrease in net ports.

b) TELUS' review of Shaw's First Quarter Results for the three-month period ending November 30, 2021 (Q1 2022) and comparison to Shaw's First Quarter Results for the three-month period ending November 30, 2020 (Q1 2021) and which shows, among other matters, that:

i. Shaw's total wireless net adds (i.e., the total number of new wireless subscribers minus the total number of lost wireless subscribers) has decreased substantially with only 55,600 net adds Q1 2022 versus 101,000 for Q1 2021;

ii. Shaw's Q1 2022 postpaid net adds were 40% below its net adds in Q1 2021 (Q1 2022 postpaid net adds of 36,100 versus Q1 2021 net adds of 87,300); and

iii. Shaw stated that its Q1 wireless net adds were driven by Shaw Mobile, not Freedom, which suggests to TELUS that Shaw is focussed on bundling their existing subscriber base (i.e., selling Shaw Mobile to their internet subscribers) and not on acquiring net new wireless subscribers.

all of which is occurring despite the fact that the number of wireless subscribers in each of British Columbia, Alberta, and Ontario (being the provinces in which Shaw competes) increased in Q1 2022 relative to Q2 2021.

c) TELUS' own internal porting data shows that in the three quarters between April 1, 2020 and December 31, 2020 Shaw won [redacted] net ports from TELUS and in the three quarters following the announcement of the Proposed Transaction, being April 1 2021 to December 31, 2021, Shaw only won [redacted] net ports from TELUS. This represents a 91% decrease in net ports ([redacted]) won from TELUS.

d) I have observed that Shaw's promotional activity has substantially decreased since the Proposed Transaction was announced. TELUS monitors the media and other public sources daily to gather information about its competitors' pricing promotional activity and monitors these sources even more frequently during the heavy price promotional periods which occur in the third and fourth quarters of the year, specifically the Back-to-School period (mid-August to mid-September), the Black Friday-Cyber Monday period (late November) and the Boxing Week period (late December). Until 2021 Shaw was a price aggressor through heavy price promotional periods which occur in the third and fourth quarters of the year, specifically the Back-to-School period (mid-August to mid-September), the Black Friday-Cyber Monday period (late November) and the Boxing Week period (late December). In the third and fourth quarters of 2020 TELUS lost [redacted] net ports to Shaw. In the third and fourth quarters of 2021 (following the announcement of the Proposed Transaction) not only did TELUS not lose any net ports to Shaw, TELUS won [redacted] net ports from Shaw.

INFORMATION SUPPLIED PURSUANT TO SECTION 11 ORDER

10. In response to an order the Federal Court issued under section 11 of the *Competition Act*, R.S.C. 1985, c. C-34 on August 1, 2021 (the "Order"), TELUS supplied data, records and information to Laura Sonley at the Competition Bureau relating to its wireless business and such production was completed November 29, 2021 ("Records").

11. The Records were reviewed by Andrea Wood, Chief Legal and Governance Officer of TELUS, who certified that the information so supplied is, to the best of her knowledge and belief, correct and complete in all material respects. Following this certification TELUS provided clarifications to the Bureau about certain data aspects of the Records. Andrea Wood, Chief Legal and Governance Officer of TELUS, has certified that these such clarifications are to the best of her knowledge and belief, correct and complete in all material respects.

12. Included with the Records TELUS produced to the Competition Bureau, and pursuant to the Order, TELUS provided the Competition Bureau with internal company data and access to Comlink's porting data and analytics.

13. Attached to my affidavit as Appendix 1 is a list of certain of the Records TELUS produced to the Competition Bureau pursuant to the Order identified by the unique numbers TELUS assigned to them. I attest that each of the Records listed in Appendix 1**:**

    a) are true copies of the originals that are in the possession, power, or control of TELUS.

    b) were prepared by TELUS employees in the ordinary course of business and the facts stated therein are to the best of my knowledge, information, and belief, true.

14. Attached to my affidavit as Appendix 2 is a list of certain data sets included in the Records TELUS produced to the Competition Bureau pursuant to the

Specifications 11, 17 and 19 of the Order (the “Data”). I attest that the Data was collected and maintained by TELUS in the usual and ordinary course of business.

Affirmed remotely by James Senko of the City of Toronto in the Province of Ontario, before me at the City of Toronto in the Province of Ontario, on March 4, 2022 in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely.

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondent

AFFIDAVIT OF COGECO COMMUNICATIONS INC.

I, Paul Beaudry, of the city of Westmount, in the Province of Quebec, state as follows:

1. I am the Vice President, Regulatory Affairs for Cogeco Communications Inc. (“**Cogeco**”).

2. My main responsibilities involve representing Cogeco and its subsidiaries in proceedings before the Canadian Radio-television and Telecommunications Commission ("**CRTC**") and other federal departments and agencies with respect to broadcasting and telecommunications matters.

3. I have personal knowledge of the matters in this affidavit, except where I have otherwise indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

4. I make this affidavit in connection with an application by the Commissioner of Competition (the "**Commissioner**") against Rogers Communications Inc. ("**Rogers**") and Shaw Communications Inc. ("**Shaw**"), relating to their merger (the "**Proposed Transaction**").

OPERATIONS OF COGECO

5. Cogeco is a communications company headquartered in Montreal, Quebec, that provides video, Internet and wireline telephony services in the United States and Canada. Through its affiliate Cogeco Connexion Inc., these services are offered in Ontario and Quebec to retail residential and business customers in addition to wholesale third party Internet access and transport services offered to Internet service-based providers.

COGECO'S ENTRY AS A WIRELESS MVNO

6. In 2021, the CRTC mandated the provision of a wholesale facilities-based Mobile Virtual Network Operator ("**MVNO**") access service by the three national Mobile Network Operators ("**MNOs**") and Sasktel where these MNOs exercise market power, in all areas where regional carriers have secured a spectrum licence at the Tier 4 level or higher (the "**MVNO Access Service**").

7. Terms and conditions for the service are to be filed for approval with the CRTC, while rates are to be commercially negotiated, with final offer arbitration by the CRTC as a recourse if negotiations fail. The MVNO Access Service is mandated to last for a period of seven years. In July 2021, the MNOs filed proposed tariffs to implement the CRTC's facilities-based MVNO Access Service and the CRTC commenced tariff proceedings in connection therewith (the "**Tariff Proceedings**").

8. Cogeco is interested in launching a mobile wireless service using the MVNO Access Service, subject to the approval by the CRTC of reasonable terms and conditions for the service and to Cogeco's ability to negotiate or otherwise secure satisfactory rates with one or several of the MNOs. Cogeco owns spectrum licences in 30 Tier 4 areas in Ontario and 25 in Quebec, which would in principle allow Cogeco to operate as an MVNO in large portions of both provinces. A list of Cogeco's spectrum holdings at the Tier 4 level or higher is attached to this affidavit as Exhibit "**A**".

9. As Cogeco has articulated through the Tariff Proceedings, from a business perspective, there are significant deficiencies in the MNOs' proposed tariffs that, collectively, significantly diminish Cogeco's ability to offer services and effectively compete in any Tier 4 area in Ontario and Quebec where it has spectrum. This, in turn, is likely to have the effect of impeding important investments by Cogeco in these areas.

10. Some of the proposed conditions would require prospective MVNOs like Cogeco to provide wireless services of inferior quality to those offered by the MNOs themselves. In other cases, essential conditions for planning and implementing competitive MVNO services are vague or entirely missing.

11. By undermining the possibility of providing competitively sustainable MVNO services in a timely manner, the proposed tariff conditions will discourage eligible wireless carriers from investing in MVNO services. Specifically:

i) The proposed tariffs do not include service descriptions. This makes it difficult or impossible to determine what service the MNO will actually be providing to prospective MVNOs;

ii) There is no provision for seamless roaming within Tier 4 licensed areas. Seamless roaming involves networks handing off and receiving calls and data sessions to and from other networks without any interruption in service. This is a key omission that would have a significant impact on MVNOs' plans for radio access network deployment. Carriers entering the market for the first time will deploy networks gradually, starting in denser population areas and expanding over the course of several years, much as the MNOs have historically done. As a result, as an MVNO's network is only partially deployed within a particular Tier 4 service area, it will be necessary for the MVNO's customer to seamlessly roam from the MVNO's network to the MNO's network within Tier 4 service areas to enable a mobile wireless service of similar quality as that of the MNO;

iii) Numerous restrictions are proposed on entities' eligibility to receive the MVNO Access Service. For instance, MNOs have designed their terms and conditions so that the mandated MVNO service is only accessible to existing mobile carriers that have an active public mobile network and are actively providing commercial mobile services within a Tier 4 licence area, which, if accepted, would make Cogeco ineligible to use the MVNO service;

iv) There are unnecessary technical restrictions on the availability of the MVNO service. These include, but are not limited to, a requirement to own at least 20 MHz of spectrum as a primary licensee in any given Tier 4 licence area, the MVNO's inability to access an MNO partner's network, no option to enter into direct connection with an MNO; limitations on the types of customers that an MVNO can serve and limitations on the types of end-customer devices the MVNOs can use for their customers. These restrictions limit the ability of prospective MVNOs to provide a service of equal quality to that offered by the MNOs;

v) The proposed tariffs require that MVNOs provide MNOs with precise traffic forecasts, and, in some cases, pay financial penalties for failure to meet such forecasts, which are overly punitive and unjustified;

vi) The proposed tariffs do not include service level details (e.g., latency for data services, percentage of dropped calls, etc.) for services to be provided by the MNO to their MVNO customers. They also include ill-defined requirements around the provision of technical support from MNOs to MVNOs; and

vii) There is an unjustified reduction of the Commission's 7-year mandate for MVNO access. At one end, the proposed tariffs cap user growth one year prior to the expiration of the mandate. At the other end, a number of additional agreements must be negotiated prior to MVNOs being able to offer service, which would unduly shorten the mandated period in which these wholesale services are available to MVNOs.

12. Also, even apart from these issues, the CRTC's recent decision to implement a limited, facilities-based MVNO framework in Canada is unlikely to be sufficient for Cogeco to produce meaningful competition in the wireless market in the short term, because of the following factors:

i) The MVNO Access Service tariffs are still not final, and are not expected to be final, until at least the middle of 2022 at the earliest;

ii) Prospective MVNOs still need to negotiate rates for the MVNO Access Service they receive from the MNOs. It is unclear to Cogeco when such negotiations will occur; and

iii) Cogeco expects that MNOs will attempt to delay the launch of, and frustrate the viability of facilities-based MVNOs at every possible juncture.

SWORN BEFORE ME BY VIDEO CONFERENCE at the City of [MONTREAL], in the Province of Quebec, this 24th day of February 2022.)

ROGERS COMMUNICATIONS INC.

SHAW COMMUNICATIONS INC.

Respondents

AFFIDAVIT OF CHRISTOPHER HICKEY

I, Christopher Hickey, of the City of Oakville, in the Province of Ontario state as follows:

1. I am the Director, Regulatory Affairs at Distributel Communications Limited. I am responsible for the regulatory activities and functions of the Distributel group of companies, which includes Distributel Communications Limited, Primus

Management ULC, Navigata Communications Limited, and TotalTV Inc. (“Distributel”), that relate to Distributel’s operations as an Internet service provider, a telecommunications service provider, and a broadcasting distribution undertaking.

2. I have been employed by Distributel since August 2018. During the period of October 2014 to August 2018, I was employed by the Competitive Network Operators of Canada (“CNOC") as Director, Industry Affairs. In my role at CNOC I was responsible for CNOC’s participation in regulatory activities and proceedings on behalf of its membership comprised of Internet and telecommunication service providers. Prior to my employment at CNOC, I was employed by Primus Telecommunications Canada Inc., now Primus Management ULC (“Primus”), as Analyst, Regulatory Affairs and responsible for the regulatory activities associated with Primus’ operations as an Internet and telecommunications service provider.

3. I have personal knowledge of the matters in this affidavit, except where I have otherwise indicated that I am relying on information from others, in which case I believe such information to be true.

PURPOSE OF THIS WITNESS STATEMENT

4. I make this affidavit in connection with an application by the Commissioner of Competition (the “**Commissioner**”) against Rogers Communications Inc. (“**Rogers**”) and Shaw Communications Inc. (“**Shaw**”), relating to their merger (the “**Proposed Transaction**”).

OPERATIONS OF DISTRIBUTEL

5. Distributel is a leading, independent service and facilities-based telecommunications provider that offers wireline high-speed Internet, home phone, Internet Protocol television, and mobile wireless services to residential subscribers and voice, data, and Internet services to small business, enterprise, and wholesale customers in markets throughout Canada.

6. To provide telecommunication services in the retail market, Distributel utilizes both regulated and unregulated services and facilities. Regulated services are those that Bell Canada (inclusive of its operations in Ontario and Quebec, in the former Bell Aliant territory, and in its Bell MTS territory), Northwestel Inc., Saskatchewan Telecommunications, TELUS Communications Inc. ("TELUS"), Cogeco Communications Inc., Bragg Communications Incorporated, operating as Eastlink, Rogers, Shaw, and Videotron Inc. (together, "incumbent telephone and cable companies") are required to provide at regulated rates, terms, and conditions by the Canadian Radio-television and Telecommunications Commission ("CRTC").

7. The unregulated services that Distributel purchases and invests in include, but are not limited to, servers, routers, switches, a national fibre backbone network, backhaul facilities and services, transport facilities and services, Internet transiting, IP address resources, peering arrangements and network points of presence.

8. Distributel markets its Internet and telecommunication services in direct retail competition with the incumbent telephone and cable companies.

9. Distributel has more than [redacted] subscribers across Canada.

SHAW REPORTS THAT OFFERING WIRELINE INTERNET AND WIRELESS BUNDLES IS A PROFITABLE STRATEGY

10. Shaw currently offers bundles that include wireline Internet and mobile wireless services. Shaw's financial reports underscore the importance of these bundled offerings as evidenced by the following statements made by Shaw:

    a. with respect to growing wireline EBITDA: "Wireline adjusted EBITDA growth is due to the early favorable impacts of the additional Internet tiers and pricing changes in Consumer implemented on May 27, 2020, strong cost management including reduced promotional investment, <u>and a focus on retention using Shaw Mobile in the bundle</u>" (underlining added for emphasis). A copy of Shaw's Q4 2020 Fiscal Report is attached as **Exhibit A**;

b. with respect to increasing household account value and improving profitability: "In fiscal 2020, we continued the focus on our 2-year ValuePlans, which provide customers with price certainty over the term and have resulted in lower churn rates on those plans. This approach, combined with the strength of our Fibre+ network, our focus on improving execution, and providing additional bundle value when adding Shaw Mobile, is resulting in higher value household accounts with improved overall customer account profitability" (underlining added for emphasis). A copy of Shaw's 2020 Annual Report is attached as **Exhibit B**;

c. with respect to accelerating the adoption of higher speed wireline Internet services: "Since the launch of faster Internet speeds, combined with the Shaw Mobile bundle, a greater portion of new and existing Shaw Internet customers are choosing Fibre+ Gig plans" (underlining added for emphasis). A copy of Shaw's Q1 2021 Report is attached as **Exhibit C**;

d. with respect to increasing Internet revenue and stemming consumer revenue generating unit losses:

   i. "…an increase in customers signing up for our bundled offerings and Internet migration to faster speed tiers continues to accelerate which led to Internet revenue growth" and "In the quarter, Consumer RGU losses of approximately 36,300 continued its improving trend, led by Internet RGU additions of approximately 1,300 as customers continue to bundle their Internet and Wireless service together" (underlining added for emphasis). A copy of Shaw's Q3 2021 Fiscal Report is attached as **Exhibit D**;

   ii. "an increase in customers signing up for bundled offerings and Internet migration to faster speed tiers continues to support Internet revenue growth" and "In the quarter, Consumer RGU losses of approximately 50,000 improved over the prior year period, led by Internet RGU additions of approximately 5,100 as customers continue to bundle their Internet and Wireless service together" (underlining added for emphasis). A copy of Shaw's Q4 2021 Fiscal Report is attached as **Exhibit E**;

iii. "an increase in customers signing up for bundled offerings and Internet migration to faster speed tiers continues to support Internet revenue growth" and "Consumer Wireline RGU losses of approximately 76,200 improved over the prior year period, led by positive Internet additions as customers continue to bundle their Internet and Wireless service together" (underlining added for emphasis). A copy of Shaw's Q1 2022 Fiscal Report is attached as **Exhibit F**; and

e. with respect to continuing to grow Shaw Mobile's presence in the market for bundled wireline and wireless services in British Columbia and Alberta: "In fiscal 2021, Shaw Mobile continued its growth among consumers in British Columbia and Alberta who want to bundle their Shaw Wireline Internet services with mobile services" (underlining added for emphasis). A copy of Shaw's 2021 Annual Report is attached as **Exhibit G**.

REPLICATING SHAW'S WIRELINE INTERNET AND WIRELESS SERVICE BUNDLE PRICES WOULD RESULT IN LOW OR NEGATIVE MARGINS FOR DISTRIBUTEL

11. Distributel could not sustain bundled offerings of retail wireline and wireless services comparable to those offered by Shaw in Alberta and British Columbia unless it were profitable for Distributel to do so.

12. If Distributel were to be the divestiture buyer for Shaw's wireless assets, Distributel would have to offer wireline Internet services in Alberta and British Columbia to replicate the wireline Internet and wireless service bundles currently offered by Shaw. To do so, Distributel, as a company that does not own all of the facilities required to connect to its customers' homes, would need to:

a) build a wireline broadband network equivalent to Shaw's existing wireline broadband network in Alberta and British Columbia;

b) utilize regulated wholesale services that the incumbent telephone and cable companies are mandated by the CRTC to provide; and/or

c) enter into a bilateral negotiated agreement (known as “off-tariff” agreements) with the party acquiring Shaw or the incumbent telephone company operating in Alberta and British Columbia to obtain wholesale services at rates, terms, or conditions different from those regulated by the CRTC.

13. Distributel does not view duplicating Shaw’s existing wireline broadband network as practical or feasible.

14. As we demonstrate below, it is not feasible to use Shaw’s regulated wholesale services to offer the wireline Internet service component of a wireline Internet and wireless service bundle similar to Shaw’s current bundled offering as doing so would result in insufficient or negative margins. The limited number of off-tariff agreements that Rogers has entered into also suggests that it is not interested in such arrangements and, or does not see it in its interest to enter into such arrangements.

i. The regulated wholesale services available via the CRTC’s regulatory framework for wholesale wireline services

15. Pursuant to the CRTC’s regulatory framework for wholesale wireline services, incumbent telephone and cable companies are required to provide wholesale services and facilities that satisfy the definition of an essential service at regulated rates, terms, and conditions.

16. The specific regulated wholesale services that Distributel and other service-based Internet service providers (“service-based competitors”) purchase to provide retail Internet services are referred to as wholesale high-speed access (“HSA") services. The HSA services currently available from all incumbent telephone and cable companies are “aggregated” HSA services, which include last-mile access facilities and transport facilities and allow service-based competitors to access the incumbent’s wireline network serving area via a single or limited number of points of interconnection. Aggregated HSA services do not provide access to incumbent telephone and cable company last-mile fibre-to-the-premise access facilities. The

final rates for aggregate HSA services were recently established by the Commission in Telecom Decision CRTC 2021-181.

17. In Telecom Regulatory Policy CRTC 2015-326 the Commission determined that aggregated HSA services should be phased-out and replaced with “disaggregated” HSA services, which include last-mile access facilities but not all of the transport facilities that are part of aggregated HSA services. Disaggregated HSA services allow service-based competitors access to all of the incumbent telephone and cable companies’ last-mile access facilities, including fibre-to-the-premise access facilities.

18. The industry is currently waiting for the Commission to issue its determinations on the appropriate configuration for disaggregated HSA services. A copy of Telecom Notice of Consultation 2020-187 is attached as **Exhibit H.** That determination is expected to be followed by costing proceedings to establish the appropriate regulated rates for disaggregated HSA services and other proceedings to address implementation and other related matters.

i. Using regulated aggregated HSA services would not allow Distributel to sustain bundles of wireline and wireless services comparable to those offered by Shaw

19. A spreadsheet setting out Distributel’s estimated costs to provide wireline Internet and wireless bundles in Alberta and British Columbia similar to those currently offered by Shaw is attached as **Exhibit I.**

20. The spreadsheet sets out the regulated and unregulated costs that Distributel incurs on a recurring and one-time basis to provide retail Internet service in Shaw’s serving areas in Alberta and British Columbia via the use of Shaw’s regulated aggregated HSA services. The costs in the spreadsheet are specific to those incurred when using Shaw’s aggregated HSA services to provide retail Internet services in Alberta and British Columbia. They include selling, general, and administration costs,

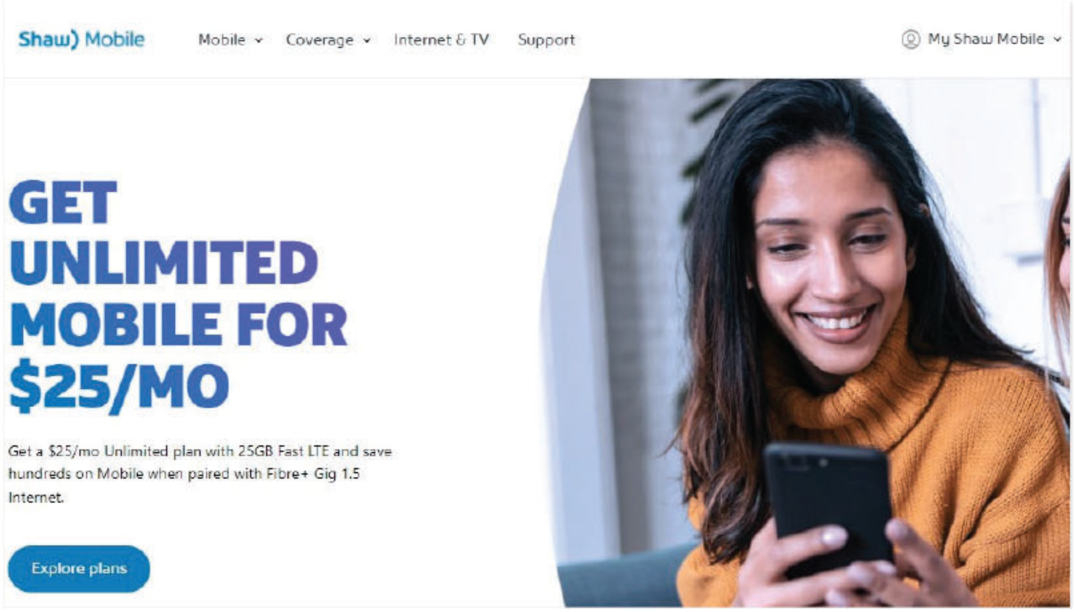
customer acquisition costs, and all regulated and non-regulated one-time costs converted to a monthly recurring cost (see columns A to S of Exhibit I).

21. The spreadsheet only includes the costs that we incur when providing retail Internet services via the use of Shaw's aggregated HSA services. We cannot offer retail Internet services at speeds similar to those available in Shaw's retail wireline Internet and wireless service bundles via the use of TELUS' aggregated HSA services. While Shaw's retail wireline Internet and wireless service bundles offer Internet services at speeds up to 1.5Gbps, we can only use TELUS' aggregated HSA services to provide retail wireline Internet services at speeds up to 150Mbps. By contrast, we can use Shaw's aggregated HSA services to provide retail Internet services at speeds up to 1.5Gbps. Copies of Shaw and TELUS' aggregated HSA service tariff pages are attached as **Exhibit J and Exhibit K**.

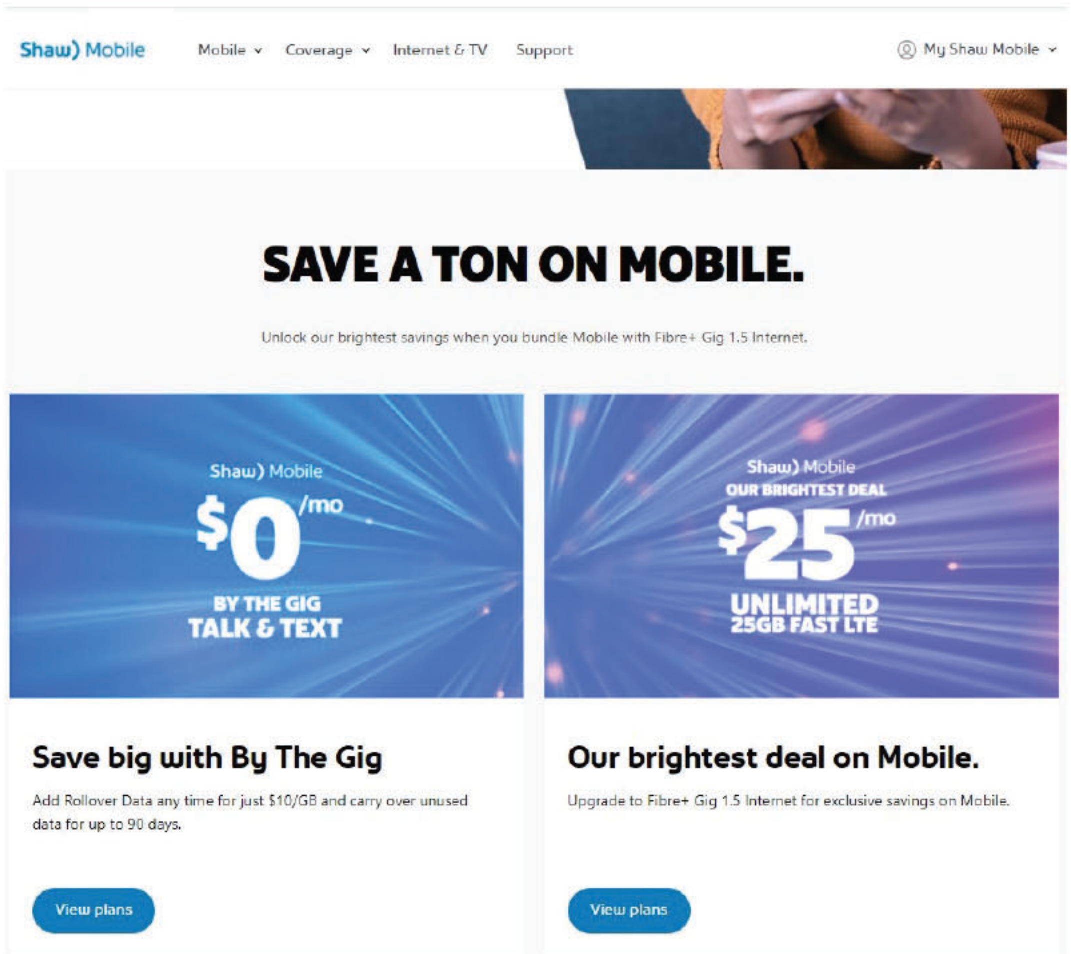
22. The spreadsheet also sets out the additional costs that we would expect to incur to offer a wireless service similar to the 'Unlimited' 25Gb wireless plan that Shaw offers in its wireline Internet and wireless service bundles (see column T of Exhibit I). These expected costs are based on discussions that Distributel has held with [redacted] regarding commercial arrangements to support Distributel's operations if Distributel were to be the divestiture buyer of Shaw's wireless assets. The costs include a contribution towards selling, general, and administrative expenses.

23. Shaw actively promotes bundling wireless and wireline Internet services. Screenshots from the main page and 'Plans' page of the Shaw Mobile website taken on April 6, 2022 are reproduced below:

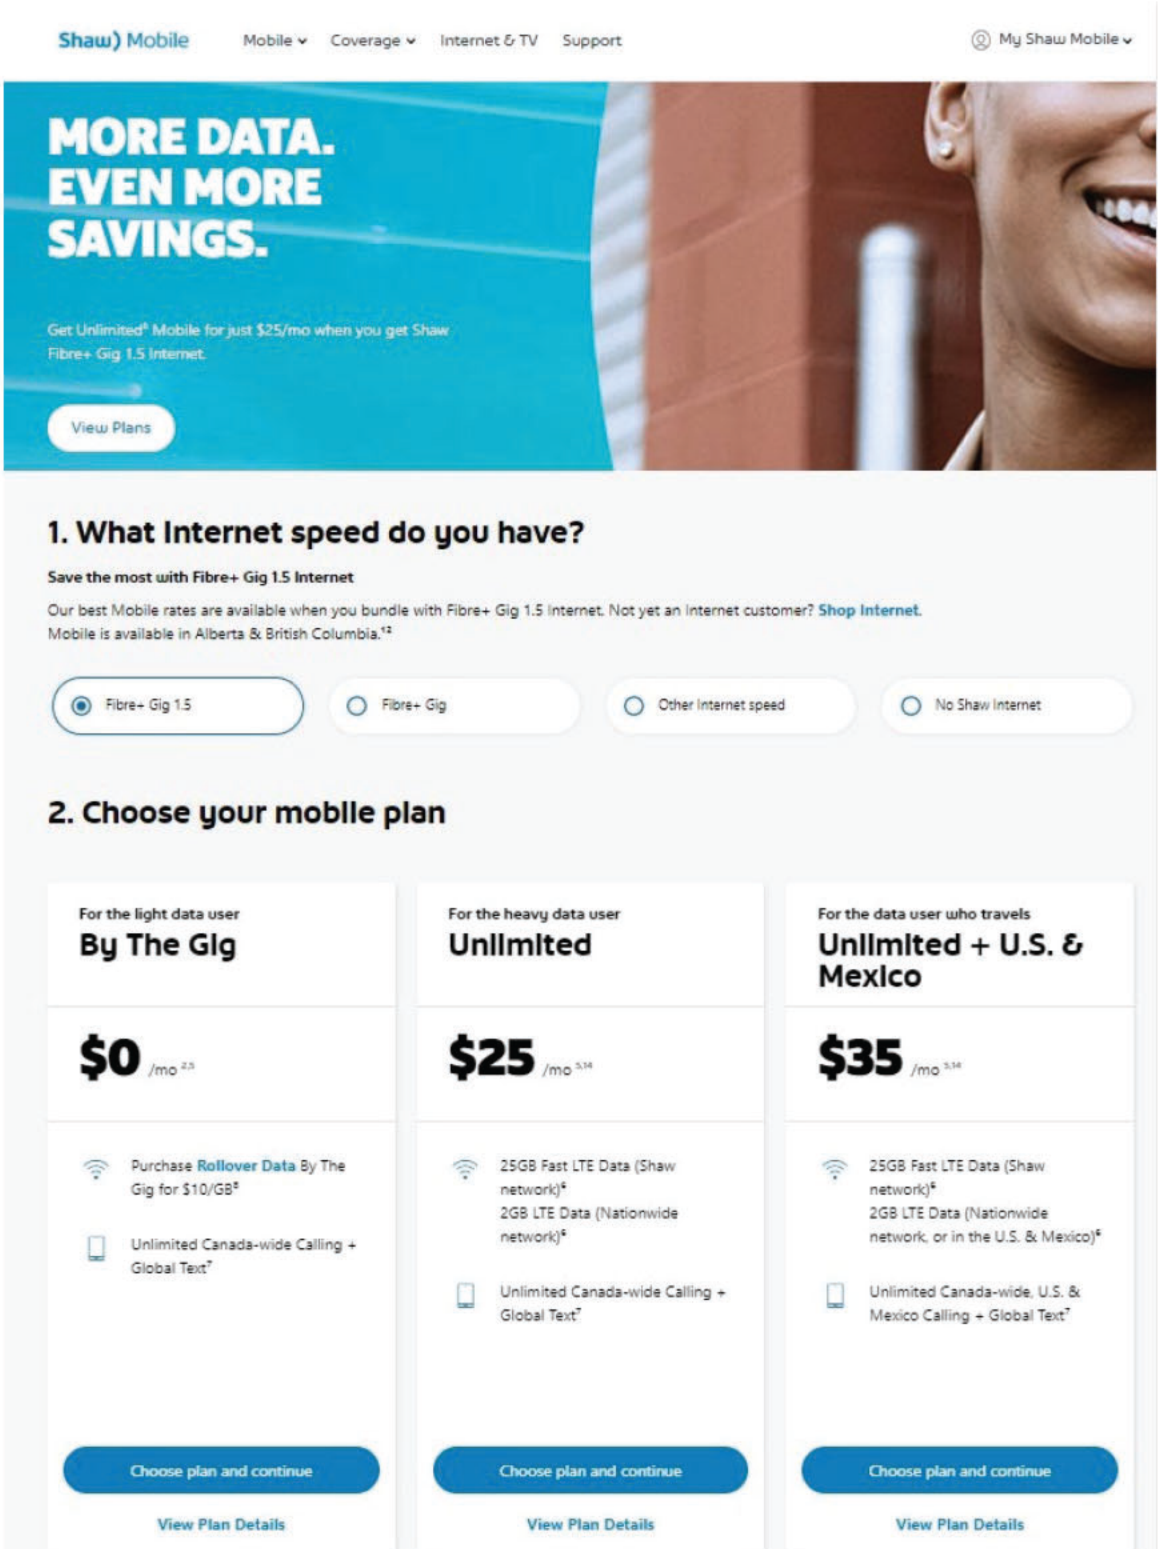
Screenshot 1: Shaw Mobile Website (https://www.shawmobile.ca/en-CA)



Screenshot 2: Shaw Mobile Website (https://www.shawmobile.ca/en-CA)



Screenshot 3: Shaw Mobile Website (https://shop.shawmobile.ca/en-CA/plans)



24. If the Tribunal were to order the divestiture of the Freedom Mobile wireless business and if Distributel were to be the divestiture buyer, Distributel would not be able to feasibly replicate Shaw's wireline Internet and wireless service bundle pricing using regulated HSA services.

25. To demonstrate, the following table provides a comparison between Shaw's in-market wireline Internet and wireless service bundle prices, the costs that Distributel would incur to offer a similar bundle, and the retail price that Distributel would have to charge to obtain a minimally sufficient profit margin of 15%.

Table 1: Shaw Bundle Pricing vs. Distributel Bundle Pricing and Costs

Shaw Internet Service Plan	Shaw 'Unlimited' 25GB Wireless Service Standalone Price: $85		Total Shaw Wireline + Wireless Bundle Price	Distributel Cost to Offer a Similar Wireline Internet and Wireless Bundle	Distributel Retail Price Required to Obtain a 15% Profit Margin
Speed	Standalone Price	Bundled Cost of Shaw 'Unlimited' 25GB Wireless Service			
A	B	C	D	E	F
75 Mbps	$85.00	$45	$130	[redacted]	[redacted]
150 Mbps	$95.00	$45	$140	[redacted]	[redacted]
500 Mbps	$79.00	$45	$124	[redacted]	[redacted]
750 Mbps	$110.00	$45	$155	[redacted]	[redacted]
1000 Mbps	$115.00	$40	$155	[redacted]	[redacted]
1500 Mbps	$135.00	$25	$160	[redacted]	[redacted]

26. Columns A and B of the table provide the current prices for Shaw's wireline Internet services. The prices include two-year term promotional pricing and were posted on Shaw's website (https://www.shaw.ca/internet/plans) as of 6 April 2022.

27. Column C provides the discounted price of Shaw's 'Unlimited' 25GB wireless service if bundled with a Shaw wireline Internet service. These prices were posted on Shaw Mobile's website (https://shop.shawmobile.ca/en-CA/plans) as of 6 April 2022.

28. Column D provides the total price of a Shaw wireline Internet and Shaw 'Unlimited' 25GB wireless service bundle.

29. Column E provides the costs that Distributel would incur to offer a retail wireline Internet and wireless service bundle similar to the bundle offered by Shaw. These costs are set out in Exhibit I and described in paragraphs 19 to 22 above.

30. Column F provides the retail rate that Distributel would have to charge to obtain a minimally sufficient profit margin of 15%.

31. As demonstrated in Table 1 and with the exception of a bundle that includes a 75Mbps wireline Internet service, to obtain a profit margin of 15%, Distributel would have to charge a retail price equal to or higher than the retail rate that Shaw currently offers in the market today.

32. It is not realistic to expect that Distributel would be able to command equivalent or higher retail rates relative to those currently offered by Shaw if it were to enter Alberta and British Columbia as a new entrant in the wireline and wireless service market. As determined by the CRTC in Telecom Regulatory Policy CRTC 2015-326, new entrants in a market do not enjoy the benefit of, "decades of incumbency… with all the associated advantages, including established brands and customer bases" that Shaw currently enjoys. Further, if Distributel were to enter the Alberta and British Columbia market as a wireline and wireless service provider, it would be competing against both TELUS and Rogers and operating in a market comprised of three wireline and wireless service providers (i.e., Rogers, TELUS, and Distributel). In such a market, Distributel would have to distinguish itself from both Rogers and TELUS and would expect to do so, in part, by offering competitive prices. Distributel's retail rates would therefore need to be significantly lower than Shaw's current retail prices.

33. Table 2 below provides a demonstration of the profit margins that Distributel could achieve if it were to sell retail wireline Internet and wireless bundles at prices that factor in the average price difference of $18.80 that currently exists between Shaw

and Distributel's standalone in-market retail Internet service offerings in Alberta and British Columbia (see **Exhibit L**). The values in Column E represent Distributel's retail prices for wireline Internet and wireless service bundles similar to those offered by Shaw if this current average price difference of $18.80 is subtracted from Shaw's retail prices. The values in Column F are the costs that Distributel would incur to offer a retail wireline Internet and wireless service bundle similar to the bundle offered by Shaw. These costs are set out in Exhibit I and described in paragraphs 19 to 22 above.

Table 2 – Shaw Bundle Pricing vs. Distributel Bundle Pricing Factoring in the Current Average Difference Between Shaw and Distributel Retail Wireline Internet Service Prices

Shaw Internet Service Plan	Shaw 'Unlimited' 25GB Wireless Service Standalone Price: $85		Total Shaw Wireline + Wireless Bundle Price	Distributel Retail Price for Similar Wireline Internet and Wireless Bundle Factoring in the Current Average Difference between Shaw and Distributel Retail Wireline Internet Service Prices	Distributel Cost to Offer Similar Wireline Internet and Wireless Bundle	Distributel Profit Margin
Speed	Standalone Price	Bundled Cost of Shaw 'Unlimited' 25GB Wireless Service				
A	B	C	D	E	F	G
75 Mbps	$85.00	$45	$130	$111	[redacted]	[redacted]
150 Mbps	$95.00	$45	$140	$121	[redacted]	[redacted]
500 Mbps	$79.00	$45	$124	$105	[redacted]	[redacted]
750 Mbps	$110.00	$45	$155	$136	[redacted]	[redacted]
1000 Mbps	$115.00	$40	$155	$136	[redacted]	[redacted]
1500 Mbps	$135.00	$25	$160	$141	[redacted]	[redacted]

34. In this more realistic scenario, Distributel would incur minimal or negative profit margins in all but one case if it were to offer wireline Internet and wireless service bundles similar to those available from Shaw using Shaw's regulated aggregated HSA services.

35. As stated in paragraphs 17 to 18 above, the CRTC has a stated objective of transitioning from the current aggregated HSA service framework to a disaggregated framework that will allow service-based competitors to use the incumbent telephone and cable companies' last-mile fibre access facilities.

36. The proposed disaggregated HSA service framework may help mitigate costs for Wholesale-based Competitors, thereby improving the profitability of wireline Internet and wireless service. However, the timeline for implementation and details, including costs, of the new disaggregated HSA framework remain unclear. Furthermore, implementation of the HSA framework will require substantial capital investment by any competitor, including significant payments to the incumbent telephone and cable companies.

iii. Off-tariff arrangements

37. A buyer of the divested Freedom Mobile wireless business could also seek to offer wireline Internet services by entering into a bilateral negotiated off-tariff agreement with Rogers or TELUS to obtain HSA services at rates that differ from those available via current aggregated HSA Service tariffs.

38. However, the ability of a buyer of the divested wireless business, as well as service-based competitors in general, to obtain a negotiated off-tariff agreement is subject to the willingness of the incumbent telephone or cable company (i.e., Rogers) to enter into such an arrangement.

39. Following Telecom Regulatory Policies CRTC 2009-19 and CRTC 2012-359, I understand that the CRTC requires incumbent telephone and cable carriers to file general summaries of the off-tariff agreements that they enter into on the public record.

40. A review of the public record off-tariff agreement disclosures required by the CRTC shows that Rogers has disclosed entering into off-tariff agreements for HSA services on four occasions and in a limited fashion in each case:

a) In 2018, Rogers provided notice that it entered into an off-tariff agreement with other parties and that the agreement was "in effect from March 1, 2018 to June 30, 2018 and discounts certain wholesale customers' rates depending on subscriber volumes". Rogers subsequently provided notice that the off-tariff agreement was extended until December 31, 2018; and

b) In 2019, Rogers provided notice that it entered into an off-tariff agreement with other parties and that the agreement was "is in effect from April 1, 2019 to June 30, 2019. The agreement discounted certain wholesale customers' monthly rates and/or one-time charges depending on subscriber volume targets for the quarter."

c) In 2019, Rogers provided notice that it entered into an off-tariff agreement with other parties and that the agreement was "in effect from July 1, 2019 to September 30, 2019. The agreement discounts certain wholesale customers' monthly rates and/or one-time charges depending on subscriber volume targets for the quarter."

41. A list of all of the off-tariff agreements posted on the CRTC website is attached as **Exhibit M.** The public record general summaries of the off-tariff agreements entered into by Rogers is attached as **Exhibit N**.

42. The fact that Rogers has entered into off-tariff agreements on only four occasions over the twelve-year period that it has been permitted to do so suggests that Rogers is not interested in such arrangements and, or does not see it in its interest to enter into such arrangements.

43. Distributel does not currently have an off-tariff agreement to provide HSA Services at rates that would allow it, as a buyer of a divested wireless business, to profitably offer wireline Internet and wireless service bundles similar to those currently offered by Shaw.

44. Distributel approached Rogers as a potential divestiture buyer for Shaw's wireless assets. In order to offer competitive wireline and wireless bundles, Distributel

proposed an arrangement that would include an off-tariff agreement for HSA services between Distributel and Rogers that would allow Distributel to profitably offer wireline Internet and wireless service bundles similar to those currently offered by Shaw. Rogers did not accept this offer.

45. Distributel also approached [redacted] in order to secure an off-tariff arrangement for HSA services, as well as a network sharing agreement, to support Distributel's operations if it were to be the divestiture buyer for Shaw's wireless assets. However, Rogers effectively ceased communications after we informed them that we were partnering with [redacted].

NEWS RELEASE

Shaw Announces Fourth Quarter and Full Year Fiscal 2020 Results and provides Outlook on Fiscal 2021

- **Fiscal 2020 consolidated results were resilient and in line with guidance, including adjusted EBITDA growth of 3.7% (pre-IFRS 16) and free cash flow[1] of $747 million, notwithstanding the significant uncertainty arising from the COVID-19 pandemic**
- **Despite the intense wireless competitive environment, the launch of Shaw Mobile resonated with western Canadians, contributing to strong fourth quarter Wireless net additions of approximately 60,000**
- **Sustained wireless momentum with fourth quarter service revenue growth of 14.7% and ABPU[2] and ARPU[2] growth of 6.6% and 4.2%, respectively; fiscal 2020 Wireless service revenue grew 17.4% to approximately $815 million**
- **Stable Wireline financial performance with focus on profitable subscriber interactions resulted in adjusted EBITDA[1] growth of 1.4% and margin[1] expansion in the fourth quarter (pre-IFRS 16) compared to prior year; fiscal 2020 Wireline adjusted EBITDA increased approximately 1% (pre-IFRS 16)**
- **Company expects continued positive adjusted EBITDA growth, capital investment of approximately $1.0 billion, and free cash flow of approximately $800 million in fiscal 2021; fiscal 2021 includes renewed normal course issuer bid (NCIB) for up to 5% of issued and outstanding Class B Shares**

Calgary, Alberta (October 30, 2020) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended August 31, 2020, including the impact of adopting IFRS 16, *Leases* (IFRS 16). Consolidated revenue was comparable year-over-year at $1.35 billion and adjusted EBITDA increased 11.2% year-over-year to $594 million. Fiscal 2020 consolidated revenue increased by 1.3% to $5.41 billion and adjusted EBITDA increased 11.0% year-over-year to $2.39 billion. Removing the $40 million impact from IFRS 16 in the fourth quarter and $158 million for the full year period, adjusted EBITDA increased approximately 3.7% for both the fourth quarter and the twelve-month period.

"Fiscal 2020 was a unique and challenging year as every aspect of our lives was upended with the emergence of COVID-19. From the onset of the pandemic our priority remains focused on the health and safety of our employees and continuing to support our customers and communities," said Brad Shaw, Executive Chair and Chief Executive Officer. "As COVID-19 unfolded, it cast a dark shadow around the world, however, it also highlighted the critical nature of highly capable facilities-based connectivity services, where Shaw's Fibre+ network performance was amongst the very best. In fact, Ookla named Shaw the fastest and most consistent internet provider in western Canada. Across British Columbia, Alberta, Manitoba, and Saskatchewan, Shaw's Fibre+ network was reported as the fastest. It is because of our significant long-term investments in our facilities-based networks that we could meet the surge in demand from our customers, while at the same time, expand our product suite with innovative and affordable wireline and wireless options for Canadians during their greatest time of need, including our Fibre+ Gig

[1] Free cash flow, adjusted EBITDA, and adjusted EBITDA margin are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" in the Company's fiscal 2020 Annual MD&A and "Non-IFRS and additional GAAP measures" in this press release for information about these measures, including how we calculate them.

[2] Refer to "Key Performance Drivers" section for definition and explanation.

Internet speeds and a momentous achievement with the launch of Shaw Mobile. While no business is completely immune to the impacts from COVID-19, we have shown that we are resilient, agile and can deliver growth to our stakeholders in even the direst of circumstances, including significant free cash flow growth of nearly 40%, exceeding our target in fiscal 2020."

Shaw Mobile launched on July 30, 2020, enabling Shaw Internet customers in British Columbia and Alberta to add wireless to their Fibre+ Internet service and get as many as six lines of unlimited nationwide talk and text for $0 a month. Customers then choose to pay for only the wireless data they use with the By The Gig option, starting at $10 per GB and includes unused data automatically rolling over for up to 90 days, or opt for more data with the Unlimited Data plan that includes 25 GB of LTE data for $45 per month. Shaw Mobile is now available in 24 Shaw retail stores and, combined with our national retail partners, over 140 locations in British Columbia and Alberta. Freedom Mobile continues to be available in over 700 retail locations.

Fourth quarter Wireless subscriber net additions of approximately 60,000 reflect several dynamics in the market including increased retail traffic compared to the third quarter and strong demand from western Canadians for Shaw Mobile, partially hampered by intensifying competitive activity and a less active back-to-school season due to the COVID-19 environment. Although price competition continues to reach new levels, wireless ABPU and ARPU growth increased 6.6% to $44.81 and 4.2% to $39.65, respectively over the prior year. Fourth quarter postpaid churn[3] was 1.57%, a 10-basis point increase over the prior year due primarily to targeted competitive win-back offers in the market.

In the Wireline segment, subscriber activity was soft due to both the COVID-19 environment as well as reduced promotional investment on driving new subscribers in the quarter, as the Company focused on stabilizing Wireline pricing and improving retention through the launch of Shaw Mobile to existing Shaw Internet customers. Consumer RGUs declined 79,500 in the quarter, including Internet net losses of approximately 14,500, partially offset with Business RGU additions of approximately 8,300. While new acquisition activity remains lower than the prior year, disconnects are also lower as a result of COVID-19. The ability to self-install broadband services in this environment is a strategic advantage and customer adoption continues to increase, reaching 79% in the quarter.

Wireline financial performance continues to be stable, with fourth quarter Wireline adjusted EBITDA growth of 5.6% compared to the prior year, or approximately 1.4% after removing the $20 million impact of IFRS 16. Wireline adjusted EBITDA growth is due to the early favorable impacts of the additional Internet tiers and pricing changes in Consumer implemented on May 27, 2020, strong cost management including reduced promotional investment, and a focus on retention using Shaw Mobile in the bundle. These positive variances were partially offset by lower RGUs compared to the prior year and the pause in Business revenue growth due to COVID-19. Excluding the $10 million charge related to CRTC regulatory matters that was recorded in the fourth quarter of fiscal 2019, Wireline adjusted EBITDA in the current quarter was comparable. In a response to the dynamic environment from the pandemic, Shaw Business launched Smart Remote Office and Smart Target, adding to its unique line-up of 'Smart' products and services. These new services enable businesses to offer their employees a secure, reliable connection while working from home as well as an all-in-one digital marketing and advanced insights solution that provides business owners a deeper understanding of their customers.

Mr. Shaw continued, "Despite the unprecedented level of uncertainty that emerged in 2020, our sound business strategy and focus on execution has enabled us to navigate through this new environment without significant disruption. As demand for connectivity surged, we provided the critical lifeline for Canadians to continue to work, access education, and connect with family and friends during a difficult time for all. Not only was our network performance exceptional, but we introduced even faster Internet services and completed our largest product launch ever, with the introduction of Shaw Mobile, all while still primarily working from home – a remarkable feat. Although the COVID-19 pandemic has impacted certain areas of

---

our business, we continued to make the appropriate investments and still delivered growth, meeting our financial commitments in fiscal 2020, including substantial free cash flow of almost $750 million."

Selected Financial Highlights

Fiscal 2020 results include the impact of adopting IFRS 16 using the modified retrospective approach. Under the modified retrospective approach, fiscal 2019 results have not been restated and are not comparable to fiscal 2020 results. Supplementary information is provided in the Company's fiscal 2020 Annual Management's Discussion and Analysis (MD&A), under the heading "New Accounting Standards," which discusses our previous accounting policies and the changes on adoption of the new standard.

	Three months ended August 31,			Year ended August 31,

(1) Adjusted EBITDA, adjusted EBITDA margin, and free cash flow are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" in the Company's fiscal 2020 Annual MD&A and "Non-IFRS and additional GAAP measures" in this press release for information about these measures, including how we calculate them.

(2) Adjusted EBITDA and adjusted EBITDA margin for the three and twelve months ended August 31, 2020 reflect the adoption of IFRS 16 Leases. As permitted under IFRS 16, we have not restated amounts for the three and twelve months ended August 31, 2019 which are not comparable to the same periods in fiscal 2020. Free cash flow was not affected by the adoption of IFRS 16.

In the fourth quarter, the Company added approximately 60,000 net Wireless RGUs, consisting of approximately 45,000 postpaid and 15,000 prepaid additions. The increase in the subscriber base reflects improved in-store traffic after the re-opening of wireless retail locations as well as the launch of Shaw Mobile in British Columbia and Alberta, partially offset with increased competitive activity and a less active back-to-school season compared to the prior year. In fiscal 2020, the Company added over 160,000 new Wireless customers bringing its total customer base to over 1.8 million.

Wireless service revenue for the three and twelve-month periods increased 14.7% and 17.4% respectively, to $211 million and $815 million over the comparable periods in fiscal 2019 due to an increased subscriber base and growing penetration of Big Gig and Absolute Zero pricing plans. Wireless equipment revenue decreased in the fourth quarter by 13.5% to $83 million due to lower subscriber activity and the temporary retail closures as a result of COVID-19, while twelve-month equipment revenue of $351 million was comparable to the prior year. Fourth quarter ABPU grew approximately 6.6% year-over-year to $44.81 and ARPU grew 4.2% to $39.65 reflecting continued customer growth. For the full year, ABPU of $44.13 increased 5.9% and ARPU of $38.95 increased 2.7% over the prior year.

Fourth quarter Wireless adjusted EBITDA of $84 million increased 64.7% year-over-year, or approximately 25% after removing the $20 million impact resulting from the adoption of IFRS 16. For the twelve-month period, Wireless adjusted EBITDA of $337 million improved 69.3%, or approximately 31% after removing the $76 million impact resulting from the adoption of IFRS 16.

Wireline RGUs declined by approximately 71,200 in the quarter compared to a loss of approximately 54,400 in the fourth quarter of fiscal 2019. The current quarter includes a decline in Consumer Internet RGUs of approximately 14,500 due to continued lower customer activity in the COVID-19 environment, limited university and college activations and reduced promotions for new customer acquisitions.

Combined with declines in Video, Satellite and Phone, Consumer RGUs declined by 79,500 in the aggregate, partially offset with the addition of 8,300 Business RGUs. The Company remains focused on profitable Internet growth and retention, primarily through bundling with its recently launched Shaw Mobile wireless product.

Fourth quarter Wireline revenue of $1.06 billion decreased 1.3% and adjusted EBITDA of $510 million increased 5.6% year-over-year. After removing the $20 million impact resulting from the adoption of IFRS 16, adjusted EBITDA increased 1.4% compared to the prior year. Consumer revenue of $917 million decreased 1.4% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue of $140 million decreased 0.7% year-over-year and was comparable to the third quarter, reflecting the impacts from COVID-19 on the small and medium sized business market.

For the twelve-month period, Consumer revenue decreased 1.6% to $3.68 billion and Business revenue increased 1.8% to $567 million resulting in Wireline revenue of $4.25 billion, a decrease of 1.2% compared to the prior year. Adjusted EBITDA for the same period of $2.05 billion increased 5.1%, or approximately 0.9% after removing the $82 million impact from the adoption of IFRS 16, resulting in a Wireline operating margin of 46.4% (pre-IFRS 16), an improvement of approximately 90-basis points over fiscal 2019.

Capital expenditures in the fourth quarter of $307 million compared to $382 million a year ago. Wireline capital spending decreased by approximately $42 million primarily due to lower success-based capital and investments in new housing development. Wireless spending decreased by approximately $33 million due to investments related to market expansion in the prior year. Wireless investments include the deployment of 700 MHz spectrum, which is approximately 70% complete across our operating footprint and substantially complete in western Canada, as well as preparations for 600 MHz deployment in the coming year. Consolidated fiscal 2020 capital expenditures of $1.11 billion decreased by approximately $100 million compared to the previous year.

Free cash flow for the quarter of $152 million compared to $42 million in the prior year. The increase was largely due to higher adjusted EBITDA and lower capital expenditures and interest costs. Free cash flow for fiscal 2020 of $747 million was $209 million or nearly 40% higher than the prior year due to growth in adjusted EBITDA and lower capital expenditures in fiscal 2020.

Net income for the fourth quarter of fiscal 2020 of $175 million compared to $166 million in the fourth quarter of fiscal 2019. Net income for fiscal 2020 of $688 million was $45 million lower than the prior year primarily due to the $102 million impact of a tax rate change on deferred taxes recorded in the prior year and restructuring charges that were $23 million higher in fiscal 2020 compared to 2019. These reductions were offset by $79 million in adjusted EBITDA growth, excluding the impact of IFRS 16, and the net impact of gains on fixed asset disposals and losses related to the ownership of Corus Entertainment Inc. in the prior year.

Fiscal 2021 Guidance

The Company is introducing its fiscal 2021 guidance, which includes adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion and free cash flow of approximately $800 million.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. During the second half of fiscal 2020, the Company experienced a reduction in overall Wireline and Wireless subscriber activity, reduced wireless equipment sales, an improvement in Wireless postpaid churn, an increase of approximately 50% in wireline network usage as well as extended peak hours, increased demand for Wireless voice services by approximately 25%, a decrease in Wireless roaming and overage revenue, an increase in bad debt expense and the suspension, cancellation, or reduction of Business customer accounts, impacting Business revenue.

While the financial impacts from COVID-19 in the second half of fiscal 2020 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, who are also particularly vulnerable to the economic impacts of commodity price challenges and COVID-19, including mandated closures, self-quarantines or further social distancing restrictions.

We believe our business and facilities-based networks provide critical and essential services to Canadians and will continue to remain resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence and/or second wave of the pandemic, compounded by the commodity price challenges, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

As at the end of fiscal 2020, our net debt leverage ratio[4] was 2.3x compared to the Company's target leverage range of 2.5 to 3.0x. During the year, the Company repurchased approximately 5.6 million Class B Non-Voting Participating Shares ("Class B Shares") under its normal course issuer bid (NCIB) program for approximately $140 million before pausing in April 2020 due to COVID-19 uncertainty. Considering the stable performance of the Company throughout fiscal 2020, its current leverage position along with its strengthening free cash flow profile, Shaw is pleased to announce that it intends to renew its NCIB program to purchase up to 24,532,404 Class B Shares, representing 5% of all of the issued and outstanding Class B Shares as of October 22, 2020. The NCIB program has been approved by the Board of Directors but remains subject to approval by the Toronto Stock Exchange (TSX) and, if accepted, will be conducted in accordance with the applicable rules and policies of the TSX and applicable Canadian securities law.

"Our fiscal 2020 performance was strong considering the elevated level of uncertainty surrounding COVID-19 and I am confident in our continued ability to deliver growth in the future. Our expanding range of products and services have never been more relevant for consumers and businesses, and the launch of Shaw Mobile will continue to drive wireless growth while further deepening our existing relationship with our Wireline customers. We maintain our focus on delivering a stable Wireline performance while scaling our Wireless business, investing to future-proof our networks and on delivering significant free cash flow, which remains a key tenet of our strategy. While we felt it was prudent to pause our NCIB activity in April to preserve liquidity, we still returned approximately $750 million to our shareholders through dividends and buybacks in fiscal 2020. With a substantial and growing free cash flow profile expected in fiscal 2021, combined with significant balance sheet strength, we expect to enhance our already strong capital return profile through our current dividend commitments and an additional share buyback program of up to 5% of currently outstanding Class B Shares. We believe that our balanced capital return initiatives are appropriate considering numerous factors, including the continued macro environment uncertainty due to the ongoing COVID-19 pandemic," said Brad Shaw.

[4] Net debt leverage ratio is a non-GAAP measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" in the Company's fiscal 2020 Annual MD&A for information about this measure, including how we calculate it.

Shaw files Year-End Disclosure Documents

Shaw announced today the filing with Canadian securities regulators of its 2020 audited annual consolidated financial statements, related management's discussion and analysis and 2020 annual information form and the filing with the U.S. Securities and Exchange Commission of its 2020 annual report on Form 40-F which includes the Canadian filings.

These documents are available on Shaw's profile on the Canadian Securities Administrators' website (www.sedar.com). The Form 40-F is available on the U.S. Securities and Exchange Commission's website (www.sec.gov). All of these documents are also available on Shaw's website at www.shaw.ca/corporate/investor-relations/financial-reports. Any shareholder wishing to receive a printed copy of the 2020 annual report containing the audited annual consolidated financial statements and related management's discussion and analysis may request one at no charge by e-mail to investor.relations@sjrb.ca.

About Shaw

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone and video services. The Wireless division provides wireless voice and LTE data services through an expanding and improving mobile wireless network infrastructure.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

Caution concerning forward-looking statements

Statements included in this press release that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal" and similar expressions (although not all forward-looking statements contain such words). Forward looking statements in this press release include, but are not limited to statements relating to:

- future capital expenditures;
- proposed asset acquisitions and dispositions;
- expected cost efficiencies;
- financial guidance and expectations for future performance;
- business and technology strategies and measures to implement strategies;
- the Company's equity investments, joint ventures, and partnership arrangements;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;
- expected project schedules, regulatory timelines, completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;

- the expected impact of changes in laws, regulations, decisions by regulators or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented by governments or regulators;
- timing of new product and service launches;
- the deployment of: (i) network infrastructure to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the expected growth in the Company's market share;
- the cost of acquiring and retaining subscribers and deployment of new services;
- the sustainability of results/objectives and cost reductions achieved through the Total Business Transformation (TBT) initiative and Voluntary Departure Program (VDP);
- the impact that the employee exits in connection with VDP will have on Shaw's business operations;
- the expansion and growth of the Company's business and operations and other goals and plans; and
- the expected impact of the ongoing commodity price challenges and the COVID-19 pandemic.

All of the forward-looking statements made in this press release are qualified by these cautionary statements.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this press release are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the ongoing presence of commodity price challenges and the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods. These assumptions, many of which are confidential, include but are not limited to management expectations with respect to:

- general economic conditions, which includes the impact on the economy and financial markets of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks;
- the impact of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources and/or financial results;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment, and devices;
- the completion of proposed transactions;
- industry structure, conditions and stability;
- regulation, legislation or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);

- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long-term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the TBT initiative yielding the expected results and benefits, including (i) resulting in a leaner, more integrated and agile company with improved efficiencies and execution to better meet Shaw's consumers' needs and expectations (including the products and services offered to its customers), and (ii) sustainability of cost reductions achieved through VDP;
- the cost estimates for any outsourcing requirements and new roles in connection with the VDP;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company can gain access to sufficient retail distribution channels; and
- the Company can access the spectrum resources required to execute on its current and long-term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many risk factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including but not limited to:

- changes in general economic, market and business conditions including the impact of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees in response to the COVID-19 pandemic;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information and communications industries;
- changes in laws, regulations and decisions by regulators, or other actions by governments or regulators, that affect the Company or the markets in which it operates;
- any emergency measures implemented by governments or regulators;
- technology, privacy, cyber security and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects by the completion date;
- the Company's ability to grow subscribers and market share;
- the Company's ability to close key transactions;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers and their goods and services required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;

- the Company's ability to sustain the results/objectives and cost reductions achieved through TBT initiative and VDP
- the Company's ability to complete the employee exits in connection with VDP with minimal impact on operations;
- the Company's ability to complete the deployment of (i) network infrastructure required to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- opportunities that may be presented to and pursued by the Company;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in the Company's fiscal 2020 Annual MD&A under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors.

Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2020 Annual MD&A and this press release.

This press release provides certain future-oriented financial information or financial outlook (as such terms are defined in applicable securities laws), including the financial guidance and assumptions disclosed under "Fiscal 2021 Guidance." Shaw discloses this information because it believes that certain investors, analysts and others utilize this and other forward-looking information to assess Shaw's expected operational and financial performance, and as an indicator of its ability to service debt and pay dividends to shareholders. The Company cautions that such financial information may not be appropriate for this or other purposes.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this press release are expressly qualified by this statement.

Key Performance Drivers

Shaw measures the success of its strategies using a number of key performance drivers which are defined and described below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance drivers are not measurements in accordance with IFRS, should not be considered alternatives to revenue, net income or any other measure of performance under IFRS and may not be comparable to similar measures presented by other issuers.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.57% in the fourth quarter of fiscal 2020 compares to 1.47% in the fourth quarter of fiscal 2019. The increase in churn of approximately 10-basis points over the prior year is due primarily to targeted competitive win-back offers in the market. For fiscal 2020, postpaid churn of 1.40% was marginally higher than 1.32% in fiscal 2019.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is an industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding the allocation of the device subsidy attributable to service revenue under IFRS 15) plus the monthly re-payments of the outstanding device balance owing from customers on contract, divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $44.81 in the fourth quarter of fiscal 2020 compares to $42.05 in the fourth quarter of fiscal 2019, representing an increase of 6.6%. In fiscal 2020, ABPU grew 5.9% to $44.13. ABPU growth reflects the increased number of customers that are subscribing to higher value service plans, partially offset by reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

ARPU of $39.65 in the fourth quarter of fiscal 2020 compares to $38.06 in the fourth quarter of fiscal 2019, representing an increase of 4.2%. In fiscal 2020, ARPU grew 2.7% to $38.95. ARPU growth reflects the increased number of wireless customers subscribing to higher service plans, partially offset by lower roaming revenue in the last two quarters of the year due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Non-IFRS and additional GAAP measures

The Company's continuous disclosure documents may provide discussion and analysis of non-IFRS financial measures. These financial measures do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure documents may also provide discussion and analysis of additional GAAP measures. Additional GAAP measures include line items, headings, and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-IFRS financial measures and additional GAAP measures have not been presented as an alternative to revenue, net income or any other measure of performance required by IFRS.

Below is a discussion of the non-IFRS financial measures and additional GAAP measures used by the Company and provides a reconciliation to the nearest IFRS measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") (previously referred to as "Operating income before restructuring costs and amortization") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, equity income/loss of an associate or joint venture, amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business.

Adjusted EBITDA has no directly comparable IFRS financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended August 31,		Year ended August 31,	
(millions of Canadian dollars)	**2020**	2019	**2020**	2019
Net income [1]	**175**	166	**688**	733
Add back (deduct):				
Restructuring costs	**-**	(10)	**14**	(9)
Amortization:				
Deferred equipment revenue	**(3)**	(5)	**(16)**	(21)
Deferred equipment costs	**14**	19	**65**	85
Property, plant and equipment, intangibles and other [1]	**301**	236	**1,168**	974
Amortization of financing costs – long-term debt	**1**	1	**3**	3
Interest expense	**68**	66	**274**	258
Equity income (loss) of an associate or joint venture	**-**	-	**-**	(46)
Loss on disposal of an associate or joint venture	**-**	-	**-**	109
Other gains (losses)	**1**	(2)	**16**	(50)
Current income tax expense	**42**	29	**120**	114
Deferred income tax expense (recovery)	**(5)**	34	**59**	4
Adjusted EBITDA	**594**	534	**2,391**	2,154

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable.

Adjusted EBITDA Margin

Adjusted EBITDA margin (previously referred to as "Operating margin") is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business. Adjusted EBITDA margin has no directly comparable IFRS financial measure.

	Three months ended August 31,			Year ended August 31,		
	2020	2019	Change %[1]	**2020**	2019	Change %[1]
Wireline	**48.2%**	45.1%	7.0	**48.3%**	45.5%	6.2
Wireless	**28.6%**	18.2%	57.1	**28.9%**	19.0%	52.1
Combined Wireline and Wireless	**44.0%**	39.6%	11.1	**44.2%**	40.3%	9.7

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of operating income before restructuring costs and amortization, adding dividends from equity accounted associates, changes in receivable related balances with respect to wireline customer equipment financing transactions as a cash item and deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, dividends paid on the preferred shares, recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow from continuing operations, including operating income before restructuring costs and amortization continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

(millions of Canadian dollars)	Three months ended August 31, 2020	2019	Change %	Year ended August 31, 2020	2019	Change %
Revenue						
Consumer	**917**	930	(1.4)	**3,683**	3,743	(1.6)

2020 ANNUAL REPORT

Dear Fellow Shareholders:

Fiscal 2020 marked an unprecedented year for our Company, our country and for people around the world with the emergence of the COVID-19 pandemic. While it caused significant uncertainty and brought about rapid change in virtually every aspect of our lives, it also highlighted the resiliency and financial strength of our Company as well as the critical nature of our highly capable facilities-based infrastructure, which exists today because of our long history of significant investments in our network for the benefit of Canadians and our economy.

As the pandemic intensified throughout 2020, our priority was the safety of our employees and customers and supporting the communities in which we serve. We quickly transitioned the majority of our employees to work from home, where they remain productive, engaged and focused on providing a continuous high-quality connectivity experience for our customers, even as data traffic and peak usage soared. As a responsible corporate citizen, we took decisive action to provide additional free services, financial resources as well as devices and connectivity to our communities and those most impacted by the pandemic.

We entered this crisis from a position of strength and the strategic plan that we have been executing over several years was key to our solid performance over this rapidly evolving and uncertain period. Our purpose is in connecting customers to the world through a best-in-class seamless connectivity experience and this year was no exception. While managing through a global pandemic, we also introduced new products and services for our customers by leveraging our converging wireline and wireless networks which are innovative, affordable and stay ahead of customer expectations. Despite the unique and challenging environment, our consistent focus on this strategy and continued significant capital investments in excess of $1 billion, supported year-over-year growth in our business and a nearly 40% increase in free cash flow, exceeding our financial commitments for the year.

Wireless

Our efforts continue to focus on scaling our Wireless business through driving an overall enhanced customer experience and delivering Canadians better value. Fiscal 2020 saw the continued investments in vital areas such as spectrum deployment, foundational investments for the delivery of 5G services, further expansion of our retail presence and the exciting launch of Shaw Mobile, despite the challenging background.

The COVID-19 pandemic caused the temporary closure of the vast majority of our retail network, impacting Wireless customer growth, resulting in approximately 160,000 new Wireless customers in fiscal 2020; however, it also showcased our strong operating leverage as we delayed new customer acquisition investments during this lower growth period. Wireless service revenue grew an impressive 17.4% to $815 million, a key factor supporting our improved Wireless margin in the year. Our wireless strategy continues to focus on increasing our market share, particularly in western Canada with the addition of Shaw Mobile, and improving Wireless profitability.

The launch of Shaw Mobile on July 30, 2020 was a significant milestone that will fuel the next chapter of our wireless growth story. Shaw Mobile provides Shaw Internet customers with bundling opportunities to take advantage of unprecedented savings, combined with the ability to customize their mobile data requirements through two rate plans – By The Gig and Unlimited Data. Shaw Mobile is a powerful example of how facilities-based service providers can compete and innovate to deliver true wireless affordability. As we expand our retail presence, Shaw Mobile is now available in 24 Shaw retail locations and, combined with our national retail partner stores, over 140 locations in Alberta and British Columbia. Freedom Mobile continues to be available in over 700 retail locations.

Wireline

Our Wireline business delivered another year of consistent and stable performance, including margin improvement in the face of COVID-19 adversity. As customers moved their offices and classrooms home, our extensive Fibre+ network was the true workhorse maintaining these critical connections, without interruption. In the second half of fiscal 2020, we experienced a dramatic increase in data traffic by up to 50% and extended peak hours of usage; however, years of network related investments, including Shaw's industry leading Mid-Split program, had us well prepared to handle the surge in demand. In fact, not only did we maintain our high-quality network performance in fiscal 2020, we introduced even faster Internet speeds to our customers with the launch of Shaw Fibre+ Gig Internet to over 99% of our Wireless customer footprint in western Canada.

Long before we entered this new environment, where we must practice social distancing, we recognized that we needed to evolve towards becoming a digital-first organization and we continued to advance initiatives that quickly became a strategic differentiator for Shaw. A key tenet of this strategy was to drive the adoption of customer self-install, which increased significantly, reaching 79% in the last quarter of fiscal 2020 compared to 45% in the prior year, allowing new and existing customers to get the latest broadband technology from Shaw without having to schedule an appointment.

Shaw Business encountered new challenges this year as businesses across the country were faced with a difficult environment due to the pandemic. Our role as a trusted advisor along with the strength of our network and Smart suite product offering, including new services to meet the demands for more robust work from home solutions, reinforce our strong position in the market.

Looking ahead

We have successfully demonstrated the resilient nature of our business, our agility in operating in this environment and our ability to deliver growth throughout one of the most unique and challenging years in our history. In addition to navigating a new environment brought forth by the COVID-19 pandemic, we are also sadly forging ahead without our Company founder, JR Shaw, who passed in March of this year. His stewardship, guidance, and insight have been missed over this difficult period; however, his unwavering commitment and passion to provide an exceptional customer experience remains forever engrained in our culture.

As we embrace a new year, we will continue to enhance the customer experience by leveraging our new and innovative Shaw Mobile wireless service to deepen our relationship with existing customers and welcome new ones. We will deliver better and faster services through new technology, expanded distribution, and additional digital capabilities. These developments are made possible through the continued investment in our critical infrastructure to stay ahead of customer expectations, including the deployment of 600 MHz spectrum and advancing our 5G capabilities in fiscal 2021.

While we still face elevated levels of uncertainty, including COVID-19 related impacts, commodity pricing related challenges, key regulatory decisions, and an intensifying competitive environment, we are uniquely positioned to drive better value for all our stakeholders. This includes additional transparency into our environmental, social, and governance (ESG) initiatives in our forthcoming ESG report and the critical role it plays in shaping our strategy. By more formally addressing the needs of all our stakeholders, we can thrive in this new environment. Our strong balance sheet enables us to continue making critical investments and our focus on ‘brighter together’ growth opportunities will drive further efficiencies and contribute to strong and sustainable free cash flow growth and capital return initiatives.

In closing, I would like to extend my gratitude to our Board of Directors, for their invaluable leadership and insight, as well as the entire Shaw team of approximately 9,500 employees for their unwavering dedication throughout this truly exceptional year.

[Signed]

Bradley S. Shaw
Executive Chair & Chief Executive Officer

MANAGEMENT'S DISCUSSION & ANALYSIS

Contents

Forward

Tabular dollar amounts are in millions of Canadian dollars, except per share amounts or unless otherwise indicated. This Management's Discussion and Analysis (MD&A) should be read in conjunction with the Consolidated Financial Statements. The terms "we," "us," "our," "Shaw" and "the Company" refer to Shaw Communications Inc. or, as applicable, Shaw Communications Inc. and its direct and indirect subsidiaries as a group. This MD&A is current as at October 30, 2020 and was approved by Shaw's Board of Directors.

Caution Concerning Forward Looking Statements

Statements included in this MD&A that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal," and similar expressions (although not all forward-looking statements contain such words). All of the forward-looking statements made in this report are qualified by these cautionary statements. Forward looking statements in this MD&A include, but are not limited to, statements relating to:

- future capital expenditures;
- proposed asset acquisitions and dispositions;
- expected cost efficiencies;
- financial guidance and expectations for future performance;
- business and technology strategies and measures to implement strategies;
- the Company's equity investments, joint ventures, and partnership arrangements;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;
- expected project schedules, regulatory timelines, and completion/in-service dates for the Company's capital and other projects;
- expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators, or other actions by governments or regulators on the Company's business, operations, and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented by governments or regulators;
- timing of new product and service launches;
- Private LTE network offerings, initiatives, and partnerships as well as the performance and capability of such Private LTE networks and their ability to meet the needs of Shaw's customers, including the future provision of 5G services;
- the deployment of: (i) network infrastructure to improve capacity and coverage, and (ii) new technologies, including next generation wireless and wireline technologies such as 5G and Internet protocol television, or IPTV, respectively;
- the expected growth in the Company's market share;
- the ability of Shaw Mobile to drive customer growth;
- the cost of acquiring and retaining subscribers and deployment of new services;
- the sustainability of results/objectives and cost reductions achieved through the Total Business Transformation (TBT) initiative and Voluntary Departure Program (VDP);
- the impact that the employee exits in connection with VDP will have on Shaw's business operations;
- the expansion and growth of Shaw's business and operations and other goals and plans; and
- the expected impact of the ongoing commodity price challenges and the COVID-19 pandemic.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this MD&A are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the ongoing presence of commodity price challenges and the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial, and municipal), regulatory authorities, businesses, and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods. These assumptions, many of which are confidential, include, but are not limited to management expectations with respect to:

- general economic conditions, which includes the impact on the economy and financial markets of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks;

- the impact of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources, and/or financial results;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in Wireless handset sales;
- pricing, usage, and churn rates;
- availability and cost of programming, content, equipment, and devices;
- the completion of proposed transactions;
- the integration of acquisitions;
- industry structure, conditions, and stability;
- regulation, legislation, or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third party service providers and their goods and services required to execute on the Company's current and long term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the TBT initiative yielding the expected results and benefits, including: (i) resulting in a leaner, more integrated and agile company with improved efficiencies and execution to better meet Shaw's consumers' needs and expectations (including the products and services offered to its customers), and (ii) sustainability of cost reductions achieved through VDP;
- the cost estimates for any outsourcing requirements and new roles in connection with VDP;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees to reduce the spread of COVID-19;
- the Company can gain access to sufficient retail distribution channels; and
- the Company can access the spectrum resources required to execute on its current and long-term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including, but not limited to:

- changes in general economic, market, and business conditions including the impact of (i) fluctuations in commodity prices, and (ii) the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources, and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees in response to the COVID-19 pandemic;
- changes in interest rates, income taxes, and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments, and other changing conditions in the entertainment, information, and communications industries;
- changes in laws, regulations, and decisions by regulators or other actions by governments or regulators that affect the Company or the markets in which it operates;
- any emergency measures implemented by governments or regulators;
- technology, privacy, cyber security, and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;

- the Company's ability to execute its strategic plans and complete its capital and other projects by the completion date;
- the Company's ability to grow subscribers and market share;
- the Company's ability to close key transactions;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third party service providers required to execute on its current and long term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to sustain the results/objectives and cost reductions achieved through the TBT initiative and VDP;
- the Company's ability to complete the employee exits in connection with VDP with minimal impact on operations;
- the Company's ability to complete the deployment of (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in this MD&A under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible factors. Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in this MD&A.

The Company provides certain financial guidance for future performance as the Company believes that certain investors, analysts, and others utilize this and other forward-looking information in order to assess the Company's expected operational and financial performance and as an indicator of its ability to service debt and pay dividends to shareholders. The Company's financial guidance may not be appropriate for this or other purposes.

This MD&A provides certain future-oriented financial information or financial outlook (as such terms are defined in applicable securities laws), including the financial guidance and assumptions disclosed under "Fiscal 2021 Guidance." Shaw discloses this information because it believes that certain investors, analysts, and others utilize this and other forward-looking information to assess Shaw's expected operational and financial performance, and as an indicator of its ability to service debt and pay dividends to shareholders. The Company cautions that such financial information may not be appropriate for this or other purposes.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this MD&A are expressly qualified by this statement.

ABOUT OUR BUSINESS

At Shaw, we focus on delivering sustainable long-term growth and connecting customers to the world through a best-in-class seamless connectivity experience by leveraging our world class converged network. This includes driving operational efficiencies and executing on our strategic priorities through the delivery of an exceptional customer experience and more agile operating model. Combined with significant facilities-based investments, our powerful and robust networks serve as the foundation for connectivity and innovation. With the onset of the global COVID-19 pandemic in 2020, connectivity rapidly became a critical lifeline for Canadians and our economy. During this unprecedented period, our network performance was exceptional, and we remain focused on supporting our employees, customers, and communities. While the COVID-19 pandemic does impact our business, Shaw continues to be resilient and we believe that we are well positioned to meet the rapidly changing and increasing demands of our customers.

WIRELINE

Shaw is one of the largest providers of residential communication services in Canada.

Our Consumer division connects people and families in British Columbia, Alberta, Saskatchewan, Manitoba, and northern Ontario through our Fibre+ network.

Shaw Direct is one of two licensed satellite Video services available across Canada.

WIRELESS

Shaw is the fourth largest wireless provider in Canada, offering both postpaid and prepaid services.

Shaw Mobile currently operates in British Columbia and Alberta. Freedom Mobile currently operates in Ontario, British Columbia and Alberta.

Over 19 million Canadians reside within our current mobile wireless network service area.

BUSINESS

Our Business division leverages our network infrastructure with a product suite targeting businesses of all sizes.

In the following sections we provide selected financial highlights and additional details with respect to our strategy, our Wireline and Wireless divisions, our network and our presence in the communities in which we operate and serve.

Shaw trades on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Trading Symbols: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

Select Financial and Operational Highlights

Through an evolving operating and competitive landscape our consolidated business delivered stable and profitable results in fiscal 2020.

Basis of presentation

Fiscal 2020 results are reported in accordance with the newly adopted IFRS 16, *Leases* ("IFRS 16"). Supplementary information is provided in "New Accounting Standards," reflecting the previous leases policy and the changes from the adoption of the new standard. The adoption of IFRS 16 had a significant effect on our reported results. We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented were not restated and continue to be reported under International Accounting Standard (IAS) 17 – *Leases*, as permitted by the specific transition provisions of IFRS 16. The cumulative effect of the initial adoption of IFRS 16 was reflected as an adjustment to the impacted balance sheet accounts as at September 1, 2019.

In conjunction with the adoption of IFRS 16, we also updated certain of our non-GAAP and additional GAAP measures including renaming the previously disclosed "Operating income before restructuring costs and amortization" measure as "adjusted EBITDA" to better align with language used by various stakeholders of the Company. We also amended our free cash flow definition to reflect the impact of IFRS 16 to account for lease payments that are no longer classified as operating expenses under the new standard. See the definitions and discussion under "Key Performance Drivers" for more details.

On September 15, 2017, the Company sold a group of assets comprising the operations of Shaw Tracking, a fleet tracking operation within the Company's Business segment, to Omnitracs Canada. Accordingly, the operating results and operating cash flows for the previously reported Shaw Tracking business (an operating segment within the Business division) are presented as discontinued operations separate from the Company's continuing operations. This MD&A reflects the results of continuing operations, unless otherwise noted.

Our Strategy

At Shaw, we focus on delivering sustainable long-term growth by connecting customers to the world through a best-in-class seamless connectivity experience by leveraging our world class converged network. This includes driving operational efficiencies and executing on our strategic priorities through the delivery of an exceptional customer experience and a more agile operating model. Combined with significant facilities-based investments, our powerful and robust networks serve as the foundation for connectivity and innovation. With the onset of the global COVID-19 pandemic in 2020, connectivity rapidly became a critical lifeline for Canadians and our economy. During this unprecedented period, our network performance was exceptional, and we remain focused on supporting our employees, customers, and communities. While the pandemic has had an impact on our business, Shaw continues to be resilient and we believe that we are well positioned to meet the rapidly changing and increasing demands of our customers.

In a year like none other, fiscal 2020 included another exciting milestone for our Wireless business with the launch of Shaw Mobile in Alberta and British Columbia, complementing our existing Freedom Mobile brand. Shaw Mobile is a new wireless service that leverages our LTE and Fibre+ networks, along with Canada's largest WiFi network, to provide Shaw Internet customers with an innovative wireless experience that offers customers unprecedented savings. The introduction of Shaw Mobile will enable the Company to acquire new customers by leveraging bundling opportunities. Our new 'Brighter Together' advertising campaign highlights customers' ability to customize their mobile data allotment with two rate plans – By The Gig and Unlimited Data – and is the best example yet of how facilities-based providers can compete and innovate to deliver true wireless affordability.

Through continued thoughtful and strategic investments, spectrum deployment, and a growing number of distribution points, we continue to create a stronger, higher quality wireless network that enables us to deliver an improving customer experience that balances profitability and customer growth. Our Wireless operating footprint now covers over 19 million people, or approximately 50% of the Canadian population, in some of Canada's largest urban centres, as well as many smaller communities throughout British Columbia, Alberta, and Ontario.

During fiscal 2020, we delivered Wireless subscriber growth of over 160,000 (net additions), ABPU[1] improvement of 5.9% (to $44.13) and service revenue growth of approximately 17.4% (to over $815 million) in the year. Since the acquisition of Freedom Mobile in 2016, our Wireless subscriber base has grown by approximately 80% to over 1.8 million subscribers at the end of fiscal 2020, which is a true testament to our differentiated and sustainable value proposition to customers.

[1] Refer to "Key Performance Drivers" section for definition and explanation.

In our Wireline division, with approximately 5.3 million RGUs,[2] we continue to leverage our Fibre+ network by introducing new and improved services to our residential and business customers that align with our focus on profitable growth and stability. In fiscal 2020, and in the midst of the COVID-19 pandemic, we introduced our Fibre+ Gig Internet service, which represents the largest deployment of up to gigabit download speeds to residential Internet customers in western Canada.

In addition to rolling out the fastest speeds ever available to our customers, Shaw launched a new entry-level Internet plan as part of a new lineup of Internet tiers, providing customers a full range of choices depending on their connectivity needs.

In response to the changing business environment due to the COVID-19 pandemic, Shaw Business introduced Smart Remote Office, providing business owners peace-of-mind in knowing their company data is protected while giving their employees greater ability to seamlessly work from anywhere.

With the majority of Canadians relying more than ever on video and voice interactions to remain connected for social and business purposes, to access education, and enjoy entertainment, fiscal 2020 saw significant increases in traffic on our wireline network. Due to substantial facilities-based investments, our network performance continues to be exceptional even with the more recent pandemic-related surge in demand, which increased by as much as 50% and included peak period usage extending to over 12 hours a day, 7 days a week. In fact, Ookla named Shaw the fastest and most consistent internet provider in western Canada. Across British Columbia, Alberta, Manitoba, and Saskatchewan, Shaw's Fibre+ network was reported as the fastest. Furthermore, a growing number of customers elected to self-install their services with up to 79% of our customers choosing this option in the last quarter of fiscal 2020. We remain committed to building and transitioning into a new digital operating service model and improving the customer experience with a focus on continued reductions to our cost structure in the Wireline division.

In addition to strengthening the long-term strategic positioning of the Company over the last several years, we have maintained a solid balance sheet that along with a growing free cash flow profile support the significant, albeit moderating in intensity, level of investment required for long-term sustainable growth. We remain committed to the maintenance of our investment grade credit rating and focus on free cash flow growth. Despite the significant uncertainty arising from the COVID-19 pandemic and commodity price challenges, our business demonstrated its resilience thus allowing us to deliver pre-IFRS 16 adjusted EBITDA growth of 3.7%, fund our planned capital investments of over $1 billion, and achieve free cash flow growth of almost 40% in fiscal 2020. Moreover, during the same period, we returned approximately $750 million to our shareholders as part of our enhanced return of capital initiatives, consisting of regular monthly dividends and share repurchases under our normal course issuer bid (NCIB) program, the latter of which was introduced during fiscal 2020 and resulted in the repurchase for cancellation of approximately 5.6 million Class B Non-Voting Participating Shares ("Class B Non-Voting Shares") for a total cost of approximately $140 million and which we believe is synergistic with our now 100% cash-funded dividend program.

Fiscal 2021 Guidance

The Company is introducing its fiscal 2021 guidance, which includes adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion, and free cash flow of approximately $800 million. We believe our business and facilities-based networks provide critical and essential services to Canadians and will continue to remain resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence, and/or subsequent waves of the pandemic, compounded by commodity price challenges, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

As at the end of fiscal 2020, our net debt leverage ratio[3] was 2.3x compared to the Company's target leverage range of 2.5 to 3.0x. Considering the current leverage position along with its strengthening free cash flow profile, Shaw is announcing that it intends to renew its NCIB program to purchase up to 24,532,404 Class B Non-Voting Shares,

---

[2] Refer to "Key Performance Drivers" section for definition and explanation.

[3] Net debt leverage ratio is a non-GAAP measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about this measure, including how we calculate it.

representing 5% of all of the issued and outstanding Class B Non-Voting Shares as of October 22, 2020. The NCIB program has been approved by the Board of Directors but remains subject to approval by the Toronto Stock Exchange (TSX) and, if accepted, will be conducted in accordance with the applicable rules and policies of the TSX and applicable Canadian securities law.

Impact of Coronavirus (COVID-19) Pandemic

During the second half of fiscal 2020, the Company experienced the following key impacts related to COVID-19:

- a reduction in overall Wireline and Wireless subscriber activity,
- reduced Wireless equipment sales and an improvement in Wireless postpaid churn,
- an increase of approximately 50% in wireline network usage as well as extended peak hours,
- increased demand for Wireless voice services by approximately 25%,
- a decrease in Wireless roaming and overage revenue,
- customer payments substantially in-line with historical trends,
- an increase in bad debt expense, and
- the suspension or cancellation of a number of Business customer accounts, impacting Business revenue.

In the second quarter of fiscal 2020, through the implementation of our detailed business continuity plan, we transitioned a significant portion of our employee base to work from home and temporarily closed retail locations across Canada (except for a limited number of street front stores providing urgent customer support). Throughout these challenging circumstances, the Company has continued to serve its customers, quickly adapting to the dynamic and evolving environment.

While the financial impacts from COVID-19 in fiscal 2020 were not material, the situation remains uncertain in terms of its magnitude, outcome, and duration. Consumer behaviors could still change materially, including the potential downward migration of services, acceleration of cord-cutting, and reduced ability of customers to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, which is particularly vulnerable to the economic impacts of commodity price challenges and COVID-19, including mandated business closures or further social distancing restrictions.

Despite the challenging and uncertain economic environment created by the ongoing impact of the COVID-19 pandemic, our business delivered solid results while demonstrating its resiliency and the critical nature of the connectivity services it provides. Our robust facilities-based network, the result of years of significant investment, has showcased its strength in addressing our customers' need to stay connected to family, friends, and colleagues throughout the COVID-19 pandemic.

As the COVID-19 pandemic continues to evolve, the Company's focus continues to be on the safety and health of its employees, the reliability of its facilities-based network, and the responsiveness to our customers. We continue to be in constant contact with public safety and government officials at all levels, as well as key suppliers, partners, and customers. The Company's business resumption plan, designed for the gradual and safe re-introduction of employees to the workplace, is being implemented in phases as government-imposed restrictions on businesses and individuals are lifted. As of the date of this MD&A, all of our retail stores have re-opened.

As an ongoing risk, the magnitude, outcome, duration, resurgence and/or subsequent waves of the COVID-19 pandemic is still unknown and subject to a significant amount of uncertainty at this time, as is the efficacy and duration of the government interventions. For further detail, see "Known Events, Trends, Risks and Uncertainties – Coronavirus (COVID-19)."

Total Business Transformation

In fiscal 2020, the Company completed VDP, which was a key component of the Company's multi-year TBT initiative, introduced in the second quarter of 2018. The TBT was designed to reinvent Shaw's operating model to better meet the evolving needs and expectations of consumers and businesses by optimizing the use of resources, maintaining and ultimately improving customer service, and by reducing staff. As part of the TBT initiative, we reduced input costs, consolidated functions, and streamlined processes, which has led to operational improvements across the business, allowing us to evolve into a more efficient organization. We have become a more focused, agile, and accountable organization ready to evolve from being product-focused to more purposeful and fully integrated, focusing on satisfying the unique needs of our customers. With the completion of VDP, approximately 3,140 employees exited the Company between the second quarter of fiscal 2018 and the end of fiscal 2020.

For the twelve months ended August 31, 2020, no additional restructuring charges related to the Company's TBT initiative have been recorded, with a total of $437 million in restructuring charges recorded since the beginning of the program, of which $425 million has been paid to date. On March 5, 2020, the Company announced the substantial completion of the TBT initiative with fiscal 2020 annualized savings related to VDP substantially in-line with the previous estimates. See also "Caution Concerning Forward Looking Statements" and "Known Events, Trends, Risks and Uncertainties – Total Business Transformation" for a discussion of the TBT initiative, VDP, and the risks and assumptions associated with each.

People and Culture

As a leading Canadian connectivity company, we are transforming our culture and making purposeful investments in our people which enable us to deliver on our corporate and operational strategy. Building off a foundation of strong leadership and talent, our commitment to a diverse employee base ensures business decisions are made with our customers' needs at the forefront to create a seamless connectivity experience.

Our people and culture strategy is rooted in a people-first approach that empowers and develops our people to deliver break-through results and provides them with the tools they need to deliver on our strategic priorities through the delivery of exceptional employee and customer experiences in a more agile operating model. Through various inputs and interactions, as well as listening to our employees regularly, we are focused on the following four imperatives to achieve our people and culture objectives:

1) **Talent** – Elevating our people by giving them personalized development tools, skills, and the knowledge they need to succeed today and in the future. We proactively build skills while keeping an eye on emerging talent needs.

2) **Leadership** – Investing in our leaders by enhancing their capabilities to drive performance, support our culture, and inspire our people.

3) **Culture** – A key driver of our success and competitive advantage stems from our corporate culture and putting our people first to ensure we deliver on our strategic priorities through the delivery of exceptional employee and customer experiences.

   In support of our ongoing strategies to create a more diverse and inclusive culture, we continue to support our employee-led resource groups (i.e., Spectrum@Shaw, Pride@Shaw, and Women@Shaw). In fiscal 2020, we also launched an internal survey as part of our regular employee listening to gain a deeper understanding of how diverse and inclusive our people feel Shaw is and to help us grow and reflect their needs and the needs of our customers. This information not only helps inform our evolving priorities, but also reveals areas of opportunity to ensure we are reflective of our employee base and the communities we serve. We are proud recipients of Canada's Best Diversity Employers award for 2020.

   As well as paying attention to our internal needs, we are also focused on our external environment. Our unwavering commitment to sustainability and our environment ensures we are delivering value in the best ways that are also connected to our culture.

4) **Well-Being** – Foundational to the growth of our employees and their ability to deliver winning results has been a focus on holistic well-being. As an organization we are proud to play an expanded role in employees' financial, physical, and psychological well-being to ensure they have the resources they need to feel safe and supported – both during the COVID-19 pandemic and beyond. We are putting the health and safety of our people and customers first, ensuring all employees have the flexibility, support, tools, and resources (e.g., virtual healthcare, fitness, leadership development) to navigate how we work and lead during these uncertain and evolving times.

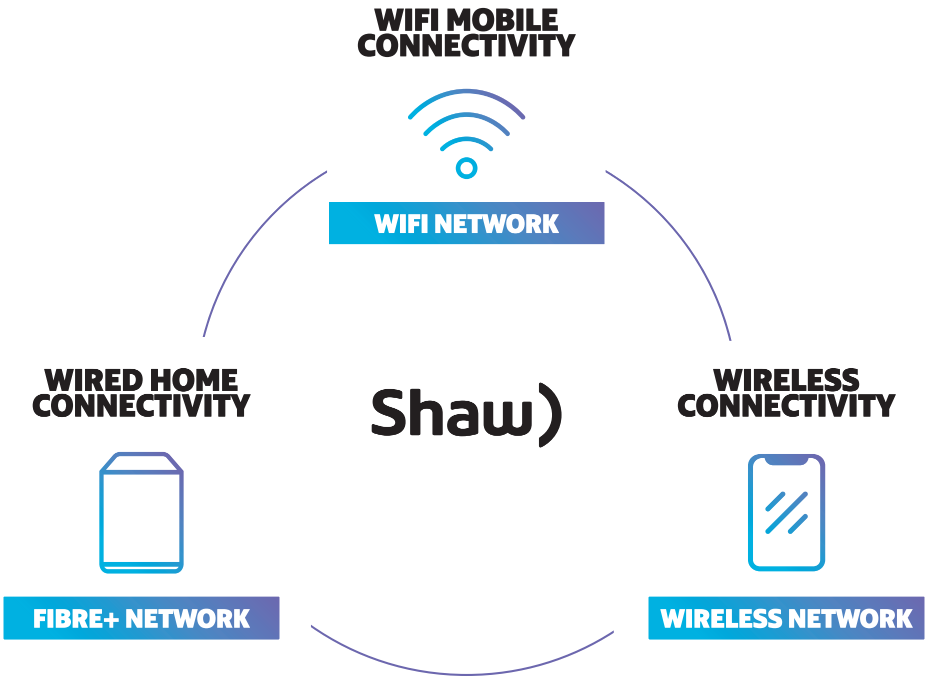
Global Technology Leaders

In order to efficiently secure and deliver leading technology for our customers – both for today and tomorrow – we recognize that we must participate in global scale initiatives through partnerships with best-in-class service providers. This ensures that the technology we adopt and invest in is, and continues to be, leading-edge in the global communications industry.

This approach allows us to leverage our existing assets, where we have strength and expertise, while also ensuring our investments are aligned with industry leaders to support the development, maintenance, and advancement of new technology where it is impractical for us to do so on a standalone basis. This allows us to direct our capital resources and further our commitment to continue the advances in innovation, performance, and reliability of our products and services. In addition, this strategic approach to our business gives us the opportunity to better manage costs by participating in opportunities on a global scale.

We have a series of significant and strong relationships with global leaders on the following initiatives:

- Shaw BlueCurve, a technology that provides customers with greater control over their home WiFi experience (through the BlueCurve Home app and Pods) and supports IPTV, is powered by the BlueCurve Gateway (XB6) Data over Cable Interface Specification (DOCSIS) version 3.1 advanced WiFi modem ("BlueCurve Gateway modem") developed by Comcast (see discussion under "Consumer Services")
- the deployment of our wireless LTE network, which was designed, planned, and deployed by NOKIA, a global leader in mobile wireless technology and solutions (see discussion under "Wireless")
- our "Smart" suite of business services that includes SmartWiFi, SmartTarget, SmartSecurity, SmartSurveillance, and Smart Remote Office, each in collaboration with Cisco Meraki, as well as SmartVoice in collaboration with Broadsoft (see discussion under "Business Services")



WIRELESS

Our Wireless division, through Shaw Mobile and Freedom Mobile, provides wireless voice and data services through an expanding and improving wireless network.

WIRELINE
Consumer

Our Wireline – Consumer division connects consumers in their homes and on the go with broadband Internet, Shaw Go WiFi, Video, and traditional home phone services.

WIRELINE
Business

Our Wireline – Business division provides business customers with a full suite of connectivity and managed services, including Internet, data, security, WiFi, and phone, which enables them to focus on building their business.

Wireless and Wireline Performance

Despite the challenging and uncertain economic environment created by the ongoing impact of the COVID-19 pandemic in the second half of fiscal 2020, our business delivered solid results while demonstrating its resiliency and the critical nature of the connectivity services it provides. Our robust facilities-based network, the result of years of significant investment, has showcased its strength in addressing our customers' need to stay connected to family, friends, and colleagues throughout the COVID-19 pandemic.

While the financial impacts from COVID-19 in the second half of fiscal 2020 were not material, the situation remains uncertain in terms of its magnitude, outcome, and duration. Consumer behaviors could still change materially, including the potential downward migration of services, acceleration of cord-cutting, and reduced ability of customers to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, which is also particularly vulnerable to the economic impacts of commodity price challenges and COVID-19, including mandated closures or further social distancing restrictions.

Throughout these challenging circumstances, the Company has continued to serve its customers, quickly adapting to the dynamic and evolving environment. In fiscal 2020, we completed our TBT initiative by improving the customer experience across both our Wireline and Wireless divisions while, at the same time, removing significant operating and capital costs from the business. Through our focus on execution, we are growing our Wireless customers, identifying sustainable cost savings in our core Wireline business, and making the appropriate investments to capitalize on future growth. Our launch of Shaw Mobile, a new wireless service in western Canada that leverages our LTE and Fibre+ networks, along with Canada's largest WiFi service, further complements our Freedom Mobile brand and deepens our existing relationships with our Wireline customers. We continue our transformation into an agile, lean and digital-first organization that is focused on providing a seamless connectivity experience that meets the needs of its customers now and into the future. As deployment of our 700 MHz spectrum is virtually complete in western Canada and approximately 70% complete nationwide, our focus turns to deploying our 600 MHz spectrum across our Wireless operating footprint, and continuing to improve our LTE experience, providing affordable options for our customers, and laying the foundation for 5G services.

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. Refer to "New Accounting Standards" for additional details on the changes for fiscal 2020 as well as discussions under "Results of Operations" and "Segmented Operations Review."

(2) Adjusted EBITDA is a non-GAAP measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about this measure, including how we calculate it.

Our Wireless division was formed following the acquisition of Freedom Mobile in March 2016. This acquisition transformed Shaw into a leading Canadian connectivity company, adding the critical wireless component to our converged network. Our Wireless division currently operates in Ontario, Alberta, and British Columbia, positioned as the leading alternative for mobile services to the three national wireless incumbent carriers.

Launch of Shaw Mobile

On July 30, 2020, the Company launched Shaw Mobile, a new wireless service in western Canada that leverages Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, to provide Shaw Internet customers with an innovative wireless experience. Shaw Mobile provides Shaw Internet customers with bundling opportunities to take advantage of unprecedented savings, combined with the ability to customize their mobile data requirements through two rate plans – By The Gig and Unlimited Data.

Shaw Mobile is a powerful example of how facilities-based service providers can compete and innovate to deliver true wireless affordability for Canadians. With its Fibre+ network and Canada's largest WiFi network, Shaw Mobile capitalizes on the long-term trend that shows the vast majority of Canadians' smart device data usage occurs on WiFi networks, a fact amplified by recent work-from-home trends.

Freedom Mobile Big Gig Unlimited, Absolute Zero, and Prepaid Plans

In fiscal 2019, Freedom Mobile launched the Big Gig Unlimited and Absolute Zero campaigns in response to the competitive and dynamic wireless environment. Paired with the most popular devices, and ongoing improvements in the strength and capacity of our network, our Big Gig Unlimited and Absolute Zero plans continue to disrupt the wireless market by providing Canadians with a better, more affordable option when choosing a wireless service provider.

Freedom Mobile customers can either bring their own device to the network or participate in one of Freedom Mobile's discretionary wireless handset discount plans – MyTab or Absolute Zero. MyTab allows Freedom Mobile customers to pay a discounted price for a handset upfront and a predetermined monthly Tab charge in addition to the rate plan cost. Absolute Zero allows Freedom Mobile customers to receive an eligible handset for $0 upfront, $0 extra per month, and $0 owing after 24 months.

In the third quarter of fiscal 2020, Freedom Mobile introduced new prepaid-by-the-year plans to address a need in the current economic environment.

Wireless Distribution Network

In fiscal 2019, Freedom Mobile remodeled its most prominent corporate branded stores and finalized agreements with multiple new national retail partners.

In fiscal 2020, Freedom Mobile continued to modernize more than 20 Freedom-branded stores across the country with the key focus on maximizing customer experience and the safety of both our customers and employees. Freedom Mobile's full suite of products continue to be available in over 700 locations across Ontario, Alberta, and British Columbia through our corporate, dealer, and retail partners. In addition, we have added over 300 "countertop" and "grab & go" locations in independent retail outlets and store-within-a-store environments, catering specifically to the growing prepaid market.

During fiscal 2020, the Shaw Mobile-branded retail presence expanded by adding 12 locations to our corporate network for a total of 21 as August 31, 2020, with another 6 stores set to open in the first quarter of fiscal 2021. Combined with our national retail partners, Walmart and Loblaws, Shaw Mobile is now available at over 140 retail locations in Alberta and British Columbia.

Wireless Network Upgrades

Supporting our Wireless revenue growth are the significant investments in our wireless network and customer service capabilities. We are executing on our operating plan to improve our network and deploy spectrum in the most efficient way to enhance our LTE service and prepare for the delivery of 5G services. Wireless network investments to improve the customer experience continue to be a priority in the areas in which we operate and serve Wireless customers.

Through years of thoughtful and strategic capital investing, we continue to expand and improve our facilities-based wireless network to meet the evolving needs of our customers and continue to fuel Freedom Mobile's momentum. See "Shaw's Wireless Network" for further details on Shaw's wireless network upgrades.

5G Preparation

Shaw has been actively trialing 5G technology starting with pre-commercial trials in the 3.5 GHz and 28 GHz spectrum bands in 2018. In fiscal 2020, we continued conducting 5G trials in two key areas: (i) 600 MHz spectrum band and (ii) backhaul over DOCSIS and ethernet passive optical networks (EPON).

Unlike our previous 5G trials, the 600 MHz spectrum band trial was conducted using commercially available 5G network equipment and end-user devices. This trial, carried out in collaboration with NOKIA, successfully demonstrated 5G operation from the core network to the end-user device and paves the way for future 5G commercial deployments, which are expected to provide lower latency, improved device connectivity, and higher speeds compared to LTE.

In preparation for 5G, Shaw teams have also been strategically planning for future requirements throughout the wireless network, all the way from our core network to the radio sites. In fiscal 2019, the Company migrated its core network to the CloudBased Infrastructure Software platform, the latest generation of cloud core architecture from NOKIA and a key building block of 5G. In addition, 600 MHz radio and antenna designs were implemented by our radio access network teams at new and existing sites in preparation for 5G service. These planning initiatives led to our first 5G call in April 2020 and successful tests with commercially available handsets in June 2020.

In fiscal 2020, in collaboration with NOKIA, Shaw conducted field testing on 5G backhaul over DOCSIS and EPON. The test results successfully demonstrated that 5G backhaul traffic can be reliably transported over existing DOCSIS and EPON technologies, which offers the prospect of significantly reducing the time and cost to deploy our 5G networks.

As part of its converged network strategy, the Company continues to leverage the coaxial cable (which transports both power and multi-gigabit data speeds) in its Fibre+ network for the rapid and flexible deployment of small cells, which will support densification efforts in preparation for 5G.

Subscriber and ABPU Growth

As a result of the impact of the COVID-19 pandemic, in the second half of fiscal 2020, the Wireless division experienced a reduction in overall subscriber activity, a decrease in equipment sales, improved postpaid churn, a decrease in roaming and overage revenue, and an increase of approximately 25% in voice traffic on our network.

In fiscal 2020, our Wireless division delivered solid, high quality subscriber growth while continuing to improve operating margins and lower churn. Over 19 million Canadians, or approximately 50% of the Canadian population, reside within our current wireless network service area. Our Wireless division's customer base continues to grow, with over 1.8 million customers, including over 160,000 net new customers added in fiscal 2020. The growth of our subscriber base was complemented, on an annual basis, by an ABPU improvement of 5.9% (to $44.13) over fiscal 2019 due to the increased subscriber base and growing penetration of Big Gig and Absolute Zero plans.

Since the acquisition of Freedom Mobile, we have made significant investments and improvements to scale the business. We have firmly established Freedom Mobile as the industry innovator and recognized champion of wireless affordability for Canadians. Through years of thoughtful and strategic capital investing, we are expanding and improving our facilities-based wireless network to meet the evolving needs of our customers. The introduction of Shaw Mobile, a new wireless service that leverages our LTE and Fibre+ networks, along with Canada's largest WiFi service, is the latest example of the innovation and affordability that our Wireless business brings to market. Through the flexible design of Shaw Mobile, we expect to further deepen our relationship with existing Wireline customers as we continue to scale our Wireless business.

Seasonality in Wireless Subscriber Activity

Wireless subscriber activity is influenced by the launch of popular new mobile devices, seasonal promotional periods, and the level of competitive intensity. Our first and fourth quarters typically experience higher volumes of wireless competitive activity as a result of back to school and holiday season-related consumer behaviour. Aggressive promotional offers are often advertised during these periods which can impact our Wireless subscriber metrics. Shaw's Wireless business does not depend on any single customer or concentration of customers.

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. Refer to "New Accounting Standards" for additional details on the changes for fiscal 2020 as well as discussions under "Results of Operations" and "Segmented Operations Review."

(2) Adjusted EBITDA is a non-GAAP measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about this measure, including how we calculate it.

In our Wireline business, we have cemented our status as a technology leader with our Fibre+ network and BlueCurve and Smart suite products. Through our digital transformation, we have made it easier to interact with our customers and are leveraging insights from customer data to better understand their preferences so we can provide them with the services they want. We are shifting customer interactions to digital platforms and driving more self-help, self-install and self-service. In the fourth quarter of fiscal 2020, up to 79% of our customers were electing to self-install their services. We continue to streamline and simplify manual processes that improve the customer experience and day-to-day operations for our employees.

Despite the unprecedented impact that the COVID-19 pandemic had on the lives of our customers this past year, and the corresponding impacts to the way we serve our customers, our focus remains on the execution and delivery of stable and profitable Wireline results. This includes growth in higher quality Internet subscribers and improving overall customer account profitability by attracting and retaining higher value households with our best value proposition on 2-year ValuePlans for those who want faster Internet with a better customer experience in addition to Video and Wireless services. Through our introduction of Shaw Mobile, we expect to further deepen our relationship with existing Wireline customers with our bundled offering to Internet customers as we continue to scale our Wireless business.

Consumer Services

Shaw is one of the largest providers of residential communications services in Canada. Our Consumer division provides residential customers with leading connectivity experiences on two platforms:

- **Wireline Services** – we provide broadband Internet, Shaw Go WiFi, Video, and Phone services to customers that are connected to our local and regional Fibre+ network in British Columbia, Alberta, Saskatchewan, Manitoba, and northern Ontario
- **Satellite Services** – we provide satellite Video services through Shaw Direct to customers across Canada

Wireline Internet, Video, and Phone Services

As our customers' needs evolve, we continue to focus on innovative value-added service offerings. Our customer-centric strategy is designed to deliver quality service experiences, value, and choice for our customers.

Internet

As a leading Canadian connectivity company, we believe that the Internet plays a fundamental role in connecting our customers to the world and everything in it. We recognize the importance of providing reliable, affordable, and worry-free connectivity to meet the ever-increasing appetite of our customers for discovery, social connectivity, and streaming. With our continued commitment to making strategic investments in our powerful Shaw Fibre+ network, not only did we meet the unprecedented demands for Internet access from our customers in fiscal 2020, but we also introduced new services that align with our strategic focus on profitable growth and stability.

In fiscal 2020, we continued to deploy our BlueCurve Gateway modem, powered by Comcast, which enables faster Internet speeds, supports more devices, and provides a stronger in-home WiFi connection. For our customers with harder to reach areas in their homes, BlueCurve Pods create a mesh WiFi network to improve the overall customer experience. BlueCurve Pods can easily be self-installed through the BlueCurve Home app, plugged directly into indoor electrical outlets, and can be moved around to suit each customer's distinct coverage needs. Building on our network advantage and the success of our Internet offerings, in May 2020 we introduced a new portfolio of Internet plans with two new higher speeds: the 750 Mbps tier and our Shaw Fibre+ Gig tier, which offers up to gigabit download speeds to 99% of our residential customers located in our western Canadian Wireline operating footprint. Recently, we more than tripled upload speeds for our three highest speed tiers.

Leveraging our strategic partnership with Comcast, we continued to roll out an advanced series of technologies catered to serve an increasingly connected Canadian population. This includes feature enhancements to the BlueCurve Home app which provides our customers a simple way to control their Internet and WiFi experience, including on-boarding as a new customer, adding new devices to the network, managing device and user access, and monitoring usage. Enhancements to the BlueCurve Home app include a WiFi downtime scheduler, a new self-help section with links to chat for additional support, and integration with our BlueCurve TV experience by enabling WiFi password retrieval through the voice remote and display on-screen.

In May 2020, Shaw also introduced an enhanced Internet network security service that protects our customers' devices against cyber threats. This service brings together our new Advanced Network security feature (accessed through the BlueCurve Home app) designed to protect all devices in the home at the network layer, including game consoles, cameras, and any "smart" product, with McAfee Multi-Access Network Security, which provides an additional layer of end-point cyber protection for up to 10 of our customers' devices while at home and on the go.

In addition to our reliable Internet service enhanced by our BlueCurve experience, a key differentiator for our customers continues to be the access they receive to our carrier-grade Shaw Go WiFi network. With over 3.7 million devices authenticated on our network and over 117,000 public access points covering locations from British Columbia to Ontario, we continue to see growth in usage of our Shaw Go WiFi network for Shaw Internet and Freedom Mobile customers, and now Shaw Mobile customers. As an added value proposition, Wireless customers have access to over 350,000 additional "hotspots" by way of our home hotspot deployment.

In late July 2020, Shaw Mobile was launched in western Canada, bringing together Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, to provide Shaw Internet customers with unprecedented savings on wireless plans when they bundle with Internet service. With the best of WiFi connectivity at home and the wide availability of Shaw Fibre+ powered WiFi hotspots, Shaw Mobile customers can reduce their monthly wireless data costs even further by connecting more often to WiFi.

In fiscal 2020, we continued the focus on our 2-year ValuePlans, which provide customers with price certainty over the term and have resulted in lower churn rates on those plans. This approach, combined with the strength of our Fibre+ network, our focus on improving execution, and providing additional bundle value when adding Shaw Mobile, is resulting in higher value household accounts with improved overall customer account profitability.

Video

Our Wireline Video services continue to offer a wide selection of standard definition (SD) and high definition (HD) television channels with access to one of western Canada's largest selection of on-demand titles, including access to both free and paid movies, television shows, and music content.

Our Video customers can choose pre-selected packages with the most popular channels or start with a basic primary package and then add additional channels from a variety of sports, family, and other theme specialty packages, as well as individual channels offered on a channel-by-channel basis.

Leveraging our strategic partnership with Comcast, we continued to deploy our flagship all-IP Video services, which is available across 80% of our western Canadian Wireline operating footprint. In November 2019, we added Amazon Prime to the list of apps integrated into the BlueCurve platform, joining Netflix, YouTube, and Crave. With the launch of BlueCurve Total TV in the same month – a new package that has pre-selected all of our most popular channels and content – customers will have the best of TV and over-the-top (OTT) streaming content in one place and accessible with a single voice command. We also simplified the ability to add channels to a customer's subscription through a "click to add" option directly on the screen.

Our customers also have access to the BlueCurve TV app, which is free for all Shaw Video (Cable and Shaw Direct) customers and makes their TV subscription available over the Internet and on mobile devices. This includes access to live TV, video-on-demand, up to 200 hours of a customer's personal video recordings (PVR) from the cloud, and the ability to download any recordings to take on the go.

Phone

Our Phone service offers a full-featured residential digital telephone service through our wireline network as a complement to our broadband Internet and Video services.

Broadcast Services

Shaw Broadcast Services utilizes our satellite network to manage one of North America's largest full-service commercial signal distribution networks. Shaw Broadcast Services currently provides distribution of English, French, third-language, Canadian, US, and International television and radio programming services to hundreds of multichannel operators.

As we continue to improve overall efficiency and provide a seamless connectivity experience to our customers, the Company announced that commencing in fiscal 2020, the Wholesale Wireline Network Services and Broadcast Services will be reported as part of the Consumer division (previously reported under the Shaw Business division).

Satellite Services

Shaw Direct connects families across Canada with Video and audio programming by satellite. Shaw Direct customers have access to over 370 digital video channels (including over 350 HD channels) and thousands of on-demand, pay-per-view (PPV) and subscription movie and television titles. In May 2020 we completed network upgrades which allow us to provide all available English and French services in HD – the first Canadian satellite provider to do so.

Our satellite customers receive choice with each of our current primary TV packages, which include a base set of channels and tiered customization options depending on the size of the TV package. Shaw Direct customers can further customize their TV packages by adding additional theme packs, premium packages, and individual channels.

Shaw Direct is one of two licensed satellite Video services currently available across Canada. While Shaw Direct has many customers in urban centres, market penetration for satellite Video is generally stronger in rural areas. The service is marketed through Shaw Direct and a nation-wide distribution network of third party retailers.

We are committed to securing and delivering leading technology for our customers. Currently, we have access to three satellites that enable us to enhance our offerings with nearly all HD programming and improved service quality. One of our satellites, Anik F1R, is currently being decommissioned as it approaches the end of its life. Decommissioning activities will continue through August 2021 and the Company expects to replace Anik F1R satellite capacity through further service consolidation on Anik G1 as well as the introduction of new leased satellite capacity on Anik F3 in fiscal 2021.

A listing of our satellite capacity is provided below as at August 31, 2020.

Shaw Satellite Transponders

Transponders	Interest	Nature of Satellite
Anik G1	16 xKu-band	Leased
Anik F2 [(1)]	22 Ku-band	Leased[(2)]
Anik F1R [(3)]	6 Ku-band[(2)] 1 C-band	Leased Leased

(1) On September 15, 2017, the Company sold a group of assets comprising the operations of Shaw Tracking, a fleet tracking operation, to Omnitracs Canada. As part of the transaction, the leases to access the Anik F2 2 Ku-band (partial) and the Intelsat Galaxy 16 1 Ku-band (partial) were assigned to Omnitracs Canada.

(2) Effective October 1, 2019, the Company transferred its interest in 16 Anik F2 transponders, which it previously owned, back to Telesat Canada ("Telesat"), adjusted its satellite traffic on the Anik F1R and Anik F2 satellites, and renewed its capacity service agreements on 6 Anik F1R Ku-band transponders and 16 Anik F2 Ku-band transponders until the effective end-of-life date of such satellites.

(3) Anik F1R is undergoing decommissioning activities through August 2021 and the Company expects to replace Anik F1R's satellite capacity through further service consolidation and the introduction of new leased satellite capacity on Anik F3 in fiscal 2021.

Seasonality in Consumer Subscriber Activity

While financial results for the Consumer division are generally not subject to significant seasonal fluctuations, subscriber activity may fluctuate from one quarter to another. Subscriber activity may also be affected by competition and Shaw's promotional activity. Further, satellite subscriber activity is modestly higher around the summertime when more subscribers have second homes in use. Our Consumer Video business does not depend on any single customer or concentration of customers.

As a result of the impact of the COVID-19 pandemic, in the second half of fiscal 2020, the Consumer division experienced a reduction in overall subscriber activity and increase of approximately 50% in wireline network usage as well as extended peak hours.

PUBLIC 11634

BUSINESS

Business Services

Shaw Business provides connectivity solutions to business customers of all sizes, from home offices to medium and large-scale enterprises, by leveraging our business grade Fibre+ and fibre-to-the-premise (FTTP) networks.

The range of services offered by Shaw Business includes:

Fibre Internet

Our scalable, symmetrical fibre Internet solutions offer download speeds that range from up to 10 Mbps to more than 10 Gbps.

Business Internet

Shaw Business customers can choose from four packages with download speeds ranging from up to 75 Mbps to 1 Gbps. Each package comes with unlimited data usage as well as one dynamic and one static IP address.

In fiscal 2020, Shaw Business launched LTE Backup on January 20, 2020 – a simple, $25 per month, add-on service for Business Internet and SmartWiFi customers that auto-connects, via LTE networks, to the critical systems and applications that our customers want to keep online during an outage (and when the outage is over, everything switches back to the customer's primary Internet connection).

In the first quarter of fiscal 2021, we began increasing upload speeds for certain Business Internet packages. We also upgraded our 600 Mbps plan to 750 Mbps and introduced a new speed tier – up to 300 Mbps download by up to 125 Mbps upload.

Data Connectivity

Shaw Business provides secure private connectivity for business customers operating at multiple locations or connecting branch locations to a head office. Our enhanced data service, Ethernet over DOCSIS (EoD), offers symmetrical data speeds of up to 100 Mbps.

Voice Solutions

Shaw Business offers a range of voice solutions from traditional analog to digital Business Phone and robust, fully-managed voice systems with unified communications functionality.

In addition to competitive long-distance rates across the globe and month-to-month uncontracted rates, Shaw Business Phone customers have 2, 3, and 5-year contract options to provide cost consistency for their business.

Video

Shaw Business provides Video and audio services for public viewing. Similar to our Consumer Video service, Business cable and satellite customers can choose from a selection of primary channel packages and may add from a variety of sports, family, and other theme specialty packages, and a number of individual channels that we offer on a channel-by-channel basis.

In August 2019, Shaw Business launched a Video Casting solution for hospitality customers, providing their guests the ability to securely and seamlessly cast video content from their personal devices to a guest room television. This property management solution streamlines the guest authentication experience and enables hoteliers to monetize their WiFi solution.

In February 2020, Shaw Business launched new Video packaging that provides enhanced choice and flexibility for its hospitality customers, giving guests an improved Video experience during their stay.

Broadcast Video

Shaw Business delivers high-quality Video to service providers across North America in real time.

Collaboration Tools

To build out a more robust collaboration offering, on June 25, 2020 Shaw Business launched Microsoft 365 – our first software as a service product – to small and medium sized businesses. The solution includes Microsoft 365 Business Basic and Business Standard products intended to help Shaw business customers boost productivity and collaborate seamlessly.

Smart Suite Services

Shaw Business has positioned itself as a trusted business advisor by taking care of all aspects of its customers' increasingly complex always-on connectivity requirements so they can focus on growing their businesses. As part of this strategy, Shaw collaborates with global scale technology leaders to offer its "Smart" suite of easy-to-use and flexible managed business communications solutions. The Smart suite of services provides cost-effective enterprise grade managed IT and communications solutions that are increasingly valued by businesses of all sizes as the digital economy grows in scope and complexity.

The Smart suite of services includes:

SmartVoice

SmartVoice is a unified communications solution that integrates instant messaging, presence, email, video conferencing, and a mobile application that is built on Broadsoft's BroadWorks platform. From comprehensive traditional phone features such as auto-attendant, hunt groups, and call recording to collaboration tools such as instant messenger and screen sharing, SmartVoice gives businesses the flexibility to work in a modern way.

SmartVoice offers three different levels of packaging based on business needs and is available on 2, 3, or 5-year contract terms.

SmartWiFi

SmartWiFi is a fully-managed Internet solution deployed over Cisco Meraki's platform that enables seamless and secure wireless connectivity for employees, customers, and guests in the office. SmartWiFi also enables access to a cloud portal where customers can easily manage their service, configure their set service identifiers (SSIDs) to gain insight from network analytics, and create a custom dashboard.

Available at download speeds of up to 75 Mbps, 300 Mbps, 750 Mbps, and 1 Gbps, and including wireless access points, SmartWiFi provides our Shaw Business customers with exceptional WiFi coverage on 1, 2, 3, or 5-year contract terms.

In the first quarter of fiscal 2021, we began increasing upload speeds for certain SmartWiFi packages. We also upgraded our 600 Mbps plan to up to 750 Mbps, and introduced a new speed tier – up to 300 Mbps download by up to 125 Mbps upload.

Smart Remote Office

Launched on August 11, 2020 as a timely response to the COVID-19 pandemic that forced many Canadians to work from home, this new product allows business customers' employees to securely connect to the head office from anywhere. Smart Remote Office is a plug-and-play, no-touch provisioning solution that provides security and virtual private network (VPN) tunneling for employees working remotely.

SmartSecurity

SmartSecurity is a fully-managed network security platform deployed over Cisco Meraki's platform that protects a wired and WiFi network at the edge with access control, virus protection, the ability to control which applications run on the network, content filtering, and the connection of branch locations. A SmartSecurity premium package also includes the ability to set-up a secure VPN.

Shaw Business also offers LTE Backup, an add-on service for SmartSecurity which provides redundancy through a secondary Internet connection that ensures seamless and automatic failover in case of an outage.

SmartSecurity is available when bundled with SmartWiFi or Business Internet on 3 or 5-year contract terms.

SmartSurveillance

SmartSurveillance is a fully-managed, enterprise-grade security camera solution deployed over Cisco Meraki's platform. Managed through a cloud-portal, SmartSurveillance enables business owners to view footage and manage their cameras from anywhere using an intuitive on-line dashboard.

Sophisticated features, such as motion-based search and heat mapping, allow owners to quickly find footage of interest and identify activity patterns. SmartSurveillance can be bundled with SmartWiFi or Business Internet 75 and above on a 3 or 5-year contract term.

SmartTarget

On September 21, 2020, Shaw Business launched SmartTarget, an all-in-one marketing and advanced insights solution that leverages the power of SmartWiFi and a new technology to give business owners a better understanding of their customers' wants and needs to help increase traffic at their physical locations, boost revenue, and build relationships with their customers.

With SmartTarget available as an add-on service to Shaw's SmartWiFi, business owners can get customer demographic insights when visitors join the business owner's guest WiFi network. Once their visitors/customers have opted-in, business owners can use the SmartTarget solution to create targeted emails, surveys, and coupons to help increase customer loyalty, build relationships, and boost store revenues.

Software Defined Wide Area Network (SD-WAN)

SD-WAN provides businesses with a better way to connect multiple offices in a scalable and cost-effective manner on a cloud-managed platform. With integrated security, multiple Internet links, seamless LTE failover, and intelligent path control, SD-WAN enables companies to deploy a resilient, cost-effective, and high-bandwidth connectivity solution.

Powered in partnership with Cisco Meraki, SD-WAN sites are connected by Internet links secured by our SmartSecurity service which provides network protection and cloud-based security policy updates to protect businesses from the latest vulnerabilities and network threats.

Session Initiation Protocol (SIP) Trunking

Our next-generation SIP Trunking solution, on the Broadsoft platform, delivers a centralized voice solution managed in an easy-to-use cloud portal. SIP allows customers to pay only for what they need with the ability to scale the system quickly as their businesses grow.

The integration with Broadsoft's platform provides businesses with access to unified communications features such as video conferencing, call queuing, and auto-attendant as well as the ability to join offices with SmartVoice and SIP into the same environment to reduce costs and increase efficiency.

Wholesale Wireline Network Services

Using our national and regional access wireline networks, we provide services to Internet service providers (ISPs), other communications companies, broadcasters, governments, and other businesses and organizations that require end-to-end Internet and data connectivity in Canada and the United States. We also engage in public and private peering arrangements with high speed connections to major North American, European, and Asian networks and other tier-one backbone carriers. All service solutions are sold on 1, 3, or 5-year contract terms and pricing is negotiated based on the specific solution provided to the customer.

Business Subscriber Activity

Beginning in the second half of fiscal 2020, the COVID-19 pandemic, as well as the commodity price challenges in western Canada, impacted the Business division by causing the suspension or cancellation of a number of Business customer accounts and slowing revenue growth.

Prior to the pandemic, the Business division was on track to deliver another solid year of revenue growth. Despite the difficult market circumstances and the fact that 70% of Business revenue comes from the highly impacted small to medium sized business sector, Shaw Business still managed to achieve year-over-year revenue growth of approximately 2%.

In order to continue to meet the evolving needs of our customers, we are executing our plan to ensure that our Fibre+ wireline network keeps pace with our customers' expectations for bandwidth, speed, and reliability. See "Shaw's Wireline Network" for a description of our wireline network and the advances that we are undertaking.

Our World-Class Converged Network

The severity and duration of impacts related to the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people (most of whom continue to work from home), connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. Throughout this challenging and unprecedented time, we are proud of the strength of our facilities-based networks, which are not just the core of our digital infrastructure – they are the backbone of our social and economic wellbeing. We have invested billions on building and improving our network and services and the benefits of these investments have never been more critical for Canadians during this crisis.

Shaw's Wireline Network

At Shaw, we are proud of our advanced Fibre+ network, which combines the power of fibre, coax, and WiFi and consists of our:

- North American fibre backbone;
- regional fibre optic and co-axial distribution networks; and
- local Shaw Go WiFi connectivity.

This fiscal year, Shaw's Fibre+ network demonstrated its strength with the launch of our Fibre+ Gig speed tier to over 99% of our western Canadian Wireline operating footprint, while expanding the availability of our 1 Gbps download/125 Mbps upload speed tier (currently the fastest broadly available upload speed tier of any North American cable operator) to all businesses in our major markets. Both of these upgrades were enabled by the deployment of DOCSIS 3.1 and Shaw's industry leading Mid-Split program, which significantly expands usable spectrum on the coaxial "last-mile" of Shaw's Fibre+ network.

The challenges and disruptions associated with the COVID-19 pandemic caused an increase of approximately 50% in wireline network usage as well as extended peak hours. Despite the unprecedented increase in network demands, Shaw was able to maintain our virtually congestion free Internet experience, regardless of the time of day. The investments in our network infrastructure, and our Mid-Split upgrade in particular, allowed Shaw to quickly and seamlessly activate additional capacity. The design and highly resilient nature of Shaw's metro and backbone networks also ensured our services remained stable during this time. Ultimately, the COVID-19 pandemic has highlighted the importance and critical nature of advanced facilities-based broadband networks and demonstrated the strength of Shaw's network infrastructure and our technology roadmap. The strength and performance of our Fibre+ network was further recognized when Ookla named Shaw the fastest and most consistent Internet provider in western Canada. Across British Columbia, Alberta, Manitoba, and Saskatchewan, Shaw's Fibre+ network was reported as the fastest.

Wireline Backbone

The backbone of Shaw's wireline network includes terabits of capacity over multiple fibres on two diverse cross-North America routes. The southern route principally consists of approximately 7,000 route kilometres of fibre located on routes between Seattle and New York City (via Vancouver, Calgary, Regina, Winnipeg, Toronto, Chicago, and Buffalo). The northern route consists of approximately 5,000 route kilometres of fibre between Prince George and Montreal (via Edmonton, Saskatoon, Winnipeg, Thunder Bay, Toronto, and Ottawa). Current fibre construction to extend our northern route from Prince George to North Vancouver is underway in collaboration with the federal government's Connect to Innovate and Connecting British Columbia programs. A third secured capacity backbone route for advanced redundancy is located from Vancouver to Edmonton to Calgary and Calgary to Toronto through Dallas and New York. These routes, along with a number of other secured capacity routes, provide redundancy for the network. Shaw also uses a marine route consisting of approximately 330 route kilometres from Seattle to Vancouver (via Victoria), and has secured additional capacity on routes between a number of cities, including (i) Vancouver and Calgary, (ii) Seattle and San Jose, (iii) Seattle and Calgary, (iv) Seattle and Vancouver, (v) Toronto and New York City, (vi) Toronto and Montreal, (vii) Edmonton and Fort McMurray, and (viii) Denver and Calgary.

During fiscal 2020, Shaw rapidly increased the capacity on numerous backbone links to stay ahead of COVID-19 related growth in traffic.

Regional Distribution Network

We connect our backbone network to residential and business customers through our extensive regional fibre optic and Fibre+ distribution networks.

Over the past decade, Shaw has driven fibre optic cable into every neighborhood we serve. Today, our customers' Internet traffic runs over a route comprising over 99.9% fibre optic cable. In the last few hundred metres between our fibre nodes in customers' neighborhoods and the home or business we serve, we leverage our highly robust and future proof coaxial cable to deliver our fastest speeds to over 99% of our residential customers located in our western Canadian Wireline operating footprint. This fiscal year, we officially rebranded our broadband tiers to "Fibre+" to reflect the true nature of our network and to better articulate the strength of our access network technology and strategy.

In fiscal 2020, we continued to leverage our DOCSIS 3.1 technology and advanced BlueCurve Gateway modem to launch our Fibre+ Gig speed tier to over 99% of homes across our western Canadian Wireline operating footprint. To expand the capacity of our Fibre+ network we are continually increasing the spectrum usable on our cable plant, which enables increased upstream and downstream capacities. In fiscal 2020, we completed our industry leading Mid-Split program in our major markets. This upgrade has allowed us to significantly increase the upstream and downstream capacity available on our Fibre+ distribution network. Shaw was also able to quickly leverage this capacity during the COVID-19 pandemic to not only prevent network congestion, but to also launch our new Fibre+ Gig speed tier to virtually every home we serve. We expect that efficient spectrum expansion upgrades, such as our Mid-Split program and other future technologies, will continue to allow cable technology to achieve fibre equivalent performance.

Shaw continues to optimize the capacity and efficiency of our wireline network and has virtually eliminated network congestion by deploying fibre optic cable deeper into our access networks and closer to where our customers reside. We continue to increase the number of optical serving areas or "nodes" in the wireline network. This is a continuous process that we apply year-over-year to increase fibre optic usage in our wireline network. Driving fibre deeper into our network also supports wireless and business service deployments, as well as future services such as 5G, FTTP, or the newly released DOCSIS 4.0 specification, which are all potential building blocks for multi-gigabit symmetrical services over our existing infrastructure.

Additionally, Shaw continues to leverage our converged network to enable the rapid and flexible deployment of small cells in support of our wireless network and preparations for 5G, due to the ability of our Fibre+ network to transport both power and multi-gigabit data speeds on one cable.

Shaw Go WiFi

Shaw has created Canada's most extensive WiFi network, Shaw Go WiFi. Shaw Go WiFi broadens a Shaw Internet customer's broadband experience beyond the home as a valuable extension of our customer wireline network experience. Over 3.7 million devices have authenticated to our carrier-grade Shaw Go WiFi network and there are over 117,000 public access points used by our customers in coffee shops, restaurants, gyms, malls, public transit, and other public spaces covering locations from British Columbia to Ontario. In addition to these public access points, Wireless customers can seamlessly access more than 350,000 home hotspots across western Canada, making it easier to stream and download at a friend's or relative's home.

We have made several investments to further enhance the Shaw Go WiFi services. In fiscal 2020, we began offering download speeds of up to 100 Mbps, tuned the network to provide customers better performance at the edge of the coverage range, and simplified the login process.

Shaw's Wireless Network

Supporting our Wireless revenue growth are the significant investments in our wireless network and customer service capabilities. We are executing on our operating plan to improve our network and deploy spectrum in an efficient manner. Wireless network investments to improve the customer experience continue to be a priority in the areas in which we operate and serve customers.

Shaw partnered with NOKIA to roll-out our next generation LTE wireless network in our existing markets in Ontario, Alberta, and British Columbia. In fiscal 2020, we continued to deploy our Extended Range LTE network, which leverages our 700 MHz wireless spectrum, to provide customers with improved in-building coverage as well as extending coverage. At the end of fiscal 2020, the deployment of our 700 MHz spectrum was virtually complete in western Canada and approximately 70% complete nationwide, with the remaining deployment expected to continue throughout fiscal 2021. In fiscal 2020, Shaw started to deploy its 600 MHz spectrum, which is expected to continue throughout fiscal 2021.

In fiscal 2020, the Company continued to deploy small cell technologies (low powered wireless antennas and receivers with a range of 100m – 200m) designed to enhance coverage and performance in dense urban locations. As high-power towers keep the network signal strong across large distances, small cells suit more densely developed areas like city centres and popular venues by providing LTE/VoLTE quality speed, capacity, and coverage improvements in these high traffic areas. The deployment of small cell technology was further enhanced by the activation of additional macrosites and the recent upgrades to our Fibre+ network that provide the ability to power and backhaul network traffic. With the completion of the Mid-Split program in major markets in fiscal 2020, the additional capacity created can be leveraged to improve our wireless network, highlighting the synergies of Shaw's converged network strategy in building out its wireline and wireless networks.

Through years of thoughtful and strategic capital investing, we continue to expand and improve our facilities-based wireless network to meet the evolving needs of our customers and continue to fuel our wireless momentum. In fiscal 2020, our operational support systems were enhanced to streamline activation capabilities and provide proactive monitoring and assurance capabilities to assist our operational teams with awareness of potential service issues.

Shaw Mobile

On July 30, 2020, Shaw launched Shaw Mobile, a new wireless service in western Canada that leverages our LTE and Fibre+ networks, along with Canada's largest WiFi network, to provide Shaw Internet customers with an innovative wireless experience that can help reduce their monthly wireless data bill. To support the Shaw Mobile launch, all supporting network features were activated, new models of wireless handsets were certified, and new support services were activated. Our back-office systems were modernized to provide our frontline teams with a modern and intuitive interface to help streamline our internal processes. These upgraded systems also enable the Company to rely on cloud first technologies rather than traditional proprietary systems, which provide for enhanced and improved scaling, resiliency, and agility as we continue to grow Shaw Mobile's business.

Private LTE

Shaw is a leader in developing and delivering Private LTE technology solutions for Canada's mining and energy industries. Private LTE is a complete, standalone cellular network that is used exclusively by the end customer for their business operations. In fiscal 2020, Shaw, in collaboration with Teck Resources Limited ("Teck") and NOKIA, deployed Canada's first Private LTE network using commercial mobile spectrum at Teck's Elkview steelmaking coal mine located in the Elk Valley region of British Columbia. The wireless network deployment at Elkview will generate significant operational value for Teck, providing significantly greater coverage and connectivity. This network will carry many of Teck's current mission critical applications and is built to also enable future Internet-of-things (IoT) and 5G requirements.

Shaw continues to work with other industry partners to develop and deploy Private LTE networks.

Spectrum holdings

In April 2019, the Company successfully acquired 11 paired blocks of 20-year 600 MHz spectrum across its Wireless operating footprint, for a total purchase price of $492 million, or $0.78 per MHz-Pop. The spectrum licences secured through the 600 MHz spectrum auction include 30 MHz across each of British Columbia, Alberta, and southern Ontario as well as 20 MHz in eastern Ontario. This spectrum, and the incremental network investment to deploy the spectrum, is expected to materially improve our long-term Wireless customer experience and further enable our ability to offer converged network solutions.

In addition to the 600 MHz spectrum acquired in April 2019, our Wireless division currently holds 50 MHz of AWS spectrum, 10 MHz of 700 MHz spectrum and 20-40 MHz of 2500 MHz spectrum in the main service areas of southern Ontario, Alberta, and British Columbia. We also hold 20-60 MHz of AWS spectrum, 0-10 MHz of 700 MHz spectrum, and 0-30 MHz of 2500 MHz spectrum in other markets within southern Ontario, eastern Ontario, Alberta, and British Columbia.

As discussed below, Innovation, Science and Economic Development Canada's (ISED) 3500 MHz spectrum auction is scheduled for June 2021 with up to 200 MHz of spectrum available and a set aside of 50 MHz in most Tier 4 service areas. ISED has also undertaken a consultation regarding the policy framework for the 3800 MHz spectrum band that proposes to reallocate a sizeable portion of the C-band (3700-4200 MHz) for flexible use (i.e., fixed and mobile) services. For further detail see "Government Regulations and Regulatory Developments – Radiocommunication Act – Wireless Spectrum Licences."

The Company expects that its spectrum assets will continue to support anticipated growth in Wireless subscribers, as well as geographic expansion and scale opportunities in the provinces in which we operate.

Community Investment

Shaw's community investment activities continue to build brand awareness and affinity, deepen employee engagement, drive revenue, and advance government and investor relationships while having demonstrable impacts in our communities.

In fiscal 2020, Shaw's Community Investments were valued at over $40 million, supporting over 750 community organizations and 850,000 low income and vulnerable youth across the country. In the past year, our employees came together and contributed over $1.25 million and thousands of volunteer hours to hundreds of charities across the country through our employee giving programs.

Notably, the COVID-19 pandemic changed our world in profound and challenging ways, with major implications for how we gather, work, learn, travel, and connect. For the most vulnerable in our society, the pandemic had an immediate and profound impact.

In the early stages of the crisis, we took decisive action to launch the #ShawHelps initiative to help Canadians feel connected, safe, and engaged as they navigated through the unpredictable challenges brought on by the pandemic. These steps included:

- helping address the dramatic increase in food insecurity and social isolation with a $1 million donation to Community Food Centres Canada;
- opened Shaw Go WiFi across western Canada, giving access to the country's largest network of WiFi hotspots;
- provided two months of free Internet service to low-income families who are part of the Government of Canada's "Connecting Families" program;
- provided all Shaw Cable and Shaw Direct customers access to several TV channels at no additional cost;
- provided Freedom Mobile customers with a rate plan of 3GB of data or less with an extra 2GB of data for free;
- confirmed no data caps on our Internet plans and not limiting our customers' Internet data use;
- collaborated with core partners to create a K-12 virtual education platform available for all Canadians to assist families as their kids schooling moved remotely;
- provided devices and connectivity to support hundreds of students, families, seniors, marginalized Indigenous groups, and victims of domestic violence to help ensure they could continue to learn, stay connected, and access critical social services and support; and
- supported over 75 grassroots organizations in over 50 communities with relief and recovery grants.

Our signature sponsorship, the Shaw Charity Classic, has raised over $50 million for more than 200 charities supporting Alberta youth since 2013. While pandemic-related restrictions forced the event's cancellation in 2020, we recognized it had critical importance to the fundraising activities of local charities and were pleased to donate $1.15 million in fiscal 2020 to support the kids' charities that benefitted from the event.

In fiscal 2021, we will continue to evolve our community investment approach to better meet the needs of our stakeholders through continued cross-functional execution, operational integration, and modernization. By sharpening the focus of our large and grassroots charitable donations and doing more to integrate philanthropic activities with our marketing tactics, Shaw's community investments can continue to help elevate the Company's profile as a community leader committed to enabling a better future for Canadians.

Climate Change and Environmental Responsibility

Shaw is committed to delivering a seamless connectivity experience to Canadians in an environmentally responsible and sustainable manner. A key focus area for the Company involves efficiency and innovation, which includes:

- **Reducing Consumption** – we support efforts to reduce employee, customer, and enterprise consumption of:

  a) Energy – through the use of energy efficient technologies,

  b) Water – by reducing water consumption in Shaw owned buildings, and

  c) Paper – by continuing to promote e-bill and efficient printing behaviours amongst employees and customers to reduce paper use by shifting interactions to digital platforms as part of the Company's digital transformation.

- **Waste Reduction** – to reduce employee, customer, and enterprise waste we have implemented waste diversion and e-waste recycling programs and reduced single-use items in our marketing campaigns and packaging.

- **Reducing Carbon Emissions** – to reduce Shaw's carbon footprint through reduction (e.g., LED lighting, high-efficiency boilers, e-billing, reduced truck rolls due to increased consumer self-install of customer premises equipment (CPE)) and market-based instruments (e.g., renewable energy, offsets);

- **Engagement and Awareness** – to continuously drive employee, customer, and enterprise awareness of Shaw's environmental initiatives. Engaging employees in our journey – through the establishment of green teams, earth week, and waste reduction initiatives – to advance our goals of educating and sharing common beliefs and values around environmental sustainability.

The Company participated in the Society of Cable Telecommunications Engineers' (SCTE) Energy 2020 program, which set goals for reducing power consumption, energy costs, and grid dependency. Shaw contributed to these goals through initiatives such as optimizing network equipment sizing and controls, renegotiating power costs, and participating in demand response programs.

Shaw is also a signatory of the Canadian Energy Efficiency Voluntary Agreement (CEEVA) with respect to Set-Top Boxes (STBs) and Small Network Equipment (SNE). CEEVA aims to significantly reduce the total annual energy consumption used by STBs and SNEs in Canada, cutting the annual carbon emissions by over 100,000 tons – the equivalent of taking 44,000 cars off the road (i.e., subcompact cars driving 15,000 km per year).

Environmental and Social Governance

In fiscal 2020, we continued to make progress on our environmental, social, and governance (ESG) initiatives and expect to provide additional transparency and details in our forthcoming ESG report, which will include, among other things, the critical role it plays in shaping our strategy.

GOVERNMENT REGULATIONS AND REGULATORY DEVELOPMENTS

Substantially all of the Company's Canadian business activities are subject to regulations and policies established under various pieces of legislation, including the *Broadcasting Act* (Canada) ("*Broadcasting Act*"), the *Telecommunications Act* (Canada) ("*Telecommunications Act*"), the *Radiocommunication Act* (Canada) ("*Radiocommunication Act*"), and the *Copyright Act* (Canada) ("*Copyright Act*"). Broadcasting and telecommunications are generally administered by the Canadian Radio-television and Telecommunications Commission (CRTC or the "Commission") under the supervision of the Department of Canadian Heritage ("Canadian Heritage") and ISED, respectively. The allocation and use of wireless spectrum in Canada are governed by spectrum licences issued by, and radio authorization conditions set by, ISED pursuant to the *Radiocommunication Act*.

In June 2018, ISED and Canadian Heritage launched the Broadcasting and Telecommunications Legislative Review (BTLR), which also included a review of the *Radiocommunication Act*. The BTLR was conducted by a panel of external experts (the "Expert Panel") tasked with studying the legislation. On January 29, 2020, the Expert Panel issued its final report making recommendations to the Ministers of Innovation, Science and Industry and Canadian Heritage for modernizing Canada's *Broadcasting Act*, *Telecommunications Act*, and *Radiocommunication Act* (the "BTLR Final Report"), including certain recommendations for legislative and regulatory changes that could impact the business practices of the Company and/or result in new fees for the Company if implemented by the federal government (see "Potential Legislative Changes" in the *Broadcasting Act* and *Telecommunications Act* sections, below). Although the BTLR was initiated – and the Expert Panel was instituted – by the federal government, the Expert Panel was independent of the federal government and its recommendations may or may not be reflected in any legislative reform introduced by the federal government.

Limits on Non-Canadian Ownership and Control

Neither a holding company that has a subsidiary operating company licensed under the *Broadcasting Act*, nor any such licensee, may be controlled in fact by non-Canadians, the determination of which is a question of fact within the jurisdiction of the CRTC. Pursuant to the Direction to the CRTC (Ineligibility of Non-Canadians) (the "Direction"), non-Canadians are permitted to own and control, directly or indirectly, up to 33.3% of the voting shares and 33.3% of the votes of a holding company that has a subsidiary operating company licensed under the *Broadcasting Act*. In addition, up to 20% of the voting shares and 20% of the votes of a licensee may be owned and controlled, directly or indirectly, by non-Canadians. As well, the chief executive officer (CEO) and not less than 80% of the board of directors of the licensee must be resident Canadians. There are no restrictions on the number of non-voting shares that may be held by non-Canadians at either the holding company or licensee level. If a holding company of a licensee does not satisfy the requirement that 80% of its board of directors be resident Canadians, it must have a CRTC-approved Independent Programming Committee (IPC) in place to ensure that neither the holding company nor its directors exercise control or influence over the programming decisions of its subsidiary licensee. With CRTC approval, Shaw has implemented an IPC to comply with the Direction.

Similar restrictions apply to certain Canadian carriers pursuant to the *Telecommunications Act*, the *Radiocommunication Act* and associated regulations, except that there is no requirement that the CEO be a resident Canadian of a company operating pursuant to those Acts. Instead, the *Telecommunications Act*, the *Radiocommunication Act* and associated regulations require only that 80% of the voting shares of such entities be held by resident Canadians. The Canadian ownership requirements do not apply to wireline and wireless telecommunications carriers that have annual revenues from the provision of telecommunications services in Canada that represent less than 10% of the total annual revenues for the sector.

The Company's Articles contain measures to ensure the Company continues to comply with applicable Canadian ownership requirements and its ability to obtain, amend, or renew a license to carry on any business. Shaw must file a compliance report annually with the CRTC confirming that it is eligible to operate in Canada as a telecommunications common carrier.

Broadcasting Act

Pursuant to the *Broadcasting Act*, the CRTC is mandated to regulate and supervise all aspects of the broadcasting system in a flexible manner. The *Broadcasting Act* requires broadcast distribution undertakings (BDUs) to give priority to the carriage of Canadian services; to provide efficient delivery of programming services at affordable rates; to provide reasonable terms for the carriage, packaging and retailing of those programming services; and provides the option to operate a community channel. Under the *Broadcasting Act*, the Governor in Council (GiC) may issue broad policy directions of general application on matters with respect to the objectives of Canada's broadcasting policy and related regulatory policy.

The *Broadcasting Act* also sets out requirements for television broadcasters with respect to Canadian content. The Company's broadcasting distribution business and on-demand programming services depend on licences (or operate under an exemption order) granted and issued by the CRTC under the *Broadcasting Act*. Pursuant to CRTC regulations, the Company is required to contribute 5% of its cable and direct-to-home (DTH) BDUs' gross revenues to the production of Canadian programming.

Licensing and Ownership

In August 2018, the Commission renewed the Company's cable licences for a five-year term from September 1, 2018 to August 31, 2023. In November 2019, the Company's DTH and Satellite Relay Distribution Undertaking (SRDU) licences were each renewed for seven-year terms from December 1, 2019 to August 31, 2026.

In May 2017, the Company's video-on-demand licence was renewed for a five-year term from September 1, 2017 to August 31, 2022. In August 2019, the Company's terrestrial PPV and DTH PPV licences were renewed for five-year terms from September 1, 2019 to August 31, 2024.

New Media

The CRTC has issued a digital media exemption order requiring that Internet-based and mobile point-to-point broadcasting services not offer television programming on an exclusive or preferential basis in a manner that depends on subscription to a specific mobile or retail Internet service and not confer an undue preference or disadvantage. The CRTC has not imposed any levy on the revenue of exempt digital media undertakings to support Canadian new media content.

Potential Legislative Changes

Pursuant to the Ministerial mandate letters issued December 13, 2019, the Minister of Canadian Heritage and the Minister of Innovation, Science and Industry were directed to: "modernize the *Broadcasting Act* and *Telecommunications Act*, examining how best to support Canadian content in English and French […]"; and "introduce legislation by the end of 2020 that will take appropriate measures to ensure that all content providers, including internet giants, offer meaningful levels of Canadian content in their catalogues, contribute to the creation of Canadian content in both official languages, promote this content and make it easily accessible on their platforms."

Pursuant to the BTLR Final Report, issued on January 29, 2020, the Expert Panel recommended maintaining the existing 5% levy on the gross revenues of BDUs to support the production of Canadian content, while introducing an expanded regulatory regime, in which, among other things, new categories of online digital media offerings would become subject to regulatory obligations and Canadian contribution requirements. The Minister of Canadian Heritage previously indicated in July 2019 that the federal government intends to take appropriate measures swiftly, when it receives the BTLR Final Report, to ensure that "all players, including the Internet giants" offer meaningful levels of Canadian content, contribute to the creation of Canadian content, and promote Canadian content and make it easily accessible on platforms.

Any changes to the *Broadcasting Act* pursuant to the BTLR Final Report or Ministerial mandates could impact the business practices of the Company, or result in new fees payable by the Company's cable, DTH or digital media services; new competition in the provision of broadcasting distribution services; and/or negative impacts to the Company's financial results from broadcasting.

Other Potential New or Increased Fees

New fees could also be imposed pursuant to CRTC regulation, with or without legislative changes. The Commission indicated that in 2020-2021 it will consider whether to examine new mechanisms to support television news production. If the CRTC were to consider and implement support for television news production through increased access by broadcasters to subscription revenue, it would increase costs for the Company. Additionally, the Commission indicated that in 2021-2022 it will "examine options for the appropriate measures needed to ensure that all content providers on all platforms contribute to the creation of Canadian content in both official languages, that Canadian content is promoted and given appropriate prominence, and that it is easily accessible by Canadians." Implementation of new regulatory measures with the foregoing objectives could result in new fees payable by the Company's cable, DTH or digital media services; impact the business practices of the Company, including through new distribution and promotion requirements, with increased costs payable by the Company's cable, DTH, or digital media services; and/or negatively impact the Company's financial results from broadcasting.

Sections 21 and 49 of the CRTC's *Broadcasting Distribution Regulations* (the "BDU Regulations") currently state that a cable BDU must obtain the consent of an over-the-air (OTA) broadcaster in order to distribute its signal in a distant market. In the case of DTH BDUs, the BDU Regulations permit the distribution of local OTA television signals on a distant basis without consent within the province of origin, but the BDU Regulations state that DTH BDUs must obtain broadcaster consent to deliver an OTA television signal out-of-province unless the DTH BDU is required to carry the signal out-of-province on its basic service. There are questions as to the jurisdictional validity of sections 21 and 49 of the BDU Regulations, which are currently being considered by the CRTC pursuant to an application by Rogers Media Inc. (RMI), posted by the Commission on February 21, 2020, asking the Commission to enforce those sections. Based on the current language of sections 21 and 49 of the BDU Regulations and depending on the outcome of RMI's application, broadcasters may seek to limit distribution of distant signals or remuneration for their distribution by the Company, which could increase costs for the Company and limit its offerings to consumers (including pursuant to demands for signal take-down or program blackouts). In addition, any confirmation by the CRTC of the validity of television broadcast licensees' right of authorization regarding the retransmission of their signals in distant markets could lead to similar demands by non-Canadian broadcasters. Any such impacts or demands could significantly impact the Company's costs and negatively impact the Company's financial results.

Telecommunications Act

Under the *Telecommunications Act*, the CRTC is responsible for ensuring that Canadians in all regions of Canada have access to reliable and affordable high-quality telecommunication services. The CRTC has the authority to forbear from regulating one or more services or classes of services provided by a carrier if the CRTC finds that there is sufficient competition for those services to protect the interests of users. Retail Internet, home phone services and mobile wireless services have been forborne from price regulation. However, regulations do affect certain terms and conditions under which Shaw's retail services are provided. As described further below under "Third Party Internet Access," certain Shaw wholesale services are regulated.

Under the *Telecommunications Act*, the GiC may issue broad policy directions of general application to the CRTC with regard to the telecommunications policy directives set out in the *Telecommunications Act* (each a "Telecommunications Policy Direction"). As described below under "Government Policy Direction to CRTC Concerning Telecommunications," a recent Telecommunications Policy Direction was issued by the GiC with the intention of guiding the CRTC's decision-making on telecommunications matters, including in its recently completed review of mobile wireless services (see below under "CRTC Wireless Review").

The CRTC and ISED can also impose monetary penalties on companies that contravene the *Telecommunications Act*, the *Radiocommunication Act*, and the regulations and rules promulgated thereunder.

ISED is responsible for the allocation, issuance and management of radio spectrum pursuant to the *Radiocommunication Act*. As well, the technical operating aspects of the Company's businesses are regulated by technical requirements and performance standards established by ISED, primarily under the *Telecommunications Act* and the *Radiocommunication Act*.

Potential Legislative Changes

The Minister of Canadian Heritage and the Minister of Innovation, Science and Industry were directed, pursuant to the Ministerial mandate letters issued December 13, 2019, to "modernize the *Broadcasting Act* and *Telecommunications Act*, examining how best to [...] ensure quality affordable internet, mobile and media access." The Minister of Innovation, Science and Industry was also directed to reduce mobile prices by 25% within two years, and failing that, to further expand mobile virtual network operators (MVNOs) in Canada and the CRTC's mandate on affordable pricing. In accordance with this mandate, on March 5, 2020, the Minister of Innovation, Science and Industry announced the expectation that the national carriers (Bell Canada, Rogers Communications Canada and TELUS Communications) reduce their prices for mid-range data plans (2-6 GB) by 25% over the next two years, and indicated that if "these targets are not met within two years, the Federal Government will take action with other regulatory tools to further increase competition and help reduce prices."

In the BTLR Final Report, issued on January 29, 2020, the Expert Panel made recommendations that may lead to increased regulatory oversight of retail and wholesale telecommunications services with an emphasis on affordable access to advanced networks. If adopted, the BTLR Panel's recommendations could result in new regulatory obligations applicable to the Company's Wireless or Wireline services.

Implementation of the foregoing Ministerial mandates (assuming that they remain applicable during the second session of the 43rd Parliament) whether or not in reliance upon the recommendations of the BTLR Final Report, could result in: the introduction of new regulatory measures that negatively impact the business practices of the Company and our ability to serve customers and related costs; and/or negative impacts on the Company's financial results and competitiveness in the wireless and wireline market.

Third Party Internet Access

Shaw is mandated by the CRTC to provide a wholesale high-speed access (HSA) service at regulated rates to independent ISPs ("Resellers"), who use the wholesale HSA services to provide their own retail Internet services to their end-users ("Third Party Internet Access" or "TPIA").

Telecom Order CRTC 2019-288

On August 15, 2019, the CRTC issued Telecom Order 2019-288 (the "Order"), which set Shaw's final wholesale HSA service rates. The final rates are significantly lower than the interim rates set in October 2016, and retroactive to January 31, 2017. The Order, if upheld or insufficiently varied, will significantly reduce the amount that the Company can charge for aggregated HSA services and negatively impact its broadband Wireline revenues and investments as well as its ability to compete with Resellers and other facilities-based HSA providers.

Shaw, jointly with Cogeco, Eastlink, Rogers and Videotron (the "Cable Carriers"), pursued all three routes of appeal of the Order permitted under the *Telecommunications Act*, each with a distinct focus:

- On September 13, 2019, the Cable Carriers filed a motion for leave to appeal the Order with the Federal Court of Appeal (FCA), as well as a motion to stay the Order, pending the final judgment on the appeal (if leave was granted). On November 22, 2019, the motion for leave to appeal the Order, as well as the motion to stay the Order pending final judgment on the appeal was granted. The Cable Carriers' appeal was heard by the FCA on June 25-26, 2020.
- On November 13, 2019, the Cable Carriers filed a Petition to federal Cabinet requesting that Cabinet order the CRTC to: (1) reconsider the Order in conjunction with a review of the regulatory framework for wholesale wireline services, while taking into account telecommunications policy objectives including the need to encourage innovation and investment in networks; and (2) vary the Order by cancelling the retroactivity.
- On December 13, 2019, the Cable Carriers filed an application with the CRTC to review and vary the rate-setting methodology and the resulting rates, as well as the requirement to make retroactive payments (the "R&V Proceeding"). The Cable Carriers also requested that the CRTC stay the Order in the event that the FCA stay of the Order is no longer in effect in advance of the CRTC's disposition of the R&V Proceeding.

On August 15, 2020, pursuant to the Petition to federal Cabinet, the GiC determined that the "final rates set by the decision do not, in all instances, appropriately balance the objectives of the wholesale services framework recognized in Order in Council P.C. 2016-332 of May 10, 2016 and that they will, in some instances, undermine investment in high-quality networks." However, the GiC determined that varying or referring the Order back to the CRTC for reconsideration "is premature pending a decision from the Commission with respect to the applications" in the R&V Proceeding. Instead, the GiC "will monitor the public proceeding in respect of the applications and await the Commission's decision."

On September 10, 2020, the FCA dismissed the Cable Carriers' appeal of the Order, which was based on questions of law and jurisdiction, with the effect that the FCA stay of the Order is no longer in effect.

On September 28, 2020, the CRTC granted a stay of the Order while the R&V Proceeding is underway and the Commission considers the Cable Carriers' application to review and vary the rates.

Any of the following developments could significantly reduce the amount that the Company can charge for aggregated HSA services and negatively impact the Company's broadband Wireline revenues and investments as well as its ability to compete with Resellers and other facilities-based HSA providers: a CRTC decision to maintain the final rates set by the Order, or any variance of the Order by the CRTC (most likely pursuant to the existing R&V Proceeding, or further direction from the GiC) that does not result in a material increase in the rates set by the Order.

Distinction between residential and business wholesale HSA services

On March 3, 2020, the Commission initiated a proceeding to examine wholesale HSA tariff provisions that differentiate between residential and business end-users. The Company's tariffs do not limit or restrict reselling to business end-users. If the Commission's decision goes beyond addressing existing tariff provisions that place restrictions on Resellers based on market segmentation, and mandates new wholesale access requirements applicable to the Company's Consumer or Business Internet services, the Company's broadband revenues and investments, as well as its ability to compete, could be negatively impacted.

Disaggregated Wholesale Services Framework

In 2015, the CRTC completed a review of the wholesale wireline policy framework, including TPIA, and: (i) extended mandated wholesale access services to include FTTP facilities; and (ii) initiated a shift to a new disaggregated wholesale HSA service model. On June 11, 2020, the Commission initiated a new proceeding to consider the appropriate network configuration for disaggregated wholesale HSA services across the country, and suspended the proceeding to set final rates, terms, and conditions for the disaggregated wholesale HSA services in Ontario and Quebec, which had previously been reviewed and approved by the CRTC in 2016. The disaggregated wholesale service configuration that is mandated by the Commission could require significant and costly modifications to the Company's broadband network architecture. The final mandated rates and the terms of disaggregated HSA services could negatively impact the Company's broadband revenues and investments as well as its ability to compete with Resellers and other facilities-based disaggregated HSA providers.

Review of the approach to rate setting for wholesale telecommunications services

On April 24, 2020, the Commission initiated a proceeding to review its approach to rate setting for wholesale telecommunications services. The methodology that is selected will impact the amount that the Company can charge for wholesale HSA service and, if the methodology fails to adequately compensate the Company for the costs associated with provisioning HSA services as well as a reasonable return on investment, it will negatively impact the Company's broadband Wireline revenues and investments and our ability to compete with Resellers and other facilities-based HSA providers. The chosen methodology could also potentially apply to wholesale wireless services, including mandated roaming and any service provisioned pursuant to any mandated MVNO regime imposed by the Commission in its review of mobile wireless services (see below under "CRTC Wireless Review"). The deadline for the submission of replies is currently scheduled for December 7, 2020.

CRTC Wireless Review

In March 2018, the CRTC declined to extend the mandated roaming regime to include public WiFi providers. The Commission subsequently undertook a consultation to investigate the availability and pricing of low cost data-only packages, including whether wireless carriers should be required to offer low-cost data-only packages. In December 2018, the CRTC determined that it would refrain from mandating specific low-cost data-only plans and instead opted to direct the three incumbent national wireless carriers to make available proposed low-cost plans and to keep those plans in the market at least until a decision is issued in its 2019-20 review of mobile wireless services.

In February 2019, the CRTC initiated its review of the regulatory framework for mobile wireless services and held a public hearing in February 2020. The Commission is reviewing competition in the retail market, including potential regulatory intervention, such as new retail policies and mandated low-cost data-only plans, and wholesale wireless regulation, including wholesale access for MVNOs.

The three incumbent national wireless carriers are required by CRTC regulation to provide domestic wholesale roaming services to Shaw and other facilities-based wireless competitors at regulated rates. In March 2018, the CRTC finalized the regulated rates for the mandated wholesale roaming service. As part of its Wireless Review, the CRTC sought comments on whether there is any need to make changes to the wholesale roaming policy, but the Notice of Consultation indicated that the CRTC would not be reviewing the regulated roaming rates.

At the outset of the proceeding, the Commission conveyed its preliminary view that it would be appropriate to mandate wholesale MVNO access to the networks of the national incumbents. Its Notice of Consultation included a series of questions regarding the possible eligibility requirements and other terms and conditions of a possible mandated MVNO regime. The Telecommunications Policy Direction to the CRTC regarding telecommunications, described below, applies to this proceeding. Final submissions were filed July 15, 2020, bringing the proceeding to a close. The CRTC's determinations in this proceeding could negatively impact the Company's financial results, growth prospects, and operational flexibility.

36-Month Device Financing

On August 2, 2019, following the introduction by the national incumbent wireless carriers of equipment installment plans (EIPs) ranging from 24- to 36-months, the Commission ordered all wireless service providers to cease offering EIPs longer than 24-months, and initiated a proceeding to examine whether 36-month EIPs are compliant with the Wireless Code. The proceeding closed in October 2019, and a decision is outstanding. If 36-month EIPs are permitted, it could impact our Wireless division's ability to gain market-share.

Government Policy Direction to CRTC Regarding Telecommunications

On June 16, 2019, the GiC published a finalized Policy Direction (following its publication of a proposed Policy Direction on March 9, 2019) that provides general guidance to the CRTC on all telecommunications regulatory measures, including those affecting Shaw's Consumer and Business Internet and Phone services, wholesale telecommunications services, and Shaw's Wireless services. The Telecommunications Policy Direction directs the CRTC to consider how measures can promote all forms of competition and investment, as well as affordability, consumer interests and innovation. The impact of the new Policy Direction will depend on how the CRTC interprets it in the context of specific matters and proceedings.

Retail Sales Practices

In June 2018, the GiC issued an order to the CRTC, directing it to investigate the retail sales practices used by Canada's large telecommunications carriers and report back to the GiC with its findings on the prevalence of such practices and how existing consumer protections could be expanded, or new protections developed, to ensure consumers are empowered and treated fairly by their service providers.

On February 20, 2019, the CRTC published its Report on Misleading or Aggressive Communications Retail Sales Practices and found that "a significant portion of Canadians are experiencing misleading or aggressive sales practices through all types of sales channels" in connection with their purchase of telecommunications and broadcasting services. While the Report did not result in new rules or regulatory obligations, the Report's findings, coupled with a planned Commission examination of activities undertaken in 2020-2021 to address those findings, could lead to new measures implemented in the context of current or future proceedings. The introduction of any such measures could negatively impact our ability to serve our customers, result in cost increases for the Company and negatively impact the Company's revenue.

Access for Wireline Network

For its wireline network Shaw requires access to support structures, such as poles, strand and conduits of telecommunication carriers and electric utilities, in order to deploy cable facilities. Under the *Telecommunications Act*, the CRTC has jurisdiction over support structures of telecommunication carriers, including rates for third party use. The CRTC's jurisdiction does not extend to electrical utility support structures, which are regulated by provincial utility authorities. Shaw's wireline network also requires access to construct facilities in roadways and other public places. Under the *Telecommunications Act*, Shaw may access such places with the consent of the municipality or other public authority having jurisdiction.

On December 10, 2019, the Commission initiated a review to examine "potential barriers and/or regulatory solutions to building new facilities or interconnecting to existing facilities in order to extend broadband-capable networks more efficiently into underserved areas […]." The Commission specifically requested comments on barriers such as access to affordable transport services and efficient use of support structures; how and to what extent these barriers are preventing carriers from extending transport networks and offering services in underserved regions; and proposals on potential regulatory measures to address the barriers. Due to delays caused by the COVID-19 pandemic, this proceeding is still ongoing. The introduction of regulatory requirements applicable to the provision of wholesale transport services in rural or remote areas could negatively impact the Company's financial results.

Radiocommunication Act

Our Wireless division holds licences for the use of radiofrequency spectrum required to operate its mobile wireless business. Those spectrum licences are administered by ISED under the *Radiocommunication Act*. Spectrum use is governed by conditions of license, including license term, transferability/divisibility, technical compliance requirements, lawful interception, research and development, and mandated antenna site sharing and domestic roaming services.

Any changes to the *Radiocommunications Act* pursuant to the BTLR (see "Government Regulations and Regulatory Developments") could impact the business practices of the Company and/or the processes governing its acquisition of new spectrum for purposes of building its wireless networks.

Wireless Spectrum Licences

The Company's AWS-1 spectrum licences were renewed in 2019 for a new 20-year term. The Company's AWS-3 spectrum licences were issued in April 2015 and have a term of 20 years. The 700 MHz and 2500 MHz spectrum licences that the Company purchased from Quebecor were initially issued in February 2014 and May 2015, respectively for a term of 20 years. The Company also holds other 2500 MHz licences, including those acquired at ISED's 2018 residual auction, which were issued for a 20-year term. The Company also acquired 600 MHz licences at ISED's 2019 auction, which were issued for a 20-year term.

The Company's licences come with conditions, including a variety of deployment conditions. In July 2019, ISED issued a decision in response to its consultation on a new set of smaller service areas for spectrum licensing ("Tier 5 Service Areas") to complement ISED's existing service areas. ISED has created Tier 5 Service Areas with the objective of encouraging additional access to spectrum within rural areas pursuant to its licensing process. Currently, none of the Company's licences are subject to Tier 5 deployment requirements, but future licences may incorporate a requirement for deployment in such new service areas.

In June 2019, ISED released its decision on revisions to the 3500 MHz (3450-3650 MHz) band, which enabled existing holders to retain a portion of their 3500 MHz spectrum to convert to mobile spectrum, with the remaining spectrum to be made available for auction. In March 2020, ISED released its policy and licensing framework (the "Framework") for the upcoming 3500 MHz (3450-3650 MHz) auction, following a public consultation process in 2019. The Framework adopted a spectrum set-aside for eligible entities, the amount of which differs by area depending on the amount of spectrum available for auction and whether the area includes a large population centre. The auction is scheduled to commence in June 2021.

In August 2020, ISED commenced a public consultation on proposed revisions to the 3800 MHz band (3650-4200 MHz). The consultation seeks comments on, among other things, whether and how the band should be repurposed to include mobile use and the treatment of existing users in the band.

Following a consultation in 2018, ISED released a decision allowing future mobile use in the millimetre wave bands, including 26 GHz, 28 GHz, and 38 GHz bands, as well as licence-exempt use in the 64-71 GHz bands. The details of the licensing framework for these bands will be the subject of a future proceeding.

Access for Wireless Network

Our Wireless division's operations depend on being able to locate and construct wireless antenna sites, which in some cases requires certain authorizations or approvals from municipalities, which vary from one municipality to another but are also subject to federal oversight. The process for such approvals can include a comprehensive consultation process related to local land use priorities and new antenna site design parameters.

The Wireless division also uses arrangements whereby it co-locates its antennae equipment on towers and/or sites owned and operated by third party tower and/or sites providers and the three national wireless incumbent carriers. Pursuant to the conditions of their spectrum licences and the CRTC's policy framework for wholesale wireless services, the three national wireless incumbent carriers must allow competitors, including Freedom Mobile and Shaw Mobile, to co-locate equipment at these locations. However, the application and approval process for the sharing of towers is lengthy, and the ISED and CRTC processes that are available to enforce the existing rules can also be challenging and time consuming. The CRTC's review of mobile wireless services included a focus on reducing barriers to infrastructure deployment and whether any further regulatory measures are required to reduce barriers to the deployment of wireless infrastructure.

Copyright Act

Canada's *Copyright Act* accords the creators and owners of content various rights to authorize or be remunerated for the use of their works and performances, including, in some instances, by broadcast distribution undertakings. In addition, the *Copyright Act* creates certain exceptions that permit the use of copyrighted works without the authorization or remuneration of rights holders.

New or Potential Legislative Changes

On December 17, 2018, Bill C-86, the Budget Implementation Act (BIA), received Royal Assent and contains several amendments to the *Copyright Act* which came into force on April 1, 2019. The amendments create the potential for increased fees as well as risk of copyright infringement. Changes to the *Copyright Act* introduced by the BIA include the elimination of the *Copyright Act's* mandatory tariff-setting regime for tariffs applicable to the public performance of works, providing performance rights collectives the option of negotiating payments on a user-by-user basis through direct licensing. A direct licensing approach, if undertaken by a collective to which Shaw remits tariff payments, could increase royalties as well as the transactional costs associated with clearing copyrights. The BIA also potentially increases risk of claims (and associated liability) in connection with unrepresented repertoire, by removing a provision that had prevented infringement proceedings by unrepresented rightsholders in situations where no tariff was filed. Finally, pursuant to the *Copyright Act*, the Copyright Board of Canada (the "Copyright Board") oversees the collective administration of copyright royalties in Canada, including the review and approval of copyright tariff royalties payable to copyright collectives by BDUs, television broadcasters and online content services. The Copyright Board may also make rulings on the interpretation of the *Copyright Act* in the course of issuing copyright tariff decisions.

The Minister of Canadian Heritage and the Minister of ISED were directed, pursuant to their mandate letters issued December 13, 2019, to work together in reviewing the *Copyright Act*. Any amendments to the *Copyright Act* that modify the terms and conditions applicable to the use of content, including new rights and/or the scope of flexibility pursuant to exceptions under the *Copyright Act*, could create increased fees and negatively impact the business practices of the Company, as well as the ability to serve our customers.

Potential for New or Increased Fees

In August 2017, the Copyright Board issued a decision interpreting the scope and meaning of the "making available" provision (section 2.4(1.1) of the *Copyright Act*). The Copyright Board determined that as a result of section 2.4(1.1), the mere making available of a work on a server for the purpose of later streaming or download by the public is an event for which a tariff was payable, expanding the scope of the performance right and the Society of Composers, Authors and Music Publishers of Canada's (SOCAN) entitlement to royalties. In September 2017, the Company, along with a number of other broadcasting and Internet companies, filed an application for judicial review, arguing that the Copyright Board's interpretation of the "making available" provision was erroneous. In June 2020, the FCA overturned the Copyright Board's interpretation. The deadline to file an application for leave to appeal to the Supreme Court of Canada (SCC) is November 12, 2020. If leave is sought and granted and the SCC restores the Copyright Board's interpretation, it could lead to new claims by rights holders in connection with Company technologies that facilitate downloading.

On December 18, 2018, the Copyright Board released a rate decision for the Distant Signal Retransmission Tariff for the past tariff period of 2014-2018, inclusive, which introduced a rate increase that applied retroactively, and established an interim tariff for 2019 based on the 2018 rate. Both the Copyright Collective of Canada (the "Collectives") and Objectors filed a Notice of Application for judicial review with the FCA on November 4, 2019. If the Collectives succeed in the judicial review, the Company could become subject to significantly increased royalty rates for the 2014-208 period, pursuant to either the FCA's decision in the judicial review or any redetermination of the rates by the Copyright Board.

Privacy and Anti-Spam Legislation

Privacy Legislation

The Personal Information Protection and Electronic Documents Act (Canada) (PIPEDA)

is Canada's federal privacy law regulating the collection, use, and disclosure of personal information in Canada by a federally regulated organization in the private sector. The Company has established a privacy policy and its internal privacy processes in accordance with PIPEDA.

The Company has implemented the necessary processes to comply with the PIPEDA provisions requiring mandatory reporting of serious privacy breaches, which came into effect on November 1, 2018. These provisions require companies to: (i) track all breaches of security safeguards that involve personal information under their control, and (ii) report to affected individuals and to the Office of the Privacy Commissioner of Canada (OPC) serious breaches of personal information that create a real risk of significant harm. Failure to report in accordance with these provisions could result in fines.

Consent Guidelines issued by the OPC came into effect on January 1, 2019. These guidelines set out principles for organizations to follow in order to obtain meaningful consent and require that organizations provide more interactive, easy-to-understand privacy disclosures to their users. The Company maintains internal practices and policies to facilitate compliance with these Consent Guidelines.

Global policy developments and heightened public attention on privacy issues have prompted reviews of privacy legislation and regulations in Canada. Any changes to privacy laws and regulations applicable to Shaw could require the Company to adjust its policies and practices in key areas including data anonymization, consent, and data portability.

Such changes could result in new costs payable by the Company, impede the Company's ability to provide services efficiently to its customers, and expose the Company to increased penalties and claims in connection with any non-compliance.

Canada's Anti-Spam Legislation (CASL)

CASL sets out a comprehensive regulatory regime regarding online commerce, including requirements to obtain consent prior to sending commercial electronic messages and installing computer programs. CASL is administered primarily by the CRTC, and non-compliance may result in fines of up to $10 million. The Company maintains internal practices and policies to facilitate compliance with CASL.

On June 5, 2020, the FCA dismissed an appeal filed by CompuFinder, in which the appellant challenged the constitutionality of CASL. In addition to upholding the constitutionality of CASL, the FCA provided guidance on the business to business relationship exemption as well as the conspicuous publication rules and the CASL requirements for a functional unsubscribe mechanism.

Environmental matters

Shaw's operations are subject to environmental regulations, including those related to electronic waste, printed paper and packaging. A number of provinces have enacted regulations providing for the diversion of certain types of electronic and other waste through product stewardship programs (PSP). Under a PSP, companies who supply designated products in or into a province are required to participate in or develop an approved program for the collection and recycling of designated materials and, in some cases, pay a per item fee. Such regulations have not had, and are not expected to have, a material effect on the Company's earnings or competitive position.

KEY PERFORMANCE DRIVERS

Shaw measures the success of its strategies using a number of key performance drivers which are outlined below, including a discussion as to their relevance, definitions, calculation methods and underlying assumptions.

Financial Measures

Revenue

Revenue is a measurement determined in accordance with International Financial Reporting Standards (IFRS). It represents the inflow of cash, receivables or other consideration arising from the sale of products and services. Revenue is net of items such as trade or volume discounts, agency commissions, and certain excise and sales taxes. It is the base on which free cash flow, a key performance driver, is determined; therefore, it measures the potential to deliver free cash flow as well as indicating growth in a competitive market place.

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures. These financial measures do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure requirements may also provide discussion and analysis of additional GAAP measures. Additional GAAP measures include line items, headings, and sub-totals included in financial statements. The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. These non-GAAP measures and additional GAAP measures have not been presented as an alternative to net income or any other measure of performance or liquidity prescribed by IFRS. The following contains a description of the Company's use of non-GAAP financial measures and additional GAAP measures and provides a reconciliation to the nearest IFRS measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation, and amortization ("adjusted EBITDA") (previously referred to as "Operating income before restructuring costs and amortization") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, equity income/loss of an associate or joint venture, amortization (a non-cash expense), taxes, and interest. Adjusted EBITDA is one measure used by the investing community to value the business.

Adjusted EBITDA has no directly comparable IFRS financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Year ended August 31,		
(millions of Canadian dollars)	2020 (1)	2019	Change %
Net Income	**688**	733	(6.1)
Add back (deduct):			
Restructuring costs	**14**	(9)	>(100.0)
Amortization:			
Deferred equipment revenue	**(16)**	(21)	(23.8)
Deferred equipment costs	**65**	85	(23.5)
Property, plant and equipment, intangibles and other	**1,168**	974	19.9
Amortization of financing costs – long-term debt	**3**	3	–
Interest expense	**274**	258	6.2
Equity income (loss) of an associate or joint venture	**–**	(46)	(100.0)
Loss on disposal of an associate or joint venture	**–**	109	(100.0)
Other gains (losses)	**16**	(50)	>(100.0)
Current income tax expense	**120**	114	5.3
Deferred income tax expense (recovery)	**59**	4	>100.0
Adjusted EBITDA	**2,391**	2,154	11.0

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

Adjusted EBITDA margin

Adjusted EBITDA margin (previously referred to as "Operating margin") is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business. Adjusted EBITDA margin has no directly comparable IFRS financial measure.

	Year ended August 31,		
	2020 (1)	2019	Change %
Wireline	**48.3%**	45.5%	6.2
Wireless	**28.9%**	19.0%	52.1
Combined Wireline and Wireless	**44.2%**	40.3%	9.7

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage. Refer to "Liquidity and Capital Resources" for further detail.

Net debt leverage ratio

The Company uses this ratio to determine its optimal leverage ratio. Refer to "Liquidity and Capital Resources" for further detail.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

In conjunction with the adoption of IFRS 16, we have amended our definition of free cash flow to remove the increase to adjusted EBITDA attributable to IFRS 16 to ensure a consistent focus on free cash flow generation.

Free cash flow consists of adjusted EBITDA, adding dividends from equity accounted associates, changes in receivable related balances with respect to Wireline customer equipment financing transactions as a cash item and deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities and payments relating to lease liabilities, dividends paid on the preferred shares, recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

	Year ended August 31,		
(millions of Canadian dollars)	**2020**	**2019**	**Change %**
Revenue			
Consumer	**3,683**	3,743	(1.6)
Business	**567**	557	1.8
Wireline	**4,250**	4,300	(1.2)
Service	**815**	694	17.4
Equipment	**351**	353	(0.6)
Wireless	**1,166**	1,047	11.4
	5,416	5,347	1.3
Intersegment eliminations	**(9)**	(7)	28.6
	5,407	5,340	1.3
Adjusted EBITDA (1)(3)			
Wireline	**2,054**	1,955	5.1
Wireless	**337**	199	69.3
	2,391	2,154	11.0
Capital expenditures and equipment costs (net): (2)			
Wireline	**815**	827	(1.5)
Wireless	**296**	385	(23.1)
	1,111	1,212	(8.3)
Free cash flow before the following	**1,280**	942	35.9
Less:			
Interest	**(223)**	(256)	(12.9)
Interest on lease liabilities (3)	**(44)**	–	>100.0
Cash taxes	**(148)**	(160)	(7.5)
Lease payments relating to lease liabilities (3)	**(112)**	–	>100.0
Other adjustments:			
Dividends from equity accounted associates	**–**	10	(100.0)
Non-cash share-based compensation	**2**	3	(33.3)
Pension adjustment	**1**	7	(85.7)
Customer equipment financing	**–**	1	(100.0)
Preferred share dividends	**(9)**	(9)	–
Free cash flow (1)	**747**	538	38.8

(1) Adjusted EBITDA and free cash flow are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures.
(2) Per Note 26 to the audited Consolidated Financial Statements.
(3) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

Statistical Measures

Subscriber counts (or Revenue Generating Units (RGUs))

The Company measures the count of its subscribers in its Consumer, Business, and Wireless divisions.

In the Consumer and Business divisions, Wireline Video subscribers include residential customers, multiple dwelling units (MDUs) and commercial customers. A residential subscriber who receives at a minimum, basic cable service, is counted as one subscriber. In the case of MDUs, such as apartment buildings, each tenant with a minimum of basic cable service is counted as one subscriber, regardless of whether invoiced individually or having services included in his or her rent. Each building site of a commercial customer (e.g., hospitals, hotels or retail franchises) that is receiving at a minimum, basic cable service, is counted as one subscriber. Video satellite subscribers are counted in the same manner as Wireline Video customers except that it also includes seasonal customers who have indicated their intention to reconnect within 180 days of disconnection.

Internet customers include all modems on billing and Phone includes all phone lines on billing. All subscriber counts exclude complimentary accounts but include promotional accounts.

Consumer and Business divisions' RGUs represent the number of products sold to customers and includes Video (cable and Satellite subscribers), Internet customers, and Phone lines. As at August 31, 2020 these combined divisions had approximately 5.3 million RGUs.

In the Wireless division, a recurring subscriber or RGU (e.g., cellular phone, smartphone, tablet, mobile Internet device) has access to the wireless network for voice and/or data communications, whether prepaid or postpaid. Prepaid subscribers include RGUs where the account is within 90 days of the prepaid credits expiring. As at August 31, 2020 the Wireless division had approximately 1.8 million RGUs.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred. Refer to "Segmented Operations Review" for postpaid churn details and description.

Postpaid churn increased 8-basis points in fiscal 2020 to 1.40% from 1.32% in fiscal 2019, reflecting the increased competitive environment experienced during the year.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is an industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding the allocation of the device subsidy attributable to service revenue under IFRS 15) plus the monthly re-payments of the outstanding device balance owing from customers on contract, divided by the average number of subscribers on the network during the period and is expressed as a rate per month. Refer to "Segmented Operations Review" for ABPU details and description.

In fiscal 2020, ABPU grew 5.9% to $44.13 compared to $41.67 in the prior year. ABPU growth reflects the increased number of customers that are subscribing to higher value service plans, partially offset by reduced roaming revenue due to less travel and roaming outside of the Company's wireless home network resulting from the impact of the COVID-19 pandemic.

Wireless average revenue per subscriber unit per month (ARPU)

Wireless ARPU is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity, but does not have a standardized meaning under IFRS. Refer to "Segmented Operations Review" for ARPU details and description.

In fiscal 2020, ARPU grew 2.7% to $38.95 compared to $37.92 in the prior year. ARPU growth reflects the increased number of Wireless customers subscribing to higher service plans, partially offset by lower roaming revenue in the last two quarters of the year due to less travel and roaming outside of the Company's wireless home network resulting from the impact of the COVID-19 pandemic.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company prepared its Consolidated Financial Statements in accordance with IFRS as issued by the International Accounting Standards Board (IASB). An understanding of the Company's accounting policies is necessary for a complete analysis of results, financial position, liquidity, and trends. Refer to Note 2 to the Consolidated Financial Statements for additional information on accounting policies. The following section discusses key estimates and assumptions that management has made under IFRS and how they affect the amounts reported in the Consolidated Financial Statements and accompanying notes. The following is a discussion of the Company's critical accounting policies.

Revenue and expense recognition

The identification of performance obligations within a contract and the timing of satisfaction of performance obligations under long-term contracts requires judgment. For bundled arrangements, we account for individual products and services when they are separately identifiable, and the customer can benefit from the product or service on its own or with other readily available resources. The Company has multiple deliverable arrangements consisting of upfront fees (subscriber connection fee revenue and/or customer premise equipment revenue) and related subscription revenue. The Company determined that the upfront fees charged to customers do not constitute separate performance obligations; therefore, these revenue streams are assessed as an integrated package.

Revenue is considered earned as services are performed, provided that at the time of performance, ultimate collection is reasonably assured. Such performance is regarded as having been achieved when reasonable assurance exists regarding the measurement of the consideration that will be derived from rendering the service. Revenue from Video, Internet, Phone, DTH, and Wireless customers includes subscriber revenue earned as services are provided. The revenue is considered earned as the period of service relating to the customer billing elapses. In addition to monthly service plans, the Company also offers multi-year service plans in which the total amount of the contractual service revenue is accounted for on a straight-line basis over the term of the plan.

When a customer can modify their contract within predefined terms such that we are not able to enforce the transaction price agreed to, but can only contractually enforce a lower amount, we allocate revenue between performance obligations using the minimum enforceable rights and obligations and any excess amount is recognized as revenue as its earned.

Subscriber connection fee revenue

Connection fees have no standalone value to the customer separate and independent of the Company providing additional subscription services, therefore the connection fee revenue must be deferred as contract liabilities and recognized systematically over the periods that the subscription services are earned. There is no specified term for which the customer will receive the related subscription service, therefore the Company has considered its customer churn rate and other factors, such as competition from new entrants, to determine the deferral period of three years for Wireline customers and two years for Wireless customers.

Subscriber connection and installation costs

The costs of physically connecting a new home are capitalized as part of the Company's distribution system as the service potential of the distribution system is enhanced by the ability to generate future subscriber revenue. Costs of disconnections are expensed as incurred as the activity does not generate future revenue.

Costs incurred to obtain or fulfill a contract

The incremental costs to obtain or fulfill a contract with a customer are deferred and amortized into operating expenses over their expected period of benefit to the extent they are recoverable. These costs include certain commissions paid to internal and external representatives that we expect to be recoverable. Determining the deferral criteria for these costs requires us to make significant judgments.

Customer premise equipment revenue and costs

Customer premise equipment available for sale, which generally includes DTH equipment, has no standalone value to the customer separate and independent of the Company providing additional subscription services. Therefore, the equipment revenue is deferred and recognized systematically over the periods that the subscription services are earned. As the equipment sales and the related subscription revenue are considered one transaction, recognition of the equipment revenue commences once the subscriber service is activated. There is no specified term for which the customer will receive the related subscription service, therefore the Company has considered various factors including customer churn, competition from new entrants, and technology changes to determine the deferral period of three years.

In conjunction with equipment revenue, the Company also incurs incremental direct costs which include equipment and related installation costs. These direct costs cannot be separated from the undelivered subscription service included in the multiple deliverable arrangement. Under IAS 2 "Inventories," these costs represent inventoriable costs and are deferred and amortized over the period of three years, consistent with the recognition of the related equipment revenue. The equipment and installation costs generally exceed the amounts received from customers on the sale of equipment (the equipment is sold to the customer at a subsidized price). The Company defers the entire cost of the equipment, including the subsidy portion, as it has determined that this excess cost will be recovered from future subscription revenues and that the investment by the customer in the equipment creates value through increased retention.

Shaw Business installation revenue and expenses

The Company also receives installation revenues in its Shaw Business operation on contracts with commercial customers which are deferred and recognized as revenue on a straight-line basis over the related service contract, generally spanning two to ten years. Direct and incremental costs associated with the service contract, in an amount not exceeding the upfront installation revenue, are deferred and recognized as an operating expense on a straight-line basis over the same period.

Wireless equipment revenue

Revenue for performance obligations satisfied at a point in time is recognized when control of the item or service transfers to the customer. Revenue from the direct sale of equipment to subscribers or dealers is recognized when the equipment is delivered and accepted by the subscribers or dealers.

For bundled arrangements (i.e., wireless handsets and voice and data services), items are accounted for as separate performance obligations if the item meets the definition of a distinct good or service. Stand-alone selling prices are determined using observable prices adjusted for market conditions and other factors, as appropriate. The Company offers a discretionary wireless handset discount program, whereby the subscriber earns the applicable discount by maintaining services with the Company, such that the receivable relating to the discount at inception of the transaction is reduced over a period of time. This discount is allocated proportionately between the equipment and service revenue, with the equipment discount recognized when the handset is delivered and the corresponding service discount is classified as a contract asset. The contract asset is reduced on a straight-line basis over the period which the discount is forgiven to a maximum of two years with an offsetting reduction to service revenue.

The Company also offers a plan allowing customers to receive a larger up-front handset discount than they would otherwise qualify for if they pay a predetermined incremental charge to their existing service plan on a monthly basis. The charge is billed on a monthly basis but is recognized as revenue when the handset is delivered and accepted by the subscriber. The amount receivable is classified as part of other current or non-current receivables, as applicable, in the Consolidated Statements of Financial Position.

Income statement classification

The Company distinguishes amortization of deferred equipment revenue and deferred equipment costs from the revenue and expenses recognized from ongoing service activities on its income statement. Equipment revenue and costs are deferred and recognized over the anticipated term of the related future revenue (i.e., the monthly service revenue) with the period of recognition spanning three to five years. As a result, the amortization of deferred equipment revenue and deferred equipment costs are non-cash items on the income statement, similar to the Company's amortization of deferred indefeasible right to use (IRU) revenue, which the Company also segregates from ongoing revenue. Further, within the lifecycle of a customer relationship, the customer generally purchases customer premise equipment at the commencement of the customer relationship, whereas the subscription revenue represents a continuous revenue stream throughout that customer relationship. Therefore, the segregated presentation provides a clearer distinction within the income statement between cash and non-cash activities and between up-front and continuous revenue streams, which assists financial statement readers to predict future cash flows from operations.

Allowance for doubtful accounts

A significant portion of the Company's revenues are earned from selling on credit to individual subscribers. Because there are some customers who do not pay their debts, selling on credit necessarily involves credit losses. The Company is required to make an estimate of an appropriate allowance for doubtful accounts on its receivables. In determining its estimate, the Company considers factors such as the number of days the account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances. The estimated allowance required is a matter of judgment and the actual loss eventually sustained may be more or less than the estimate, depending on events which have yet to occur and which cannot be foreseen, such as future business, personal and economic conditions. Conditions causing deterioration or improvement in the aging of accounts receivable and collections will increase or decrease bad debt expense.

Leases

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets.

In determining whether a contract contains a lease, the Company makes judgments in determining whether the contract involves the use of an identified asset, whether the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use, and whether the Company has the right to direct the use of the identified asset.

In determining the contract term, the Company makes judgments in determining the non-cancellable period of the lease and the impact to the term of any options in the contract including options to extend or terminate the lease and whether or not the Company is reasonably certain to exercise these options.

When determining the interest rate used for discounting future cash flows the Company uses the incremental borrowing rate unless the rate implicit in the lease is readily determinable. The determination of the incremental borrowing rate is derived from publicly available rates and adjusted for lease terms. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Property, plant and equipment and other intangibles – capitalization of direct labour and overhead

The cost of property, plant and equipment and other intangibles includes direct construction or development costs (such as materials and labour) and overhead costs directly attributable to the construction or development activity. The Company capitalizes direct labour and direct overhead incurred to construct new assets, upgrade existing assets and connect new subscribers. These costs are capitalized as they are directly attributable to the acquisition, construction, development or betterment of the networks or other intangibles. Repairs and maintenance expenditures are charged to operating expenses as incurred.

Direct labour and overhead costs are capitalized in three principal areas:

1. **Corporate departments such as Technology, Operations, Products, and Supply Chain (TOPS):** TOPS is involved in overall planning and development of the Video/Internet/Phone/Wireless infrastructure. Labour and overhead costs directly related to these activities are capitalized as the activities directly relate to the planning and design of the construction of the distribution system. In addition, TOPS devotes considerable efforts towards the development of systems to support Phone, WiFi, and projects related to new customer management, billing, and operating support systems. Labour costs directly related to these and other projects are capitalized.

2. **Cable regional construction departments, which are principally involved in constructing, rebuilding and upgrading the Cable/Internet/Phone infrastructure:** Labour and overhead costs directly related to the construction activity are capitalized as the activities directly relate to the construction or upgrade of the distribution system. Capital projects include, but are not limited to, new subdivision builds, increasing network capacity by reducing the number of homes fed from each node, and upgrades of plant capacity and the WiFi build.

3. **Subscriber-related activities such as installation of new drops and Internet and Phone services:** The labour and overhead directly related to the installation of new services are capitalized as the activity involves the installation of capital assets (e.g., wiring, software) which enhance the service potential of the distribution system through the ability to earn future revenues. Costs associated with service calls, collections, disconnects, and reconnects that do not involve the installation of a capital asset are expensed.

Amounts of direct labour and direct overhead capitalized fluctuate from year to year depending on the level of customer growth and plant upgrades for new services. In addition, the level of capitalization fluctuates depending on the proportion of internal labour versus external contractors used in construction projects.

The percentage of direct labour capitalized in many cases is determined by the nature of employment in a specific department. For example, a significant portion of labour and direct overhead of the cable regional construction departments is capitalized as a result of the nature of the activity performed by those departments. Capitalization is also based on piece rate work performed by unit-based employees which is tracked directly. In some cases, the amount of capitalization depends on the level of maintenance versus capital activity that a department performs. In these cases, an analysis of work activity is applied to determine this percentage split.

Amortization policies and useful lives

The Company amortizes the cost of property, plant and equipment and other intangibles over the estimated useful service lives of the items. These estimates of useful lives involve considerable judgment. In determining these estimates, the Company takes into account industry trends and company-specific factors, including changing technologies and expectations for the in-service period of these assets. On an annual basis, the Company reassesses its existing estimates of useful lives to ensure they match the anticipated life of the technology from a revenue-producing perspective. If technological change happens more quickly or in a different way than the Company has anticipated, the Company may have to shorten the estimated life of certain property, plant and equipment or other intangibles which could result in higher amortization expense in future periods or an impairment charge to write down the value of property, plant and equipment or other intangibles.

Intangibles

The excess of the cost of acquiring cable, satellite, data centre, and wireless businesses over the fair value of related net identifiable tangible and intangible assets acquired is allocated to goodwill. Net identifiable intangible assets acquired consist of amounts allocated to broadcast rights and licences, wireless spectrum licences, trademarks, brands, customer relationships, and software assets. Broadcast rights and licences, wireless spectrum licences, trademarks, and brands represent identifiable assets with indefinite useful lives.

Customer relationships represent the value of customer contracts and relationships acquired in a business combination and are amortized on a straight-line basis over their estimated useful lives ranging from 4 – 15 years.

Software that is not an integral part of the related hardware is classified as an intangible asset. Internally developed software assets are recorded at historical cost and include direct material and labour costs as well as borrowing costs on qualifying assets. Software assets are amortized on a straight-line basis over estimated useful lives ranging from 3 – 10 years. The Company reviews the estimates of lives and useful lives on a regular basis.

Asset impairment

The Company tests goodwill and indefinite-life intangibles for impairment annually (as at February 1) and when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of each cash-generating unit (CGU) is determined based on the higher of the CGU's fair value less costs to sell and its value in use. A CGU is the smallest identifiable group of assets that generate cash flows that are independent of the cash inflows from other assets or groups of assets. The Company's cash generating units are Cable, Satellite, and Wireless. Where the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods. The results of the impairment tests are provided in Note 9 to the Consolidated Financial Statements.

Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred, on a discounted basis, with a corresponding increase to the carrying amount of property and equipment, primarily in respect of wireless and transmitter sites. This cost is amortized on the same basis as the related asset. The timing or amount of the outflow is subject to estimation and judgment. The liability is subsequently increased for the passage of time and the accretion is recorded in the income statement as interest expense. The discount rates applied are subsequently adjusted to current rates as required at the end of reporting periods. Revisions due to the estimated timing of cash flows or the amount required to settle the obligation may result in an increase or decrease in the liability. Actual costs incurred upon settlement of the obligation are charged against the liability to the extent recorded.

Employee benefit plans

As at August 31, 2020, Shaw had non-registered defined benefit pension plans for key senior executives and designated executives. The amounts reported in the financial statements relating to the defined benefit pension plans are determined using actuarial valuations that are based on several assumptions including the discount rate and rate of compensation increase. While the Company believes these assumptions are reasonable, differences in actual results or changes in assumptions could affect employee benefit obligations and the related income statement impact. The differences between actual and assumed results are immediately recognized in other comprehensive income/loss. The most significant assumption used to calculate the net employee benefit plan expense is the discount rate. The discount rate is the interest rate used to determine the present value of the future cash flows that is expected to be needed to settle employee benefit obligations and is also used to calculate the interest income on plan assets. It is based on the yield of long-term, high-quality corporate fixed income investments closely matching the term of the estimated future cash flows and is reviewed and adjusted as changes are required. The following table illustrates the increase on the accrued benefit obligation and pension expense of a 1% decrease in the discount rate:

(millions of Canadian dollars)	Accrued Benefits Obligation at End of Fiscal 2020	Pension Expense Fiscal 2020
Weighted Average Discount Rate – Non-registered Plans	2.70%	2.90%
Impact of: 1% decrease – Non-registered Plans	$ 81	$ 3

Deferred income taxes

The Company has recognized deferred income tax assets and liabilities for the future income tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets are also recognized in respect of losses of certain of the Company's subsidiaries. The deferred income tax assets and liabilities are measured using enacted or substantially enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to reverse or the tax losses are expected to be utilized. Realization of deferred income tax assets is dependent upon generating sufficient taxable income during the period in which the temporary differences are deductible. The Company has evaluated the likelihood of realization of deferred income tax assets based on forecasts of taxable income of future years, existing tax laws and tax planning strategies. Significant changes in assumptions with respect to internal forecasts or the inability to implement tax planning strategies could result in future impairment of these assets.

Commitments and contingencies

The Company is subject to various claims and contingencies related to lawsuits, taxes and commitments under contractual and other commercial obligations. Contingent losses are recognized by a charge to income when it is likely that a future event will confirm that an asset has been impaired or a liability incurred at the date of the financial statements and the amount can be reasonably estimated. Significant changes in assumptions as to the likelihood and estimates of the amount of a loss could result in recognition of additional liabilities. Contractual and other commercial obligations primarily relate to network fees and agreements for use of transmission facilities in the normal course of business.

RELATED PARTY TRANSACTIONS

Related party transactions are reviewed by Shaw's Corporate Governance and Nominating Committee, consisting of independent directors. The following sets forth certain transactions in which the Company is involved.

Corus

The Company and Corus Entertainment Inc. ("Corus") are subject to common voting control. During 2016, the Company sold its wholly owned subsidiary Shaw Media to Corus in exchange for cash and an equity interest. The transaction closed on April 1, 2016. In fiscal 2019, the Company received dividends from Corus related to its Corus Class B non-voting participating shareholdings representing 38% of the total issued equity of Corus. On May 31, 2019, the Company completed its secondary offering of its 80,630,383 Class B non-voting participating shares of Corus at a price of $6.80 per share for net proceeds to the Company of approximately $526 million. In fiscal 2019 and fiscal 2020, network, advertising, and programming fees were paid to various Corus subsidiaries. The Company also provided uplink of television signals, programming content, Internet services and lease of circuits to various Corus subsidiaries.

Shaw no longer holds any equity interest in Corus.

Burrard Landing Lot 2 Holdings Partnership

The Company has a 33.33% interest in Burrard Landing Lot 2 Holdings Partnership (the "Partnership"). During fiscal 2020, the Company paid the Partnership for lease of office space in Shaw Tower. Shaw Tower, located in Vancouver, British Columbia, is the Company's headquarters for its lower mainland British Columbia operations.

Sale of Real Property

On May 15, 2019, the Company completed the sale of a non-core parcel of land and the building located thereon (the "Property"), to an affiliate of Shaw Family Living Trust (SFLT) (the "Purchaser"), for total net proceeds of approximately $45 million (for further detail about SFLT see "Known Events, Trends, Risks and Uncertainties — Control of the Company"). The Property had a net book value of approximately $4 million, resulting in a gain on disposition of approximately $41 million. The purchase price was determined based on appraisals performed by two independent valuators. As part of the transaction, the Purchaser agreed to lease back the Property to the Company for a term of three years at market rental rates (which were also based on appraisals from the two independent valuators) allowing the Company to monetize a non-core asset. The transaction was approved by the independent Board members of the Company.

Key management personnel and Board of Directors

Key management personnel consist of the most senior executive team and along with the Board of Directors have the authority and responsibility for directing and controlling the activities of the Company. In addition to compensation provided to key management personnel and the Board of Directors for services rendered, the Company transacts with companies related to certain Board members primarily for the purchase of remote control units, network programming, and installation of equipment.

Refer to Note 29 to the Consolidated Financial Statements for further related party transaction detail.

NEW ACCOUNTING STANDARDS

Shaw has adopted or will adopt a number of new accounting policies as a result of recent changes in IFRS as issued by the IASB. The ensuing discussion provides additional information as to the date that Shaw is or was required to adopt the new standards, the methods of adoption permitted by the standards, the method chosen by Shaw, and the effect on the financial statements as a result of adopting the new policies. The adoption or future adoption of these accounting policies has not and is not expected to result in changes to the Company's current business practices.

Adoption of recent accounting pronouncements

We adopted the following new accounting standards effective September 1, 2019:

- IFRS 16 Leases was issued on January 2016 and replaces IAS 17 Leases. The new standard requires entities to recognize lease assets and lease obligations on the balance sheet. For lessees, IFRS 16 removes the classification of leases as either operating leases or finance leases, instead requiring that leases be capitalized by recognizing the present value of the lease payments and showing them as lease assets (right-of-use assets) and representing the right to use the underlying leased asset. If lease payments are made over time, the Company would recognize a lease liability representing its obligation to make future lease payments. Certain short-term leases (less than 12 months) and leases of low value may be exempted from the requirements and may continue to be treated as operating leases if certain elections are made. Lessors will continue with a dual lease classification model. Classification will determine how and when a lessor will recognize lease revenue, and what assets would be recorded.

  As a result of adopting IFRS 16, the Company recognized a significant increase to both assets and liabilities on our Consolidated Statements of Financial Position as well as a decrease to operating costs, as a result of removing the lease expense; an increase to depreciation and amortization, due to the depreciation of the right-of-use asset; and an increase to finance costs, due to the accretion of the lease liability. Relative to the results of applying the previous standard, although actual cash flows are unaffected, the Company's Consolidated Statements of Cash Flows will reflect increases in cash flows from operating activities offset equally by decreases in cash flows from financing activities.

  Implementation

  We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented are not restated. We recognized lease liabilities at September 1, 2019 for leases previously classified as operating leases, measured at the present-value of the lease payments using our incremental borrowing rate at that date, with the corresponding right-of-use asset generally measured at an equal amount, adjusted for any prepaid or accrued rent outstanding as at August 31, 2019. Refer to "Transition adjustments" below for details.

  As permitted by IFRS 16, we applied certain practical expedients to facilitate the initial adoption and ongoing application of IFRS 16, including the following:

  - not separate fixed non-lease components from lease components for certain classes of underlying assets. Each lease component and any associated non-lease components will be accounted for as a single lease component;
  - apply a single discount rate to a portfolio of leases with similar characteristics;
  - exclude initial direct costs from measuring the right-of-use asset as at September 1, 2019; and
  - use hindsight in determining the lease term where the contract contains purchase, extension, or termination options.

  On transition, we have not elected the recognition exemptions on short-term leases or low-value leases; however, we may choose to elect these recognition exemptions on a class-by-class basis for new classes and on a lease-by-lease basis, respectively, in the future.

  There was no significant impact for contracts in which we are the lessor.

- IFRIC 23 Uncertainty over Income Tax Treatments was issued in 2017 to clarify how to apply the recognition and measurement requirements in IAS 12 when there is uncertainty over income tax treatments. It was required to be applied for annual periods commencing January 1, 2019, which for the Company was the annual period commencing September 1, 2019. The cumulative effect of the initial application of the new standard has been reflected as an adjustment to retained earnings at September 1, 2019. Refer to "Transition adjustments" below for details.

Below is the effect of transition to IFRS 16 and the adoption of IFRIC 23 on our condensed Consolidated Statements of Financial Position as at September 1, 2019.

(millions of Canadian dollars)	As reported at August 31, 2019	Effect of IFRS 16 transition	Effect of IFRIC 23 Transition	Subsequent to transition as at September 1, 2019
ASSETS				
Current				
Cash	1,446	–	–	1,446
Accounts receivable	287	–	–	287
Inventories	86	–	–	86
Other current assets	291	(16)	–	275
Current portion of contract assets	106	–	–	106
	2,216	(16)	–	2,200
Investments and other assets	37	–	–	37
Property, plant and equipment	4,883	1,338	–	6,221
Other long-term assets	195	–	–	195
Deferred income tax assets	4	–	–	4
Intangibles	7,979	–	–	7,979
Goodwill	280	–	–	280
Contract assets	52	–	–	52
	15,646	1,322	–	16,968
LIABILITIES AND SHAREHOLDERS' EQUITY				
Current				
Short-term borrowings	40	–	–	40
Accounts payable and accrued liabilities	1,015	–	–	1,015
Provisions	224	–	(5)	219
Income taxes payable	82	–	(11)	71
Current portion of contract liabilities	223	–	–	223
Current portion of long-term debt	1,251	–	–	1,251
Current portion of lease liabilities	–	113	–	113
	2,835	113	(16)	2,932
Long-term debt	4,057	–	–	4,057
Lease liabilities	–	1,211	–	1,211
Other long-term liabilities	75	(2)	–	73
Provisions	79	–	–	79
Deferred credits	425	–	–	425
Contract liabilities	15	–	–	15
Deferred income tax liabilities	1,875	–	38	1,913
	9,361	1,322	22	10,705
Shareholders' equity				
Common and preferred shareholders	6,282	–	(22)	6,260
Non-controlling interests in subsidiaries	3	–	–	3
	6,285	–	(22)	6,263
	15,646	1,322	–	16,968

Prior to adopting IFRS 16, our total minimum operating lease commitments as at August 31, 2019 were $919 million. The weighted average discount rate applied to the total lease liabilities was 3.50% at September 1, 2019. The difference between the total of the minimum lease payments set out in Note 27 to our 2019 Consolidated Financial Statements and the total lease liability recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at August 31, 2019;
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts, but which do not qualify to be accounted for as a lease liability, such as variable lease payments not tied to an index or rate.

RISK MANAGEMENT

In the normal course of our business activities, the Company is subject to risks. The purpose of risk management is to manage and mitigate risk, rather than to eliminate risk. The Company is committed to continually strengthening our risk management capabilities to protect and enhance value.

Risk Governance and Oversight

The Board of Directors has overall risk governance and oversight responsibilities. Specifically, the Board is responsible for identifying and assessing the principal risks inherent in the business activities of the Company and ensuring that management takes all reasonable steps to implement appropriate systems to manage such risks. The Board of Directors has delegated elements of its risk oversight responsibilities to specific Board committees. The Audit Committee is responsible for: (1) overseeing the Company's processes for identifying, assessing, and managing risks; and (2) ensuring that management implements and maintains effective internal controls and procedures for identifying, assessing and managing the principal risks to the Corporation and its business. In addition, the Human Resources and Compensation Committee is responsible for ensuring that the Company's short, medium and long-term incentive plans do not incent risk-taking beyond the Company's risk tolerance.

Responsibilities for Risk Management

Responsibility for risk management is shared across our organization. Each department's operating management, led by the Company's executive team, have integrated controls and risk management practices into day-to-day activities and decision-making processes. We have risk management and compliance functions across the organization such as Finance, Privacy, Security and Risk, Legal and Regulatory, and Technology Risk Governance. The Internal Audit and Advisory Services (IA&AS) department provides independent and objective audit and advisory services to evaluate and improve the effectiveness of the Company's governance, internal controls, disclosure processes, and risk management activities. The Audit Committee oversees the work of the IA&AS department and all reports issued by the IA&AS department. In addition, the IA&AS department's annual plan is reviewed and approved by the Audit Committee.

Enterprise Risk Management

As part of its role in risk governance and oversight, the Audit Committee oversees the Enterprise Risk Management (ERM) program. The ERM program is a performance focused process designed to identify, monitor, and manage significant corporate level risks that could impact the achievement of our strategic objectives. The Company's executives meet periodically to: (1) review and update significant corporate level risks, (2) assess such corporate level risks in terms of likelihood and magnitude of impact, (3) review the response strategy, and (4) monitor progress. The latest ERM update was provided to the Audit Committee in October 2020, with updates to be provided to the Board at least annually. The significant risks and uncertainties affecting the Company and its business are discussed under "Known Events, Trends, Risks and Uncertainties."

KNOWN EVENTS, TRENDS, RISKS AND UNCERTAINTIES

The discussion in this MD&A addresses only what management has determined to be the most significant known events, trends, risks, and uncertainties relevant to the Company, its operations, and/or its financial results. This discussion is not exhaustive. The discussion of these matters should be considered in conjunction with the "Caution Concerning Forward-Looking Statements."

Competition and Technological Change

Shaw operates in an open and competitive marketplace. Our businesses face competition from regulated and unregulated entities using existing or new communications technologies and from illegal services. In addition, the rapid deployment of new technologies, services, and products has blurred the traditional lines between telecommunications, Internet, and distribution services and further expands the competitive landscape. Shaw may also face competition from platforms that may gain advantages through regulatory processes. In addition, the industry has experienced a general reduction in barriers to entry due to technological substitution, the development of IP networks, and certain recent regulatory decisions.

While Shaw continually seeks to strengthen its competitive position through investments in infrastructure, technology, and customer service and through acquisitions, there can be no assurance that these investments will maintain Shaw's market share or performance in the future. New technologies in the industry may evolve faster than the historical investment cycle, potentially resulting in additional capital investments not currently planned and shorter useful lives for certain of Shaw's existing assets. New products or services introduced into the marketplace may reduce demand for Shaw's existing products and services or exert downward pricing pressure on Shaw's offerings.

The following competitive events, trends, risks and/or uncertainties specific to areas of our business may have a material adverse effect on Shaw and its reputation, as well as its operations and/or its financial results. In each case, the competitive events, trends, risks, and/or uncertainties may increase or continue to increase. Competition for new subscribers and retention of existing subscribers (churn reduction) may require substantial promotional activity and increase our cost of customer acquisition, decrease our ABPU, ARPU or all of these metrics. We expect that competition, including aggressive discounting practices by competitors to gain market share, is likely to continue to increase for all our businesses.

Consumer Internet

Shaw competes with different types of ISPs offering residential Internet access including traditional telephone companies, wireless providers and independent ISPs making use of wholesale services to provide Internet access in various markets.

Shaw expects that consumer demand for higher Internet access speeds and greater bandwidth will continue to be driven by bandwidth-intensive applications including streaming video, digital downloading, Internet-of-Things (IOT), interactive gaming, and cloud based services. As described further under "Shaw's Wireline Network," Shaw continues to expand the capacity and efficiency of its wireline network to handle the anticipated increases in consumer demand for higher Internet access speeds and greater bandwidth. However, there can be no assurance that our investments in network capacity will continue to meet this increasing demand. In addition, unprecedented situations such as the COVID-19 pandemic highlighted the unpredictable nature of network traffic growth and consumer behavior.

Consumer Video

Shaw's Consumer Video services, delivered through both our wireline and satellite platforms, compete with other distributors of video and audio signals. We also compete increasingly with unregulated OTT and offerings available over Internet connections. Continued improvements in the quality of streaming video over the Internet and the increasing availability of television shows and movies online will continue to increase competition to Shaw's Consumer Video services. Our Video services also compete with illegal services including grey and black market satellite offerings as well as OTT video piracy services. As a result, we continue to experience cord cutting and cord shaving in our traditional cable services and packages.

Consumer Phone

Shaw's competitors for Consumer Wireline Phone services include traditional telephone companies, other wireline carriers, Voice over Internet Protocol (VoIP) providers and wireless providers. In addition, households increasingly rely on wireless services in place of wireline phone services which negatively affects the business and prospects of our Consumer Wireline Phone services.

Wireless

Freedom Mobile and Shaw Mobile are new entrants in the highly competitive Canadian wireless market which is characterized by three national wireless incumbent carriers and regional participants. The national wireless incumbent carriers have larger, and more diverse spectrum holdings than Shaw, as well as larger operational and financial resources than Shaw and are well established in the market. Freedom Mobile and Shaw Mobile's ability to continue to offer and improve Wireless services and to offer new services depends on, among other factors, continued access to, and deployment of, adequate spectrum, including the ability to both renew current spectrum licences and acquire new spectrum licences (in various spectrum bands). If Freedom Mobile and Shaw Mobile cannot acquire and retain required spectrum, they may not be able to continue to offer and improve current Wireless services and deploy new services on a timely basis, including providing competitive data speeds their customers want. For example, the development and utilization of 5G technology requires additional spectrum licenses. While the 5G ecosystems are expected to work on multiple frequency bands, including 600 MHz spectrum, 3.5 GHz spectrum is becoming the primary band for 5G mobile coverage. There is a risk that Shaw may not be able to acquire the 3.5 GHz spectrum required to compete with other wireless carriers. As a result, Freedom Mobile and Shaw Mobile's ability to attract and retain customers could be adversely affected. In addition, an inability to acquire and retain required spectrum could affect network quality and result in higher capital expenditures.

Our Wireless division may face increased competition from other facilities based or non-facilities based new entrants or alternate technologies, including as a result of regulatory decisions or government policies that favour certain competitive platforms. For further detail see "Government Regulations and Regulatory Developments – Telecommunications Act – CRTC Wireless Review."

Business Services

Shaw Business competes with other telecommunications carriers in providing high-speed data and video transport and Internet connectivity services to businesses, ISPs and other telecommunications providers. The telecommunications services industry in Canada is highly competitive, rapidly evolving and subject to constant change. Shaw Business' competitors include traditional telephone companies, competitive access providers, competitive local exchange carriers, ISPs, private networks built by large end users, and other telecommunications companies. In addition, the development and implementation of new technologies by others could give rise to significant additional competition. Competitors for the delivery of voice and unified communication services include traditional telecommunications companies, resellers and new entrants to the market leveraging new technologies to deliver services. Shaw Broadcast Services also competes in industries that are highly competitive, rapidly evolving and subject to constant change.

Impact of Regulation

As discussed under "Government Regulations and Regulatory Developments," a majority of our Canadian business activities are subject to: (i) government legislation, (ii) regulations and policies administered by ISED and/or the CRTC, and (iii) conditions of licence imposed by ISED and/or the CRTC. Shaw's operations, financial results, and future prospects are affected by changes in legislation, regulations, policies, and conditions of licence, including pursuant to changes in the interpretation of existing legislation, regulations and requirements contained in such conditions of licence by courts, governments, or the regulators, in particular the CRTC, ISED, Competition Bureau, and Copyright Board. These changes relate to, and may have an impact on, among other things, licensing and licence renewal, spectrum holdings, products and services, competition, programming carriage and terms of carriage, strategic transactions, infrastructure access, and the potential for new or increased fees or costs. All such changes in the regulatory regime may have a material adverse effect on the Company and its operations, reputation, investment capability, ability to compete, as well as the Company's financial results and/or future prospects.

Coronavirus (COVID-19)

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19," has resulted in governments worldwide enacting emergency measures to contain the spread of the virus. These measures, which include the implementation of border closures, travel bans, self-imposed quarantine periods, self-isolation, physical and social distancing, and the closure of non-essential businesses, have caused material disruption to businesses in Canada and globally which has resulted in an uncertain and challenging economic environment.

Global debt and equity capital markets have experienced significant volatility, causing governments and central banks to react with significant monetary and fiscal interventions designed to stabilize economic conditions.

As an ongoing risk, the duration, impact, and potential resurgence of the COVID-19 pandemic is unknown at this time, as is the efficacy and duration of the government interventions. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect the Company's operations, financial results, and condition in future periods are also subject to significant uncertainty. Such risks include, but are not limited to:

- uncertainty associated with the costs and availability of resources required to provide the appropriate/required levels of service to our customers through our on-line platforms, self-help, and self-install programs;
- impacts on the availability of, and therefore our ability to provide, the content and programming our customers expect;
- a material reduction in demand for, or profitability of, our products or services, acceleration in cord cutting or cord shaving by our customers, or increase in delinquent or unpaid bills, due to job losses and associated financial hardship;
- issues delivering the Company's products and services due to illness, Company or government-imposed isolation programs, restrictions on the movement of personnel, retail store closures/re-openings, and supply chain disruptions;
- significant additional capital expenditures and the availability of resources required to maintain, upgrade or expand our networks in order to accommodate substantially increased network usage while large numbers of our customers continue working from home;
- uncertainty associated with costs, delays and availability of resources required to complete major maintenance and expansion projects on time and budget;
- significant lost revenue in our Shaw Business segment due to the significant economic challenges that our enterprise, small and medium sized business customers are facing due to the impact of the COVID-19 pandemic;
- the impact of additional legislation, regulation and other government interventions in response to the COVID-19 pandemic;
- the negative impact on global debt and equity capital markets, including the trading price of the Company's securities;

- the ability to access capital markets at a reasonable cost; and
- the potential impairment of long-lived assets.

Any of these risks, and others, could have a material adverse effect on our business, operations, capital resources, and/or financial results of operations.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. We called into action our robust business continuity plan in the early stages of this crisis to restrict business travel, enable a significant portion of our employee base to work from the safety of their own homes and temporarily close retail locations nationally (with the exception of a limited number of street front stores that remained open to provide urgent customer support).

COVID-19 pandemic continues to evolve and governments reduce, lift, or reimpose emergency measures and interventions, the Company's focus continues to be on the safety and health of its employees, the reliability of its facilities-based network and responsiveness to its customers. The Company's business resumption plan, designed to effect the gradual and safe re-introduction of employees to the workplace and the re-opening of retail stores, is being implemented in phases as government-imposed restrictions on businesses and individuals are lifted. As of the date of this MD&A, substantially all of the Company's retail stores are once again open for business. In order to address the health and safety of its employees returning to work, the Company has put in place many new protocols, including enhanced cleaning measures, sanitization stations, and daily health and wellness self-assessments. The Company is updating employees on a frequent basis to provide information on the situation and on necessary precautions to take. We will continue to have an open dialogue with public safety and government officials at all levels, as well as key suppliers, partners, and customers.

Customer Experience

Shaw's customer loyalty, retention, and likelihood to recommend Shaw all depend on our ability to provide a seamless connectivity experience that meets or exceeds their expectations. As part of the digital transformation, the Company modernized several aspects of its Wireline operations to better meet the needs of today's customer, including shifting customer interactions to digital platforms and driving more self-help, self-install, and self-service. The Company continues to streamline and simplify manual processes that improve its customers overall connectivity experience and day-to-day operations for our employees.

The complexity in our operations due to the use of multiple technology platforms, billing systems, sales channels, marketing databases as well as different rate plans, promotions, and product offerings may limit the Company's ability to respond quickly to market changes and lead to billing, service, or other errors, which may adversely affect customer satisfaction and retention. The failure to sustain and expand customer relationships through quality products and customer service could have a material adverse effect on our business, financial condition, reputation, and/or results of operations.

Shaw uses data analytics tools to perform customer segmentation, improve our offerings to customers, and support corporate decision-making. If the data behind these tools is poor or our analytical tools are not well designed, there is a risk they will not be effective in predicting our customers' needs and wants. The realization of these risks could negatively impact our business and/or reputation.

Network Failure

Shaw's business may be interrupted by wireline or wireless network failures, including its own or third party networks. Such network failures may be caused by fire damage, natural disaster, power loss, cyber attacks, human error, disabling devices, acts of war or terrorism, physical climate change impacts, and other events which may be beyond Shaw's control.

As insurance premium costs are uneconomic relative to the risk of failure, Shaw self-insures its plant (underground and aerial infrastructure) in its Fibre+ network. It is likely that wireline or wireless network damage caused by any one incident would be limited by geographic area and the resulting business interruption and financial damages would also be limited. In addition, with respect to a wireline network failure, we expect the risk of loss to be mitigated as most of the backbone fibre network and much of the hybrid fibre coax (HFC) access network is located underground.

Shaw protects its wireline and wireless networks through a number of measures, including physical and information technology security, redundancy, and ongoing maintenance and placement of insurance on our network equipment and data centres. In the past, the Company has successfully recovered from network damage caused by natural disasters without significant cost or disruption of service.

Despite the steps Shaw takes to reduce the risk of wireline and wireless network failure, failures may still occur, and such failures could negatively affect levels of customer service and relationships which may have a material adverse effect on Shaw and its reputation, as well as its operations and/or financial results.

Shaw's networks may also experience unexpected capacity pressures as a result of the impact of the COVID-19 pandemic which could negatively affect network performance and the Company's ability to provide services. Negative impacts on network availability, speed, and consistency could have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Information Systems and Internal Business Processes

Many aspects of the Company's businesses depend to a large extent on various information technology (IT) systems and software, and on internal business processes. Shaw regularly undertakes initiatives to update and improve these systems and processes. Although the Company has taken steps to reduce the risks of failure of these systems and processes, there can be no assurance that potential failures of, or deficiencies in, these systems, processes or change initiatives will not have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Acquisitions, business combinations and the development and launch of new services typically require significant integration and system development efforts. The Company faces the risk that proposed IT systems or process change initiatives will not be implemented successfully, on budget, or on time. As the complexity of the Company's systems increases, system stability and availability may be affected. Failure to implement and maintain appropriate IT systems could negatively impact Shaw's reputation, operations and/or financial results.

Cyber Security Risks

Cyber attacks are becoming more frequent and sophisticated in nature with an increased potential for damage. Although Shaw's systems and network architecture are designed and operated to be secure, they are vulnerable to the risks of an unauthorized third party accessing these systems or its network. This could lead to a number of adverse consequences, including the unavailability, disruption or loss of Shaw's services or key functionalities within Shaw's technology systems or software; the unauthorized disclosure, corruption or loss of sensitive Company, customer or personal information; litigation, investigations, fines, and liability for failure to comply with privacy and information security laws; increased fraud; increased cyber security protection costs; and higher insurance premiums. Shaw is also exposed to information security threats as a result of actions by our customers, suppliers, third party service providers, employees and business partners – whether maliciously or otherwise. Our insurance may not cover or be adequate to fully reimburse us for any associated costs and losses.

We continue to assess and enhance our cyber security within Shaw while we are monitoring the risks of cyber attacks and implement appropriate security policies, procedures and information technology systems to mitigate the risk of cyber attacks.

External threats to our network are constantly changing, and there is no assurance that Shaw will be able to protect its network from all future threats which may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Satellite

Shaw uses three satellites (Anik F2, Anik F1R, and Anik G1) owned by Telesat to provide satellite services in our Consumer division. In connection with the Company's digital network upgrade (DNU) program initiated in 2017, the Company has effectively optimized satellite traffic on the Anik F1R and Anik F2 satellites, enabling a reduction in the total number of transponders required by the Company to conduct its business. Effective October 1, 2019, the Company transferred its ownership interest in the 16 Anik F2 transponders, adjusted its satellite traffic on the Anik F1R and Anik F2 satellites, and renewed its capacity service agreements in place on Anik F1R, Anik F2, and Anik G1 until the effective end-of-life dates of such satellites. While the Company intends to negotiate and enter into new capacity service agreements to meet its long term satellite capacity requirements, there can be no assurance that replacement transponder capacity will be available or that such agreements will be entered into on favourable terms, which may have a material adverse effect on customer service and customer relationships, as well as the Company's reputation, operations and/or financial results.

The Company does not maintain any insurance coverage for the transponders on Anik F1R, Anik F2 and Anik G1 as it believes the costs are uneconomic relative to the benefit which could be otherwise derived through an arrangement with Telesat. As collateral for the transponder capacity pre-payments that were made by the Company to facilitate the construction of the satellites, the Company maintains a security interest in the transponder capacity and any related insurance proceeds that Telesat recovers in connection with an insured loss event.

The Company does not maintain business interruption insurance covering damage related to the loss of use of one or more of the transponders on the satellites as it believes that the insurance premium costs are uneconomic relative to the risk of transponder and/or satellite failure. The majority of transponder capacity is available to the Company on an unprotected, non-pre-emptible basis. The Company has the option to contract transponders with excess capacities on Anik F2, subject to availability. In the event of satellite failure, service will be restored as capacity becomes available. Restoration of satellite service on another satellite may require repositioning or re-pointing of customers' receiving dishes, an upgrade to their video receivers or customers may require a larger dish. The Anik G1 satellite has a switch feature that allows whole channel services (transponders and available spares) to be switched from extended Ku-band to Ku-band, which provides the Company with limited back-up to restore failed whole channel services of Anik F1R. The Company has reserved limited access to Ku band frequencies in the 107.3 orbital location to enable the switching feature, subject to availability. Satellite failure could negatively affect levels of customer service and customer relationships and may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Reliance on Suppliers and Third Party Service Providers

Shaw is connected to or relies on other telecommunication carriers and certain utilities to conduct its business. Any disruption to the services provided by these suppliers, including labour strikes and other work disruptions, bankruptcies, technical difficulties or other events affecting the business operations of these carriers or utilities may affect Shaw's ability to operate and, therefore may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

The Company sources its customer premise, capital equipment, and capital builds as well as portions of its service offerings, including network, video delivery and IT functions from certain key suppliers. While the Company has alternate sources for many of these purchases, the loss of a key supplier may require us to incur additional capital expenditures for the substitution of existing products and services which could adversely affect the Company's ability to operate, and therefore may have a material adverse effect on Shaw, its operations and/or its financial results. In the course of fulfilling service arrangements, third party service providers must ensure our information is appropriately protected and safeguarded. Failure to do so may affect Shaw through increased regulatory risk, reputational damage, and damage to customer experience.

There are a limited number of suppliers of popular mobile devices and there is a risk that the Company will not be able to maintain contracts for its existing supply of mobile devices and/or contract for the supply of new devices on commercially reasonable terms.

Shaw participates in global scale initiatives through partnerships with best-in-class service providers such as Comcast, Cisco Meraki, and Nokia to ensure that the technology we adopt and invest in is leading-edge in the global communications industry. There is a risk that the Company's participation in such partnerships ends or that the technology roadmap of Shaw and its partners diverges, resulting in disparate strategic approaches. Such divergence may result in higher capital requirements, prolonged development timelines of new products and services, and suboptimal performance of new products and services introduced by Shaw.

Programming Expenses

Expenses for video programming continue to be one of our most significant operating expenses. Costs continue to increase, particularly for sports programming. In addition, as we add programming or distribute existing programming to more of our subscriber base, programming expenses increase. Although we have been successful at reducing the impact of these cost increases through the sale of additional services or increasing subscriber rates, there can be no assurance that we will continue to be able to do so and this may have a material adverse effect on Shaw, its operations and/or its financial results.

Roaming Agreements

Shaw (and/or its wholly owned subsidiaries) has entered into roaming agreements with multiple carriers in Canada and around the world to extend its national and worldwide coverage. If the Company is unable to extend its national and worldwide wireless coverage, or renew or substitute for those roaming agreements at their respective existing terms or on commercially reasonable terms, the Company may be placed at a competitive disadvantage, which could adversely affect its ability to operate its Wireless business, as well as its reputation and customer experience. In addition, if the Company is unable to renew, or substitute for, these roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, prospects, revenues, financial condition, and results of Wireless operations could be adversely affected.

The three incumbent national wireless carriers are required by CRTC regulation to provide domestic wholesale roaming services to Shaw and other facilities-based wireless competitors at regulated rates. Changes to the regulated rates or other terms in the wholesale roaming policy could negatively impact the Company's wireless financial results, growth prospects, and operational flexibility. For further detail see "Government Regulations and Regulatory Developments – Telecommunications Act – CRTC Wireless Review."

Economic Conditions

The Canadian economy is affected by uncertainty in global financial and equity markets, slowdowns in national and/or global economic growth, and commodity price challenges. Changes in economic conditions, which may differ across our regional footprint, may affect discretionary consumer and business spending, resulting in increased or decreased demand for Shaw's product offerings. Current or future events caused by volatility in domestic or international economic conditions or a decline in economic growth may have a material adverse effect on Shaw, its operations and/or financial results. The advent of the COVID-19 pandemic has exacerbated both the uncertainty and volatility in global financial and equity markets, in addition to negatively impacting economic growth rates.

Talent Management and Succession Planning

Our success is substantially dependent upon the retention and the continued performance of our executive officers. Many of these executive officers are uniquely qualified in their areas of expertise, making it difficult to replace their services in the short to medium term. The loss of the services of any key executives and/or employees in critical roles or inadequate processes designed to attract, develop, motivate, and retain productive and engaged employees could have a material adverse effect on Shaw, its operations and/or financial results. To mitigate this risk, the Company's comprehensive compensation program is designed to attract, retain, motivate, and reward the executive team and key employees through aligning management's interest with our business objectives and performance. Furthermore, the Company conducts annual succession planning to identify and develop key leaders to build capabilities and experiences required for the future.

Total Business Transformation and Voluntary Departure Program

In the second quarter of fiscal 2018, the Company introduced TBT, a multi-year initiative designed to reinvent Shaw's operating model to better meet the changing tastes and expectations of consumers and businesses by optimizing the use of resources, maintaining and ultimately improving customer service, and by reducing staff. Three key elements of TBT were to: 1) shift customer interactions to digital platforms; 2) drive more self-install and self-serve; and 3) streamline the organization that builds and services our network.

On March 5, 2020, the Company announced the substantial completion of the TBT initiative with fiscal 2020 annualized savings related to VDP substantially in line with the previous estimates. A total of $437 million in restructuring charges was recorded since the beginning of the program, of which $425 million has been paid to date. As part of the TBT initiative, we reduced input costs, consolidated functions, and streamlined processes, which has led to operational improvements across the business, allowing us to evolve into a more efficient organization. We have become a more focused, agile, and accountable organization ready to evolve from being product-focused to more purposeful and fully integrated, focusing on satisfying the unique needs of our customers. See also "Total Business Transformation" and "Caution Concerning Forward Looking Statements" for further discussion of the TBT initiative and the VDP.

There is an overall risk that the leaner, more integrated and agile Company resulting from the TBT initiative and the VDP may not be sustainable. Specifically, there is a risk that the Company may not be able to (i) maintain sustainable digital platforms that will continue to effectively engage customers; (ii) maintain sustainable digital platforms that continue to meet or exceed our customers' service level expectations, protect the security of customer information, and coordinate the delivery of product and service offerings; (iii) maintain sustainable programs that will result in customers continuing to use the self-serve and self-help functions, and electing to self-install the Company's products and services; and (iv) continue to consolidate and streamline the functions and processes of the divisions responsible for building and servicing its networks.

Despite the Company's mitigation efforts (including outsourcing certain functions, reassigning/repurposing employees, and the increased customer use of our self-serve, self-help, and self-installation functions), there is still a risk that the Company may not be able to (i) replace or outsource the functions performed by certain key employees that exited the Company in connection with the VDP; (ii) continue to operate the business in the normal course and maintain or improve customer service levels; (iii) maintain employee morale as a result of the organizational changes and staff and cost reductions; and (iv) ensure that the staff reductions will result in sustained cost reductions and achieve the financial goals of the TBT initiative. The realization of any of these risks may have a material adverse effect on Shaw, its reputation, operations, and/or financial results.

Labour Relations

As of August 31, 2020, approximately 5% of our employees are represented by unions under collective bargaining agreements. While the Company strives to maintain positive labour relations, we can neither predict the outcome of current or future negotiations relating to labour disputes, union representation, or renewal of collective bargaining agreements, nor be able to avoid future work stoppages, strikes, or other forms of labour protests pending the outcome of any current or future negotiations. A prolonged work stoppage, strike or other form of labour protest could have a material adverse effect on our businesses, operations, and reputation. Even if the Company does not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect our businesses and results of operations. In addition, our ability to make short-term adjustments to control compensation and benefits costs could be limited by the terms of such collective bargaining agreements. To support all leaders and employees, we continually listen to remove barriers and respond in real-time to needs and concerns. We also continue to provide support for leaders on how to manage change and maintain positive employee engagement and relations.

Interest Rates, Foreign Exchange Rates and Capital Markets

Shaw has the following financial risks in its day-to-day operations:

(a) **Interest rates:** Due to the capital-intensive nature of Shaw's operations, the Company uses long-term financing extensively in its capital structure. The primary components of this structure include banking facilities and various Canadian denominated senior notes and debentures with varying maturities issued in the public markets. These are more fully described in Note **13** to the Consolidated Financial Statements.

Interest on bank indebtedness is based on floating rates while the senior notes are all fixed-rate obligations. If required, Shaw uses its credit facility to finance day-to-day operations and, depending on market conditions, periodically converts the bank loans to fixed-rate instruments through public market debt issues. Increases in interest rates may have a material adverse effect on Shaw, its operations and/or its financial results.

(b) **Capital markets:** Shaw requires ongoing access to capital markets to support its operations. Changes in capital market conditions, including significant changes in market interest rates or lending practices, or changes in Shaw's credit ratings, may adversely affect our ability to raise or refinance short-term or long-term debt and therefore may have a material adverse effect on Shaw, its operations and/or its financial results.

Shaw manages its exposure to floating interest rates by maintaining a mix of fixed and floating rate debt. Interest on the Company's unsecured credit facility and accounts receivable securitization program are based on floating rates, while the senior notes are all fixed rate obligations.

As at August 31, 2020, virtually all of Shaw's consolidated long-term debt was fixed with respect to interest rates.

The Company may also enter into derivative contracts, primarily forward contracts, to mitigate its exposure to foreign exchange and interest rate risks. While hedging and other efforts to manage these risks are intended to mitigate Shaw's risk exposure, because of the inherent nature and risk of such transactions, those activities can result in losses. For instance, if Shaw hedges its floating interest rate exposure, it may forego the benefits that may otherwise be experienced if rates were to fall and it is subject to credit risks associated with the counterparties with whom it contracts. In order to minimize the risk of counterparty default under its derivatives agreements, Shaw assesses the creditworthiness of its derivative counterparties. Further information concerning the policy and use of derivative financial instruments is contained in Notes 2 and 30 to the Consolidated Financial Statements.

Inventory

Our Wireless division's inventory balance consists of devices which generally have short product lifecycles due to frequent new device introductions. The failure to effectively manage inventory levels based on product demand may increase the risk of inventory obsolescence, which could negatively impact Shaw's operations and/or financial results.

Similar to other wireless service providers, Shaw subsidizes the cost of subscriber devices to attract customers to sign a term contract with Freedom Mobile or Shaw Mobile. Shaw also commits to a minimum subsidy per unit with certain suppliers of devices. There is a risk that Shaw may be unable to recover the costs of subsidies over the term of the customer contract which could negatively impact our business, operations, or financial results.

Climate Change

Climate change risks are important considerations for Shaw. These risks have been classified as two main types – physical risks and transition risks – which are described in further detail below.

Physical Risks

In accordance with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD), we recognize that climate change may increase the severity, duration, and frequency of natural hazards and weather-related events. These in turn may negatively impact our business, which may require us to protect, test, maintain, repair, and replace our networks, IT systems, equipment and other infrastructure. For example:

- increased temperatures could impact our networks, IT systems, equipment and other infrastructure which could require the installation of additional cooling devices;
- acute risks (e.g., ice storms, extreme precipitation, flooding, fires, hurricanes, tornados, tsunamis) and chronic risks (e.g., sea-level rise) could impact or destroy our facilities or network, equipment, and other infrastructure, and affect our employees' ability to safely perform work. These impacts may increase our insurance related expenses, and affect our ability to deliver products and services; and
- climate change related impacts to our key suppliers could adversely affect their ability to supply us with required products and services.

The occurrence of any of these events could have a material adverse effect on our operations and/or financial results. See also "Network Failure" risks above which could increase in severity and/or frequency as a result of climate change related natural disasters.

With the exception of our network equipment and data centres, we self-insure our Fibre+ network and, as a result, have limited insurance coverage against the losses resulting from natural disasters affecting our Fibre+ network. For further detail see “Network Failure” above.

Although we have business continuity/resumption plans and disaster recovery plans and strategies in place, the failure of any of our climate change mitigation and adaptation efforts (including response strategies and business continuity protocols) may affect our business through potential disruption of our operations, damage to our facilities and infrastructure, and affect the communities that we operate in and serve, which may have a material adverse effect on Shaw and its reputation, as well as its operations, prospects and/or financial results.

Transition Risks

Climate change is drawing more attention through evolving public interest as well as government regulation and policy.

- **Policy & legal risk:** Many aspects of our operations are subject to evolving and increasingly stringent federal, provincial, and local environmental, health, and safety laws and regulations. These laws and regulations impose requirements with respect to matters such as fuel storage, the recovery and recycling of end-of-life electronic products, greenhouse gas emissions, the release of substances into the environment, corrective and remedial action concerning such releases, and the proper handling, management and disposal of substances. These evolving considerations and more stringent laws and regulations could lead to increased costs for compliance, which could be material. For example, we may be required to incur additional capital expenditures from substituting existing products and services with lower emissions options. The Company may also incur increased operational costs due to higher fuel and energy prices resulting from carbon taxes and/or cap and trade programs.
- **Reputational Risk:** Failure to recognize and adequately respond to changing environmental matters and expectations, or to comply with environmental laws and regulations, could result in fines, new regulatory obligations and associated costs, or damage to our reputation or brand any of which could have a material adverse effect on our operations and/or financial results.

In fiscal 2020, we continued to make progress on the development of our ESG program. Key areas of focus of the ESG program include the resiliency and sustainability of our converged network and products, including climate change resilience. Through the development of the ESG program, we are considering and integrating climate-related considerations into our governance and risk management practices.

Litigation

Shaw and its subsidiaries are involved in litigation matters arising in the ordinary course and conduct of its business. Although management does not expect that the outcome of these matters will have a material adverse effect on the Company, there can be no assurance that these matters, or other legal matters that arise in the future, will not have a material adverse effect on Shaw and its reputation, as well as Shaw’s operations and/or financial results.

Shaw is a public company with shares trading on the Toronto and New York stock exchanges. As a result, the Company may be subject to civil liability under Canadian and US securities laws for alleged misrepresentations by the Company in its public disclosure documents and/or oral statements.

Legal and Ethical Compliance

Shaw expects and relies on its employees, officers, Board of Directors, contractors, suppliers, and other business partners to act in accordance with applicable legal and ethical standards in all jurisdictions in which we operate, including, but not limited to, anti-bribery, anti-corruption, and anti-money laundering laws and regulations. Situations where Shaw’s employees, officers, Board of Directors, contractors, suppliers, and other business partners do not adhere to applicable laws and regulations, the Company’s policies or its contractual obligations, whether inadvertently or intentionally, may expose the Company to litigation and the possibility of damages, sanctions, and fines, or of being disqualified from bidding on contracts, which may have a material adverse effect on Shaw and its reputation, as well as its operations, prospects, and/or financial results.

Taxes

Shaw’s business is subject to various tax laws, changes to tax laws and the adoption of new tax laws, regulations thereunder and interpretations thereof, which may have adverse tax consequences to Shaw.

While Shaw believes it has adequately provided for all income and commodity taxes based on information that is currently available, the calculation and the applicability of taxes in many cases require significant judgment in interpreting tax rules and regulations. In addition, Shaw’s tax filings are subject to government audits which could result in material changes in the amount of current and deferred income tax assets and liabilities and other liabilities which may, in certain circumstances, result in the assessment of interest and penalties.

Concerns about Alleged Health Risks relating to Radiofrequency Emissions

Concerns about alleged health risks relating to radiofrequency emissions may adversely affect our Wireless division and our Shaw Go WiFi operations. Some studies have alleged that links exist between radiofrequency emissions from certain wireless devices and cell sites and various health problems or possible interference with electronic medical devices, including hearing aids and pacemakers. The Company complies with all applicable laws and regulations. Further, the Company relies on suppliers of wireless network equipment and customer equipment to meet or exceed all applicable regulatory and safety requirements. No definitive evidence exists of harmful effects from exposure to radiofrequency emissions when legal limits are complied with. Additional studies of radiofrequency emissions are ongoing and we cannot be certain of results, which could result in additional or more restrictive regulation or exposure to potential litigation.

Acquisitions, Dispositions and Other Strategic Transactions

Shaw may from time to time make acquisitions to expand its existing businesses or to enter into sectors in which Shaw does not currently operate, dispositions to focus on core offerings or enter into other strategic transactions. Such acquisitions, dispositions and/or strategic transactions may fail to realize the anticipated benefits, result in unexpected costs, result in unexcepted liabilities that were not uncovered through the due diligence process and/or Shaw may have difficulty incorporating or integrating the acquired business, any of which may have a material adverse effect on Shaw, its operations and/or financial results.

Dividend Payments are not Guaranteed

Shaw currently pays monthly common share and quarterly preferred share dividends in amounts approved on a quarterly basis by the Board of Directors. Over the long term, Shaw expects to continue to pay dividends from its free cash flow; however, balance sheet cash and/or credit facilities may be used to fund dividends from time to time. Although Shaw intends to make regular dividend payments, dividends are not guaranteed as actual results may differ from expectations and there can be no assurance that the Company will continue common or preferred share dividend payments at the current level. In addition to the standard legislated solvency and liquidity tests that must be met, the Company would not be able to declare and pay dividends if there was an event of default or a pending event of default would result (as a consequence of declaring and paying dividends) under its credit facilities.

Holding Company Structure

Substantially all of Shaw's business activities are operated by its subsidiaries. As a holding company, our ability to meet our financial obligations is dependent primarily upon the receipt of interest and principal payments on intercompany advances, management fees, cash dividends and other payments from our subsidiaries together with proceeds raised by the Company through the issuance of equity and the incurrence of debt, and from proceeds received on the sale of assets. The payment of dividends and the making of loans, advances and other payments to Shaw by its subsidiaries may be subject to statutory or contractual restrictions, are contingent upon the earnings of those subsidiaries and are subject to various business and other considerations.

Control of the Company

Voting control of the Company is held by SFLT and its subsidiaries. As at October 30, 2020, SFLT and its subsidiaries held 17,562,400 Class A Shares, representing approximately 79% of the issued and outstanding Class A Shares, for the benefit of the descendants of the late JR Shaw and Carol Shaw. The sole trustee of SFLT is a private company controlled by a board consisting of seven directors, including as at October 30, 2020, Bradley S. Shaw, four other members of his family, and two independent directors.

The Class A Shares are the only shares entitled to vote in all circumstances. Accordingly, SFLT and its subsidiaries are able to elect a majority of the Board of Directors of the Company and to control the vote on matters submitted to a vote of the Company's Class A Shares.

SUMMARY OF QUARTERLY RESULTS

Below is a summary of the Company's consolidated financial results and selected key performance drivers for fiscal 2020 and 2019.

	2020[1]				2019			
(millions of Canadian dollars except per share amounts)	**Q4**	**Q3**	**Q2**	**Q1**	**Q4**	**Q3**	**Q2**	**Q1**

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions below and under "Results of Operations" and "Segmented Operations Review."

(2) Adjusted EBITDA and free cash flow are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures, including how we calculate them.

(3) Net income attributable to both equity shareholders and non-controlling interests.

F20 Q4 **VS** F20 Q3	In the fourth quarter of fiscal 2020, net income decreased $9 million compared to the third quarter of fiscal 2020 mainly due to an $15 million decrease in adjusted EBITDA and a $23 million increase in current taxes in the fourth quarter as well an $8 million decrease in other gains as a result of an insurance claim recovery in the third quarter partially offset by a $35 million decrease in deferred taxes and a $14 million decrease in restructuring costs in the fourth quarter.
F20 Q3 **VS** F20 Q2	In the third quarter of fiscal 2020, net income increased $17 million compared to the second quarter of fiscal 2020 mainly due to a $26 million increase in other gains/losses, which includes the impact of the $17 million payment related to the early redemption of $800 million in senior notes in the second quarter, a $6 million insurance claim recovery, a $9 million increase in adjusted EBITDA in the third quarter and a $4 million decrease in current taxes, offset by a $14 million restructuring cost and an $8 million increase in deferred taxes, also in the third quarter.
F20 Q2 **VS** F20 Q1	In the second quarter of fiscal 2020, net income increased $5 million compared to the first quarter of fiscal 2020 mainly due to a $13 million decrease in current taxes, a $12 million increase in adjusted EBITDA and a $3 million decrease in interest expense, all in the second quarter, partially offset by a $17 million payment related to the early redemption of $800 million in senior notes and a $10 million increase in deferred taxes, also in the second quarter.
F20 Q1 **VS** F19 Q4	In the first quarter of fiscal 2020, net income decreased $4 million compared to the fourth quarter of fiscal 2019 mainly due to a $23 million decrease in deferred taxes in the first quarter. This was partially offset by a $7 million increase in current taxes in the first quarter as well as the net impact of the adoption of IFRS 16 which resulted in a decrease to operating, general and administrative costs that was more than offset by increases to amortization of property, plant and equipment, intangibles and other and interest expense.

F19 Q4 **vs** F19 Q3	In the fourth quarter of fiscal 2019, net income decreased $63 million compared to the third quarter of fiscal 2019 mainly due to a $21 million increase in current taxes in the fourth quarter, a $41 million gain on the disposal of property, plant and equipment to a related party, a $15 million gain on the sale of a portfolio investment and the $102 million impact of a tax rate change on deferred taxes, partially offset by a $109 million loss on the disposal of the Company's entire equity investment in Corus, all recorded in the third quarter.
F19 Q3 **vs** F19 Q2	In the third quarter of fiscal 2019, net income increased $74 million compared to the second quarter of fiscal 2019 mainly due to a $41 million gain on the disposal of property, plant and equipment to a related party, a $15 million gain on the sale of a portfolio investment and the $102 million impact of a tax rate change on deferred taxes, partially offset by a $109 million loss on the disposal of the Company's entire equity investment in Corus, all recorded in the third quarter.
F19 Q2 **vs** F19 Q1	In the second quarter of fiscal 2019, net income decreased $32 million compared to the first quarter of fiscal 2019 mainly due to a $20 million decrease in equity income related to the Company's investment in Corus in the quarter and higher income taxes.
F19 Q1 **vs** F18 Q4	In the first quarter of fiscal 2019, net income decreased $10 million compared to the fourth quarter of fiscal 2018 mainly due to a $12 million decrease in adjusted EBITDA and a decrease in other gains mainly related to a $16 million gain on the sale of certain wireless spectrum licences in the fourth quarter of fiscal 2018. These decreases were partially offset by a $10 million increase in equity income related to the Company's investment in Corus in the first quarter.

Fourth Quarter 2020 Highlights

The following discusses the results for the fourth quarter of fiscal 2020 (three-month period ended August 31, 2020) as compared with the results from the fourth quarter of fiscal 2019 (three-month period ended August 31, 2019).

Revenue

Consolidated revenue was comparable year-over-year at $1.35 billion.

- Wireless revenue of $294 million for the fourth quarter of fiscal 2020 increased $14 million, or 5.0%, over the fourth quarter of fiscal 2019. The increase was driven mainly by higher service revenues which contributed an incremental $27 million to consolidated revenue primarily due to higher postpaid RGUs and a 6.6% and 4.2% year-over-year increase in ABPU to $44.81 and ARPU to $39.65, respectively, reflecting the increased number of Wireless customers subscribing to higher service plans, partially offset by lower roaming revenue in the quarter due to less travel and roaming outside of the Company's wireless home network resulting from the impact of the COVID-19 pandemic. Equipment revenue decreased $13 million, or 13.5%, over the previous year due to lower subscriber activations.
- Consumer division revenue decreased $13 million, or 1.4%, to $917 million as growth in Internet revenue was offset by declines in Video, Satellite, and Phone subscribers and revenue.
- Business division revenue of $140 million was essentially flat in comparison to the fourth quarter of fiscal 2019 as impacted Business customers temporarily reduced, suspended, or cancelled their accounts due to the challenging economic environment facing businesses stemming from the COVID-19 pandemic.

Adjusted EBITDA

Adjusted EBITDA for the fourth quarter of $594 million increased $60 million, or 11.2%, from $534 million in the comparable prior year quarter. Removing the $40 million impact from IFRS 16 in the fourth quarter, adjusted EBITDA increased approximately 3.7% over the prior year quarter.

- Wireless adjusted EBITDA of $84 million for the fourth quarter of fiscal 2020 improved by $33 million, or 64.7%, over the fourth quarter of fiscal 2019. The increase reflects the impact of the adoption of IFRS 16 which contributed $20 million, or 39.2%, to the increase while the remaining increase was mainly due to postpaid RGU growth, an increase in margins due to lower equipment sales and lower acquisition related costs, and continued ARPU growth of 4.2% in the quarter.
- Wireline adjusted EBITDA for the fourth quarter of fiscal 2020 of $510 million increased 5.6%, or $27 million, from $483 million in the fourth quarter of fiscal 2019. The increase primarily reflects the impact of the adoption of IFRS 16 which contributed $20 million, or 4.1%, to the increase as well as the impact of the $10 million charge related to CRTC regulatory matters in the fourth quarter of fiscal 2019.

Adjusted EBITDA margin

Adjusted EBITDA margin for the fourth quarter of 44.0% increased 440-basis points compared to 39.6% in the fourth quarter of fiscal 2019. Excluding the impact of IFRS 16, adjusted EBITDA margin of 41.1% increased 150-basis points in comparison to the fourth quarter of fiscal 2019.

Capital expenditures and equipment

In the fourth quarter of fiscal 2020, capital investment of $307 million decreased $75 million from the comparable period in fiscal 2019. Total Wireline capital spending of $192 million decreased by approximately $42 million year-over-year primarily due to lower success-based capital and investments in new housing development. Wireless spending of $115 million decreased by approximately $33 million year-over-year primarily due to the timing of expenditures and lower planned investment in the quarter.

Amortization

Amortization of $312 million increased 24.8% compared to the fourth quarter of 2019. The increase in amortization reflects the impact of the adoption of IFRS 16 which contributed an additional $37 million, or 14.8%, in amortization related to the newly recognized right-of-use assets as well as the amortization of new expenditures exceeding the amortization of assets that became fully amortized during the period.

Interest

Interest expense of $68 million for the fourth quarter increased $2 million over the comparable prior year quarter and reflects the impact of the adoption of IFRS 16 which resulted in an additional $11 million in interest expense related to lease liabilities, partially offset by the lower average outstanding debt balances in the period.

Free cash flow

Free cash flow for the quarter of $152 million compared to $42 million in the comparable prior year quarter. The increase was largely due to higher adjusted EBITDA and lower capital expenditures and interest costs.

Income taxes

Income taxes were lower in the quarter compared to the fourth quarter of fiscal 2019 due mainly to the decrease in net income and the recognition of previously unrecognized tax losses.

Seasonality and Trends

While financial results for the Company are generally not subject to significant seasonal fluctuations, subscriber activity may fluctuate from one quarter to another. Subscriber activity may also be affected by competition and Shaw's promotional activity. Our Video subscriber activity is influenced by cord shaving and cord cutting trends, which has resulted in fewer subscribers watching traditional cable TV, as well as a lower number of TV subscribers. In addition, trends in the use of wireless products and Internet or social media as substitutes for traditional home phone products have resulted in fewer Phone subscribers. Satellite subscriber activity is modestly higher around the summertime when more subscribers have second homes in use. Wireless subscriber activity is influenced by the launch of popular new mobile devices, seasonal promotional periods, and the level of competitive intensity. Our first and fourth quarters typically experience higher volumes of wireless competitive activity as a result of back to school and holiday season-related consumer behavior. Aggressive promotional offers are often advertised during these periods which can impact our Wireless subscriber metrics. Shaw's Wireline and Wireless businesses do not depend on any single customer or concentration of customers.

Subscriber Statistics

Growth (losses) in subscriber statistics as follows:

Subscriber Statistics	2020 Opening	First	Second	Third	Fourth	Ending

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions below and under "Segmented Operations Review."

(2) Adjusted EBITDA, adjusted EBITDA margin and free cash flow are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures, including how we calculate them.

(3) Funds flow from operations is presented before changes in non-cash working capital as presented in the Consolidated Statements of Cash Flows.

Revenue and Adjusted EBITDA

Fiscal 2020 consolidated results were resilient and in line with guidance despite significant uncertainty arising from the COVID-19 pandemic and commodity price challenges. Adjusted EBITDA of $2,391 million in fiscal 2020 increased 11.0% over fiscal 2019. Removing the $158 million impact from IFRS 16 in the year, adjusted EBITDA increased approximately 3.7%. For further discussion of divisional performance see "Segmented Operations Review."

Consolidated revenue of $5.41 billion for fiscal 2020 improved 1.3% over $5.34 billion for fiscal 2019. Revenue improved primarily due to the Wireless division contributing revenues of $1,166 million in fiscal 2020 as compared to $1,047 million in the prior year. The year-over-year improvement in Wireless revenue of $119 million, or 11.4%, reflects higher service revenues of $121 million driven primarily by added postpaid RGUs, higher ARPU, and higher ABPU partially offset by lower equipment revenues of $2 million, reflecting the impact of COVID-19 on consumer activity in the second half of fiscal 2020. Wireline division revenue was down $50 million, or 1.2%. Business division revenues increased $10 million, or 1.8%, and reflect the impacts from COVID-19 on the small and medium sized business market in the second half of the year while

Consumer division revenues decreased $60 million, or 1.6%, compared to fiscal 2019 as contributions from rate adjustments and growth in Internet revenue were offset by declines in Video, Satellite, and Phone subscribers and revenue.

Adjusted EBITDA of $2.39 billion for the twelve-month period improved 11.0% compared to $2.15 billion for fiscal 2019. The improvement was primarily due to the Wireless division contributing $337 million over the twelve-month period as compared to $199 million in fiscal 2019 while the Wireline division contributed $2,054 million over the twelve-month period as compared to $1,955 million in fiscal 2019. The Wireless increase of $138 million, or 69.3%, over the comparable period reflects an increase in underlying performance of $62 million, or 31.2%, and an increase of $76 million, or 38.2%, relating to the impact of the adoption of IFRS 16. The increase in underlying performance was driven primarily by subscriber and ARPU growth. Wireline adjusted EBITDA of $2,054 million for fiscal 2020 increased 5.1%, or approximately 0.9% after removing the $82 million impact from the adoption of IFRS 16, resulting in a Wireline operating margin of 46.4%, an improvement of 90-basis points over fiscal 2019 (on pre-IFRS 16 basis). The increase also reflects the impact of the $10 million provision related primarily to the CRTC decision to reduce wholesale broadband rates available to third party Internet providers from 2016 onwards and the impact of a $15 million payment to address certain IP licensing matters, both recorded in fiscal 2019.

Restructuring costs

Restructuring costs generally include severance, employee related costs and other costs directly associated with a restructuring program. During the third quarter of fiscal 2020, the Company restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. In connection with the restructuring, the Company recorded costs of $14 million, primarily related to severance and employee related costs.

Amortization

(millions of Canadian dollars)	2020	2019	Change %
Amortization revenue (expense)			
Deferred equipment revenue	**16**	21	(23.8)
Deferred equipment costs	**(65)**	(85)	(23.5)
Property, plant and equipment, intangibles and other [(1)]	**(1,168)**	(974)	19.9

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See “New Accounting Standards” as well as discussion below.

Amortization of property, plant and equipment, intangibles and other increased 19.9% for the year ended August 31, 2020. The increase in amortization reflects the impact of the adoption of IFRS 16 which resulted in an additional $141 million in amortization related to the newly recognized right-of-use assets as well as the amortization of new expenditures exceeding the amortization of assets that became fully amortized during the period.

Amortization of financing costs and Interest expense

(millions of Canadian dollars)	2020	2019	Change %
Amortization of financing costs – long-term debt	**3**	3	–
Interest expense [(1)]	**274**	258	6.2

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See “New Accounting Standards” as well as discussion below.

Interest expense for the year ended August 31, 2020 increased over the comparable period and reflects the impact of the adoption of IFRS 16, which resulted in an additional $44 million in interest expense related to lease liabilities, partially offset by the lower average outstanding debt balances and interest rates in fiscal 2020 in comparison to fiscal 2019.

Other income and expenses

(millions of Canadian dollars)	2020	2019	Increase / (decrease)
Equity income of an associate or joint venture	–	46	(46)
Loss on disposal of an associate or joint venture	–	(109)	109
Other gains (losses)	**(16)**	50	(66)
	(16)	(13)	(3)

On May 31, 2019, the Company sold all of its 80,630,383 Corus Class B non-voting participating shares at a price of $6.80 per share. Proceeds, net of transaction costs, were $526 million, which resulted in a loss of $109 million for fiscal 2019. In fiscal 2019, the Company also recorded equity income of $46 million related to its investment in Corus. As the Company no longer had an equity investment in Corus for fiscal 2020, there was no income or loss recorded.

Other gains (losses) generally include realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities, gains and losses on disposal of property, plant and equipment and minor investments, and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership. In fiscal 2020, the category includes a net $2 million loss related to the disposal of property, plant and equipment and a $17 million debt redemption penalty related to the early redemption of $800 million in senior notes in December 2019 partially offset by a $6 million insurance claim recovery. In the prior year, the category includes a net $32 million gain on the disposal of property, plant and equipment, a $6 million gain on the disposal of a non-core business, as well as a $15 million gain on the disposal of a minor portfolio investment.

Earnings per share

(millions of Canadian dollars except per share amounts)	2020	2019	Change %
Net income [1]	**688**	733	(6.1)
Weighted average number of participating shares outstanding during period (millions)	**515**	511	
Earnings per share			
Basic and diluted	**1.32**	1.41	

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

Net income

Net income was $688 million in 2020 compared to $733 million in 2019. The year-over-year changes are summarized in the table below.[1]

(millions of Canadian dollars)	
Increased adjusted EBITDA [1][2]	**237**
Increased restructuring costs	**(23)**
Increased amortization [1]	**(179)**
Increased interest expense [1]	**(16)**
Decreased equity income of an associate or joint venture	**(46)**
Change in other net costs and revenue [3]	**43**
Increased income taxes	**(61)**
	(45)

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

(2) Adjusted EBITDA is a non-GAAP measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about this measure, including how we calculate it.

(3) Net other costs and revenue include gains and losses on disposals of fixed assets and intangibles, accretion of long-term liabilities and provisions, debt retirement costs, realized and unrealized foreign exchange differences and other losses as detailed in the Consolidated Statements of Income.

Net other costs and revenues had a $45 million favourable impact on net income primarily due to the impact of a $109 million loss related to the Company's disposal of its investment in Corus Class B non-voting participating shares recorded in the prior year, partially offset by a $15 million gain on the disposal of a minor portfolio investment and a $32 million net gain on the disposal of fixed assets and intangibles in the prior year and a $17 million debt redemption penalty in fiscal 2020.

SEGMENTED OPERATIONS REVIEW

WIRELINE

Adjusted EBITDA [(2)]	**2,054**	1,955	5.1
Adjusted EBITDA margin [(2)]	**48.3%**	45.5%	6.2

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" and discussion below.

(2) Adjusted EBITDA and adjusted EBITDA margin are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures, including how we calculate them.

Wireline RGUs decreased by 234,492 in the current fiscal year, compared to net losses of 186,973 RGUs in fiscal 2019. Total Business RGU gains of 8,825 were more than fully offset by total Consumer RGU losses of 243,317 in the year which included net losses in cable Video of 87,851, Phone of 95,135, satellite Video of 52,496, and Internet of 7,835.

Consumer revenue for the year of $3.7 billion decreased 1.6% compared to the prior year as growth in Internet revenues were more than fully offset by declines in mature products, including Video, Satellite, and Phone subscribers and revenues. Business revenue for the year of $567 million was 1.8% higher over the prior year with the modest growth reflecting the impacts from COVID-19 on the small and medium sized business market in the second half of fiscal 2020.

Adjusted EBITDA of $2.1 billion increased 5.1% over the comparable period and reflects an increase of $82 million, or 4.2%, relating to the impact of the adoption of IFRS 16 while the underlying performance increased approximately 0.9%, resulting in a Wireline operating margin of 46.4%, an improvement of 90-basis points over fiscal 2019 (on a pre-IFRS 16 basis).

WIRELESS

(millions of Canadian dollars)	2020[(1)]	2019	Change %
Service	**815**	694	17.4
Equipment and other	**351**	353	(0.6)
Wireless revenue	**1,166**	1,047	11.4
Adjusted EBITDA [(2)]	**337**	199	69.3
Adjusted EBITDA margin [(2)]	**28.9%**	19.0%	52.1

(1) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" and discussion below.

(2) Adjusted EBITDA and adjusted EBITDA margin are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures, including how we calculate them.

In Wireless, the Company gained 163,329 net postpaid and prepaid subscribers in the year, consisting of 168,347 postpaid additions offset by 5,018 prepaid losses. The increase in the customer base reflects continued customer demand for the Big Gig data-centric pricing and packaging options, including Absolute Zero, as well as the launch of Shaw Mobile in British Columbia and Alberta on July 30, 2020.

Wireless revenue for the year of $1,166 million increased $119 million, or 11.4%, over the prior year. The increase in revenue was driven primarily by year-over-year growth in service revenue while equipment revenue was essentially flat as a result of a decrease in subscriber activity relating to the temporary closure of a number of retail locations amid the COVID-19 pandemic in the second half of fiscal 2020. The increase in service revenue was driven by RGU, ABPU, and ARPU growth in which a net 168,347 postpaid subscribers were added, representing a 12.8% increase, while ABPU of $44.13 and ARPU of $38.95 in fiscal 2020 compared to $41.67 and $37.92, respectively, in the prior year.

Adjusted EBITDA for the year of $337 million increased $138 million, or 69.3%, over the prior year and reflects an increase in underlying performance of $62 million, or 31.2%, and an increase of $76 million, or 38.2%, relating to the impact of the adoption of IFRS 16. The increase in underlying performance is driven primarily by subscriber and ARPU growth.

Capital Expenditures and Equipment Costs

(millions of Canadian dollars)	Year ended August 31, 2020	2019	Change %

Total as per Note 26 to the audited annual consolidated financial statements	**296**	385	(23.1)
Consolidated total as per Note 26 to the audited annual consolidated financial statements	**1,111**	1,212	(8.3)

Capital investment was $1,111 million in fiscal 2020 compared to $1,212 million in fiscal 2019. The decrease was driven primarily by a decrease in the Wireless division as a result of lower planned capital expenditures in the year due to increased investments related to market expansion in the prior year while Wireline investment decreased primarily due to lower system network infrastructure spending.

Wireline

Success-based capital for fiscal 2020 of $243 million was $13 million lower than fiscal 2019. The current year decrease in success-based capital was due primarily to lower equipment purchases in the year and an increase in customer self-installs.

Capital spend on the combined upgrades and enhancement, and replacement categories was $357 million for the year, a $17 million decrease over fiscal 2019 driven primarily by lower planned Wireline spend on system network infrastructure.

Capital spend on new housing development of $120 million in the year was $18 million lower than the prior fiscal year, driven by a decrease in residential and commercial customer network growth and acquisition.

Investment in buildings and other of $95 million in fiscal 2020 increased $36 million over fiscal 2019 primarily related to higher corporate related costs in the period as well as the impact of proceeds on disposal of corporate assets received in the comparable period.

Wireless

Capital investment of $296 million in fiscal 2020 decreased $89 million compared to fiscal 2019, primarily due to the planned decrease in Wireless spending in the year as a result of lower costs relating to the continued deployment of 700 MHz spectrum. In fiscal 2020, the Company continued its investment in its wireless network and infrastructure, specifically in the deployment of 600 MHz spectrum and development of 5G capabilities. Enhancements to the back-office systems including the billing system and digital transformation continued along with an increased spend in the area of retail due primarily to the launch of Shaw Mobile.

FINANCIAL POSITION

Effective September 1, 2019, the Company adopted IFRS 16 and IFRIC 23 and has not restated comparatives for fiscal 2019. For the purposes of this analysis, the Company will therefore use September 1, 2019 figures for comparative purposes. See "New Accounting Standards" for more information.

Total assets were $16.2 billion at August 31, 2020, compared to $17.0 billion at September 1, 2019. The following is a discussion of significant changes in the Consolidated Statements of Financial Position since September 1, 2019.

Current assets decreased $700 million primarily due to decreases in cash of $683 million, accounts receivable of $19 million, and inventories of $26 million. These decreases were partially offset by an increase in current portion of contract assets of $26 million and other current assets of $2 million. Cash decreased primarily due to the repayment of $2.05 billion of senior notes offset by the issuance of senior notes totaling $1.30 billion and other financing activities as well as cash outlays for investing activities partially offset by funds flow from continuing operations. Refer to "Liquidity and Capital Resources" for more information.

The current portion of contract assets increased during the year mainly due to the prior year increase in Wireless subscribers participating in the Company's discretionary wireless handset discount program. Under IFRS 15, the portion of this discount relating to the handset is applied against equipment revenue at the point in time that the handset is transferred to the customer while the portion relating to service revenue is recorded as a contract asset and amortized over the life of the contract against future service revenues.

Property, plant and equipment decreased $79 million as the amortization of capital and right-of-use assets exceeded the capital investments and additions to right-of-use assets in the year.

Contract assets decreased $12 million during the year mainly due to a decrease in Wireless subscribers participating in the Company's discretionary wireless handset discount program in the second half of fiscal 2020 primarily due to lower activity associated with the temporary closure of a significant number of retail stores in response to the COVID-19 pandemic.

Current liabilities decreased $1.24 billion during the year primarily due to a decrease in the current portion of long-term debt of $1.25 billion due to the repayment of senior notes in October 2019, a decrease in accounts payable and accrued liabilities of $16 million, a decrease in current provisions of $118 million, a decrease in income taxes payable of $14 million and a $12 million decrease in the current portion of contract liabilities. This was partially offset by an increase in short-term borrowings of $160 million.

Accounts payable and accruals decreased due to the timing of payment and fluctuations in various payables including capital expenditures, interest, and programming costs. The decrease in current provisions was mainly due to the payment of restructuring costs of $130 million related to the TBT in fiscal 2020.

Short-term borrowings increased due to the draw of an additional $160 million under the Company's accounts receivable securitization program.

Long-term debt increased $490 million primarily due to the issuance of senior notes totaling $1.3 billion, partially offset by the early redemption of other senior notes totaling $800 million.

Shareholders' equity decreased $30 million mainly due to a decrease in retained earnings. Retained earnings decreased as the current period income of $688 million was more than fully offset by dividends of $617 million and shares repurchased under the NCIB program of $91 million. Share capital decreased $3 million due to the impact of 5,614,672 shares repurchased under the terms of the Company's NCIB program which was partially offset by the issuance of 1,857,734 Class B Non-Voting Shares under the Company's stock option plan and Dividend Reinvestment Plan (DRIP). Accumulated other comprehensive loss increased $5 million.

As at October 15, 2020, share capital is as reported at August 31, 2020 with the exception of the issuance of a total 14,250 Class B Non-Voting Shares upon exercise of options under the Company's option plan.

CONSOLIDATED CASH FLOW ANALYSIS

Operating activities

(millions of Canadian dollars)	2020	2019	Change %
Funds flow from continuing operations	**1,989**	1,777	11.9
Net change in non-cash working capital balances related to continuing operations	**(69)**	(209)	(67.0)
	1,920	1,568	22.4

Funds flow from operations in fiscal 2020 increased over the comparable period primarily due to an increase in the funds flow from operations which reflects the impact of the adoption of IFRS 16 where payments related to lease liabilities are reflected under financing activities for the period and an increase in the net change in non-cash balances related to operations. The net change in non-cash balances related to operations fluctuated over the comparative period due to changes in accounts receivable, inventory, and other current asset balances, and the timing of payment of current income taxes payable and accounts payable and accrued liabilities.

Investing activities

(millions of Canadian dollars)	2020	2019	Increase
Cash flow used in investing activities	**(1,154)**	(1,133)	21

In fiscal 2020, cash used in investing activities increased over the comparable period primarily due to proceeds of $551 million received from the sale of our investment in Corus and other investments and $90 million in proceeds generated from the disposal of a non-core business and property, plant and equipment all in the prior year partially offset by lower outlays for capital expenditures in the year as compared to the prior year and a $492 million decrease year-over-year in spectrum purchases.

Financing activities

The changes in financing activities during 2020 and 2019 were as follows:

(millions of Canadian dollars)	2020	2019
Increase in short-term borrowings	**160**	–
Issuance of long-term debt	**1,300**	1,000
Repayment of long-term debt	**(2,068)**	–
Bank facility and long-term debt costs	**(14)**	(9)
Payment of lease liabilities	**(112)**	–
Issuance of Class B Non-Voting Shares	**9**	35
Purchase of Class B Non-Voting Shares	**(140)**	–
Dividends paid on Class A Shares and Class B Non-Voting Shares	**(573)**	(389)
Dividends paid on Preferred Shares	**(9)**	(9)
Payment of distributions to non-controlling interests	**(2)**	–
Other	**–**	(1)
	(1,449)	627

The increase in the payment of lease liabilities in fiscal 2020 reflects the impact of the adoption of IFRS 16 in the current year with these outflows reflected in operating activities in fiscal 2019. See "New Accounting Standards" for further detail.

LIQUIDITY AND CAPITAL RESOURCES

In fiscal 2020, the Company generated $747 million of free cash flow. Shaw used its free cash flow along with cash of $763 million, $1,286 million net proceeds from senior note issuances, $160 million net proceeds from its accounts receivable securitization program, and proceeds from the issuance of Class B Non-Voting Shares of $9 million to fund the net working capital change of $34 million, pay common share dividends of $573 million, repay at maturity $1.25 billion 5.65% senior notes, repurchase $140 million of Class B Non-Voting Shares under the Company's NCIB program, and pay $143 million for amounts related to restructuring costs.

The Company issued Class B Non-Voting Shares from treasury under its DRIP which resulted in cash savings and incremental Class B Non-Voting Shares of $37 million during fiscal 2020.

Debt structure and financial policy

Shaw structures its borrowings generally on an unsecured and standalone basis. While certain non-wholly owned subsidiaries are subject to contractual restrictions which may prevent the transfer of funds to Shaw, there are no similar restrictions with respect to wholly-owned subsidiaries of the Company.

The Company issued Class B Non-Voting Shares from treasury under its DRIP and incremental Class B Non-Voting Shares of $37 million during the year ended August 31, 2020. On October 25, 2019, and in accordance with the terms of its DRIP, the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Non-Voting Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Non-Voting Shares delivered under the DRIP. These changes to the DRIP were first applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019.

The Company has an accounts receivable securitization program with a Canadian financial institution which allows it to sell certain trade receivables into the program. As at August 31, 2020, the proceeds of the sales were committed up to a maximum of $200 million (with $200 million drawn under the program as at August 31, 2020). The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables remain recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivables has no claim on any of our other assets.

As at August 31, 2020, the net debt leverage ratio for the Company was 2.3x. Considering the prevailing competitive, operational and capital market conditions, the Board of Directors has determined that having this ratio in the range of 2.5x to 3.0x would be optimal leverage for the Company in the current environment. This target was updated from 2.0x to 2.5x in November 2019 based on the impact of IFRS 16. Should the ratio fall below this, other than on a temporary basis, the Board may choose to recapitalize back into this optimal range. The Board may also determine to increase the Company's debt above these levels to finance specific strategic opportunities such as a significant acquisition or repurchase of Class B Non-Voting Shares in the event that pricing levels were to drop precipitously.

The Company calculates net debt leverage ratio as follows [(1)]:

(millions of Canadian dollars)	2020	2019
Short-term borrowings	**200**	40
Current portion of long-term debt	**1**	1,251
Current Portion of Lease Liabilities	**113**	–
Long-term debt	**4,547**	4,057
Lease Liabilities	**1,157**	–
50% of outstanding preferred shares	**147**	147
Cash	**(763)**	(1,446)
(A) Net debt [(2)]	**5,402**	4,049
Adjusted EBITDA [(2)(3)]	**2,391**	2,154
Corus dividends	**–**	10
(B) Adjusted EBITDA [(2)(3)] **including Corus dividends**	**2,391**	2,164
(A/B) Net debt leverage ratio [(2)(3)]	**2.3x**	1.9x

(1) The following contains a description of the Company's use of non-GAAP financial measures, provides a reconciliation to the nearest IFRS measure or provides a reference to such reconciliation.

(2) Net debt, adjusted EBITDA, and net debt leverage ratio are non-GAAP measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for information about these measures.

(3) Fiscal 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as discussions under "Results of Operations" and "Segmented Operations Review."

On October 29, 2019, the Company announced that it had received approval from the TSX to establish a NCIB program. The NCIB program commenced on November 1, 2019 and remains in effect until October 31, 2020. As approved by the TSX, the Company has the ability to purchase for cancellation up to

24,758,127 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 18, 2019.

During the year ended August 31, 2020, the Company purchased 5,614,672 Class B Non-Voting Shares for cancellation for a total cost of approximately $140 million under the NCIB program. The Company suspended share repurchases under its NCIB program in April 2020.

On October 1, 2019, the Company repaid the $1.25 billion of 5.65% senior notes at maturity with cash on hand.

On December 9, 2019, the Company issued $800 million of senior notes, consisting of $500 million principal amount of 3.30% senior notes due 2029 and $300 million principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792 million, along with cash on hand, were used to fund the redemption of the $500 million principal amount of 5.50% senior notes due 2020 and the $300 million principal amount of 3.15% senior notes due 2021 as noted below.

On December 12, 2019, the Company drew an additional $80 million under its accounts receivable securitization program, bringing the total amount drawn under the program to $200 million. The program is now fully drawn.

On December 24, 2019, the Company redeemed the $500 million principal amount of 5.50% senior notes due December 7, 2020 and the $300 million principal amount of 3.15% senior notes due February 19, 2021. In conjunction with the redemption, the Company paid make whole premiums of $17 million and accrued interest of $5 million. The Company has no senior note maturities until November 2023.

On April 22, 2020, the Company issued $500 million principal amount of 2.90% senior notes due December 9, 2030.

Shaw's credit facilities are subject to customary covenants which include maintaining minimum or maximum financial ratios. At August 31, 2020, Shaw is in compliance with these covenants and, based on current business plans, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants over the life of the borrowings.

	Covenant as at August 31, 2020	Covenant Limit
Shaw Credit Facilities		
Total Debt to Operating Cash Flow (1) Ratio	1.82:1	< 5.00:1
Operating Cash Flow (1) to Fixed Charges (2) Ratio	9.84:1	> 2.00:1

(1) Operating Cash Flow, for the purposes of the covenants, is calculated as net earnings before interest expense, depreciation, amortization, restructuring, and current and deferred income taxes, excluding profit or loss from investments accounted for on an equity basis, less payments made with regards to lease liabilities for the most recently completed fiscal quarter multiplied by four, plus cash dividends and other cash distributions received in the most recently completed four fiscal quarters from investments accounted for on an equity basis.

(2) Fixed Charges are defined as the aggregate interest expense, excluding the interest related to lease liabilities, for the most recently completed fiscal quarter multiplied by four.

Subsequent to year-end, on October 29, 2020, the Company's Board of Directors approved the renewal of the NCIB program to purchase up to 24,532,404 Class B Non-Voting Shares, representing 5% of all of the issued and outstanding Class B Non-Voting Shares as of October 22, 2020. The NCIB program remains subject to approval by the TSX and, if accepted, will be conducted in accordance with the applicable rules and policies of the TSX and applicable Canadian securities law.

Preferred Share Dividends

On June 30, 2016, 1,987,607 of the Company's Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A ("Series A Shares") were converted into an equal number of Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B ("Series B Shares") in accordance with the notice of conversion right issued on May 31, 2016. As a result of the conversion, the Company has 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. The Series A Shares will continue to be listed on the TSX under the symbol SJR.PR.A. The Series B Shares began trading on the TSX on June 30, 2016 under the symbol SJR.PR.B. The annual fixed dividend rate for the Series A Shares, payable quarterly, was reset to 2.791% for the five-year period from and including June 30, 2016 to but excluding June 30, 2021. The floating quarterly dividend rates for the Series B Shares were set as follows:

Period	Annual Dividend Rate
June 30, 2016 to September 29, 2016	2.539%
September 30, 2016 to December 30, 2016	2.512%
December 31, 2016 to March 30, 2017	2.509%
March 31, 2017 to June 29, 2017	2.480%
June 30, 2017 to September 29, 2017	2.529%
September 30, 2017 to December 30, 2017	2.742%
December 31, 2017 to March 30, 2018	2.872%
March 31, 2018 to June 29, 2018	3.171%
June 30, 2018 to September 29, 2018	3.300%
September 30, 2018 to December 30, 2018	3.509%
December 31, 2018 to March 30, 2019	3.713%
March 31, 2019 to June 29, 2019	3.682%
June 30, 2019 to September 29, 2019	3.687%
September 30, 2019 to December 30, 2019	3.638%
December 31, 2019 to March 30, 2020	3.652%
March 31, 2020 to June 29, 2020	3.638%
June 30, 2020 to September 29, 2020	2.255%
September 30, 2020 to December 30, 2020	2.149%

The floating quarterly dividend rate will be reset quarterly.

Based on the aforementioned financing activities, available credit facilities and forecasted free cash flow, the Company expects to have sufficient liquidity to fund operations and obligations, including maturing debt, during the upcoming fiscal year. On a longer-term basis, Shaw expects to generate free cash flow and have borrowing capacity sufficient to finance foreseeable future business plans and refinance maturing debt.

Off-balance sheet arrangement and guarantees

Guarantees

Generally, it is not the Company's policy to issue guarantees to non-controlled affiliates or third parties; however, it has entered into certain agreements as more fully described in Note 27 to the Consolidated Financial Statements. As disclosed therein, Shaw believes it is remote that these agreements would require any cash payment.

Contractual obligations

The amounts of estimated future payments under the Company's contractual obligations at August 31, 2020 are detailed in the following table.

	Payments due by period				
(millions of Canadian dollars)	Total	Within 1 year	2 – 3 years	4 – 5 years	More than 5 years
Short-term borrowings	200	200	–	–	–
Long-term debt (1)	7,549	219	938	910	5,482
Lease liabilities	1,631	154	288	273	916
Purchase obligations (2)	1,158	501	311	232	114
Property, plant and equipment	217	184	30	3	–
	10,755	1,258	1,567	1,418	6,512

(1) Includes principal repayments and interest payments.
(2) Includes contractual obligations under service, product, and wireless device contracts, program related agreements and exclusive rights to use intellectual property in Canada.

Share Capital and Listings

The Company is authorized to issue a limited number of Class A Shares; an unlimited number of Class B Non-Voting Shares; an unlimited number of Class 1 Preferred Shares issuable in series; and an unlimited number of Class 2 Preferred Shares issuable in series, of which 12,000,000 were designated the Series A Shares and 12,000,000 were designated the Series B Shares. The authorized number of Class A Shares is limited, subject to certain exceptions, to the lesser of that number of such shares (i) currently issued and outstanding; and (ii) that may be outstanding after any conversion of Class A Shares into Class B Non-Voting Shares.

As at October 15, 2020, there are 22,372,064 Class A Shares, 490,647,083 Class B Non-Voting Shares, 10,012,393 Series A Shares, and 1,987,607 Series B Shares issued and outstanding. There were also 7,212,880 options to purchase Class B Non-Voting Shares and 14,281 RSUs that will settle in Class B Non-Voting Shares issued from treasury outstanding. Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Trading Symbols: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

The following table sets forth, for each month during the fiscal year ending August 31, 2020, the monthly price range and volume traded for the Class A Shares on the TSX Venture Exchange (TSXV) and for the Class B Non-Voting Shares, Series A Shares, and Series B Shares on the TSX.

	Class A Shares(1) TSX Venture-SJR.A			Class B Non-Voting Shares(1) TSX-SJR.B			Series A Shares(1) TSX-SJR.PR.A			Series B Shares(1) TSX-SJR.PR.B

Share Splits

There have been four splits of the Company's Class A and Class B Non-Voting Shares: July 30, 2007 (2 for 1); February 7, 2000 (2 for 1); May 18, 1994 (2 for 1); and September 23, 1987 (3 for 1). In addition, as a result of the Arrangement referred to in the Management Information Circular dated July 22, 1999, a Shareholder's Adjusted Cost Base was reduced for tax purposes.

ADDITIONAL INFORMATION

Additional information relating to Shaw, including the Company's 2020 Annual Information Form, can be found on SEDAR at www.sedar.com.

COMPLIANCE WITH NYSE CORPORATE GOVERNANCE LISTING STANDARDS

Disclosure of the Company's corporate governance practices which differ from the New York Stock Exchange (NYSE) corporate governance listing standards are posted on Shaw's website, www.shaw.ca (under Investor Relations, Corporate Governance, Compliance with NYSE Corporate Governance Listing Standards).

CERTIFICATION

The Company's Executive Chair & Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer have filed certifications regarding Shaw's disclosure controls and procedures and internal control over financial reporting (ICFR).

As at August 31, 2020, the Company's management, together with its Executive Chair & Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer, has evaluated the effectiveness of the design and operation of each of the Company's disclosure controls and procedures and ICFR. Based on these evaluations, the Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer have concluded that the Company's disclosure controls and procedures and the Company's ICFR are effective.

Other than the items described below, there have been no changes in the Company's ICFR during the fiscal year that have materially affected, or are reasonably likely to materially affect, Shaw's ICFR.

On September 1, 2019, the Company adopted IFRS 16 *Leases* and implemented a new lease accounting system that enabled it to comply with the IFRS 16 requirements. As a result, certain additions and modifications have been made to the Company's ICFR. Notably, the Company has:

- updated its policies and procedures related to leases; and
- implemented controls surrounding the recently implemented lease accounting system to ensure the inputs, processes and outputs are accurate

The design of any system of controls and procedures is based in part upon certain assumptions about the likelihood of certain events. There can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote.

Reports

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING AND REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

October 30, 2020

Management's Responsibility for Financial Reporting

The accompanying consolidated financial statements of Shaw Communications Inc. and all the information in this annual report are the responsibility of management and have been approved by the Board of Directors.

The financial statements have been prepared by management in accordance with International Financial Reporting Standards (IFRS). When alternative accounting methods exist, management has chosen those it deems most appropriate in the circumstances. Financial statements are not precise since they include certain amounts based on estimates and judgments. Management has determined such amounts on a reasonable basis in order to ensure that the financial statements are presented fairly, in all material respects. Management has prepared the financial information presented elsewhere in the annual report and has ensured that it is consistent with the financial statements.

Management has a system of internal controls designed to provide reasonable assurance that the financial statements are accurate and complete in all material respects. The internal control system includes an internal audit function and an established business conduct policy that applies to all employees. Management believes that the systems provide reasonable assurance that transactions are properly authorized and recorded, financial information is relevant, reliable and accurate and that the Company's assets are appropriately accounted for and adequately safeguarded.

The Board of Directors is responsible for ensuring management fulfils its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board carries out this responsibility through its Audit Committee.

The Audit Committee is appointed by the Board and its directors are unrelated and independent. The Committee meets periodically with management, as well as the external auditors, to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues; to satisfy itself that each party is properly discharging its responsibilities; and, to review the annual report, the financial statements and the external auditors' report. The Audit Committee reports its findings to the Board for consideration when approving the financial statements for issuance to the shareholders. The Committee also considers, for review by the Board and approval by the shareholders, the engagement or re-appointment of the external auditors.

The financial statements have been audited by Ernst & Young LLP, the external auditors, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB")" on behalf of the shareholders. Ernst & Young LLP has full and free access to the Audit Committee.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Also, projections of any of the effectiveness of internal control are subject to the risk that the controls may become inadequate because of changes in conditions or that the degree of compliance with the policies and procedures may deteriorate. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the financial statement preparation and presentation.

Management conducted an evaluation of the effectiveness of the system of internal control over financial reporting based on the framework in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded that the Company's system of internal control over financial reporting was effective as at August 31, 2020.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Shaw Communications Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statements of financial position of Shaw Communications Inc. (the "Company") as of August 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at August 31, 2020 and 2019, and its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standards Board.

Adoption of IFRS 16

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for leases in 2020 due to the adoption of *IFRS 16 – Leases.*

Report on internal control over financial reporting

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of August 31, 2020, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission framework (2013) and our report dated October 30, 2020 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing a separate opinion on the critical audit matters or on the accounts or disclosures to which it relates.

Key Audit Matter	***Valuation of the Wireless cash generating unit's indefinite-life intangibles***
Description of the Matter	As more fully described in Note 9 to the consolidated financial statements, the Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2020 and the recoverable amount of the cash generating units exceeds their carrying value. Management performed an assessment of indicators of impairment as at August 31, 2020. Auditing management's impairment test is complex and judgmental due to the estimation required in determining the recoverable amount of the cash generating units. The recoverable amount was estimated using a discounted cash flow and is sensitive to assumptions such as revenue growth rate, earnings growth rate, earnings before interest, tax and amortization margin, terminal operating discount rate, terminal growth rate and terminal operating income before restructuring costs and amortization multiple.
How We Addressed the Matter in Our Audit	We obtained an understanding of management's process for performing their impairment assessment. We evaluated the design and tested the operating effectiveness of controls over the Company's processes to determine the recoverable amount. For example, we tested controls over the Company's strategic planning process as well as controls over the review of the significant assumptions in estimating the recoverable amount of the cash generating units. To test the estimated recoverable amount of the goodwill and indefinite-life intangible assets, our audit procedures included, among others, assessing the methodology used and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. We also involved an EY valuation specialist to assist us. We compared the significant assumptions used by management to historical and current trends. We audited the forecasted revenue by evaluating future subscriber growth, expected customer churn, and average rate per subscriber unit. We assessed the historical accuracy of management's estimates and performed sensitivity analyses on significant assumptions to evaluate changes in the recoverable amount of the cash generating units that would result from changes in the assumptions. We obtained management's assessment of indicators of impairment as at August 31, 2020 and evaluated management's assessment through review of actual results and the updated revenue forecast. We assessed the adequacy of the Company's disclosure in the consolidated financial statements.
Key Audit Matter	***Adoption of International Financial Reporting Standard 16 – Leases***
Description of the Matter	As more fully described in Note 2 to the consolidated financial statements, the Company's adoption of International Financial Reporting Standard 16 – Leases (IFRS 16), resulted in a transition adjustment as at September 1, 2019 to the opening balance sheet of $1,322 million increasing both property, plant and equipment and lease liabilities. The Company leases a significant number of assets which were previously classified as operating leases under IAS 17 Leases and held off balance sheet. Ensuring that all the leases subject to IFRS 16 are appropriately recorded in the consolidated financial statements is complex, primarily due to the large number of leases held by the Company. There is a risk that the lease data is incomplete or inaccurate. The application of IFRS 16 requires judgement in determining the lease term, including whether or not to exercise a renewal or termination option. The lease liability in each case needs to be discounted using an appropriate rate, the determination of which requires management judgement.
How We Addressed the Matter in Our Audit	We tested controls that address the risk of material misstatement related to the measurement of the transitional adjustment. For example, we tested controls over management's review of contract terms, including whether to exercise a renewal or termination option, and determining the discount rate used for discounting future cash flows. We also tested controls over management's procedures to ensure completeness of the population of contracts. We tested completeness of the lease data by reconciling to the Company's operating lease commitments as reported in the prior year's financial statements and reconciling to cash outflows during the year. We verified the accuracy of the underlying lease data by agreeing a representative sample of leases to original contracts and checked the integrity and mechanical accuracy of the IFRS 16 calculations for each lease sampled through recalculation of the expected IFRS 16 adjustment, including the application of an appropriate discount rate. We tested management's determination of the lease terms through review of historical practices and review of management's future plans. Our EY valuation specialist assisted us to review management's methodology and the application of the discount rate by evaluating the inputs through the use of market data.

Calgary, Canada
October 30, 2020

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Shaw Communications Inc.:

Opinion on Internal Control over Financial Reporting

We have audited Shaw Communications Inc.'s internal control over financial reporting as of August 31, 2020, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, Shaw Communications Inc. (the "Company") maintained, in all material respects, effective internal control over financial reporting as of August 31, 2020, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated statements of financial position as at August 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and the related notes and our report dated October 30, 2020 expressed an unqualified opinion thereon.

Basis of Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Controls over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all amounts in millions of Canadian dollars except share and per share amounts)

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, business and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless").

The Company was incorporated under the laws of the Province of Alberta on December 9, 1966 under the name Capital Cable Television Co. Ltd. and was subsequently continued under the Business Corporations Act (Alberta) on March 1, 1984 under the name Shaw Cablesystems Ltd. Its name was changed to Shaw Communications Inc. on May 12, 1993. The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange and New York Stock Exchange (NYSE) (Symbol: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). The registered office of the Company is located at Suite 900, 630 – 3rd Avenue S.W., Calgary, Alberta, Canada T2P 4L4.

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The consolidated financial statements of the Company for the years ended August 31, 2020 and 2019, were approved by the Board of Directors on October 29, 2020 and authorized for issue.

Basis of presentation

These consolidated financial statements have been prepared primarily under the historical cost convention and are expressed in millions of Canadian dollars unless otherwise indicated. Other measurement bases used are outlined below and in the applicable notes. The consolidated statements of income are presented using the nature classification for expenses.

Certain comparative figures have been reclassified to conform to the current year's presentation.

Basis of consolidation

(i) Subsidiaries

The consolidated financial statements include the accounts of the Company and those of its subsidiaries, which are entities over which the Company has control. Control exists when the Company has power over an investee, is exposed to or has rights to variable returns from its involvement and has the ability to affect those returns. Intercompany transactions and balances are eliminated on consolidation. The results of operations of subsidiaries acquired during the period are included from their respective dates of acquisition, being the time at which the Company obtains control. Consolidation of a subsidiary ceases when the Company loses control. A change in ownership interests of a subsidiary, without a loss of control, is accounted for as an equity transaction. The Company assesses control through share ownership and voting rights.

Non-controlling interests arise from business combinations in which the Company acquires less than 100% ownership interest. At the time of acquisition, non-controlling interests are measured at either fair value or their proportionate share of the fair value of the acquiree's identifiable assets. The Company determines the measurement basis on a transaction by transaction basis. Subsequent to acquisition, the carrying amount of non-controlling interests is increased or decreased for their share of changes in equity.

(ii) Joint operations

A joint operation is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. The consolidated financial statements include the Company's proportionate share of the assets, liabilities, revenues, and expenses of its interests in joint operations.

The Company's joint operations consist of a 33.33% interest in the Burrard Landing Lot 2 Holdings Partnership (the "Partnership"). The Partnership owns and leases commercial space in Shaw Tower in Vancouver, BC, which is the Company's headquarters for its lower mainland operations. In classifying its 33.33% interest in the Partnership as a joint operation, the Company considered the terms and conditions of the partnership agreement and other facts and circumstances including the primary purpose of Shaw Tower which is to provide lease space to the partners.

Investments in associates

Associates are entities over which the Company has significant influence. Significant influence is the power to participate in the operating and financial policies of the investee, but is not control or joint control.

Investments in associates are accounted for using the equity method. Investments of this nature are recorded at original cost and adjusted periodically to recognize the Company's proportionate share of the associate's or joint venture's net income/loss and other comprehensive income/loss after the date of investment, additional contributions made and dividends received.

The Company classified its approximate 38% participating interest in Corus Entertainment Inc. ("Corus") as an investment in an associate after considering both companies are subject to common control and the ability of the Company to appoint directors to Corus' Board of Directors. On May 31, 2019, the Company sold all of its interest in Corus.

Revenue and expenses

The Company has multiple deliverable arrangements comprised of upfront fees (subscriber connection and installation fee revenue, customer premise equipment revenue, handset equipment revenue) and related subscription and service revenue. Upfront fees charged to customers do not constitute separate units of accounting, therefore these revenue streams are assessed as an integrated package.

(i) Revenue

The Company records revenue from contracts with customers in accordance with the following five steps:

(1) identify the contract(s) with a customer;

(2) identify the performance obligations in the contract;

(3) determine the transaction price;

(4) allocate the transaction price to the performance obligations in the contract; and,

(5) recognize revenue when (or as) we satisfy a performance obligation.

Revenue for each performance obligation is recognized either over time or at a point in time. For performance obligations satisfied over time, revenue is recognized as the services are provided. Revenues on certain long-term contracts are recognized using output methods based on products delivered, performance completed to date and time elapsed. Revenue from Cable, Internet, Phone, Direct-to-Home (DTH) and Wireless customers includes subscriber revenue earned as services are provided. Satellite distribution services and telecommunications service revenue is recognized in the period in which the services are rendered to customers. In addition to monthly service plans, the Company also offers multi-year service plans in which the total amount of the contractual service revenue is accounted for on a straight-line basis over the term of the plan. Fees for wireless voice, text and data services on a pay-per-use basis are recognized in the period that the service is provided.

Revenue from data centre customers includes colocation and other services revenue, including managed infrastructure revenue. Colocation revenue is recognized on a straight-line line basis over the term of the customer contract. Other services revenue, including managed infrastructure revenue, is recognized as the services are provided.

Revenue for performance obligations satisfied at a point in time is recognized when control of the item or service transfers to the customer. Revenue from the direct sale of equipment to wireless subscribers or dealers is recognized when the equipment is delivered and accepted by the subscribers or dealers.

For bundled arrangements (e.g. wireless handsets, voice and data services, internet services), items are accounted for as separate performance obligations if the item meets the definition of a distinct good or service. Stand-alone selling prices are determined using observable prices adjusted for market conditions and other factors, as appropriate. The Company offers a discretionary wireless handset discount program, whereby the subscriber earns the applicable discount by maintaining services with the Company, such that the receivable relating to the discount at inception of the transaction is reduced over a period of time. This discount is allocated proportionately between the equipment and service revenues, with the equipment discount recognized when the handset is delivered and the corresponding service discount is classified as a contract asset. The contract asset is reduced on a straight-line basis over the period which the discount is forgiven to a maximum of two years with an offsetting reduction to service revenue. The Company also offers a plan allowing customers to receive a larger up-front handset discount than they would otherwise qualify for if they pay a predetermined incremental charge to their existing service plan on a monthly basis. The charge is billed on a monthly basis but is recognized as revenue when the handset is delivered and accepted by the subscriber. The amount receivable is classified as part of other current or other long-term assets, as applicable, in the consolidated statement of financial position. When wireless equipment and services are bundled with wireline services, revenue is allocated across the Company's segments based on the relative stand-alone selling prices of the goods and services delivered.

When a customer can modify their contract within predefined terms such that we are not able to enforce the transaction price agreed to, but can only contractually enforce a lower amount, we allocate revenue between performance obligations using the minimum enforceable rights and obligations and any excess amount is recognized as revenue as its earned.

(ii) Contract assets and liabilities

We record a contract asset when we have provided goods and services to our customer but our right to related consideration for the performance obligation is conditional on satisfying other performance obligations. Contract assets are transferred to trade receivables when our right to consideration becomes conditional only as to the passage of time. A contract liability is recognized when we receive consideration in advance of the transfer of products or services to the customer. We account for contract assets and liabilities on a contract-by-contract basis, with each contract presented as either a net contract asset or a net contract liability accordingly.

Subscriber connection fees received from Cable, Internet, Phone and Wireless customers are deferred as contract liabilities and recognized as revenue on a straight-line basis over two to three years. The costs of physically connecting a new home are capitalized as part of the distribution system and costs of disconnections are expensed as incurred.

Initial setup fees related to the installation of data centre services and installation revenue received on contracts with commercial business customers are deferred as contract liabilities and recognized as revenue on a straight-line basis over the related service contract, which generally span two to ten years. Direct and incremental costs associated with the installation of services or service contract, in an amount not exceeding the upfront revenue, are deferred as contract assets and recognized as an operating expense on a straight-line basis over the same period.

(iii) Deferred commission cost assets

We defer the incremental cost to obtain or fulfill a contract with a customer over their expected period of benefit to the extent they are recoverable. These costs include certain commissions paid to internal and external representatives. We defer them as deferred commission cost assets in other assets and amortize them to operating costs over the pattern of the transfer of goods and services to the customer, which is typically evenly over either 24 or 36 consecutive months.

Direct and incremental initial selling, administrative and connection costs, including commissions related to subscriber acquisitions are deferred and recognized as an operating expense on a straight-line basis over three years.

(iv) Deferred equipment revenue and deferred equipment costs

Revenue from sales of DTH equipment is deferred and recognized on a straight-line basis over three years commencing when subscriber service is activated. The total cost of the equipment, including installation, represents an inventoriable cost which is deferred and recognized on a straight-line basis over the same period. The DTH equipment is generally sold to customers at cost or a subsidized price in order to expand the Company's customer base.

Recognition of deferred equipment revenue and deferred equipment costs is recorded as deferred equipment revenue amortization and deferred equipment costs amortization, respectively.

(v) Deferred IRU revenue

Prepayments received under indefeasible right to use (IRU) agreements are amortized on a straight-line basis into income over the term of the agreement and included in amortization of property, plant and equipment, intangibles and other in the consolidated statements of income.

Cash

Cash is presented net of outstanding cheques. When the amount of outstanding cheques and the amount drawn under the Company's revolving term facility are greater than the amount of cash, the net amount is presented as bank indebtedness.

Securitization of trade receivables

Sales of trade receivables in securitization transactions are recognized as collateralized short-term borrowings as we do not transfer control and substantially all the risks and rewards of ownership to another entity and thus do not result in our de-recognition of the trade receivables sold.

Allowance for doubtful accounts

The Company maintains an allowance for doubtful accounts for the estimated expected credit losses resulting from the inability of its customers to make required payments. In determining the allowance, the Company considers factors such as the number of days the account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances.

Inventories

Inventories include subscriber equipment such as DTH receivers, which are held pending rental or sale at cost or at a subsidized price and wireless handsets, accessories and SIM cards. When subscriber DTH equipment is sold, the equipment revenue and equipment costs are deferred and amortized over three years. When the subscriber equipment is rented, it is transferred to property, plant and equipment and amortized over its useful life. Inventories are determined on a first-in, first-out basis, and are stated at cost due to the eventual capital nature as either an addition to property, plant and equipment or deferred equipment costs.

Inventories of wireless handsets, accessories and SIM cards are carried at the lower of cost and net realizable value. Cost is determined using the weighted average method and includes expenditures incurred in acquiring the inventories and bringing them to their existing condition and location. Net realizable value is the estimated selling price in the ordinary course of business, less selling expenses.

Property, plant and equipment

Property, plant and equipment are recorded at purchase cost. Direct labour and other directly attributable costs incurred to construct new assets, upgrade existing assets and connect new subscribers are capitalized as well as borrowing costs on qualifying assets. In addition, any asset removal and site restoration costs in connection with the retirement of assets are capitalized. Repairs and maintenance expenditures are charged to operating expense as incurred. Amortization is recorded on a straight-line basis over the estimated useful lives of assets as follows:

Asset	Estimated useful life
Cable, Wireless and telecommunications distribution system	3 – 20 years
Digital cable terminals and modems	3 – 5 years
Satellite audio, video and data network equipment and DTH receiving equipment	3 – 15 years
Buildings	15 – 40 years
Data processing	4 – 10 years
Other	4 – 20 years

The Company reviews the estimates of useful lives on a regular basis.

Leases

The Company adopted IFRS 16 as of September 1, 2019. The company continues to apply IAS 17 in its comparative financial statements.

(i) IFRS 16

Leases are typically entered into for network infrastructure and equipment, including transponders, and land and buildings relating to the Company's wireless and wireline networks, office space and retail stores. At inception of a contract, the Company assesses whether the contract contains a lease. A lease contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

Lease liabilities are initially measured at the present value of future lease payments at the commencement date, discounted using the interest rate implicit in the lease or, if not readily determinable, the Company's incremental borrowing rate. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Lease payments included in the measurement of the lease liability consist of:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or rate;
- amounts expected to be payable under a residual value guarantee; and
- payments relating to purchase options and renewal option periods that are reasonably certain to be exercised, or periods subject to termination options that are not reasonably certain to be exercised.

The initial lease term included in the measurement of the lease liability consists of:

- the non-cancellable period of the lease;
- periods covered by options to extend the lease, where the Company is reasonably certain to exercise the option; and
- periods covered by options to terminate the lease, where the Company is reasonably certain not to exercise the option.

Lease liabilities are subsequently measured at amortized cost. Lease liabilities are remeasured when there is a lease modification, and a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The interest expense for lease liabilities is recorded in *Interest expense* in the Consolidated Statements of Income.

Variable lease payments that do not depend on an index or rate are not included in the measurement of lease liabilities and right-of-use assets. The related payments are expensed in *Operating, general and administrative expenses* in the period in which the event or condition that triggers those payments occurs.

Right-of-use assets are initially measured at cost, which comprises the initial amount of the lease obligation adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The Company presents right-of-use assets in *Property, plant and equipment.*

If the Company obtains ownership of the leased asset by the end of the lease term or the costs of the right-of-use asset reflects the exercise of a purchase option, we depreciate the right-of-use asset from the lease commencement date to the end of the useful life of the underlying asset. Otherwise, right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life or the end of the lease term. Right-of-use assets are periodically reduced by impairment losses, if any, and adjusted for certain remeasurements on the related lease liability. The depreciation charge for right-of-use assets is recorded in *Amortization – Property, plant and equipment*.

(ii) IAS 17

Operating leases - Rent expense for real estate leases that have escalating lease payments is recorded on a straight-line basis over the term of the lease. The difference between the expense recorded and the amount paid is recorded as deferred rent and included in deferred credits in the statement of financial position.

Finance leases - Leases of property and equipment that transfer substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between interest expense and reduction of the lease liability. The property and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset and the lease term.

Other long-term assets

Other long-term assets primarily include (i) equipment costs, as described in the revenue and expenses accounting policy, deferred and amortized on a straight-line basis over three to five years, (ii) the non-current portion of wireless handset discounts receivable as described in the revenue and expenses accounting policy, (iii) credit facility arrangement fees amortized on a straight-line basis over the term of the facility, (iv) long-term receivables, (v) network capacity leases, (vi) the non-current portion of prepaid maintenance and support contracts, and (vii) direct costs in connection with initial setup fees and installation of services, as described in the revenue and expenses accounting policy, deferred and amortized on a straight-line basis over two to ten years.

Intangibles

The excess of the cost of acquiring cable, satellite, media, data centre and wireless businesses over the fair value of related net identifiable tangible and intangible assets acquired is allocated to goodwill. Net identifiable intangible assets acquired consist of amounts allocated to broadcast rights and licences, wireless spectrum licences, trademarks, brands, program rights, customer relationships and software assets. Broadcast rights and licences, wireless spectrum licences, trademarks and brands represent identifiable assets with indefinite useful lives.

Customer relationships represent the value of customer contracts and relationships acquired in a business combination and are amortized on a straight-line basis over their estimated useful lives ranging from 4 – 15 years.

Software that is not an integral part of the related hardware is classified as an intangible asset. Internally developed software assets are recorded at historical cost and include direct material and labour costs as well as borrowing costs on qualifying assets. Software assets are amortized on a straight-line basis over estimated useful lives ranging from 3 – 10 years. The Company reviews the estimates of lives and useful lives on a regular basis.

Borrowing costs

The Company capitalizes borrowing costs on qualifying assets that take more than one year to construct or develop using the Company's weighted average cost of borrowing which approximated 5% (2019 – 5%).

Impairment

(i) Goodwill and indefinite-life intangibles

The Company tests goodwill and indefinite-life intangibles for impairment annually (as at February 1) and when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of each cash-generating unit (CGU) is determined based on the higher of the CGU's fair value less costs to sell (FVLCS) and its value in use (VIU). A CGU is the smallest identifiable group of assets that generate cash flows that are independent of the cash inflows from other assets or groups of assets. The Company's cash generating units are Cable, Satellite, and Wireless. Where the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

(ii) Non-financial assets with finite useful lives

For non-financial assets, such as property, plant and equipment and finite-life intangible assets, an assessment is made at each reporting date as to whether there is an indication that an asset may be impaired. If any indication exists, the recoverable amount of the asset is determined based on the higher of FVLCS and VIU. Where the carrying amount of the asset exceeds its recoverable amount, the asset is considered impaired and written down to its recoverable amount. Previously recognized impairment losses are reviewed for possible reversal at each reporting date and all or a portion of the impairment is reversed if the asset's value has increased.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The timing or amount of the outflow may still be uncertain. Provisions are measured using the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, taking into account risks and uncertainties associated with the obligation. Provisions are discounted where the time value of money is considered material.

(i) Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred, on a discounted basis, with a corresponding increase to the carrying amount of property and equipment, primarily in respect of wireless and transmitter sites. This cost is amortized on the same basis as the related asset. The liability is subsequently increased for the passage of time and the accretion is recorded in the income statement as accretion of long-term liabilities and provisions. The discount rates applied are subsequently adjusted to current rates as required at the end of reporting periods. Revisions due to the estimated timing of cash flows or the amount required to settle the obligation may result in an increase or decrease in the liability. Actual costs incurred upon settlement of the obligation are charged against the liability to the extent recorded.

(ii) Restructuring provisions

Restructuring provisions, primarily in respect of employee termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised to those affected that the plan will be carried out.

(iii) Other provisions

Provisions for disputes, legal claims and contingencies are recognized when an outflow to settle the matter is probable. The Company establishes provisions after taking into consideration legal assessments (if applicable), expected availability of insurance or other recourse and other available information.

Deferred credits

Deferred credits primarily include: (i) prepayments received under IRU agreements amortized on a straight-line basis into income over the term of the agreement, (ii) equipment revenue, as described in the revenue and expenses accounting policy, deferred and amortized over three to five years, and (iii) a deposit on a future fibre sale.

Income taxes

The Company accounts for income taxes using the liability method, whereby deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities measured using substantively enacted tax rates and laws that will be in effect when the differences are expected to reverse. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset and they relate to income taxes levied by the same authority in the same taxable entity. Income tax expense for the period is the tax payable for the period using tax rates substantively enacted at the reporting date, any adjustments to taxes payable in respect of previous years and any change during the period in deferred income tax assets and liabilities, except to the extent that they relate to a business combination or divestment, items recognized directly in equity or in other comprehensive income. The Company records interest and penalties related to income taxes in interest expense.

Tax credits and government grants

The Company receives tax credits primarily related to its research and development activities. Government financial assistance is recognized when management has reasonable assurance that the conditions of the government programs are met and accounted for as a reduction of related costs, whether capitalized and amortized or expensed in the period the costs are incurred.

Foreign currency translation

Transactions originating in foreign currencies are translated into Canadian dollars at the exchange rate at the date of the transaction. Monetary assets and liabilities are translated at the period-end rate of exchange and non-monetary items are translated at historic exchange rates. The net foreign exchange gain/(loss) recognized on the translation and settlement of current monetary assets and liabilities was $5 (2019 – $5) and is included in other gains/(losses).

Financial instruments other than derivatives

Financial instruments have been classified and measured at amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). Cash and financial instruments have been classified as FVTPL and are recorded at fair value with any change in fair value immediately recognized in income (loss). Investments in equity securities are classified and measured at FVTPL. Loans and receivables and financial liabilities are carried at amortized cost. None of the Company's financial liabilities are classified as FVTPL.

Finance costs and discounts associated with the issuance of debt securities are netted against the related debt instrument and amortized to income using the effective interest rate method. Accordingly, long-term debt accretes over time to the principal amount that will be owing at maturity.

Derivative financial instruments and hedging activities

The Company uses derivative financial instruments, such as foreign currency forward purchase contracts, to manage risks from fluctuations in foreign exchange rates. All derivative financial instruments are recorded at fair value in the statement of financial position. The Company may elect to apply hedge accounting to certain derivative instruments. With hedge accounting, changes in the fair value of derivative financial instruments designated as cash flow hedges are recorded in other comprehensive income (loss) until the variability of cash flows relating to the hedged asset or liability is recognized in income (loss). When an anticipated transaction is subsequently recorded as a non-financial asset, the amounts recognized in other comprehensive income (loss) are reclassified to the initial carrying amount of the related asset. Where hedge accounting is not permissible or derivatives are not designated in a hedging relationship, they are classified as held-for-trading and the changes in fair value are immediately recognized in income (loss).

Instruments that have been entered into by the Company to hedge exposure to foreign currency risk are reviewed on a regular basis to ensure the hedges are still effective and that hedge accounting continues to be appropriate.

Fair value measurements

Fair value estimates are made at a specific point in time, based on relevant market information and information about the underlying asset or liability. These estimates are subjective in nature and involve uncertainties and matters of significant judgement and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon their own market assumptions.

The fair value hierarchy consists of the following three levels:

Level 1 Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs for the asset or liability are based on observable market data, either directly or indirectly, other than quoted prices.

Level 3 Inputs for the asset or liability are not based on observable market data.

The Company determines whether transfers have occurred between levels in the fair value hierarchy by assessing the impact of events and changes in circumstances that could result in a transfer at the end of each reporting period.

Employee benefits

The Company accrues its obligations under its employee benefit plans, net of plan assets. The cost of pensions and other retirement benefits earned by certain employees is actuarially determined using the projected benefit method pro-rated on service and management's best estimate of salary escalation and retirement ages of employees. Past service costs from plan initiation and amendments are recognized immediately in the income statement. Remeasurements include actuarial gains or losses and the return on plan assets (excluding interest income). Actuarial gains and losses occur because assumptions about benefit plans relate to a long time frame and differ from actual experiences. These assumptions are revised based on actual experience of the plans such as changes in discount rates, expected retirement ages and projected salary increases. Remeasurements are recognized in other comprehensive income (loss) on an annual basis, at a minimum, and on an interim basis when there are significant changes in assumptions.

August 31 is the measurement date for the Company's employee benefit plans. The last actuarial valuations for funding purposes for the various plans were performed effective August 31, 2020 and the next actuarial valuations for funding purposes are effective August 31, 2021.

Share-based compensation

The Company has a stock option plan for directors, officers, employees, and consultants to the Company. The exercise price of options to purchase Class B Non-Voting Participating Shares ("Class B Non-Voting Shares") is determined by the Board, or a committee thereof, at a price not less than the closing price of the Class B Non-Voting Shares on the TSX on the trading day immediately preceding the date on which the options are granted. Any consideration paid on the exercise of stock options, together with any contributed surplus recorded at the date the options vested, is credited to share capital. The Company calculates the fair value of share-based compensation awarded to employees using the Black-Scholes option pricing model. The fair value of options are expensed and credited to contributed surplus over the vesting period of the options using the graded vesting method.

The Company has a restricted share unit (RSU) and performance share unit (PSU) plan which provides that RSUs may be granted to officers, employees and directors of the Company, and PSUs may be granted to officers and employees of the Company. RSUs vest on either the first, second and third anniversary of the grant date or 100% on the third anniversary of the grant date and compensation is recognized on a straight-line basis over the three-year vesting period. PSUs vest 100% on the third anniversary of the grant date. RSUs and PSUs will be settled in either cash or Class B Non-Voting Shares as determined by the Human Resources and Compensation Committee at the time of the grant and the obligation for RSUs and PSUs is measured at the end of each period at fair value using the Black-Scholes option pricing model and the number of outstanding RSUs and PSUs. For PSUs, the performance criteria is set by the by the Human Resources and Compensation Committee at the time of the grant, and typically requires the achievement of a minimum level of performance, otherwise the payout is zero, while maximum performance is capped at 150%. On settlement of vested PSUs, the number of Class B Non-Voting Shares issued or delivered, or the amount of cash payment will be multiplied by the applicable performance factor.

The Company has a deferred share unit (DSU) plan for its Board of Directors. Compensation cost is recognized immediately as DSUs vest when granted. DSUs will be settled in cash and the obligation is measured at the end of each period at fair value using the Black-Scholes option pricing model and the number of outstanding DSUs.

Directors may elect to receive their compensation in cash, RSUs, DSUs, or a combination thereof. Any director who has not met their share ownership guidelines is generally required to elect to receive at least 50% of their annual compensation in DSUs and/or RSUs.

The Company has an employee share purchase plan (the “ESPP”) under which eligible employees may contribute to a maximum of 5% of their monthly base compensation. The Company contributes an amount equal to 25% of the participant’s contributions, increasing to 33% once an employee reaches 10 years of continuous service, and records such amounts as compensation expense.

Earnings per share

Basic earnings per share is based on net income attributable to equity shareholders adjusted for dividends on preferred shares and is calculated using the weighted average number of Class A Participating Shares (“Class A Shares”) and Class B Non-Voting Shares outstanding during the period. Diluted earnings per share is calculated by considering the effect of all potentially dilutive instruments. In calculating diluted earnings per share, any proceeds from the exercise of stock options and other dilutive instruments are assumed to be used to purchase Class B Non-Voting Shares at the average market price during the period.

Guarantees

The Company discloses information about certain types of guarantees that it has provided, including certain types of indemnities, without regard to whether it will have to make any payments under the guarantees.

Estimation uncertainty and critical judgments

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates and significant changes in assumptions could cause an impairment in assets. The following require the most difficult, complex or subjective judgments which result from the need to make estimates about the effects of matters that are inherently uncertain.

Estimation uncertainty

The following are key assumptions concerning the future and other key sources of estimation uncertainty that could impact the carrying amount of assets and liabilities and results of operations in future periods.

(i) Allowance for doubtful accounts

The Company is required to make an estimate of expected credit losses on its receivables. The estimated allowance required is a matter of judgment and the actual loss eventually sustained may be more or less than the estimate, depending on events which have yet to occur and which cannot be foretold, such as future business, personal and economic conditions.

(ii) Contractual service revenue

The Company is required to make judgments and estimates that affect the amount and timing of revenue from contracts with customers, including estimates of the stand-alone selling prices of wireline and wireless products and services, the identification of performance obligations within a contract and the timing of satisfaction of performance obligations under long-term contracts.

Determining the deferral criteria for the costs incurred to obtain or fulfill a contract requires us to make significant judgments. We expect incremental commission fees paid to internal and external representatives as a result of obtaining contracts with customers to be recoverable.

(iii) Property, plant and equipment

The Company is required to estimate the expected useful lives of its property, plant and equipment. These estimates of useful lives involve significant judgment. In determining these estimates, the Company takes into account industry trends and company-specific factors, including changing technologies and expectations for the in-service period of these assets. Management's judgment is also required in determination of the amortization method, the residual value of assets and the capitalization of labour and overhead.

(iv) Leases

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets. These include determining whether a contract contains a lease, determining the contract term, including whether or not to exercise renewal or termination options, and determining the interest rate used for discounting future cash flows.

(v) Business combinations – purchase price allocation

Purchase price allocations involve uncertainty because management is required to make assumptions and judgments to estimate the fair value of the identifiable assets acquired and liabilities assumed in business combinations. Fair value estimates are based on quoted market prices and widely accepted valuation techniques, including discounted cash flow (DCF) analysis. Such estimates include assumptions about inputs to the valuation techniques, industry economic factors and business strategies.

(vi) Impairment

The Company estimates the recoverable amount of its CGUs using a FVLCS calculation based on a DCF analysis or market approach or a VIU calculation based on a DCF analysis. Where a DCF analysis is used, significant judgments are inherent in this analysis including estimating the amount and timing of the cash flows attributable to the broadcast rights and licences, the selection of an appropriate discount rate, and the identification of appropriate terminal growth rate assumptions. In this analysis the Company estimates the discrete future cash flows associated with the intangible asset for five years and determines a terminal value. The future cash flows are based on the Company's estimates of future operating results, economic conditions and the competitive environment. The terminal value is estimated using both a perpetuity growth assumption and a multiple of operating income before restructuring costs and amortization. The discount rates used in the analysis are based on the Company's weighted average cost of capital and an assessment of the risk inherent in the projected cash flows. In analyzing the FVLCS determined by a DCF analysis, the Company also considers a market approach determining a recoverable amount for each unit and total entity value determined using a market capitalization approach. Recent market transactions are taken into account, when available. The key assumptions used to determine the recoverable amounts, including a sensitivity analysis, are included in Note 9. A DCF analysis uses significant unobservable inputs and is therefore considered a level 3 fair value measurement.

(vii) Employee benefit plans

The amounts reported in the financial statements relating to the defined benefit pension plans are determined using actuarial valuations that are based on several assumptions including the discount rate and rate of compensation increase. While the Company believes these assumptions are reasonable, differences in actual results or changes in assumptions could affect employee benefit obligations and the related income statement impact. The most significant assumption used to calculate the net employee benefit plan expense is the discount rate. The discount rate is the interest rate used to determine the present value of the future cash flows that is expected will be needed to settle employee benefit obligations. It is based on the yield of long-term, high-quality corporate fixed income investments closely matching the term of the estimated future cash flows and is reviewed and adjusted as changes are required.

(viii) Income taxes

The Company is required to estimate income taxes using substantively enacted tax rates and laws in effect or that will be in effect when the temporary differences are expected to reverse. In determining the measurement of tax uncertainties, the Company recognizes an income tax benefit only when it is probable that the tax benefit will be realized. Realization of deferred income tax assets is dependent on generating sufficient taxable income during the period in which the temporary differences are deductible. Although realization is not assured, management believes it is more likely than not that all recognized deferred income tax assets will be realized based on reversals of deferred income tax liabilities, projected operating results and tax planning strategies available to the Company and its subsidiaries.

(ix) Contingencies

The Company is subject to various claims and contingencies related to lawsuits, taxes and commitments under regulatory, contractual and other commercial obligations. Contingent losses are recognized by a charge to income when it is likely that a future event will confirm that an asset has been impaired or a liability incurred at the date of the financial statements and the amount can be reasonably estimated. Significant changes in assumptions as to the likelihood and estimates of the amount of a loss could result in recognition of additional liabilities.

Critical judgements

The following are critical judgements apart from those involving estimation:

(i) Determination of a CGU

Management's judgement is required in determining the Company's cash generating units (CGU) for the impairment assessment of its indefinite-life intangible assets. The CGUs have been determined considering operating activities and asset management and are Cable, Satellite, and Wireless.

(ii) Broadcast rights and licences and spectrum licences – indefinite-life assessment

A number of the Company's businesses are dependent upon broadcast licences (or operate pursuant to an exemption order) granted and issued by the CRTC or wireless spectrum licences issued by the Department of Innovation, Science and Economic Development. While these licences must be renewed from time to time, the Company has never failed to do so. In addition, there are currently no legal, regulatory or competitive factors that limit the useful lives of these assets.

Adoption of recent accounting pronouncements

We adopted the following new accounting standards effective September 1, 2019.

- IFRS 16 Leases was issued on January 2016 and replaces IAS 17 Leases. The new standard requires entities to recognize lease assets and lease obligations on the balance sheet. For lessees, IFRS 16 removes the classification of leases as either operating leases or finance leases, instead requiring that leases be capitalized by recognizing the present value of the lease payments and showing them as lease assets (right-of-use assets) and representing the right to use the underlying leased asset. If lease payments are made over time, the Company recognizes a lease liability representing its obligation to make future lease payments. Certain short-term leases (less than 12 months) and leases of low-value may be exempted from the requirements and may continue to be treated as operating leases if certain elections are made. Lessors will continue with a dual lease classification model. Classification will determine how and when a lessor will recognize lease revenue, and what assets would be recorded.

  Implementation

  We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented are not restated. We recognized lease liabilities at September 1, 2019 for leases previously classified as operating leases, measured at the present-value of the lease payments using our incremental borrowing rate at that date, with the corresponding right-of-use asset generally measured at an equal amount, adjusted for any prepaid or accrued rent outstanding as at August 31, 2019.

As permitted by IFRS 16, we applied certain practical expedients to facilitate the initial adoption and ongoing application of IFRS 16 including the following:

- not separate fixed non-lease components from lease components for certain classes of underlying assets. Each lease component and any associated non-lease components will be accounted for as a single lease component;
- apply a single discount rate to a portfolio of leases with similar characteristics;
- exclude initial direct costs from measuring the right-of-use asset as at September 1, 2019; and
- use hindsight in determining the lease term where the contract contains purchase, extension, or termination options.

On transition, we have not elected the recognition exemptions on short-term leases or low-value leases; however, we may choose to elect these recognition exemptions on a class-by-class basis for new classes and lease-by-lease basis, respectively, in the future.

There was no significant impact for contracts in which we are the lessor.

- IFRIC 23 Uncertainty over Income Tax Treatments was issued in 2017 to clarify how to apply the recognition and measurement requirements in IAS 12 Income Taxes when there is uncertainty over income tax treatments. It was required to be applied for annual periods commencing January 1, 2019, which for the Company was the annual period commencing September 1, 2019. The cumulative effect of the initial application of the new standard has been reflected as an adjustment to retained earnings at September 1, 2019. Refer to “Transition adjustments” below for details.

Transition adjustments

Below is the effect of transition to IFRS 16 and the adoption of IFRIC 23 on our Consolidated Statements of Financial Position as at September 1, 2019.

(millions of Canadian dollars)	As reported as at August 31, 2019	Effect of IFRS 16 transition	Effect of IFRIC 23 transition	Subsequent to transition as at September 1, 2019

	6,285	–	(22)	6,263
	15,646	1,322	–	16,968

Prior to adopting IFRS 16, our total minimum operating lease commitments as at August 31, 2019 were $919 million. The weighted average discount rate applied to the total lease liabilities was 3.50% at September 1, 2019. The difference between the total of the minimum lease payments set out in Note 27 in our 2019 Consolidated Financial Statements and the total lease liability recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at August 31, 2019;
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts, but which do not qualify to be accounted for as a lease liability, such as variable lease payments not tied to an index or rate.

3. ACCOUNTS RECEIVABLE

	2020 $	2019 $
Subscriber and trade receivables [(1)]	**326**	335
Due from related parties (note 29)	**1**	–
Miscellaneous receivables	**15**	15
	342	350
Less allowance for doubtful accounts [(1)] (note 30)	**(74)**	(63)
	268	287

(1) In 2020 the Company removed subscriber and trade receivables and the associated allowance for doubtful accounts for certain amounts that were fully provisioned and greater than 12 months. Prior year amounts have also been adjusted to reflect this change.

Included in operating, general and administrative expenses is a provision for doubtful accounts of $60 (2019 – $40).

4. INVENTORIES

	2020 $	2019 $
Wireless devices and accessories	**40**	53
DTH subscriber equipment	**20**	33
	60	86

5. OTHER CURRENT ASSETS

	277	291

6. INVESTMENTS AND OTHER ASSETS

	2020 $	2019 $
Investments in private entities	**42**	37

The Company has a portfolio of minor investments in various private entities. In the third quarter of fiscal 2019, the Company disposed of one of these investments with a book value of $10 for proceeds of $25.

Corus Entertainment Inc.

Corus is a leading media and content company that creates and delivers high quality brands and content across platforms for audiences around the world. Corus' portfolio of multimedia offerings encompasses 35 specialty television services, 39 radio stations, 15 conventional television stations, a global content business, digital assets, live events, children's book publishing, animation software, technology and media services. Corus is headquartered in Canada, and its stock is listed on the TSX under the symbol CJR.B.

In connection with the sale of the Media division to Corus in 2016, the Company received 71,364,853 Corus Class B non-voting participating shares (the "Corus Class B Shares") representing approximately 37% of Corus' total issued equity of Class A and Class B shares at that time. Although the Corus Class B Shares did not have voting rights, the Company was considered to have significant influence due to Board representation. The Company agreed to retain approximately one-third of its Corus Class B Shares for 12 months post-closing, a second one-third for 18 months post-closing, and the final one-third for 24 months post-closing, until March 31, 2018.

On May 31, 2019, the Company sold all of its 80,630,383 Corus Class B Shares at a price of $6.80 per share. Proceeds, net of transaction costs, were $526, which resulted in a loss of $109. The Company's weighted average ownership of Corus for the nine months ended May 31, 2019 was 38%. For the nine months ended August 31, 2019, the Company received dividends of $10 from Corus.

Summary financial information for Corus through the disposal date is as follows:

	Nine months ended May 31, 2019
Revenue	**1,310**
Net income attributable to:	
Shareholders	**133**
Non-controlling interest	**19**
	152
Other comprehensive income, attributable to shareholders	**(40)**
Comprehensive income	**112**
Equity income from associates [(1)]	**46**
Other comprehensive income from equity accounted associates [(1)]	**(13)**
	33

(1) The Company's share of income and other comprehensive income reflect the weighted average proportion of Corus net income and other comprehensive income attributable to shareholders for the nine-month period ended May 31, 2019.

Carrying amount at August 31, 2018	**615**
Share of equity at disposition date	**46**
Share of other comprehensive loss of associate	**(13)**
Dividends received to disposition date	**(10)**
Carrying value at disposition date	**638**
Proceeds on disposal, net of transaction costs	**526**
Reclassification of accumulated gain from other comprehensive income related to the sale of an associate	**(3)**
Loss on sale of investment	**109**

7. PROPERTY, PLANT AND EQUIPMENT

	August 31, 2020			August 31, 2019		
	Cost $	Accumulated amortization $	Net book value $	Cost $	Accumulated amortization $	Net book value $

Data centre infrastructure, data processing and other	269	9	18	(50)	(17)	(30)	199
Assets under construction	215	563	(317)	–	–	–	461
	4,702	1,109	–	(872)	(22)	(34)	4,883

In 2020, the Company recognized a net loss of $3 (2019 – net gain of $43) on the disposal of property, plant and equipment.

8. OTHER LONG-TERM ASSETS

	2020 $	2019 $
Equipment costs subject to a deferred revenue arrangement	**67**	93
Long-term Wireless handset receivables	**35**	45
Costs incurred to obtain or fulfill a contract with a customer	**37**	35
Credit facility arrangement fees	**4**	4
Other	**20**	18
	163	195

Amortization provided in the accounts for 2020 amounted to $65 (2019 – $85) and was recorded as amortization of deferred equipment costs.

9. INTANGIBLES AND GOODWILL

	2020 $	2019 $
Broadcast rights and licences		
Cable systems	**4,016**	4,016
DTH and satellite services	**1,013**	1,013
	5,029	5,029
Wireless spectrum licences	**2,445**	2,445
Other intangibles		
Software	**479**	451
Customer relationships	**44**	54
	7,997	7,979
Goodwill		
Cable and telecommunications systems	**79**	79
Wireless	**201**	201
	280	280
Net book value	**8,277**	8,259

Broadcast rights and licences, trademark, brands and wireless spectrum licences have been assessed as having indefinite useful lives. While licences must be renewed from time to time, the Company has never failed to do so. In addition, there are currently no legal, regulatory, competitive or other factors that limit the useful lives of these assets.

The changes in the carrying amount of intangibles with indefinite useful lives, and therefore not subject to amortization, are as follows:

	Broadcast rights and licences $	Goodwill $	Wireless spectrum licences $
September 1, 2018	5,029	280	1,953
Additions	–	–	492
Disposition	–	–	–
August 31, 2019	**5,029**	**280**	**2,445**
Additions	**–**	**–**	**–**
Disposition	**–**	**–**	**–**
August 31, 2020	**5,029**	**280**	**2,445**

Intangibles subject to amortization are as follows:

	August 31, 2020			August 31, 2019		
	Cost	Accumulated amortization	Net book value	Cost	Accumulated amortization	Net book value
Software	**806**	**335**	**471**	697	257	440
Software under construction	**8**	**–**	**8**	11	–	11
Customer relationships	**114**	**70**	**44**	114	60	54
	928	**405**	**523**	822	317	505

The changes in the carrying amount of intangibles subject to amortization are as follows:

	Software $	Software under construction $	Customer relationships $	Total $
September 1, 2018	412	22	66	500

Additions	**144**	**–**	**–**	**144**
Transfers	**7**	**(3)**	**–**	**4**
Dispositions	**–**	**–**	**–**	**–**
Amortization	**(120)**	**–**	**(10)**	**(130)**
August 31, 2020	**471**	**8**	**44**	**523**

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2020 and the recoverable amount of the CGUs exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the Cable CGU as at February 1, 2020 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the Satellite CGU as at February 1, 2020 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless CGU as at February 1, 2020 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2020 do not represent events or changes in circumstance that would be indicative of impairment at August 31, 2020.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2020, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal operating income before restructuring costs and amortization multiple
Cable	6.0%	0.5%	8.0x
Satellite	7.0%	-4.0%	6.7x
Wireless	7.0%	1.0%	5.3x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal operating income before restructuring costs and amortization multiple
Cable	15.0%	12.5%	6.2%
Satellite	7.8%	5.6%	7.4%
Wireless	18.2%	10.1%	9.4%

10. SHORT-TERM BORROWINGS

On June 19, 2018 the Company established an accounts receivable securitization program with a Canadian financial institution which will allow it to sell certain trade receivables into the program up to a maximum of $100. The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables are recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivables has no claim on any of the Company's other assets.

On May 29, 2019, the Company amended the terms of its accounts receivable securitization program to extend the term of the program to May 29, 2022 and increase the sales committed up to a maximum of $200.

A summary of our accounts receivable securitization program as at August 31, 2020 is as follows:

	2020 $	2019 $
Accounts receivable securitization program, beginning of period	**40**	40
Proceeds received from accounts receivable securitization	**160**	–
Repayment of accounts receivable securitization	**–**	–

(1) During fiscal 2018, the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative. A total of $130 has been paid in fiscal 2020. The remaining costs are expected to be paid out within the next 5 months.

(2) During fiscal 2020, the Company restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. In connection with the restructuring, the Company recorded $14 in the third quarter primarily related to severance and employee related costs, of which $13 has been paid as at August 31, 2020. The remaining costs are expected to be paid within the next 3 months.

(1) Long-term debt is presented net of unamortized discounts and finance costs.
(2) Current portion of long-term debt includes amounts due within one year in respect of senior notes due October 1, 2019 and the Burrard Landing loans.

Corporate

Bank loans

During 2012, a syndicate of banks provided the Company with an unsecured $1 billion credit facility which includes a maximum revolving term or swingline facility of $50. During 2016, the Company elected to increase its borrowing capacity by $500 under the terms of the amended facility.

On November 21, 2019, the Company amended the terms of its bank credit facility to extend the maturity date to December 2024. The facility can be used for working capital and general corporate purposes.

Funds are available to the Company in both Canadian and US dollars. At August 31, 2020, $3 (2019 – $3) has been drawn as committed letters of credit against the revolving term facility. Interest rates fluctuate with Canadian prime and bankers' acceptance rates, US bank base rates and LIBOR rates. Excluding the revolving term facility, the effective interest rate on actual borrowings under the credit facility during 2020 was 2.81% (2019 – nil). The effective interest rate on the revolving term facility for 2020 was 4.05% (2019 – nil).

Senior notes

The senior notes are unsecured obligations and rank equally and ratably with all existing and future senior indebtedness. The fixed rate notes are redeemable at the Company's option at any time, in whole or in part, prior to maturity at 100% of the principal amount plus a make-whole premium.

On October 1, 2019, the Company repaid $1,250 of 5.65% senior notes at their maturity.

On December 9, 2019, the Company issued $800 of senior notes, consisting of $500 principal amount of 3.30% senior notes due 2029 and $300 principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792, along with cash on hand, were used to fund the redemption of the $500 principal amount of 5.50% senior notes due 2020 and the $300 principal amount of 3.15% senior notes due 2021.

On December 24, 2019, the Company redeemed the $500 principal amount of 5.50% senior notes due December 7, 2020 and the $300 principal amount of 3.15% senior notes due February 19, 2021. In conjunction with the redemption, the Company paid make whole premiums of $17 and accrued interest of $5.

On April 22, 2020, the Company issued $500 principal amount of senior notes at a rate of 2.90% due December 9, 2030.

Other

Burrard Landing Lot 2 Holdings Partnership

The Company has a 33.33% interest in the Partnership which built the Shaw Tower project with office/retail space and living/working space in Vancouver, BC. In the fall of 2004, the commercial construction of the building was completed and at that time, the Partnership issued ten year 6.31% secured mortgage bonds in respect of the commercial component of the Shaw Tower. In February 2014, the Partnership refinanced its debt. The Partnership received a mortgage loan and used the proceeds to prepay the outstanding balance of the previous mortgage and loan excess funds to each of its partners. The mortgage loan matures on November 1, 2024 and bears interest at 4.683% compounded semi-annually with interest only payable for the first five years. Interest and principal payments commenced on April 1, 2019. The mortgage loan is collateralized by the property and the commercial rental income from the building with no recourse to the Company.

In February 2018, the Partnership received an additional mortgage loan of $30 and used the proceeds to loan excess funds to each of its partners, of which the Company received $10. The additional loan matures on November 1, 2024 and bears interest at 4.14% compounded semi-annually. Monthly mortgage payments consist of both principal and interest components.

Debt covenants

The Company and its subsidiaries have undertaken to maintain certain covenants in respect of the credit agreements and trust indentures described above. The Company and its subsidiaries were in compliance with these covenants at August 31, 2020.

Long-term debt repayments

Mandatory principal repayments on all long-term debt in each of the next five years and thereafter are as follows:

	$
2021	1
2022	1
2023	1
2024	1,001
2025	45
Thereafter	3,550
	4,599

Current	**113**
Long-term	**1,157**
Balance as at August 31, 2020	**1,270**

Lease liabilities are subject to amortization schedules, which results in the principal being repaid over various periods, including reasonably expected renewals. The weighted average interest rate on lease liabilities was approximately 3.50% as at August 31, 2020. Refer to Note 30 for a maturity analysis of the Company's lease liabilities.

The Company leases Ku-band and C-band transponders on the Anik F1R, Anik F2 and Anik G1 satellites. As part of the Ku-band transponder agreements with Telesat Canada, the Company is committed to paying annual transponder maintenance and licence fees for each transponder from the time the satellite becomes operational for a period of 15 years. As at August 31, 2020, the Company has recorded lease liabilities of $306 relating to these transponders. Included in operating, general and administrative expenses are transponder maintenance expenses of $nil (2019 – $84).

Below is a summary of the Company's other expenses related to leases included in operating, general and administrative expenses.

	2020 $	2019 $
Rental expense related to operating leases	–	164
Expenses related to variable lease components not included in lease liabilities	**20**	–
Expenses related to low-value leases	**32**	–

Deposit on future fibre sale	**2**	2
	406	425

Amortization of deferred credits for 2020 amounted to $29 (2019 – $34) and was recorded in the accounts as described below.

IRU agreements are in place for periods ranging from 21 to 60 years and are being amortized to income over the agreement periods. Amortization in respect of the IRU agreements for 2020 amounted to $13 (2019 – $13) and was recorded as other amortization. Amortization of equipment revenue for 2020 amounted to $16 (2019 – $21).

17. SHARE CAPITAL

Authorized

The Company is authorized to issue a limited number of Class A Shares of no par value, as described below; an unlimited number of Class B Non-Voting Shares of no par value; an unlimited number of Class 1 Preferred Shares issuable in series; and an unlimited number of Class 2 Preferred Shares issuable in series, of which 12,000,000 were designated Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A ("Series A Preferred Shares") and 12,000,000 were designated Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B ("Series B Preferred Shares").

The authorized number of Class A Shares is limited, subject to certain exceptions, to the lesser of that number of shares (i) currently issued and outstanding and (ii) that may be outstanding after any conversion of Class A Shares into Class B Non-Voting Shares.

Class A Shares and Class B Non-Voting Shares

Class A Shares are convertible at any time into an equivalent number of Class B Non-Voting Shares. In the event that a take-over bid is made for Class A Shares, in certain circumstances, the Class B Non-Voting Shares are convertible into an equivalent number of Class A Shares.

Changes in Class A Share capital and Class B Non-Voting Share capital in 2020 and 2019 are as follows:

	Class A Shares		Class B Non-Voting Shares	
	Number	$	Number	$

August 31, 2020	**22,372,064**	**2**	**490,632,833**	**4,307**

Series A and B Preferred Shares

The Series A Preferred Shares and Series B Preferred Shares represent series of Class 2 Preferred Shares and are classified as equity since redemption, at $25.00 per Series A Preferred Share and Series B Preferred Share, is at the Company's option and payment of dividends is at the Company's discretion.

Share transfer restriction

The Articles of the Company empower the directors to refuse to issue or transfer any share of the Company that would jeopardize or adversely affect the right of Shaw Communications Inc. or any subsidiary to obtain, maintain, amend or renew a licence to operate a broadcasting undertaking pursuant to the Broadcasting Act (Canada).

Normal Course Issuer Bid

On October 29, 2019, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 1, 2019 and will remain in effect until October 31, 2020. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,758,127 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 18, 2019.

During the year ended August 31, 2020, the Company purchased 5,614,672 Class B Non-Voting Shares for cancellation for a total cost of approximately $140 under the NCIB. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $91 and was charged to retained earnings. The Company suspended the program in April 2020.

Subsequent to year-end, on October 29, 2020, the Company's Board of Directors approved the renewal of the NCIB program to purchase up to 24,532,404 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares. The NCIB program remains subject to approval by the TSX and, if accepted, will be conducted in accordance with the applicable rules and policies of the TSX and applicable Canadian securities law.

Dividend Reinvestment Plan

On October 24, 2019, in accordance with the terms of our Dividend Reinvestment Plan (DRIP), the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Non-Voting Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Non-Voting Shares delivered under the DRIP. These changes to the DRIP were applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019.

18. SHARE-BASED COMPENSATION AND AWARDS

Stock option plan

Under the Company's stock option plan, directors, officers, employees, and consultants are eligible to receive stock options to acquire Class B Non-Voting Shares with terms not to exceed ten years from the date of grant and for such number of Class B Non-Voting Shares as the Board, or a committee thereof, determines in its discretion. An option is not immediately exercisable, but rather is exercisable on vesting dates determined by the Board from time to time. The Company's current practice is to award options for terms of ten years with 20% of the options in a grant vesting on each of the first through fifth anniversaries of the grant date. The Board, or a committee thereof, may grant options at an exercise price not less than the closing price of the Class B Non-Voting Shares on the TSX on the trading day immediately preceding the date on which the options are granted. The maximum number of Class B Non-Voting Shares issuable under the plan may not exceed 62,000,000. As at August 31, 2020, 39,637,412 Class B Non-Voting Shares have been issued under the plan.

The changes in options are as follows:

	2020		2019	
	Number	Weighted average exercise price $	Number	Weighted average exercise price $
Outstanding, beginning of year	**8,363,031**	**26.11**	9,378,966	25.18
Granted	**84,000**	**26.88**	1,540,000	26.36
Forfeited	**(681,168)**	**26.65**	(897,470)	26.66
Exercised (1)	**(407,733)**	**21.57**	(1,658,465)	20.76
Outstanding, end of year	**7,358,130**	**26.36**	8,363,031	26.11

(1) The weighted average Class B Non-Voting Share price for the options exercised was $25.60.

The following table summarizes information about the options outstanding at August 31, 2020:

	Options outstanding			Options exerciseable	
Range of prices	Number outstanding	Weighted average remaining contractual life	Weighted average exercise price	Number exercisable	Weighted average exercise price
$19.75 to $24.86	1,438,320	4.74	23.68	1,149,620	23.55
$24.87 to $26.31	1,531,075	5.88	25.93	1,069,575	25.83
$26.32 to $26.83	1,614,100	7.97	26.49	454,350	26.55
$26.84 to $27.71	1,142,135	5.75	27.31	811,235	27.35
$27.72 to $30.87	1,632,500	6.44	28.35	980,750	28.51

The weighted average estimated fair value at the date of the grant for common share options granted for the year ended August 31, 2020 was $1.83 (2019 – $2.07) per option. The fair value of each option granted was estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	2020	2019
Dividend yield	**4.41%**	4.50%
Risk-free interest rate	**1.45%**	2.08%
Expected life of options	**7 years**	7 years
Expected volatility factor of the future expected market price of Class B Non-Voting Shares	**15.90%**	16.30%

Expected volatility has been estimated based on the historical share price volatility of the Company's Class B Non-Voting Shares.

Restricted share unit plan and Performance share unit plan

The Company has an RSU/PSU plan which provides that RSUs may be granted to directors, officers and employees of the Company and PSUs may be granted to officers and employees of the Company. Vested RSUs and PSUs will be settled in either cash or Class B Non-Voting Shares as determined by the Human Resources and Compensation Committee at the time of the grant. The cash payout will be based on the market value of a Class B Non-Voting Share at the time of the payout. When cash dividends are paid on Class B Non-Voting Shares, holders are credited with additional RSUs or PSUs, as applicable, equal to the dividend.

For PSUs, the performance criteria is set by the Human Resources and Compensation Committee at the time of the grant, and typically requires the achievement of a minimum level of performance, otherwise the payout is zero, while maximum performance is capped at 150%. On settlement of vested PSUs, the number of Class B Non-Voting Shares issued or delivered, or the amount of cash payment will be multiplied by the applicable performance factor.

During 2020, $9 was recognized as compensation expense (2019 – $5). The carrying value and intrinsic value of combined RSUs and PSUs at August 31, 2020 was $12 and $12, respectively (August 31, 2019 – $7 and $7, respectively).

Deferred share unit plan

The Company has a DSU plan for its Board of Directors whereby directors may elect to receive their annual cash compensation, or a portion thereof, in DSUs and/or RSUs, provided that any director who has not met the applicable share ownership guideline is generally required to elect to receive at least 50% of his or her annual compensation in DSUs and/or RSUs. In addition, the Company may adjust and/or supplement directors' compensation with periodic grants of DSUs. A DSU is a right that tracks the value of one Class B Non-Voting Share. Holders will be entitled to a cash payout when they cease to be a director. The cash payout will be based on market value of a Class B Non-Voting Share at the time of payout. When cash dividends are paid on Class B Non-Voting Shares, holders are credited with DSUs equal to the dividend. DSUs do not have voting rights as there are no shares underlying the plan.

During 2020, $2 was recognized as compensation expense (2019 – $ nil). The carrying value and intrinsic value of DSUs at August 31, 2020 was $24 and $20, respectively (August 31, 2019 – $24 and $20, respectively).

Employee share purchase plan

The Company's ESPP provides employees with an incentive to increase the profitability of the Company and a means to participate in that increased profitability. Generally, all Canadian, non-unionized, full time or part time employees of the Company are eligible to enroll in the ESPP. Under the ESPP, eligible employees may contribute to a maximum of 5% of their monthly base compensation. The Company contributes an amount equal to 25% of the employee's contributions, increasing to 33% once an employee reaches 10 years of continuous service.

During 2020, $5 was recorded as compensation expense (2019 – $6).

19. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	2020	2019
Numerator for basic and diluted earnings per share ($)		
Net income	**688**	733
Deduct: net income attributable to non-controlling interests in subsidiaries	**–**	(2)
Deduct: dividends on Preferred Shares	**(9)**	(9)
Net income attributable to common shareholders	**679**	722
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Non-Voting Shares for basic earnings per share	**515**	511
Effect of dilutive securities (1)	**–**	–
Weighted average number of Class A Shares and Class B Non-Voting Shares for diluted earnings per share	**515**	511
Basic and diluted earnings per share ($)	**1.32**	1.41

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the year ended August 31, 2020, 6,380,558 options were excluded from the diluted earnings per share calculation (2019 – 6,126,210).

20. DIVIDENDS

Common share dividends

The holders of Class A Shares and Class B Non-Voting Shares are entitled to receive such dividends as the Board of Directors determines to declare on a share-for-share basis, as and when any such dividends are declared or paid. The holders of Class B Non-Voting Shares are entitled to receive during each dividend period, in priority to the payment of dividends on the Class A Shares, an additional dividend amount of $0.0025 per share per annum. This additional dividend amount is subject to proportionate adjustment in the event of future consolidations or subdivisions of shares and in the event of any issue of shares by way of stock dividend. After payment or setting aside for payment of the additional non-cumulative dividends on the Class B Non-Voting Shares, holders of Class A Shares and Class B Non-Voting Shares participate equally, share for share, as to all subsequent dividends declared.

Preferred share dividends

Holders of the Series A Preferred Shares were entitled to receive, as and when declared by the Company's Board of Directors, a cumulative quarterly fixed dividend yielding 4.50% annually for the initial period ending June 30, 2016. Commencing June 30, 2016, the dividend rate was reset to 2.791% for the five year period ending June 30, 2021. Thereafter, the dividend rate will be reset every five years at a rate equal to the then current 5-year Government of Canada bond yield plus 2.00%. Holders of Series A Preferred Shares had the right, at their option, to convert their shares into Series B Preferred Shares, subject to certain conditions, on June 30, 2016 and on June 30 every five years thereafter, with the next conversion date being June 30, 2021.

On June 30, 2016, 1,987,607 Series A Preferred Shares were converted into an equal number of Series B Preferred Shares. The Series B Preferred Shares also represent a series of Class 2 preferred shares and holders will be entitled to receive cumulative quarterly dividends, as and when declared by the Company's Board of Directors, at a rate set quarterly equal to the then current three-month Government of Canada Treasury Bill yield plus 2.00%. The floating quarterly dividend rate for the Series B Preferred Shares were set as follows:

Period	Annual Dividend Rate
June 30, 2016 to September 29, 2016	2.539%
September 30, 2016 to December 30, 2016	2.512%
December 31, 2016 to March 30, 2017	2.509%
March 31, 2017 to June 29, 2017	2.480%
June 30, 2017 to September 29, 2017	2.529%
September 30, 2017 to December 30, 2017	2.742%
December 31, 2017 to March 30, 2018	2.872%
March 31, 2018 to June 29, 2018	3.171%
June 30, 2018 to September 29, 2018	3.300%
September 30, 2018 to December 30, 2018	3.509%
December 31, 2018 to March 30, 2019	3.713%
March 31, 2019 to June 29, 2019	3.682%
June 30, 2019 to September 29, 2019	3.687%
September 30, 2019 to December 30, 2019	3.638%
December 31, 2019 to March 30, 2020	3.652%
March 31, 2020 to June 29, 2020	3.638%
June 30, 2020 to September 29, 2020	2.255%
September 30, 2020 to December 30, 2020	2.149%

Dividend reinvestment plan

The Company has a DRIP that allows holders of Class A Shares and Class B Non-Voting Shares who are residents of Canada and, effective December 16, 2016, the United States, to automatically reinvest monthly cash dividends to acquire additional Class B Non-Voting Shares. As at and for the year ended August 31, 2019 and for the two-month period ended October 30, 2019, Class B Non-Voting Shares distributed under the Company's DRIP were new shares issued from treasury at a 2% discount from the 5 day weighted average market price immediately preceding the applicable dividend payment date.

On October 25, 2019, in accordance with the terms of its DRIP, the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Non-Voting Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Non-Voting Shares delivered under the DRIP. These changes to the DRIP applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019 and all other dividends payable thereafter.

Dividends declared

The dividends per share recognized as distributions to common shareholders for dividends declared during the year ended August 31, 2020 and 2019 are as follows:

2020		2019	
Class A Voting Share	Class B Non-Voting Share	Class A Voting Share	Class B Non-Voting Share
1.1825	1.1850	1.1825	1.1850

The dividends per share recognized as distributions to preferred shareholders for dividends declared during the year ended August 31, 2020 and 2019 are as follows:

2020		2019	
Series A Preferred Share	Series B Preferred Share	Series A Preferred Share	Series B Preferred Share
0.6978	0.8240	0.6978	0.9119

On July 10, 2020, the Company declared dividends of $0.17444 per Series A Preferred Share and $0.14094 per Series B Preferred Share which were paid on September 30, 2020. The total amount paid was $2 of which $1 was not recognized as at August 31, 2020.

On October 30, 2020, the Company declared dividends of $0.098542 per Class A Share and $0.09875 per Class B Non-Voting Share payable on each of December 30, 2020, January 28, 2021 and February 25, 2021 to shareholders of record at the close of business on December 15, 2020, January 15, 2021 and February 15, 2021, respectively.

On October 30, 2020, the Company declared dividends of $0.17444 per Series A Preferred Share and $0.13431 per Series B Preferred Share payable on December 31, 2020 to holders of record at the close of business on December 15, 2020.

21. OTHER COMPREHENSIVE INCOME (LOSS) AND ACCUMULATED OTHER COMPREHENSIVE LOSS

Components of other comprehensive income and the related income tax effects for 2020 are as follows:

	Amount $	Income taxes $	Net $
Items that may subsequently be reclassified to income			
Change in unrealized fair value of derivatives designated as cash flow hedges	(5)	1	(4)
Adjustment for hedged items recognized in the period	(3)	1	(2)
	(8)	2	(6)
Items that will not be subsequently reclassified to income			
Remeasurements on employee benefit plans:	2	(1)	1
	(6)	1	(5)

Components of other comprehensive income and the related income tax effects for 2019 are as follows:

	Amount $	Income taxes $	Net $
Items that may subsequently be reclassified to income			
Change in unrealized fair value of derivatives designated as cash flow hedges	3	(1)	2
Adjustment for hedged items recognized in the period	(3)	1	(2)
Share of other comprehensive income of associates	(13)	–	(13)
Reclassification of accumulated loss to income related to the sale of an associate	(3)	–	(3)
	(16)	–	(16)
Items that will not be subsequently reclassified to income			
Remeasurements on employee benefit plans	(52)	13	(39)
	(68)	13	(55)

Accumulated other comprehensive loss is comprised of the following:

	2020 $	2019 $
Items that may subsequently be reclassified to income		
Change in unrealized fair value of derivatives designated as cash flow hedges	**(5)**	1
Share of other comprehensive income of associates	**–**	18
Reclassification of accumulated loss to income related to the sale of an associate	**–**	(18)
Items that will not be subsequently reclassified to income		
Remeasurements on employee benefit plans:	**(94)**	(95)
	(99)	(94)

22. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	Contract Liabilities
August 31, 2018	135	244
Increase in contract assets from revenue recognized during the period	179	–
Contract assets transferred to trade receivables	(145)	–
Contract terminations transferred to trade receivables	(11)	–
Revenue recognized included in contract liabilities at the beginning of the year	–	(236)
Increase in contract liabilities during the period	–	230
August 31, 2019	158	238
Increase in contract assets from revenue recognized during the period	**200**	**–**
Contract assets transferred to trade receivables	**(170)**	**–**
Contract terminations transferred to trade receivables	**(16)**	**–**
Revenue recognized included in contract liabilities at the beginning of the year	**–**	**(231)**
Increase in contract liabilities during the period	**–**	**218**
August 31, 2020	**172**	**225**

	Contract Assets	Contract Liabilities
Current	106	223
Long-term	52	15
Balance as at August 31, 2019	158	238
Current	**132**	**211**
Long-term	**40**	**14**
Balance as at August 31, 2020	**172**	**225**

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the year ended August 31, 2020 and 2019. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

August 31, 2018	75
Additions to deferred commission cost assets	85
Amortization recognized on deferred commission cost assets	(66)
August 31, 2019	94
Additions to deferred commission cost assets	**84**
Amortization recognized on deferred commission cost assets	**(80)**
August 31, 2020	**98**
Current	59
Long-term	35
Balance as at August 31, 2019	94
Current	**61**
Long-term	**37**
Balance as at August 31, 2020	**98**

Commission costs are amortized over a period ranging from 24 to 36 months.

Disaggregation of revenue

	2020 $	2019 $
Services		
Wireline – Consumer	**3,683**	3,743
Wireline – Business	**567**	557
Wireless	**815**	694
	5,065	4,994
Equipment and other		
Wireless	**351**	353
	351	353
Intersegment eliminations	**(9)**	(7)
Total revenue	**5,407**	5,340

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at August 31, 2020:

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,504	614	162	92	33	1	2,406
Wireless	418	116	–	–	–	–	534
Total	**1,922**	**730**	**162**	**92**	**33**	**1**	**2,940**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

23. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	2020 $	2019 $
Employee salaries and benefits (1)	**657**	663
Purchases of goods and services	**2,373**	2,514
	3,030	3,177

(1) For the year ended August 31, 2020, employee salaries and benefits include restructuring costs of $14 compared to a recovery of $9 in restructuring costs for the year ended August 31, 2019.

24. OTHER GAINS (LOSSES)

	2020 $	2019 $
(Loss) gain on disposal of fixed assets and intangibles	**(3)**	32
Gain on disposal of non-core business	**–**	6
Debt Redemption Penalty	**(17)**	–
Gain on disposal of investment	**–**	15
Other (1)	**4**	(3)
	(16)	50

(1) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

25. INCOME TAXES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company's net deferred tax liability consists of the following:

	2020 $	2019 $
Deferred tax assets	**1**	4
Deferred tax liabilities	**(1,968)**	(1,875)
Net deferred tax liability	**(1,967)**	(1,871)

Significant changes recognized to deferred income tax assets (liabilities) are as follows:

	Property, plant and equipment and software assets $	Broadcast rights, licences, customer relationships, trademark and brands $	Partnership income $	Non-capital loss carry-forwards $	Accrued charges $	Total $
Balance at August 31, 2018	(287)	(1,733)	29	68	43	(1,880)
Recognized in statement of income	(12)	107	(61)	25	(63)	(4)
Recognized in other comprehensive income	–	–	–	–	13	13
Balance at August 31, 2019	(299)	(1,626)	(32)	93	(7)	(1,871)
Recognized in statement of income	**(51)**	**(10)**	**21**	**13**	**(32)**	**(59)**
Effect of IFRS 16 adoption (note 2)	**(4)**	**–**	**–**	**–**	**4**	**–**
Effect of IFRIC 23 adoption (note 2)	**(40)**	**2**	**–**	**–**	**–**	**(38)**
Recognized in other comprehensive income	**–**	**–**	**–**	**–**	**1**	**1**
Balance at August 31, 2020	**(394)**	**(1,634)**	**(11)**	**106**	**(34)**	**(1,967)**

The Company has capital loss carryforwards of approximately $46 for which no deferred income tax asset has been recognized in the accounts. These capital losses can be carried forward indefinitely.

The Company has non-capital loss carryforwards of approximately $301 for which no deferred income tax asset has been recognized in the accounts. The balance expires in varying annual amounts from 2034 to 2036.

The Company has taxable temporary differences associated with its investment in its subsidiaries. No deferred tax liabilities have been provided with respect to such temporary differences as the Company is able to control the timing of the reversal and such reversal is not probable in the foreseeable future.

The income tax expense differs from the amount computed by applying the statutory rates to income before income taxes for the following reasons:

	2020	2019
Current statutory income tax rate	**26.3%**	26.8%
Income tax expense at current statutory rates	**228**	228
Net increase (decrease) in taxes resulting from:		
Effect of tax rate change	**–**	(102)
Recognition of previously unrecognized tax losses	**(22)**	(5)
Equity (income) loss of an associate not recognized	**–**	(12)
Other	**(27)**	9
Income tax expense	**179**	118

The statutory income tax rate for the Company decreased from 26.8% in 2019 to 26.3% in 2020 as a result of provincial tax rate changes.

The components of income tax expense are as follows:

	2020 $	2019 $
Current income tax expense	**120**	114
Deferred tax expense related to temporary differences	**81**	111
Deferred tax recovery from the recognition of previously unrecognized tax losses	**(22)**	(5)
Deferred tax recovery from tax rate change	**–**	(102)
Income tax expense	**179**	118

26. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which consist of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video, and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

	2020 $	2019 $
Revenue		
Wireline	**4,250**	4,300
Wireless	**1,166**	1,047
	5,416	5,347
Intersegment eliminations	**(9)**	(7)
	5,407	5,340
Adjusted EBITDA [1]		
Wireline	**2,054**	1,955
Wireless	**337**	199
	2,391	2,154
Restructuring costs	**(14)**	9
Amortization	**(1,217)**	(1,038)
Operating income	**1,160**	1,125
Interest		
Operating	**267**	255
Other/non-operating	**7**	2
	274	257
Current taxes		
Operating	**113**	114
Other/non-operating	**7**	–
	120	114

[1] Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses. We previously referred to this measure as "Operating income before restructuring and amortization" but have renamed it to better align with language used by various stakeholders of the Company.

Capital expenditures

	2020 $	2019 $
Capital expenditures accrual basis		
Wireline	**784**	784
Wireless	**296**	385
	1,080	1,169
Equipment costs (net of revenue)		
Wireline	**31**	43
Capital expenditures and equipment costs (net)		
Wireline	**815**	827
Wireless	**296**	385
	1,111	1,212
Reconciliation to Consolidated Statements of Cash Flows		
Additions to property, plant and equipment	**970**	1,109
Additions to equipment costs (net)	**31**	42
Additions to other intangibles	**150**	147
Total of capital expenditures and equipment costs (net) per Consolidated Statements of Cash Flows	**1,151**	1,298
Increase (decrease) in working capital and other liabilities related to capital expenditures	**(38)**	(28)
Decrease in customer equipment financing receivables	**–**	1
Less: Proceeds on disposal of property, plant and equipment	**(2)**	(59)
Total capital expenditures and equipment costs (net) reported by segments	**1,111**	1,212

27. COMMITMENTS AND CONTINGENCIES

Commitments

The Company has the following future minimum payments for their contractual commitments that are not recognized as liabilities as at August 31, 2020:

	Purchase Obligations (1)	Property, Plant and Equipment
Within one year	501	184
1 to 3 years	311	30
3 to 5 years	232	3
Over 5 years	114	–
	1,158	217

(1) Includes contractual obligations under service, product, and wireless device contracts, program related agreements and exclusive rights to use intellectual property in Canada.

Contingencies

The Company and its subsidiaries are involved in litigation matters arising in the ordinary course and conduct of its business. Although resolution of such matters cannot be predicted with certainty, management does not consider the Company's exposure to litigation to be material to these consolidated financial statements.

Guarantees

In the normal course of business the Company enters into indemnification agreements and has issued irrevocable standby letters of credit and commercial surety bonds with and to third parties.

Indemnities

Many agreements related to acquisitions and dispositions of business assets include indemnification provisions where the Company may be required to make payment to a vendor or purchaser for breach of contractual terms of the agreement with respect to matters such as litigation, income taxes payable or refundable or other ongoing disputes. The indemnification period usually covers a period of two to four years. Also, in the normal course of business, the Company has provided indemnifications in various commercial agreements, customary for the telecommunications industry, which may require payment by the Company for breach of contractual terms of the agreement. Counterparties to these agreements provide the Company with comparable indemnifications. The indemnification period generally covers, at maximum, the period of the applicable agreement plus the applicable limitations period under law.

The maximum potential amount of future payments that the Company would be required to make under these indemnification agreements is not reasonably quantifiable as certain indemnifications are not subject to limitation. However, the Company enters into indemnification agreements only when an assessment of the business circumstances would indicate that the risk of loss is remote. At August 31, 2020, management believes it is remote that the indemnification provisions would require any material cash payment.

The Company indemnifies its directors and officers against any and all claims or losses reasonably incurred in the performance of their service to the Company to the extent permitted by law.

Irrevocable standby letters of credit and commercial surety bonds

The Company and certain of its subsidiaries have granted irrevocable standby letters of credit and commercial surety bonds, issued by high rated financial institutions, to third parties to indemnify them in the event the Company does not perform its contractual obligations. As of August 31, 2020, such instruments amounted to $5. The Company has not recorded any additional liability with respect to these instruments, as the Company does not expect to make any payments in excess of what is recorded on the Company's consolidated financial statements. The instruments mature at various dates during fiscal 2021 to fiscal 2022.

28. EMPLOYEE BENEFIT PLANS

Defined contribution pension plans

The Company has defined contribution pension plans for its non-union employees and, for the majority of these employees, contributes 5% of eligible earnings to the maximum amount deductible under the Income Tax Act. Effective January 1, 2019, the Company introduced a voluntary pension contribution matching program whereby, in addition to the 5% of Company contributions, employees who make voluntary contributions will receive a 25% match on contributions up to 5% of their eligible earnings. For union employees, the Company contributes amounts up to 9.8% of earnings to the individuals' registered retirement savings plans. Total pension costs in respect of these plans were $31 (2019 – $31) of which $24 (2019 – $23) was expensed and the remainder capitalized.

Defined benefit pension plans

The Company has two non-registered retirement plans for designated executives and senior executives. The following is a summary of the accrued benefit liabilities recognized in the statement of financial position.

	2020	2019
Non-registered plans		
Accrued benefit obligation	**513**	505
Fair value of plan assets	**445**	436
Accrued benefit liabilities and deficit	**68**	69

The plans expose the Company to a number of risks, of which the most significant are as follows:

(i) Volatility in market conditions: The accrued benefit obligations are calculated using discount rates with reference to bond yields closely matching the term of the estimated cash flows while many of the assets are invested in other types of assets. If plan assets underperform these yields, this will result in a deficiency. Changing market conditions in conjunction with discount rate volatility will result in volatility of the accrued benefit liabilities. To mitigate some of the investment risk, the Company has established long-term funding targets where the time horizon and risk tolerance are specified.

(ii) Selection of accounting assumptions: The calculation of the accrued benefit obligations involves projecting future cash flows of the plans over a long time frame. This means that assumptions used can have a material impact on the statements of financial position and comprehensive income because in practice, future experience of the plans may not be in line with the selected assumptions.

Non-registered pension plans

The Company provides a supplemental executive retirement plan (SERP) for certain of its senior executives and retirees. Benefits under this plan are based on the employees' length of service and their highest three-year average rate of eligible pensionable earnings during their years of service. In 2012, the Company closed the plan to new participants and amended the plan to freeze base salary levels at August 31, 2012 for purposes of determining eligible pensionable earnings. Employees are not required to contribute to this plan.

The Company provides an executive retirement plan (ERP) for certain executives not covered by the SERP. Benefits under this plan are comprised of defined contribution and defined benefit components and are based on the employees' length of service as well as final average earnings during their years of service. Employees are not required to contribute to this plan.

The table below shows the change in benefit obligation and funding status and the fair value of plan assets.

	SERP $	ERP $	2020 Total $	SERP $	ERP $	2019 Total $
Accrued benefit obligation, beginning of year	**478**	**27**	**505**	429	17	446
Current service cost	**2**	**9**	**11**	5	6	11
Interest cost	**14**	**1**	**15**	16	1	17
Payment of benefits to employees	**(19)**	**(2)**	**(21)**	(17)	(1)	(18)
Transfer from DC plan	**–**	**1**	**1**	–	1	1
Remeasurements:						
Effect of changes in demographic assumptions	**16**	**–**	**16**	(4)	–	(4)
Effect of changes in financial assumptions	**13**	**1**	**14**	53	3	56
Effect of experience adjustments	**(27)**	**(1)**	**(28)**	(4)	–	(4)
Accrued benefit obligation, end of year	**477**	**36**	**513**	478	27	505
Fair value of plan assets, beginning of year	**417**	**19**	**436**	421	15	436
Employer contributions	**–**	**12**	**12**	–	5	5
Interest income	**12**	**1**	**13**	15	1	16
Transfer from DC plan	**–**	**1**	**1**	–	1	1
Payment of benefits	**(19)**	**(2)**	**(21)**	(17)	(2)	(19)
Return on plan assets, excluding interest income	**5**	**(1)**	**4**	(2)	(1)	(3)
Fair value of plan assets, end of year	**415**	**30**	**445**	417	19	436
Accrued benefit liability and plan deficit, end of year	**62**	**6**	**68**	61	8	69

The weighted average duration of the defined benefit obligation of the SERP and ERP at August 31, 2020 is 15.6 years and 17.9 years, respectively.

The underlying plan assets of the SERP and ERP at August 31, 2020 are invested in the following:

	SERP	ERP
Cash and cash equivalents	**201**	**21**
Fixed income securities	**73**	**3**
Equity securities – Canadian	**41**	**3**
Equity securities – Foreign	**100**	**3**
	415	**30**

All fixed income and equity securities have a quoted price in active market.

The tables below show the significant weighted-average assumptions used to measure the pension obligation and cost for the plans.

Accrued benefit obligation	**2020 SERP %**	**2020 ERP %**	**2019 SERP %**	**2019 ERP %**
Discount rate	**2.70**	**2.70**	2.90	2.90
Rate of compensation increase	**3.00**[(1)]	**3.00**	3.00[(1)]	3.00

Benefit cost for the year	**2020 SERP %**	**2020 ERP %**	**2019 SERP %**	**2019 ERP %**
Discount rate	**2.90**	**2.90**	3.70	3.70
Rate of compensation increase	**3.00**[(1)]	**3.00**	3.00[(1)]	3.00

(1) Applies only to incentive compensation component of eligible pensionable earnings.

The calculation of the accrued benefit obligation is sensitive to the assumptions above. A one percentage point decrease in the discount rate would have increased the accrued benefit obligation at August 31, 2020 by $81. A one percentage point increase in the rate of compensation increase would have increased the accrued benefit obligation by $4.

When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the present value of the defined benefit obligation has been calculated using the projected benefit method which is the same method that is applied in calculating the defined benefit liability recognized in the statement of financial position. The sensitivity analysis presented above may not be representative of the actual change in the accrued benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some assumptions may be correlated.

The net pension benefit plan expense, which is included in employee salaries and benefits expense, is comprised of the following components:

	SERP	**ERP**	**2020 Total**	**SERP**	**ERP**	**2019 Total**
Current service cost	**2**	**9**	**11**	5	6	11
Interest cost	**14**	**1**	**15**	16	1	17
Interest income	**(12)**	**(1)**	**(13)**	(15)	(1)	(16)
Pension expense	**4**	**9**	**13**	6	6	12

Other benefit plans

The Company has post-employment benefits plans that provide post-retirement health and life insurance coverage to certain executive level retirees and are funded on a pay-as-you-go basis. The table below shows the change in the accrued post-retirement obligation which is recognized in the statement of financial position.

	2020	2019
Accrued benefit obligation and plan deficit, beginning of year	**4**	3
Current service cost	**–**	–
Interest cost	**–**	–
Payment of benefits to employees	**–**	–
Remeasurements:		
Effect of changes in demographic assumptions	**–**	1
Accrued benefit obligation and plan deficit, end of year	**4**	4

The weighted average duration of the benefit obligation at August 31, 2020 is 17.6 years.

The post-retirement benefit plan expense, which is included in employee salaries and benefits expense, is $nil (2019 – $nil) and is comprised of current service and interest cost.

The discount rates used to measure the post-retirement benefit cost for the year and the accrued benefit obligation as at August 31, 2020 were 2.70% and 2.90%, respectively (2019 – 3.70% and 2.90%, respectively). A one percentage point decrease in the discount rate would have increased the accrued benefit obligation at August 31, 2020 by $1.

Employer contributions

The Company's estimated contributions to the defined benefit plans in fiscal 2021 is $3.

29. RELATED PARTY TRANSACTIONS

Controlling shareholder

Voting control of the Company is held by Shaw Family Living Trust (SFLT) and its subsidiaries. As at August 31, 2020, SFLT and its subsidiaries held 17,562,400 Class A Shares, representing approximately 79% of the issued and outstanding Class A Shares, for the benefit of the descendants of the late JR Shaw and Carol Shaw. The sole trustee of SFLT is a private company controlled by a board consisting of seven directors, including as at August 31, 2020, Bradley S. Shaw, four other members of his family, and two independent directors.

The Class A Shares are the only shares entitled to vote in all circumstances. Accordingly, SFLT and its subsidiaries are able to elect a majority of the Board of Directors of the Company and to control the vote on matters submitted to a vote of the Company's Class A Shares.

Significant investments in subsidiaries

The following are the significant subsidiaries of the Company, all of which are incorporated or partnerships in Canada.

	Ownership Interest	
	August 31, 2020	August 31, 2019
Shaw Cablesystems Limited	**100%**	100%
Shaw Cablesystems G.P.	**100%**	100%
Shaw Envision Inc.	**100%**	100%
Shaw Telecom Inc.	**100%**	100%
Shaw Telecom G.P.	**100%**	100%
Shaw Satellite Services Inc.	**100%**	100%
Star Choice Television Network Incorporated	**100%**	100%
Shaw Satellite G.P.	**100%**	100%
Freedom Mobile Inc.	**100%**	100%

Key management personnel and Board of Directors

Key management personnel consist of the most senior executive team and along with the Board of Directors, and have the authority and responsibility for planning, directing and controlling the activities of the Company.

Compensation

The compensation expense of key management personnel and Board of Directors is as follows:

	2020 $	2019 $
Short-term employee benefits	**17**	29
Post-employment pension benefits	**3**	9
Termination benefits	**11**	–
Share-based compensation	**6**	2
	37	40

Transactions

The Company paid $2 (2019 – $2) for collection, installation, and maintenance services to a company controlled by a Director of the Company.

During the year, the Company paid $10 (2019 – $12) for remote control units to a supplier where Directors of the Company hold positions on the supplier's board of directors.

At August 31, 2020, the Company had $1 owing in respect of these transactions (2019 - $nil).

During the year, network fees of $27 (2019 – $27) were paid to a programmer where a Director of the Company holds a position on the programmer's board of directors.

At August 31, 2020, the Company had $4 owing in respect of these transactions (2019 – $4).

In the prior year, the Company completed the sale of a non-core parcel of land and the building located thereon (the "Property"), to an affiliate of SFLT (the "Purchaser"), for total net proceeds of approximately $45. The Property had a net book value of approximately $4 resulting in a gain on disposition of approximately $41. The purchase price was determined based on appraisals performed by two independent valuators. As part of the transaction, the Purchaser agreed to lease back the Property to the Company for a term of three years at market rental rates (which was also based on appraisals from the two independent valuators) allowing the Company to monetize a non-core asset. The transaction was approved by the independent Board members of the Company. At August 31, 2020, the Company had a remaining lease liability of $1 in respect of this lease which is included in the amounts disclosed in Note 14.

Other related parties

The Company has entered into certain transactions and agreements in the normal course of business with certain of its related parties. These transactions are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Corus

The Company and Corus are subject to common voting control. During the year, network fees of $121 (2019 – $127), advertising fees of $6 (2019 – $5), and administrative fees of $1 (2019 – $1) were paid to various Corus subsidiaries and entities subject to significant influence. In addition, the Company provided administrative, advertising and other services for $1 (2019 – $1), uplink of television signals for $5 (2019 – $8), and Internet services and lease of circuits for $6 (2019 – $6). At August 31, 2020, the Company had a net of $21 owing in respect of these transactions (2019 – $11).

As part of a regulatory requirement where Shaw pays Corus in lieu of either providing the news coverage directly or contributing into a fund managed by the CRTC, Shaw paid $13 (2019 - $14) as part of the Local News Community Investment program.

The Company provided Corus with advertising spots in return for radio and television advertising. No monetary consideration was exchanged for these transactions and no amounts were recorded in the accounts.

Burrard Landing Lot 2 Holdings Partnership

During the year, the Company paid $11 (2019 – $10) to the Partnership for lease of office space in Shaw Tower. Shaw Tower, located in Vancouver, BC, is the Company's headquarters for its lower mainland operations. At August 31, 2020, the Company had a remaining lease liability of $67 in respect of the office space lease which is included in the amounts disclosed in Note 14.

30. FINANCIAL INSTRUMENTS

Fair values

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and Other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market rates. Other notes and debentures are valued based upon current trading values for similar instruments.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined using an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

The carrying value and estimated fair value of long-term debt are as follows:

	August 31, 2020		August 31, 2019	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion) (1)	**4,548**	**5,613**	5,308	6,014

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

Risk management

The Company is exposed to various market risks including currency risk and interest rate risk, as well as credit risk and liquidity risk associated with financial assets and liabilities. The Company has designed and implemented various risk management strategies, discussed further below, to ensure the exposure to these risks is consistent with its risk tolerance and business objectives.

Market risk

Market risk is the risk that the fair value or cash flows of a financial instrument will fluctuate as a result of changes in market prices, including foreign exchange and interest rates, the Company's share price and market price of publicly traded investments.

Currency risk

Certain of the Company's capital expenditures and operating costs are incurred in US dollars, while its revenue is primarily denominated in Canadian dollars. Decreases in the value of the Canadian dollar relative to the US dollar could have an adverse effect on the Company's cash flows. To mitigate some of the uncertainty in respect to capital expenditures and operating costs, the Company regularly enters into forward contracts in respect of US dollar commitments. With respect to 2020, the Company entered into forward contracts to purchase US $72 over a period of 12 months commencing in September 2019 at an average exchange rate of 1.3115 Cdn. At August 31, 2020 the Company had forward contracts to purchase US $132 over a period of 12 months commencing September 2020 at an average exchange rate of 1.3544 Cdn in respect of US dollar commitments.

Interest rate risk

Due to the capital-intensive nature of its operations, the Company utilizes long-term financing extensively in its capital structure. The primary components of this structure are a banking facility and various Canadian senior notes with varying maturities issued in the public markets as more fully described in Note 13. The Company also has an accounts receivable securitization program as described in Note 10.

Interest on the Company's unsecured banking facility and accounts receivable securitization program are based on floating rates, while the senior notes are fixed-rate obligations. When drawn, the Company utilizes its credit facility to finance day-to-day operations and, depending on market conditions, periodically converts the bank loans to fixed-rate instruments through public market debt issues. As at August 31, 2020, 100% of the Company's consolidated long-term debt was fixed with respect to interest rates.

Sensitivity analysis

The sensitivity to currency risk has been determined based on a hypothetical change in Canadian dollar to US dollar foreign exchange rates of 10%. Foreign exchange forward contracts would be impacted by this hypothetical change resulting in a change to other comprehensive income by $13 net of tax (2019 – $7). A portion of the Company's accounts receivables and accounts payable and accrued liabilities is denominated in US dollars; however, due to their short-term nature, there is no significant market risk arising from fluctuations in foreign exchange rates.

Interest on the Company's banking facility and accounts receivable securitization program are based on floating rates. As at August 31, 2020 there is no significant market risk arising from interest rate fluctuations within a reasonably contemplated range from their actual amounts.

At August 31, 2020, a one dollar change in the Company's Class B Non-Voting Shares would have had an impact on net income of $1 (August 31, 2019 – $1) in respect of the Company's DSU, RSU, and PSU plans.

Credit risk

Accounts receivable in respect of the Consumer, Business and Wireless divisions are not subject to any significant concentrations of credit risk due to the Company's large and diverse customer base. As at August 31, 2020, the Company had accounts receivable of $268 (August 31, 2019 – $287), net of the allowance for doubtful accounts of $74 (August 31, 2019 – $63). The Company maintains an allowance for doubtful accounts for the expected credit losses resulting from the inability of its customers to make required payments.

	2020 $	2019 $
Balance, beginning of period	63	38
Additions (doubtful accounts expense)	60	40
Net usage	(49)	(15)
Balance, end of period	**74**	**63**

In determining the allowance, the Company considers factors such as the number of days the customer account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances. As at August 31, 2020, $105 (August 31, 2019 – $123) of accounts receivable is considered to be past due, defined as amounts outstanding past normal credit terms and conditions. Uncollectible accounts receivable are charged against the allowance account based on the age of the account and payment history. The Company believes that its allowance for doubtful accounts is sufficient to reflect the related credit risk.

The Company mitigates credit risk of subscriber receivables through advance billing and procedures to downgrade or suspend services on accounts that have exceeded agreed credit terms and routinely assesses the financial strength of its business customers through periodic review of payment practices.

Credit risks associated with US currency contracts arise from the inability of counterparties to meet the terms of the contracts. In the event of non-performance by the counterparties, the Company's accounting loss would be limited to the net amount that it would be entitled to receive under the contracts and agreements. In order to minimize the risk of counterparty default under its swap agreements, the Company assesses the creditworthiness of its swap counterparties.

Liquidity risk

Liquidity risk is the risk that the Company will experience difficulty in meeting obligations associated with financial liabilities. The Company manages its liquidity risk by monitoring cash flow generated from operations, available borrowing capacity, and by managing the maturity profiles of its long-term debt.

The Company's undiscounted contractual maturities as at August 31, 2020 are as follows:

	Short-term borrowings	Accounts payable and accrued liabilities[1]	Long-term debt repayable at maturity	Leases (note 14)	Interest payments
Within one year	200	999	1	154	218
1 to 3 years	–	–	502	288	436
3 to 5 years	–	–	546	273	365
Over 5 years	–	–	3,550	916	1,932
	200	999	4,599	1,631	2,951

[1] Includes accrued interest and dividends of $217.

31. CONSOLIDATED STATEMENTS OF CASH FLOWS

(i) Funds flow from continuing operations

	2020 $	2019 $
Net income from continuing operations	**688**	733
Adjustments to reconcile net income to funds flow from operations:		
Amortization	**1,220**	1,041
Deferred income tax expense (recovery)	**59**	4
Share-based compensation	**2**	3
Defined benefit pension plans	**1**	7
Equity (income)/ loss of an associate or joint venture	**–**	(46)
Loss on disposal of an associate or joint venture	**–**	109
Gain on disposal of investments	**–**	(15)
Net change in contract asset balances	**(14)**	(23)
Loss (gain) on disposal of fixed assets and intangibles	**3**	(32)
Loss on write-down of assets	**7**	–
Other	**23**	(4)
Funds flow from continuing operations	**1,989**	1,777

(ii) Interest and income taxes paid and interest received and classified as operating activities are as follows:

	2020 $	2019 $
Interest paid	**287**	230
Income taxes paid (net of refunds)	**134**	166
Interest received	**7**	29

Included in interest paid is interest on lease liabilities of $44 for the year ended August 31, 2020 (2019 – $nil).

(iii) Non-cash transactions

The Consolidated Statements of Cash Flows exclude the following non-cash transactions:

	2020 $	2019 $
Issuance of Class B Non-Voting Shares:		
Dividend reinvestment plan (note 20)	**37**	217

32. CAPITAL STRUCTURE MANAGEMENT

The Company's objectives when managing capital are:

(i) to maintain a capital structure which optimizes the cost of capital, provides flexibility and diversity of funding sources and timing of debt maturities, and adequate anticipated liquidity for organic growth and strategic acquisitions;

(ii) to maintain compliance with debt covenants; and

(iii) to manage a strong and efficient capital base to maintain investor, creditor and market confidence.

The Company defines capital as comprising all components of shareholders' equity (other than non-controlling interests and amounts in accumulated other comprehensive income/loss), long-term debt (including the current portion thereof), lease liabilities (including the current portion thereof), short-term borrowings and bank indebtedness less cash and cash equivalents.

	2020 $	2019 $
Cash	**(763)**	(1,446)
Short-term borrowings	**200**	40
Long-term debt repayable at maturity	**4,599**	5,350
Lease liabilities	**1,270**	–
Share capital	**4,602**	4,605
Contributed surplus	**27**	26
Retained earnings	**1,703**	1,745
	11,638	10,320

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of underlying assets. The Company may also from time to time change or adjust its objectives when managing capital in light of the Company's business circumstances, strategic opportunities, or the relative importance of competing objectives as determined by the Company. There is no assurance that the Company will be able to meet or maintain its currently stated objectives.

The Company's credit facilities are subject to covenants which include maintaining minimum or maximum financial ratios, including total debt to operating cash flow/adjusted earnings before interest, taxes, depreciation and amortization, and operating cash flow to fixed charges. At August 31, 2020, the Company is in compliance with these covenants and based on current business plans and economic conditions, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants.

The Company's overall capital structure management strategy remains unchanged from the prior year.

33. SUBSEQUENT EVENT

Subsequent to year-end, on October 29, 2020, the Company's Board of Directors approved the renewal of the NCIB program to purchase up to 24,532,404 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares. The NCIB program remains subject to approval by the TSX and, if accepted, will be conducted in accordance with the applicable rules and policies of the TSX and applicable Canadian securities law.

NEWS RELEASE

Shaw Announces First Quarter Fiscal 2021 Results

- **Success of Shaw Mobile leads to record Wireless net additions of approximately 101,000 in the quarter, including a 31% year-over-year increase in postpaid net additions to 87,300, and continued Wireless service revenue growth of approximately 10%**
- **Strong Wireline adjusted EBITDA margin[1] of 50.4%, an increase of 190-basis points over prior year, reflects focus on profitable customer interactions and effective cost management**
- **Stable financial performance as COVID-19 pandemic and uncertainty persists with consolidated adjusted EBITDA[2] growth of 3.2% and free cash flow[2] growth of 23% compared to the prior year**
- **Repurchased approximately 6.5 million Class B Non-Voting Shares since the commencement of NCIB program in November for approximately $150 million**

Calgary, Alberta (January 13, 2021) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended November 30, 2020. Consolidated revenue decreased by 0.9% to $1.37 billion, consolidated net income increased 0.6% to $163 million, and adjusted EBITDA increased 3.2% year-over-year to $607 million.

"Since our entry into the wireless business almost five years ago, our strategy has been focused on scaling our Wireless subscriber base and improving the overall customer experience. Throughout this period, we have made significant investments that have enabled us to be innovative and disruptive, while providing tremendous value for Canadians, particularly as we continue to face uncertainties from the ongoing COVID-19 pandemic. In this environment, we have demonstrated our flexible and nimble approach with our go-to-market strategies and strong execution. Connectivity matters more than ever, and our Shaw Mobile bundling strategy is a powerful combination of high quality, affordable wireless services with our robust Fibre+ Internet offering which is clearly resonating with our Internet customers. Our bundling initiatives, combined with a sharp focus on effective cost management across our entire organization, delivered record Wireless customers and a Wireline adjusted EBITDA margin that exceeded 50% in the quarter," said Brad Shaw, Executive Chair & Chief Executive Officer.

The Company achieved record Wireless subscriber growth in the first quarter with approximately 101,000 new Wireless customers, including 87,300 postpaid net additions and 13,700 prepaid net additions, and continued growth in Wireless service revenue of approximately 10% year-over-year. First quarter ARPU[3] decreased by approximately 1.3% as the Company executes on its bundled growth strategy through the acquisition of lower revenue Shaw Mobile customers. Continued aggressive price competition, primarily impacting the Freedom Mobile brand, caused postpaid churn[3] to increase in the first quarter to 1.81% compared to 1.50% a year ago. Since the launch of Shaw Mobile on July 30, 2020, the Company continues to expand its premium retail experience to more communities and advance its digital capabilities to serve its customers safely and effectively. During the first quarter, the Company opened five additional Shaw-branded retail locations in new communities throughout British Columbia and Alberta, bringing the total number of wireless retail locations offering Shaw Mobile to approximately 150 stores.

In Wireline, the Company remained focused on profitable customer interactions, building awareness for its Shaw Mobile bundle, and implementing further broadband product and distribution enhancements. First quarter Consumer Internet RGUs[3] declined by approximately 15,100 as strong early demand for Shaw Mobile was driven primarily by existing Shaw Internet subscribers, combined with continued lower Internet sales activity due to the COVID-19 environment. The competitive environment continues to be robust and the Company's efforts are on securing the connectivity needs of the household through its bundling initiatives instead of aggressive discounts on stand-alone products.

Since May 2020, the Company has expanded its portfolio of Internet products and more than doubled the top speed Internet tier, providing more choice for its customers. Following the launch of Fibre+ Gig Internet in the spring, the Company launched Fibre+ Gig 1.5 in early November, a premium Internet tier that delivers the speed and capacity needed for data-heavy customers. Since the launch of faster Internet speeds, combined with the Shaw Mobile bundle, a greater portion of new and existing Shaw Internet customers are choosing Fibre+ Gig plans. The Company also secured approximately 50 additional Internet retail locations through its existing relationships with national third-party retailers.

During the quarter Wireline revenue remained stable with Consumer decreasing 1.4% to $911 million and Business revenue increasing 1.4% to $145 million compared to the prior year. Wireline adjusted EBITDA increased 2.9% and adjusted EBITDA margin increased 190-basis points to 50.4% due to proactive base management and strong cost discipline, partially offset by lower Consumer revenue.

Mr. Shaw continued, "We have successfully navigated the last ten months of pandemic-related challenges, including the launch of Shaw Mobile, providing a strong bundled value proposition for customers and we are proud of the strength of our facilities-based networks, which are not just the core of our digital infrastructure – they are the backbone of our social and economic well-being. While there has been positive news related to the potential efficacy and the timeframe for availability of COVID-19 vaccines in our country, we are still faced with a period of uncertainty, particularly the impacts regarding the most recent restrictions on several areas of our business. However, we continue to believe that connectivity is critical and we remain focused on growing our bundled customers and effectively managing costs in this environment."

Selected Financial Highlights

	Three months ended November 30,		
(millions of Canadian dollars except per share amounts)	**2020**	2019	Change %
Revenue	**1,370**	1,383	(0.9)
Adjusted EBITDA[(1)]	**607**	588	3.2
Adjusted EBITDA margin[(1)]	**44.3%**	42.5%	4.2
Free cash flow[(1)]	**225**	183	23.0
Net income	**163**	162	0.6
Basic and diluted earnings per share	**0.31**	0.31	

(1) Adjusted EBITDA, adjusted EBITDA margin and free cash flow are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See definitions and discussion under "Non-GAAP and additional financial measures" in the accompanying MD&A.

In the quarter, the Company added approximately 101,000 net Wireless RGUs, consisting of 87,300 postpaid additions and 13,700 prepaid additions. The 31% year-over-year increase in the postpaid subscriber additions reflects strong demand for Shaw Mobile from existing Shaw Internet customers.

Wireless service revenue for the three-month period increased 9.7% to $215 million over the comparable period in fiscal 2020 due to an increased subscriber base, including significant Shaw Mobile additions in the quarter. First quarter ARPU decreased 1.3% to $38.25 compared to the prior year, reflecting the successful onboarding of bundled Shaw Mobile customers. Wireless equipment revenue for the three-month period decreased 16.4% to $102 million as Shaw Mobile benefited from the vast majority of customers bringing their own device. First quarter Wireless adjusted EBITDA of $75 million improved 5.6% year-over-year, due to service revenue growth partially offset by lower roaming revenue and investments in the Shaw Mobile launch, including the expansion of Shaw's retail footprint.

Wireline RGUs declined by approximately 100,900 in the quarter compared to a loss of approximately 57,500 in the first quarter of fiscal 2020. The current quarter includes Consumer Internet RGU decline of approximately 15,100. The mature products within the Consumer division, including Video, Satellite and Phone declined in the aggregate by 91,800 RGUs. Through continued broadband product and distribution enhancements and Shaw Mobile bundling initiatives, the Company is focused on profitable subscriber growth and reducing household churn.

First quarter Wireline revenue of $1,056 million decreased 1.0% while adjusted EBITDA of $532 million increased 2.9% year-over-year, resulting in a strong Wireline adjusted EBITDA margin of 50.4%. Consumer revenue of $911 million decreased 1.4% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue increased approximately 1.4% year-over-year to $145 million, reflecting Internet revenue growth and demand for the Smart suite of business products, partially offset by lower video revenue primarily related to the COVID-19 impacts, particularly in the hospitality sector. Wireline adjusted EBITDA growth was due to proactive base management and decreased operating expenses, including lower employee related costs, travel expenses and advertising and sponsorship costs compared to the prior year.

Capital expenditures in the first quarter of $234 million compared to $260 million a year ago. Wireline capital spending decreased by approximately $44 million compared to the previous year due to lower success-based capital, capitalized labor and new housing development. Wireless spending increased by approximately $18 million year-over-year due to continued network expansion, spectrum deployment and higher IT related spending to support Shaw Mobile launch and digital initiatives.

Free cash flow for the quarter of $225 million compared to $183 million in the prior year. The increase was due to higher adjusted EBITDA and lower capital expenditures partially offset by increased cash taxes.

Net income for the first quarter of fiscal 2021 of $163 million is compared to $162 million in the first quarter of fiscal 2020 as higher adjusted EBITDA and lower interest expense is partially offset with restructuring costs of $12 million and $10 million in higher income taxes.

Fiscal 2021 Guidance

The Company confirms that it remains on track to meet its fiscal 2021 guidance of adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion and free cash flow of approximately $800 million.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. During the first quarter of fiscal 2021, the Company experienced a continued reduction in Wireline subscriber activity, an increase in wireline network usage as well as extended peak hours, reduced Wireless equipment sales, increased demand for Wireless voice services, a decrease in Wireless roaming and overage revenue, and an increase in the suspension, cancellation, or reduction of Business customer accounts, impacting Business revenue.

While the financial impacts from COVID-19 in the first quarter of fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, who are also particularly vulnerable to the economic impacts of challenges in the energy sector and COVID-19, including mandated closures, capacity restrictions, self-quarantines or further social distancing restrictions.

The Company believes its business and facilities-based networks provide critical and essential services to Canadians which remained resilient throughout fiscal 2020 and will continue to be resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence and/or subsequent waves of the pandemic or the potential efficacy and time frame for the availability of any COVID-19 vaccines, compounded by the continued uncertainty in the energy sector, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

As at November 30, 2020, the Company's net debt leverage ratio[1] of 2.3x was below its target leverage range of 2.5x to 3.0x. On November 2, 2020, the Company received approval from the Toronto Stock Exchange (TSX) to renew its normal course issuer bid (NCIB) program to purchase up to 24,532,404 Class B Non-Voting Participating Shares (Class B Non-Voting Shares), representing 5% of all the issued and outstanding Class B Non-Voting Shares. As of December 31, 2020, and since renewal of the NCIB in early November, the Company repurchased approximately 6.5 million Class B Non-Voting Shares for approximately $150 million or $22.93 per Class B Non-Voting Share.

"We are pleased with our first quarter performance which clearly demonstrates our commitment to growing our wireless customer base through a strong bundled offering. While the ongoing COVID-19 pandemic will continue to have impacts to certain areas of our business, we believe that connectivity remains critical and our business is resilient. Supported by free cash flow growth, ample liquidity and a strong balance sheet, we are on track to meet our commitments for fiscal 2021, including returning substantial capital to our shareholders through our dividend payments and our NCIB program that commenced in the quarter," said Brad Shaw.

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone and video services. The Wireless division provides wireless voice and LTE data services through an expanding and improving mobile wireless network infrastructure.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

Advisories

The following Management's Discussion and Analysis (MD&A) of Shaw Communications Inc. is dated January 13, 2021 and should be read in conjunction with the condensed interim Consolidated Financial Statements and Notes thereto for the quarter ended November 30, 2020 and the 2020 Annual Consolidated Financial Statements, the Notes thereto and related MD&A included in the Company's 2020 Annual Report. The financial information presented herein has been prepared on the basis of International Financial Reporting Standards (IFRS) for interim financial statements and is expressed in Canadian dollars unless otherwise indicated. References to "Shaw," the "Company," "we," "us" or "our" mean Shaw Communications Inc. and its subsidiaries and consolidated entities, unless the context otherwise requires.

Caution concerning forward-looking statements

Statements included in this MD&A that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal" and similar expressions (although not all forward-looking statements contain such words). Forward looking statements in this MD&A may include, but are not limited to statements relating to:

- future capital expenditures;
- proposed asset acquisitions and dispositions;
- expected cost efficiencies;
- financial guidance and expectations for future performance;
- business and technology strategies and measures to implement strategies;
- the Company's equity investments, joint ventures, and partnership arrangements;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;

- expected project schedules, regulatory timelines, completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented by governments or regulators;
- timing of new product and service launches;
- the deployment of: (i) network infrastructure to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the expected growth in the Company's market share;
- the cost of acquiring and retaining subscribers and deployment of new services;
- the expansion and growth of the Company's business and operations and other goals and plans;
- execution and success of the Company's current and long term strategic initiatives; and
- the expected impact of the continued uncertainty in the energy sector and the COVID-19 pandemic.

All of the forward-looking statements made in this MD&A are qualified by these cautionary statements.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this MD&A are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the ongoing uncertainty faced by the energy sector and the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods.

These assumptions, many of which are confidential, include but are not limited to management expectations with respect to:

- general economic conditions, which includes the impact on the economy and financial markets of (i) uncertainty in the energy sector, and (ii) the COVID-19 pandemic and other health risks;
- the impact of (i) uncertainty in the energy sector, and (ii) the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources and/or financial results;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment, and devices;
- the completion of proposed transactions;
- industry structure, conditions and stability;

- regulation, legislation or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long-term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- the sustainability of results and objectives and cost reductions achieved through the Total Business Transformation (TBT) initiative and Voluntary Departure Program (VDP);
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company can gain access to sufficient retail distribution channels;
- the Company can access the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many risk factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including but not limited to:

- changes in general economic, market and business conditions including the impact of (i) uncertainty in the energy sector, and (ii) the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees in response to the COVID-19 pandemic;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information and communications industries;
- changes in laws, regulations and decisions by regulators, or other actions by governments or regulators, that affect the Company or the markets in which it operates;
- any emergency measures implemented by governments or regulators;
- technology, privacy, cyber security and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects by the completion date;
- the Company's ability to grow subscribers and market share;
- the Company's ability to close key transactions;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers and their goods and services required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;

- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to sustain the results/objectives and cost reductions achieved through the TBT initiative and VDP;
- the Company's ability to complete the deployment of (i) network infrastructure required to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- opportunities that may be presented to and pursued by the Company;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in the Company's fiscal 2020 Annual MD&A under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors. Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2020 Annual MD&A and this MD&A. This MD&A provides certain future-oriented financial information or financial outlook (as such terms are defined in applicable securities laws), including the financial guidance and assumptions disclosed under "Outlook." Shaw discloses this information because it believes that certain investors, analysts and others utilize this and other forward-looking information to assess Shaw's expected operational and financial performance, and as an indicator of its ability to service debt and pay dividends to shareholders. The Company cautions that such financial information may not be appropriate for this or other purposes.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this MD&A are expressly qualified by this statement.

Additional Information

Additional information concerning the Company, including the Company's Annual Information Form, is available through the Internet on SEDAR which may be accessed at www.sedar.com. Copies of such information may also be obtained on the Company's website at www.shaw.ca, or on request and without charge from the Corporate Secretary of the Company, Suite 900, 630 – 3rd Avenue S.W., Calgary, Alberta, Canada T2P 4L4, telephone (403) 750-4500.

Non-GAAP and additional financial measures

Certain measures in this MD&A do not have standard meanings prescribed by GAAP and are therefore considered non-GAAP financial measures. These measures are provided to enhance the reader's overall understanding of our financial performance or current financial condition. They are included to provide investors and management with an alternative method for assessing our operating results in a manner that is focused on the performance of our ongoing operations and to provide a more consistent basis for comparison between periods. These measures are not in accordance with, or an alternative to, GAAP and do not have standardized meanings. Therefore, they are unlikely to be comparable to similar measures presented by other entities.

Please refer to "Non-GAAP and additional financial measures" in this MD&A for a discussion and reconciliation of non-GAAP financial measures, including adjusted EBITDA, free cash flow and net debt as well as net debt leverage ratio and adjusted EBITDA margin, which are non-GAAP ratios.

Introduction

At Shaw, we focus on delivering sustainable long-term growth by connecting customers to the world through a best-in-class seamless connectivity experience by leveraging our world class converged network. This includes driving operational efficiencies and executing on our strategic priorities through the delivery of an exceptional customer experience and a more agile operating model. Our strategic priorities include growing our wireless and broadband relationships, with a focus on bundling Shaw Mobile and Internet customers, identifying sustainable cost savings in our core Wireline business and making the appropriate investments to capitalize on future growth, including network related investments to support continued broadband product enhancements and deliver a 5G wireless experience.

With the onset of the global COVID-19 pandemic in 2020, connectivity rapidly became a critical lifeline for Canadians and our economy. During this unprecedented period, our network performance was exceptional, and we remain focused on supporting our employees, customers and communities. Our robust facilities-based network, the result of years of significant investment, has showcased its strength in addressing our customers' need to stay connected to family, friends and colleagues and work from home throughout the COVID-19 pandemic. During the first quarter, the Company experienced the following key impacts related to COVID-19:

- a reduction in overall wireline subscriber activity,
- an increase in wireline network usage as well as extended peak hours,
- reduced wireless equipment sales,
- increased demand for wireless voice services,
- a decrease in wireless roaming and overage revenue,
- customer payments substantially in-line with historical trends, and
- the suspension, reduction, or cancellation of, Shaw Business customer accounts

While the pandemic has had an impact on our business, Shaw continues to be resilient, delivering solid financial and operating results, and we believe that we are well positioned to meet the rapidly changing and increasing demands of our customers. The financial impacts from COVID-19 in the first quarter were not material; however, the situation remains uncertain in terms of: (i) its magnitude, outcome, duration, resurgences and/or subsequent waves, and (ii) the potential efficacy and time frame for the availability of any COVID-19 vaccines. Consumer behaviors could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability of customers to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, who are also particularly vulnerable to the economic impacts of the volatile energy sector and COVID-19, including mandated closures or further social distancing restrictions.

As an ongoing risk, the duration and impact of the COVID-19 pandemic is still unknown, as is the efficacy and duration of the government interventions. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 pandemic may materially and adversely affect the Company's operations, financial results and condition in future periods are also subject to significant uncertainty.

Wireless

Our Wireless division currently operates in Ontario, Alberta and British Columbia, covering approximately 50% of the Canadian population, and is positioned as the leading alternative for mobile services to the three national wireless incumbent carriers.

On July 30, 2020, the Company launched Shaw Mobile, a new wireless service in western Canada that leverages Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, to provide Shaw Internet customers with an innovative wireless experience. Shaw Mobile provides Shaw Internet customers with bundling opportunities to take advantage of unprecedented savings, combined with the ability to customize their mobile data requirements through two rate plans – By The Gig and Unlimited Data. Shaw Mobile is a powerful example of how facilities-based service providers can compete and innovate to deliver true wireless affordability for Canadians. Shaw Mobile capitalizes on the long-term trend that shows the vast majority of Canadians' smart device data usage occurs on WiFi networks, a fact amplified by recent work-from-home trends.

Freedom Mobile continues to promote its Big Gig Unlimited and Absolute Zero offers. Paired with the most popular devices, and ongoing improvements in the strength and capacity of its network, the Big Gig Unlimited and Absolute Zero plans continue to disrupt the wireless market by providing Canadians with a better, more affordable option when choosing a wireless service provider.

First quarter fiscal 2021 results include record Wireless net additions of approximately 101,000, due to strong demand for Shaw Mobile from existing Internet customers, bringing the total Wireless customer base to over 1.9 million subscribers. Wireless service revenue increased 9.7% to $215 million and adjusted EBITDA increased 5.6% to $75 million compared to the first quarter of fiscal 2020 as the Company continues to scale its business, partially offset by reduced roaming revenue and Shaw Mobile investments.

Supporting its wireless growth are significant investments in its wireless network and customer service capabilities. The Company continues to modernize and expand its retail presence. Since the launch of Shaw Mobile, which included 19 locations, an additional 5 were added in the first quarter. Total wireless retail locations across its operating footprint, including corporate, dealer and national retail, have grown to approximately 720, where Shaw Mobile is available in approximately 150 locations. The Company also continues to prioritize network investments that enhance its existing LTE service and prepare for the delivery of 5G services.

The Company has completed several successful 5G trials, the most recent using the 600 MHz spectrum band. In addition, 600 MHz radio and antenna designs were implemented at new and existing sites in preparation for a 5G service and the Company has completed the migration of its core network to the CloudBased Infrastructure Software platform, the latest generation of cloud core architecture from NOKIA. As part of its converged network strategy, the Company continues to leverage the coaxial cable (which transports both power and multi-gigabit data speeds) in its Fibre+ network for the rapid and flexible deployment of small cells, which will support densification efforts in preparation for 5G.

Wireline

In our Wireline business, we have cemented our status as a technology leader and Western Canada's leader in gig speed Internet underpinned by our Fibre+ network. Through our digital transformation, we have made it easier to interact with our customers and are leveraging insights from customer data to better understand their preferences so we can provide them with the services they want. We continue to streamline and simplify manual processes that improve the customer experience and day-to-day operations for our employees.

Despite the unprecedented impact that the COVID-19 pandemic had on the lives of our customers this past year, and the corresponding impacts to the way we serve our customers, our focus remains on the execution and delivery of stable and profitable Wireline results. This includes growth in high quality Internet subscribers and improving overall customer account profitability by attracting and retaining higher value households with our best value proposition on 2-year ValuePlans for those who want faster Internet with a better customer experience in addition to Video and Wireless services. Through our introduction of Shaw Mobile, we expect to further strengthen our relationship with existing Wireline customers with our bundled offering to Internet customers as we continue to scale our Wireless business.

The Company continues to deploy its Shaw Gateway modem, powered by Comcast, which enables faster Internet speeds, supports more devices, and provides a stronger in-home WiFi connection. For customers with harder to reach areas in their homes, the new Fibre+ Pods work as an extension of the Shaw Gateway modem to deliver WiFi to all corners of the home, including places where it is difficult to get coverage because of signal blocking building materials or home design.

Building on its network advantage, the Company continues to enhance its broadband product with a new portfolio of Internet plans, including the 750 Mbps tier and its Shaw Fibre+ Gig tier, each available to 99% of residential customers located in our western Canadian Wireline operating footprint. The Company introduced Shaw Fibre+ Gig 1.5 in November, designed to provide gamers, streamers and other heavy data users the speed and bandwidth they need for the many connected devices and data-heavy applications they use every day at home. The Company also secured approximately 50 additional Internet retail locations through its existing relationship with national third-party retailers. In the first quarter, Wireline RGUs declined by approximately 100,900 compared to a decline of 57,500 in the prior year, including Consumer Internet losses of 15,100 in the current quarter. Wireline revenue remained stable, decreasing 1.0% while our focus on profitable customer interactions and effective cost management resulted in adjusted EBITDA growth of 2.9% and a strong Wireline adjusted EBITDA margin of 50.4%.

Our Wireline Business division provides connectivity solutions to its customers by leveraging our Smart suite products which provides cost-effective enterprise grade managed IT and communications solutions that are increasingly valued by businesses of all sizes as the digital economy grows in scope and complexity. The COVID-19 pandemic, as well as continued uncertainty facing the energy sector in western Canada, impacted the Business division by causing the suspension, reduction or cancellation of a number of Business customer accounts and slowing revenue growth. In response to the changing needs of its customers during the pandemic, Shaw Business added a suite of collaboration tools and new Smart products, such as Microsoft 365, Smart Remote Office, SmartSecurity and SmartTarget. Despite the challenging environment, first quarter Business revenue increased 1.4% to $145 million over the prior year.

(1) Adjusted EBITDA, adjusted EBITDA margin and free cash flow are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See definitions and discussion under "Non-GAAP and additional financial measures" for information about these measures including how we calculate them.

(2) Funds flow from operations is before changes in non-cash balances related to operations as presented in the condensed interim Consolidated Statements of Cash Flows.

Key Performance Drivers

The Company measures the success of its strategies using a number of key performance drivers which are defined and described under "Key Performance Drivers – Statistical Measures" in the 2020 Annual MD&A and in this MD&A below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance indicators are not measurements in accordance with GAAP, should not be considered alternatives to revenue, net income or any other measure of performance under GAAP and may not be comparable to similar measures presented by other issuers.

Subscriber (or revenue generating unit (RGU)) highlights

The Company measures the count of its subscribers in its Consumer, Business, and Wireless divisions. For further details and discussion on subscriber counts for RGUs see "Key Performance Drivers – Statistical Measures – Subscriber Counts for RGUs" in the MD&A for the year ended August 31, 2020.

			Change Three months ended

Prepaid	**353,072**	339,339	**13,733**	(8,954)
Total Wireless	**1,922,543**	1,821,514	**101,029**	57,911
Total Subscribers	**7,078,805**	7,078,683	**122**	460

In Wireless, the Company gained 101,029 net postpaid and prepaid subscribers in the quarter, consisting of 87,296 postpaid additions and 13,733 prepaid additions. The 31% year-over-year increase in the postpaid subscriber additions reflects strong demand for Shaw Mobile from existing Shaw Internet customers.

Wireline RGUs decreased by 100,907 compared to a 57,451 RGU loss in the first quarter of fiscal 2020. The current quarter includes a Consumer Internet RGU decline of 15,068, which compares to net additions of 5,648 a year ago. The mature products within the Consumer division, including Video, Satellite and Phone, declined in the aggregate by 91,784 RGUs. Through continued broadband product and distribution enhancements and Shaw Mobile bundling initiatives, the Company is focused on profitable subscriber growth and reducing household churn.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn (“postpaid churn”) measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.81% in the first quarter of fiscal 2021 compares to 1.50% in the first quarter of fiscal 2020 due to continued aggressive price competition in the quarter, primarily impacting the Freedom Mobile brand.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is an industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company’s success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $42.66 in the first quarter of fiscal 2021 compares to $43.60 in the first quarter of fiscal 2020, representing a decrease of 2.2%. The decrease in ABPU year over year reflects the execution of the Company’s bundled growth strategy through the acquisition of lower revenue Shaw Mobile customers.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company’s success in attracting and retaining higher-value subscribers.

ARPU of $38.25 in the first quarter of fiscal 2021 compares to $38.76 in the first quarter of fiscal 2020, representing a decrease of 1.3%. The decrease in ARPU year over year reflects the execution of the Company’s bundled growth strategy through the acquisition of lower revenue Shaw Mobile customers.

Overview

For detailed discussion of divisional performance see "Discussion of operations." Highlights of the consolidated first quarter financial results are as follows:

Revenue

Revenue for the **first quarter** of fiscal 2021 of $1.37 billion decreased $13 million, or 0.9%, from $1.38 billion for the first quarter of fiscal 2020, highlighted by the following:

- The year-over-year decrease in consolidated revenue included a $13 million, or 1.4%, decrease in the Consumer division as the growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
- The Wireless division contributed $317 million and included a $1 million, or 0.3%, decline over the first quarter of fiscal 2020 reflecting a $19 million increase in service revenue more than fully offset by a decrease in equipment revenue of $20 million primarily due to the impact of Shaw Mobile with the vast majority of customers bringing their own devices in the current quarter.
- The Business division had growth of $2 million, or 1.4%, in comparison to the first quarter of fiscal 2020 reflecting Internet revenue growth and demand for the Smart suite of business products, partially offset by lower video revenue primarily related to the COVID-19 impacts, particularly in the hospitality sector.

Compared to the fourth quarter of fiscal 2020, consolidated revenue for the quarter increased 1.6%, or $21 million. The increase in revenue over the prior quarter primarily relates to a $19 million increase in equipment revenue in the Wireless division combined with a $4 million increase in service revenue in the Wireless division. Wireline revenue remained comparable quarter-over-quarter.

Adjusted EBITDA

Adjusted EBITDA for the **first quarter** of fiscal 2021 of $607 million increased by $19 million, or 3.2%, from $588 million for the first quarter of fiscal 2020, highlighted by the following:

- The year-over-year improvement in the Wireless division of $4 million, or 5.6%, is mainly due to service revenue growth partially offset by lower roaming revenue and investments in the Shaw Mobile launch, including the expansion of Shaw's retail footprint.
- The year-over-year increase in the Wireline division of $15 million, or 2.9%, was primarily due to proactive base management and decreased operating expenses, including lower employee related costs, travel expenses and advertising and sponsorship costs compared to the prior year.

Consistent with the variances noted above, adjusted EBITDA margin for the **first quarter** of 44.3% increased 180-basis points compared to 42.5% in the first quarter of fiscal 2020.

Compared to the **fourth quarter** of fiscal 2020, adjusted EBITDA for the current quarter increased $13 million, or 2.2%, primarily due to a $22 million increase in the Wireline division as a result of proactive base management and decreased operating expenses, including lower employee related costs, travel expenses and advertising and sponsorship costs compared to the prior year. This was partially offset by a $9 million decrease in the Wireless division as the $23 million increase in revenue was more than fully offset by the impact of lower margins due to higher equipment sales and investments in the Shaw Mobile launch, including the expansion of Shaw's retail footprint.

Free cash flow

Free cash flow for the **first quarter** of fiscal 2021 of $225 million increased $42 million from $183 million in the first quarter of fiscal 2020, mainly due to a $26 million decrease in capital expenditures, a $19 million increase in adjusted EBITDA and lower interest on debt partially offset by a $7 million increase in cash taxes.

Net income (loss)

Net income of $163 million for the three months ended November 30, 2020, compared to a net income of $162 million for the same period in fiscal 2020. The changes in net income are outlined in the following table:

	November 30, 2020 net income compared to:	
	Three months ended	
(millions of Canadian dollars)	August 31, 2020	November 30, 2019
Increased adjusted EBITDA[(1)]	13	19
Increased restructuring costs[(3)]	(12)	(12)
Decreased (increased) amortization	7	(2)
Change in net other costs and revenue[(2)]	1	6
Increased income taxes	(21)	(10)
	(12)	1

(1) Adjusted EBITDA is a non-GAAP financial measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under GAAP and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for information about this measure, including how we calculate it.

(2) Net other costs and revenue include accretion of long-term liabilities and provisions, interest, debt retirement costs, realized and unrealized foreign exchange differences and other losses as detailed in the unaudited Consolidated Statements of Income.

(3) During the first quarter of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million, primarily related to severance and employee related costs.

Outlook

The Company confirms that it remains on track to meet its fiscal 2021 guidance of adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion and free cash flow of approximately $800 million.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. During the first quarter of fiscal 2021, the Company experienced a continued reduction in Wireline subscriber activity, an increase in wireline network usage as well as extended peak hours, reduced Wireless equipment sales, increased demand for Wireless voice services, a decrease in Wireless roaming and overage revenue, and an increase in the suspension, cancellation, or reduction of Business customer accounts, impacting Business revenue.

While the financial impacts from COVID-19 in the first quarter of fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability to pay their bills, all due to the challenging economic situation. Shaw Business primarily serves the small and medium sized market, who are also particularly vulnerable to the economic impacts of challenges in the energy sector and COVID-19, including mandated closures, capacity restrictions, self-quarantines or further social distancing restrictions.

The Company believes its business and facilities-based networks provide critical and essential services to Canadians which remained resilient throughout fiscal 2020 and will continue to be resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence and/or subsequent waves of the pandemic or the potential efficacy and time frame for the availability of any COVID-19 vaccines, compounded by the continued uncertainty in the energy sector, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

See “Caution concerning forward-looking statements.”

Non-GAAP and additional financial measures

The Company’s continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures or ratios. These financial measures do not have standard definitions prescribed by GAAP and therefore may not be comparable to similar measures disclosed by other companies. The Company’s continuous disclosure documents may also provide discussion and analysis of additional financial measures. Additional financial measures include line items, headings and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company’s operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-

GAAP financial measures, ratios, and additional financial measures have not been presented as an alternative to revenue, net income or any other measure of performance required by GAAP.

Below is a discussion of the non-GAAP financial measures, ratios, and additional financial measures used by the Company and provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, equity income/loss of an associate or joint venture, amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business. Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended November 30,	
(millions of Canadian dollars)	**2020**	2019
Net income	**163**	162
Add back (deduct):		
Restructuring costs	**12**	-
Amortization:		
Deferred equipment revenue	**(3)**	(4)
Deferred equipment costs	**13**	18
Property, plant and equipment, intangibles and other	**295**	289
Amortization of financing costs – long-term debt	**1**	1
Interest expense	**66**	71
Other losses	**2**	3
Current income tax expense	**36**	36
Deferred income tax expense	**22**	12
Adjusted EBITDA	**607**	**588**

Adjusted EBITDA margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Three months ended November 30,		
	2020	2019	Change %
Wireline	**50.4%**	48.5%	3.9
Wireless	**23.7%**	22.3%	6.3
Combined Wireline and Wireless	**44.3%**	42.5%	4.2

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage. Refer to "Liquidity and capital resources" for further detail.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio. Refer to "Liquidity and capital resources" for further detail.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

(millions of Canadian dollars)	Three months ended November 30, 2020	2019	Change %
Revenue			
Consumer	**911**	924	(1.4)
Business	**145**	143	1.4

Preferred share dividends	**(2)**	(2)	–
Free cash flow[1]	**225**	183	23.0

(1) Adjusted EBITDA and free cash flow are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See “Non-GAAP and additional financial measures” for information about these measures, including how we calculate them.

(2) Per Note 3 to the unaudited interim Consolidated Financial Statements.

Discussion of operations

Wireline

(millions of Canadian dollars)	Three months ended November 30, 2020	2019	Change %
Consumer	**911**	924	(1.4)
Business	**145**	143	1.4
Wireline revenue	**1,056**	1,067	(1.0)
Adjusted EBITDA[(1)]	**532**	517	2.9
Adjusted EBITDA margin[(1)]	**50.4%**	48.5%	3.9

(1) Adjusted EBITDA and adjusted EBITDA margin are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for information about these measures, including how we calculate them.

Revenue highlights include:

- Consumer revenue for the **first quarter** of fiscal 2021 decreased by $13 million, or 1.4%, compared to the first quarter of fiscal 2020 as the growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
  - As **compared to the fourth quarter** of fiscal 2020, the current quarter revenue decreased by $6 million, or 0.7%.
- Business revenue of $145 million for the **first quarter** of fiscal 2021 increased $2 million, or 1.4%, compared to the first quarter of fiscal 2020, reflecting Internet revenue growth and demand for the Smart suite of business products, partially offset by lower video revenue primarily related to the COVID-19 impacts, particularly in the hospitality sector.
  - As **compared to the fourth quarter** of fiscal 2020, the current quarter revenue increased $5 million, or 3.6%.

Adjusted EBITDA highlights include:

- Adjusted EBITDA for the **first quarter** of fiscal 2021 of $532 million increased 2.9%, or $15 million from $517 million in the first quarter of fiscal 2020. The increase was primarily due to proactive base management and decreased operating expenses, including lower employee related costs, travel expenses and advertising and sponsorship costs compared to the prior year.
  - As **compared to the fourth quarter** of fiscal 2020, Wireline adjusted EBITDA for the current quarter increased by $22 million, or 4.3%.

Wireless

(millions of Canadian dollars)	Three months ended November 30, 2020	2019	Change %
Service	**215**	196	9.7
Equipment and other	**102**	122	(16.4)
Wireless revenue	**317**	318	(0.3)
Adjusted EBITDA[(1)]	**75**	71	5.6
Adjusted EBITDA margin[(1)]	**23.7%**	22.3%	6.3

(1) Adjusted EBITDA and adjusted EBITDA margin are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for information about these measures, including how we calculate them.

Revenue highlights include:

- Revenue of $317 million for the **first quarter** of fiscal 2021 decreased $1 million or 0.3% over the first quarter of fiscal 2020. An increase in service revenues of $19 million, or 9.7%, mainly due to an increased subscriber base, including significant Shaw Mobile additions in the quarter, was more than fully offset by a decrease in equipment revenue of $20 million, or 16.4% as Shaw Mobile benefited from the vast majority of customers bringing their own device. The 2.2% and 1.3% year-over-year decrease in ABPU to $42.66 and ARPU to $38.25, respectively, reflects the impact as the Company executes on its bundled growth strategy through the acquisition of lower revenue Shaw Mobile customers.
  - As **compared to the fourth quarter** of fiscal 2020, the current quarter revenue increased $23 million or 7.8% due to increased equipment sales of $19 million combined with $4 million in higher service revenues, while ABPU of $42.66 decreased by $2.15 or 4.8% (ABPU of $44.81 in the fourth quarter of fiscal 2020), and ARPU of $38.25 decreased by $1.40 or 3.5% (ARPU of $39.65 in the fourth quarter of fiscal 2020).

Adjusted EBITDA highlights include:

- Adjusted EBITDA of $75 million for the **first quarter** of fiscal 2021 improved by $4 million, or 5.6% over the first quarter of fiscal 2020. The increase is primarily due to service revenue growth partially offset by lower roaming revenue and investments in the Shaw Mobile launch, including the expansion of Shaw's retail footprint.
  - As **compared to the fourth quarter** of fiscal 2020, adjusted EBITDA for the current quarter decreased $9 million or 10.7%, mainly due to a decrease in margins due to higher equipment sales and additional costs associated with higher subscriber activity and the expansion of the Shaw retail footprint partially offset by a slight increase in service revenues.

Capital expenditures and equipment costs

	Three months ended November 30,		
(millions of Canadian dollars)	**2020**	2019	Change %
Wireline			
New housing development	**23**	35	(34.3)
Success-based	**44**	62	(29.0)
Upgrades and enhancements	**81**	80	1.3
Replacement	**7**	8	(12.5)
Building and other	**6**	20	(70.0)
Total as per Note 3 to the unaudited interim consolidated financial statements	**161**	205	(21.5)
Wireless			
Total as per Note 3 to the unaudited interim consolidated financial statements	**73**	55	32.7
Consolidated total as per Note 3 to the unaudited interim consolidated financial statements	**234**	260	(10.0)

In the **first quarter** of fiscal 2021, capital investment of $234 million decreased $26 million from the comparable period in fiscal 2020. Total Wireline capital spending of $161 million decreased $44 million compared to the prior year period primarily due to lower success-based capital, capitalized labour, and new housing development. Wireless spending increased by approximately $18 million year-over-year primarily due to continued network expansion, spectrum deployment and higher IT related spending to support Shaw Mobile launch and digital initiatives.

Wireline highlights include:

- For the quarter, investment in combined upgrades, enhancements and replacement categories was $88 million which is on par with the prior year.
- Investments in new housing development were $23 million, a $12 million, or 34.3%, decrease over the prior year, driven by lower residential and commercial customer network growth and acquisition in the current year.
- Success-based capital for the quarter of $44 million was $18 million lower than the first quarter of fiscal 2020 primarily due to lower equipment purchases in the period and decreased labour costs related to the increase in customer self-installation.
- Investments in buildings and other in the amount of $6 million was $14 million lower year-over year primarily related to the impact of proceeds on disposal of non-core corporate assets received in the current period.

Wireless highlights include:

- Capital investment of $73 million in the first quarter increased relative to the first quarter of fiscal 2020 by $18 million, primarily due to continued network expansion, spectrum deployment and higher IT related spending to support Shaw Mobile launch and digital initiatives. In fiscal 2021, the Company continues to focus on investment in the Wireless network and infrastructure, specifically the continued deployment of 700 MHz spectrum, 600 MHz spectrum, LTE and small cells and increased investment in 5G as well as enhancements to the back-office systems, new retail locations and other corporate initiatives.

Other income and expense items

Restructuring costs

Restructuring costs generally include severance, employee related costs and other costs directly associated with a restructuring program. During the first quarter of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million, primarily related to severance and employee related costs.

Amortization

	Three months ended November 30,		
(millions of Canadian dollars)	**2020**	2019	Change %
Amortization revenue (expense)			
Deferred equipment revenue	**3**	4	(25.0)
Deferred equipment costs	**(13)**	(18)	(27.8)
Property, plant and equipment, intangibles and other	**(295)**	(289)	2.1

Amortization of property, plant and equipment, intangibles and other increased 2.1% for the three months ended November 30, 2020 when compared to the same period in fiscal 2020. The increase in amortization reflects the amortization of new expenditures exceeding the amortization of assets that became fully amortized during the period.

Amortization of financing costs and interest expense

	Three months ended November 30,		
(millions of Canadian dollars)	**2020**	2019	Change %
Amortization of financing costs – long-term debt	**1**	1	-
Interest expense	**66**	71	(7.0)

Interest expense for the three months ended November 30, 2020 decreased 7.0% over the comparable period which primarily reflects the lower average outstanding debt balances in the period and the decrease in the weighted average interest rate.

Other gains/losses

This category generally includes realized and unrealized foreign exchange gains and losses on U.S. dollar denominated current assets and liabilities, gains and losses on disposal of property, plant and equipment and minor investments, and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

Income taxes

Income taxes are higher in the quarter compared to the first quarter of fiscal 2020 due mainly to the increase in net income and the recognition of previously unrecognized tax losses in fiscal 2020.

(1) Adjusted EBITDA and free cash flow are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for information about these measures, including how we calculate them.

(2) Net income attributable to both equity shareholders and non-controlling interests.

(3) Fiscal 2021 and 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as "Results of Operations" and "Segmented Operations Review" in the Annual Report for the year ended August 31, 2020.

F21 Q1 vs F20 Q4	In the first quarter of fiscal 2021, net income decreased $12 million compared to the fourth quarter of fiscal 2020 mainly due to a $12 million increase in restructuring costs in the first quarter and a $27 million increase in deferred taxes partially offset by a $13 million increase in adjusted EBITDA and a $6 million decrease in current taxes, all in the first quarter.
F20 Q4 vs F20 Q3	In the fourth quarter of fiscal 2020, net income decreased $9 million compared to the third quarter of fiscal 2020 mainly due to an $15 million decrease in adjusted EBITDA and a $23 million increase in current taxes in the fourth quarter as well an $8 million decrease in other gains (losses) as a result of an insurance claim recovery in the third quarter partially offset by a $35 million decrease in deferred taxes and a $14 million decrease in restructuring costs in the fourth quarter.
F20 Q3 vs F20 Q2	In the third quarter of fiscal 2020, net income increased $17 million compared to the second quarter of fiscal 2020 mainly due to a $26 million increase in other gains (losses), which includes the impact of the $17 million payment related to the early redemption of $800 million in senior notes in the second quarter, a $6 million insurance claim recovery, a $9 million increase in adjusted EBITDA in the third quarter and a $4 million decrease in current taxes, partially offset by an $8 million increase in deferred taxes, also in the third quarter.

F20 Q2 vs F20 Q1	In the second quarter of fiscal 2020, net income increased $5 million compared to the first quarter of fiscal 2020 mainly due to a $13 million decrease in current taxes, a $12 million increase in adjusted EBITDA and a $3 million decrease in interest expense, all in the second quarter, partially offset by a $17 million payment related to the early redemption of $800 million in senior notes and a $10 million increase in deferred taxes, also in the second quarter.
F20 Q1 vs F19 Q4	In the first quarter of fiscal 2020, net income decreased $3 million compared to the fourth quarter of fiscal 2019 mainly due to a $23 million decrease in deferred taxes in the first quarter. This was partially offset by a $7 million increase in current taxes in the first quarter as well as the net impact of the adoption of IFRS 16 which resulted in a decrease to operating, general and administrative costs that was more than offset by increases to amortization of property, plant and equipment, intangibles and other and interest expense.
F19 Q4 vs F19 Q3	In the fourth quarter of fiscal 2019, net income decreased $63 million compared to the third quarter of fiscal 2019 mainly due to a $21 million increase in current taxes in the fourth quarter, a $41 million gain on the disposal of property, plant and equipment to a related party, a $15 million gain on the sale of a portfolio investment and the $102 million impact of a tax rate change on deferred taxes, partially offset by a $109 million loss on the disposal of the Company's entire equity investment in Corus, all recorded in the third quarter.
F19 Q3 vs F19 Q2	In the third quarter of fiscal 2019, net income increased $74 million compared to the second quarter of fiscal 2019 mainly due to a $41 million gain on the disposal of property, plant and equipment to a related party, a $15 million gain on the sale of a portfolio investment and the $102 million impact of a tax rate change on deferred taxes, partially offset by a $109 million loss on the disposal of the Company's entire equity investment in Corus, all recorded in the third quarter.

Financial position

Total assets were $16.0 billion at November 30, 2020, compared to $16.2 billion at August 31, 2020. The following is a discussion of significant changes in the Consolidated Statements of Financial Position since August 31, 2020.

Current assets decreased $156 million primarily due to decreases in cash of $192 million, which was partially offset by increases in accounts receivables of $9 million, inventories of $5 million, other current assets of $14 million and current portion of contract assets of $6 million. Cash decreased primarily due to the payment of $154 million in dividends, $75 million for share repurchases as described below, as well as cash outlays for investing activities partially offset by funds flow from operations. Refer to "Liquidity and capital resources" for more information.

The current portion of contract assets increased over the period mainly due to an increase in Wireless subscribers participating in the Company's discretionary wireless handset discount program. Under IFRS 15, the portion of this discount relating to the handset is applied against equipment revenue at the point in time that the handset is transferred to the customer while the portion relating to service revenue is recorded as a contract asset and amortized over the life of the contract against future service revenues.

Property, plant and equipment decreased $11 million as the amortization of capital and right-of-use assets exceeded the capital investments and additions to right-of-use assets in the period.

Current liabilities decreased $157 million during the period primarily due to a decrease in accounts payable of $107 million and income taxes payable of $57 million, partially offset by an increase in current provisions of $12 million.

Accounts payable and accrued liabilities decreased due to the timing of payment and fluctuations in various payables including capital expenditures, interest and programming costs. The increase in current provisions was mainly due to the impact of restructuring activities in the period.

Lease liabilities increased $41 million mainly due to $72 million in new lease liabilities partially offset by principal repayments of $31 million in the period.

Shareholders' equity decreased $68 million mainly due to a decrease in retained earnings. Retained earnings decreased as the current period income of $163 million was more than fully offset by dividends of $151 million and the impact of shares repurchased under the NCIB program of $46 million. Share capital decreased $29 million due to the impact of 3,269,444 shares that were repurchased under the terms of the Company's NCIB program which was partially offset by the issuance of 153,999 Class B Non-Voting Shares under the Company's stock option plan. Accumulated other comprehensive loss increased $5 million due to the re-measurement recorded on employee benefit plans.

As at December 31, 2020, there were 484,386,878 Class B Non-Voting Shares, 10,012,393 Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A, 1,987,607 Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B and 22,372,064 Class A Participating Shares ("Class A Shares") issued and outstanding. As at December 31, 2020, 8,338,370 Class B Non-Voting Shares were issuable on exercise of outstanding options. Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Trading Symbols: TSX – SJR.B, SJR.PR.A, SJR.PR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

Liquidity and capital resources

In the three-month period ended November 30, 2020, the Company generated $225 million of free cash flow. Shaw used its free cash flow along with cash of $192 million and proceeds from the issuance of Class B Non-Voting Shares of $1 million to fund the net working capital change of $181 million, pay common share dividends of $151 million, repurchase $76 million in shares under the Company's NCIB program and pay $2 million in restructuring costs.

Debt structure and financial policy

The Company has an accounts receivable securitization program with a Canadian financial institution which allows it to sell certain trade receivables into the program. As at November 30, 2020, the proceeds of the sales were committed up to a maximum of $200 million (with $200 million drawn under the program as at November 30, 2020). The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables remain recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivable has no claim on any of our other assets.

As at November 30, 2020, the net debt leverage ratio for the Company was 2.3x. Considering the prevailing competitive, operational and capital market conditions, the Board of Directors has determined that having this ratio in the range of 2.5x to 3.0x would be appropriate for the Company in the current environment. Should the ratio fall below this, other than on a temporary basis, the Board may choose to recapitalize back into this range. The Board may also determine to increase the Company's debt above these levels to finance specific strategic opportunities such as a significant acquisition or repurchase of Class B Non-Voting Shares.

The Company calculates net debt leverage ratio as follows[(1)]:

(millions of Canadian dollars)	**November 30, 2020**	August 31, 2020
Short-term borrowings	**200**	200
Current portion of long-term debt	**1**	1
Current portion of lease liabilities	**109**	113
Long-term debt	**4,548**	4,547
Lease liabilities	**1,202**	1,157
50% of outstanding preferred shares	**147**	147
Cash and cash equivalents	**(571)**	(763)
(A) Net debt[(2)]	**5,636**	5,402
(B) Adjusted EBITDA[(2)]	**2,410**	2,391
(A/B) Net debt leverage ratio [(3)]	**2.3x**	2.3x

(1) The following contains a description of the Company's use of non-GAAP financial measures in the calculation of net debt leverage ratio, which is a non-GAAP ratio, provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

(2) Net debt and adjusted EBITDA are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under GAAP and do not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for information about these measures.

(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for further information about this ratio.

On November 2, 2020, the Company announced that it had received approval from the TSX to establish an NCIB program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Non-Voting Shares representing approximately 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 22, 2020.

During the three months ended November 30, 2020, the Company purchased 3,269,444 Class B Non-Voting Shares for cancellation for a total cost of approximately $76 million under the NCIB program.

From December 1, 2020 to December 31, 2020, the Company purchased an additional 3,273,356 Class B Non-Voting Shares for cancellation for a total cost of approximately $75 million under the NCIB program.

Shaw's credit facilities are subject to customary covenants which include maintaining minimum or maximum financial ratios.

	Covenant as at November 30, 2020	**Covenant Limit**
Shaw Credit Facilities		
Total Debt to Operating Cash Flow[(1)] Ratio	1.86:1	< 5.00:1
Operating Cash Flow[(1)] to Fixed Charges[(2)] Ratio	10.25:1	> 2.00:1

(1) Operating Cash Flow, for the purposes of the covenants, is calculated as net earnings before interest expense, depreciation, amortization, restructuring, and current and deferred income taxes, excluding profit or loss from investments accounted for on an equity basis, less payments made with regards to lease liabilities for the most recently completed fiscal quarter multiplied by four, plus cash dividends and other cash distributions received in the most recently completed four fiscal quarters from investments accounted for on an equity basis.

(2) Fixed Charges are defined as the aggregate interest expense, excluding the interest related to lease liabilities, for the most recently completed fiscal quarter multiplied by four.

As at November 30, 2020, Shaw is in compliance with these covenants and based on current business plans, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants over the life of the borrowings which currently mature in December of 2024.

Based on the aforementioned financing activities, available credit facilities and forecasted free cash flow, the Company expects to have sufficient liquidity to fund operations, obligations and working capital requirements, including maturing debt, during the upcoming fiscal year. On a longer-term basis, Shaw expects to generate free cash flow and have borrowing capacity sufficient to finance foreseeable future business plans and refinance maturing debt.

As at November 30, 2020, the Company had $571 million of cash on hand and its $1.5 billion bank credit facility was fully undrawn.

Cash Flow

Operating Activities

	Three months ended November 30,		
(millions of Canadian dollars)	**2020**	2019	Change %
Funds flow from operations	**488**	450	8.4
Net change in non-cash balances related to operations	**(188)**	(111)	(69.4)
	300	339	(11.5)

For the three months ended November 30, 2020, funds flow from operating activities decreased over the comparable period in fiscal 2020 primarily due to a larger decrease in the net change in non-cash balances related to operations which was partially offset by an increase in the funds flow from operations. The net change in non-cash balances related to operations fluctuated over the comparative period due to changes in accounts receivable, inventory and other current asset balances, and the timing of payment of current income taxes payable and accounts payable and accrued liabilities.

Investing Activities

	Three months ended November 30,		
(millions of Canadian dollars)	**2020**	2019	Increase
Cash used in investing activities	**(232)**	(310)	(78)

For the three months ended November 30, 2020, the cash used in investing activities decreased over the comparable period in fiscal 2020 due primarily to a decrease in additions to property, plant and equipment of $74 million and proceeds on disposal of property, plant and equipment of $14 million received in the current period partially offset by an increase in additions to intangible assets of $14 million.

Financing Activities

The changes in financing activities during the comparative periods were as follows:

	Three months ended November 30,	
(millions of Canadian dollars)	**2020**	2019
Increase in short-term borrowings [note 6]	**-**	80
Repayment of long-term debt	**-**	(1,250)
Debt arrangement costs	**-**	(1)
Payment of lease liabilities [note 5]	**(31)**	(30)
Issue of Class B Non-Voting Shares [note 12]	**-**	3
Purchase of Class B Non-Voting Shares	**(75)**	(25)
Dividends paid on Class A Shares and Class B Non-Voting Shares	**(152)**	(116)
Dividends paid on Preferred Shares	**(2)**	(2)
Payment of distributions to non-controlling interests	**-**	(2)
	(260)	(1,343)

Contractual Obligations

There has been no material change in the Company's contractual obligations, including commitments for capital expenditures, between August 31, 2020 and November 30, 2020.

Accounting standards

The MD&A included in the Company's August 31, 2020 Annual Report outlined critical accounting policies, including key estimates and assumptions that management has made under these policies, and how they affect the amounts reported in the 2020 Annual Consolidated Financial Statements. The MD&A also describes significant accounting policies where alternatives exist. See "Critical Accounting Policies and Estimates" in the Company's MD&A for the year ended August 31, 2020. The condensed interim Consolidated Financial Statements follow the same accounting policies and methods of application as the 2020 Annual Consolidated Financial Statements.

Related party transactions

The Company's transactions with related parties are discussed in its MD&A for the year ended August 31, 2020 under "Related Party Transactions" and under Note 29 of the Consolidated Financial Statements of the Company for the year ended August 31, 2020.

There has been no material change in the Company's transactions with related parties between August 31, 2020 and November 30, 2020.

Financial instruments

There has been no material change in the Company's risk management practices with respect to financial instruments between August 31, 2020 and November 30, 2020. See "Known Events, Trends, Risks and Uncertainties – Interest Rates, Foreign Exchange Rates and Capital Markets" in the Company's MD&A for the year ended August 31, 2020 and the section entitled "Financial Instruments" under Note 30 of the Consolidated Financial Statements of the Company for the year ended August 31, 2020.

Internal controls and procedures

Details relating to disclosure controls and procedures, and internal control over financial reporting (ICFR), are discussed in the Company's MD&A for the year ended August 31, 2020 under "Certification." As at November 30, 2020, there have been no changes in the Company's ICFR that have materially affected, or are reasonably likely to materially affect, the Company's ICFR in fiscal 2021.

Risks and uncertainties

The significant risks and uncertainties affecting the Company and its business are discussed in the Company's MD&A for the year ended August 31, 2020 under "Known Events, Trends, Risks and Uncertainties." There have been no material changes in the significant risks and uncertainties since that date.

Government regulations and regulatory developments

See our MD&A in the Annual Report for the year ended August 31, 2020 for a discussion of the significant regulations that affected our operations as of October 30, 2020. The following is a list of the significant regulatory developments since that date.

Broadcasting Act

Potential for new or increased fees

On November 3, 2020, the Minister of Heritage introduced a bill to amend the *Broadcasting Act* (Bill C-10). Bill C-10 does not introduce material new obligations applicable to or fees payable by the Company's cable, Direct-to-Home (DTH), Satellite Relay Distribution services or digital media services. However, the Bill remains subject to amendment, pursuant to the parliamentary process, prior to its passage. In addition, the Canadian Radiotelevision and Telecommunications Commission's ("CRTC" or "Commission") will, subsequent to any royal assent to Bill C-10, engage in one or more proceedings to align Canadian broadcasting regulation with the amended *Broadcasting Act.* Furthermore, the Minister of Heritage has indicated that the Commission's subsequent regulatory processes will be subject to a Direction by the Governor-in-Council that sets out Government's expectations with respect to how the newly-incorporated amendments to the *Broadcasting Act* should be reflected in regulation, which Direction may also specify the requirement that new regulations be brought into force in a relatively short timeframe. The implementation of new regulatory measures in connection with Bill C-10 could result in new fees payable by or new costs applicable to the Company's cable, DTH or digital media services and new competition with the Company's cable and DTH services, and could impact the business practices of the Company, including through new distribution and promotion requirements, any or all of which could impact the Company's financial results in connection with broadcasting.

Telecommunications Act

Telecom Order CRTC 2019-288

On August 15, 2019, the CRTC issued Telecom Order 2019-288 (the "Order"), which set Shaw's final wholesale high-speed access (HSA) service rates. The final rates are significantly lower than the interim rates set in October 2016, and retroactive to January 31, 2017. For a detailed summary regarding all proceedings and decisions issued between August 15, 2019 and October 30, 2020 related to the Company's multiple routes of appeal of the Order, see "Government Relations and Regulatory Developments – Third Party Internet Access" of the Company's Annual Report for the year ended August 31, 2020.

On November 12, 2020, the Company, together with Cogeco, Eastlink, Rogers and Videotron (collectively, the "Cable Carriers"), filed an application with the Supreme Court of Canada (SCC), seeking leave to appeal the Federal Court of Appeal's decision dated September 10, 2020 denying the Company's appeal of the Order.

If any of the various routes of appeal do not ultimately result in a sufficient increase in the rates set by the Order, this could significantly reduce the amount that the Company can charge for aggregated HSA services and negatively impact the Company's broadband Wireline revenues and investments, as well as its ability to compete with Resellers and other facilities-based HSA providers.

Copyright Act

In June 2020, the Federal Court of Appeal overturned the Copyright Board's interpretation of the scope and meaning of the "making available" provision (section 2.4(1.1) of the *Copyright Act*). The Copyright Board determined that section 2.4(1.1) expands the scope of the performance right and the Society of Composers, Authors and Music Publishers of Canada's (SOCAN) entitlement to royalties. On November 12, 2020, SOCAN filed an application for leave to appeal to the SCC. If leave is sought and granted and the SCC restores the Copyright Board's interpretation, it could lead to new claims by rights holders in connection with Company technologies that facilitate downloading.

Personal Information Protection and Electronic Documents Act (PIPEDA)

On November 17, 2020, the Minister of Innovation, Science and Industry introduced Bill C-11 – *the Digital Charter Implementation Act* ("DCIA"), which, when passed and brought into force, will repeal and replace PIPEDA. Bill C-11 which is comprised of two parts: (1) the *Consumer Privacy Protection Act* (the "CCPA"), which establishes protections and parameters for the collection, use and disclosure of personal information (PI), including enhanced rights for individuals with respect to their privacy and data; enhanced accountabilities for organizations with respect to consent gathering and data usage; and significant penalties (up to 5% of an organization's gross revenue the previous year) for breaches of rights and responsibilities; and (2) the *Personal Information and Data Protection Tribunal Act* (the "PIDPTA"), which creates a new administrative tribunal to oversee enforcement of the CCPA.

Changes to privacy laws and regulations resulting from the passage of Bill C-11 will require Shaw to incur costs to adjust its policies and practices related to privacy, as well as data collection and management. Such changes could: result in significant new costs payable by the Company to ensure compliance; limit the Company's ability to utilize data in support of its business, as well as preserve and expand its customer base; and expose the Company to the risk of significant penalties and claims (including pursuant to a proposed right of private action) in connection with any non-compliance. The Government will be consulting on Bill C-11, and the timing of its coming into force will be set at the time the legislation is passed.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three months ended November 30, 2020 were authorized for issue by the Audit Committee on January 12, 2021.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2020 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2020.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended November 30,	
	2020	2019
Revenue		
Wireline	**1,056**	1,067
Wireless	**317**	318
	1,373	1,385
Intersegment eliminations	**(3)**	(2)
	1,370	1,383
Adjusted EBITDA[(1)]		
Wireline	**532**	517
Wireless	**75**	71
	607	588
Restructuring costs	**(12)**	-
Amortization	**(305)**	(303)
Operating income	**290**	285
Current taxes		
Operating	**35**	32
Other/non-operating	**1**	4
	36	36

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

Long-term	80	-	-	80
Balance as at November 30, 2020	**80**	**23**	**90**	**193**

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $nil has been paid in fiscal 2021 relating to these initiatives. The remaining costs are expected to be paid out within the next 2 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $12 in the first quarter primarily related to severance and employee related costs, of which $2 has been paid as at November 30, 2020. The remaining costs are expected to be paid within the next 14 months.

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Non-Voting Participating Shares ("Class B Non-Voting Shares") representing approximately 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 22, 2020.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

During the three months ended November 30, 2020, the Company purchased 3,269,444 Class B Non-Voting Shares for cancellation for a total cost of approximately $76 under the NCIB program. The average book value of the shares repurchased was $8.78 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $46 and was charged to retained earnings.

From December 1, 2020 to December 31, 2020, the Company purchased an additional 3,273,356 Class B Non-Voting Shares for cancellation for a total cost of approximately $75 under the NCIB program.

10. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended November 30,	
	2020	2019
Numerator for basic and diluted earnings per share ($)		
Net income	**163**	162
Deduct: dividends on Preferred Shares	**(2)**	(2)
Net income attributable to common shareholders	**161**	160
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Non-Voting Shares for basic earnings per share	**513**	518
Effect of dilutive securities [(1)]	**-**	-
Weighted average number of Class A Shares and Class B Non-Voting Shares for diluted earnings per share	**513**	518
Basic earnings per share ($)		
Basic and diluted	**0.31**	0.31

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three months ended November 30, 2020, 6,736,626 (November 30, 2019 – 4,966,252) options were excluded from the diluted earnings per share calculation.

Total revenue	**1,370**	1,383

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at November 30, 2020.

	Within 1 year	**Within 2 years**	**Within 3 years**	**Within 4 years**	**Within 5 years**	**Thereafter**	**Total**
Wireline	1,501	596	151	87	26	-	2,361
Wireless	414	118	-	-	-	-	532
Total	**1,915**	**714**	**151**	**87**	**26**	**-**	**2,893**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

12. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended November 30,	
	2020	2019
Employee salaries and benefits(1)	**153**	157
Purchase of goods and services	**622**	638
	775	795

(1) For the three months ended November 30, 2020, employee salaries and benefits include $12 (2019 - $nil) in restructuring costs.

	Three months ended November 30,	
	2020	2019
Issuance of Class B Non-Voting Shares:		
Dividend reinvestment plan	**-**	37

15. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	November 30, 2020		August 31, 2020	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**4,549**	**5,561**	4,548	5,613

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

NEWS RELEASE

Shaw Announces Third Quarter and Year-to-Date Fiscal 2021 Results

- **Shaw delivers third quarter financial and subscriber performance in line with expectations and confirms the Company remains on track to achieve its current fiscal 2021 guidance**
- **Shaw shareholders overwhelmingly voted in favour of the proposed business combination with Rogers Communications at special meeting of shareholders held on May 20, 2021**
- **The Company redeemed all its issued and outstanding preferred shares on June 30, 2021 for an aggregate redemption price of $300 million**

Calgary, Alberta (June 30, 2021) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended May 31, 2021. Consolidated revenue increased by 4.8% to $1.38 billion, adjusted EBITDA[1] increased 5.4% year-over-year to $642 million and net income increased 92.4% to $354 million. Third quarter results include incremental Wireline Consumer revenue of approximately $20 million related to the release of a provision following the Canadian Radio-television and Telecommunications Commission (CRTC) decision on final aggregated Third Party Internet Access (TPIA) rates, substantially offset by approximately $25 million higher employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price and adjustments to employee benefit provisions. Excluding the aforementioned items, consolidated revenue and adjusted EBITDA increased approximately 3.3% and 6.2%, respectively.

"Following nearly two years of regulatory uncertainty impacting our industry, the recent decisions by the CRTC have restored confidence in the regulatory framework and provided the necessary certainty to make the generational facilities–based investments that are required and critical in support of the latest technologies, strong competition and choice for more Canadians. By Shaw and Rogers coming together, the combined entity will have the scale, assets and capabilities to confidently invest billions of dollars that will serve future generations, help to close the digital divide and deliver coast-to-coast 5G service throughout Canada," said Brad Shaw, Executive Chair & Chief Executive Officer.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers ("Rogers Shares") on the basis of the volume-weighted average trading price for the

[1] Adjusted EBITDA is a non-GAAP financial measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standardized meaning, and therefore may not be a reliable way to compare us to other companies. Additional information about this measure, including a quantitative reconciliation to the most directly comparable financial measure in the Company's Consolidated Financial Statements, is incorporated by reference to "Non-GAAP and additional financial measures" in the management's discussion and analysis (MD&A) dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. As at March 13, 2021, when the Arrangement Agreement was signed, the value of the consideration attributable to the Class A Shares and Class B Shares held by the Shaw Family Shareholders (calculated using the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021) was equivalent to $40.50 per share.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the CRTC in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

On May 28, 2021, the Company announced the redemption of all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares" and, together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) on June 30, 2021 (the "Redemption Date") at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These were the final dividends on the Preferred Shares, which were paid separately from the aggregate Redemption Price and in the usual manner. Following payment of the June 30, 2021 dividends, there were no accrued and unpaid dividends on the Preferred Shares.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Third Quarter Fiscal 2021

In the third quarter, the Company added approximately 51,000 new Wireless customers. Postpaid net additions of approximately 46,600 in the quarter were driven by the continued momentum of Shaw Mobile. Wireless service revenue growth of 9.2% is due to subscriber growth, partially offset by lower ARPU[2]. As the Company continues to scale its lower revenue Shaw Mobile customer base, third quarter Wireless ARPU decreased 5.1% from the prior year period to $36.94; however, an increase in customers signing up for our bundled offerings and Internet migration to faster speed tiers continues to accelerate which led to Internet revenue growth. Wireless postpaid churn[3] of 1.07% improved approximately 18-basis points from

[2] ARPU is a supplementary financial measure which may not be comparable to similar measures presented by other issuers. Additional information about this supplementary financial measure is incorporated by reference to "Key Performance Drivers" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

[3] Wireless postpaid churn is a metric used to measure the Company's success in retaining Wireless subscribers. Additional information about this metric is incorporated by reference to "Key Performance Drivers" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

the second quarter of fiscal 2021 and marginally increased from the record low churn of 0.96% in the third quarter of fiscal 2020.

In the quarter, Consumer RGU[4] losses of approximately 36,300 continued its improving trend, led by Internet RGU additions of approximately 1,300 as customers continue to bundle their Internet and Wireless service together. Third quarter Wireline revenue increased 1.6% year-over-year to $1.08 billion and adjusted EBITDA increased 3.7% to $527 million. Third quarter Wireline financial results include approximately $20 million of incremental revenue due to the release of a provision following the CRTC decision on final aggregated TPIA rates, substantially offset by approximately $25 million higher employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price and adjustments to employee benefit provisions. Excluding the aforementioned items, Wireline revenue decreased 0.3% and adjusted EBITDA increased 4.7%, resulting in adjusted EBITDA margin[5] of 50.2% compared to 47.8% in the prior year period.

(2) Free cash flow is a non-GAAP financial measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standardized meaning, and therefore may not be a reliable way to compare us to other companies. Additional information about this measure, including a quantitative reconciliation to the most directly comparable financial measure in the Company's Consolidated Financial Statements, is incorporated by reference to "Non-GAAP and additional financial measures" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

In the quarter, the Company added approximately 51,000 net Wireless RGUs, consisting of approximately 46,600 postpaid additions and 4,400 prepaid additions. Wireless service revenue for the three-month period increased 9.2% to $225 million over the comparable period in fiscal 2020 due to the increased subscriber base, including significant Shaw Mobile additions in the quarter. Third quarter ARPU decreased 5.1% year-over-year to $36.94. Wireless equipment revenue for the three-month period increased 58.7% to $73 million mainly due to increased device sales. Third quarter Wireless adjusted EBITDA of $115 million grew 13.9% year-over-year, primarily due to continued service revenue growth and improved equipment margins partially offset by higher IT, network and advertising costs relative to the prior year. Wireless adjusted EBITDA margin of 38.6% compared to 40.1% in the prior year primarily due to equipment sales being a higher proportion of wireless revenues in the current period.

Consumer RGUs declined by approximately 36,300 in the quarter compared to a loss of approximately 47,500 in the third quarter of fiscal 2020. The current quarter includes an improvement in Internet RGUs with a gain of approximately 1,300 compared to a loss of 5,100 in the same period last year. The mature

[4] RGUs is a metric used to measure the count of subscribers in the Company's Wireline and Wireless segments. Additional information about this metric is incorporated by reference to "Key Performance Drivers" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

[5] Adjusted EBITDA margin is a non-GAAP ratio. Adjusted EBITDA margin is not a standardized measure under IFRS and may not be a reliable way to compare us to other companies. Additional information about this measure is incorporated by reference to "Non-GAAP and additional financial measures" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

products within the Consumer division, including Video, Satellite and Phone declined in the aggregate by 37,600 RGUs. During the quarter, the Company introduced Shaw Gig WiFi, leveraging the best in-home technology to give customers the faster speeds, lower latency and more consistent WiFi signal they need to connect all their devices. Through continued broadband product enhancements and Shaw Mobile bundling initiatives, the Company is focused on profitable subscriber growth and reducing household churn.

Third quarter Wireline revenue of $1.08 billion increased 1.6% and adjusted EBITDA of $527 million increased 3.7% year-over-year. Consumer revenue of $935 million increased 1.3% compared to the prior year period due to the incremental $20 million in revenue related to the final aggregated TPIA rates that date back to August 2019. Excluding the TPIA adjustment, Consumer revenue decreased 0.9% as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue increased 3.6% to $145 million with Internet revenue growth and continued demand for the Smart suite of products, partially offset by lower Video revenue primarily related to the impacts of COVID-19 on the hospitality sector. Third quarter Wireline adjusted EBITDA increased 3.7% year-over-year due to higher Wireline revenue, including the TPIA adjustment, proactive base management, and lower bad debt expense, partially offset by increased employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price and adjustments to employee benefit provisions, as well as increased advertising and customer care expenses in the quarter. Excluding the $20 million TPIA adjustment and the higher employee related costs of approximately $25 million, Wireline adjusted EBITDA increased 4.7% compared to the prior year period.

Capital expenditures in the third quarter of $233 million were $35 million, or 13.1%, lower than the prior year period. Wireline capital spending decreased $32 million compared to the third quarter of fiscal 2020 primarily due to a decrease in success-based capital while Wireless spending was relatively flat compared to the prior year period.

Free cash flow for the quarter of $307 million compared to $221 million in the prior year period. The increase was primarily due to higher adjusted EBITDA, lower capital spending, and a $35 million reduction of tax related interest expense.

Net income for the third quarter of fiscal 2021 of $354 million compared to $184 million in the third quarter of fiscal 2020. The increase of $170 million was due mainly to an increase in adjusted EBITDA of $33 million and a revision to liabilities for uncertain tax positions that became statute barred in the period, which reduced income tax expense by $125 million and interest expense by $35 million. These increases in net income were offset by $18 million of non-operating costs related to the Transaction.

Fiscal 2021 Guidance

The Company confirms that it remains on track to meet its fiscal 2021 guidance of adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion. In light of the Company's performance to date, the Company now expects free cash flow will exceed $800 million in fiscal 2021.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. During the third quarter of fiscal 2021, the Company continued to experience a reduction in overall Wireline subscriber activity, an increase in wireline network usage as well as extended peak hours, increased demand for Wireless voice services, a decrease in Wireless roaming revenue, customer payments substantially in-line with historical trends, and an increase in credits provided for, as well as the reduction or cancellation of Shaw Business customer accounts.

While the financial impacts from COVID-19 in the third quarter of fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence, emergence of variants, and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability of certain customers to pay their bills. Shaw Business primarily serves the small and medium sized market, which is also particularly vulnerable to COVID-19 related restrictions, including mandated closures, capacity restrictions, self-quarantines or further social distancing requirements.

The Company believes its business and facilities-based networks provide critical and essential services to Canadians which remained resilient throughout the pandemic and will continue to be resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence, emergence of variants, and/or subsequent waves of the pandemic or the potential efficacy and continued availability and distribution of any COVID-19 vaccines, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

The Transaction could cause the attention of management of the Company to be diverted from the day-to-day operations of the Company. These disruptions could be exacerbated by a delay in the completion of the Transaction and could have an adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. Because the completion of the Transaction is subject to significant uncertainty, officers and employees of the Company may experience uncertainty about their future roles with the Company, which may adversely affect the Company's ability to attract or retain key management and personnel in the period until the completion or termination of the Arrangement Agreement.

In addition, third parties with which the Company currently has business relationships or may have business relationships in the future, including industry partners, regulators, customers and suppliers, may experience uncertainty associated with the Transaction, including with respect to current or future relationships with the Company or Rogers. Such uncertainty could have a material and adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company.

As at the end of May 31, 2021, the Company's net debt leverage ratio[6] of 2.4x was below its target leverage range of 2.5x to 3.0x. In the third quarter, Shaw repurchased 1,559,202 Class B Shares for approximately $36 million. For the nine months ended May 31, 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 million. In connection with the announcement of the proposed Transaction on March 15, 2021, the Company suspended share buybacks under its normal course issuer bid (NCIB) program.

Mr. Shaw concluded, "Our third quarter and year-to-date results reflect our balanced approach to profitable subscriber growth, improved customer experience, and solid execution throughout the organization. While we continue to navigate the COVID-19 pandemic, I am optimistic that returning to our normal routine is imminent and that connectivity will remain just as important to Canadians. As significant network investments we have made in the past enabled us to provide critical connectivity during their time of need through COVID, our combination with Rogers will serve future generations with a robust 5G service and by reaching deeper into rural, remote and Indigenous communities. With a successful shareholder vote completed and court approval obtained, we turn our focus to working closely with Rogers to obtain the required regulatory approvals to close the Transaction."

---

[6] Net debt leverage ratio is a non-GAAP ratio and net debt, which is a component of net debt leverage ratio, is a non-GAAP financial measure. Net debt leverage ratio and net debt are not standardized measures under IFRS and may not be a reliable way to compare us to other companies. Additional information about these measures is incorporated by reference to "Non-GAAP and additional financial measures" in the MD&A dated June 30, 2021 for the three-month period ending May 31, 2021, available on SEDAR at www.sedar.com.

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone and video services. The Wireless division provides wireless voice and LTE data services.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

Shaw Communications Inc.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three and nine months ended May 31, 2021

June 30, 2021

Contents

Advisories

The following Management's Discussion and Analysis (MD&A) of Shaw Communications Inc. is dated June 30, 2021 and should be read in conjunction with the condensed interim Consolidated Financial Statements and Notes thereto for the three and nine-month periods ended May 31, 2021 and the 2020 Annual Consolidated Financial Statements, the Notes thereto and related MD&A included in the Company's 2020 Annual Report. The financial information presented herein has been prepared on the basis of International Financial Reporting Standards (IFRS) for interim financial statements and is expressed in Canadian dollars unless otherwise indicated. References to "Shaw," the "Company," "we," "us" or "our" mean Shaw Communications Inc. and its subsidiaries and consolidated entities, unless the context otherwise requires.

Caution concerning forward-looking statements

Statements included in this MD&A that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal" and similar expressions (although not all forward-looking statements contain such words). Forward looking statements in this MD&A may include, but are not limited to statements relating to:

- the expected impact of the COVID-19 pandemic;
- future capital expenditures;
- proposed asset acquisitions and dispositions;
- anticipated benefits of the Transaction (as defined below) to Shaw and its securityholders, including corporate, operational, scale and other synergies and the timing thereof;
- the timing, receipt and conditions of required regulatory or other third party approvals, including but not limited to the receipt of applicable approvals under the *Broadcasting Act* (Canada), the

Competition Act (Canada) and the *Radiocommunication Act* (Canada) (collectively, the "Key Regulatory Approvals") related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to the closing of the Transaction and the anticipated timing for closing of the Transaction;
- expected cost efficiencies;
- financial guidance and expectations for future performance;
- business and technology strategies and measures to implement strategies;
- the Company's equity investments, joint ventures, and partnership arrangements;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;
- expected project schedules, regulatory timelines, completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented or withdrawn by governments or regulators;
- timing of new product and service launches;
- the resiliency and performance of the Company's wireline and wireless networks;
- the deployment of: (i) network infrastructure to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- expected changes in the Company's market share;
- the cost of acquiring and retaining subscribers and deployment of new services;
- expansion of and changes in the Company's business and operations and other goals and plans; and
- execution and success of the Company's current and long term strategic initiatives.

All of the forward-looking statements made in this MD&A are qualified by these cautionary statements.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this MD&A are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods.

These assumptions, many of which are confidential, include but are not limited to management expectations with respect to:
- general economic conditions, which includes the impact on the economy and financial markets of the COVID-19 pandemic and other health risks;
- the impact of the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources and/or financial results;
- anticipated benefits of the Transaction to the Company and its security holders;

- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of the Key Regulatory Approvals related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to closing of the Transaction in a timely manner and the completion of the Transaction on expected terms;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the impact of the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction on the Company's ability to maintain its current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the ability to satisfy the other expectations and assumptions concerning the Transaction and the operations and capital expenditure plans for the Company following completion of the Transaction;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment, and devices;
- industry structure, conditions and stability;
- regulation, legislation or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation or withdrawal of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long-term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- operating expenses and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company's access to sufficient retail distribution channels;
- the Company's access to the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many risk factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including but not limited to:

- changes in general economic, market and business conditions including the impact of the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;

- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees in response to the COVID-19 pandemic;
- the failure of the Company and Rogers to receive, in a timely manner and on satisfactory terms, the necessary regulatory or other third-party approvals, including but not limited to the Key Regulatory Approvals required to close the Transaction;
- the ability to satisfy, in a timely manner, the other conditions to the closing of the Transaction;
- the ability to complete the Transaction on the terms contemplated by the arrangement agreement (the "Arrangement Agreement") between the Company and Rogers;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the Company's failure to complete the Transaction for any reason could materially negatively impact the trading price of the Company's securities;
- the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction may adversely impact the Company's current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the failure of the Company to comply with the terms of the Arrangement Agreement may, in certain circumstances, result in the Company being required to pay the termination fee to Rogers, the result of which will or could have a material adverse effect on the Company's financial position and results of operations and its ability to fund growth prospects and current operations;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information and communications industries;
- changes in laws, regulations and decisions by regulators, or other actions by governments or regulators, that affect the Company or the markets in which it operates;
- any emergency measures implemented or withdrawn by governments or regulators;
- technology, privacy, cyber security and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects by the completion date;
- the Company's ability to grow subscribers and market share;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers and their goods and services required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to complete the deployment of (i) network infrastructure required to improve capacity and coverage and (ii) new technologies, including but not limited to next generation wireless and wireline technologies such as 5G and IPTV, respectively;
- opportunities that may be presented to and pursued by the Company;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and

- other factors described in the Company's fiscal 2020 Annual MD&A under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors. Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2020 Annual MD&A and this MD&A. This MD&A provides certain future-oriented financial information or financial outlook (as such terms are defined in applicable securities laws), including the financial guidance and assumptions disclosed under "Outlook." Shaw discloses this information because it believes that certain investors, analysts and others utilize this and other forward-looking information to assess Shaw's expected operational and financial performance, and as an indicator of its ability to service debt and pay dividends to shareholders. The Company cautions that such financial information may not be appropriate for this or other purposes.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this MD&A are expressly qualified by this statement.

Additional Information

Additional information concerning the Company, including the Company's Annual Information Form, is available through the Internet on SEDAR which may be accessed at www.sedar.com. Copies of such information may also be obtained on the Company's website at www.shaw.ca, or on request and without charge from the Corporate Secretary of the Company, Suite 900, 630 – 3rd Avenue S.W., Calgary, Alberta, Canada T2P 4L4, telephone (403) 750-4500.

Non-GAAP and additional financial measures

Certain measures in this MD&A do not have standard meanings prescribed by GAAP and are therefore considered non-GAAP financial measures. These measures are provided to enhance the reader's overall understanding of our financial performance or current financial condition. They are included to provide investors and management with an alternative method for assessing our operating results in a manner that is focused on the performance of our ongoing operations and to provide a more consistent basis for comparison between periods. These measures are not in accordance with, or an alternative to, GAAP and do not have standardized meanings. Therefore, they are unlikely to be comparable to similar measures presented by other entities.

Please refer to "Non-GAAP and additional financial measures" in this MD&A for a discussion and reconciliation of non-GAAP financial measures, including adjusted EBITDA, free cash flow and net debt as well as net debt leverage ratio and adjusted EBITDA margin, which are non-GAAP ratios.

Introduction

At Shaw, we focus on delivering sustainable long-term growth by connecting customers to the world through a best-in-class seamless connectivity experience by leveraging our world class converged network. This includes driving operational efficiencies and executing on our strategic priorities through the delivery of an exceptional customer experience and a more agile operating model. Our strategic priorities include growing our customer relationships, identifying sustainable cost savings in our core Wireline business, and making the appropriate investments to capitalize on future growth, including network related investments to support continued broadband product enhancements and improve the wireless experience.

With the onset of the global COVID-19 pandemic in 2020, connectivity rapidly became a critical lifeline for Canadians and our economy. During this unprecedented period, our network performance was exceptional, and we remain focused on supporting our employees, customers and communities. Our robust facilities-based network, the result of years of significant investment, has showcased its strength in addressing our customers' need to stay connected to family, friends and colleagues and work from home throughout the COVID-19 pandemic. During the third quarter, the Company continued to experience the following key impacts related to COVID-19:

• a reduction in overall wireline subscriber activity,
• an increase in wireline network usage as well as extended peak hours,
• increased demand for wireless voice services,
• a decrease in wireless roaming revenue,
• customer payments substantially in-line with historical trends, and
• an increase in credits provided for, as well as the reduction or cancellation of, Shaw Business customer accounts.

While the pandemic has had an impact on our business, Shaw continues to be resilient, delivering solid financial and operating results, and we believe that we are well positioned to meet the rapidly changing and increasing demands of our customers. The financial impacts from COVID-19 in the third quarter were not material; however, the situation remains uncertain in terms of (i) its magnitude, outcome, duration, resurgences, emergence of variants, and/or subsequent waves, and (ii) the continued availability and distribution of any COVID-19 vaccines. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability of certain customers to pay their bills. Shaw Business primarily serves the small and medium sized market, which is also particularly vulnerable to COVID-19 related restrictions, including mandated closures or further social distancing requirements.

As an ongoing risk, the duration and impact of the COVID-19 pandemic is still unknown, as is the efficacy and duration of the government interventions. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 pandemic may materially and adversely affect the Company's operations, financial results and condition in future periods are also subject to significant uncertainty.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family

Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. As at March 13, 2021, when the Arrangement Agreement was signed, the value of the consideration attributable to the Class A Shares and Class B Shares held by the Shaw Family Shareholders (calculated using the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021) was equivalent to $40.50 per share.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC) in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

On May 28, 2021, the Company announced the redemption of all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares", and together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) on June 30, 2021 (the "Redemption Date") at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These were the final dividends on the Preferred Shares, which were paid separately from the aggregate Redemption Price and in the usual manner. Following payment of the June 30, 2021 dividends, there were no accrued and unpaid dividends on the Preferred Shares.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Wireless

Our Wireless division currently operates in Ontario, Alberta and British Columbia, covering approximately 50% of the Canadian population.

On July 30, 2020, the Company launched Shaw Mobile, a new wireless service in western Canada that leverages Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, to provide Shaw Internet customers with an innovative wireless experience. Shaw Mobile provides Shaw Internet customers with bundling opportunities to take advantage of unprecedented savings, combined with the ability to customize their mobile data requirements through two rate plans – By The Gig and Unlimited Data. Shaw

Mobile is a powerful example of how facilities-based service providers can compete and innovate. Shaw Mobile capitalizes on the long-term trend that shows the vast majority of Canadians' smart device data usage occurs on WiFi networks, a fact amplified by recent work-from-home trends. Freedom Mobile continues to promote its Big Gig Unlimited and Absolute Zero offers.

Third quarter fiscal 2021 results include Wireless net additions of approximately 51,000. Wireless service revenue increased 9.2% to $225 million and adjusted EBITDA[1] increased 13.9% to $115 million compared to the third quarter of fiscal 2020, primarily due to continued service revenue growth and improved equipment margins partially offset by higher IT, network and advertising costs relative to the prior year. Wireless adjusted EBITDA margin of 38.6% compared to 40.1% in the prior year primarily due to equipment sales being a higher proportion of wireless revenues in the current period.

The Company made significant investments in its wireless network and customer service capabilities. Total wireless retail locations across its operating footprint, including corporate, dealer and national retail, are approximately 740, where Shaw Mobile is available in approximately 150 locations.

The Company continues to prioritize network investments as part of its converged network strategy and leverages the coaxial cable (which transports both power and multi-gigabit data speeds) in its Fibre+ network for the rapid and flexible deployment of small cells, which will support densification efforts.

Wireline

In our Wireline business, we continue to be a technology leader and western Canada's leader in gig speed Internet underpinned by our Fibre+ network. Through our digital transformation, we have made it easier to interact with our customers and are leveraging insights from customer data to better understand their preferences so we can provide them with the services they want. We continue to streamline and simplify manual processes to improve the customer experience and day-to-day operations for our employees.

Despite the unprecedented impact that the COVID-19 pandemic has had on the lives of our customers, and the corresponding impacts to the way we serve our customers, our focus remains on the execution and delivery of stable and profitable Wireline results. This includes growth in high quality Internet subscribers and improving overall customer account profitability by attracting and retaining higher value households with our best value proposition on 2-year ValuePlans for those who want faster Internet with a better customer experience in addition to Video and Wireless services.

During the quarter, the Company introduced Shaw Gig WiFi, leveraging the best in-home technology to give customers the faster speeds, lower latency and more consistent WiFi signal they need to connect all their devices. Through continued broadband product enhancements and Shaw Mobile bundling initiatives, the Company is focused on profitable subscriber growth and reducing household churn.

In the quarter, Consumer RGU[2] losses of approximately 36,300 continued its improving trend, led by Internet RGU additions of approximately 1,300 as customers bundled their Internet and Wireless service together. Third quarter Wireline revenue increased 1.6% year-over-year to $1.08 billion and adjusted EBITDA increased 3.7% to $527 million. Third quarter Wireline financial results include approximately $20 million of incremental revenue related to the release of a provision following the CRTC decision on final aggregated TPIA rates, substantially offset by approximately $25 million higher employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price

[1] Adjusted EBITDA is a non-GAAP financial measure and should not be considered a substitute or alternative for GAAP measures. Adjusted EBITDA is not a defined term under IFRS and does not have a standard meaning, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for more information about this measure, including a quantitative reconciliation to the most directly comparable financial measure in the Company's Consolidated Financial Statements.

[2] See "Key Performance Drivers."

and adjustments to employee benefit provisions. Excluding the aforementioned items, Wireline revenue decreased 0.3% and adjusted EBITDA increased 4.7%, resulting in an adjusted EBITDA margin[3] of 50.2% compared to 47.8% in the prior year period.

Our Wireline Business division provides connectivity solutions to its customers by leveraging our Smart suite products which provide cost-effective enterprise grade managed IT and communications solutions that are increasingly valued by businesses of all sizes as the digital economy grows in scope and complexity. The COVID-19 pandemic impacted the Business division by causing the crediting, as well as the reduction or cancellation, of a number of Business customer accounts and slowing revenue growth. In response to the changing needs of its customers during the pandemic, Shaw Business added a suite of collaboration tools and new Smart products, such as Microsoft 365, Smart Remote Office, SmartSecurity and SmartTarget and launched a 1.5 Gig Internet speed tier providing businesses of all sizes the speed and bandwidth to leverage data-heavy applications and cloud services. Despite the continued uncertain environment, Shaw Business revenue grew 3.6% to $145 million year-over-year.

[3] Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is not a standardized measure under IFRS and may not be a reliable way to compare us to other companies. See “Non-GAAP and additional financial measures” for more information about this non-GAAP ratio.

(1) Adjusted EBITDA, adjusted EBITDA margin and free cash flow are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standardized meanings, and therefore may not be a reliable way to compare us to other companies. See “Non-GAAP and additional financial measures” for more information about these measures including quantitative reconciliations to the most directly comparable financial measures in the Company’s Consolidated Financial Statements.

(2) Funds flow from operations is before changes in non-cash balances related to operations as presented in the condensed interim Consolidated Statements of Cash Flows.

Key Performance Drivers

The Company measures the success of its strategies using a number of key performance drivers which are defined and described under “Key Performance Drivers – Statistical Measures” in the 2020 Annual MD&A and in this MD&A below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance indicators are not measurements in accordance with GAAP, should not be considered alternatives to revenue, net income or any other measure of performance under GAAP and may not be comparable to similar measures presented by other issuers.

Subscriber (or revenue generating unit (RGU)) highlights

The Company measures the count of its subscribers in its Consumer, Business, and Wireless divisions. For further details and discussion on subscriber counts for RGUs see "Key Performance Drivers – Statistical Measures – Subscriber Counts for RGUs" in the MD&A for the year ended August 31, 2020.

Total Subscribers	**7,109,619**	7,078,683	**14,547**	**(60,758)**	**30,936**	(59,744)

In Wireless, the Company gained 51,008 net postpaid and prepaid subscribers in the quarter, consisting of 46,604 postpaid additions and 4,404 prepaid additions.

Wireline RGUs decreased by 36,461 compared to a 55,293 RGU loss in the third quarter of fiscal 2020. The current quarter includes an improvement in Internet RGUs with a gain of 1,283 compared to a loss of 5,103 in the same period last year. The mature products within the Consumer division, including Video, Satellite and Phone, declined in the aggregate by 37,555 RGUs.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.07% in the third quarter of fiscal 2021 increased 11-basis points from 0.96% in the third quarter of fiscal 2020.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is an industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $40.56 in the third quarter of fiscal 2021 compares to $44.27 in the third quarter of fiscal 2020, representing a decrease of 8.4%.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

ARPU of $36.94 in the third quarter of fiscal 2021 compares to $38.94 in the third quarter of fiscal 2020, representing a decrease of 5.1%.

Overview

For detailed discussion of divisional performance see "Discussion of operations." Highlights of the consolidated third quarter financial results are as follows:

Revenue

Revenue for the **third quarter** of fiscal 2021 of $1.38 billion increased $63 million, or 4.8%, from $1.31 billion for the third quarter of fiscal 2020, highlighted by the following:

- Revenues in the Consumer division of $935 million increased $12 million, or 1.3%, compared to the prior year period due to the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019. Excluding the TPIA adjustment, Consumer revenue decreased 0.9% as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
- The Wireless division contributed $298 million and included a $46 million, or 18.3%, increase over the third quarter of fiscal 2020 reflecting a $19 million increase in service revenue due to the increased subscriber base, including significant Shaw Mobile additions in the quarter and an increase in equipment revenue of $27 million mainly due to increased device sales.
- The Business division had growth of $5 million, or 3.6%, in comparison to the third quarter of fiscal 2020 reflecting Internet revenue growth and continued demand for the Smart suite of products, partially offset by lower video revenue primarily related to impacts of COVID-19 on the hospitality sector.

Compared to the second quarter of fiscal 2021, consolidated revenue for the quarter decreased 0.9%, or $12 million. The decrease in revenue over the prior quarter includes a $38 million decrease in the Wireless division driven by a $45 million decrease in equipment revenue partially offset by a $7 million increase in service revenue which reflects the impact of the increased subscriber base partially mitigated by a decrease in ABPU (down from $40.98 in the second quarter of fiscal 2021 to $40.56 in the current quarter). Meanwhile, ARPU increased quarter-over-quarter (from $36.82 in the second quarter of fiscal 2021 to $36.94 in the current quarter). The decrease in Wireless was partially offset by Wireline as revenues increased by $26 million over the prior quarter primarily due to the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019.

Revenue for the **nine-month period** ended May 31, 2021 of $4.13 billion increased $74 million, or 1.8%, from $4.06 billion for the comparable period in fiscal 2020.

- The year-over-year improvement in revenue was primarily due to a $79 million increase in the Wireless division as revenues increased to $951 million mainly due to an increase in service revenue of $54 million, or 8.9%, and equipment revenue of $25 million, or 9.3%, compared to the comparable nine-month period of fiscal 2020.
- The Business division contributed $8 million, or 1.9%, to the consolidated revenue improvements for the nine-month period driven primarily by customer growth.
- Consumer division revenues decreased $11 million, or 0.4%, compared to the comparable nine-month period of fiscal 2020 as the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 recorded in the current period and growth in Internet revenues were fully offset by declines in Video, Satellite and Phone subscribers and revenues.

Adjusted EBITDA

Adjusted EBITDA for the **third quarter** of fiscal 2021 of $642 million increased by $33 million, or 5.4%, from $609 million for the third quarter of fiscal 2020, highlighted by the following:

- The year-over-year improvement in the Wireless division of $14 million, or 13.9%, is mainly due to continued service revenue growth and improved equipment margins partially offset by higher IT, network and advertising costs relative to the prior year. Wireless adjusted EBITDA margin of 38.6% compared to 40.1% in the prior year primarily due to equipment sales being a higher proportion of wireless revenues in the current period.
- The year-over-year increase in the Wireline division of $19 million, or 3.7%, was primarily due to higher Wireline revenue, including the TPIA adjustment, proactive base management, and lower bad debt expense, partially offset by increased employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price and adjustments to employee benefit provisions, as well as increased advertising and customer care expenses in the quarter. Excluding the $20 million TPIA adjustment and the higher employee related costs of approximately $25 million, Wireline adjusted EBITDA increased 4.7% compared to the prior year.

Consistent with the variances noted above, adjusted EBITDA margin for the **third quarter** of 46.7% increased 30-basis points compared to 46.4% in the third quarter of fiscal 2020.

Compared to the **second quarter** of fiscal 2021, adjusted EBITDA for the current quarter increased $5 million, or 0.8%, primarily due to an $18 million increase in the Wireless division largely due to a $7 million increase in service revenues and the impact of higher margins due to equipment sales being a lower proportion of wireless revenues in the current quarter, partially offset by a $13 million decrease in the Wireline division as the impact of the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 recorded in the current period was more than fully offset by the $25 million increase of various employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price in the current quarter and the $8 million employee benefits provision release in the prior quarter.

For the **nine-month period** ended May 31, 2021, adjusted EBITDA of $1.89 billion increased $89 million, or 5.0%, from $1.80 billion for the comparable prior year period.

- Wireless adjusted EBITDA for the nine-month period increased $34 million, or 13.4%, over the comparable period mainly due to an increase in service revenues, partially offset by additional costs in connection with the expansion of the Shaw retail footprint in the current year.

- Wireline adjusted EBITDA for the nine-month period increased $55 million, or 3.6%, over the comparable period mainly due to decreased operating costs, including lower employee related costs, travel expenses, and advertising, partially offset by a decrease in Consumer revenue as noted above.

Free cash flow

Free cash flow for the **third quarter** of fiscal 2021 of $307 million increased $86 million from $221 million in the third quarter of fiscal 2020, mainly due to a $33 million increase in adjusted EBITDA, a $35 million decrease in capital expenditures and a $35 million reduction of tax related interest expense, partially offset by an $18 million increase in cash taxes.

Net income (loss)

Net income of $354 million and $734 million for the three and nine months ended May 31, 2021 respectively, compared to a net income of $184 and $513 million for the same periods in fiscal 2020. The changes in net income are outlined in the following table:

	May 31, 2021 net income compared to:		
	Three months ended		Nine months ended
(millions of Canadian dollars)	February 28, 2021	May 31, 2020	May 31 , 2020
Increased adjusted EBITDA[(1)]	5	33	89
Decreased restructuring costs[(2)]	-	13	-
Decreased (increased) amortization	2	1	(4)
Change in net other costs and revenue[(3)]	(11)	8	61
Decreased income taxes	141	115	75
	137	170	221

(1) See “Non-GAAP and additional financial measures.”

(2) During the first, second, and third quarters of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million in the first quarter of fiscal 2021, $1 million in the second quarter of fiscal 2021, and $1 million in the third quarter of fiscal 2021, in each case primarily related to severance and employee related costs.

(3) Net other costs and revenue include accretion of long-term liabilities and provisions, interest, debt retirement costs, realized and unrealized foreign exchange differences and other losses as detailed in the unaudited Consolidated Statements of Income. In the second quarter of fiscal 2021, the Company recorded a $27 million fair value gain on private investments in this category while in the third quarter of fiscal 2021, the Company recorded $18 million in Transaction-related advisory, legal, financial, and other professional costs.

Outlook

The Company confirms that it remains on track to meet its fiscal 2021 guidance of adjusted EBITDA growth over fiscal 2020, consolidated capital investments of approximately $1.0 billion. In light of the Company’s performance to date, the Company now expects free cash flow will exceed $800 million in fiscal 2021.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. During the third quarter of fiscal 2021, the Company continued to experience a reduction in overall Wireline subscriber activity, an increase in wireline network usage as well as extended peak hours, increased demand for Wireless voice services, a decrease in Wireless roaming revenue, customer payments substantially in-line with historical trends, and an increase in credits provided for, as well as the reduction or cancellation of Shaw Business customer accounts.

While the financial impacts from COVID-19 in the third quarter of fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence, emergence of variants, and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability of certain customers to pay their bills. Shaw Business primarily serves the small and medium sized market, which is also particularly vulnerable to COVID-19 related restrictions, including mandated closures, capacity restrictions, self-quarantines or further social distancing requirements.

The Company believes its business and facilities-based networks provide critical and essential services to Canadians which remained resilient throughout the pandemic and will continue to be resilient in this dynamic and uncertain environment. Management continues to actively monitor the impacts to the business and make the appropriate adjustments to operating and capital expenditures to reflect the evolving environment. Considering the ongoing presence of COVID-19, the speed at which it develops and/or changes, and the continued uncertainty of the magnitude, outcome, duration, resurgence, emergence of variants, and/or subsequent waves of the pandemic or the potential efficacy and continued availability and distribution of any COVID-19 vaccines, the current estimates of our operational and financial results which underlie our outlook for fiscal 2021 are subject to a significantly higher degree of uncertainty. Any estimate of the length and severity of these developments is therefore subject to uncertainty, as are our estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect our operations, financial results, and condition in future periods.

The Transaction could cause the attention of management of the Company to be diverted from the day-to-day operations of the Company. These disruptions could be exacerbated by a delay in the completion of the Transaction and could have an adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. Because the completion of the Transaction is subject to significant uncertainty, officers and employees of the Company may experience uncertainty about their future roles with the Company, which may adversely affect the Company's ability to attract or retain key management and personnel in the period until the completion or termination of the Arrangement Agreement.

In addition, third parties with which the Company currently has business relationships or may have business relationships in the future, including industry partners, regulators, customers and suppliers, may experience uncertainty associated with the Transaction, including with respect to current or future relationships with the Company or Rogers. Such uncertainty could have a material and adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company.

Under the Arrangement Agreement, the Company must generally use its reasonable best efforts to conduct its business in the Ordinary Course (as such term is defined in the Arrangement Agreement) and, prior to the completion of the Transaction or the termination of the Arrangement Agreement, the Company is subject to certain covenants which restrict it from taking certain actions without the prior consent of Rogers and which require it to take certain other actions. In either case, such covenants may delay or prevent the Company from pursuing business opportunities that may arise or preclude actions that would otherwise be advisable if the Company were to remain a standalone entity. The entering into of the Arrangement Agreement may also preclude the Company from participating in any auction by ISED for wireless spectrum licensing.

On April 6, 2021, ISED published its list of applicants to participate in the 3500 MHz spectrum auction, which commenced on June 15, 2021. The list confirms that Shaw has elected not to participate in the auction.

See "Caution concerning forward-looking statements."

Non-GAAP and additional financial measures

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures or ratios. These financial measures or ratios do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure documents may also provide discussion and analysis of additional financial measures. Additional financial measures include line items, headings and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-GAAP financial measures, ratios and additional financial measures have not been presented as an alternative to revenue, net income or any other measure of performance required by GAAP.

Below is a discussion of the non-GAAP financial measures, ratios and additional financial measures used by the Company and provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, equity income/loss of an associate or joint venture, amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business. Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended May 31,		Nine months ended May 31,	
(millions of Canadian dollars)	**2021**	2020	**2021**	2020
Net income	**354**	184	**734**	513
Add back (deduct):				
Restructuring costs	**1**	14	**14**	14
Amortization:

Deferred equipment costs	**11**	16	**37**	51
Property, plant and equipment, intangibles and other	**292**	290	**881**	867
Amortization of financing costs – long-term debt	**1**	-	**2**	2
Interest expense	**31**	67	**164**	206
Other losses (gains)	**21**	(7)	**(4)**	15
Current income tax expense	**(88)**	19	**(8)**	78
Deferred income tax expense	**22**	30	**75**	64
Adjusted EBITDA	**642**	609	**1,886**	1,797

Adjusted EBITDA margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Three months ended May 31,			Nine months ended May 31,		
	2021	2020	Change %	**2021**	2020	Change %
Wireline	**48.8%**	47.8%	2.1	**50.1%**	48.4%	3.5
Wireless	**38.6%**	40.1%	(3.7)	**30.2%**	29.0%	4.1
Combined Wireline and Wireless	**46.7%**	46.4%	0.6	**45.6%**	44.3%	2.9

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage. Refer to "Liquidity and capital resources" for further detail.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio. Refer to "Liquidity and capital resources" for further detail.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

(millions of Canadian dollars)	Three months ended May 31, 2021	2020	Change %	Nine months ended May 31, 2021	2020	Change %
Revenue						
Consumer	**935**	923	1.3	**2,755**	2,766	(0.4)

(1) See "Non-GAAP and additional financial measures."

In the **third quarter** of fiscal 2021, Wireline RGUs decreased by 36,461 compared to a 55,293 RGU loss in the third quarter of fiscal 2020. The current quarter includes an improvement in Internet RGUs with a gain of 1,283 compared to a loss of 5,103 in the same period last year. The mature products within the Consumer division, including Video, Satellite and Phone, declined in the aggregate by 37,555 RGUs.

Revenue highlights include:

- Consumer revenue for the **third quarter** of fiscal 2021 increased by $12 million, or 1.3%, compared to the third quarter of fiscal 2020 primarily due to the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019. Excluding the TPIA adjustment, Consumer revenue decreased 0.9% as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
  - As **compared to the second quarter** of fiscal 2021, the current quarter revenue increased by $26 million, or 2.9%. Excluding the $20 million TPIA adjustment, Consumer revenue increased 0.7%
- Business revenue of $145 million for the **third quarter** of fiscal 2021 increased $5 million, or 3.6%, compared to the third quarter of fiscal 2020, reflecting Internet revenue growth and continued demand for the Smart suite of products, partially offset by lower video revenue primarily related to impacts of COVID-19 on the hospitality sector.
  - As **compared to the second quarter** of fiscal 2021, the current quarter revenue remained unchanged.
- Wireline revenue for the **first nine months** of fiscal 2021 decreased $3 million, or 0.1%, compared to the first nine months of fiscal 2020, primarily due to a $11 million decrease in Consumer revenue as the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 recorded in the current period and growth in Internet revenues were fully offset by declines in Video, Satellite and Phone subscribers and revenues. This was partially offset by a $8 million increase in Business revenue.

Adjusted EBITDA highlights include:

- Adjusted EBITDA for the **third quarter** of fiscal 2021 of $527 million increased 3.7%, or $19 million, from $508 million in the third quarter of fiscal 2020. The increase was primarily due to higher Wireline revenue, including the TPIA adjustment, proactive base management, and lower bad debt expense, partially offset by increased employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price and adjustments to employee benefit provisions, as well as increased advertising and customer care expenses in the quarter. Excluding the $20 million TPIA adjustment and the higher employee related costs of approximately $25 million, Wireline adjusted EBITDA increased 4.7% compared to the prior year period.

- As **compared to the second quarter** of fiscal 2021, Wireline adjusted EBITDA for the current quarter decreased by $13 million, or 2.4%, as the impact of the incremental $20 million in revenue related to the release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 recorded in the current period was more than fully offset by the $25 million increase of various employee related costs primarily driven by equity-based compensation due to the significant increase in Shaw's share price in the current quarter and the $8 million employee benefits provision release in the prior quarter.

- Adjusted EBITDA for the **first nine months** of fiscal 2021 increased $55 million, or 3.6%, compared to the first nine months of fiscal 2020, mainly due to decreased operating costs, including lower employee related costs, travel expenses, and advertising, partially offset by a decrease in Consumer revenue as noted above.

Wireless

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %
Service	**225**	206	9.2	**658**	604	8.9
Equipment and other	**73**	46	58.7	**293**	268	9.3
Wireless revenue	**298**	252	18.3	**951**	872	9.1
Adjusted EBITDA[(1)]	**115**	101	13.9	**287**	253	13.4
Adjusted EBITDA margin[(1)]	**38.6%**	40.1%	(3.7)	**30.2%**	29.0%	4.1

(1) See "Non-GAAP and additional financial measures."

The Wireless division added 51,008 RGUs in the **third quarter** of fiscal 2021 as compared to 5,465 RGUs lost in the third quarter of fiscal 2020. The net additions in the quarter consisted of 46,604 postpaid and 4,404 prepaid additions.

Revenue highlights include:

- Revenue of $298 million for the **third quarter** of fiscal 2021 increased $46 million, or 18.3%, over the third quarter of fiscal 2020. This was primarily due to an increase in service revenues of $19 million, or 9.2%, due to the increased subscriber base, including significant Shaw Mobile additions in the quarter and an increase in equipment revenue of $27 million, or 58.7%, mainly due to increased device sales. There was an 8.4% and 5.1% year-over-year decrease in ABPU to $40.56 and ARPU to $36.94, respectively.
  - As **compared to the second quarter** of fiscal 2021, the current quarter revenue decreased $38 million, or 11.3%, due to a $45 million decrease in equipment revenue partially offset by a $7 million increase in service revenue which reflects the impact of the increased subscriber base partially mitigated by a decrease in ABPU (down from $40.98 in the second quarter of fiscal 2021 to $40.56 in the current quarter). Meanwhile, ARPU increased quarter-over-quarter (from $36.82 in the second quarter of fiscal 2021 to $36.94 in the current quarter).
- Revenue of $951 million for the **first nine months** of fiscal 2021 increased $79 million, or 9.1%, over the first nine months of fiscal 2020 mainly due to an increase in service revenue of $54 million, or 8.9%, due to the increased subscriber base, along with an increase in equipment revenue of $25 million, or 9.3%.

Adjusted EBITDA highlights include:

- Adjusted EBITDA of $115 million for the **third quarter** of fiscal 2021 improved by $14 million, or 13.9%, over the third quarter of fiscal 2020. The increase is primarily due to continued service revenue growth and improved equipment margins partially offset by higher IT, network and advertising costs relative to the prior year. Wireless adjusted EBITDA margin of 38.6% compared to 40.1% in the prior year primarily due to equipment sales being a higher proportion of wireless revenues in the current period.
  - As **compared to the second quarter** of fiscal 2020, adjusted EBITDA for the current quarter increased $18 million, or 18.6%, mainly due to a $7 million increase in service revenues and the impact of higher margins due to equipment sales being a lower proportion of wireless revenues in the current quarter.
- Adjusted EBITDA for the **first nine months** of fiscal 2021 increased $34 million, or 13.4%, compared to the first nine months of fiscal 2020, primarily due to an increase in service revenues partially offset by additional costs in connection with the expansion of the Shaw retail footprint in the current year.

Capital expenditures and equipment costs

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %

Consolidated total as per Note 3 to the unaudited interim consolidated financial statements	**233**	268	(13.1)	**716**	804	(10.9)

In the **third quarter** of fiscal 2021, capital investment of $233 million decreased $35 million from the comparable period in fiscal 2020. Total Wireline capital spending of $163 million decreased $32 million compared to the prior year period primarily due to lower success-based capital, capitalized labour, and upgrades and enhancements. Wireless spending decreased by approximately $3 million year-over-year primarily due to lower network and IT related investment in the quarter, mainly due to timing, partially offset by increased spending related to retail and office space in the current year.

Wireline highlights for the quarter include:

- For the quarter, investment in combined upgrades, enhancements and replacement categories was $83 million which is a decrease of $4 million, or 4.6%, over the prior year period.
- Investments in new housing development were $29 million, a $2 million, or 6.5%, decrease over the prior year period, driven by lower residential and commercial customer network growth and acquisition in the current year.
- Success-based capital for the quarter of $35 million was $22 million, or 38.6%, lower than the third quarter of fiscal 2020 primarily due to lower equipment purchases in the period.
- Investments in buildings and other in the amount of $16 million was $4 million lower year-over year primarily due to higher corporate related costs in the comparable period.

Wireless highlights for the quarter include:

- Capital investment of $70 million in the third quarter decreased relative to the third quarter of fiscal 2020 by $3 million, primarily due to lower network and IT related investment in the quarter, mainly due to timing, partially offset by increased spending related to retail and office space in the current year. In fiscal 2021, the Company continues to focus on investment in the Wireless network and infrastructure, specifically the continued deployment of 700 MHz spectrum, 600 MHz spectrum, LTE and small cells as well as enhancements to the back-office systems, retail locations and other corporate initiatives.

Other income and expense items

Restructuring costs

Restructuring costs generally include severance, employee related costs and other costs directly associated with a restructuring program. During the first, second and third quarters of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million in the first quarter of fiscal 2021, $1 million in the second quarter, and $1 million in the third quarter of fiscal 2021 primarily related to severance and employee related costs.

Amortization

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %
Amortization revenue (expense)						
Deferred equipment revenue	**3**	4	(25.0)	**9**	13	(30.8)
Deferred equipment costs	**(11)**	(16)	(31.3)	**(37)**	(51)	(27.5)
Property, plant and equipment, intangibles and other	**(292)**	(290)	0.7	**(881)**	(867)	1.6

Amortization of property, plant and equipment, intangibles and other increased 0.7% for the three months ended May 31, 2021 and increased 1.6% for the nine months ended May 31, 2021, when compared to the same periods in fiscal 2020. The increase in amortization reflects the amortization of new expenditures exceeding the amortization of assets that became fully amortized during the period.

Amortization of financing costs and interest expense

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %
Amortization of financing costs – long-term debt	**1**	-	100.0	**2**	2	-
Interest expense	**31**	67	(53.7)	**164**	206	(20.4)

Interest expense for the three and nine months ended May 31, 2021 decreased $36 million, or 53.7%, and $42 million, or 20.4%, respectively, over the comparable periods which primarily reflects a $35 million reduction of tax related interest expense in the quarter as well as a lower average outstanding debt balances in the period and the decrease in the weighted average interest rate.

Other gains/losses

This category generally includes realized and unrealized foreign exchange gains and losses on U.S. dollar denominated current assets and liabilities, gains and losses on disposal of property, plant and equipment, realized and unrealized gains and losses on private investments, and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership. In the second quarter of fiscal 2021, the Company recorded a $27 million fair value gain on private investments in this category while in the third quarter of fiscal 2021, the Company recorded $18 million in Transaction-related advisory, legal, financial, and other professional costs.

Income taxes

Income taxes are lower in the quarter compared to the third quarter of fiscal 2020 due mainly to a revision to liabilities for uncertain tax positions that became statute barred in the period, which decreased income tax expense by $125 million.

(1) See "Non-GAAP and additional financial measures."
(2) Net income attributable to both equity shareholders and non-controlling interests.
(3) Fiscal 2021 and 2020 figures reflect the impact of the adoption and application of IFRS 16 while Fiscal 2019 figures do not and are not comparable. See "New Accounting Standards" as well as "Results of Operations" and "Segmented Operations Review" in the MD&A for the year ended August 31, 2020.

F21 Q3 vs F21 Q2	In the third quarter of fiscal 2021, net income increased $137 million compared to the second quarter of fiscal 2021 mainly due to a $131 million decrease in current income taxes expense and a $36 million decrease in interest expense mainly due to a revision to liabilities for uncertain tax positions that became statute barred in the period, which reduced these expenses by $125 million and $35 million respectively, a $9 million decrease in deferred taxes, and a $5 million increase in adjusted EBITDA, partially offset by $18 million in Transaction related advisory, legal, financial, and other professional fees in the quarter and

	the impact of the $27 million fair value gain on private investments recorded in the second quarter.
F21 Q2 vs F21 Q1	In the second quarter of fiscal 2021, net income increased $54 million compared to the first quarter of fiscal 2021 mainly due to a $30 million increase in adjusted EBITDA, an $11 million decrease in restructuring costs, and a $27 million fair value gain on private investments recorded in the second quarter, partially offset by a $9 million increase in deferred taxes and an $8 million increase in current taxes, all in the second quarter.
F21 Q1 vs F20 Q4	In the first quarter of fiscal 2021, net income decreased $12 million compared to the fourth quarter of fiscal 2020 mainly due to a $12 million increase in restructuring costs in the first quarter and a $27 million increase in deferred taxes, partially offset by a $13 million increase in adjusted EBITDA and a $6 million decrease in current taxes, all in the first quarter.
F20 Q4 vs F20 Q3	In the fourth quarter of fiscal 2020, net income decreased $9 million compared to the third quarter of fiscal 2020 mainly due to an $15 million decrease in adjusted EBITDA and a $23 million increase in current taxes in the fourth quarter as well an $8 million decrease in other gains (losses) as a result of an insurance claim recovery in the third quarter, partially offset by a $35 million decrease in deferred taxes and a $14 million decrease in restructuring costs in the fourth quarter.
F20 Q3 vs F20 Q2	In the third quarter of fiscal 2020, net income increased $17 million compared to the second quarter of fiscal 2020 mainly due to a $26 million increase in other gains (losses), which includes the impact of the $17 million payment related to the early redemption of $800 million in senior notes in the second quarter, a $6 million insurance claim recovery, a $9 million increase in adjusted EBITDA in the third quarter and a $4 million decrease in current taxes, partially offset by an $8 million increase in deferred taxes, also in the third quarter.
F20 Q2 vs F20 Q1	In the second quarter of fiscal 2020, net income increased $5 million compared to the first quarter of fiscal 2020 mainly due to a $13 million decrease in current taxes, a $12 million increase in adjusted EBITDA and a $3 million decrease in interest expense, all in the second quarter, partially offset by a $17 million payment related to the early redemption of $800 million in senior notes and a $10 million increase in deferred taxes, also in the second quarter.
F20 Q1 vs F19 Q4	In the first quarter of fiscal 2020, net income decreased $3 million compared to the fourth quarter of fiscal 2019 mainly due to a $23 million decrease in deferred taxes in the first quarter. This was partially offset by a $7 million increase in current taxes in the first quarter as well as the net impact of the adoption of IFRS 16 which resulted in a decrease to operating, general and administrative costs that was more than offset by increases to amortization of property, plant and equipment, intangibles and other and interest expense.

Financial position

Total assets were $16.0 billion at May 31, 2021 compared to $16.2 billion at August 31, 2020. The following is a discussion of significant changes in the Consolidated Statements of Financial Position since August 31, 2020.

Current assets decreased $92 million primarily due to a decrease in cash of $272 million and a decrease in the current portion of contract assets of $24 million, partially offset by increases in accounts receivables of $38 million, inventories of $4 million, other current assets of $36 million, and income taxes recoverable of $126 million. Cash decreased primarily due to the payment of $455 million in dividends, $336 million for share repurchases, as described below, and cash outlays for investing activities, partially offset by funds flow from operations. Refer to "Liquidity and capital resources" for more information.

Accounts receivable increased $38 million mainly due to timing, as the Company continues to migrate customers from two-month advance billing to one-month advance billing, and the impact of an $18 million capital project reimbursement accrual recorded in the period.

The current portion of contract assets decreased $24 million over the period due to a $12 million decrease in deferred Wireline costs as a result of lower onboarding promotional activity for new subscribers over the past year and a $12 million decrease due to a decrease in Wireless subscribers participating in the Company's discretionary wireless handset discount program over the past year. Under IFRS 15, up-front promotional offers, such as onboarding or switch credits, offered to new two-year value-plan customers are recorded as a contract asset and amortized over the life of the contract against future service revenues while the portion of the Wireless discount relating to the handset is applied against equipment revenue at the point in time that the handset is transferred to the customer while the portion relating to service revenue is recorded as a contract asset and amortized over the life of the contract against future service revenues.

Property, plant and equipment decreased $102 million as the amortization of capital and right-of-use assets exceeded the capital investments and additions to right-of-use assets in the period.

Current liabilities increased $72 million during the period primarily due to the reclassification of $300 million in Preferred Shares from equity to current liabilities as a result of the Company providing notice to holders of the Preferred Shares on May 28, 2021 that the Preferred Shares would be redeemed on June 30, 2021. Refer to "Liquidity and capital resources" for more information. This increase was partially offset by a $112 million decrease in accounts payable, a decrease in income taxes payable of $57 million, and a decrease of $59 million in current provisions.

Accounts payable and accrued liabilities decreased due to the timing of payments and fluctuations in various payables including capital expenditures and tax remittances. The decrease in current provisions was mainly due to a $35 million reduction to the interest expense provision, a $20 million provision release related to the CRTC decision on final aggregated TPIA rates and the payment of outstanding restructuring costs in the period.

Lease liabilities increased $9 million mainly due to $91 million in new lease liabilities, partially offset by principal repayments of $82 million in the period.

Shareholders' equity decreased $313 million mainly due to the reclassification of $300 million in Preferred Shares to a current liability as noted above. Retained earnings increased as the current period income of $734 million was greater than the dividends of $451 million and the impact of shares repurchased under the normal course issuer bid (NCIB) program of $207 million. Share capital decreased $406 million due to the impact of 14,783,974 Class B Shares repurchased under the terms of the Company's NCIB program, and the reclassification of all 12,000,000 issued and outstanding Preferred Shares to current liability, which were partially offset by the issuance of 569,213 Class B Shares under the Company's stock option plan. Accumulated other comprehensive loss decreased $24 million due to the remeasurement recorded on employee benefit plans in the period.

As at June 15, 2021, there were 476,449,262 Class B Shares, 10,012,393 Series A Shares, 1,987,607 Series B Shares, and 22,372,064 Class A Shares issued and outstanding. As at June 15, 2021, 2021, 7,597,890 Class B Shares were issuable on exercise of outstanding options. On June 30, 2021, all 12,000,000 issued and outstanding Preferred Shares were redeemed by the Company as noted above. Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Trading Symbols: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

Liquidity and capital resources

In the nine-month period ended May 31, 2021, the Company generated $781 million of free cash flow. Shaw used its free cash flow along with cash of $272 million and proceeds from the issuance of Class B Shares of $15 million to pay common share dividends of $449 million, repurchase $336 million in Class B Shares under the Company's NCIB program, pay $25 million in restructuring costs, and fund the net working capital change.

Debt structure and financial policy

The Company has an accounts receivable securitization program with a Canadian financial institution which allows it to sell certain trade receivables into the program. As at May 31, 2021, the proceeds of the sales were committed up to a maximum of $200 million (with $200 million drawn under the program as at May 31, 2021). The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables remain recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivable has no claim on any of the Company's other assets.

As at May 31, 2021, the net debt leverage ratio for the Company was 2.4x. Considering the prevailing competitive, operational and capital market conditions, the Board of Directors has determined that having this ratio in the range of 2.5x to 3.0x would be appropriate for the Company in the current environment. In addition, the terms of the Arrangement Agreement require Shaw to obtain Rogers' consent prior to incurring certain types of indebtedness.

The Company calculates net debt leverage ratio as follows(1):

(millions of Canadian dollars)	**May 31, 2021**	August 31, 2020
Short-term borrowings	**200**	200
Preferred shares classified as current liabilities	**300**	-
Current portion of long-term debt	**1**	1
Current portion of lease liabilities	**110**	113
Long-term debt	**4,549**	4,547
Lease liabilities	**1,169**	1,157
50% of outstanding preferred shares classified as equity	**-**	147
Cash and cash equivalents	**(491)**	(763)
(A) Net debt(2)	**5,838**	5,402
(B) Adjusted EBITDA(2)	**2,480**	2,391
(A/B) Net debt leverage ratio(3)	**2.4x**	2.3x

(1) The following contains a breakdown of the components in the calculation of net debt leverage ratio, which is a non-GAAP ratio.

(2) See “Non-GAAP and additional financial measures.”

(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies. See “Non-GAAP and additional financial measures” for further information about this ratio.

On November 2, 2020, the Company announced that it had received approval from the TSX to establish an NCIB program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

During the three and nine months ended May 31, 2021, the Company purchased 1,559,202 and 14,783,974 Class B Shares for cancellation for a total cost of approximately $36 million and $336 million, respectively, under the NCIB program. In connection with the announcement of the Transaction on March 15, 2021, the Company suspended share buybacks under its NCIB program.

Shaw’s credit facilities are subject to customary covenants which include maintaining minimum or maximum financial ratios.

	Covenant as at May 31, 2021	**Covenant Limit**
Shaw Credit Facilities		
Total Debt to Operating Cash Flow(1) Ratio	1.89:1	< 5.00:1
Operating Cash Flow(1) to Fixed Charges(2) Ratio	11.17:1	> 2.00:1

(1) Operating Cash Flow, for the purposes of the covenants, is calculated as net earnings before interest expense, depreciation, amortization, restructuring, and current and deferred income taxes, excluding profit or loss from investments accounted for on an equity basis, less payments made with regards to lease liabilities for the most recently completed fiscal quarter multiplied by four, plus cash dividends and other cash distributions received in the most recently completed four fiscal quarters from investments accounted for on an equity basis.

(2) Fixed Charges are broadly defined as the aggregate interest expense, excluding the interest related to lease liabilities, for the most recently completed fiscal quarter multiplied by four.

As at May 31, 2021, Shaw is in compliance with these covenants and based on current business plans, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants over the life of the borrowings which currently mature in December of 2024.

On May 28, 2021, the Company announced the redemption of all of its issued and outstanding Preferred Shares in accordance with their terms (as set out in the Company’s articles) on the Redemption Date at a price equal to $25.00 per Preferred Share, less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These were the final dividends on the Preferred Shares, which were paid separately from the aggregate Redemption Price and in the usual manner. Following payment of the June 30, 2021 dividends, there were no accrued and unpaid dividends on the Preferred Shares.

As at May 31, 2021, the Company had $491 million of cash on hand and its $1.5 billion bank credit facility was fully undrawn.

Based on the aforementioned financing activities, available credit facilities and forecasted free cash flow, the Company expects to have sufficient liquidity to fund operations, obligations and working capital requirements, including maturing debt, during the upcoming year. The terms of the Arrangement Agreement require that the Company maintain sufficient liquidity to pay an $800 million termination fee payable by Shaw in certain circumstances.

Cash Flow

Operating Activities

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Change %	**2021**	2020	Change %
Funds flow from operations	**708**	541	30.9	**1,735**	1,487	16.7
Net change in non-cash balances related to operations	**(148)**	47	>(100.0)	**(402)**	(199)	>(100.0)
	560	588	(4.8)	**1,333**	1,288	3.5

For the three months ended May 31, 2021, funds flow from operating activities decreased over the comparable period in fiscal 2020 primarily due to a large decrease in the net change in non-cash balances related to operations partially offset by an increase in the funds flow from operations. The net change in non-cash balances related to operations fluctuated over the comparative period due to changes in accounts receivable, inventory and other current asset balances, and the timing of payments of current income taxes payable and accounts payable and accrued liabilities.

Investing Activities

	Three months ended May 31,			Nine months ended May 31,		
(millions of Canadian dollars)	**2021**	2020	Decrease	**2021**	2020	Decrease
Cash used in investing activities	**(260)**	(261)	(1)	**(746)**	(865)	(119)

For the three months ended May 31, 2021, the cash used in investing activities was consistent with the comparable period in fiscal 2020.

Financing Activities

The changes in financing activities during the comparative periods were as follows:

(millions of Canadian dollars)	Three months ended May 31, 2021	Three months ended May 31, 2020	Nine months ended May 31, 2021	Nine months ended May 31, 2020
Increase in short-term borrowings [note 7]	**-**	(5)	**-**	210
Issuance of long-term debt	**-**	500	**-**	1,300
Repayment of long-term debt	**(1)**	-	**(1)**	(2,068)
Debt arrangement costs	**-**	(4)	**-**	(14)
Payment of lease liabilities [note 6]	**(24)**	(25)	**(82)**	(82)
Issue of Class B Shares [note 10]	**14**	1	**15**	6
Purchase of Class B Shares	**(36)**	(35)	**(336)**	(140)
Dividends paid on Class A Shares and Class B Shares	**(148)**	(152)	**(449)**	(421)
Dividends paid on Preferred Shares	**(2)**	(3)	**(6)**	(7)
Payment of distributions to non-controlling interests	**-**	-	**-**	(2)
	(197)	277	**(859)**	(1,218)

Contractual Obligations

There has been no material change in the Company’s contractual obligations, including commitments for capital expenditures, between August 31, 2020 and May 31, 2021.

Accounting standards

The MD&A included in the Company’s August 31, 2020 Annual Report outlined critical accounting policies, including key estimates and assumptions that management has made under these policies, and how they affect the amounts reported in the 2020 Annual Consolidated Financial Statements. The MD&A also describes significant accounting policies where alternatives exist. See “Critical Accounting Policies and Estimates” in the Company’s MD&A for the year ended August 31, 2020. The condensed interim Consolidated Financial Statements follow the same accounting policies and methods of application as the 2020 Annual Consolidated Financial Statements.

Related party transactions

The Company’s transactions with related parties are discussed in its MD&A for the year ended August 31, 2020 under “Related Party Transactions” and under Note 29 of the Consolidated Financial Statements of the Company for the year ended August 31, 2020.

There has been no material change in the Company’s transactions with related parties between August 31, 2020 and May 31, 2021.

Financial instruments

There has been no material change in the Company’s risk management practices with respect to financial instruments between August 31, 2020 and May 31, 2021. See “Known Events, Trends, Risks and Uncertainties – Interest Rates, Foreign Exchange Rates and Capital Markets” in the Company’s MD&A for the year ended August 31, 2020 and the section entitled “Financial Instruments” under Note 30 of the Consolidated Financial Statements of the Company for the year ended August 31, 2020.

Internal controls and procedures

Details relating to disclosure controls and procedures, and internal control over financial reporting (ICFR), are discussed in the Company's MD&A for the year ended August 31, 2020 under "Certification." As at May 31, 2021, there have been no changes in the Company's ICFR that have materially affected, or are reasonably likely to materially affect, the Company's ICFR in fiscal 2021.

Risks and uncertainties

The significant risks and uncertainties affecting the Company and its business are discussed in the Company's MD&A for the year ended August 31, 2020 under "Known Events, Trends, Risks and Uncertainties." The following is a list of the significant risks and uncertainties since that date.

Risks Related to the Transaction

The completion of the Transaction is subject to the satisfaction or waiver of several conditions precedent

The completion of the Transaction is subject to a number of conditions precedent, some of which are outside of the control of the Company and Rogers, including receipt of the Key Regulatory Approvals, there not having occurred a Material Adverse Effect or Purchaser Material Adverse Effect (as such terms are defined in the Arrangement Agreement), and the satisfaction of certain other customary closing conditions. There can be no certainty, nor can the Company or Rogers provide any assurance, that all conditions precedent to the Transaction will be satisfied or waived, nor can there be any certainty of the timing of their satisfaction or waiver. In addition, shareholders are advised that the condition relating to the occurrence of a Purchaser Material Adverse Effect is enforceable by, and is for the benefit of, the Shaw Family Living Trust. Accordingly, the Shaw Family Living Trust, which may have interests in the Transaction different from, or in addition to, those of other shareholders, has the right to prevent or delay the completion of the Transaction should it determine that a Purchaser Material Adverse Effect has occurred.

If, for any reason, the Transaction is not completed or its completion is materially delayed and/or the Arrangement Agreement is terminated, the market price of the Shares may be materially adversely affected. In such circumstances, the Company's business, financial condition or results of operations could also be subject to various material adverse consequences. In addition, if the Transaction is not completed, in certain circumstances, the Company may be required to pay a termination fee of $800 million to Rogers, the result of which could have a material adverse effect on the Company's business, financial position and results of operations and its ability to fund growth prospects and current operations.

The Key Regulatory Approvals necessary to complete the Transaction may not be obtained or may only be obtained after substantial delay

To complete the Transaction, each of the Company and Rogers must make certain filings with and obtain certain consents and approvals from certain governmental and regulatory authorities. In particular, the Company and Rogers have not yet obtained the Key Regulatory Approvals, all of which are required to complete the Transaction. In addition, governmental or regulatory agencies could deny permission for, or seek to block or challenge the Transaction or the transfer or deemed transfer of specific assets, including spectrum licenses, or impose material conditions relating to the Arrangement or any such transfer. If any one of the Key Regulatory Approvals is not obtained or any applicable law is in effect which makes the consummation of the Transaction illegal, the Transaction will not be completed.

In addition, a substantial delay in obtaining the Key Regulatory Approvals could result in the Transaction not being completed. In particular, if the Transaction is not completed by March 15, 2022 (subject to an extension of up to 90 days if required to obtain the Key Regulatory Approvals), either Shaw or Rogers may terminate the Arrangement Agreement, in which case the Transaction will not be completed.

Under certain circumstances, if the Key Regulatory Approvals are not obtained or any law (that relates to one or more of the Key Regulatory Approvals or the *Competition Act* (Canada)) is in effect which would make the consummation of the Transaction illegal and the failure to obtain the Key Regulatory Approvals is not caused by, and is not a result of, the failure by the Company to perform in all material respects any of its covenants or agreements under the Arrangement Agreement, then Rogers is obligated to pay the $1.2 billion reverse termination amount and holders of the Class A Shares and Class B Shares will not receive the consideration under the Arrangement Agreement (as the Transaction will not be completed).

Federal election could impact the regulatory reviews of the Transaction

The potential for a federal election to be called before the expected closing of the Transaction may have an unpredictable impact on the timing and outcome of the regulatory reviews of the Transaction.

The Arrangement Agreement may be terminated in certain circumstances

The Transaction may be terminated by the Company or Rogers in certain circumstances, in which case the Transaction will not be completed. Accordingly, there is no certainty, nor can the Company provide any assurance, that the Arrangement Agreement will not be terminated by the Company or Rogers prior to the completion of the Transaction. The failure to complete the Transaction could materially negatively impact the market price of Shaw's securities. Moreover, if the Arrangement Agreement is terminated and the Company's Board determines to pursue another merger or business combination, there is no assurance that the Company's Board will be able to find a party willing to pay an equivalent or greater price for all of Shaw's issued and outstanding Class A Shares and Class B Shares than the price to be paid by Rogers pursuant to the Transaction.

The failure to complete the Transaction could negatively impact the Company and have a material adverse effect on the current and future operations, financial condition and prospects of the Company

If the Transaction is not completed for any reason, there are risks that the announcement of the Transaction and the dedication of substantial resources of the Company to the completion thereof could have a negative impact on the Company's current business relationships (including with future and prospective employees, customers, suppliers and partners) and could have a material adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. In addition, failure to complete the Transaction for any reason could materially negatively impact the market price of Shaw's securities.
The entering into of the Arrangement Agreement may also preclude the Company from participating in any auction by ISED for wireless spectrum licenses.

On April 6, 2021, ISED published its list of applicants to participate in the 3500 MHz spectrum auction, which commenced on June 15, 2021. The list confirms that Shaw has elected not to participate in the auction.

If the Transaction is not completed, the inability of the Company to participate in any wireless spectrum auction and to acquire licenses thereunder could have a material adverse effect on the current and future operations, financial condition and prospects of the Company.

The Company will incur significant costs and, in certain circumstances, may be required to pay a Termination Fee

Certain costs relating to the Transaction, such as legal, accounting, tax and financial advisory fees, must be paid by the Company even if the Transaction is not completed. In addition, if the Transaction is not completed for certain reasons, the Company may be required to pay a termination fee of $800 million to Rogers, the result of which could have a material adverse effect on the Company's business, financial position and results of operations and its ability to fund growth prospects and current operations.

The Transaction may divert the attention of management of the Company, impact the Company's ability to attract or retain key personnel or impact the Company's third party business relationships

The Transaction could cause the attention of the Company's management to be diverted from the day-to-day operations of the Company. These disruptions could be exacerbated by a delay in the completion of the Transaction and could have an adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. Because the completion of the Transaction is subject to uncertainty, officers and employees of the Company may experience uncertainty about their future roles with the Company, which may adversely affect the Company's ability to attract or retain key management and personnel in the period until the completion or termination of the Transaction.

In addition, third parties with which the Company currently has business relationships or may have business relationships in the future, including industry partners, regulators, customers and suppliers, may experience uncertainty associated with the Transaction, including with respect to current or future relationships with the Company or Rogers. Such uncertainty could have a material and adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company.

The Arrangement Agreement contains certain restrictions on the ability of the Company to conduct its business

Under the Arrangement Agreement, the Company must generally use its reasonable best efforts to conduct its business in the ordinary course and, prior to the completion of the Transaction or the termination of the Arrangement Agreement, the Company is subject to certain covenants which restrict it from taking certain actions without the prior consent of Rogers and which require it to take certain other actions. In either case, such covenants may delay or prevent the Company from pursuing business opportunities that may arise or preclude actions that would otherwise be advisable if the Company were to remain a standalone entity.

The financing of the Transaction

Although the Arrangement Agreement does not contain a financing condition and Rogers has received the debt commitment letter to provide for the debt financing in order to finance the Transaction, the obligation of the lenders under the debt commitment letter to provide the debt financing is subject to certain limited conditions. In the event that the Transaction cannot be completed due to the failure of Rogers to obtain financing required to close the Transaction either because the limited conditions to the financing are not satisfied or other events arise which prevent Rogers from consummating the Debt Financing, the Company expects that Rogers may be unable to fund the Consideration required to complete the Arrangement, in which case Rogers will be required to pay a reverse termination fee of $1.2 billion to the Company and the holders of the Class A Shares and Class B Shares will not receive the consideration under the Arrangement Agreement (as the Transaction will not be completed).

Government regulations and regulatory developments

See our MD&A in the Annual Report for the year ended August 31, 2020 for a discussion of the significant regulations that affected our operations as of October 30, 2020. The following is a list of the significant regulatory developments since that date.

For a discussion of the regulatory approval processes related to the Transaction, see "Introduction – Shaw and Rogers Transaction" and "Risks and uncertainties – Risks Related to the Transaction – *The Key Regulatory Approvals necessary to complete the Transaction may not be obtained or may only be obtained after substantial delay* and a *Federal election could impact the regulatory reviews of the Transaction*" of this MD&A.

Broadcasting Act

Potential for requirements that entrench or augment regulatory asymmetry

On November 3, 2020, the Minister of Heritage introduced a bill to amend the *Broadcasting Act* ("Bill C-10"). Bill C-10 will form the basis of a new regulatory regime applicable to various classes of service providers, including cable and direct-to-home satellite (DTH) services, as well as online broadcasting services. Bill C-10, while subject to amendment pursuant to the parliamentary process, does not currently introduce material new obligations applicable to or fees payable by the Company's cable, DTH, Satellite Relay Distribution or digital media services. It would, however, establish a regulatory framework for online services that does not require licensing and may ultimately lead to a lighter set of regulatory obligations for such services as compared to licensees (including cable and DTH services). The details with respect to regulatory obligations applicable to both licensees and online undertakings will be determined by the CRTC, which will – subsequent to any royal assent to Bill C-10 – engage in one or more proceedings to align Canadian broadcasting regulation with the amended *Broadcasting Act.* Furthermore, the Minister of Heritage has indicated that the CRTC's subsequent regulatory processes will be subject to a Direction by the Governor-in-Council that sets out the Government's expectations with respect to how the newly-incorporated amendments to the *Broadcasting Act* should be reflected in regulation, which Direction may also specify the requirement that new regulations be brought into force within a relatively short timeframe. On February 16, 2021, Bill C-10 passed Second Reading and was referred to the Standing Committee on Canadian Heritage for study. On June 14, 2021, the Standing Committee presented its report on Bill C-10 with amendments in the House of Commons, and on June 22, 2021, the House of Commons passed the Bill, which is now before, and requires passing by, the Senate. The implementation of new regulatory measures in connection with Bill C-10, alone or in combination with the maintenance of existing regulatory measures applicable to the Company's cable and DTH services, could impact the Company's cable and DTH services if regulatory fees and obligations are not applied symmetrically as between licensed and unlicensed entities.

Telecommunications Act

Telecom Order CRTC 2019-288

On August 15, 2019, the CRTC issued Telecom Order 2019-288 (the "Order"), which set Shaw's final wholesale high-speed access (HSA) service rates. The final rates were significantly lower than the interim rates set in October 2016, and retroactive to January 31, 2017. For a detailed summary regarding all proceedings and decisions issued between August 15, 2019 and October 30, 2020 related to the Company's multiple routes of appeal of the Order, see "Government Relations and Regulatory Developments – Third Party Internet Access" of the Company's Annual Report for the year ended August 31, 2020.

On November 12, 2020, the Company, together with Cogeco, Eastlink, Rogers and Videotron (collectively, the "Cable Carriers"), filed an application with the Supreme Court of Canada (SCC), seeking leave to appeal the Federal Court of Appeal's (FCA) decision dated September 10, 2020 denying the Company's appeal of the Order. On February 25, 2021, the application for leave to appeal was dismissed.

On May 27, 2021, the CRTC released its decision in the Cable Carriers' application to review and vary the rates set by the Order ("TD 2021-181"). The CRTC determined that there was substantial doubt as to the correctness of the aggregated wholesale HSA service rates set by the Order and approved on a final basis the interim rates set in October 2016. On May 28, 2021, TekSavvy Solutions Inc. ("TekSavvy") petitioned to the Governor in Council (GIC) to vary TD 2021-181, asking the GIC to finalize the rates set by the Order and direct all facilities-based wholesale service providers to immediately remit all retroactive payments in connection with the Order's rates. On June 28, TekSavvy also filed a motion for leave to appeal TD 2021-181 to the FCA and has requested that the appeal be heard on an expedited basis. If leave is granted, TekSavvy will seek an order from the FCA that TD 2021-181 is quashed, and the 2019 Order is reinstated or, in the alternative, that the matter is remitted to the CRTC for redetermination. If the GIC or the FCA were to intervene in any way with the effect of decreasing the aggregated wholesale HSA service rates set by TD 2021-181, this could significantly reduce the amount that the Company can charge for aggregated wholesale HSA services and negatively impact the Company's broadband Wireline revenues and investments, as well as its ability to compete with Resellers and other facilities-based HSA providers.

CRTC Wireless Review

In February 2019, the CRTC initiated its review of the regulatory framework for mobile wireless services and held a public hearing in February 2020. The Commission reviewed competition in the retail market, including potential regulatory intervention, such as new retail policies and mandated low-cost data-only plans, and wholesale wireless regulation, including wholesale access for mobile virtual network operators (MVNOs), and whether there is any need to make changes to the wholesale roaming policy.

In April 2021, the CRTC issued Wireless Review decision, Telecom Regulatory Policy CRTC 2021-130 ("TRP 2021-130"). In it, the CRTC rejected a broad MVNO regime and instead mandated wholesale MVNO access on the incumbent national carriers' networks only for carriers holding a spectrum licence in a given service area. The CRTC directed the incumbents to file proposed terms and conditions for the MVNO service by July 14, 2021. Rates will be determined through commercial negotiation, with recourse to CRTC Final Offer Arbitration if negotiations reach an impasse. The CRTC also held that the incumbent carriers would be required to provide seamless roaming as part of their mandated domestic wholesale roaming services used by the Company and other carriers as of April 15, 2022 and confirmed that the wholesale roaming policy applies to 5G networks. The incumbents' wholesale roaming tariffs will be reviewed to ensure the rates reflect the underlying costs associated with seamless roaming following its implementation. At that time, the CRTC will also assess the underlying costs of wholesale roaming on 5G networks. TRP 2021-130 did not mandate specific retail services but set clear expectations for the offer and promotion by the incumbent national carriers of low-cost, emergency use, and occasional use plans at specified rates. The CRTC expects these plans to be offered by July 14, 2021. Finally, the CRTC determined that the *Telecommunications Act* does not give it the jurisdiction to adjudicate disputes concerning access to public places for the purpose of constructing, maintaining and operating mobile wireless transmission facilities. On May 14, 2021, TELUS filed for leave to appeal the CRTC's determinations related to seamless roaming and jurisdiction over access to public places relating to wireless facilities.

Compliance and Enforcement and Telecom Notice of Consultation CRTC 2021-9

On January 13, 2021, the CRTC initiated a proceeding to develop a network-level blocking framework to limit botnet traffic targeting Canadians. Shaw has recommended a limited role for the CRTC. If, however, the CRTC implements more onerous obligations, this could introduce additional costs to the Company and a risk of penalties in connection with any non-compliance.

36-Month Device Financing

On March 4, 2021, the CRTC released its decision regarding 36-month device financing plans (also referred to as equipment installment plans), in which it confirmed that plans longer than 24-months violate the Wireless Code. The CRTC also ordered all wireless service providers to update their contracts, sales, training material and any other documentation, to ensure that the offering of device financing plans complies with the Wireless Code's limitation on rules applicable to contract length and early cancellation fees. The Company has never offered device financing plans longer than 24-months.

Radiocommunication Act

Wireless Spectrum Licences

In May 2021, ISED released its decision allowing future mobile use in the 3800 MHz band (3650-3900 MHz). The band is currently used primarily to provide fixed satellite services. Existing satellite users of the spectrum in remote, satellite dependent areas of the country will be permitted to continue to operate across the band, while those in urban areas will be consolidated in the 4000-4200 MHz spectrum range and subject to a transition process that will be complete in March 2025. The details of the licensing framework for the band will be the subject of a future proceeding.

In May 2021, ISED also released a decision confirming its intention to make 1200 MHz of spectrum in the 6 GHz band (5925-7125 MHz) available for Wi-Fi and other unlicensed uses. Technical standards for equipment operating in the band must be developed before the spectrum becomes available for use.

Copyright Act

Interpretation of s.2.4(1.1)

In June 2020, the Federal Court of Appeal overturned the Copyright Board's interpretation of the scope and meaning of the "making available" provision (section 2.4(1.1) of the *Copyright Act*). The Copyright Board determined that section 2.4(1.1) expands the scope of the performance right and the Society of Composers, Authors and Music Publishers of Canada's (SOCAN) entitlement to royalties. On November 12, 2020, SOCAN and Music Canada (collectively, the "Applicants") filed an application for leave to appeal to the SCC. On April 21, 2021, leave to appeal was granted to the Applicants. If the SCC restores the Copyright Board's interpretation, it could lead to new claims by rights holders in connection with Company technologies that facilitate downloading.

Judicial Review of the Distant Signal Retransmission Tariff Rates (2014-2018)

On December 18, 2018, the Copyright Board released a rate decision for the Distant Signal Retransmission Tariff for the past tariff period of 2014-2018, inclusive, which introduced a rate increase that applied retroactively, and established an interim tariff for 2019 based on the 2018 rate. Both the Copyright Collective of Canada (the "Collectives") and Objectors filed a Notice of Application for judicial review with the FCA on November 4, 2019. The FCA hearing in the judicial review was held on March 1-2, 2021. If the Collectives succeed in the judicial review, the Company could become subject to significantly increased royalty rates for the 2014-2018 period, pursuant to either the FCA's decision in the judicial review or any redetermination of the rates by the Copyright Board.

Personal Information Protection and Electronic Documents Act (PIPEDA)

On November 17, 2020, the Minister of Innovation, Science and Industry introduced Bill C-11 – *the Digital Charter Implementation Act* ("DCIA"), which, if passed and brought into force, will repeal and replace PIPEDA. Bill C-11 is comprised of two parts: (1) the *Consumer Privacy Protection Act* (the "CPPA"), which establishes protections and parameters for the collection, use and disclosure of personal information ("PI"), including enhanced rights for individuals with respect to their privacy and data; enhanced accountabilities for organizations with respect to consent gathering and data usage; and significant penalties (up to 5% of an organization's gross revenue the previous year) for breaches of rights and responsibilities; and (2) the *Personal Information and Data Protection Tribunal Act* (the "PIDPTA"), which creates a new administrative tribunal to oversee enforcement of the CPPA. As of June 17, 2021, Bill C-11 remains in Second Reading before the House of Commons.

Changes to privacy laws and regulations resulting from the passage of Bill C-11 will require the Company to incur costs to adjust its policies and practices related to privacy, as well as data collection, management, disposal and access practices. Such changes could: result in significant new costs payable by the Company to ensure compliance; limit the Company's ability to utilize data in support of its business, as well as preserve and expand its customer base; and expose the Company to the risk of significant penalties and claims (including pursuant to a proposed right of private action) in connection with any non-compliance. The Government will be consulting on Bill C-11, and the timing of its coming into force will be set at the time the legislation is passed.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2021 and May 31, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators, including the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2021 and May 31, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three and nine months ended May 31, 2021 were authorized for issue by the Board of Directors on June 30, 2021.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2020 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2020.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2021 and May 31, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Revenue				
Wireline	**1,080**	1,063	**3,190**	3,193
Wireless	**298**	252	**951**	872
	1,378	1,315	**4,141**	4,065
Intersegment eliminations	**(3)**	(3)	**(9)**	(7)
	1,375	1,312	**4,132**	4,058
Adjusted EBITDA[(1)]				
Wireline	**527**	508	**1,599**	1,544
Wireless	**115**	101	**287**	253
	642	609	**1,886**	1,797
Restructuring costs	**(1)**	(14)	**(14)**	(14)
Amortization	**(300)**	(302)	**(909)**	(905)
Operating income	**341**	293	**963**	878
Current taxes[(2)]				
Operating	**39**	18	**117**	72
Other/non-operating	**(127)**	1	**(125)**	6
	(88)	19	**(8)**	78

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

(2) Current taxes are lower for the three and nine months ended May 31, 2021 due mainly to a revision to liabilities for uncertain tax positions that became statute barred in the period of $125.

Long-term	81	-	-	81
Balance as at May 31, 2021	**81**	**2**	**40**	**123**

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $12 has been paid in fiscal 2021 relating to these initiatives. The remaining costs are expected to be paid out within the next 8 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $1 in the third quarter, $1 in the second quarter and $12 in the first quarter primarily related to severance and employee related costs, of which $13 has been paid as at May 31, 2021. The remaining costs are expected to be paid within the next 8 months.

(3) During the third quarter of fiscal 2021, the Company recorded a $20 reversal following the CRTC decision on final aggregated Third Party Internet Access rates and a $35 reduction of tax related interest expense.

Series A and B Preferred Shares

On May 28, 2021, the Company announced that it intends to redeem all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares", and together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) on June 30, 2021 (the "Redemption Date") at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld.

As at May 31, 2021, there are 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price payable by Shaw to redeem the Preferred Shares will be $300 million. As notice was provided to the holders of the Series A Shares and Series B Shares on May 28, 2021, these amounts have been reclassified from share capital to current liabilities as at May 31, 2021.

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These will be the final dividends on the Preferred Shares. Upon payment of the June 30, 2021 dividends, there will be no accrued and unpaid dividends on the Preferred Shares as at the Redemption Date.

Subsequent to quarter-end, both the aggregate Redemption Price of $300 and the final dividends on the Preferred Shares were paid by Shaw on the Redemption Date.

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

During the nine months ended May 31, 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 under the NCIB program. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $207 and was charged to retained earnings.

In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

[all amounts in millions of Canadian dollars, except share and per share amounts]

11. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Numerator for basic and diluted earnings per share ($)				
Net income	**354**	184	**734**	513
Deduct: dividends on Preferred Shares	**(2)**	(3)	**(6)**	(7)
Net income attributable to common shareholders	**352**	181	**728**	506
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	513	**505**	516
Effect of dilutive securities [(1)]	**2**	-	**-**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	513	**505**	516
Basic earnings per share ($)				
Basic	**0.71**	0.35	**1.44**	0.98
Diluted	**0.70**	0.35	**1.44**	0.98

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and nine months ended May 31, 2021, nil (May 31, 2020 – 7,523,834) and 4,072,443 (May 31, 2020 – 6,619,109) options were excluded from the diluted earnings per share calculation, respectively.

12. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	Contract Liabilities
Balance as at August 31, 2020	172	225

[all amounts in millions of Canadian dollars, except share and per share amounts]

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at May 31, 2021.

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,644	716	136	71	22	2	2,591
Wireless	373	114	-	-	-	-	487
Total	**2,017**	**830**	**136**	**71**	**22**	**2**	**3,078**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

13. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Employee salaries and benefits[1]	**183**	166	**490**	483
Purchase of goods and services	**551**	551	**1,770**	1,792
	734	717	**2,260**	2,275

(1) For the three and nine months ended May 31, 2021, employee salaries and benefits include $1 (2020 - $14) and $14 (2020 - $14) in restructuring costs respectively.

14. OTHER GAINS (LOSSES)

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020

Debt redemption penalty	**–**	–	**–**	(17)
Other [2]	**(4)**	7	**(8)**	4
	(21)	7	**4**	(15)

(1) The Company has incurred a number of Transaction related advisory, legal, financial, and other professional fees in connection with the proposed acquisition of Shaw by Rogers. As these costs do not relate to ongoing operations, they have been classified as non-operating expenses. Please refer to Note 1 for further details on the Transaction.

(2) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

17. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	May 31, 2021		August 31, 2020	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**4,550**	**5,215**	4,548	5,613

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

[all amounts in millions of Canadian dollars, except share and per share amounts]

18. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2021 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2021 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2021 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2021 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2021 do not represent events or changes in circumstance that would be indicative of impairment at May 31, 2021.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2021, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal adjusted EBITDA multiple
Cable	5.0%	0.0%	9.7x
Satellite	6.0%	-8.0%	6.5x
Wireless	6.0%	1.0%	6.1x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal adjusted EBITDA multiple
Cable	16.4%	13.8%	1.9%
Satellite	6.5%	4.2%	3.6%
Wireless	21.9%	13.5%	2.1%

NEWS RELEASE

Shaw Announces Fourth Quarter and Full Year Fiscal 2021 Results

- **Shaw delivers fourth quarter and full year financial performance and subscriber activity in line with expectations**
- **Fiscal 2021 consolidated results include adjusted EBITDA[1] growth of 4.6% and free cash flow[1] of $961 million**
- **Fiscal 2022 priorities include supporting the closure of the transaction with Rogers and planning for the benefits that the combined entity will provide to Canadians**

Calgary, Alberta (October 29, 2021) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended August 31, 2021. Consolidated revenue increased 2.1% year-over-year to $1.38 billion, adjusted EBITDA increased 3.4% year-over-year to $614 million and net income increased 44% to $252 million.

Fiscal 2021 consolidated revenue increased 1.9% year-over-year to $5.51 billion and adjusted EBITDA increased 4.6% year-over-year to $2.50 billion. Fiscal 2021 results include incremental Wireline Consumer revenue of approximately $20 million related to the release of a provision following the Canadian Radio-television and Telecommunications Commission (CRTC) decision on final aggregated Third Party Internet Access (TPIA) rates and higher equity-based compensation costs of approximately $24 million due to the significant increase in Shaw's share price following the Rogers Transaction announcement on March 15, 2021. In addition, fiscal 2021 adjusted EBITDA results include a reduction in bad debt expense compared to the prior periods of approximately $10 million in the fourth quarter and approximately $28 million for the year as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables.

COVID-19 continues to significantly impact Canadians and economies around the world as we experience new waves and variants of the virus. The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, reliable connectivity for our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. In fiscal 2021, Shaw's networks proved to be resilient and performed well despite the increase in usage and extended peak hours resulting from the impacts of COVID-19.

While the financial impacts from COVID-19 in fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves/variants. Shaw Business, which primarily serves the small and medium sized market, remains particularly vulnerable to COVID-19 related restrictions, including mandated business closures, capacity restrictions or further social distancing measures.

[1] Adjusted EBITDA and free cash flow are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standardized meanings, and therefore may not be a reliable way to compare us to other companies. Additional information about these measures, including quantitative reconciliations to the most directly comparable financial measures in the Company's Consolidated Financial Statements, is included in "Non-GAAP and additional financial measures" in this press release.

"This past year and a half has seen a number of significant events unfold that will undeniably shape and strengthen our industry and communities that we serve. While the COVID-19 pandemic continues across the country, strong and ubiquitous connectivity has never been more essential. Our customers increasingly rely on these services, particularly as technology continues to evolve. To deliver a seamless connectivity experience in the fast-approaching 5G era, we announced our combination with Rogers on March 15, 2021, followed by resounding support from our Class A and Class B shareholders at the special meeting to approve the combination. We recognize that we can do so much more by coming together. Canadians, regardless of where they reside, need access to these vital services which requires significant ongoing investment, supported by a steady regulatory framework. Throughout the extraordinary change we have faced, the entire team at Shaw executed on our fiscal 2021 plan, ensuring that we continue to meet the needs of our customers. In the months ahead, we remain committed to delivering exceptional customer experiences, investing in the strength of our networks and continued focus on execution of our strategic business priorities. As previously stated publicly, we reiterate our continued commitment to work with Rogers to close the transaction and it is not appropriate for Shaw to comment on recent events at Rogers," said Brad Shaw, Executive Chair & Chief Executive Officer.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. As at March 13, 2021, when the Arrangement Agreement was signed, the value of the consideration attributable to the Class A Shares and Class B Shares held by the Shaw Family Shareholders (calculated using the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021) was equivalent to $40.50 per share.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

On June 30, 2021 (the "Redemption Date"), the Company redeemed all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares" and, together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld. On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the CRTC in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Fourth Quarter Fiscal 2021

In the fourth quarter, the Company added approximately 60,500 new Wireless customers. Postpaid net additions of approximately 48,100 in the quarter were driven by the continued momentum of Shaw Mobile. Wireless service revenue growth of 10.4% is due to continued subscriber growth, partially offset by lower ARPU[2]. As the Company continues to scale its lower revenue Shaw Mobile customer base, fourth quarter Wireless ARPU decreased 5.7% from the prior year period to $37.39; however, an increase in customers signing up for bundled offerings and Internet migration to faster speed tiers continues to support Internet revenue growth. Wireless postpaid churn[3] of 1.49% improved approximately 8-basis points from the fourth quarter of fiscal 2020. In fiscal 2021, the Company added approximately 295,000 Wireless customers bringing its total customer base to over 2.1 million.

In the quarter, Consumer RGU[4] losses of approximately 50,000 improved over the prior year period, led by Internet RGU additions of approximately 5,100 as customers continue to bundle their Internet and Wireless service together. Fourth quarter Wireline revenue was in-line with the prior year at $1.06 billion and Wireline adjusted EBITDA decreased 0.4% to $508 million.

(1) See "Non-GAAP and additional financial measures" for more information about these non-GAAP financial measures.
(2) Adjusted EBITDA margin is a non-GAAP ratio. Adjusted EBITDA margin is not a standardized measure under IFRS and may not be a reliable way to compare us to other companies. Additional information about this measure is included in "Non-GAAP and additional financial measures" in this press release.

Fourth quarter Wireless revenue increased 9.2% to $321 million and adjusted EBITDA of $106 million increased 26.2% year-over-year. Wireless service revenue for the three and twelve-month periods increased 10.4% and 9.3% respectively, to $233 million and $891 million over the comparable periods in fiscal 2020 due to an increased subscriber base, including significant Shaw Mobile additions. Wireless equipment revenue for the three and twelve-month periods increased 6.0% and 8.5% respectively, to $88 million and $381 million over the comparable periods in fiscal 2020. Fourth quarter ARPU decreased 5.7% to $37.39 reflecting Shaw Mobile customer growth. For the full year, ARPU of $37.35 decreased 4.1% over the prior year.

[2] ARPU is a supplementary financial measure which may not be comparable to similar measures presented by other issuers. Additional information about this supplementary financial measure is included in "Key Performance Drivers" in this press release.
[3] Wireless postpaid churn is a metric used to measure the Company's success in retaining Wireless subscribers. Additional information about this metric is included in "Key Performance Drivers" in this press release.
[4] RGUs is a metric used to measure the count of subscribers in the Company's Wireline and Wireless segments. Additional information about this metric is included in "Key Performance Drivers" in this press release.

For the twelve-month period, Wireless revenue grew 9.1% to $1.27 billion and adjusted EBITDA of $393 million improved 16.6%.

Wireline RGUs declined by approximately 45,400 in the quarter compared to a loss of approximately 71,200 in the fourth quarter of fiscal 2020. The current quarter was led by a gain in Consumer Internet RGUs of approximately 5,100 while offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 50,000 in the aggregate, partially offset with the addition of 4,600 Business RGUs. In fiscal 2021, the Company continued to focus on profitable Internet growth and retention, primarily through bundling with its wireless offerings.

Fourth quarter Wireline revenue of $1.06 billion and adjusted EBITDA of $508 million were in-line with the prior year. Consumer revenue of $910 million decreased 0.8% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue of $149 million increased 6.4% year-over-year with Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector.

For the twelve-month period, Consumer revenue decreased 0.5% to $3.66 billion and Business revenue increased 3.0% to $584 million resulting in Wireline revenue of $4.25 billion, which was approximately flat compared to the prior year. Adjusted EBITDA for the same period of $2.10 billion increased 2.6%.

Capital expenditures in the fourth quarter of $287 million compared to $307 million in the prior year. Wireline capital spending increased by approximately $29 million primarily due to higher investments in combined upgrades, enhancements and replacement categories as well as an increase in new housing development. Wireless spending of $66 million decreased by approximately $49 million year-over-year primarily due to lower planned investment in the quarter. In fiscal 2021, and in aggregate, consolidated capital expenditures of approximately $1 billion decreased 9.7% from the prior year.

Free cash flow for the quarter of $180 million compared to $152 million in the prior year. The increase was largely due to higher adjusted EBITDA and lower capital expenditures. Free cash flow for fiscal 2021 of $961 million was $214 million or approximately 29% higher than the prior year due to growth in adjusted EBITDA, lower capital expenditures and a $35 million reduction of tax related interest expense.

Net income for the fourth quarter of fiscal 2021 of $252 million compared to $175 million in the fourth quarter of fiscal 2020. Net income for fiscal 2021 of $986 million was $298 million higher than the prior year primarily due to the $109 million increase in consolidated adjusted EBITDA and $35 million reduction in interest expense as discussed above and a $133 million decrease in income taxes in fiscal 2021 compared to fiscal 2020. Tax expense declined in fiscal 2021 mainly due to a $125 million revision to liabilities for uncertain tax positions that became statute barred in 2021 as well as the recognition of a $78 million tax benefit associated with previously unrecognized tax losses in the fourth quarter of 2021 driven by management's expectations that sufficient future taxable profit will be available to fully utilize such losses, offset by the effect of higher pre-tax income.

As at the end of fiscal 2021, the net debt leverage ratio was 2.3x[5]. In fiscal 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 million. In connection with the announcement of the proposed Transaction on March 15, 2021, the Company suspended share buybacks under its normal course issuer bid (NCIB) program.

5 Net debt leverage ratio is a non-GAAP ratio and net debt, which is a component of net debt leverage ratio, is a non-GAAP financial measure. Net debt leverage ratio and net debt are not standardized measures under IFRS and may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for more information about this measure and ratio.

Shaw files Year-End Disclosure Documents

Shaw announced today the filing with Canadian securities regulators of its 2021 audited annual consolidated financial statements, related management's discussion and analysis and 2021 annual information form and the filing with the U.S. Securities and Exchange Commission of its 2021 annual report on Form 40-F which includes the Canadian filings.

These documents are available on Shaw's profile on the Canadian Securities Administrators' website (www.sedar.com). The Form 40-F is available on the U.S. Securities and Exchange Commission's website (www.sec.gov). All of these documents are also available on Shaw's website at www.shaw.ca/corporate/investor-relations/financial-reports. Any shareholder wishing to receive a printed copy of the 2021 annual report containing the audited annual consolidated financial statements and related management's discussion and analysis may request one at no charge by e-mail to investor.relations@sjrb.ca.

About Shaw

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video, and digital phone. Business provides business customers with Internet, data, WiFi, digital phone, and video services. The Wireless division provides wireless voice and LTE data services.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

Caution concerning forward-looking statements

Statements included in this press release that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal," and similar expressions (although not all forward-looking statements contain such words). All of the forward-looking statements made in this report are qualified by these cautionary statements. Forward looking statements in this press release include, but are not limited to, statements relating to:

- the expected impact of the COVID-19 pandemic;
- future capital expenditures;
- proposed asset acquisitions and dispositions;
- anticipated benefits of the Transaction to Shaw and its securityholders, including corporate, operational, scale and other synergies and the timing thereof;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of applicable approvals under the *Broadcasting Act* (Canada), the *Competition Act* (Canada) and the *Radiocommunication Act* (Canada) (collectively, the "Key Regulatory Approvals") related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to the closing of the Transaction and the anticipated timing for closing of the Transaction;
- expected cost efficiencies;
- expectations for future performance;
- business and technology strategies and measures to implement strategies;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;

- expected project schedules, regulatory timelines, and completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators, or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented or withdrawn by governments or regulators;
- timing of new product and service launches;
- the resiliency and performance of the Company's wireline and wireless networks;
- the deployment of (i) network infrastructure to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- expected changes in the Company's market share;
- the ability of Shaw Mobile to drive customer growth;
- the cost of acquiring and retaining subscribers and deployment of new services;
- expansion of and changes in the Company's business and operations and other goals and plans; and
- execution and success of the Company's current and long term strategic initiatives.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as of the current date. The Company's management believes that its assumptions and analysis in this press release are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods. These assumptions, many of which are confidential, include, but are not limited to management expectations with respect to:

- general economic conditions, including the impact on the economy and financial markets resulting from the COVID-19 pandemic and other health risks;
- the impact of the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources, and/or financial results;
- anticipated benefits of the Transaction to the Company and its security holders;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of the Key Regulatory Approvals related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to closing of the Transaction in a timely manner and the completion of the Transaction on expected terms;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the impact of the announcement of the Transaction, and the dedication of substantial Company resources to pursuing the Transaction, on the Company's ability to maintain its current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the ability to satisfy the other expectations and assumptions concerning the Transaction and the operations and capital expenditure plans for the Company following completion of the Transaction;
- future interest rates;
- previous performance being indicative of future performance;

- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment and devices;
- industry structure, conditions, and stability;
- regulation, legislation, or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation or withdrawal of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company's access to sufficient retail distribution channels;
- the Company's access to the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including, but not limited to:

- changes in general economic, market and business conditions, including the impact of the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees in response to the COVID-19 pandemic;
- the failure of the Company and Rogers to receive, in a timely manner and on satisfactory terms, the necessary regulatory or other third-party approvals, including but not limited to the Key Regulatory Approvals required to close the Transaction;
- the ability to satisfy, in a timely manner, the other conditions to the closing of the Transaction;
- the ability to complete the Transaction on the terms contemplated by the Arrangement Agreement;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the Company's failure to complete the Transaction for any reason could materially negatively impact the trading price of the Company's securities;
- the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction may adversely impact the Company's current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;

- the failure of the Company to comply with the terms of the Arrangement Agreement may, in certain circumstances, result in the Company being required to pay the termination fee to Rogers, the result of which will or could have a material adverse effect on the Company's financial position and results of operations and its ability to fund growth prospects and current operations;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information, and communications industries;
- changes in laws, regulations and decisions by regulators or other actions by governments or regulators that affect the Company or the markets in which it operates;
- any emergency measures implemented or withdrawn by governments or regulators;
- technology, privacy, cyber security, and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects on a timely basis;
- the Company's ability to grow subscribers and market share;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in the Company's fiscal 2021 annual management's discussion and analysis (MD&A) under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors.

Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2021 annual MD&A and this press release.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this press release are expressly qualified by this statement.

Key Performance Drivers

Shaw measures the success of its strategies using a number of key performance drivers which are defined and described below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance drivers are not measurements in accordance with IFRS, should not be considered alternatives to revenue, net income or any other measure of performance under IFRS and may not be comparable to similar measures presented by other issuers.

Subscriber (or revenue generating unit (RGU)) highlights

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.49% in the fourth quarter of fiscal 2021 improved from 1.57% in the fourth quarter of fiscal 2020. For fiscal 2021, postpaid churn of 1.41% was comparable to 1.40% in fiscal 2020.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is a supplementary financial measure and industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $40.29 in the fourth quarter of fiscal 2021 decreased 10% from $44.81 in the fourth quarter of fiscal 2020. In fiscal 2021, ABPU decreased 6.8% to $41.15. The ABPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is a supplementary financial measure that is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

ARPU of $37.39 in the fourth quarter of fiscal 2021 compares to $39.65 in the fourth quarter of fiscal 2020, representing a decrease of 5.7%. In fiscal 2021, ARPU decreased 4.1% to $37.35. The ARPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Non-GAAP and additional financial measures

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures or ratios. These financial measures or ratios do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure documents may also provide discussion and analysis of additional financial measures. Additional financial measures include line items, headings and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-GAAP financial measures, ratios and additional financial measures have not been presented as an alternative to revenue, net income or any other measure of performance required by GAAP.

Below is a discussion of the non-GAAP financial measures, ratios and additional financial measures used by the Company and provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, other gains (losses), amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business.

Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended August 31,		Year ended August 31,	
(millions of Canadian dollars)	**2021**	2020	**2021**	2020
Net income	**252**	175	**986**	688
Add back (deduct):				
Restructuring costs	**-**	-	**14**	14
Amortization:				
Deferred equipment revenue	**(2)**	(3)	**(11)**	(16)
Deferred equipment costs	**10**	14	**47**	65
Property, plant and equipment, intangibles and other (1)	**302**	301	**1,183**	1,168
Amortization of financing costs – long-term debt	**-**	1	**2**	3
Interest expense	**67**	68	**231**	274
Other gains (losses)	**6**	1	**2**	16
Current income tax expense	**38**	42	**30**	120
Deferred income tax expense (recovery)	**(59)**	(5)	**16**	59
Adjusted EBITDA	**614**	594	**2,500**	2,391

Adjusted EBITDA Margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Three months ended August 31,			Year ended August 31,		
	2021	2020	Change %	**2021**	2020	Change %
Wireline	**48.0%**	48.2%	(0.4)	**49.6%**	48.3%	2.7
Wireless	**33.0%**	28.6%	15.4	**30.9%**	28.9%	6.9
Combined Wireline and Wireless	**44.6%**	44.0%	1.4	**45.4%**	44.2%	2.7

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

(millions of Canadian dollars)	Three months ended August 31, **2021**	2020	Change %	Year ended August 31, **2021**	2020	Change %
Revenue						
Consumer	**910**	917	(0.8)	**3,665**	3,683	(0.5)
Business	**149**	140	6.4	**584**	567	3.0

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio.

The Company calculates net debt leverage ratio as follows[(1)]:

(millions of Canadian dollars)	2021	2020
Short-term borrowings	**200**	200
Current portion of long-term debt	**1**	1
Current Portion of Lease Liabilities	**110**	113
Long-term debt	**4,549**	4,547
Lease Liabilities	**1,135**	1,157
50% of outstanding preferred shares	**–**	147
Cash	**(355)**	(763)
(A) Net debt[(2)]	**5,640**	5,402
(B) Adjusted EBITDA[(2)]	**2,500**	2,391
(A/B) Net debt leverage ratio[(3)]	**2.3x**	2.3x

(1) The following contains a breakdown of the components in the calculation of net debt leverage ratio, which is a non-GAAP ratio.

(2) See "Non-GAAP and additional financial measures" for more information about these non-GAAP financial measures.

(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies.

NEWS RELEASE

Shaw Announces First Quarter Fiscal 2022 Results

- **First quarter consolidated financial results include adjusted EBITDA[1] growth of 4.3% and free cash flow[1] of $236 million**
- **The Company continues to focus on balancing growth and profitability and delivering an improved customer experience while also ensuring the continued safety of employees and customers from the ongoing COVID-19 pandemic**
- **Shaw remains committed to supporting the closure of the transaction with Rogers and planning for the benefits that the combined entity will provide to Canadians**

Calgary, Alberta (January 12, 2022) – Shaw Communications Inc. ("Shaw" or the "Company") announces consolidated financial and operating results for the quarter ended November 30, 2021. On a year-over-year basis, consolidated revenue increased by 1.2% to $1.39 billion, adjusted EBITDA increased 4.3% to $633 million and net income increased 20.2% to $196 million.

While we continue to experience new waves and variants of the COVID-19 virus, management remains focused on the safety of our people, most of whom continue to work from home, compliance with guidelines and requirements issued by various health authorities and government organizations as well as fast and ubiquitous connectivity for our customer base.

"Since the beginning of the COVID-19 pandemic and continuing today, strong and reliable connectivity plays a critical role in the lives of our customers, our economy and its recovery. We remain committed to delivering exceptional customer experiences, investing in the strength of our networks and continued focus on execution of our strategic business priorities. Our combination with Rogers will do more for the future prosperity of Canada than either company could achieve on its own. Together, Rogers and Shaw can build a national next-generation network that will offer robust and effective competition over the long-term, and bridge Canada's digital divide benefiting rural, remote and indigenous communities. The resources and network of the combined company will help accelerate Canada's digital economy and stimulate greater economic diversification in Western Canada. We recognize that we can do so much more by coming together and reiterate our continued commitment to work with Rogers to close the transaction while delivering the benefits that the combined entity will provide Canadians," said Brad Shaw, Executive Chair & Chief Executive Officer.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of

[1] Adjusted EBITDA and free cash flow are non-GAAP financial measures and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standardized meanings, and therefore may not be a reliable way to compare us to other companies. Additional information about these measures, including quantitative reconciliations to the most directly comparable financial measures in the Company's Consolidated Financial Statements, is included in "Non-GAAP and additional financial measures" in the management's discussion and analysis (MD&A) dated January 12, 2022 for the three-month period ending November 30, 2021, which section is incorporated by reference herein and is available on SEDAR at www.sedar.com.

approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC) in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

First Quarter Fiscal 2022

In the first quarter, the Company added approximately 55,600 new Wireless customers. Postpaid net additions of approximately 36,100 in the quarter were driven by the continued momentum of Shaw Mobile. Wireless service revenue grew 11.2% due to continued subscriber growth, partially offset by lower ARPU[2] as the Company continues to scale its lower revenue Shaw Mobile customer base. First quarter Wireless ARPU decreased 3.4% from the prior year period to $36.95; however, an increase in customers signing up for bundled offerings and Internet migration to faster speed tiers continues to support Internet revenue growth. Wireless postpaid churn[3] of 1.70% improved approximately 11-basis points from the first quarter of fiscal 2021.

Consumer Wireline RGU[4] losses of approximately 76,200 improved over the prior year period, led by positive Internet additions as customers continue to bundle their Internet and Wireless service together. First quarter Wireline revenue was in-line with the prior year at $1.06 billion and Wireline adjusted EBITDA decreased 1.5% year-over-year to $524 million.

[2] ARPU is a supplementary financial measure which may not be comparable to similar measures presented by other issuers. Additional information about this supplementary financial measure is included in "Key Performance Drivers" in the MD&A dated January 12, 2022 for the three-month period ending November 30, 2021, which section is incorporated by reference herein and is available on SEDAR at www.sedar.com.

[3] Wireless postpaid churn is a metric used to measure the Company's success in retaining Wireless subscribers. Additional information about this metric is included in "Key Performance Drivers" in the MD&A dated January 12, 2022 for the three-month period ending November 30, 2021, which section is incorporated by reference herein and is available on SEDAR at www.sedar.com.

[4] RGUs is a metric used to measure the count of subscribers in the Company's Wireline and Wireless segments. Additional information about this metric is included in "Key Performance Drivers" in this press release.

Selected Financial Highlights

	Three months ended November 30,		
(millions of Canadian dollars except per share amounts)	**2021**	2020	Change %
Revenue	**1,386**	1,370	1.2
Adjusted EBITDA[(1)]	**633**	607	4.3
Adjusted EBITDA Margin[(2)]	**45.7%**	44.3%	3.2
Free Cash Flow[(1)]	**236**	225	4.9
Net income	**196**	163	20.2
Earnings per share			
Basic and diluted	**0.39**	0.31	

(1) See "Non-GAAP and additional financial measures" in the accompanying MD&A.

(2) Adjusted EBITDA margin is a non-GAAP ratio and should not be considered a substitute or alternative for GAAP measures. Adjusted EBITDA margin is not a defined term under IFRS and does not have a standardized meaning, and therefore may not be a reliable way to compare us to other companies. Additional information about this ratio is included in "Non-GAAP and additional financial measures" in the MD&A dated January 12, 2022 for the three-month period ending November 30, 2021, which section is incorporated by reference herein and is available on SEDAR at www.sedar.com.

First quarter Wireless revenue increased 4.7% to $332 million and adjusted EBITDA of $109 million increased 45.3% year-over-year. Wireless service revenue increased 11.2% to $239 million due to an increased subscriber base, while Wireless equipment revenue decreased 8.8% to $93 million as more consumers took advantage of bring their own device plans. The increase in adjusted EBITDA is mainly due to continued service revenue growth and improved equipment margins as well as the favorable margin impact from lower equipment sales relative to total wireless revenues in the current quarter.

Wireline RGUs declined by approximately 78,100 in the quarter compared to a loss of approximately 100,900 in the first quarter of fiscal 2021. The current quarter was led by a modest gain in Consumer Internet, offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 76,200 in the aggregate. In Business, positive Internet RGUs were offset by declines in Video, Satellite and Phone resulting in Business RGUs declining by approximately 1,900.

First quarter Wireline revenue of $1.06 billion was in-line with the prior year while adjusted EBITDA of $524 million decreased 1.5% year-over-year. Consumer revenue of $896 million decreased 1.6% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue of $161 million increased 11.0% year-over-year with Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector. First quarter Business revenue included approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications. This item also had a $1 million favourable impact on adjusted EBITDA in the quarter.

Capital expenditures in the first quarter of $229 million compared to $234 million in the prior year. Wireline capital spending increased by approximately $29 million primarily due to higher investments in combined upgrades, enhancements and replacement categories as well as an increase in new housing development. Wireless spending of $39 million decreased by approximately $34 million year-over-year primarily due to lower planned investment in the quarter.

Free cash flow for the quarter of $236 million compared to $225 million in the prior year. The increase was due to higher adjusted EBITDA and lower capital expenditures, partially offset by increased cash taxes.

Net income for the first quarter of fiscal 2022 of $196 million increased $33 million compared to the first quarter of fiscal 2021 primarily as a result of $26 million in incremental adjusted EBITDA as described above, and a $12 million reduction in restructuring charges, partially offset by a $9 million increase in income tax expense.

As at the end of November 30, 2021, the Company's net debt leverage ratio was 2.2x[5].

About Shaw

Shaw Communications Inc. is a leading Canadian connectivity company. The Wireline division consists of Consumer and Business services. Consumer serves residential customers with broadband Internet, Shaw Go WiFi, video and digital phone. Business provides business customers with Internet, data, WiFi, digital phone and video services. The Wireless division provides wireless voice and LTE data services.

Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca

The accompanying MD&A forms part of this news release and the "Caution concerning forward-looking statements" applies to all the forward-looking statements made in this news release.

[5] Net debt leverage ratio is a non-GAAP ratio and net debt, which is a component of net debt leverage ratio, is a non-GAAP financial measure. Net debt leverage ratio and net debt are not standardized measures under IFRS and may not be a reliable way to compare us to other companies. For more information about this measure and ratio see "Non-GAAP and additional financial measures" in the management's discussion and analysis (MD&A) dated January 12, 2022 for the three-month period ending November 30, 2021, which section is incorporated by reference herein and is available on SEDAR at www.sedar.com.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the three months ended November 30, 2021

January 12, 2022

Contents

Advisories

The following Management's Discussion and Analysis (MD&A) of Shaw Communications Inc. is dated January 12, 2022 and should be read in conjunction with the condensed interim Consolidated Financial Statements and Notes thereto for the quarter ended November 30, 2021 and the 2021 Annual Consolidated Financial Statements, the Notes thereto and related MD&A included in the Company's 2021 Annual Report. The financial information presented herein has been prepared on the basis of International Financial Reporting Standards (IFRS) for interim financial statements and is expressed in Canadian dollars unless otherwise indicated. References to "Shaw," the "Company," "we," "us" or "our" mean Shaw Communications Inc. and its subsidiaries and consolidated entities, unless the context otherwise requires.

Caution concerning forward-looking statements

Statements included in this MD&A that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal," and similar expressions (although not all forward-looking statements contain such words). All of the forward-looking statements made in this report are qualified by these cautionary statements. Forward looking statements in this MD&A include, but are not limited to, statements relating to:

- the expected impact of the COVID-19 pandemic;
- future capital expenditures;
- proposed asset acquisitions and dispositions;
- anticipated benefits of the Transaction (as defined below) to Shaw and its securityholders, including corporate, operational, scale and other synergies and the timing thereof;

- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of applicable approvals under the Broadcasting Act (Canada), the Competition Act (Canada) and the Radiocommunication Act (Canada) (collectively, the "Key Regulatory Approvals") related to the Transaction;
- the ability of the Company and Rogers (as defined below) to satisfy the other conditions to the closing of the Transaction and the anticipated timing for closing of the Transaction;
- expected cost efficiencies;
- expectations for future performance;
- business and technology strategies and measures to implement strategies;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;
- expected project schedules, regulatory timelines, and completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators, or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented or withdrawn by governments or regulators;
- timing of new product and service launches;
- the resiliency and performance of the Company's wireline and wireless networks;
- the deployment of (i) network infrastructure to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- expected changes in the Company's market share;
- the ability of Shaw Mobile to drive customer growth;
- the cost of acquiring and retaining subscribers and deployment of new services;
- expansion of and changes in the Company's business and operations and other goals and plans; and
- execution and success of the Company's current and long term strategic initiatives.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as at the current date. The Company's management believes that its assumptions and analysis in this MD&A are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information. Considering the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods.

These assumptions, many of which are confidential, include but are not limited to management expectations with respect to:

- general economic conditions, including the impact on the economy, financial markets, and sources of supply, resulting from the COVID-19 pandemic and other health risks;
- the impact of the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources, and/or financial results;
- anticipated benefits of the Transaction to the Company and its security holders;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of the Key Regulatory Approvals related to the Transaction;

- the ability of the Company and Rogers to satisfy the other conditions to closing of the Transaction in a timely manner and the completion of the Transaction on expected terms;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the impact of the announcement of the Transaction, and the dedication of substantial Company resources to pursuing the Transaction, on the Company's ability to maintain its current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the ability to satisfy the other expectations and assumptions concerning the Transaction and the operations and capital expenditure plans for the Company following completion of the Transaction;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment and devices;
- industry structure, conditions, and stability;
- regulation, legislation, or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation or withdrawal of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- the Company's operations not being subject to material disruptions in service or material failures in its networks, systems or equipment;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company's access to sufficient retail distribution channels;
- the Company's access to the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including, but not limited to:

- changes in general economic, market and business conditions, including the impact of the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;

- impacts on the availability of components and electronics due to global silicon (microprocessor) supply shortages and logistical/transport issues;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees in response to the COVID-19 pandemic;
- the failure of the Company and Rogers to receive, in a timely manner and on satisfactory terms, the necessary regulatory or other third-party approvals, including but not limited to the Key Regulatory Approvals required to close the Transaction;
- the ability to satisfy, in a timely manner, the other conditions to the closing of the Transaction;
- the ability to complete the Transaction on the terms contemplated by the Arrangement Agreement (as defined below) between the Company and Rogers;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the Company's failure to complete the Transaction for any reason could materially negatively impact the trading price of the Company's securities;
- the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction may adversely impact the Company's current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the failure of the Company to comply with the terms of the Arrangement Agreement may, in certain circumstances, result in the Company being required to pay the termination fee to Rogers, the result of which will or could have a material adverse effect on the Company's financial position and results of operations and its ability to fund growth prospects and current operations;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information, and communications industries;
- changes in laws, regulations and decisions by regulators or other actions by governments or regulators that affect the Company or the markets in which it operates;
- any emergency measures implemented or withdrawn by governments or regulators;
- technology, privacy, cyber security, and reputational risks;
- disruptions to service, including due to network, system, or equipment failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects on a timely basis;
- the Company's ability to grow subscribers and market share;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in the Company's fiscal 2021 annual management's discussion and analysis (MD&A) under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible risk factors.

Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in the Company's fiscal 2021 Annual MD&A and this first quarter fiscal 2022 MD&A.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this MD&A are expressly qualified by this statement.

Additional Information

Additional information concerning the Company, including the Company's Annual Information Form, is available through the Internet on SEDAR which may be accessed at www.sedar.com. Copies of such information may also be obtained on the Company's website at www.shaw.ca, or on request and without charge from the Corporate Secretary of the Company, Suite 900, 630 – 3rd Avenue S.W., Calgary, Alberta, Canada T2P 4L4, telephone (403) 750-4500.

Non-GAAP and additional financial measures

Certain measures in this MD&A do not have standard meanings prescribed by GAAP and are therefore considered non-GAAP financial measures. These measures are provided to enhance the reader's overall understanding of our financial performance or current financial condition. They are included to provide investors and management with an alternative method for assessing our operating results in a manner that is focused on the performance of our ongoing operations and to provide a more consistent basis for comparison between periods. These measures are not in accordance with, or an alternative to, GAAP and do not have standardized meanings. Therefore, they are unlikely to be comparable to similar measures presented by other entities.

Please refer to "Non-GAAP and additional financial measures" in this MD&A for a discussion and reconciliation of non-GAAP financial measures, including adjusted EBITDA, free cash flow and net debt as well as net debt leverage ratio and adjusted EBITDA margin, which are non-GAAP ratios.

Introduction

At Shaw, we focus on delivering sustainable long-term growth by connecting customers to the world through a seamless connectivity experience by leveraging our converged network.

With the onset of the global COVID-19 pandemic in 2020, connectivity rapidly became a critical lifeline for Canadians and our economy. During this unprecedented period, our network performance was exceptional, and we remain focused on supporting our employees, customers and communities. Our robust facilities-based network, the result of years of significant investment, has showcased its strength in addressing our customers' need to stay connected to family, friends and colleagues and work from home throughout the COVID-19 pandemic. Despite the absence of material financial impacts, the pandemic affected the Company by causing increased wireline network usage as well as extended peak hours. The Company also experienced increased demand for wireless voice services and a decrease in wireless roaming revenue.

While the pandemic has had an impact on our business, Shaw continues to be resilient, delivering solid financial and operating results, and we believe that we are well positioned to meet the rapidly changing and increasing demands of our customers. The financial impacts from COVID-19 in the first quarter were not material; however, the situation remains uncertain in terms of its magnitude, outcome, duration, resurgences, emergence of variants, and/or subsequent waves. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability of certain customers to pay their bills. Shaw Business primarily serves the small and medium sized market, which is also particularly vulnerable to COVID-19 related restrictions, including mandated closures, capacity restrictions or further social distancing requirements.

As an ongoing risk, the duration and impact of the COVID-19 pandemic is still unknown, as is the efficacy and duration of the government interventions. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 pandemic may materially and adversely affect the Company's operations, financial results and condition in future periods are also subject to significant uncertainty.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC) in order to secure the requisite approvals.

In connection with Rogers' application filed in April 2021 for CRTC approval to acquire Shaw's licensed broadcasting assets, public interventions were filed September 13, 2021, with Rogers' reply to interventions filed September 23, 2021. The CRTC held an oral hearing from November 22 to 26, 2021, during which Rogers, Shaw, and 31 interveners (including Canada Public Affairs Channel Inc. (CPAC) as an interested party) had an opportunity to comment on and respond to questions from the CRTC regarding the application. Final written submissions from interveners were accepted until December 13, 2021, and Rogers and CPAC submitted final replies on December 20, 2021.

In accordance with the terms of the Arrangement Agreement, Rogers and Shaw filed pre-merger notifications pursuant to Part IX of the *Competition Act* (Canada) in April 2021 to trigger the Competition Bureau's review of the Transaction. Since that time, Rogers and Shaw have worked cooperatively and constructively to respond to further requests for information, as required under the Arrangement Agreement. On September 28, 2021, the Competition Bureau issued a public request for information to help further gather and assess facts about the Transaction. The Competition Bureau invited interested parties to share their information confidentially with the Bureau by October 29, 2021. The Federal Court also issued orders requiring Xplornet Communications Inc., BCE Inc., TELUS Corporation and Quebecor Inc. to produce records and written information related to mobile wireless services that are relevant to the Competition Bureau's review of the Transaction. The Competition Bureau's review of the Transaction is ongoing.

In accordance with the conditions of the spectrum licences held by the Company, Rogers and Shaw filed joint applications in April 2021 with ISED for approval of the indirect transfer of those spectrum licences by the Minister of Innovation, Science and Industry. ISED's review is ongoing.

Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Wireless

Our Wireless division currently operates in Ontario, Alberta and British Columbia, covering approximately 50% of the Canadian population.

On July 30, 2020, the Company launched Shaw Mobile, a new wireless service in western Canada that leverages Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, to provide Shaw Internet customers with an innovative wireless experience. Shaw Mobile provides Shaw Internet customers with bundling opportunities, combined with the ability to customize their mobile data requirements, and is a powerful example of how facilities-based service providers can compete and innovate. Shaw Mobile capitalizes on the long-term trend that shows the vast majority of Canadians' smart device data usage occurs on WiFi networks, a fact amplified by recent work-from-home trends.

First quarter fiscal 2022 results include Wireless net additions of approximately 55,600. Wireless service revenue increased 11.2% to $239 million and adjusted EBITDA increased 45.3% to $109 million compared to the first quarter of fiscal 2021, primarily due to continued service revenue growth and improved equipment margins as well as the favorable margin impact from lower equipment sales relative to total wireless revenues in the current quarter.

We have approximately 850 wireless retail locations across our operating footprint, including corporate, dealer and national retail, with Shaw Mobile being available in approximately 200 locations.

Wireline

In our Wireline business, gig speed Internet is underpinned by our Fibre+ network. Through our digital transformation, we have made it easier to interact with our customers and are leveraging insights from customer data to better understand their preferences so we can provide them with the services they want. We continue to streamline and simplify manual processes to improve the customer experience and day-to-day operations for our employees.

Despite the unprecedented impact that the COVID-19 pandemic has had on the lives of our customers, and the corresponding impacts to the way we serve our customers, our focus remains on the execution and delivery of stable and profitable Wireline results. This includes growth in high quality Internet subscribers and improving overall customer account profitability by attracting and retaining higher value households with our 2-year ValuePlans.

Wireline RGUs declined by approximately 78,100 in the quarter compared to a loss of approximately 100,900 in the first quarter of fiscal 2021. The current quarter was led by a modest gain in Consumer Internet, offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 76,200 in the aggregate. In Business, positive Internet RGUs were offset by declines in Video, Satellite and Phone resulting in Business RGUs declining by approximately 1,900.

First quarter Wireline revenue of $1.06 billion was in-line with the prior year while adjusted EBITDA[1] of $524 million decreased 1.5% year-over-year. Consumer revenue of $896 million decreased 1.6% compared to the prior year as growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue. Business revenue of $161 million increased 11.0% year-over-year with Internet revenue growth and continued demand for the Smart suite of products. First quarter Business revenue included approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications. This item also had a $1 million favourable impact on adjusted EBITDA in the quarter.

Our Wireline Business division provides connectivity solutions to its customers by leveraging our Smart suite products which provide cost-effective enterprise grade managed IT and communications solutions that are increasingly valued by businesses of all sizes as the digital economy grows in scope and complexity. The COVID-19 pandemic impacted the Business division by causing the crediting, as well as the reduction or cancellation, of a number of Business customer accounts and slowing revenue growth. In response to the changing needs of its customers during the pandemic, Shaw Business added a suite of collaboration tools and new Smart products, such as Microsoft 365, Smart Remote Office, SmartSecurity and SmartTarget and launched a 1.5 Gig Internet speed tier providing businesses of all sizes the speed and bandwidth to leverage data-heavy applications and cloud services.

---

[1] Adjusted EBITDA is a non-GAAP financial measure and should not be considered a substitute or alternative for GAAP measures. This is not a defined term under IFRS and does not have a standardized meaning, and therefore may not be a reliable way to compare us to other companies. See “Non-GAAP and additional financial measures” for more information about this measure including a quantitative reconciliation to the most directly comparable financial measure in the Company’s Consolidated Financial Statements.

(1) Adjusted EBITDA, adjusted EBITDA margin and free cash flow are non-GAAP financial measures or non-GAAP ratios and should not be considered substitutes or alternatives for GAAP measures. These are not defined terms under IFRS and do not have standardized meanings, and therefore may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for more information about these measures and ratios including quantitative reconciliations to the most directly comparable financial measures in the Company's Consolidated Financial Statements.

(2) Funds flow from operations is before changes in non-cash balances related to operations as presented in the condensed interim Consolidated Statements of Cash Flows.

Key Performance Drivers

The Company measures the success of its strategies using a number of key performance drivers which are defined and described under "Key Performance Drivers – Statistical Measures" in the 2021 Annual MD&A and in this MD&A below, which includes a discussion as to their relevance, definitions, calculation methods and underlying assumptions. The following key performance indicators are not measurements in accordance with GAAP, should not be considered alternatives to revenue, net income or any other measure of performance under GAAP and may not be comparable to similar measures presented by other issuers.

Subscriber (or revenue generating unit (RGU)) highlights

The Company measures the count of its subscribers in its Consumer, Business, and Wireless divisions. For further details and discussion on subscriber counts for RGUs see "Key Performance Drivers – Statistical Measures – Subscriber Counts for RGUs" in the MD&A for the year ended August 31, 2021.

Total Subscribers	**7,102,239**	7,124,755	**(22,516)**	122

In Wireless, the Company added 55,582 net postpaid and prepaid subscribers in the quarter, consisting of 36,089 postpaid additions and 19,493 prepaid additions. Postpaid net additions were driven by the continued momentum of Shaw Mobile.

Wireline RGUs declined by 78,098 in the quarter compared to a loss of 100,907 in the first quarter of fiscal 2021. The current quarter was led by a modest gain in Consumer Internet RGUs, offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 76,244 in the aggregate. In Business, positive Internet RGUs were offset by declines in Video, Satellite and Phone resulting in Business RGUs declining by 1,854.

Wireless Postpaid Churn

Wireless postpaid subscriber churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.70% in the first quarter of fiscal 2022 improved 11-basis points from 1.81% in the first quarter of fiscal 2021.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is an industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

ABPU of $38.67 in the first quarter of fiscal 2022 decreased by 9.4% from $42.66 in the first quarter of fiscal 2021 as the Company continues to scale its lower revenue Shaw Mobile customer base.

Wireless average revenue per subscriber unit (ARPU)

Wireless ARPU is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

ARPU of $36.95 in the first quarter of fiscal 2022 compares to $38.25 in the first quarter of fiscal 2021, representing a decrease of 3.4% as the Company continues to scale its lower revenue Shaw Mobile customer base.

Overview

For detailed discussion of divisional performance see "Discussion of operations." Highlights of the consolidated first quarter financial results are as follows:

Revenue

Revenue for the first **quarter** of fiscal 2022 of $1.39 billion increased $16 million, or 1.2%, from $1.37 billion for the first quarter of fiscal 2021, highlighted by the following:

- Consumer division revenues of $896 million decreased $15 million, or 1.6%, compared to the prior year period as the growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
- The Wireless division contributed $332 million and included a $15 million, or 4.7%, increase over the first quarter of fiscal 2021 reflecting a $24 million, or 11.2%, increase in service revenue due to an increased subscriber base, partially offset by a $9 million, or 8.8%, decrease in equipment revenue as more consumers took advantage of bring their own device plans.
- The Business division had growth of $16 million, or 11.0%, in comparison to the first quarter of fiscal 2021 with Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector. First quarter Business revenue included approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications.

Compared to the fourth quarter of fiscal 2021, consolidated revenue for the quarter increased 0.7%, or $9 million. The increase in revenue over the prior quarter includes a $11 million increase in the Wireless division driven by a $6 million increase in service revenue and a $5 million increase in equipment revenue which reflects the impact of the increased subscriber base partially mitigated by a decrease in ABPU (down from $40.29 in the fourth quarter of fiscal 2021 to $38.67 in the current quarter). Meanwhile, ARPU decreased quarter-over-quarter (from $37.39 in the fourth quarter of fiscal 2021 to $36.95 in the current quarter). The increase from Wireless was partially offset by Wireline as revenues decreased by $2 million over the prior quarter. This was driven by a $14 million decrease in the Consumer division partially offset by a $12 million increase in the Business division which included approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications.

Adjusted EBITDA

Adjusted EBITDA for the **first quarter** of fiscal 2022 of $633 million increased by $26 million, or 4.3%, from $607 million for the first quarter of fiscal 2021, highlighted by the following:

- The year-over-year improvement in the Wireless division of $34 million, or 45.3%, is mainly due to continued service revenue growth and improved equipment margins as well as the favorable margin impact from lower equipment sales relative to total wireless revenues in the current quarter. Wireless adjusted EBITDA margin of 32.8% compared to 23.7% in the prior year.
- The year-over-year decrease in the Wireline division of $8 million, or 1.5%, was primarily due to higher Wireline costs including the impact of employee benefit provisions in the prior year, partially offset by lower costs due to proactive base management and lower bad debt expense in the quarter.

Consistent with the variances noted above, adjusted EBITDA margin for the **first quarter** of 45.7% increased 140-basis points compared to 44.3% in the first quarter of fiscal 2021.

Compared to the **fourth quarter** of fiscal 2021, adjusted EBITDA for the current quarter increased $19 million, or 3.1%, primarily due to a $16 million increase in the Wireline division driven by proactive base management and decreased operating expenses, including lower employee related costs and sponsorship costs in the current period. Adjusted EBITDA for the Wireless division increased $3 million, or 2.8%, primarily due to a $6 million increase in service revenues partially offset by the impact of lower margins due to equipment sales being a higher proportion of wireless revenues in the current quarter.

Free cash flow

Free cash flow for the **first quarter** of fiscal 2022 of $236 million increased $11 million from $225 million in the first quarter of fiscal 2021, mainly due to a $26 million increase in adjusted EBITDA, a $5 million decrease in capital expenditures and a $2 million decrease in preferred share dividends, partially offset by a $27 million increase in cash taxes.

Net income (loss)

Net income of $196 million for the three months ended November 30, 2021, compared to a net income of $163 for the same period in fiscal 2021. The changes in net income are outlined in the following table:

	November 30, 2021 net income compared to:	
	Three months ended	
(millions of Canadian dollars)	August 31, 2021	November 30, 2020
Increased adjusted EBITDA[(1)]	19	26
Decreased restructuring costs[(2)]	-	12
Decreased amortization	9	5
Change in net other costs and revenue[(3)]	4	(1)
Decreased (increased) income taxes[(4)]	(88)	(9)
	(56)	33

(1) See "Non-GAAP and additional financial measures."

(2) During the first quarter of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million in the first quarter of fiscal 2021 related to severance and employee related costs. There were no restructuring activities in the first quarter of fiscal 2022.

(3) Net other costs and revenue include accretion of long-term liabilities and provisions, interest, debt retirement costs, realized and unrealized foreign exchange differences and other losses as detailed in the unaudited Consolidated Statements of Income. In the first quarter of fiscal 2022, the Company recorded $2 million in Transaction-related advisory, legal, financial, and other professional costs.

(4) Income taxes were higher in the first quarter of fiscal 2022 compared to the fourth quarter of fiscal 2021 due mainly to the recognition of a $78 million tax benefit associated with previously unrecognized tax losses in the fourth quarter driven by management's expectations that sufficient future taxable profit will be available to fully utilize such losses.

Non-GAAP and additional financial measures

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures or ratios. These financial measures or ratios do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure documents may also provide discussion and analysis of additional financial measures. Additional financial measures include line items, headings and sub-totals included in the financial statements.

The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. The non-

GAAP financial measures, ratios and additional financial measures have not been presented as an alternative to revenue, net income or any other measure of performance required by GAAP.

Below is a discussion of the non-GAAP financial measures, ratios and additional financial measures used by the Company and provides a reconciliation to the nearest GAAP measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, equity income/loss of an associate or joint venture, amortization (a non-cash expense), income taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business. Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Three months ended November 30,	
(millions of Canadian dollars)	**2021**	2020
Net income	**196**	163
Add back (deduct):		
Restructuring costs	**-**	12
Amortization:		
Deferred equipment revenue	**(2)**	(3)
Deferred equipment costs	**10**	13
Property, plant and equipment, intangibles and other	**292**	295
Amortization of financing costs – long-term debt	**1**	1
Interest expense	**65**	66
Other losses (gains)	**4**	2
Current income tax expense	**90**	36
Deferred income tax expense	**(23)**	22
Adjusted EBITDA	**633**	607

Adjusted EBITDA margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Three months ended November 30,		
	2021	2020	Change %
Wireline	**49.6%**	50.4%	(1.6)
Wireless	**32.8%**	23.7%	38.4
Combined Wireline and Wireless	**45.7%**	44.3%	3.2

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage. Refer to "Liquidity and capital resources" for further detail.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio. Refer to "Liquidity and capital resources" for further detail.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

	Three months ended November 30,		
(millions of Canadian dollars)	**2021**	2020	Change %
Revenue

Discussion of operations

Wireline

(millions of Canadian dollars)	Three months ended November 30, 2021	2020	Change %
Consumer	**896**	911	(1.6)
Business	**161**	145	11.0
Wireline revenue	**1,057**	1,056	0.1
Adjusted EBITDA[(1)]	**524**	532	(1.5)
Adjusted EBITDA margin[(1)]	**49.6%**	50.4%	(1.6)

(1) See "Non-GAAP and additional financial measures."

In the **first quarter** of fiscal 2022, Wireline RGUs declined by 78,098 compared to a loss of 100,907 in the first quarter of fiscal 2021. The current quarter was led by a modest gain in Consumer Internet RGUs, while offset with declines in Video, Satellite and Phone resulting in Consumer RGUs declining by 76,244 in the aggregate. In Business, positive Internet RGUs were offset by declines in Video, Satellite and Phone resulting in Business RGUs declining by 1,854.

Revenue highlights include:

- Consumer revenue for the **first quarter** of fiscal 2022 decreased by $15 million, or 1.6%, compared to the first quarter of fiscal 2021 as the growth in Internet revenue was offset by declines in Video, Satellite and Phone subscribers and revenue.
  - As **compared to the fourth quarter** of fiscal 2021, the current quarter revenue decreased by $14 million, or 1.5%.
- Business revenue of $161 million for the **first quarter** of fiscal 2022 increased $16 million, or 11.0%, compared to the first quarter of fiscal 2021, with Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector. First quarter Business revenue included approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications.
  - As **compared to the fourth quarter** of fiscal 2021, the current quarter revenue increased by $12 million, or 8.1%, including approximately $9 million of revenue related to a financing lease arrangement involving a facility that was designed and built to customer specifications.

Adjusted EBITDA highlights include:

- Adjusted EBITDA for the **first quarter** of fiscal 2022 of $524 million decreased 1.5%, or $8 million, from $532 million in the first quarter of fiscal 2021. The decrease was primarily due to higher Wireline costs including the impact of adjustments to employee benefit provisions in the prior year, partially offset by lower costs due to proactive base management and lower bad debt expense in the quarter.
  - As **compared to the fourth quarter** of fiscal 2021, Wireline adjusted EBITDA for the current quarter increased by $16 million, or 3.1%, driven by proactive base management and decreased operating expenses, including lower employee related costs and sponsorship costs in the current period.

Wireless

(millions of Canadian dollars)	Three months ended November 30, **2021**	2020	Change %
Service	**239**	215	11.2
Equipment and other	**93**	102	(8.8)
Wireless revenue	**332**	317	4.7
Adjusted EBITDA(1)	**109**	75	45.3
Adjusted EBITDA margin(1)	**32.8%**	23.7%	38.4

(1) See "Non-GAAP and additional financial measures."

The Wireless division added 55,582 net postpaid and prepaid subscribers in the quarter, consisting of 36,089 postpaid additions and 19,493 prepaid additions. Postpaid net additions were driven by the continued momentum of Shaw Mobile.

Revenue highlights include:

- Revenue of $332 million for the **first quarter** of fiscal 2022 increased $15 million, or 4.7%, over the first quarter of fiscal 2021. This was primarily due to a $24 million, or 11.2%, increase in service revenue due to an increased subscriber base, partially offset by a $9 million, or 8.8%, decrease in equipment revenue as more consumers took advantage of bring their own device plans. There was a 9.4% and 3.4% year-over-year decrease in ABPU to $38.67 and ARPU to $36.95, respectively.
  - As **compared to the fourth quarter** of fiscal 2021, the current quarter revenue increased by $11 million, or 3.4%, due to a $6 million increase in service revenue and a $5 million increase in equipment revenue which reflects the impact of the increased subscriber base partially mitigated by a decrease in ABPU (down from $40.29 in the fourth quarter of fiscal 2021 to $38.67 in the current quarter). Meanwhile, ARPU decreased quarter-over-quarter (from $37.39 in the fourth quarter of fiscal 2021 to $36.95 in the current quarter).

Adjusted EBITDA highlights include:

- Adjusted EBITDA of $109 million for the **first quarter** of fiscal 2022 improved by $34 million, or 45.3%, over the first quarter of fiscal 2021. The increase is mainly due to continued service revenue growth and improved equipment margins as well as the favorable margin impact from lower equipment sales relative to total wireless revenues in the current quarter. Wireless adjusted EBITDA margin of 32.8% compared to 23.7% in the prior year.
  - As **compared to the fourth quarter** of fiscal 2021, adjusted EBITDA for the current quarter increased $3 million, or 2.8%, primarily due to a $6 million increase in service revenues partially offset by the impact of lower margins due to equipment sales being a higher proportion of wireless revenues in the current quarter.

Total as per Note 3 to the unaudited interim consolidated financial statements	**190**	161	18.0
Wireless			
Total as per Note 3 to the unaudited interim consolidated financial statements	**39**	73	(46.6)
Consolidated total as per Note 3 to the unaudited interim consolidated financial statements	**229**	234	(2.1)

In the **first quarter** of fiscal 2022, capital investment of $229 million decreased $5 million from the comparable period in fiscal 2021. The decrease was driven primarily by lower planned capital expenditures in the Wireless division, partially offset by an increase in total Wireline capital spending due to higher investments in combined upgrades, enhancements and replacement categories as well as an increase in new housing development and success-based capital.

Wireline highlights for the quarter include:

- For the quarter, investment in combined upgrades, enhancements and replacement categories was $96 million which is an increase of $8 million, or 9.1%, over the prior year period.
- Investments in new housing development were $29 million, a $6 million, or 26.1%, increase over the prior year period, driven by higher residential and commercial customer network growth and acquisition in the current year.
- Success-based capital for the quarter of $48 million was $4 million, or 9.1%, higher than the first quarter of fiscal 2021 primarily due to higher capitalized labour, partially offset by lower equipment purchases in the period.
- Investments in buildings and other in the amount of $17 million was $11 million higher year-over year primarily related to the impact of proceeds on disposal of non-core corporate assets received in the prior period.

Wireless highlights for the quarter include:

- Capital investment of $39 million in the first quarter decreased relative to the first quarter of fiscal 2021 by $34 million, primarily due to lower planned network related investment in the quarter.

Other income and expense items

Restructuring costs

Restructuring costs generally include severance, employee related costs and other costs directly associated with a restructuring program. During the first quarter of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million in the first quarter of fiscal 2021 related to severance and employee related costs. There were no restructuring activities in the first quarter of fiscal 2022.

Amortization

	Three months ended November 30,		
(millions of Canadian dollars)	**2021**	2020	Change %
Amortization revenue (expense)			
Deferred equipment revenue	**2**	3	(33.3)
Deferred equipment costs	**(10)**	(13)	(23.1)
Property, plant and equipment, intangibles and other	**(292)**	(295)	(1.0)

Amortization of $300 million decreased 1.6% for the three months ended November 30, 2021, when compared to the same period in fiscal 2021. The decrease in amortization is mainly due to a decrease in deferred equipment costs in the quarter and the amortization of those assets that became fully amortized during the period exceeding the amortization of new expenditures of property, plant and equipment and intangibles.

Amortization of financing costs and interest expense

	Three months ended November 30,		
(millions of Canadian dollars)	**2021**	2020	Change %
Amortization of financing costs – long-term debt	**1**	1	-
Interest expense	**65**	66	(1.5)

Interest expense for the three months ended November 30, 2021 decreased $1 million compared to the prior year quarter mainly due to the lower average outstanding debt balances in the period.

Other gains/losses

This category generally includes realized and unrealized foreign exchange gains and losses on U.S. dollar denominated current assets and liabilities, gains and losses on disposal of property, plant and equipment, realized and unrealized gains and losses on private investments, and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership. In the first quarter of fiscal 2022, the Company recorded $2 million in Transaction-related advisory, legal, financial, and other professional costs.

Income taxes

Income taxes are higher in the quarter compared to the first quarter of fiscal 2021 due mainly to the increase in net income.

(2) Net income attributable to both equity shareholders and non-controlling interests.

F22 Q1 vs F21 Q4	In the first quarter of fiscal 2022, net income decreased $56 million compared to the fourth quarter of fiscal 2021 mainly due to an $88 million increase in taxes in the first quarter as a result of the recognition of a tax benefit associated with previously unrecognized tax losses in the fourth quarter partially offset by a $19 million increase in adjusted EBITDA and a $10 million decrease in amortization expense, all in the first quarter.
F21 Q4 vs F21 Q3	In the fourth quarter of fiscal 2021, net income decreased $102 million compared to the third quarter of fiscal 2021 mainly due to a $36 million increase in interest expense and a $126 million increase in current taxes in the fourth quarter as a result of a revision to liabilities for uncertain tax positions which reduced these expenses by $35 million and $125 million respectively in the third quarter as well as a $28 million decrease in adjusted EBITDA partially offset by an $81 million decrease in deferred taxes resulting mainly from the recognition of a tax benefit associated with previously unrecognized tax losses and a decrease of $15 million in other expenses mainly due to lower Transaction-related costs, all in the fourth quarter.
F21 Q3 vs F21 Q2	In the third quarter of fiscal 2021, net income increased $137 million compared to the second quarter of fiscal 2021 mainly due to a $131 million decrease in current income taxes expense and a $36 million decrease in interest expense mainly due to a revision to liabilities for uncertain tax positions that became statute barred in the period, which reduced these expenses by $125 million and $35 million respectively, a $9 million decrease in deferred taxes, and a $5 million increase in adjusted EBITDA, partially offset by $18 million in Transaction-related advisory, legal, financial, and other professional fees in the quarter and the impact of the $27 million fair value gain on private investments recorded in the second quarter.

F21 Q2 vs F21 Q1	In the second quarter of fiscal 2021, net income increased $54 million compared to the first quarter of fiscal 2021 mainly due to a $30 million increase in adjusted EBITDA, an $11 million decrease in restructuring costs, and a $27 million fair value gain on private investments recorded in the second quarter, partially offset by a $9 million increase in deferred taxes and an $8 million increase in current taxes, all in the second quarter.
F21 Q1 vs F20 Q4	In the first quarter of fiscal 2021, net income decreased $12 million compared to the fourth quarter of fiscal 2020 mainly due to a $12 million increase in restructuring costs in the first quarter and a $27 million increase in deferred taxes, partially offset by a $13 million increase in adjusted EBITDA and a $6 million decrease in current taxes, all in the first quarter.
F20 Q4 vs F20 Q3	In the fourth quarter of fiscal 2020, net income decreased $9 million compared to the third quarter of fiscal 2020 mainly due to an $15 million decrease in adjusted EBITDA and a $23 million increase in current taxes in the fourth quarter as well an $8 million decrease in other gains (losses) as a result of an insurance claim recovery in the third quarter, partially offset by a $35 million decrease in deferred taxes and a $14 million decrease in restructuring costs in the fourth quarter.
F20 Q3 vs F20 Q2	In the third quarter of fiscal 2020, net income increased $17 million compared to the second quarter of fiscal 2020 mainly due to a $26 million increase in other gains (losses), which includes the impact of the $17 million payment related to the early redemption of $800 million in senior notes in the second quarter, a $6 million insurance claim recovery, a $9 million increase in adjusted EBITDA in the third quarter and a $4 million decrease in current taxes, partially offset by an $8 million increase in deferred taxes, also in the third quarter.
F20 Q2 vs F20 Q1	In the second quarter of fiscal 2020, net income increased $5 million compared to the first quarter of fiscal 2020 mainly due to a $13 million decrease in current taxes, a $12 million increase in adjusted EBITDA and a $3 million decrease in interest expense, all in the second quarter, partially offset by a $17 million payment related to the early redemption of $800 million in senior notes and a $10 million increase in deferred taxes, also in the second quarter.

Financial position

Total assets were $15.7 billion at November 30, 2021 compared to $15.8 billion at August 31, 2021. The following is a discussion of significant changes in the Consolidated Statements of Financial Position since August 31, 2021.

Current assets decreased $77 million primarily due to decreases in cash of $63 million, income taxes recoverable of $36 million, the current portion of contract assets of $12 million, and inventories of $9 million, partially offset by increases in accounts receivables of $12 million and other current assets of $31 million. Cash decreased primarily due to the payment of $148 million in dividends and cash outlays for investing activities, partially offset by funds flow from operations. Refer to "Liquidity and capital resources" for more information.

Accounts receivable increased $12 million mainly due to timing and the impact of the Company continuing to migrate customers from two-month advance billing to one-month advance billing.

The current portion of contract assets decreased $12 million over the period due to a $3 million decrease in deferred Wireline costs as a result of lower onboarding promotional activity for new subscribers over the past year and a $9 million decrease due to a decrease in Wireless subscribers participating in the Company's discretionary wireless handset discount program over the past year. Under IFRS 15, up-front promotional offers, such as onboarding or switch credits, offered to new two-year value-plan customers are recorded as a contract asset and amortized over the life of the contract against future service revenues while the portion of the Wireless discount relating to the handset is applied against equipment revenue at the point in time that the handset is transferred to the customer while the portion relating to service revenue is recorded as a contract asset and amortized over the life of the contract against future service revenues.

Property, plant and equipment decreased $83 million as the amortization of capital and right-of-use assets exceeded the capital investments and additions to right-of-use assets in the period.

Current liabilities decreased $137 million during the period primarily due to a decrease in accounts payable of $136 million, current portion of contract liabilities of $1 million, and current portion of derivatives of $2 million. This decrease was partially offset by a $1 million increase in current portion of lease liabilities and a $1 million increase in current provisions.

Accounts payable and accrued liabilities decreased due to the timing of payments and fluctuations in various payables including capital expenditures, interest and employee incentive plans.

Lease liabilities decreased $31 million mainly due to principal repayments of $30 million in the period and a reduction of $1 million in net new lease liabilities.

Shareholders' equity increased $67 million mainly due to an increase in retained earnings. Retained earnings increased as the current period net income of $196 million was greater than the dividends of $148 million. Share capital increased $4 million due to the issuance of 128,158 Class B Shares under the Company's stock option plan. Accumulated other comprehensive loss decreased $15 million primarily due to the remeasurement recorded on employee benefit plans.

As at December 31, 2021, there were 476,732,030 Class B Shares and 22,372,064 Class A Shares issued and outstanding. As at December 31, 2021, 7,283,022 Class B Shares were issuable on exercise of outstanding options. Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Trading Symbols: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). For more information, please visit www.shaw.ca.

Liquidity and capital resources

In the three-month period ended November 30, 2021, the Company generated $236 million of free cash flow. Shaw used its free cash flow along with cash of $63 million and proceeds from the issuance of Class B Shares of $4 million to pay common share dividends of $148 million, pay $2 million in Transaction-related costs, and fund the net working capital change.

Debt structure and financial policy

The Company has an accounts receivable securitization program with a Canadian financial institution which allows it to sell certain trade receivables into the program. As at November 30, 2021, the proceeds of the sales were committed up to a maximum of $200 million (with $200 million drawn under the program as at November 30, 2021). The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables remain recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivable has no claim on any of the Company's other assets.

As at November 30, 2021, the net debt leverage ratio for the Company was 2.2x. The terms of the Arrangement Agreement require Shaw to obtain Rogers' consent prior to incurring certain types of indebtedness.

The Company calculates net debt leverage ratio as follows[1]:

(millions of Canadian dollars)	**November 30, 2021**	August 31, 2021
Short-term borrowings	**200**	200
Current portion of long-term debt	**1**	1
Current portion of lease liabilities	**111**	110
Long-term debt	**4,550**	4,549
Lease liabilities	**1,103**	1,135
Cash and cash equivalents	**(292)**	(355)
(A) Net debt[2]	**5,673**	5,640
(B) Adjusted EBITDA[2]	**2,526**	2,500
(A/B) Net debt leverage ratio[3]	**2.2x**	2.3x

(1) The following contains a breakdown of the components in the calculation of net debt leverage ratio, which is a non-GAAP ratio.
(2) See "Non-GAAP and additional financial measures."
(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies. See "Non-GAAP and additional financial measures" for further information about this ratio.

On November 2, 2020, the Company announced that it had received approval from the TSX to establish an NCIB program. The program commenced on November 5, 2020 and ended November 4, 2021. As approved by the TSX, the Company had the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020. In connection with the announcement of the Transaction on March 15, 2021, the Company suspended share buybacks under its NCIB program.

Shaw's credit facilities are subject to customary covenants which include maintaining minimum or maximum financial ratios.

	Covenant as at November 30, 2021	Covenant Limit
Shaw Credit Facilities		
Total Debt to Operating Cash Flow[(1)] Ratio	1.89:1	< 5.00:1
Operating Cash Flow[(1)] to Fixed Charges[(2)] Ratio	10.91:1	> 2.00:1

(1) Operating Cash Flow, for the purposes of the covenants, is calculated as net earnings before interest expense, depreciation, amortization, restructuring, and current and deferred income taxes, excluding profit or loss from investments accounted for on an equity basis, less payments made with regards to lease liabilities for the most recently completed fiscal quarter multiplied by four, plus cash dividends and other cash distributions received in the most recently completed four fiscal quarters from investments accounted for on an equity basis.

(2) Fixed Charges are broadly defined as the aggregate interest expense, excluding the interest related to lease liabilities, for the most recently completed fiscal quarter multiplied by four.

As at November 30, 2021, Shaw is in compliance with these covenants and based on current business plans, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants over the life of the borrowings which currently mature in December of 2024.

As at November 30, 2021, the Company had $292 million of cash on hand and its $1.5 billion bank credit facility was fully undrawn.

Based on the aforementioned financing activities, available credit facilities and forecasted free cash flow, the Company expects to have sufficient liquidity to fund operations, obligations and working capital requirements, including maturing debt, during the upcoming year. The terms of the Arrangement Agreement require that the Company maintain sufficient liquidity to pay an $800 million termination fee payable by Shaw in certain circumstances.

Cash Flow

Operating Activities

	Three months ended November 30,		
(millions of Canadian dollars)	**2021**	2020	Change %
Funds flow from operations	**491**	488	0.6
Net change in non-cash balances related to operations	**(129)**	(188)	31.4
	362	300	20.7

For the three months ended November 30, 2021, funds flow from operating activities increased over the comparable period in fiscal 2021 primarily due to a large increase in the net change in non-cash balances related to operations and a slight increase in the funds flow from operations. The net change in non-cash balances related to operations fluctuated over the comparative period due to changes in accounts receivable, inventory and other current asset balances, and the timing of payments of current income taxes payable and accounts payable and accrued liabilities.

Investing Activities

	Three months ended November 30,		
(millions of Canadian dollars)	**2021**	2020	Decrease
Cash used in investing activities	**(250)**	(232)	18

For the three months ended November 30, 2021, the cash used in investing activities increased over the comparable period in fiscal 2021 due primarily to an increase in additions to property, plant and equipment of $11 million and a decrease in proceeds on disposal of property, plant and equipment of $13 million received in the current period partially offset by a decrease in additions to equipment costs of $3 million and intangible assets of $2 million.

Financing Activities

The changes in financing activities during the comparative periods were as follows:

	Three months ended November 30,	
(millions of Canadian dollars)	**2021**	2020
Payment of lease liabilities [note 5]	**(30)**	(31)
Issue of Class B Shares [note 9]	**3**	-
Purchase of Class B Shares	**-**	(75)
Dividends paid on Class A Shares and Class B Shares	**(148)**	(152)
Dividends paid on Preferred Shares	**-**	(2)
	(175)	(260)

Contractual Obligations

There has been no material change in the Company's contractual obligations, including commitments for capital expenditures, between August 31, 2021 and November 30, 2021.

Accounting standards

The MD&A included in the Company's Annual Report for the year ended August 31, 2021 outlined critical accounting policies, including key estimates and assumptions that management has made under these policies, and how they affect the amounts reported in the 2021 Annual Consolidated Financial Statements. The MD&A also describes significant accounting policies where alternatives exist. See "Critical Accounting Policies and Estimates" in the Company's MD&A for the year ended August 31, 2021. The condensed interim Consolidated Financial Statements follow the same accounting policies and methods of application as the 2021 Annual Consolidated Financial Statements.

Related party transactions

The Company's transactions with related parties are discussed in its MD&A for the year ended August 31, 2021 under "Related Party Transactions" and under Note 29 of the Consolidated Financial Statements of the Company for the year ended August 31, 2021.

There has been no material change in the Company's transactions with related parties between August 31, 2021 and November 30, 2021.

Financial instruments

There has been no material change in the Company's risk management practices with respect to financial instruments between August 31, 2021 and November 30, 2021. See "Known Events, Trends, Risks and Uncertainties – Interest Rates, Foreign Exchange Rates and Capital Markets" in the Company's MD&A for the year ended August 31, 2021 and the section entitled "Financial Instruments" under Note 30 of the Consolidated Financial Statements of the Company for the year ended August 31, 2021.

Internal controls and procedures

Details relating to disclosure controls and procedures, and internal control over financial reporting (ICFR), are discussed in the Company's MD&A for the year ended August 31, 2021 under "Certification." As at November 30, 2021, there have been no changes in the Company's ICFR that have materially affected, or are reasonably likely to materially affect, the Company's ICFR in fiscal 2022.

Risks and uncertainties

The significant risks and uncertainties affecting the Company and its business are discussed in the Company's MD&A for the year ended August 31, 2021 under "Known Events, Trends, Risks and Uncertainties." There have been no material changes in the significant risks and uncertainties since that date.

Government regulations and regulatory developments

See the Company's MD&A for the year ended August 31, 2021 for a discussion of the significant regulations that affected our operations as of October 29, 2021. The following is a list of the significant regulatory developments since that date.

For a discussion of the regulatory approval processes related to the Transaction, see "Introduction – Shaw and Rogers Transaction" and "Known Events, Trends, Risks and Uncertainties – Risks Related to the Transaction" in the Company's MD&A for the year ended August 31, 2021 and "Introduction – Shaw Rogers Transaction" in this MD&A.

Broadcasting Act

Legislative Changes and Other Government Actions

On December 16, 2021, the Federal Government issued Ministerial mandate letters. The Minister of Canadian Heritage has been directed to "reintroduce legislation to reform the Broadcasting Act to ensure foreign web giants contribute to the creation and promotion of Canadian stories and music." The fulfillment of the foregoing Ministerial mandate could lead to legislative changes and the introduction of new regulatory measures that result in new costs and fees payable by the Company in connection with its provision of digital media services, result in new competition in the provision of broadcasting distribution services, and/or negatively impact the Company's financial results from broadcasting.

Radiocommunication Act

Consultation on a Policy and Licensing Framework for Spectrum in the 3800 MHz Band

In December 2021, Innovation, Science and Economic Development Canada (ISED) commenced a consultation on the policy and licensing framework for the 3800 MHz spectrum band (3650-4200 MHz). The consultation considers the implementation of pro-competitive measures, in the form of a set-aside, a cap, or combination of both, in the 3800 MHz auction. ISED also seeks comments on, among other things, licence tier sizes and conditions, and auction format and rules. The auction is anticipated to take place in early 2023. The outcome of this auction could increase competition in the wireless sector.

Copyright Act

Legislative Changes and Other Government Actions

The Minister of Canadian Heritage and the Minister of Innovation, Science and Industry were directed, pursuant to mandate letters issued December 16, 2021, "to amend the *Copyright Act* to further protect artists, creators and copyright holders, including to allow resale rights for artists." Any amendments to the *Copyright Act* that modify the terms and conditions applicable to the use of content, including new rights and/or the scope of flexibility pursuant to exceptions under the *Copyright Act*, could create increased fees and negatively impact the business practices of the Company, as well as the ability to serve our customers.

Privacy and Anti-Spam Legislation

The Minister of Innovation, Science and Industry was directed, pursuant to a mandate letter issued December 16, 2021, to introduce legislation to advance the Digital Charter, strengthen privacy protections for consumers and provide a clear set of rules that ensure fair competition in the online marketplace.

Changes to privacy laws and regulations resulting from the reinstatement and passage of Bill C-11 or the introduction of a new privacy bill will require the Company to incur costs to adjust its policies and practices related to privacy, as well as data collection, management, disposal and access practices. Such changes could: result in significant new costs payable by the Company to ensure compliance; limit the Company's ability to utilize data in support of its business, as well as preserve and expand its customer base; and expose the Company to the risk of significant penalties and claims (including pursuant to a proposed right of private action) in connection with any non-compliance.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators, including the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three months ended November 30, 2021 were authorized for issue by the Audit Committee on January 11, 2022.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2021 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2021.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended November 30,	
	2021	2020
Revenue		
Wireline	**1,057**	1,056
Wireless	**332**	317
	1,389	1,373
Intersegment eliminations	**(3)**	(3)
	1,386	1,370
Adjusted EBITDA[(1)]		
Wireline	**524**	532
Wireless	**109**	75
	633	607
Restructuring costs	**-**	(12)
Amortization	**(300)**	(305)
Operating income	**333**	290
Current taxes		
Operating	**87**	35
Other/non-operating	**3**	1
	90	36

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2021 made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. A total of $nil has been paid in fiscal 2022 relating to these initiatives. The remaining costs are expected to be paid out within the next 2 months.

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

Interest Expense

	Three months ended November 30,	
	2021	2020
Interest expense – long-term debt	**55**	55
Interest income – short-term (net)	**(1)**	-
Interest on lease liabilities (note 5)	**11**	11
	65	66

9. SHARE CAPITAL

Changes in share capital during the three months ended November 30, 2021 are as follows:

	Class A Shares		Class B Shares	
	Number	$	Number	$
August 31, 2021	22,372,064	2	476,537,262	4,197
Issued upon stock option plan exercises	-	-	128,158	4
November 30, 2021	**22,372,064**	**2**	**476,665,420**	**4,201**

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and ended November 4, 2021. As approved by the TSX, the Company had the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020. In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

10. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended November 30,	
	2021	2020
Numerator for basic and diluted earnings per share ($)		
Net income	**196**	163
Deduct: dividends on Preferred Shares	**-**	(2)
Net income attributable to common shareholders	**196**	161
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	513
Effect of dilutive securities [(1)]	**2**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	513
Basic and diluted earnings per share ($)	**0.39**	0.31

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three months ended November 30, 2021, nil (November 30, 2020 – 6,736,626) options were excluded from the diluted earnings per share calculation.

[all amounts in millions of Canadian dollars, except share and per share amounts]

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at November 30, 2021.

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,711	824	183	98	34	5	2,855
Wireless	352	104	-	-	-	-	456
Total	**2,063**	**928**	**183**	**98**	**34**	**5**	**3,311**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

12. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended November 30,	
	2021	2020
Employee salaries and benefits[1]	**164**	153
Purchase of goods and services	**589**	622
	753	775

[1] For the three months ended November 30, 2021, employee salaries and benefits include $nil (November 30, 2020 - $12) in restructuring costs.

13. OTHER GAINS (LOSSES)

	Three months ended November 30,	
	2021	2020
Transaction costs [1]	**(2)**	–
Other [2]	**(2)**	(2)
	(4)	(2)

[1] The Company has incurred a number of Transaction-related advisory, legal, financial, and other professional fees in connection with the proposed acquisition of Shaw by Rogers. As these costs do not relate to ongoing operations, they have been classified as non-operating expenses. Please refer to Note 1 for further details on the Transaction.

[2] Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

16. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	November 30, 2021		August 31, 2021	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,551**	**5,110**	4,550	5,263

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

This is **Exhibit G** in support of the

Affidavit of Christopher Hickey,

solemnly affirmed before me on April 22, 2022

PUBLIC 11924

Dear Fellow Shareholders:

I am incredibly proud of our Company and our employees as I reflect on over 50 years of providing exceptional products and services to Canadians. Shaw's culture has enabled and powered the innovative and vital services we provide to our customers and communities. We have built a powerful combination of assets, from our extensive Fibre+ infrastructure and strengthening wireless network, to our 9,400 engaged and passionate employees. For over five decades, we have created and nurtured an organization that centres around our customers and connects our communities.

The benefits of our relentless customer focus and facilities-based investments have never been more clear with the emergence of COVID-19. While collectively we are still dealing with the evolving impacts nearly two years on, the pandemic has highlighted the essential role of strong and ubiquitous connectivity services, which will only become more critical as economic shifts and technology advancements accelerate Canada's digital transformation. When Canadians have needed us most, we delivered faster speeds, better value and outstanding customer service.

In our communities, we continue to identify and support emerging needs that were accentuated by the pandemic and important social movements impacting employees, customers, and Canadians. We were delighted that our signature sponsorship, the Shaw Charity Classic, was able to return after being cancelled last year due to the pandemic. This Calgary-based event has now raised $75 million for more than 200 charities supporting Alberta youth since 2013.

Despite the significant uncertainty over the last 18-months, we stayed focused on our near-term priorities, including balanced and profitable results, delivering consolidated adjusted EBITDA growth of 4.6% and free cash flow of approximately $961 million in fiscal 2021.

Our fiscal 2021 results reflect continued strong execution, but also mark the beginning of a bold new path for Shaw with the announcement of our combination with Rogers on March 15, 2021. This critical next step in our evolution was taken with our customers' best interests at the forefront. A technology revolution is clearly upon us, with next-generation networks, like 5G, breaking down the boundaries of what's possible, but also requiring significant scale and investment. Tomorrow's networks need to be even stronger, more expansive and more capable in order to compete vigorously and to meet the needs of Canada's emerging connected society.

Wireless

In fiscal 2021, we welcomed approximately 295,000 wireless customers to the Shaw and Freedom network. With the launch of Shaw Mobile in July 2020, we focused on bundling Shaw Mobile wireless with our Internet offerings, enhancing the value proposition for our customers.

Supporting our wireless growth has been the continued investment in our network and distribution channels to elevate the overall customer experience. We are investing in the deployment of our 700 MHz and 600 MHz spectrum to further enhance our existing LTE service, in small cell technology, and additional retail capacity, where Shaw Mobile and Freedom Mobile can now be found in over 200 and 800 locations, respectively. Not only did we modernize and expand our retail presence, but we also improved our digital capabilities, shifting to digital self-serve and online fulfillment of wireless services, ensuring a safe environment for our employees and customers in the face of ongoing COVID uncertainty.

Wireline

With unprecedented demand for Internet access from our customers, our Wireline business continues to be resilient. Investments in network infrastructure have been a cornerstone throughout our history. Not only have we handled the increased Internet usage with ease, but we also introduced even faster service tiers, such as Fibre+ Gig 1.5, designed to provide even the heaviest users the bandwidth they need. With our new Fibre+ Gateway 2.0 modem we introduced the latest WiFi technology and enabled the launch of Shaw Gig WiFi to most of our major markets in western Canada. Outside of our customers' homes, we continue to provide them with access to Canada's largest WiFi network.

Small businesses continue to be the heart of our economy and our Shaw Business division was there to support them throughout the challenges with COVID-19. By collaborating with global scale technology leaders, our growing "Smart" suite of managed services provide businesses of all sizes the tools they need to grow their business and actively participate in the growing digital economy. While Shaw Business was not immune to the challenging backdrop caused by the pandemic, strong relationships with our customers and flexible solutions enabled modest revenue growth in an otherwise difficult environment throughout fiscal 2021.

Looking ahead

As history has shown, network investment is the foundation for connecting Canadians. Continued investment in world-leading network infrastructure, at scale, has never been so critical to Canada's future as it is now. It is fundamental to delivering leading and innovative services and to compete on the global stage. With a stronger, national network presence, the combined entity that will emerge from the proposed arrangement with Rogers will provide significantly more benefits to Canadians much sooner than would otherwise be possible. We look forward to working closely with the Rogers team to support the close of the transaction, expected to occur in the first half of 2022.

In closing, I would like to send my sincerest appreciation to our Board of Directors, for providing a clear vision and stewardship of the Company. Also, to our shareholders, for your overwhelming support for the combination with Rogers. To all of our valued Shaw customers – thank you for inspiring us to always look to the future, to be better, and to be bold. Finally, to all Shaw employees, past and present – your dedication and contributions are invaluable. Thank you for your strong leadership.

[Signed]

Bradley S. Shaw
Executive Chair & Chief Executive Officer

FORWARD

Tabular dollar amounts are in millions of Canadian dollars, except per share amounts or unless otherwise indicated. This Management's Discussion and Analysis (MD&A) should be read in conjunction with the Consolidated Financial Statements. The terms "we," "us," "our," "Shaw" and "the Company" refer to Shaw Communications Inc. or, as applicable, Shaw Communications Inc. and its direct and indirect subsidiaries as a group. This MD&A is current as at October 29, 2021 and was approved by Shaw's Board of Directors.

CAUTION CONCERNING FORWARD LOOKING STATEMENTS

Statements included in this MD&A that are not historic constitute "forward-looking information" within the meaning of applicable securities laws. They can generally be identified by words such as "anticipate," "believe," "expect," "plan," "intend," "target," "goal," and similar expressions (although not all forward-looking statements contain such words). All of the forward-looking statements made in this report are qualified by these cautionary statements. Forward looking statements in this MD&A include, but are not limited to, statements relating to:

- the expected impact of the COVID-19 pandemic;
- future capital expenditures;
- proposed asset acquisitions and dispositions;
- anticipated benefits of the Transaction (as defined below) to Shaw and its securityholders, including corporate, operational, scale and other synergies and the timing thereof;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of applicable approvals under the *Broadcasting Act* (Canada), the *Competition Act* (Canada) and the *Radiocommunication Act* (Canada) (collectively, the "Key Regulatory Approvals") related to the Transaction;
- the ability of the Company and Rogers (as defined below) to satisfy the other conditions to the closing of the Transaction and the anticipated timing for closing of the Transaction;
- expected cost efficiencies;
- expectations for future operating performance;
- business and technology strategies and measures to implement strategies;
- expected growth in subscribers and the products/services to which they subscribe;
- competitive strengths and pressures;
- expected project schedules, regulatory timelines, and completion/in-service dates for the Company's capital and other projects;
- the expected number of retail outlets;
- the expected impact of new accounting standards, recently adopted or expected to be adopted in the future;
- the effectiveness of any changes to the design and performance of the Company's internal controls and procedures;
- the expected impact of changes in laws, regulations, decisions by regulators, or other actions by governments or regulators on the Company's business, operations and/or financial performance or the markets in which the Company operates;
- the expected impact of any emergency measures implemented or withdrawn by governments or regulators;
- timing of new product and service launches;
- the resiliency and performance of the Company's wireline and wireless networks;
- the deployment of (i) network infrastructure to improve capacity and coverage, (ii) and new technologies, including next generation wireless technologies such as 5G;
- expected changes in the Company's market share;
- the ability of Shaw Mobile to drive customer growth;
- the cost of acquiring and retaining subscribers and deployment of new services;
- expansion of and changes in the Company's business and operations and other goals and plans; and
- execution and success of the Company's current and long term strategic initiatives.

Forward-looking statements are based on assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances as at the current date. The Company's management believes that its assumptions and analysis in this MD&A are reasonable and that the expectations reflected in the forward-looking statements contained herein are also reasonable based on the information available on the date such statements are made and the process used to prepare the information.

Considering the uncertain and changing circumstances surrounding the COVID-19 pandemic and the related response from the Company, governments (federal, provincial and municipal), regulatory authorities, businesses and customers, there continues to be inherently more uncertainty associated with the Company's assumptions as compared to prior periods. These assumptions, many of which are confidential, include, but are not limited to management expectations with respect to:

- general economic conditions, including the impact on the economy and financial markets resulting from the COVID-19 pandemic and other health risks;
- the impact of the COVID-19 pandemic and other health risks on the Company's business, operations, capital resources, and/or financial results;
- anticipated benefits of the Transaction to the Company and its security holders;
- the timing, receipt and conditions of required regulatory or other third-party approvals, including but not limited to the receipt of the Key Regulatory Approvals related to the Transaction;
- the ability of the Company and Rogers to satisfy the other conditions to closing of the Transaction in a timely manner and the completion of the Transaction on expected terms;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the impact of the announcement of the Transaction, and the dedication of substantial Company resources to pursuing the Transaction, on the Company's ability to maintain its current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the ability to satisfy the other expectations and assumptions concerning the Transaction and the operations and capital expenditure plans for the Company following completion of the Transaction;
- future interest rates;
- previous performance being indicative of future performance;
- future income tax rates;
- future foreign exchange rates;
- technology deployment;
- future expectations and demands of our customers;
- subscriber growth;
- incremental costs associated with growth in wireless handset sales;
- pricing, usage and churn rates;
- availability and cost of programming, content, equipment and devices;
- industry structure, conditions, and stability;
- regulation, legislation, or other actions by governments or regulators (and the impact or projected impact on the Company's business);
- the implementation or withdrawal of any emergency measures by governments or regulators (and the impact or projected impact on the Company's business, operations, and/or financial results);
- access to key suppliers and third-party service providers and their goods and services required to execute on the Company's current and long term strategic initiatives on commercially reasonable terms;
- key suppliers performing their obligations within the expected timelines;
- retention of key employees;
- the Company being able to successfully deploy (i) network infrastructure required to improve capacity and coverage, and (ii) new technologies, including next generation wireless technologies such as 5G;
- operating expense and capital cost estimates associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores and employees to reduce the spread of COVID-19;
- the Company's access to sufficient retail distribution channels;
- the Company's access to the spectrum resources required to execute on its current and long-term strategic initiatives; and
- the Company being able to execute on its current and long term strategic initiatives.

You should not place undue reliance on any forward-looking statements. Many factors, including those not within the Company's control, may cause the Company's actual results to be materially different from the views expressed or implied by such forward-looking statements, including, but not limited to:

- changes in general economic, market and business conditions, including the impact of the COVID-19 pandemic and other health risks, on the economy and financial markets which may have a material adverse effect on the Company's business, operations, capital resources and/or financial results;
- increased operating expenses and capital costs associated with the implementation of enhanced health and safety measures for the Company's offices, retail stores, and employees in response to the COVID-19 pandemic;
- the failure of the Company and Rogers to receive, in a timely manner and on satisfactory terms, the necessary regulatory or other third-party approvals, including but not limited to the Key Regulatory Approvals, required to close the Transaction;
- the ability to satisfy, in a timely manner, the other conditions to the closing of the Transaction;
- the ability to complete the Transaction on the terms contemplated by the Arrangement Agreement (as defined below) between the Company and Rogers;
- the ability to successfully integrate the Company with Rogers in a timely manner;
- the ability of Rogers to obtain the debt financing required to complete the Transaction through the satisfaction of the limited conditions of the debt commitment letter for the debt financing and the absence of events that would prevent Rogers from consummating the debt financing;
- the Company's failure to complete the Transaction for any reason could materially negatively impact the trading price of the Company's securities;
- the announcement of the Transaction and the dedication of substantial Company resources to pursuing the Transaction may adversely impact the Company's current business relationships (including with current and prospective employees, customers and suppliers) and its current and future operations, financial condition and prospects;
- the failure of the Company to comply with the terms of the Arrangement Agreement may, in certain circumstances, result in the Company being required to pay the termination fee to Rogers, the result of which will or could have a material adverse effect on the Company's financial position and results of operations and its ability to fund growth prospects and current operations;
- changes in interest rates, income taxes and exchange rates;
- changes in the competitive environment in the markets in which the Company operates and from the development of new markets for emerging technologies;
- changing industry trends, technological developments and other changing conditions in the entertainment, information, and communications industries;
- changes in laws, regulations and decisions by regulators or other actions by governments or regulators that affect the Company or the markets in which it operates;
- any emergency measures implemented or withdrawn by governments or regulators;
- technology, privacy, cyber security, and reputational risks;
- disruptions to service, including due to network failure or disputes with key suppliers;
- the Company's ability to execute its strategic plans and complete its capital and other projects on a timely basis;
- the Company's ability to grow subscribers and market share;
- the Company's ability to have and/or obtain the spectrum resources required to execute on its current and long-term strategic initiatives;
- the Company's ability to gain sufficient access to retail distribution channels;
- the Company's ability to access key suppliers and third-party service providers required to execute on its current and long-term strategic initiatives on commercially reasonable terms;
- the ability of key suppliers to perform their obligations within expected timelines;
- the Company's ability to retain key employees;
- the Company's ability to achieve cost efficiencies;
- the Company's ability to recognize and adequately respond to climate change concerns or public and governmental expectations on environmental matters;
- the Company's status as a holding company with separate operating subsidiaries; and
- other factors described in this MD&A under the heading "Known Events, Trends, Risks and Uncertainties."

The foregoing is not an exhaustive list of all possible factors.

Should one or more of these risks materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described in this MD&A.

Any forward-looking statement speaks only as of the date on which it was originally made and, except as required by law, the Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect any change in related assumptions, events, conditions or circumstances. All forward-looking statements contained in this MD&A are expressly qualified by this statement.

ABOUT OUR BUSINESS

CONSUMER

Our Consumer division connects people and families in British Columbia, Alberta, Saskatchewan, Manitoba, and northern Ontario through our Fibre+ network.

Shaw Direct is one of two licensed satellite Video services available across Canada.

WIRELESS

Shaw Mobile currently operates in British Columbia and Alberta. Freedom Mobile currently operates in Ontario, British Columbia and Alberta.

Over 19 million Canadians reside within our current mobile wireless network service area.

BUSINESS

Our Business division leverages our network infrastructure with a product suite targeting businesses of all sizes.

In the following sections we provide selected financial highlights and additional details with respect to our Wireline and Wireless divisions as well as our network.

Select Financial and Operational Highlights

Basis of presentation

We adopted IFRS 16, Leases ("IFRS 16") effective September 1, 2019. The adoption of IFRS 16 had a significant effect on our reported results and we adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented were not restated and continue to be reported under International Accounting Standard (IAS) 17 – Leases ("IAS 17"), as permitted by the specific transition provisions of IFRS 16. The cumulative effect of the initial adoption of IFRS 16 was reflected as an adjustment to the impacted balance sheet accounts as at September 1, 2019. Accordingly, fiscal 2021 and fiscal 2020 operating results are reported in accordance with IFRS 16 while fiscal 2019 operating results are reported in accordance with IAS 17 and are therefore not comparable.

Shaw and Rogers Transaction

On March 15, 2021, Shaw announced that it entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction").

Holders of Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively, the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. As at March 13, 2021, when the Arrangement Agreement was signed, the value of the consideration attributable to the Class A Shares and Class B Shares held by the Shaw Family Shareholders (calculated using the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021) was equivalent to $40.50 per share.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators. Shaw and Rogers are working cooperatively and constructively with the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC) in order to secure the requisite approvals. Subject to receipt of all required approvals and satisfaction of all closing conditions, closing of the Transaction is expected to occur in the first half of 2022.

Redemption of Shaw's Preferred Shares

Pursuant to the terms of the Arrangement Agreement, on May 20, 2021, Rogers exercised its right to require the Company to redeem all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares", and together with the Series A Shares, the "Preferred Shares") at the redemption price of $25.00 per share (the "Redemption Price") plus any accrued and unpaid dividends up to but excluding the redemption date of June 30, 2021 (the "Redemption Date").

On June 30, 2021, the Company redeemed all of its issued and outstanding Preferred Shares in accordance with their terms (as set out in the Company's articles) at the Redemption Price, less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

Further information regarding the Transaction is contained in the management information circular filed April 23, 2021 on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Impact of Coronavirus (COVID-19) Pandemic

COVID-19 continues to significantly impact Canadians and economies around the world as we experience new waves and variants of the virus. The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, connectivity of our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. In fiscal 2021, Shaw's networks have proven their resiliency and performed well despite the increase in usage and extended peak hours resulting from the impacts of COVID-19.

While the financial impacts from COVID-19 in fiscal 2021 were not material, the situation is still uncertain in terms of its magnitude, outcome, duration, resurgence and/or subsequent waves/variants. Consumer behavior impacts remain uncertain and could still change materially, including the potential downward migration of services, acceleration of cord-cutting and reduced ability to pay their bills, all due to the challenging economic situation. Shaw Business, which primarily serves the small and medium sized market, continues to be particularly vulnerable to COVID-19 related restrictions, including mandated business closures, capacity restrictions or further social distancing measures.

Despite the absence of material financial impacts, the pandemic affected the Company causing increased wireline network usage as well as extended peak hours. The Company also experienced increased demand for wireless voice services and a decrease in wireless roaming revenue.

The Company's business resumption plan, designed for the gradual and safe re-introduction of employees to the workplace, is being implemented in phases based on the current risks posed by the pandemic and in response to government-imposed restrictions on businesses and individuals. We continue to be in constant contact with public safety and government officials at all levels, as well as key suppliers, partners and customers. As at the date of this MD&A, the majority of our employees continue to work from home, but our retail stores have re-opened, albeit some in a reduced capacity.

The environment remains uncertain in terms of the pandemic's magnitude, outcome and duration. Consumer behaviors could still change materially, including the potential downward migration of services, acceleration of cord cutting and reduced ability of customers to pay their bills, all due to an unpredictably challenging economic situation. Shaw Business primarily serves the small and medium sized market, which is particularly vulnerable to COVID-19 related restrictions, including mandated business closures, capacity restrictions or further social distancing and/or vaccination verification measures.

As the COVID-19 pandemic continues to evolve, the Company's focus continues to be on the safety and health of its employees, the reliability of its network infrastructure, and the nimble responsiveness to our customers' needs.

As an ongoing risk, the magnitude, outcome, duration, resurgence and/or subsequent waves and variants of the COVID-19 pandemic is still unknown and subject to a significant amount of uncertainty at this time, as is the efficacy and duration of the government interventions. For further detail, see "Known Events, Trends, Risks and Uncertainties – Coronavirus (COVID-19)."

Fiscal 2021 Highlights

Despite the continued challenging environment created by the ongoing impact of the COVID-19 pandemic throughout the year, in fiscal 2021, our business delivered consolidated adjusted EBITDA growth of 4.6% year-over-year and free cash flow of approximately $961 million while demonstrating the resiliency and the critical nature of the connectivity services we provide.

To deliver a seamless connectivity experience in the fast-approaching 5G era, we announced our combination with Rogers on March 15, 2021, followed by resounding support from holders of the Class A Shares and Class B Shares at the special meeting to approve the combination held on May 20, 2021. Rogers and Shaw recognize that we can do so much more by coming together. Canadians, regardless of where they reside, need access to these vital services which requires significant ongoing investment, supported by a stable regulatory framework. Throughout the extraordinary change we have faced, the entire team at Shaw executed on its fiscal 2021 plan, ensuring that we continue to meet the needs of our customers. In the months ahead, we will collectively work in support of closing the transaction with Rogers.

In fiscal 2021, wireless investments included the deployment of 700 MHz spectrum, which is virtually complete in western Canada and 80% complete nationwide, and 600 MHz spectrum, which reached 80% in Calgary and 60% in Vancouver and the greater Toronto area (the "GTA"). While the network enhancements have contributed to improving postpaid churn results, the increased competitive activity, including the launch of unlimited plans and other aggressive offers in the market, resulted in postpaid churn of 1.41% in fiscal 2021, which is comparable to the previous fiscal year.

On April 6, 2021, ISED published its list of applicants to participate in the 3500 MHz spectrum auction, confirming that Shaw elected not to participate in the auction. The auction commenced in June 2021 and provisional results were published on July 29, 2021.

In fiscal 2021, Shaw Mobile continued its growth among consumers in British Columbia and Alberta who want to bundle their Shaw Wireline Internet services with mobile services.

Freedom Mobile continued to provide stable results in fiscal 2021 in the face of persistent competition in the wireless market and significant challenges with retail closures during the pandemic.

In fiscal 2021, the Company built upon its consumer Wireline offerings with the introduction of a new speed tier – Fibre+ Gig 1.5 – to the majority of its western Canadian Wireline operating footprint, specifically targeting heavy data users who require ultrafast speeds. The Company subsequently announced Shaw Gig WiFi with the release of the WiFi 6-certified Shaw Fibre+ Gateway 2.0 modem. Lastly, the Company completed the roll-out of its IPTV services to 99.5% of its Wireline operating footprint in western Canada.

Our Business division also continued to grow despite challenging economic and social circumstances. The introduction in February 2021 of a 1.5 gigabits-per-second (Gbps) speed tier addresses the growing demand of businesses for faster speeds and more bandwidth.

In fiscal 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 million. In connection with the announcement of the proposed Transaction on March 15, 2021, the Company suspended share buybacks under its normal course issuer bid (NCIB) program. As at the end of fiscal 2021, the net debt leverage ratio was 2.3x[1].

[1] Net debt leverage ratio is a non-GAAP ratio and net debt, which is a component of net debt leverage ratio, is a non-GAAP financial measure. Net debt leverage ratio and net debt are not standardized measures under IFRS and may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for further information about this measure and ratio.

Global Technology Partnerships

Shaw has access to global-scale technology initiatives through partnerships with best-in-class service and equipment providers and innovation leaders. This approach allows us to leverage our existing assets, where we have strength and expertise, while also ensuring our investments are aligned with industry leaders to support the development, maintenance and advancement of new technology where it is impractical, or we lack scale, for us to do so on a standalone basis. This allows us to efficiently deploy capital resources, and manage our costs, while advancing the innovation, performance and reliability of our products and services.

We have a series of significant and strategic relationships with global leaders on the following initiatives:

- Shaw BlueCurve, a technology that provides customers with greater control over their home WiFi experience (through the BlueCurve Home app and Pods) and supports IPTV, is powered by the Fibre+ Gateway (XB6) and Fibre+ Gateway 2.0 (XB7) Data over Cable Interface Specification (DOCSIS) version 3.1 advanced WiFi modems developed by Comcast (see discussion under "Consumer Services");
- the deployment of our wireless LTE network, which was designed, planned, and deployed in partnership with NOKIA, a global leader in mobile wireless technology and solutions (see discussion under "Wireless"); and
- our "Smart" suite of business services that includes SmartWiFi, SmartTarget, SmartSecurity, SmartSurveillance, and Smart Remote Office, each in collaboration with Cisco Meraki, as well as SmartVoice in collaboration with Broadsoft (see discussion under "Business Services").

Our Wireless division provides wireless voice and data services with the option of postpaid or prepaid billing. Our Wireless division was formed following the acquisition of Wind Mobile (now Freedom Mobile) in March 2016. Our Wireless division covers approximately 50% of the Canadian population with Shaw Mobile currently operating in British Columbia and Alberta markets and Freedom Mobile providing services in British Columbia, Alberta, and Ontario markets.

Freedom Mobile Big Gig Unlimited, Absolute Zero and Prepaid Plans

In fiscal 2021, Freedom Mobile continued its Big Gig Unlimited and Absolute Zero campaigns. Paired with popular devices and the strength and capacity of our LTE network, our Big Gig Unlimited and Absolute Zero plans continue to be available to Canadians.

Freedom Mobile customers can either bring their own device to the network or participate in one of Freedom Mobile's discretionary wireless handset discount plans – MyTab or Absolute Zero. MyTab allows Freedom Mobile customers to pay a discounted price for a handset upfront and a predetermined monthly Tab charge in addition to the rate plan cost. Absolute Zero allows Freedom Mobile customers to receive an eligible handset for $0 upfront, $0 extra per month and $0 owing after 24 months.

Growth of Shaw Mobile

On July 30, 2020, the Company launched Shaw Mobile in western Canadian markets. Leveraging Shaw's LTE and Fibre+ networks, along with Canada's largest WiFi service, Shaw Mobile provides Shaw Internet customers with an innovative, more valuable connectivity experience.

Through fiscal 2021, western Canadians have enjoyed the value that Shaw Mobile paired with Shaw's Fibre+ network delivers. Shaw Mobile provides Shaw Internet customers with attractive bundling opportunities, combined with the ability to customize their mobile data requirements through two rate plans – By The Gig and Unlimited Data.

Wireless Distribution Network

In fiscal 2021, Freedom Mobile continued to modernize Freedom-branded stores across the country with the key focus on maximizing customer experience and the safety of both our customers and employees considering the COVID-19 environment. Freedom Mobile's full suite of products continue to be available in over 800 locations across Ontario, Alberta, and British Columbia through our corporate, dealer, and retail partners. In addition, we have over 300 "countertop" and "grab & go" locations in independent retail outlets and store-within-a-store environments, catering specifically to the prepaid market.

During fiscal 2021, the Shaw Mobile retail presence expanded by adding 11 net new locations to our corporate network for a total of 32 as at August 31, 2021. Combined with our national retail partners, Walmart and Loblaws and a new partnership launched in August 2021 with Best Buy, Shaw Mobile is now available at over 200 retail locations in Alberta and British Columbia.

During the lockdowns and store closures in response to COVID-19, the Company fostered the continued growth of its total Wireless subscriber base by introducing self-serve options and activations: Shaw Mobile, through SIM card distribution to existing customers and Freedom Mobile through online ordering of prepaid services and online chat to order postpaid services.

Wireless Network Upgrades

Supporting our Wireless revenue growth are the investments we made in our wireless LTE network and customer service capabilities. Wireless network investments to improve the customer experience continue to be a priority in the areas in which we operate and serve Wireless customers. Through years of thoughtful and strategic capital investing, we have evolved our facilities-based wireless network to meet the needs of our Shaw Mobile and Freedom Mobile customers. See “Shaw’s Wireless Network” for further details on Shaw’s wireless network upgrades.

Seasonality in Wireless Subscriber Activity

Wireless subscriber activity is influenced by the launch of popular new mobile devices, seasonal promotional periods and the level of competitive intensity. Our first and fourth quarters typically experience higher volumes of wireless competitive activity as a result of back to school and holiday season-related consumer behaviour. Aggressive promotional offers are often advertised during these periods which can impact our Wireless subscriber metrics. Shaw’s Wireless business does not depend on any single customer or concentration of customers.

Furthermore, due to uncertainties relating to the severity, duration, and continuing impact of the COVID-19 pandemic, it is difficult at this time to estimate the impacts of the COVID-19 pandemic on our Wireless business and future financial results. Therefore, the trends experienced during the COVID-19 pandemic, including impacts on consumer demand and spending, may not fully reflect the typical seasonal variations experienced by our Wireless business. Accordingly, it is difficult at this time to evaluate the impacts of the COVID-19 pandemic on the seasonality trends that normally characterize our Wireless business.

(1) See "Key Performance Drivers" for more information about this non-GAAP financial measure.

In our Wireline business, we have focused on enhancing our Fibre+ network and the in-home WiFi experience with Gig WiFi. In fiscal 2021, we continued to streamline and simplify manual processes that improve the customer experience and day-to-day operations for our employees, while still providing the necessary in-person engagements to support the customer experience.

In fiscal 2021, our focus remained on profitable growth and stable Wireline results. This included growth in higher quality Internet subscribers and improving overall customer account profitability by attracting and retaining higher value households with our 2-year ValuePlans for those who want faster Internet with a better customer experience in addition to Video and Wireless services. Through our introduction of Shaw Mobile and the bundling opportunities it provides, in fiscal 2021, more customers migrated to our higher tier Fibre+ Internet offerings which resulted in lower Internet churn.

Consumer Services

Our Consumer division provides residential customers with connectivity experiences on two platforms:

- **Wireline Services** – we provide broadband Internet, Shaw Go WiFi, Video and Phone services to customers connected to our local and regional Fibre+ network in British Columbia, Alberta, Saskatchewan, Manitoba and northern Ontario
- **Satellite Services** – we provide satellite Video services through Shaw Direct to customers across Canada

Internet

Shaw's residential Internet service offering is segmented into the following three tiers:

1. Fibre+ Max;
2. Fibre+ Essentials; and
3. Fibre+ Basics

to provide our consumers with a choice of download speeds ranging from up to 10 megabits-per-second (Mbps) to up to 1.5 Gbps.

In fiscal 2021, we continued to make investments in our Shaw Fibre+ network to meet the unprecedented demands for Internet access from our customers in fiscal 2021. We also introduced new services that respond to these rapidly evolving demands, while also aligning with our focus on profitable growth and stability.

In November 2020, the Company announced the launch of Fibre+ Gig 1.5 – a new Internet plan designed to provide gamers, streamers and other heavy data users with the speed and bandwidth they need for the many connected devices and data-heavy applications they use every day at home.

For our customers with harder to reach areas in their homes, Shaw's Fibre+ WiFi Pods create a mesh WiFi network to improve the overall customer experience. In September 2020, the Company introduced its next generation Fibre+ WiFi Pods to customers in Manitoba and Ontario, and to all customers in our Wireline operating footprint in December 2020. The new Pods are faster and have more range than the first generation which allows the Fibre+ Gateway modem to provide even more consistent WiFi coverage throughout the home by reducing WiFi dead spots.

In April 2021, the Company deployed its next generation Fibre+ Gateway 2.0 modem, powered by Comcast, which, as the first WiFi 6-certified modem in Canada, paved the way for the launch of Shaw Gig WiFi to most of our major markets in western Canada. Shaw Gig WiFi delivers WiFi download speeds across multiple devices of up to 1 Gbps, with reduced latency and a more consistent WiFi signal for our customers to connect all their devices at home. The Fibre+ Gateway 2.0 modem also includes a 2.5 Gbps port and can enable speeds beyond 1 Gbps to a wired device and/or multiple wireless devices in aggregate.

With over 3.6 million devices authenticated on our network and over 110,000 public access points covering locations from British Columbia to Ontario, we continue to see growth in usage of our Shaw Go WiFi network for Shaw Internet and Wireless customers. As an added value proposition, Wireless customers have access to over 950,000 additional "hotspots" by way of our Home Hotspot deployment.

In fiscal 2021, we continued to focus on our 2-year ValuePlans, which provide customers with price certainty over the term and resulted in lower churn rates on those plans.

Video

Our Wireline Video services offer a wide selection of standard definition (SD) and high definition (HD) television channels with access to a large selection of on-demand titles, including both free and paid movies, television shows, and music content.

Our Video customers can choose pre-selected packages with the most popular channels or start with a basic primary package and then add additional channels from a variety of sports, family, and other theme specialty packages, as well as individual channels offered on a channel-by-channel basis.

Leveraging our strategic partnership with Comcast, in fiscal 2021, we completed the deployment of our all-IP Video services, which are now available across 99.5% of our western Canadian Wireline operating footprint. We also continued to add new over-the-top (OTT) apps, including StingRay Music, Hayu, and Fite TV.

Our customers also have access to the BlueCurve TV app, which is free for all Shaw Video (Cable and Shaw Direct) customers and makes their TV subscription available over the Internet and on mobile devices. This includes access to live TV, video-on-demand, up to 200 hours of a customer's personal video recordings (PVR) from the cloud, and the ability to download any recordings to take on the go. In fiscal 2021, we enhanced Shaw TV by enabling customers to cast content from the BlueCurve TV app to their Chromecast-enabled devices.

Phone

Our Phone service offers a full-featured residential digital telephone service through our wireline network as a complement to our broadband Internet and Video services.

Broadcast Services

Shaw Broadcast Services utilizes our satellite network to provide distribution of English, French, third-language, Canadian, US, and International television and radio programming services to hundreds of multichannel operators.

Wholesale Wireline Network Services

Using our national and regional access wireline networks, we provide services to Internet service providers (ISPs), other communications companies, broadcasters, governments, and other businesses and organizations that require end-to-end Internet and data connectivity in Canada and the United States. We also engage in public and private peering arrangements with high-speed connections to major North American, European, and Asian networks and other tier-one backbone carriers. All service solutions are sold on 1, 3, or 5-year contract terms and pricing is negotiated based on the specific solution provided to the customer.

Satellite Services

Shaw Direct connects families across Canada with video and audio programming by satellite. Shaw Direct customers have access to over 370 digital video channels (including over 350 HD channels) and thousands of on-demand, pay-per-view (PPV) and subscription movie and television titles. In May 2020, the Company completed network upgrades which provided the ability for us to deliver English and French services in HD where available.

Our satellite customers are offered flexibility with each of our current primary TV packages, which include a base set of channels and tiered customization options depending on the size of the TV package. Shaw Direct customers can further customize their TV packages by adding additional theme packs, premium packages, and individual channels.

Shaw Direct is one of two licensed satellite Video services currently available across Canada. While Shaw Direct has many customers in urban centres, market penetration for satellite Video is generally stronger in rural areas. The service is marketed through Shaw Direct and a nationwide distribution network of third-party retailers.

During fiscal 2021, Anik F1R reached the end of its serviceable life and was decommissioned. The Company consolidated all Shaw Direct services onto two satellites, Anik G1 and Anik F2. Additional capacity was secured on Anik F3 to support C-band distribution provided by Shaw Broadcast Services.

A listing of our satellite capacity is provided below as at August 31, 2021:

Shaw Satellite Transponders

Transponders	Interest	Nature of Satellite
Anik G1	16 xKu-band	Leased
Anik F2	22 Ku-band	Leased(1)
Anik F3 (2)	1 C-band	Leased

(1) Effective October 1, 2019, the Company transferred its interest in 16 Anik F2 transponders, which it previously owned, back to Telesat Canada ("Telesat"), adjusted its satellite traffic on the Anik F1R and Anik F2 satellites, and renewed its capacity service agreements on 6 Anik F1R Ku-band transponders and 16 Anik F2 Ku-band transponders until the effective end-of-life date of such satellites.

(2) With Anik F1R reaching its end of serviceable life in fiscal 2021, Shaw leased capacity on Anik F3 to continue to provide distribution for a Shaw Broadcast Services customer on C-band to enable the customer to distribute its signals primarily throughout the arctic.

Seasonality in Consumer Subscriber Activity

While financial results for the Consumer division are generally not subject to significant seasonal fluctuations, subscriber activity may fluctuate from one quarter to another. Subscriber activity may also be affected by competition and Shaw's promotional activity. Further, satellite subscriber activity is modestly higher around the summertime when more subscribers have second homes in use. Our Consumer Video business does not depend on any single customer or concentration of customers.

Furthermore, due to uncertainties relating to the severity, duration and continuing impact of the COVID-19 pandemic, it is difficult at this time to estimate the impacts of the COVID-19 pandemic on our business and future financial results. Therefore, the trends experienced during the COVID-19 pandemic, including impacts on consumer demand and spending, may not fully reflect the typical seasonal variations experienced by our Consumer Wireline business. Accordingly, it is difficult at this time to evaluate the impacts of the COVID-19 pandemic on the seasonality trends that normally characterize our Consumer Wireline business.

BUSINESS

Business Services

Shaw Business provides connectivity solutions to business customers of all sizes, from home offices to medium and large-scale enterprises, by leveraging our business grade Fibre+ and fibre-to-the-premise (FTTP) networks.

The range of services offered by Shaw Business includes:

Fibre Internet

Our scalable, symmetrical fibre Internet solutions offer download speeds that range from up to 10 Mbps to more than 10 Gbps.

Business Internet

Shaw Business customers can choose from four packages with download speeds ranging from up to 75 Mbps to up to 1.5 Gbps. Each package comes with unlimited data usage as well as one dynamic and one static IP address.

In fiscal 2021, we announced the launch of a new 1.5 Gbps speed tier designed to give businesses of all sizes the speeds and bandwidth they need to use the data-heavy applications and cloud services required to manage and grow their operations. This new speed tier allows both new and existing customers to access download speeds up to 1.5 Gbps through one of two plans – Business Internet Gig 1.5 and SmartWiFi Gig 1.5.

Data Connectivity

Shaw Business provides secure private connectivity for business customers operating at multiple locations or connecting branch locations to a head office. Our Ethernet over DOCSIS (EoD) data service offers our customers symmetrical data speeds of up to 100 Mbps.

Voice Solutions

Shaw Business offers voice solutions from traditional analog to digital Business Phone and robust, fully-managed voice systems with unified communications functionality.

In addition to competitive long-distance rates across the globe and month-to-month uncontracted rates, Shaw Business Phone customers have 2, 3, and 5-year contract options to provide cost consistency for their business.

Video

Shaw Business provides Video and audio services for public viewing. Similar to our Consumer Video service, Business cable and satellite customers can choose from a selection of primary channel packages and may add from a variety of sports, family, and other theme specialty packages, and a number of individual channels that we offer on a channel-by-channel basis.

In February 2021, Shaw Business launched Community Living WiFi. Similar to our Hotel WiFi Casting product, Community Living WiFi provides a new market, independent senior facilities, with connectivity that allows their residents to cast video content from their personal devices to the television in their suite. This property management solution streamlines the guest authentication experience and is an entirely cloud-based solution that gives property owners the ability to monitor usage and network status.

Broadcast Video

Shaw Business delivers high-quality Video to service providers across North America in real time.

Collaboration Tools

Shaw Business offers a robust collaboration product offering, including Microsoft 365 to small and medium sized businesses. The solution includes Microsoft 365 Business Basic and Business Standard products.

Smart Suite Services

Shaw Business collaborates with global scale technology leaders to offer its "Smart" suite of managed business communications solutions. The Smart suite of services provides cost-effective enterprise grade managed IT and communications solutions for businesses of all sizes.

The Smart suite of services includes:

SmartVoice

SmartVoice is a unified communications solution that integrates instant messaging, presence, email, video conferencing, and a mobile application that is built on Broadsoft's BroadWorks platform. From comprehensive traditional phone features such as auto-attendant, hunt groups, and call recording to collaboration tools such as instant messenger and screen sharing, SmartVoice gives businesses the flexibility to work in innovative and efficient ways.

SmartVoice offers three different levels of packaging based on business needs and is available on 2, 3, or 5-year contract terms.

SmartWiFi

SmartWiFi is a fully-managed Internet solution deployed over Cisco Meraki's platform that provides wireless connectivity for employees, customers, and guests in the business location. SmartWiFi also enables access to a cloud portal where customers can manage their service, configure their set service identifiers (SSIDs) to gain insight from network analytics, and create a custom dashboard.

Available at download speeds of up to 75 Mbps, 300 Mbps, 750 Mbps, 1 Gbps, and 1.5 Gpbs and including wireless access points, SmartWiFi provides our Shaw Business customers with WiFi coverage on 1, 2, 3, or 5-year contract terms.

In the first quarter of fiscal 2021, we began increasing upload speeds for certain SmartWiFi packages. We also upgraded our 600 Mbps speed tier to 750 Mbps and introduced a new tier – SmartWiFi 300 with download speeds of up to 300 Mbps paired with upload speeds of up to 125 Mbps.

Smart Remote Office

Smart Remote Office allows business customers' employees to securely connect to their head office from anywhere. Smart Remote Office is a plug-and-play, no-touch provisioning solution that provides security and virtual private network (VPN) tunneling for employees working remotely.

SmartSecurity

SmartSecurity is a fully-managed network security platform deployed over Cisco Meraki's platform that protects a wired and WiFi network at the edge with access control, virus protection, the ability to control which applications run on the network, content filtering, and the connection of branch locations. A SmartSecurity premium package also includes the ability to set-up a secure VPN.

Shaw Business also offers LTE Backup, an add-on service for SmartSecurity which provides redundancy through a secondary Internet connection that ensures seamless and automatic failover in case of an outage.

SmartSecurity is available when bundled with SmartWiFi or Business Internet on 3 or 5-year contract terms.

SmartSurveillance

SmartSurveillance is a fully-managed, enterprise-grade security camera solution deployed over Cisco Meraki's platform. Managed through a cloud-portal, SmartSurveillance enables business owners to view footage and manage their cameras from anywhere using an intuitive on-line dashboard.

Sophisticated features, such as motion-based search and heat mapping, allow owners to quickly find footage of interest and identify activity patterns. SmartSurveillance can be bundled with SmartWiFi or Business Internet 75 and above on a 3 or 5-year contract term.

SmartTarget

SmartTarget is an all-in-one marketing and advanced insights solution that leverages the power of SmartWiFi and a new technology to give business owners a better understanding of their customers' wants and needs to help increase traffic at their physical locations, boost revenue, and build relationships with their customers.

With SmartTarget available as an add-on service to Shaw's SmartWiFi, business owners can get customer demographic insights when visitors join the business owner's guest WiFi network. Once their visitors/customers have opted-in, business owners can use the SmartTarget solution to create targeted emails, surveys, and coupons to help increase customer loyalty, build relationships, and boost store revenues.

Software Defined Wide Area Network (SD-WAN)

SD-WAN provides businesses with a better way to connect multiple offices in a scalable and cost-effective manner on a cloud-managed platform. With integrated security, multiple Internet links, seamless LTE failover, and intelligent path control, SD-WAN enables companies to deploy a resilient, cost-effective, and high-bandwidth connectivity solution.

Powered in partnership with Cisco Meraki, SD-WAN sites are connected by Internet links secured by our SmartSecurity service which provides network protection and cloud-based security policy updates to protect businesses from the latest vulnerabilities and network threats.

Session Initiation Protocol (SIP) Trunking

Our next-generation SIP Trunking solution, on the Broadsoft platform, delivers a centralized voice solution managed in an easy-to-use cloud portal. SIP allows customers to pay only for what they need with the ability to scale the system quickly as their businesses grow.

The integration with Broadsoft's platform provides businesses with access to unified communications features such as video conferencing, call queuing, and auto-attendant as well as the ability to join offices with SmartVoice and SIP into the same environment to reduce costs and increase efficiency.

Business Subscriber Activity

Despite the challenging circumstances due to the impacts of COVID-19 and the fact that 70% of Shaw Business revenue comes from the highly impacted small to medium sized business sector, Shaw Business still managed to achieve year-over-year revenue growth of approximately 3%. The majority of growth came from our small to medium sized business channel which demonstrates the resilience of this sector, the strength of our Smart suite of products, targeted "back to business promotions" and our sales efforts.

Our Converged Network

Throughout the challenging and unprecedented events brought about by the COVID-19 pandemic, we are proud of the strength of our converged networks, which are not just the core of our digital infrastructure – they are the backbone of our country's social and economic wellbeing. Connectivity has never been more critical for Canadians, and the importance of converged networks will only grow with Canada's accelerating digital transformation.

Shaw's Wireline Network

Our Fibre+ network combines the power of fibre, coaxial cable, and WiFi, and consists of our:

- North American fibre backbone;
- regional fibre optic and co-axial distribution networks; and
- local Shaw Go WiFi connectivity.

In fiscal 2021, Shaw launched its Fibre+ 1.5 Gigabit speed tier to the majority of its western Canadian Wireline operating footprint, while also increasing the upload speed of its Fibre+ 300, 750, Gig and 1.5 Gig tiers to up to 100 Mbps. Both of these upgrades were enabled by the deployment of DOCSIS 3.1 and Shaw's industry leading Mid-Split program, which significantly expands usable spectrum on the coaxial "last-mile" of Shaw's Fibre+ network.

The challenges and disruptions associated with the COVID-19 pandemic continued to drive increased network usage and extended peak hours in fiscal 2021. Despite the unprecedented and sustained increase in network demands, Shaw was able to maintain our virtually congestion free Internet experience, regardless of the time of day. Prior investments in our network infrastructure, and our Mid-Split upgrade in particular, allowed Shaw to quickly and seamlessly activate additional capacity. The design and resilient nature of Shaw's regional distribution and backbone networks also ensured our services remained stable during this time. The COVID-19 pandemic highlighted the critical importance of efficient, ongoing investment in facilities-based broadband networks.

Wireline Backbone

The backbone of Shaw's wireline network includes terabits of capacity over multiple fibres on two diverse cross-North America routes. The southern route principally consists of approximately 7,000 route kilometres of fibre located on routes between Seattle and New York City (via Vancouver, Calgary, Regina, Winnipeg, Toronto, Chicago, and Buffalo). The northern route consists of approximately 5,000 route kilometres of fibre between Prince George and Montreal (via Edmonton, Saskatoon, Winnipeg, Thunder Bay, Toronto, and Ottawa). Current fibre construction to extend our northern route from Prince George to North Vancouver is underway in collaboration with the federal government's Connect to Innovate and Connecting British Columbia programs.

These routes, along with a number of other secured capacity routes, provide redundancy for the network. Shaw also uses a marine route consisting of approximately 330 route kilometres from Seattle to Vancouver (via Victoria), and has secured additional capacity on routes between a number of cities, including (i) Vancouver and Calgary, (ii) Seattle and San Jose, (iii) Seattle and Calgary, (iv) Seattle and Vancouver, (v) Toronto and New York City, (vi) Toronto and Montreal, (vii) Edmonton and Fort McMurray, and (viii) Denver and Calgary.

During fiscal 2021, Shaw continued to increase the capacity on numerous backbone links to stay ahead of COVID-19 related growth in traffic.

Regional Distribution Network

We connect our backbone network to residential and business customers through our regional fibre optic and Fibre+ distribution networks.

Over the past decade, Shaw has driven fibre optic cable into every neighborhood we serve. Today, our customers' Internet traffic runs over a route comprising over 99.9% fibre optic cable. In the last few hundred metres between our fibre nodes in customers' neighborhoods and the home or business we serve, we leverage coaxial cable to deliver gigabit speeds to over 99% of our residential customers located in our western Canadian Wireline operating footprint. In 2020, we officially rebranded our broadband tiers to "Fibre+" to reflect the true nature of our network and to better articulate the strength of our network technology and strategy.

In fiscal 2021, we continued to leverage our DOCSIS 3.1 technology and Fibre+ Gateway 2.0 modem to launch our Fibre+ 1.5 Gig speed tier to the majority of homes and businesses across our western Canadian Wireline operating footprint. In fiscal 2021, we completed our Mid-Split program in our top 5 markets, and as of the date of this MD&A, the Mid-Split program was substantially completed across our western Canadian operating footprint. This upgrade allowed us to increase the upstream and downstream capacity available on our Fibre+ distribution network. Shaw was also able to quickly leverage this capacity during the COVID-19 pandemic to not only prevent network congestion, but to also launch our new Fibre+ Gig and 1.5 Gig speed tiers to virtually every home we serve in our western Canadian Wireline operating footprint.

In fiscal 2021, Shaw continued to optimize the capacity and efficiency of our wireline network by deploying fibre optic cable deeper into our access networks and closer to where our customers reside. We continue to increase the number of optical serving areas or "nodes" in the wireline network. This is a continuous process that we apply year-over-year to increase fibre optic usage in our wireline network. Driving fibre deeper into our network also supports wireless and business service deployments, as well as future services such as 5G, FTTP, or the newly released DOCSIS 4.0 specification, which are all potential building blocks for multi-gigabit symmetrical services over our existing infrastructure.

Additionally, in fiscal 2021, Shaw continued to leverage our converged network to enable the rapid and flexible deployment of small cells in support of our wireless network and preparations for 5G, due to the ability of our Fibre+ network to transport both power and multi-gigabit data speeds on one cable.

Shaw Go WiFi

Shaw has built Canada's most extensive WiFi network, Shaw Go WiFi. Shaw Go WiFi broadens a Shaw Internet customer's broadband experience beyond the home as a valuable extension of our customer wireline network experience. Over 3.6 million devices have authenticated to our carrier-grade Shaw Go WiFi network and there are over 110,000 public access points used by our customers in coffee shops, restaurants, gyms, malls, public transit, and other public spaces covering locations from British Columbia to Ontario. In addition to these public access points, Wireless customers can seamlessly access more than 950,000 Home Hotspots across western Canada, making it easier to stream and download at a friend's or relative's home.

In fiscal 2021, we continued investing in Shaw Go WiFi by upgrading some of the core elements and significantly increasing the number of Home Hotspots available for Wireless customers.

Shaw's Wireless Network

Supporting our Wireless revenue growth are the significant investments in our wireless network and customer service capabilities. We continued to execute on our operating plan to improve our network and deploy spectrum in an efficient manner. Wireless network investments to improve the customer experience continued to be a priority in the areas in which we operate and serve customers.

Shaw partnered with NOKIA to roll-out our next generation LTE wireless network in our existing markets in Ontario, Alberta, and British Columbia. In fiscal 2021, we continued to deploy our Extended Range LTE network, which leverages our 700 MHz wireless spectrum, to provide customers with improved in-building coverage as well as extending coverage. At the end of fiscal 2021, the deployment of our 700 MHz spectrum was virtually complete in western Canada and approximately 80% complete nationwide.

In fiscal 2021, Shaw continued to deploy its 600 MHz spectrum. At the end of fiscal 2021, the deployment of 600 MHz reached 80% coverage in Calgary and 60% coverage in Vancouver and the GTA.

In fiscal 2021, the Company continued to deploy small cell technologies (low powered wireless antennas and receivers with a range of 100m – 200m) designed to enhance coverage and performance in dense urban locations. As high-power towers keep the network signal strong across large distances, small cells suit more densely developed areas like city centres and popular venues by providing LTE/VoLTE quality speed, capacity, and coverage improvements in these high traffic areas. The deployment of small cell technology was further enhanced by the activation of additional macro sites and the recent upgrades to our Fibre+ network that provide the ability to power and backhaul network traffic.

In fiscal 2021, our operational support systems were enhanced to streamline customer activation capabilities and provide proactive monitoring capabilities to assist our operational teams with awareness of potential service issues in order to address them before they arise or to mitigate customer impact.

Private Wireless Networks

Shaw continues to provide Canadian market leadership in the Private Wireless Network space and build on its momentum, specifically within the mining industry. A Private Wireless Network (previously referred to as "Private LTE") is a complete, standalone cellular network that is used exclusively by the end customer for their business operations. In fiscal 2021, our first customer, Teck Resources Limited ("Teck"), moved to the production phase in their Private Wireless Network, enabling Autonomous Haulage Services at their Elkview operations in Sparwood, British Columbia. Contracts were also awarded for Teck's Highland Valley Copper Operations near Logan Lake, British Columbia in 2021.

Shaw continues to work with other industry partners to develop and deploy Private Wireless Networks.

Spectrum Holdings

Our Wireless division holds spectrum licences in British Columbia, Alberta, southern Ontario, and eastern Ontario. In some cases, licences are issued on a Tier 2 basis, which cover the relevant province or a large region within the relevant province. In other cases, licences are issued on a Tier 3 basis, which cover smaller regions within a province. On a Tier 2 basis, the Wireless division currently holds 40-50 MHz of AWS-1 and AWS-3 spectrum, 30 MHz of 600 MHz spectrum, and 10 MHz of 700 MHz spectrum in each of British Columbia, Alberta, and southern Ontario. In the Tier 2 area of eastern Ontario, the Wireless division holds 20 MHz of 600 MHz spectrum and 10 MHz of AWS-1 spectrum. In some Tier 3 regions within British Columbia, Alberta, southern Ontario, and eastern Ontario, the Wireless division holds an additional 0-40 MHz of 2500 MHz spectrum and 0-10 MHz of AWS-1 spectrum.

Climate Change and Environmental Responsibility

Shaw is committed to delivering a seamless connectivity experience to Canadians in an environmentally responsible and sustainable manner. A key focus area for the Company involves efficiency and innovation, which includes:

- **Reducing Consumption** – we support efforts to reduce employee, customer and enterprise consumption of:
  - a) Energy – through the use of energy efficient technologies;
  - b) Water – by reducing water consumption in Shaw owned buildings; and
  - c) Paper – by continuing to promote e-bill and efficient printing behaviours amongst employees and customers to reduce paper use by shifting interactions to digital platforms as part of the Company's digital transformation.
- **Waste Reduction** – to reduce employee, customer and enterprise waste we have implemented waste diversion and e-waste recycling programs and reduced single-use items in our marketing campaigns and packaging.
- **Reducing Carbon Emissions** – to reduce Shaw's carbon footprint through reduction (e.g., LED lighting, high-efficiency boilers, e-billing, reduced truck rolls due to increased consumer self-install of customer premises equipment (CPE)) and market-based instruments (e.g., renewable energy, offsets);
- **Engagement and Awareness** – to continuously drive employee, customer and enterprise awareness of Shaw's environmental initiatives. Engaging employees in our journey – through the establishment of green teams, earth week, and waste reduction initiatives – to advance our goals of educating and sharing common beliefs and values around environmental sustainability.

Shaw is also a signatory of the Canadian Energy Efficiency Voluntary Agreement (CEEVA) with respect to Set-Top Boxes (STBs) and Small Network Equipment (SNE). CEEVA aims to significantly reduce the total annual energy consumption used by STBs and SNEs in Canada.

Environmental and Social Governance

On December 7, 2020, Shaw issued its inaugural environmental, social and governance (ESG) report to provide stakeholders (i.e., customers, employees, investors, supply chain partners and regulators) with an overview of our ESG program, including Shaw's goals and actions. Shaw's ESG report can be found at https://www.shaw.ca/corporate/environmental-social-governance.

GOVERNMENT REGULATIONS AND REGULATORY DEVELOPMENTS

Substantially all of the Company's Canadian business activities are subject to regulations and policies established under various pieces of legislation, including the *Broadcasting Act* (Canada) ("*Broadcasting Act*"), the *Telecommunications Act* (Canada) ("*Telecommunications Act*"), the *Radiocommunication Act* (Canada) ("*Radiocommunication Act*"), and the *Copyright Act* (Canada) ("*Copyright Act*"). Regulation of broadcasting and telecommunications is generally administered by the Canadian Radio-television and Telecommunications Commission (CRTC or the "Commission") under the supervision of the Department of Canadian Heritage ("Canadian Heritage") and ISED, respectively. The allocation and use of wireless spectrum in Canada are governed by spectrum licences issued by, and radio authorization conditions set by, ISED pursuant to the *Radiocommunication Act*.

Limits on Non-Canadian Ownership and Control

Neither a holding company that has a subsidiary operating company licensed under the *Broadcasting Act*, nor any such licensee, may be controlled in fact by non-Canadians, the determination of which is a question of fact within the jurisdiction of the CRTC. Pursuant to the Direction to the CRTC (Ineligibility of Non-Canadians) (the "Direction"), non-Canadians are permitted to own and control, directly or indirectly, up to 33.3% of the voting shares and 33.3% of the votes of a holding company that has a subsidiary operating company licensed under the *Broadcasting Act*. In addition, up to 20% of the voting shares and 20% of the votes of a licensee may be owned and controlled, directly or indirectly, by non-Canadians. As well, the chief executive officer (CEO) and not less than 80% of the board of directors of the licensee must be resident Canadians. There are no restrictions on the number of non-voting shares that may be held by non-Canadians at either the holding company or licensee level. If a holding company of a licensee does not satisfy the requirement that 80% of its board of directors be resident Canadians, it must have a CRTC-approved Independent Programming Committee (IPC) in place to ensure that neither the holding company nor its directors exercise control or influence over the programming decisions of its subsidiary licensee. With CRTC approval, Shaw has implemented an IPC to comply with the Direction.

Limits on non-Canadian ownership apply to certain Canadian carriers pursuant to the *Telecommunications Act*, the *Radiocommunication Act* and associated regulations, except that there is no requirement that the CEO be a resident Canadian of a company operating pursuant to those Acts. Instead, the *Telecommunications Act*, the *Radiocommunication Act* and associated regulations require only that 80% of the voting shares of such entities be held by resident Canadians. The Canadian ownership requirements do not apply to wireline and wireless telecommunications carriers that have annual revenues from the provision of telecommunications services in Canada that represent less than 10% of the total annual revenues for the sector.

The Company's Articles contain measures to ensure the Company continues to comply with applicable Canadian ownership requirements and its ability to obtain, amend, or renew a license to carry on any business. Shaw must file a compliance report annually with the CRTC confirming that it is eligible to operate in Canada as a telecommunications common carrier.

Broadcasting Act

Pursuant to the *Broadcasting Act*, the CRTC is mandated to regulate and supervise all aspects of the broadcasting system in a flexible manner. The *Broadcasting Act* requires broadcast distribution undertakings (BDUs) to give priority to the carriage of Canadian services; to provide efficient delivery of programming services at affordable rates; to provide reasonable terms for the carriage, packaging and retailing of those programming services; and provides the option to operate a community channel. Under the *Broadcasting Act*, the Governor in Council (GIC) may issue broad policy directions of general application on matters with respect to the objectives of Canada's broadcasting policy and related regulatory policy.

The *Broadcasting Act* also sets out requirements for programming services with respect to Canadian content. The Company's broadcasting distribution business and on-demand programming services depend on licences (or operate under an exemption order) granted and issued by the CRTC under the *Broadcasting Act*. Pursuant to CRTC regulations, the Company is required to contribute 5% of its cable and direct-to-home (DTH) BDUs' gross revenues to support the production of Canadian programming.

Licensing and Ownership

The Company's cable licences are subject to a five-year term, expiring August 31, 2023. The Company's DTH and Satellite Relay Distribution Undertaking (SRDU) licences are subject to a seven-year term, expiring August 31, 2026.

The Company's on-demand licence is subject to a five-year term expiring August 31, 2022. The Company's terrestrial and DTH PPV licences are both subject to five-year terms expiring August 31, 2024.

New Media

The CRTC has issued a digital media exemption order requiring that Internet-based and mobile point-to-point broadcasting services not offer television programming on an exclusive or preferential basis in a manner that depends on subscription to a specific mobile or retail Internet service and not confer an undue preference or disadvantage. The CRTC has not imposed any levy on the revenue of exempt digital media undertakings to support Canadian content.

Potential Legislative Changes

On November 3, 2020, the Minister of Heritage introduced a bill to amend the *Broadcasting Act* ("Bill C-10"). Bill C-10 provided the basis for a new legislative regime that would recognize that new classes of service providers, including Canadian and non-Canadian online broadcasting services and platforms, are part of Canada's broadcasting system, in addition to current classes that include terrestrial and DTH BDUs and programmers. On June 14, 2021, the Standing Committee presented its report on Bill C-10 with amendments in the House of Commons, and on June 22, 2021, the House of Commons passed the Bill. As of the prorogation of the 43rd Parliament, on August 15, 2021, Bill C-10 remained before the Senate. The Liberal Party, which secured a minority government in the 2021 federal election, indicated in its election platform that they would introduce legislation to reform the *Broadcasting Act* within the first 100 days following re-election, and modernize funding tools that support Canada's audio-visual sector.

Any changes to the *Broadcasting Act* and related regulations – pursuant to the introduction of a bill that is substantially similar to Bill C-10 or that proposes different or additional provisions – alone or in combination with the maintenance of existing regulatory measures applicable to the Company's cable and DTH services could impact the business practices of the Company; result in the imposition of new fees and costs on the Company's cable, DTH, or digital media services; allow for the introduction of new competition in the provision of broadcasting distribution services; and/or negatively impact the Company's financial results from broadcasting.

Other Potential New or Increased Fees and Costs

New fees and costs could also be imposed pursuant to CRTC regulation, with or without legislative changes. The Commission indicated that in 2020-2021 it will consider whether to examine new mechanisms to support television news production. If the CRTC were to implement support for television news production through increased access by broadcasters to subscription revenue, it would increase costs for the Company. Additionally, the Commission indicated that in 2021-2022 it will "examine options for the appropriate measures needed to ensure that all content providers on all platforms contribute to the creation of Canadian content in both official languages, that Canadian content is promoted and given appropriate prominence, and that it is easily accessible by Canadians." Implementation of new regulatory measures with the foregoing objectives could result in new fees payable by the Company's cable, DTH or digital media services; impact the business practices of the Company, including through new distribution and promotion requirements, with increased costs payable by the Company's cable, DTH, or digital media services; and/or negatively impact the Company's financial results from broadcasting.

Sections 21 and 49 of the CRTC's *Broadcasting Distribution Regulations* (the "BDU Regulations") currently state that a cable BDU must obtain the consent of an over-the-air (OTA) broadcaster in order to distribute its signal in a distant market. In the case of DTH BDUs, the BDU Regulations permit the distribution of local OTA television signals on a distant basis without consent within the province of origin, but the BDU Regulations state that DTH BDUs must obtain broadcaster consent to deliver an OTA television signal out-of-province, unless the DTH BDU is required to carry the signal out-of-province on its basic service. There are questions as to the jurisdictional validity of sections 21 and 49 of the BDU Regulations, which are currently being considered by the CRTC pursuant to an application by Rogers Media Inc. (RMI), posted by the Commission on February 21, 2020, asking the Commission to enforce those sections. Based on the current language of sections 21 and 49 of the BDU Regulations and depending on the outcome of RMI's application, broadcasters may seek to limit distribution of distant signals or remuneration for their distribution by the Company, which could increase costs for the Company and limit its offerings to consumers (including pursuant to demands for signal take-down or program blackouts). In addition, any confirmation by the CRTC of the validity of television broadcast licensees' right of authorization regarding the retransmission of their signals in distant markets could lead to similar demands by non-Canadian broadcasters. Any such impacts or demands could significantly impact the Company's costs and negatively impact the Company's financial results.

Telecommunications Act

Under the *Telecommunications Act*, the CRTC is responsible for ensuring that Canadians in all regions of Canada have access to reliable and affordable high-quality telecommunication services. The CRTC has the authority to forbear from regulating one or more services or classes of services provided by a carrier if the CRTC finds that there is sufficient competition for those services to protect the interests of users. Retail Internet, home phone services and mobile wireless services have been forborne from price regulation. However, regulations do affect certain terms and conditions under which Shaw's retail services are provided. As described further below under "Third Party Internet Access," certain Shaw wholesale services are regulated.

Under the *Telecommunications Act*, the GIC may issue broad policy directions of general application to the CRTC with regard to the telecommunications policy directives set out in the *Telecommunications Act* (each a "Telecommunications Policy Direction"). As described below under "Government Policy Direction to CRTC Concerning Telecommunications," a Telecommunications Policy Direction was issued by the GIC with the intention of guiding the CRTC's decision-making on telecommunications matters.

The CRTC and ISED can also impose monetary penalties on companies that contravene the *Telecommunications Act*, the *Radiocommunication Act*, and the regulations and rules promulgated thereunder.

ISED is responsible for the allocation, issuance and management of radio spectrum pursuant to the *Radiocommunication Act*. As well, the technical operating aspects of the Company's businesses are regulated by technical requirements and performance standards established by ISED, primarily under the *Telecommunications Act* and the *Radiocommunication Act*.

Potential Legislative Changes

The Minister of Canadian Heritage and the Minister of Innovation, Science and Industry were directed, pursuant to the Ministerial mandate letters issued December 13, 2019, to "modernize the *Broadcasting Act* and *Telecommunications Act*, examining how best to [...] ensure quality affordable internet, mobile and media access." The Minister of Innovation, Science and Industry was also directed to reduce mobile prices by 25% within two years, and failing that, to further expand mobile virtual network operators (MVNOs) in Canada and the CRTC's mandate on affordable pricing. In accordance with this mandate, on March 5, 2020, the Minister of Innovation, Science and Industry announced the expectation that the national wireless carriers (BCE Inc., Rogers Communications Canada and TELUS Communications) reduce their prices for mid-range data plans (2-6 GB) by 25% over the next two years, and indicated that if "these targets are not met within two years, the Federal Government will take action with other regulatory tools to further increase competition and help reduce prices."

Implementation of the foregoing Ministerial mandates (assuming that they remain applicable during the next session of Parliament) could result in: the introduction of new regulatory measures that negatively impact the business practices of the Company and our ability to serve customers and related costs; and/or negative impacts on the Company's financial results and competitiveness in the wireless and wireline market.

Third Party Internet Access

Shaw is mandated by the CRTC to provide a wholesale high-speed access (HSA) service at regulated rates to independent ISPs ("Resellers"), who use the wholesale HSA services to provide their own retail Internet services to consumers ("Third Party Internet Access" or "TPIA").

Telecom Orders CRTC 2019-288 and 2021-181

On August 15, 2019, the CRTC issued Telecom Order 2019-288 (the "Order"), which set Shaw's aggregated wholesale HSA service rates. The rates imposed by the Order were significantly lower than the interim rates set in October 2016, and retroactive to January 31, 2017. Shaw, jointly with Cogeco, Eastlink, Rogers and Videotron (the "Cable Carriers"), pursued all three routes of appeal of the Order: appeal to the Federal Court of Appeal (FCA); Petition to federal Cabinet; and application with the CRTC to review and vary the Order. On May 27, 2021, the CRTC released its decision in the Cable Carriers' application to review and vary the rates set by the Order ("TD 2021-181"), in which it determined that there was substantial doubt as to the correctness of the aggregated wholesale HSA service rates set by the Order and approved on a final basis the interim rates set in October 2016. TekSavvy Solutions Inc. ("TekSavvy"), Competitive Network Operators of Canada ("CNOC"), and National Capital FreeNet Inc. ("NCF") have petitioned to the GIC to vary TD 2021-181 (the "Petitions"), asking the GIC to finalize the rates set by the 2019 Order. TekSavvy and CNOC are also asking the GIC to direct all facilities-based wholesale service providers to immediately remit all retroactive payments in connection with the Order's rates. On September 22, 2021, the Cable Carriers filed a response to the TekSavvy and CNOC Petitions, asking Cabinet to deny the requested relief. The reply to the NCF Petition is due November 1, 2021. On June 28, 2021, TekSavvy also filed a motion for leave to appeal TD 2021-181 to the FCA and has requested that the appeal be heard on an expedited basis. The FCA granted leave on September 15, 2021. In its appeal, TekSavvy will seek an order from the FCA that TD 2021-181 is quashed, and the 2019 Order is reinstated or, in the alternative, that the matter is returned to the CRTC for redetermination. If the GIC or the FCA were to intervene in any way with the effect of decreasing the aggregated wholesale HSA service rates set by TD 2021-181, this could significantly reduce the amount that the Company can charge for aggregated wholesale HSA services and negatively impact the Company's broadband Wireline revenues and investments, as well as its ability to compete with Resellers and other facilities-based HSA providers.

Distinction between residential and business wholesale HSA services

On March 3, 2020, the Commission initiated a proceeding to examine wholesale HSA tariff provisions that differentiate between residential and business end-users. Final replies were filed on February 11, 2021, and a decision is pending. The Company's tariffs do not limit or restrict reselling to business end-users. If the Commission's decision goes beyond addressing existing tariff provisions that place restrictions on Resellers based on market segmentation, and mandates new wholesale access requirements applicable to the Company's Consumer or Business Internet services, the Company's broadband revenues and investments, as well as its ability to compete, could be negatively impacted.

Disaggregated Wholesale Services Framework

In 2015, the CRTC completed a review of the wholesale wireline policy framework, including TPIA, and: (i) extended mandated wholesale access services to include FTTP facilities; and (ii) initiated a shift to a new disaggregated wholesale HSA service model. On June 11, 2020, the Commission initiated a new proceeding to consider the appropriate network configuration for disaggregated wholesale HSA services across the country, and suspended the proceeding to set final rates, terms, and conditions for the disaggregated wholesale HSA services in Ontario and Quebec, for which network configurations had previously been reviewed and approved by the CRTC in 2016. The disaggregated wholesale service configuration that is mandated by the Commission could require significant and costly modifications to the Company's broadband network architecture. The final mandated rates and the terms of disaggregated HSA services could negatively impact the Company's broadband revenues and investments as well as its ability to compete with Resellers and other facilities-based disaggregated HSA providers.

Review of the approach to rate setting for wholesale telecommunications services

On April 24, 2020, the Commission initiated a proceeding to review its approach to rate setting for wholesale telecommunications services. Replies were filed on November 27, 2020, and a decision is pending. The methodology that is selected will impact the amount that the Company can charge for wholesale HSA service. If the methodology fails to adequately compensate the Company for the costs associated with provisioning HSA services as well as a reasonable return on investment, it will negatively impact the Company's broadband Wireline revenues and investments and our ability to compete with Resellers and other facilities-based HSA providers. The chosen methodology could also potentially apply to wholesale wireless services, including mandated roaming.

CRTC Wireless Review

In February 2019, the CRTC initiated its review of the regulatory framework for mobile wireless services and held a public hearing in February 2020. The Commission reviewed competition in the retail market, including potential regulatory intervention, such as new retail policies and mandated low-cost data-only plans, and wholesale wireless regulation, including wholesale access for mobile virtual network operators (MVNOs), and whether there is any need to make changes to the wholesale roaming policy.

In April 2021, the CRTC issued Wireless Review decision, Telecom Regulatory Policy CRTC 2021-130 ("TRP 2021-130"). In it, the CRTC rejected a broad MVNO regime and instead mandated facilities-based MVNO service, whereby the national wireless carriers as well as SaskTel are mandated to provision wholesale MVNO access services only to carriers holding a spectrum licence in a given service area. The terms and conditions of the facilities-based wholesale MVNO access service are still under consideration by the Commission. Rates will be determined through commercial negotiation, with recourse to CRTC Final Offer Arbitration if negotiations reach an impasse. The CRTC also held that the national wireless carriers would be required to provide seamless roaming as part of their mandated domestic wholesale roaming services used by the Company and other carriers as of April 15, 2022 and confirmed that the wholesale roaming policy applies to 5G networks. The national wireless carriers' wholesale roaming tariffs will be reviewed to ensure the rates reflect the underlying costs associated with seamless roaming following its implementation. At that time, the CRTC will also assess the underlying costs of wholesale roaming on 5G networks. TRP 2021-130 did not mandate specific retail services but set clear expectations for the offer and promotion by the national carriers of low-cost, emergency use, and occasional use plans at specified rates. Finally, the CRTC determined that the *Telecommunications Act* does not give it the jurisdiction to adjudicate disputes concerning access to public places for the purpose of constructing, maintaining, and operating mobile wireless transmission facilities. On May 14, 2021, TELUS filed for leave to appeal the CRTC's determinations related to seamless roaming and jurisdiction over access to public places relating to wireless facilities. On August 11, 2021, the FCA granted TELUS leave. Additionally, Data On Tap Inc., an MVNO operating as dotmobile, has petitioned the GIC to vary TRP 2021-130, asking it to broaden mandated MVNO access by, among other things, removing the spectrum requirements and set a maximum allowable wholesale rate.

Compliance and Enforcement and Telecom Notice of Consultation CRTC 2021-9

On January 13, 2021, the CRTC initiated a proceeding to develop a network-level blocking framework to limit botnet traffic targeting Canadians. Shaw has recommended a limited role for the CRTC. If, however, the CRTC implements more onerous obligations, this could introduce additional costs to the Company and a risk of penalties in connection with any non-compliance.

Retail Sales Practices

On February 20, 2019, the CRTC published its Report on Misleading or Aggressive Communications Retail Sales Practices and found that "a significant portion of Canadians are experiencing misleading or aggressive sales practices through all types of sales channels" in connection with their purchase of telecommunications and broadcasting services. While the Report did not result in new rules or regulatory obligations, the Report's findings, coupled with a planned Commission examination of activities undertaken in 2020-2021 to address those findings, could lead to new measures implemented in the context of current or future proceedings. The introduction of any such measures could negatively impact our ability to serve our customers, result in cost increases for the Company and negatively impact the Company's revenue.

Access for Wireline Network

Shaw requires access to support structures, such as poles, strand and conduits of telecommunication carriers and electric utilities, in order to deploy wireline network facilities. Under the *Telecommunications Act*, the CRTC has jurisdiction over support structures of telecommunication carriers, including rates for third party use. The CRTC's jurisdiction does not extend to electrical utility support structures, which are regulated by provincial utility authorities. Shaw's wireline network also requires access to construct facilities in roadways and other public places. Under the *Telecommunications Act*, Shaw may access such places with the consent of the municipality or other public authority having jurisdiction.

On December 10, 2019, the Commission initiated a review to examine "potential barriers and/or regulatory solutions to building new facilities or interconnecting to existing facilities in order to extend broadband-capable networks more efficiently into underserved areas [...]." The Commission specifically requested comments on barriers such as access to affordable transport services and efficient use of support structures; how and to what extent these barriers are preventing carriers from extending transport networks and offering services in underserved regions; and proposals on potential regulatory measures to address the barriers. Final submissions were filed in March 2021, and a decision has not yet been issued. The introduction of regulatory requirements applicable to the provision of wholesale transport services in rural or remote areas could negatively impact the Company's financial results.

Radiocommunication Act

Our Wireless division holds licences for the use of radiofrequency spectrum required to operate its mobile wireless business. Those spectrum licences are administered by ISED under the *Radiocommunication Act*. Spectrum use is governed by conditions of license, including license term, transferability/divisibility, technical compliance requirements, lawful interception, research and development, and mandated antenna site sharing and domestic roaming services.

Any changes to the *Radiocommunications Act* could impact the business practices of the Company and/or the processes governing its acquisition of new spectrum for purposes of building its wireless networks.

Wireless Spectrum Licences

The Company's AWS-1 spectrum licences were renewed in 2019 for a 20-year term. The Company's AWS-3 spectrum licences were issued in 2015 for a 20-year term. The 700 MHz and 2500 MHz spectrum licences that the Company purchased from Quebecor were initially issued in February 2014 and May 2015, respectively for a term of 20 years. The Company also holds other 2500 MHz licences, including those acquired at ISED's 2018 residual auction, which were issued for a 20-year term, and the Company also acquired 600 MHz licences at ISED's 2019 auction, which were issued for a 20-year term.

The Company's licences come with conditions, including a variety of deployment conditions. In July 2019, ISED issued a decision in response to its consultation on a new set of smaller service areas for spectrum licensing ("Tier 5 Service Areas") to complement ISED's existing service areas. ISED has created Tier 5 Service Areas with the objective of encouraging additional access to spectrum within rural areas pursuant to its licensing process. Currently, none of the Company's licences are subject to Tier 5 deployment requirements, but future licences may incorporate a requirement for deployment in such new service areas, which could lead to additional future network costs.

In March 2020, ISED released its policy and licensing framework (the "Framework") for the 3500 MHz (3450-3650 MHz) auction, following a public consultation process in 2019. The auction commenced in June 2021, and provisional results were published on July 29, 2021. Shaw did not participate in the auction.

In May 2021, following a public consultation in 2020 on proposed revisions to the 3800 MHz band (3650-4200 MHz), ISED released its decision allowing future mobile use in the band. The band is currently used primarily to provide fixed satellite services. Existing satellite users of the spectrum in remote, satellite dependent areas of the country will be permitted to continue to operate across the band, while those in urban areas will be consolidated in the 4000-4200 MHz spectrum range and subject to a transition process that will be complete in March 2025. The details of the licensing framework for the band will be the subject of a future proceeding.

In June 2019, following a consultation in 2018, ISED released a decision allowing future mobile use in the millimetre wave bands, including 26 GHz, 28 GHz, and 38 GHz bands, as well as licence-exempt use in the 64-71 GHz bands. The details of the licensing framework for these bands will be the subject of a future proceeding.

In May 2021, ISED also released a decision confirming its intention to make 1200 MHz of spectrum in the 6 GHz band (5925-7125 MHz) available for WiFi and other unlicensed uses. Technical standards for equipment operating in the band must be developed before the spectrum becomes available for use.

In August 2021, ISED commenced a consultation on the potential introduction of a new "access licensing framework" to facilitate access to unused spectrum in rural and remote areas. ISED proposes to issue Tier 5 licences on a first-come, first-served basis in areas where existing licensees have not deployed services. ISED proposes to apply this initially to the PCS (1900 MHz) and Cellular (800 MHz) bands. Among other things, the consultation also proposes to streamline the approval process for certain subordination arrangements. Although Shaw does not have spectrum in the PCS or Cellular spectrum bands, these consultations could lead to future spectrum proceedings, or future opportunities for other parties to gain access to spectrum, which could impact the Company's competitiveness or its spectrum licences.

Access for Wireless Network

Our Wireless division's operations depend on being able to locate and construct wireless antenna sites, which in some cases requires certain authorizations or approvals from municipalities, which vary from one municipality to another but are also subject to federal oversight. The process for such approvals can include a comprehensive consultation process related to local land use priorities and new antenna site design parameters. As noted above, the CRTC determined that the *Telecommunications Act* does not give it the jurisdiction to adjudicate disputes concerning access to public places for the purpose of constructing, maintaining, and operating mobile wireless transmission facilities and TELUS is appealing that aspect of the decision at the FCA.

The Wireless division also uses arrangements whereby it co-locates its antennae equipment on towers and/or sites owned and operated by third party tower and/or site providers and the three national wireless carriers. Pursuant to the conditions of their spectrum licences and the CRTC's policy framework for wholesale wireless services, the three national wireless carriers must allow competitors, including Freedom Mobile and Shaw Mobile, to co-locate equipment at these locations. However, the application and approval process for the sharing of towers is lengthy, and the ISED and CRTC processes that are available to enforce the existing rules can also be challenging and time consuming. The CRTC's review of mobile wireless services included a focus on reducing barriers to infrastructure deployment and whether any further regulatory measures are required to reduce barriers to the deployment of wireless infrastructure. In the CRTC's review of mobile wireless services, the Commission indicated that it would examine issues associated with access to various types of infrastructure in order to deploy wireless networks and whether changes should be made to the Commission's existing rules to facilitate such access. In its Wireless Review decision (TRP 2021-130), the CRTC determined that it did not need to take any additional action in relation to tower and site sharing at this time.

Copyright Act

Canada's *Copyright Act* accords the creators and owners of content various rights to authorize and/or be remunerated for the use and performance of their works, including, in some instances, by BDUs. In addition, the *Copyright Act* creates certain exceptions that permit the use of copyrighted works without the authorization or remuneration of rights holders.

New or Potential Legislative Changes

Any amendments to the *Copyright Act* that modify the terms and conditions applicable to the use of content, including new rights or the scope of flexibility pursuant to existing exceptions; or impose new obligations on intermediaries, such as telecommunications service providers, could create increased fees and negatively impact the business practices of the Company, as well as the Company's ability to serve its customers.

Potential for New or Increased Fees

In August 2017, the Copyright Board issued a decision interpreting the scope and meaning of the "making available" provision (section 2.4(1.1) of the *Copyright Act*). The Copyright Board determined that as a result of section 2.4(1.1), the mere making available of a work on a server for the purpose of later streaming or downloading of the work by the public is an event for which a tariff is payable, expanding the scope of the performance right and the Society of Composers, Authors and Music Publishers of Canada's (SOCAN) entitlement to royalties. In September 2017, the Company, along with a number of other broadcasting and Internet companies, filed an application for judicial review, arguing that the Copyright Board's interpretation of the "making available" provision was erroneous. In June 2020, the FCA overturned the Copyright Board's interpretation. On November 12, 2020, SOCAN and Music Canada (collectively, the "Applicants") filed an application for leave to appeal to the Supreme Court of Canada (SCC). On April 21, 2021, leave to appeal was granted to the Applicants. If the SCC restores the Copyright Board's interpretation, it could lead to new claims by rights holders in connection with Company technologies that facilitate downloading.

Judicial Review of the Distant Signal Retransmission Tariff Rates (2014-2018)

On December 18, 2018, the Copyright Board released a rate decision for the Distant Signal Retransmission Tariff for the past tariff period of 2014-2018, inclusive, which introduced a rate increase that applied retroactively, and established an interim tariff for 2019 based on the 2018 rate. Both the Copyright Collective of Canada (the "Collectives") and Objectors filed a Notice of Application for judicial review with the FCA on November 4, 2019. On July 23, 2021, the FCA dismissed the Objectors' application on all grounds, and granted the Collectives' application on two grounds, for the years 2016-2018. The SCC application for leave to appeal the FCA decision was filed on September 29, 2021. If the FCA's decision is upheld, the Company could become subject to significantly increased royalty rates for the 2016-2018 period, pursuant to a redetermination of the rates by the Copyright Board.

Privacy and Anti-Spam Legislation

Privacy Legislation

The Personal Information Protection and Electronic Documents Act (Canada) (PIPEDA) is Canada's federal privacy law regulating the collection, use, and disclosure of personal information in Canada by a federally regulated organization in the private sector. The Company has established a privacy policy and its internal privacy processes in accordance with PIPEDA.

On November 17, 2020, the Minister of Innovation, Science and Industry introduced Bill C-11 – the Digital Charter Implementation Act ("DCIA"), which was intended to replace PIPEDA. Bill C-11 was comprised of two parts: (1) the Consumer Privacy Protection Act (the "CPPA"), which established protections and parameters for the collection, use and disclosure of personal information ("PI"), including enhanced rights for individuals with respect to their privacy and data; enhanced accountabilities for organizations with respect to consent gathering and data usage; and significant penalties (up to 5% of an organization's gross revenue the previous year) for breaches of rights and responsibilities; and (2) the Personal Information and Data Protection Tribunal Act (the "PIDPTA"), which created a new administrative tribunal to oversee enforcement of the CPPA. As of the prorogation of the 43rd Parliament on August 15, 2021, Bill C-11 remained in Second Reading before the House of Commons. The Liberals' election platform indicated that if re-elected, they would move forward with legislation to implement Canada's Digital Charter, strengthen privacy protections for consumers and introduce new rules applicable to the online marketplace.

Changes to privacy laws and regulations resulting from the reinstatement and passage of Bill C-11 or introduction of a new privacy bill, will require the Company to incur costs to adjust its policies and practices related to privacy, as well as data collection, management, disposal and access practices. Such changes could: result in significant new costs payable by the Company to ensure compliance; limit the Company's ability to utilize data in support of its business, as well as preserve and expand its customer base; and expose the Company to the risk of significant penalties and claims (including pursuant to a proposed right of private action) in connection with any non-compliance.

Canada's Anti-Spam Legislation (CASL)

CASL sets out a comprehensive regulatory regime regarding online commerce, including requirements to obtain consent prior to sending commercial electronic messages and installing computer programs. CASL is administered primarily by the CRTC, and non-compliance may result in fines of up to $10 million. The Company maintains internal practices and policies to facilitate compliance with CASL.

Environmental matters

Shaw's operations are subject to environmental regulations, including those related to electronic waste, printed paper and packaging. A number of provinces have enacted regulations providing for the diversion of certain types of electronic and other waste through product stewardship programs (PSP). Under a PSP, companies who supply designated products in or into a province are required to participate in or develop an approved program for the collection and recycling of designated materials and, in some cases, pay a per item fee. Such regulations have not had, and are not expected to have, a material effect on the Company's earnings or competitive position.

KEY PERFORMANCE DRIVERS

Shaw measures the success of its strategies using a number of key performance drivers which are outlined below, including a discussion as to their relevance, definitions, calculation methods and underlying assumptions.

Financial Measures

Revenue

Revenue is a measurement determined in accordance with International Financial Reporting Standards (IFRS). It represents the inflow of cash, receivables or other consideration arising from the sale of products and services. Revenue is net of items such as trade or volume discounts, agency commissions, and certain excise and sales taxes. It is the base on which free cash flow, a key performance driver, is determined; therefore, it measures the potential to deliver free cash flow as well as indicating growth in a competitive market place.

The Company's continuous disclosure documents may provide discussion and analysis of non-GAAP financial measures. These financial measures do not have standard definitions prescribed by IFRS and therefore may not be comparable to similar measures disclosed by other companies. The Company's continuous disclosure requirements may also provide discussion and analysis of additional GAAP measures. Additional GAAP measures include line items, headings, and sub-totals included in financial statements. The Company utilizes these measures in making operating decisions and assessing its performance. Certain investors, analysts and others utilize these measures in assessing the Company's operational and financial performance and as an indicator of its ability to service debt and return cash to shareholders. These non-GAAP measures and additional GAAP measures have not been presented as an alternative to net income or any other measure of performance or liquidity prescribed by IFRS. The following contains a description of the Company's use of non-GAAP financial measures and additional GAAP measures and provides a reconciliation to the nearest IFRS measure or provides a reference to such reconciliation.

Adjusted EBITDA

Adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") is calculated as revenue less operating, general and administrative expenses. It is intended to indicate the Company's ongoing ability to service and/or incur debt and is therefore calculated before items such as restructuring costs, other gains (losses), amortization (a non-cash expense), taxes and interest. Adjusted EBITDA is one measure used by the investing community to value the business.

Adjusted EBITDA has no directly comparable GAAP financial measure. Alternatively, the following table provides a reconciliation of net income to adjusted EBITDA:

	Year ended August 31,		
(millions of Canadian dollars)	2021	2020	Change%
Net Income	**986**	688	43.3
Add back (deduct):			
Restructuring costs	**14**	14	—
Amortization:			
Deferred equipment revenue	**(11)**	(16)	(31.3)
Deferred equipment costs	**47**	65	(27.7)
Property, plant and equipment, intangibles and other	**1,183**	1,168	1.3
Amortization of financing costs – long-term debt	**2**	3	(33.3)
Interest expense	**231**	274	(15.7)
Other gains (losses)	**2**	16	(87.5)
Current income tax expense	**30**	120	(75.0)
Deferred income tax expense (recovery)	**16**	59	(72.9)
Adjusted EBITDA	**2,500**	2,391	4.6

Adjusted EBITDA margin

Adjusted EBITDA margin is a non-GAAP ratio that is calculated by dividing adjusted EBITDA by revenue. Adjusted EBITDA margin is also one of the measures used by the investing community to value the business.

	Year ended August 31,		
	2021	2020	Change%
Wireline	**49.6%**	48.3%	2.7
Wireless	**30.9%**	28.9%	6.9
Combined Wireline and Wireless	**45.4%**	44.2%	2.7

Net debt

The Company uses this measure to perform valuation-related analysis and make decisions about the Company's capital structure. We believe this measure aids investors in analyzing the value of the business and assessing our leverage. Refer to "Liquidity and Capital Resources" for further detail.

Net debt leverage ratio

The Company uses this non-GAAP ratio to determine its optimal leverage ratio. Refer to "Liquidity and Capital Resources" for further detail.

Free cash flow

The Company utilizes this measure to assess the Company's ability to repay debt and pay dividends to shareholders.

Free cash flow is comprised of adjusted EBITDA and then deducting capital expenditures (on an accrual basis and net of proceeds on capital dispositions) and equipment costs (net), interest, cash taxes paid or payable, interest on lease liabilities, lease payments relating to lease liabilities, dividends paid on the preferred shares, and recurring cash funding of pension amounts net of pension expense and adjusted to exclude share-based compensation expense or recovery.

Free cash flow has not been reported on a segmented basis. Certain components of free cash flow, including adjusted EBITDA, continue to be reported on a segmented basis. Capital expenditures and equipment costs (net) are also reported on a segmented basis. Other items, including interest and cash taxes, are not generally directly attributable to a segment, and are reported on a consolidated basis.

Free cash flow is calculated as follows:

(millions of Canadian dollars)	Year ended August 31, 2021	2020	Change %
Revenue			
Consumer	**3,665**	3,683	(0.5)
Business	**584**	567	3.0
Wireline	**4,249**	4,250	—
Service	**891**	815	9.3
Equipment	**381**	351	8.5
Wireless	**1,272**	1,166	9.1
	5,521	5,416	1.9
Intersegment eliminations	**(12)**	(9)	33.3
	5,509	5,407	1.9
Adjusted EBITDA			
Wireline	**2,107**	2,054	2.6
Wireless	**393**	337	16.6
	2,500	2,391	4.6
Capital expenditures and equipment costs (net):(1)			
Wireline	**723**	815	(11.3)
Wireless	**280**	296	(5.4)
	1,003	1,111	(9.7)
Free cash flow before the following	**1,497**	1,280	17.0
Less:			
Interest on debt and provisions	**(183)**	(223)	(17.9)
Interest on lease liabilities	**(45)**	(44)	2.3
Cash taxes	**(194)**	(148)	31.1
Lease payments relating to lease liabilities	**(110)**	(112)	(1.8)
Other adjustments:			
Non-cash share-based compensation	**2**	2	–
Pension adjustment	**2**	1	100.0
Preferred share dividends	**(8)**	(9)	(11.1)
Free cash flow	**961**	747	28.6

(1) Per Note 26 to the audited Consolidated Financial Statements.

Statistical Measures

Subscriber counts (or Revenue Generating Units (RGUs))

The Company measures the count of its subscribers in its Consumer, Business, and Wireless divisions.

In the Consumer and Business divisions, Wireline Video subscribers include residential customers, multiple dwelling units (MDUs) and commercial customers. A residential subscriber who receives at a minimum, basic cable service, is counted as one subscriber. In the case of MDUs, such as apartment buildings, each tenant with a minimum of basic cable service is counted as one subscriber, regardless of whether invoiced individually or having services included in the individual's rent. Each building site of a commercial customer (e.g., hospitals, hotels or retail franchises) that is receiving at a minimum, basic cable service, is counted as one subscriber. Video satellite subscribers are counted in the same manner as Wireline Video customers except that it also includes seasonal customers who have indicated their intention to reconnect within 180 days of disconnection. Internet customers include all modems on billing and Phone includes all phone lines on billing. All subscriber counts exclude complimentary accounts but include promotional accounts.

Consumer and Business divisions' RGUs represent the number of products sold to customers and includes Video (cable and Satellite subscribers), Internet customers, and Phone lines. As at August 31, 2021 these combined divisions had approximately 5.0 million RGUs.

In the Wireless division, a recurring subscriber or RGU (e.g., cellular phone, smartphone, tablet, mobile Internet device) has access to the wireless network for voice and/or data communications, whether prepaid or postpaid. Prepaid subscribers include RGUs where the account is within 90 days of the prepaid credits expiring. As at August 31, 2021 the Wireless division had approximately 2.1 million RGUs.

Refer to "Subscriber Highlights" on page 11 for more information on this measure.

Wireless Postpaid Churn

Wireless postpaid subscriber or RGU churn ("postpaid churn") measures success in retaining subscribers. Wireless postpaid churn is a measure of the number of postpaid subscribers that deactivated during a period as a percentage of the average postpaid subscriber base during a period, calculated on a monthly basis. It is calculated by dividing the number of Wireless postpaid subscribers that deactivated (in a month) by the average number of postpaid subscribers during the month. When used or reported for a period greater than one month, postpaid churn represents the sum of the number of subscribers deactivating for each period incurred divided by the sum of the average number of postpaid subscribers of each period incurred.

Postpaid churn of 1.41% in fiscal 2021 was comparable to 1.40% in fiscal 2020.

Wireless average billing per subscriber unit (ABPU)

Wireless ABPU is a supplementary financial measure and industry metric that is useful in assessing the operating performance of a wireless entity. We use ABPU as a measure that approximates the average amount the Company invoices an individual subscriber unit for service on a monthly basis. ABPU helps us to identify trends and measures the Company's success in attracting and retaining higher lifetime value subscribers. Wireless ABPU is calculated as service revenue (excluding allocations to wireless service revenue under IFRS 15) divided by the average number of subscribers on the network during the period and is expressed as a rate per month.

In fiscal 2021, ABPU decreased 6.8% to $41.15 compared to $44.13 in the prior year. The ABPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

Wireless average revenue per subscriber unit per month (ARPU)

Wireless ARPU is a supplementary financial measure that is calculated as service revenue divided by the average number of subscribers on the network during the period and is expressed as a rate per month. This measure is an industry metric that is useful in assessing the operating performance of a wireless entity. ARPU also helps to identify trends and measure the Company's success in attracting and retaining higher-value subscribers.

In fiscal 2021, ARPU decreased 4.1% to $37.35 compared to $38.95 in the prior year. The ARPU decrease reflects the increased number of customers that are subscribing to Shaw Mobile as well as reduced roaming revenue due to less travel and roaming outside of the Freedom home network resulting from the impact of the COVID-19 pandemic.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company prepared its Consolidated Financial Statements in accordance with IFRS as issued by the International Accounting Standards Board (IASB). An understanding of the Company's accounting policies is necessary for a complete analysis of results, financial position, liquidity, and trends. Refer to Note 2 to the Consolidated Financial Statements for additional information on accounting policies. The following section discusses key estimates and assumptions that management has made under IFRS and how they affect the amounts reported in the Consolidated Financial Statements and accompanying notes. The following is a discussion of the Company's critical accounting policies.

Revenue and expense recognition

The identification of performance obligations within a contract and the timing of satisfaction of performance obligations under long-term contracts requires judgment. For bundled arrangements, we account for individual products and services when they are separately identifiable, and the customer can benefit from the product or service on its own or with other readily available resources. The Company has multiple deliverable arrangements consisting of upfront fees (subscriber connection fee revenue and/or customer premise equipment revenue) and related subscription revenue. The Company determined that the upfront fees charged to customers do not constitute separate performance obligations; therefore, these revenue streams are assessed as an integrated package.

Revenue is considered earned as services are performed, provided that at the time of performance, ultimate collection is reasonably assured. Such performance is regarded as having been achieved when reasonable assurance exists regarding the measurement of the consideration that will be derived from rendering the service. Revenue from Video, Internet, Phone, DTH, and Wireless customers includes subscriber revenue earned as services are provided. The revenue is considered earned as the period of service relating to the customer billing elapses. In addition to monthly service plans, the Company also offers multi-year service plans in which the total amount of the contractual service revenue is accounted for on a straight-line basis over the term of the plan.

When a customer can modify their contract within predefined terms such that we are not able to enforce the transaction price agreed to, but can only contractually enforce a lower amount, we allocate revenue between performance obligations using the minimum enforceable rights and obligations and any excess amount is recognized as revenue as its earned.

Subscriber connection fee revenue

Connection fees have no standalone value to the customer separate and independent of the Company providing additional subscription services, therefore the connection fee revenue must be deferred as contract liabilities and recognized systematically over the periods that the subscription services are earned. There is no specified term for which the customer will receive the related subscription service, therefore the Company has considered its customer churn rate and other factors, such as competition from new entrants, to determine the deferral period of three years for Wireline customers and two years for Wireless customers.

Subscriber connection and installation costs

The costs of physically connecting a new home are capitalized as part of the Company's distribution system as the service potential of the distribution system is enhanced by the ability to generate future subscriber revenue. Costs of disconnections are expensed as incurred as the activity does not generate future revenue.

Costs incurred to obtain or fulfill a contract

The incremental costs to obtain or fulfill a contract with a customer are deferred and amortized into operating expenses over their expected period of benefit to the extent they are recoverable. These costs include certain commissions paid to internal and external representatives that we expect to be recoverable. Determining the deferral criteria for these costs requires us to make significant judgments.

Customer premise equipment revenue and costs

Customer premise equipment available for sale, which generally includes DTH equipment, has no standalone value to the customer separate and independent of the Company providing additional subscription services. Therefore, the equipment revenue is deferred and recognized systematically over the periods that the subscription services are earned. As the equipment sales and the related subscription revenue are considered one transaction, recognition of the equipment revenue commences once the subscriber service is activated. There is no specified term for which the customer will receive the related subscription service, therefore the Company has considered various factors including customer churn, competition from new entrants, and technology changes to determine the deferral period of three years.

In conjunction with equipment revenue, the Company also incurs incremental direct costs which include equipment and related installation costs. These direct costs cannot be separated from the undelivered subscription service included in the multiple deliverable arrangement. Under IAS 2 "Inventories," these costs represent inventoriable costs and are deferred and amortized over the period of three years, consistent with the recognition of the related equipment revenue. The equipment and installation costs generally exceed the amounts received from customers on the sale of equipment (the equipment is sold to the customer at a subsidized price). The Company defers the entire cost of the equipment, including the subsidy portion, as it has determined that this excess cost will be recovered from future subscription revenues and that the investment by the customer in the equipment creates value through increased retention.

Shaw Business installation revenue and expenses

The Company also receives installation revenues in its Shaw Business operation on contracts with commercial customers which are deferred and recognized as revenue on a straight-line basis over the related service contract, generally spanning two to ten years. Direct and incremental costs associated with the service contract, in an amount not exceeding the upfront installation revenue, are deferred and recognized as an operating expense on a straight-line basis over the same period.

Wireless equipment revenue

Revenue for performance obligations satisfied at a point in time is recognized when control of the item or service transfers to the customer. Revenue from the direct sale of equipment to subscribers or dealers is recognized when the equipment is delivered and accepted by the subscribers or dealers.

For bundled arrangements (i.e., wireless handsets and voice and data services), items are accounted for as separate performance obligations if the item meets the definition of a distinct good or service. Stand-alone selling prices are determined using observable prices adjusted for market conditions and other factors, as appropriate. The Company offers a discretionary wireless handset discount program, whereby the subscriber earns the applicable discount by maintaining services with the Company, such that the receivable relating to the discount at inception of the transaction is reduced over a period of time. This discount is allocated proportionately between the equipment and service revenue, with the equipment discount recognized when the handset is delivered and the corresponding service discount is classified as a contract asset. The contract asset is reduced on a straight-line basis over the period which the discount is forgiven to a maximum of two years with an offsetting reduction to service revenue.

The Company also offers a plan allowing customers to receive a larger up-front handset discount than they would otherwise qualify for if they pay a predetermined incremental charge to their existing service plan on a monthly basis. The charge is billed on a monthly basis but is recognized as revenue when the handset is delivered and accepted by the subscriber. The amount receivable is classified as part of other current or non-current receivables, as applicable, in the Consolidated Statements of Financial Position.

Income statement classification

The Company distinguishes amortization of deferred equipment revenue and deferred equipment costs from the revenue and expenses recognized from ongoing service activities on its income statement. Equipment revenue and costs are deferred and recognized over the anticipated term of the related future revenue (i.e., the monthly service revenue) with the period of recognition spanning three to five years. As a result, the amortization of deferred equipment revenue and deferred equipment costs are non-cash items on the income statement, similar to the Company's amortization of deferred indefeasible right to use (IRU) revenue, which the Company also segregates from ongoing revenue. Further, within the lifecycle of a customer relationship, the customer generally purchases customer premise equipment at the commencement of the customer relationship, whereas the subscription revenue represents a continuous revenue stream throughout that customer relationship. Therefore, the segregated presentation provides a clearer distinction within the income statement between cash and non-cash activities and between up-front and continuous revenue streams, which assists financial statement readers to predict future cash flows from operations.

Allowance for doubtful accounts

A significant portion of the Company's revenues are earned from selling on credit to individual subscribers. Because there are some customers who do not pay their debts, selling on credit necessarily involves credit losses. The Company is required to make an estimate of an appropriate allowance for doubtful accounts on its receivables. In determining its estimate, the Company considers factors such as the number of days the account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances. The estimated allowance required is a matter of judgment and the actual loss eventually sustained may be more or less than the estimate, depending on events which have yet to occur and which cannot be foreseen, such as future business, personal and economic conditions. Conditions causing deterioration or improvement in the aging of accounts receivable and collections will increase or decrease bad debt expense.

Leases

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets.

In determining whether a contract contains a lease, the Company makes judgments in determining whether the contract involves the use of an identified asset, whether the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use, and whether the Company has the right to direct the use of the identified asset.

In determining the contract term, the Company makes judgments in determining the non-cancellable period of the lease and the impact to the term of any options in the contract including options to extend or terminate the lease and whether or not the Company is reasonably certain to exercise these options.

When determining the interest rate used for discounting future cash flows the Company uses the incremental borrowing rate unless the rate implicit in the lease is readily determinable. The determination of the incremental borrowing rate is derived from publicly available rates and adjusted for lease terms. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Property, plant and equipment and other intangibles – capitalization of direct labour and overhead

The cost of property, plant and equipment and other intangibles includes direct construction or development costs (such as materials and labour) and overhead costs directly attributable to the construction or development activity. The Company capitalizes direct labour and direct overhead incurred to construct new assets, upgrade existing assets and connect new subscribers. These costs are capitalized as they are directly attributable to the acquisition, construction, development or betterment of the networks or other intangibles. Repairs and maintenance expenditures are charged to operating expenses as incurred.

Direct labour and overhead costs are capitalized in three principal areas:

1. **Corporate departments such as Technology, Operations, Products, and Supply Chain (TOPS):** TOPS is involved in overall planning and development of the Video/Internet/Phone/Wireless infrastructure. Labour and overhead costs directly related to these activities are capitalized as the activities directly relate to the planning and design of the construction of the distribution system. In addition, TOPS devotes considerable efforts towards the development of systems to support Phone, WiFi, and projects related to new customer management, billing, and operating support systems. Labour costs directly related to these and other projects are capitalized.
2. **Cable regional construction departments, which are principally involved in constructing, rebuilding and upgrading the Cable/Internet/Phone infrastructure:** Labour and overhead costs directly related to the construction activity are capitalized as the activities directly relate to the construction or upgrade of the distribution system. Capital projects include, but are not limited to, new subdivision builds, increasing network capacity by reducing the number of homes fed from each node, and upgrades of plant capacity and the WiFi build.
3. **Subscriber-related activities such as installation of new drops and Internet and Phone services:** The labour and overhead directly related to the installation of new services are capitalized as the activity involves the installation of capital assets (e.g., wiring, software) which enhance the service potential of the distribution system through the ability to earn future revenues. Costs associated with service calls, collections, disconnects, and reconnects that do not involve the installation of a capital asset are expensed.

Amounts of direct labour and direct overhead capitalized fluctuate from year to year depending on the level of customer growth and plant upgrades for new services. In addition, the level of capitalization fluctuates depending on the proportion of internal labour versus external contractors used in construction projects.

The percentage of direct labour capitalized in many cases is determined by the nature of employment in a specific department. For example, a significant portion of labour and direct overhead of the cable regional construction departments is capitalized as a result of the nature of the activity performed by those departments. Capitalization is also based on piece rate work performed by unit-based employees which is tracked directly. In some cases, the amount of capitalization depends on the level of maintenance versus capital activity that a department performs. In these cases, an analysis of work activity is applied to determine this percentage split.

Amortization policies and useful lives

The Company amortizes the cost of property, plant and equipment and other intangibles over the estimated useful service lives of the items. These estimates of useful lives involve considerable judgment. In determining these estimates, the Company takes into account industry trends and company-specific factors, including changing technologies and expectations for the in-service period of these assets. On an annual basis, the Company reassesses its existing estimates of useful lives to ensure they match the anticipated life of the technology from a revenue-producing perspective. If technological change happens more quickly or in a different way than the Company has anticipated, the Company may have to shorten the estimated life of certain property, plant and equipment or other intangibles which could result in higher amortization expense in future periods or an impairment charge to write down the value of property, plant and equipment or other intangibles.

Intangibles

The excess of the cost of acquiring cable, satellite, and wireless businesses over the fair value of related net identifiable tangible and intangible assets acquired is allocated to goodwill. Net identifiable intangible assets acquired consist of amounts allocated to broadcast rights and licences, wireless spectrum licences, trademarks, brands, customer relationships, and software assets. Broadcast rights and licences, wireless spectrum licences, trademarks, and brands represent identifiable assets with indefinite useful lives.

Customer relationships represent the value of customer contracts and relationships acquired in a business combination and are amortized on a straight-line basis over their estimated useful lives ranging from 4 – 15 years.

Software that is not an integral part of the related hardware is classified as an intangible asset. Internally developed software assets are recorded at historical cost and include direct material and labour costs as well as borrowing costs on qualifying assets. Software assets are amortized on a straight-line basis over estimated useful lives ranging from 3 – 10 years. The Company reviews the estimates of lives and useful lives on a regular basis.

Asset impairment

The Company tests goodwill and indefinite-life intangibles for impairment annually (as at February 1) and when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of each cash-generating unit (CGU) is determined based on the higher of the CGU's fair value less costs to sell and its value in use. A CGU is the smallest identifiable group of assets that generate cash flows that are independent of the cash inflows from other assets or groups of assets. The Company's cash generating units are Cable, Satellite, and Wireless. Where the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods. The results of the impairment tests are provided in Note 9 to the Consolidated Financial Statements.

Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred, on a discounted basis, with a corresponding increase to the carrying amount of property and equipment, primarily in respect of wireless and transmitter sites. This cost is amortized on the same basis as the related asset. The timing or amount of the outflow is subject to estimation and judgment. The liability is subsequently increased for the passage of time and the accretion is recorded in the income statement as interest expense. The discount rates applied are subsequently adjusted to current rates as required at the end of reporting periods. Revisions due to the estimated timing of cash flows or the amount required to settle the obligation may result in an increase or decrease in the liability. Actual costs incurred upon settlement of the obligation are charged against the liability to the extent recorded.

Employee benefit plans

As at August 31, 2021, Shaw had non-registered defined benefit pension plans for key senior executives and designated executives. The amounts reported in the financial statements relating to the defined benefit pension plans are determined using actuarial valuations that are based on several assumptions including the discount rate and rate of compensation increase. While the Company believes these assumptions are reasonable, differences in actual results or changes in assumptions could affect employee benefit obligations and the related income statement impact. The differences between actual and assumed results are immediately recognized in other comprehensive income/loss. The most significant assumption used to calculate the net employee benefit plan expense is the discount rate. The discount rate is the interest rate used to determine the present value of the future cash flows that is expected to be needed to settle employee benefit obligations and is also used to calculate the interest income on plan assets. It is based on the yield of long-term, high-quality corporate fixed income investments closely matching the term of the estimated future cash flows and is reviewed and adjusted as changes are required. The following table illustrates the increase on the accrued benefit obligation and pension expense of a 1% decrease in the discount rate:

(millions of Canadian dollars)	Accrued Benefits Obligation at End of Fiscal 2021	Pension Expense Fiscal 2021
Weighted Average Discount Rate – Non-registered Plans	3.10%	2.70%
Impact of: 1% decrease – Non-registered Plans	$ 72	$ 2

Deferred income taxes

The Company has recognized deferred income tax assets and liabilities for the future income tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets are also recognized in respect of losses of certain of the Company's subsidiaries. The deferred income tax assets and liabilities are measured using enacted or substantially enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to reverse or the tax losses are expected to be utilized. Realization of deferred income tax assets is dependent upon generating sufficient taxable income during the period in which the temporary differences are deductible. The Company has evaluated the likelihood of realization of deferred income tax assets based on forecasts of taxable income of future years, existing tax laws and tax planning strategies. Significant changes in assumptions with respect to internal forecasts or the inability to implement tax planning strategies could result in future impairment of these assets.

Commitments and contingencies

The Company is subject to various claims and contingencies related to lawsuits, taxes and commitments under contractual and other commercial obligations. Contingent losses are recognized by a charge to income when it is likely that a future event will confirm that an asset has been impaired or a liability incurred at the date of the financial statements and the amount can be reasonably estimated. Significant changes in assumptions as to the likelihood and estimates of the amount of a loss could result in recognition of additional liabilities. Contractual and other commercial obligations primarily relate to network fees and agreements for use of transmission facilities in the normal course of business.

RELATED PARTY TRANSACTIONS

Related party transactions are reviewed by Shaw's Corporate Governance and Nominating Committee, consisting of independent directors. The following sets forth certain transactions in which the Company is involved.

Corus

The Company and Corus Entertainment Inc. ("Corus") are subject to common voting control. In fiscal 2020 and fiscal 2021, network, advertising, and programming fees were paid to various Corus subsidiaries. The Company also provided uplink of television signals, programming content, Internet services and lease of circuits to various Corus subsidiaries.

Burrard Landing Lot 2 Holdings Partnership

The Company has a 33.33% interest in Burrard Landing Lot 2 Holdings Partnership (the "Partnership"). During fiscal 2021, the Company paid the Partnership for lease of office space in Shaw Tower. Shaw Tower, located in Vancouver, British Columbia, is the Company's headquarters for its lower mainland British Columbia operations.

Key management personnel and Board of Directors

Key management personnel consist of the most senior executive team and along with the Board of Directors have the authority and responsibility for directing and controlling the activities of the Company. In addition to compensation provided to key management personnel and the Board of Directors for services rendered, the Company transacts with companies related to certain Board members primarily for the purchase of remote control units, network programming, collections, and installation of equipment.

Refer to Note 29 to the Consolidated Financial Statements for further related party transaction detail.

NEW ACCOUNTING STANDARDS

Shaw has adopted or will adopt a number of new accounting policies as a result of recent changes in IFRS as issued by the IASB. The ensuing discussion provides additional information as to the date that Shaw is or was required to adopt the new standards, the methods of adoption permitted by the standards, the method chosen by Shaw, and the effect on the financial statements as a result of adopting the new policies. The adoption or future adoption of these accounting policies has not and is not expected to result in changes to the Company's current business practices.

Standards, interpretations and amendments to standards issued but not yet effective

The Company has not yet adopted certain standards and interpretations that have been issued but are not yet effective. The following pronouncements are being assessed to determine the impact on the Company's results and financial position but the impacts are not expected to be material:

- *Proceeds before Intended Use* (Amendments to IAS 16, *Property, Plant and Equipment*) was amended to prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing the asset to capable operations. These amendments are required to be applied for annual periods commencing on or after January 1, 2022, however earlier application is permitted.

- *Onerous Contracts – Costs of Fulfilling a Contract* (Amendments to IAS 37, Provisions, Contingent Liabilities and Contingent Assets) was amended to clarify which costs should be included in determining the cost of fulfilling a potential onerous contract. These amendments are required to be applied for annual periods commencing on or after January 1, 2022, however earlier application is permitted.

- *Classification of Liabilities as Current or Non-Current (Amendments to IAS 1, Presentation of Financial Statements)* was amended to clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period and specifies that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability. The amendments are effective January 1, 2023 with early application permitted. The amendments are required to be adopted retrospectively.

RISK MANAGEMENT

In the normal course of our business activities, the Company is subject to risks. The purpose of risk management is to manage and mitigate risk, rather than to eliminate risk. The Company is committed to continually strengthening our risk management capabilities to protect and enhance value.

Risk Governance and Oversight

The Board of Directors has overall risk governance and oversight responsibilities. Specifically, the Board is responsible for identifying and assessing the principal risks inherent in the business activities of the Company and ensuring that management takes all reasonable steps to implement appropriate systems to manage such risks. The Board of Directors has delegated elements of its risk oversight responsibilities to specific Board committees. The Audit Committee is responsible for: (1) overseeing the Company's processes for identifying, assessing, and managing risks; and (2) ensuring that management implements and maintains effective internal controls and procedures for identifying, assessing and managing the principal risks to the Corporation and its business. In addition, the Human Resources and Compensation Committee is responsible for ensuring that the Company's short, medium and long-term incentive plans do not incent risk-taking beyond the Company's risk tolerance.

Responsibilities for Risk Management

Responsibility for risk management is shared across our organization. Each department's operating management, led by the Company's executive team, have integrated controls and risk management practices into day-to-day activities and decision-making processes. We have risk management and compliance functions across the organization such as Finance, Privacy, Security and Risk, Legal and Regulatory, and Technology Risk and Compliance. The Internal Audit and Advisory Services (IA&AS) department provides independent and objective audit and advisory services to evaluate and improve the effectiveness of the Company's governance, internal controls, disclosure processes, and risk management activities. The Audit Committee oversees the work of the IA&AS department and all reports issued by the IA&AS department. In addition, the IA&AS department's annual plan is reviewed and approved by the Audit Committee.

Enterprise Risk Management

As part of its role in risk governance and oversight, the Audit Committee oversees the Enterprise Risk Management (ERM) program. The ERM program is a performance focused process designed to identify, monitor, and manage significant corporate level risks that could impact the achievement of our strategic objectives. The Company's executives meet periodically to: (1) review and update significant corporate level risks, (2) assess such corporate level risks in terms of likelihood and magnitude of impact, (3) review the response strategy, and (4) monitor progress. The latest ERM update was provided to the Audit Committee in October 2021, with updates to be provided to the Board at least annually. The significant risks and uncertainties affecting the Company and its business are discussed under "Known Events, Trends, Risks and Uncertainties."

KNOWN EVENTS, TRENDS, RISKS AND UNCERTAINTIES

The discussion in this MD&A addresses only what management has determined to be the most significant known events, trends, risks, and uncertainties relevant to the Company, its operations, and/or its financial results. This discussion is not exhaustive. The discussion of these matters should be considered in conjunction with the "Caution Concerning Forward-Looking Statements."

Risks Related to the Transaction

The completion of the Transaction is subject to the satisfaction or waiver of several conditions precedent

The completion of the Transaction is subject to a number of conditions precedent, some of which are outside of the control of the Company and Rogers, including receipt of the Key Regulatory Approvals, there not having occurred a Material Adverse Effect or Purchaser Material Adverse Effect (as such terms are defined in the Arrangement Agreement) and the satisfaction of certain other customary closing conditions. There can be no certainty, nor can the Company or Rogers provide any assurance, that all conditions precedent to the Transaction will be satisfied or waived, nor can there be any certainty of the timing of their satisfaction or waiver. In addition, shareholders are advised that the condition relating to the occurrence of a Purchaser Material Adverse Effect is enforceable by, and is for the benefit of, the Shaw Family Living Trust. Accordingly, the Shaw Family Living Trust, which may have interests in the Transaction different from, or in addition to, those of other shareholders, has the right to prevent or delay the completion of the Transaction should it determine that a Purchaser Material Adverse Effect has occurred.

If, for any reason, the Transaction is not completed or its completion is materially delayed and/or the Arrangement Agreement is terminated, the market price of the Company's securities may be materially adversely affected. In such circumstances, the Company's business, financial condition or results of operations could also be subject to various material adverse consequences. In addition, if the Transaction is not completed, in certain circumstances, the Company may be required to pay a termination fee of $800 million to Rogers, the result of which could have a material adverse effect on the Company's business, financial position and results of operations and its ability to fund growth prospects and current operations.

The Key Regulatory Approvals necessary to complete the Transaction may not be obtained or may only be obtained after substantial delay

To complete the Transaction, each of the Company and Rogers must make certain filings with and obtain certain consents and approvals from certain governmental and regulatory authorities. In particular, the Company and Rogers have not yet obtained the Key Regulatory Approvals, all of which are required to complete the Transaction. In addition, governmental or regulatory agencies could deny permission for, or seek to block or challenge the Transaction or the transfer or deemed transfer of specific assets, including spectrum licenses, or impose material conditions relating to the Arrangement or any such transfer. If any one of the Key Regulatory Approvals is not obtained or any applicable law is in effect which makes the consummation of the Transaction illegal, the Transaction will not be completed.

In addition, a substantial delay in obtaining the Key Regulatory Approvals could result in the Transaction not being completed. In particular, if the Transaction is not completed by March 15, 2022 (subject to an extension of up to 90 days if required to obtain the Key Regulatory Approvals), either Shaw or Rogers may terminate the Arrangement Agreement, in which case the Transaction will not be completed.

Under certain circumstances, if the Key Regulatory Approvals are not obtained or any law (that relates to one or more of the Key Regulatory Approvals or the *Competition Act* (Canada)) is in effect which would make the consummation of the Transaction illegal and the failure to obtain the Key Regulatory Approvals is not caused by, and is not a result of, the failure by the Company to perform in all material respects any of its covenants or agreements under the Arrangement Agreement, then Rogers is obligated to pay the $1.2 billion reverse termination amount and certain costs amounting to approximately $120 million relating to Rogers' exercise of its right to require Shaw to redeem all of its issued and outstanding Preferred Shares on June 30, 2021. In addition, the holders of the Class A Shares and Class B Shares will not receive the consideration under the Arrangement Agreement (as the Transaction will not be completed).

The Arrangement Agreement may be terminated in certain circumstances

The Transaction may be terminated by the Company or Rogers in certain circumstances, in which case the Transaction will not be completed. Accordingly, there is no certainty, nor can the Company provide any assurance, that the Arrangement Agreement will not be terminated by the Company or Rogers prior to the completion of the Transaction. The failure to complete the Transaction could materially negatively impact the market price of Shaw's securities. Moreover, if the Arrangement Agreement is terminated and the Company's Board determines to pursue another merger or business combination, there is no assurance that the Company's Board will be able to find a party willing to pay an equivalent or greater price for all of Shaw's issued and outstanding Class A Shares and Class B Shares than the price to be paid by Rogers pursuant to the Transaction.

The failure to complete the Transaction could negatively impact the Company and have a material adverse effect on the current and future operations, financial condition and prospects of the Company

If the Transaction is not completed for any reason, there are risks that the announcement of the Transaction and the dedication of substantial resources of the Company to the completion thereof could have a negative impact on the Company's current business relationships (including with future and prospective employees, customers, suppliers and partners) and could have a material adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. In addition, failure to complete the Transaction for any reason could materially negatively impact the market price of Shaw's securities.

The entering into of the Arrangement Agreement may also preclude the Company from participating in any auction by ISED for wireless spectrum licenses. If the Transaction is not completed, the inability of the Company to participate in any wireless spectrum auction and to acquire licenses thereunder could have a material adverse effect on the current and future operations, financial condition and prospects of the Company.

The Company will incur significant costs and, in certain circumstances, may be required to pay a Termination Fee

Certain costs relating to the Transaction, such as legal, accounting, tax and financial advisory fees, must be paid by the Company even if the Transaction is not completed. In addition, if the Transaction is not completed for certain reasons, the Company may be required to pay a termination fee of $800 million to Rogers, the result of which could have a material adverse effect on the Company's business, financial position and results of operations and its ability to fund growth prospects and current operations.

The Transaction may divert the attention of management of the Company, impact the Company's ability to attract or retain key personnel or impact the Company's third-party business relationships

The Transaction could cause the attention of the Company's management to be diverted from the day-today operations of the Company. These disruptions could be exacerbated by a delay in the completion of the Transaction and could have an adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company. Because the completion of the Transaction is subject to uncertainty, officers and employees of the Company may experience uncertainty about their future roles with the Company, which may adversely affect the Company's ability to attract or retain key management and personnel in the period until the completion or termination of the Transaction.

In addition, third parties with which the Company currently has business relationships or may have business relationships in the future, including industry partners, regulators, customers and suppliers, may experience uncertainty associated with the Transaction, including with respect to current or future relationships with the Company or Rogers. Such uncertainty could have a material and adverse effect on the current and future business, operations, results of operations, financial condition and prospects of the Company.

The Arrangement Agreement contains certain restrictions on the ability of the Company to conduct its business

Under the Arrangement Agreement, the Company must generally use its reasonable best efforts to conduct its business in the ordinary course and, prior to the completion of the Transaction or the termination of the Arrangement Agreement, the Company is subject to certain covenants which restrict it from taking certain actions without the prior consent of Rogers and which require it to take certain other actions. In either case, such covenants may delay or prevent the Company from pursuing business opportunities that may arise or preclude actions that would otherwise be advisable if the Company were to remain a standalone entity.

The financing of the Transaction

Although the Arrangement Agreement does not contain a financing condition and Rogers has received the debt commitment letter to provide for the debt financing in order to finance the Transaction, the obligation of the lenders under the debt commitment letter to provide the debt financing is subject to certain limited conditions. In the event that the Transaction cannot be completed due to the failure of Rogers to obtain financing required to close the

Transaction either because the limited conditions to the financing are not satisfied or other events arise which prevent Rogers from consummating the debt financing, the Company expects that Rogers may be unable to fund the consideration required to complete the Transaction, in which case Rogers will be required to pay a reverse termination fee of $1.2 billion to the Company and certain costs amounting to approximately $120 million relating to Rogers' exercise of its right to require Shaw to redeem all of its issued and outstanding Preferred Shares on June 30, 2021. In addition, the holders of the Class A Shares and Class B Shares will not receive the consideration under the Arrangement Agreement (as the Transaction will not be completed).

Coronavirus (COVID-19)

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19," continues to have worldwide impacts. Since being recognized by the World Health Organization as a pandemic on March 11, 2020, governments worldwide have enacted emergency measures to contain the spread of the virus. These measures, which include the implementation of border closures, travel bans, self-imposed quarantine periods, self-isolation, physical and social distancing, vaccine passports and the closure (or capacity reduction) of businesses, have caused material disruption to businesses in Canada and globally which has resulted in an uncertain and challenging economic environment. The pandemic's impact on the global debt and equity capital markets caused governments and central banks to react with significant monetary and fiscal interventions designed to stabilize economic conditions. While certain interventions have been lifted, others remain in place, have been re-instated or may yet be re-instated as the pandemic continues to threaten the health of Canadians.

It is unknown at this time as to the long-term efficacy of COVID-19 vaccines and the duration of government interventions against the COVID-19 virus and potential variants. Any estimate of the length and severity of these developments is therefore subject to significant uncertainty, and accordingly estimates of the extent to which the COVID-19 pandemic may, directly or indirectly, materially and adversely affect the Company's operations, financial results, and condition in future periods are also subject to significant uncertainty. Such risks include, but are not limited to:

- issues delivering the Company's products and services due to employee illness, Company or government-imposed isolation programs, restrictions on the movement of personnel, retail store closures/re-openings and supply chain disruptions;
- impacts on the availability of components and electronics due to global silicon (microprocessor) supply shortages and logistical/transport issues, impacting our ability to obtain inventory, including customer premise and network equipment;
- significant additional capital expenditures and the availability of resources required to maintain, upgrade or expand our networks in order to accommodate substantially increased network usage while large numbers of our customers continue working from home;
- uncertainty associated with costs, delays and availability of resources required to complete major maintenance and expansion projects on time and budget;
- significant lost revenue in our Shaw Business segment due to the significant economic challenges that our enterprise, small and medium sized business customers are facing due to the impact of the COVID-19 pandemic;
- impacts on the availability of, and therefore our ability to provide, the content and programming our customers expect;
- uncertainty associated with the costs and availability of resources required to provide the appropriate/required levels of service to our customers through our digital and self-serve platforms;
- a material reduction in demand for, or profitability of, our products or services, acceleration in cord cutting or cord shaving by our customers, or increase in delinquent or unpaid bills, due to job losses and associated financial hardship;
- the impact of additional legislation, regulation and other government interventions in response to the COVID-19 pandemic;
- the impact of the withdrawal of COVID-19 related government support programs on customers' demand or ability to pay for our products and services;
- the negative impact on global debt and equity capital markets, including the trading price of the Company's securities;
- the inability to access capital markets at a reasonable cost; and
- the potential impairment of long-lived assets.

Any of these risks, and others, could have a material adverse effect on our business, operations, capital resources, and/or financial results of operations.

The severity and duration of impacts from the COVID-19 pandemic remain uncertain and management continues to focus on the safety of our people, most of whom continue to work from home, providing reliable connectivity to our customer base, compliance with guidelines and requirements issued by various health authorities and government organizations, and continuity of other critical business operations. In fiscal 2020, we temporarily closed retail locations nationally (with the exception of a limited number of street front stores that remained open to provide urgent customer support). As at the date of this MD&A, substantially all of the Company's retail stores are open for business

The COVID-19 pandemic continues to evolve and as governments reduce, lift or reimpose emergency measures and interventions, the Company's focus continues to be on the safety and health of its employees, the reliability of its facilities-based network and responsiveness to its customers. The Company's return to workplace plan, designed to effect the gradual and safe re-introduction of employees to the workplace, continues to be evaluated and will be implemented in phases as government-imposed restrictions on businesses and individuals are lifted.

In order to address the health and safety of its employees returning to work, the Company has or will put in place many new protocols, including vaccination requirements, enhanced cleaning measures, sanitization stations, and daily health and wellness self-assessments. The Company is updating employees on a frequent basis to provide information on the situation and on necessary precautions to take. We will continue to have an open dialogue with our employees and public safety and government officials at all levels, as well as key suppliers, partners, and customers.

Competition and Technological Change

Shaw operates in an open and competitive marketplace. Our businesses face competition from regulated and unregulated entities using existing or new technologies and from illegal services. In addition, the rapid deployment of technologies, services, and products has blurred the traditional lines between telecommunications, Internet and distribution services and further expands the competitive landscape. Shaw may also face competition from platforms that may gain advantages through regulatory processes. In addition, the industry has experienced a general reduction in barriers to entry due to technological substitution, the development of IP networks and certain recent regulatory decisions.

While Shaw continually seeks to strengthen its competitive position through investments in infrastructure, technology and customer service and through acquisitions, there can be no assurance that these investments will maintain Shaw's market share or performance in the future. New technologies in the industry may evolve faster than the historical investment cycle, potentially resulting in additional capital investments not currently planned and shorter useful lives for certain of Shaw's existing assets. New products or services introduced into the marketplace may reduce demand for Shaw's existing products and services or exert downward pricing pressure on Shaw's offerings.

The following developments in the competitive environment, trends, risks and/or uncertainties specific to areas of our business may have a material adverse effect on Shaw and its reputation, as well as its operations and/or its financial results. In each case, the competitive events, trends, risks and/or uncertainties may increase or continue to increase. Competition for new subscribers and retention of existing subscribers (churn reduction) may require substantial promotional activity and increase our cost of customer acquisition, decrease our ABPU, ARPU or all of these metrics. We expect that competition, including aggressive discounting practices by competitors to gain market share, is likely to continue to increase for all our businesses.

Consumer Internet

Shaw competes with different types of ISPs offering residential Internet access including traditional telephone companies, wireless providers and independent ISPs making use of wholesale services to provide Internet access in various markets. In urban areas competition from traditional telephone companies is increasing as they near completion on their FTTP builds, while in rural areas, new entrants leveraging Low Earth Orbit (LEO) satellite technology are offering additional connectivity options. Wireless technology, both LTE and 5G, is also becoming more broadly used for fixed wireless services, as well as through mobile hotspot or tethering features. While Shaw continues to invest in technology and infrastructure to improve its consumer Internet offerings, there can be no assurance that such investments will be sufficient to maintain or enhance the Company's competitive position with respect to new or emerging technologies.

Shaw expects that consumer demand for higher Internet access speeds and greater bandwidth will continue to be driven by bandwidth-intensive applications including streaming video, digital downloading, Internet-of-Things (IOT), remote work, video collaboration technology, interactive gaming, and cloud-based services. As described further under "Shaw's Wireline Network," Shaw continues to expand the capacity and efficiency of its wireline network to handle the anticipated increases in consumer demand for higher Internet access speeds and greater bandwidth. However, there can be no assurance that our investments in network capacity will continue to meet this increasing demand. In addition, unprecedented situations such as the COVID-19 pandemic highlighted the unpredictable nature of network traffic growth and consumer behavior.

Consumer Video

Shaw's Consumer Video services, delivered through both our wireline and satellite platforms, compete with other distributors of video and audio signals. We also compete increasingly with unregulated OTT and offerings available over Internet connections. Continued improvements in the quality of streaming video over the Internet and the increasing availability of television shows and movies online will continue to increase competition to Shaw's Consumer Video services. As a result, we continue to experience cord cutting and cord shaving in our traditional cable services and packages.

Consumer Phone

Shaw's competitors for Consumer Wireline Phone services include traditional telephone companies, other wireline carriers, and Voice over Internet Protocol (VoIP) providers. In addition, households increasingly rely on wireless services in place of wireline phone services which negatively affects the business and prospects of our Consumer Wireline Phone services.

Wireless

Freedom Mobile and Shaw Mobile are relatively new entrants in the highly competitive Canadian wireless market which is characterized by three national wireless incumbent carriers and regional participants. The national wireless incumbent carriers have larger, and more diverse spectrum holdings than Shaw, as well as larger operational and financial resources than Shaw and are well established in the market. Freedom Mobile and Shaw Mobile's ability to continue to offer and improve Wireless services and to offer new services depends on, among other factors, continued access to, and deployment of, adequate spectrum, including the ability to both renew current spectrum licences and acquire new spectrum licences (in various spectrum bands). If Freedom Mobile and Shaw Mobile cannot acquire and retain required spectrum, they may not be able to continue to offer and improve current wireless services and deploy new services on a timely basis, including providing competitive data speeds their customers want. For example, the development and utilization of 5G technology requires additional spectrum licenses. While the 5G ecosystems are expected to work on multiple frequency bands, including 600 MHz spectrum, 3500 MHz spectrum is becoming the primary band for 5G mobile coverage. Our decision not to participate in the recent 3500 MHz spectrum auction may place Shaw's wireless business at a competitive disadvantage if Shaw is unable to acquire the spectrum resources required to launch a 5G service. As a result, Freedom Mobile and Shaw Mobile's ability to attract and retain customers could be adversely affected. In addition, an inability to acquire and retain required spectrum could affect network quality and result in higher capital expenditures. See "Risks Related to the Transaction – The failure to complete the Transaction could negatively impact the Company and have a material adverse effect on the current and future operations, financial condition and prospects of the Company" for more information.

Our Wireless division may face increased competition from other facilities based or non-facilities based new entrants or alternate technologies, including as a result of regulatory decisions or government policies that favour certain competitive platforms. For further detail see "Government Regulations and Regulatory Developments – Telecommunications Act – CRTC Wireless Review."

Business Services

Shaw Business competes with other telecommunications carriers in providing high-speed data and video transport and Internet connectivity services to businesses, ISPs and other telecommunications providers. The telecommunications industry in Canada is highly competitive, rapidly evolving and subject to constant change. Shaw Business' competitors include traditional telephone companies, competitive access providers, competitive local exchange carriers, ISPs, private networks built by large end users, and other telecommunications companies. In addition, the development and implementation of new technologies by others could give rise to significant additional competition. Competitors for the delivery of voice and unified communication services include traditional telecommunications companies, resellers and new entrants to the market leveraging new technologies to deliver services. Shaw Broadcast Services also competes in industries that are highly competitive, rapidly evolving and subject to constant change.

Information Systems and Internal Business Processes

Many aspects of the Company's businesses depend to a large extent on various information technology (IT) systems and software, and on internal business processes. Shaw regularly undertakes initiatives to update and improve these systems and processes. Although the Company has taken steps to reduce the risks of failure of these systems and processes, there can be no assurance that potential failures of, or deficiencies in, these systems, processes or change initiatives will not have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Acquisitions, business combinations and the development and launch of new services typically require significant integration and system development efforts. The Company faces the risk that proposed IT systems or process change initiatives will not be implemented successfully, on budget, or on time. As the complexity of the Company's systems increases, system stability and availability may be affected. Failure to implement and maintain appropriate IT systems could negatively impact Shaw's reputation, operations and/or financial results.

Cyber Security Risks

Cyber attacks continue to become more frequent and sophisticated in nature with a recent increase in telecom attacks globally. Although Shaw's systems and network architecture are designed and operated to be secure, they are vulnerable to the risks of an unauthorized third party accessing these systems or its network. This could lead to a number of adverse consequences, including the unavailability, disruption or loss of Shaw's services or key functionalities within Shaw's technology systems or software; the unauthorized disclosure, corruption or loss of sensitive Company, customer or personal information; litigation, investigations, fines, and liability for failure to comply with privacy and information security laws; increased fraud; increased cyber security protection costs; and higher insurance premiums. Shaw is also exposed to information security threats as a result of actions by our customers, suppliers, third-party service providers, employees and business partners – whether maliciously or otherwise. Our insurance may not cover or be adequate to fully reimburse us for any associated costs and losses.

We continue to assess and enhance our cyber security within Shaw while we are monitoring the risks of cyber attacks and implement appropriate security policies, procedures and information technology systems to mitigate the risk of cyber attacks.

External threats to our network are constantly changing, and there is no assurance that Shaw will be able to protect its network from all future threats which may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Privacy

As part of regular business activities, Shaw collects and manages personal information in compliance with applicable laws. In order to minimize privacy risk, Shaw carries out privacy impact assessments (PIAs) and Threat Risk Vulnerability Assessments (TRVAs) on new initiatives and vendor selection processes, and we regularly conduct privacy training for all Shaw employees. Despite these practices, privacy threats continue to evolve quickly, and the Company is at risk of a breach or compromise of employee or customer data or personal information, which may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results. The Company may also face regulatory penalties and legal claims in connection with non-compliance with federal and/or provincial legislation or regulations. See "Government Regulations & Regulatory Developments – Privacy and Anti-Spam Legislation – Privacy Legislation" for more information.

Impact of Regulation

As discussed under "Government Regulations and Regulatory Developments," a majority of our Canadian business activities are subject to: (i) government legislation, (ii) regulations and policies administered by various government departments and regulators, particularly ISED, Canadian Heritage and the CRTC, and (iii) conditions of licence imposed by ISED and/or the CRTC. Shaw's operations, financial results, and future prospects are affected by changes in legislation, regulations, policies, and conditions of licence, including pursuant to changes in the interpretation of existing legislation, regulations and requirements contained in such conditions of licence by courts, governments, or the regulators, in particular the CRTC, ISED, Canadian Heritage, the Competition Bureau, and the Copyright Board. These changes relate to, and may have an impact on, among other things, licensing and licence renewal, spectrum holdings, products and services, operations, competition, programming carriage and terms of carriage, strategic transactions, infrastructure access, and the potential for new or increased fees or costs. All such changes in the regulatory regime may have a material adverse effect on the Company and its operations, reputation, investment capability, ability to compete, as well as the Company's financial results and/or future prospects.

Reliance on Suppliers and Third Party Service Providers

Shaw is connected to or relies on other telecommunication carriers and certain utilities to conduct its business. Any disruption to the services provided by these suppliers, including labour strikes and other work disruptions, bankruptcies, component sourcing challenges, technical difficulties or other events affecting the business operations of these carriers or utilities may affect Shaw's ability to operate and, therefore may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results. The advent of the COVID-19 pandemic has caused disruption to global supply chains, including those on which Shaw relies to conduct its business.

The Company sources its customer premise, capital equipment, and capital builds as well as portions of its service offerings, including network, video delivery and IT functions from certain key suppliers. While the Company has alternate sources for many of these purchases, the loss of a key supplier (or the inability of a key supplier to provide such products or services for any reason) may require us to incur additional capital expenditures for the substitution of existing products and services which could adversely affect the Company's ability to operate, and therefore may have a material adverse effect on Shaw, its reputation, operations and/or its financial results. Additionally, our ability to obtain customer premise and network equipment is impacted by the availability of components and electronics. Shortages of these materials, such as global silicon (microprocessor), or logistical/transport issues, such as those caused by the ongoing COVID-19 pandemic, may also have a material adverse effect on Shaw or its operations.

In the course of fulfilling service arrangements, third-party service providers must ensure our information is appropriately protected and safeguarded. Failure to do so may affect Shaw through increased regulatory risk, reputational damage, and damage to customer experience.

There are a limited number of suppliers of popular mobile devices and there is a risk that the Company will not be able to maintain contracts for its existing supply of mobile devices and/or contract for the supply of new devices on commercially reasonable terms.

Shaw has access to global scale initiatives through partnerships with best-in-class service providers such as Comcast, Cisco Meraki, and Nokia to ensure that the technology we adopt and invest in is leading-edge in the global communications industry. There is a risk that the Company's participation in such partnerships ends or that the technology roadmap of Shaw and its partners diverges, resulting in disparate strategic approaches. Such divergence may result in higher capital requirements, prolonged development timelines of new products and services, and suboptimal performance of new products and services introduced by Shaw.

Inventory

Our Wireless division's inventory consists of devices which generally have short product lifecycles due to frequent new device introductions. The failure to effectively manage inventory levels based on product demand may increase the risk of inventory obsolescence, which could negatively impact Shaw's operations and/or financial results.

Similar to other wireless service providers, Shaw subsidizes the cost of subscriber devices to attract customers to sign a term contract with Freedom Mobile or Shaw Mobile. Shaw also commits to a minimum subsidy per unit with certain suppliers of devices. There is a risk that Shaw may be unable to recover the costs of subsidies over the term of the customer contract which could negatively impact our business, operations, or financial results.

Network Failure

Shaw's business may be interrupted by wireline or wireless network failures, including its own or third-party networks. Such network failures may be caused by fire damage, natural disaster, power loss, cyber attacks, human error, disabling devices, acts of war or terrorism, physical climate change impacts and other events which may be beyond Shaw's control. In recent years we have seen an increase in the number of severe weather events, such as forest fires (including those occurring in British Columbia during the summer of 2021) and floods, that impact our network. The Company is taking steps to mitigate the consequences of the rise in severe weather events on its networks. Despite these efforts, the Company is still subject to an increased risk of damages to its wireline and wireless networks.

As insurance premium costs are uneconomic relative to the risk of failure, Shaw self-insures its plant (underground and aerial infrastructure) in its Fibre+ network. It is likely that wireline or wireless network damage caused by any one incident would be limited by geographic area and the resulting business interruption and financial damages would also be limited. In addition, with respect to a wireline network failure, we expect the risk of loss to be mitigated as most of the backbone fibre network and much of the hybrid fibre coax, or HFC, access network is located underground.

Shaw protects its wireline and wireless networks through a number of measures, including physical and information technology security, redundancy, and ongoing maintenance and placement of insurance on our network equipment and data centres. In the past, the Company has successfully recovered from network damage caused by natural disasters without significant cost or disruption of service. To further mitigate this risk, Shaw is nearing completion on the build of multiple new diverse fibre routes across British Columbia, as well as other provinces. Additionally, to further increase the resiliency of our fibre infrastructure in areas that are prone to fire and wind damage, we are shifting construction to underground builds, where possible, rather than aerial. The new routes and underground builds, along with ongoing investments to increase the resiliency of critical infrastructure sites and the build of a hub on wheels to allow for rapid restoration from the total loss of a hubsite, will continue to increase the resiliency of Shaw's backbone network.

Despite the steps Shaw takes to reduce the risk of wireline and wireless network failure, failures may still occur, and such failures could negatively affect levels of customer service and relationships which may have a material adverse effect on Shaw and its reputation, as well as its operations and/or financial results.

Shaw's networks may also experience unexpected capacity pressures as a result of the impact of the COVID-19 pandemic which could negatively affect network performance and the Company's ability to provide services. Negative impacts on network availability, speed, and consistency could have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Customer Experience

Shaw's customer loyalty, retention, and likelihood to recommend Shaw all depend on our ability to provide a seamless connectivity experience that meets or exceeds their expectations. To meet customer's needs, the Company has modernized several aspects of its Wireline operations to better serve today's customer, including shifting some self-serve interactions to digital platforms, while maintaining professional install and in-person technical support for customer touchpoints that improve overall satisfaction. The Company continues to simplify manual processes that improve its customers overall connectivity experience and day-to-day operations for our employees.

The complexity in our operations due to the use of multiple technology platforms, billing systems, sales channels, marketing databases as well as different rate plans, promotions, and product offerings may limit the Company's ability to respond quickly to market changes and lead to billing, service, or other errors, which may adversely affect customer satisfaction and retention. The failure to sustain and expand customer relationships through quality products/services, and customer service could have a material adverse effect on our business, financial condition, reputation, and/or results of operations.

Shaw uses data analytics tools to perform customer segmentation, improve our offerings to customers, and support corporate decision-making. If the data behind these tools is poor or our analytical tools are not well designed, there is a risk they will not be effective in predicting our customers' needs and wants. The realization of these risks could negatively impact our business and/or reputation.

Satellite

Shaw uses three satellites (Anik F2, Anik F3 and Anik G1) owned by Telesat to provide satellite services in our Consumer division. Effective October 1, 2019, the Company transferred its ownership interest in the 16 Anik F2 transponders, adjusted its satellite traffic on the Anik F1R and Anik F2 satellites, and renewed its capacity service agreements in place on Anik F1R, Anik F2, and Anik G1 until the effective end-of-life dates of such satellites. In connection with the Company's digital network upgrade (DNU) program, the Company has effectively optimized satellite traffic, enabling a reduction in the total number of transponders required by the Company to conduct its business and absorbing the previous capacity leased on Anik F1R prior to this satellite reaching the end of its serviceable life in August 2021. The Company continues to assess its long term satellite capacity requirements with no assurance that replacement transponder capacity will be available or that agreements for such capacity will be entered into on favourable terms. This may have a material adverse effect on customer service and customer relationships, as well as the Company's reputation, operations and/or financial results.

The Company does not maintain any insurance coverage for the transponders on Anik F2, Anik F3 and Anik G1 as it believes the costs are uneconomic relative to the benefit which could be otherwise derived through an arrangement with Telesat. As collateral for the transponder capacity pre-payments that were made by the Company to facilitate the construction of the satellites, the Company maintains a security interest in the transponder capacity and any related insurance proceeds that Telesat recovers in connection with an insured loss event.

The Company does not maintain business interruption insurance covering damage related to the loss of use of one or more of the transponders on the satellites as it believes that the insurance premium costs are uneconomic relative to the risk of transponder and/or satellite failure. The majority of transponder capacity is available to the Company on an unprotected, non-pre-emptible basis. The Company has the option to contract transponders with excess capacities on Anik F2, subject to availability. In the event of satellite failure, service will be restored as capacity becomes available. Restoration of satellite service on another satellite may require repositioning or re-pointing of customers' receiving dishes, an upgrade to their video receivers or customers may require a larger dish. The Anik G1 satellite has a switch feature that allows whole channel services (transponders and available spares) to be switched from extended Ku-band to Ku-band, which provides the Company with limited back-up to restore failed whole channel services of Anik F2 or augment overall Ku-band capacity if the need arises. The Company has reserved limited access to Ku band frequencies in the 107.3 orbital location to enable the switching feature, subject to availability. Satellite failure could negatively affect levels of customer service and customer relationships and may have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

The provision of Internet connectivity in rural areas by new entrants leveraging LEO satellite technology may accelerate cord cutting and/or cord shaving trends among Shaw Direct customers.

Economic Conditions

The Canadian economy is affected by uncertainty in global financial and equity markets, and slowdowns in national and/or global economic growth. Changes in economic conditions, which may differ across our regional footprint, may affect discretionary consumer and business spending, resulting in increased or decreased demand for Shaw's product offerings. Current or future events caused by volatility in domestic or international economic conditions or a decline in economic growth may have a material adverse effect on Shaw, its operations and/or financial results. The advent of the COVID-19 pandemic has exacerbated both the uncertainty and volatility in economic growth rates.

Programming Expenses

Expenses for video programming continue to be one of our most significant operating expenses. Costs may continue to increase, particularly for sports programming. In addition, as we add programming or distribute existing programming to more of our subscriber base, programming expenses increase. Although we have been successful at reducing the impact of these cost increases through the sale of additional services or increasing subscriber rates, there can be no assurance that we will continue to be able to do so and this may have a material adverse effect on Shaw, its operations and/or its financial results.

Roaming Agreements

Shaw and/or its wholly owned subsidiaries have entered into roaming agreements with multiple carriers in Canada and around the world to extend its national and worldwide coverage. If the Company is unable to extend its national and worldwide wireless coverage, or renew or substitute for those roaming agreements at their respective existing terms or on commercially reasonable terms, the Company may be placed at a competitive disadvantage, which could adversely affect its ability to operate its Wireless business, as well as its reputation and customer experience. In addition, if the Company is unable to renew, or substitute for, these roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, prospects, revenues, financial condition, and results of Wireless operations could be adversely affected.

The three incumbent national wireless carriers are required by CRTC regulation to provide domestic wholesale roaming services to Shaw and other facilities-based wireless competitors at regulated rates. Changes to the regulated rates or other terms in the wholesale roaming policy could negatively impact the Company's wireless financial results, growth prospects, and operational flexibility. For further detail see "Government Regulations and Regulatory Developments – Telecommunications Act – CRTC Wireless Review."

Talent Management and Succession Planning

Shaw's success is substantially dependent upon the retention and the continued performance of our executive officers. Many of these executive officers are uniquely qualified in their areas of expertise, making it difficult to replace their services in the short to medium term. The loss of the services of any key executives and/or employees in critical roles or inadequate processes designed to attract, develop, motivate, and retain productive and engaged employees could have a material adverse effect on Shaw, its operations and/or financial results. To mitigate this risk, the Company's comprehensive compensation program is designed to attract, retain, motivate, and reward the executive team and key employees through aligning management's interest with our business objectives and performance.

Furthermore, in light of the announcement of the Transaction, the Company has provided retention packages for members of the senior leadership team as well as key employees to ensure cooperation and appropriate motivation and alignment of interests of employees in connection with the Arrangement, to retain them during the interim period between the signing of the Arrangement Agreement and the closing of the Transaction, and to compensate them for additional work they will be required to perform as a result of the Transaction (in addition to the full time work they perform for the Company on a daily basis).

Labour Relations

As at August 31, 2021, approximately 5% of our employees are represented by unions under collective bargaining agreements. While the Company strives to maintain positive labour relations, we can neither predict the outcome of current or future negotiations relating to labour disputes, union representation, or renewal of collective bargaining agreements, nor be able to avoid future work stoppages, strikes, or other forms of labour protests pending the outcome of any current or future negotiations. A prolonged work stoppage, strike or other form of labour protest could have a material adverse effect on our businesses, operations, and reputation. Even if the Company does not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect our businesses and results of operations. In addition, our ability to make short-term adjustments to control compensation and benefits costs could be limited by the terms of such collective bargaining agreements. To support all leaders and employees, we continually listen to remove barriers and respond in real-time to needs and concerns. We also continue to provide support for leaders on how to manage change and maintain positive employee engagement and relations.

Climate Change

Climate change risks are important considerations for Shaw. These risks have been classified as two main types – physical risks and transition risks – which are described in further detail below.

Physical Risks

In accordance with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD), we recognize that climate change may increase the severity, duration, and frequency of natural hazards and weather-related events. These in turn may negatively impact our business, which may require us to protect, test, maintain, repair, and replace our networks, IT systems, equipment and other infrastructure. For example:

- increased temperatures could impact our networks, IT systems, equipment and other infrastructure which could require the installation of additional cooling devices;

- acute risks (e.g., ice storms, extreme precipitation, flooding, fires, hurricanes, tornados, tsunamis) and chronic risks (e.g., sea-level rise) could impact or destroy our facilities or network, equipment, and other infrastructure, and affect our employees' ability to safely perform work. These impacts may increase our insurance related expenses, and affect our ability to deliver products and services; and
- climate change related impacts to our key suppliers could adversely affect their ability to supply us with required products and services.

The occurrence of any of these events could have a material adverse effect on our operations and/or financial results. See also "Network Failure" risks above which could increase in severity and/or frequency as a result of climate change related natural disasters.

With the exception of our network equipment and data centres, we self-insure our Fibre+ network and, as a result, have limited insurance coverage against the losses resulting from natural disasters affecting our Fibre+ network. For further detail see "Network Failure" above.

Although we have business continuity/resumption plans and disaster recovery plans and strategies in place, the failure of any of our climate change mitigation and adaptation efforts (including response strategies and business continuity protocols) may affect our business through potential disruption of our operations, damage to our facilities and infrastructure, and affect the communities that we operate in and serve, which may have a material adverse effect on Shaw and its reputation, as well as its operations, prospects and/or financial results.

Transition Risks

Climate change is drawing more attention through evolving public interest as well as government regulation and policy.

- **Policy & legal risk:** Many aspects of our operations are subject to evolving and increasingly stringent federal, provincial, and local environmental, health, and safety laws and regulations. These laws and regulations impose requirements with respect to matters such as fuel storage, the recovery and recycling of end-of-life electronic products, greenhouse gas emissions, the release of substances into the environment, corrective and remedial action concerning such releases, and the proper handling, management and disposal of substances. These evolving considerations and more stringent laws and regulations could lead to increased costs for compliance, which could be material. For example, we may be required to incur additional capital expenditures from substituting existing products and services with lower emissions options. The Company may also incur increased operational costs due to higher fuel and energy prices resulting from carbon taxes and/or cap and trade programs.
- **Reputational Risk:** Failure to recognize and adequately respond to changing environmental matters and expectations, or to comply with environmental laws and regulations, could result in fines, new regulatory obligations and associated costs, or damage to our reputation or brand any of which could have a material adverse effect on our operations and/or financial results.

On December 7, 2020, Shaw issued its inaugural ESG report to provide stakeholders (i.e. customers, employees, investors, supply chain partners and regulators) with an overview of our ESG program, including Shaw's goals and actions. Shaw's ESG report can be found at https://www.shaw.ca/corporate/environmental-social-governance.

As part of the development of the ESG program, we integrated climate-related considerations into our governance and risk management practices.

Interest Rates, Foreign Exchange Rates and Capital Markets

Shaw has the following financial risks in its day-to-day operations:

(a) **Interest rates**: Due to the capital-intensive nature of Shaw's operations, the Company uses long-term financing extensively in its capital structure. The primary components of this structure include banking facilities and various Canadian denominated senior notes and debentures with varying maturities issued in the public markets. These are more fully described in Note 13 to the Consolidated Financial Statements.

Interest on bank indebtedness is based on floating rates while the senior notes are all fixed-rate obligations. If required, Shaw uses its credit facility to finance day-to-day operations and, depending on market conditions, periodically converts the bank loans to fixed-rate instruments through public market debt issues. Increases in interest rates may have a material adverse effect on Shaw, its operations and/or its financial results.

(b) **Capital markets**: Shaw requires or may require ongoing access to capital markets to support its operations. Changes in capital market conditions, including significant changes in market interest rates or lending practices, or changes in Shaw's credit ratings, may adversely affect our ability to raise or refinance short-term or long-term debt and therefore may have a material adverse effect on Shaw, its operations and/or its financial results.

Shaw manages its exposure to floating interest rates by maintaining a mix of fixed and floating rate debt. Interest on the Company's unsecured credit facility and accounts receivable securitization program are based on floating rates, while the senior notes are all fixed rate obligations.

As at August 31, 2021, virtually all of Shaw's consolidated long-term debt was fixed with respect to interest rates.

The Company may also enter into derivative contracts, primarily forward contracts, to mitigate its exposure to foreign exchange and interest rate risks. While hedging and other efforts to manage these risks are intended to mitigate Shaw's risk exposure, because of the inherent nature and risk of such transactions, those activities can result in losses. For instance, if Shaw hedges its floating interest rate exposure, it may forego the benefits that may otherwise be experienced if rates were to fall and it is subject to credit risks associated with the counterparties with whom it contracts. In order to minimize the risk of counterparty default under its derivatives agreements, Shaw assesses the creditworthiness of its derivative counterparties. Further information concerning the policy and use of derivative financial instruments is contained in Notes 2 and 30 to the Consolidated Financial Statements.

Litigation

Shaw and its subsidiaries are involved in litigation matters arising in the ordinary course and conduct of its business. Although management does not expect that the outcome of these matters will have a material adverse effect on the Company, there can be no assurance that these matters, or other legal matters that arise in the future, will not have a material adverse effect on Shaw and its reputation, as well as Shaw's operations and/or financial results.

Shaw is a public company with shares trading on the Toronto and New York stock exchanges. As a result, the Company may be subject to civil liability under Canadian and US securities laws for alleged misrepresentations by the Company in its public disclosure documents and/or oral statements.

Legal and Ethical Compliance

Shaw expects and relies on its employees, officers, Board of Directors, contractors, suppliers, and other business partners to act in accordance with applicable legal and ethical standards in all jurisdictions in which we operate, including, but not limited to, anti-bribery, anti-corruption, and anti-money laundering laws and regulations. Situations where Shaw's employees, officers, Board of Directors, contractors, suppliers, and other business partners do not adhere to applicable laws and regulations, the Company's policies or its contractual obligations, whether inadvertently or intentionally, may expose the Company to litigation and the possibility of damages, sanctions, and fines, or of being disqualified from bidding on contracts, which may have a material adverse effect on Shaw and its reputation, as well as its operations, prospects, and/or financial results.

Taxes

Shaw's business is subject to various tax laws, changes to tax laws and the adoption of new tax laws, regulations thereunder and interpretations thereof, which may have adverse tax consequences to Shaw.

While Shaw believes it has adequately provided for all income and commodity taxes based on information that is currently available, the calculation and the applicability of taxes in many cases require significant judgment in interpreting tax rules and regulations. In addition, Shaw's tax filings are subject to government audits which could result in material changes in the amount of current and deferred income tax assets and liabilities and other liabilities which may, in certain circumstances, result in the assessment of interest and penalties.

Concerns about Alleged Health Risks relating to Radiofrequency Emissions

Concerns about alleged health risks relating to radiofrequency emissions may adversely affect our Wireless division and our Shaw Go WiFi operations. Some studies have alleged that links exist between radiofrequency emissions from certain wireless devices and cell sites and various health problems or possible interference with electronic medical devices, including hearing aids and pacemakers. The Company complies with all applicable laws and regulations. Further, the Company relies on suppliers of wireless network equipment and customer equipment to meet or exceed all applicable regulatory and safety requirements. No definitive evidence exists of harmful effects from exposure to radiofrequency emissions when legal limits are complied with. Additional studies of radiofrequency emissions are ongoing and we cannot be certain of results, which could result in additional or more restrictive regulation or exposure to potential litigation.

Acquisitions, Dispositions and Other Strategic Transactions

Shaw may from time to time make acquisitions to expand its existing businesses or to enter into sectors in which Shaw does not currently operate, dispositions to focus on core offerings or enter into other strategic transactions. Such acquisitions, dispositions and/or strategic transactions may fail to realize the anticipated benefits, result in unexpected costs, result in unexcepted liabilities that were not uncovered through the due diligence process and/or Shaw may have difficulty incorporating or integrating the acquired business, any of which may have a material adverse effect on Shaw, its operations and/or financial results. Under the terms of the Arrangement Agreement, and prior to the completion of the Transaction or the termination of the Arrangement Agreement, the Company is subject to covenants which restrict it from making certain acquisitions, dispositions or other strategic transactions without Rogers' consent. For further detail, refer to the Arrangement Agreement and the management information circular, filed March 15, 2021 and April 23, 2021, respectively, on Shaw's SEDAR profile at www.sedar.com and EDGAR profile at www.sec.gov/edgar.shtml.

Dividend Payments are not Guaranteed

Shaw currently pays monthly common share dividends in amounts approved on a quarterly basis by the Board of Directors. Over the long term, Shaw expects to continue to pay dividends from its free cash flow; however, balance sheet cash and/or credit facilities may be used to fund dividends from time to time. Although Shaw intends to make regular dividend payments, dividends are not guaranteed as actual results may differ from expectations and there can be no assurance that the Company will continue common share dividend payments at the current level. In addition to the standard legislated solvency and liquidity tests that must be met, the Company would not be able to declare and pay dividends if there was an event of default or a pending event of default would result (as a consequence of declaring and paying dividends) under its credit facilities.

Under the terms of the Arrangement Agreement entered into with Rogers, the Company is restricted in its ability to increase the amount of the dividend payments prior to the completion of the Transaction without Rogers' consent.

Holding Company Structure

Substantially all of Shaw's business activities are operated by its subsidiaries. As a holding company, our ability to meet our financial obligations is dependent primarily upon the receipt of interest and principal payments on intercompany advances, management fees, cash dividends and other payments from our subsidiaries together with proceeds raised by the Company through the issuance of equity and the incurrence of debt, and from proceeds received on the sale of assets. The payment of dividends and the making of loans, advances and other payments to Shaw by its subsidiaries may be subject to statutory or contractual restrictions, are contingent upon the earnings of those subsidiaries and are subject to various business and other considerations.

Control of the Company

Voting control of the Company is held by SFLT and its subsidiaries. As at October 29, 2021, SFLT and its subsidiaries held, directly or indirectly, or exercised control or direction over 17,662,400 Class A Shares, representing approximately 79% of the issued and outstanding Class A Shares, for the benefit of the descendants of the late JR Shaw and Carol Shaw. The sole trustee of SFLT is a private company controlled by a board consisting of seven directors, including as at October 29, 2021, Bradley S. Shaw, four other members of his family, and two independent directors.

The Class A Shares are the only shares entitled to vote in all circumstances. Accordingly, SFLT and its subsidiaries are able to elect a majority of the Board of Directors of the Company and to control the vote on matters submitted to a vote of the Company's Class A Shares.

SUMMARY OF QUARTERLY RESULTS

Below is a quarterly summary of the Company's consolidated financial results and selected key performance drivers for fiscal 2021 and 2020.

	2021				2020			
(millions of Canadian dollars except per share amounts)	**Q4**	**Q3**	**Q2**	**Q1**	**Q4**	**Q3**	**Q2**	**Q1**

(1) See "Key Performance Drivers" for more information about these non-GAAP financial measures.
(2) Net income attributable to both equity shareholders and non-controlling interests.

F21 Q4 **vs** F21 Q3	In the fourth quarter of fiscal 2021, net income decreased $102 million compared to the third quarter of fiscal 2021 mainly due to a $36 million increase in interest expense and a $126 million increase in current taxes in the fourth quarter as a result of a revision to liabilities for uncertain tax positions which reduced these expenses by $35 million and $125 million respectively in the third quarter as well as a $28 million decrease in adjusted EBITDA partially offset by an $81 million decrease in deferred taxes resulting mainly from the recognition of a tax benefit associated with previously unrecognized tax losses and a decrease of $15 million in other expenses mainly due to lower Transaction related costs, all in the fourth quarter.
F21 Q3 **vs** F21 Q2	In the third quarter of fiscal 2021, net income increased $137 million compared to the second quarter of fiscal 2021 mainly due to a $131 million decrease in current income taxes expense and a $36 million decrease in interest expense mainly due to a revision to liabilities for uncertain tax positions that became statute barred in the period, which reduced these expenses by $125 million and $35 million respectively, a $9 million decrease in deferred taxes, and a $5 million increase in adjusted EBITDA, partially offset by $18 million in Transaction related advisory, legal, financial, and other professional fees in the third quarter and the impact of the $27 million fair value gain on private investments recorded in the second quarter.
F21 Q2 **vs** F21 Q1	In the second quarter of fiscal 2021, net income increased $54 million compared to the first quarter of fiscal 2021 mainly due to a $30 million increase in adjusted EBITDA, an $11 million decrease in restructuring costs, and a $27 million fair value gain on private investments recorded in the second quarter, partially offset by a $9 million increase in deferred taxes and an $8 million increase in current taxes, all in the second quarter.
F21 Q1 **vs** F20 Q4	In the first quarter of fiscal 2021, net income decreased $12 million compared to the fourth quarter of fiscal 2020 mainly due to a $12 million increase in restructuring costs in the first quarter and a $27 million increase in deferred taxes, partially offset by a $13 million increase in adjusted EBITDA and a $6 million decrease in current taxes, all in the first quarter.
F20 Q4 **vs** F20 Q3	In the fourth quarter of fiscal 2020, net income decreased $9 million compared to the third quarter of fiscal 2020 mainly due to a $15 million decrease in adjusted EBITDA and a $23 million increase in current taxes in the fourth quarter as well an $8 million decrease in other gains as a result of an insurance claim recovery in the third quarter partially offset by a $35 million decrease in deferred taxes and a $14 million decrease in restructuring costs in the fourth quarter.

F20 Q3 **vs** F20 Q2	In the third quarter of fiscal 2020, net income increased $17 million compared to the second quarter of fiscal 2020 mainly due to a $26 million increase in other gains/losses, which includes the impact of the $17 million payment related to the early redemption of $800 million in senior notes in the second quarter, a $6 million insurance claim recovery, a $9 million increase in adjusted EBITDA in the third quarter and a $4 million decrease in current taxes, offset by a $14 million restructuring cost and an $8 million increase in deferred taxes, also in the third quarter.
F20 Q2 **vs** F20 Q1	In the second quarter of fiscal 2020, net income increased $5 million compared to the first quarter of fiscal 2020 mainly due to a $13 million decrease in current taxes, a $12 million increase in adjusted EBITDA and a $3 million decrease in interest expense, all in the second quarter, partially offset by a $17 million payment related to the early redemption of $800 million in senior notes and a $10 million increase in deferred taxes, also in the second quarter.
F20 Q1 **vs** F19 Q4	In the first quarter of fiscal 2020, net income decreased $4 million compared to the fourth quarter of fiscal 2019 mainly due to a $23 million decrease in deferred taxes in the first quarter. This was partially offset by a $7 million increase in current taxes in the first quarter as well as the net impact of the adoption of IFRS 16 which resulted in a decrease to operating, general and administrative costs that was more than offset by increases to amortization of property, plant and equipment, intangibles and other and interest expense.

Fourth Quarter 2021 Highlights

The following discusses the results for the fourth quarter of fiscal 2021 (three-month period ended August 31, 2021) as compared with the results from the fourth quarter of fiscal 2020 (three-month period ended August 31, 2020).

Revenue

Consolidated revenue increased 2.1% year-over-year to $1.38 billion.

- Wireless revenue of $321 million for the fourth quarter of fiscal 2021 increased $27 million, or 9.2%, over the fourth quarter of fiscal 2020. The increase was driven mainly by higher service revenues which contributed an incremental $22 million, or 10.4%, to consolidated revenue primarily due to an increased subscriber base, including significant Shaw Mobile additions, which was complemented by an increase in equipment revenue of $5 million, or 6.0%, over the previous year. Fourth quarter ARPU decreased 5.7% to $37.39 reflecting Shaw Mobile customer growth.
- Consumer division revenue decreased $7 million, or 0.8%, to $910 million as growth in Internet revenue was offset by declines in Video, Satellite, and Phone subscribers and revenue.
- Business division revenue of $149 million increased $9 million, or 6.4%, as a result of Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector.

Adjusted EBITDA

Adjusted EBITDA for the fourth quarter of $614 million increased $20 million, or 3.4%, from $594 million in the comparable prior year quarter.

- Wireless adjusted EBITDA of $106 million for the fourth quarter of fiscal 2021 improved by $22 million, or 26.2%, over the fourth quarter of fiscal 2020 primarily due to continued service revenue growth. Adjusted EBITDA results include a reduction in bad debt expense compared to the prior year quarter as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables.
- Wireline adjusted EBITDA for the fourth quarter of fiscal 2021 of $508 million decreased $2 million, or 0.4%, from $510 million in the fourth quarter of fiscal 2020.

Adjusted EBITDA margin

Adjusted EBITDA margin for the fourth quarter of 44.6% increased 60-basis points compared to 44.0% in the fourth quarter of fiscal 2020.

Capital expenditures and equipment

In the fourth quarter of fiscal 2021, capital investment of $287 million decreased $20 million from the comparable period in fiscal 2020. Total Wireline capital spending of $221 million increased by approximately $29 million year-over-year primarily due to higher investments in the combined upgrades, enhancements and replacement categories as well as an increase in new housing development. Wireless spending of $66 million decreased by approximately $49 million year-over-year primarily due to lower planned investments in the quarter.

Amortization

Amortization of $310 million decreased 0.6% compared to the fourth quarter of 2020. The decrease in amortization is mainly due to a decrease in deferred equipment costs in the quarter partially offset by the amortization of new expenditures of property, plant and equipment and intangibles exceeding the amortization of those assets that became fully amortized during the period.

Interest

Interest expense of $67 million for the fourth quarter decreased $1 million over the comparable prior year quarter mainly due to the lower average outstanding debt balances in the period.

Free cash flow

Free cash flow for the quarter of $180 million compared to $152 million in the comparable prior year quarter. The increase was largely due to higher adjusted EBITDA and lower capital expenditures.

Income taxes

Income taxes were lower in the quarter compared to the fourth quarter of fiscal 2020 due mainly to the recognition of a $78 million tax benefit associated with previously unrecognized tax losses in the fourth quarter of 2021 driven by management’s expectations that sufficient future taxable profit will be available to fully utilize such losses.

Seasonality and Trends

While financial results for the Company are generally not subject to significant seasonal fluctuations, subscriber activity may fluctuate from one quarter to another. Subscriber activity may also be affected by competition and Shaw’s promotional activity. Our Video subscriber activity is influenced by cord shaving and cord cutting trends, which has resulted in fewer subscribers watching traditional cable TV, as well as a lower number of TV subscribers. In addition, trends in the use of wireless products and Internet or social media as substitutes for traditional home phone products have resulted in fewer Phone subscribers. Satellite subscriber activity is modestly higher around the summertime when more subscribers have second homes in use. Wireless subscriber activity is influenced by the launch of popular new mobile devices, seasonal promotional periods, and the level of competitive intensity. Our first and fourth quarters typically experience higher volumes of wireless competitive activity as a result of back to school and holiday season-related consumer behavior. Aggressive promotional offers are often advertised during these periods which can impact our Wireless subscriber metrics. Shaw’s Wireline and Wireless businesses do not depend on any single customer or concentration of customers.

Furthermore, due to uncertainties relating to the severity, duration and continuing impact of the COVID-19 pandemic, it is difficult at this time to estimate the impacts of the COVID-19 pandemic on our business and future financial results. Therefore, the trends experienced during the COVID-19 pandemic, including impacts on consumer demand and spending, may not fully reflect the typical seasonal variations experienced by our business. Accordingly, it is difficult at this time to evaluate the impacts of the COVID-19 pandemic on the seasonality trends that normally characterize our business.

Growth (losses) in subscriber statistics as follows:

Subscriber Statistics	2021 Opening	First	Second	Third	Fourth	Ending
Video – Cable	**1,390,520**	**(34,437)**	**(26,497)**	**(20,917)**	**(25,790)**	**1,282,879**

(1) Fiscal 2021 and 2020 figures reflect the impact of the adoption and application of IFRS 16 while fiscal 2019 figures do not and are not comparable.

(2) See "Key Performance Drivers" for more information about these non-GAAP financial measures and non-GAAP ratio.

(3) Funds flow from operations is presented before changes in non-cash working capital as presented in the Consolidated Statements of Cash Flows.

Revenue and Adjusted EBITDA

Consolidated revenue increased 1.9% year-over-year to $5.51 billion and adjusted EBITDA increased 4.6% year-over-year to $2.50 billion. Fiscal 2021 results include incremental Wireline Consumer revenue of approximately $20 million related to the release of a provision following the CRTC decision on final aggregated TPIA rates and higher equity-based compensation costs of approximately $24 million due to the significant increase in Shaw's share price in connection with the Transaction announcement on March 15, 2021. In addition, fiscal 2021 adjusted EBITDA results include a reduction in bad debt expense compared to the prior periods of approximately $28 million for the year as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables. For further discussion of divisional performance see "Segmented Operations Review."

Consolidated revenue of $5.51 billion for fiscal 2021 improved 1.9% over $5.41 billion for fiscal 2020. Revenue improved primarily due to the Wireless division contributing revenues of $1,272 million in fiscal 2021 as compared to $1,166 million in the prior year. The year-over-year improvement in Wireless revenue of $106 million, or 9.1%, reflects higher service revenues of $76 million due to an increased subscriber base, including significant Shaw Mobile additions, along with an increase in equipment revenues of $30 million. Wireline division revenues of $4,249 million in fiscal 2021 were essentially flat compared to $4,250 million in the prior year. Business division revenues increased $17 million, or 3.0%, mainly due to Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector. These increases were fully offset by the Consumer division as revenues decreased $18 million, or 0.5%, compared to fiscal 2020 as the incremental $20 million in revenue related to the third quarter release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 and growth in Internet revenue were fully offset by declines in Video, Satellite, and Phone subscribers and revenue.

Adjusted EBITDA of $2,500 million for the twelve-month period improved 4.6% compared to $2,391 million for fiscal 2020. The improvement was primarily due to the Wireless division contributing $393 million over the twelve-month period as compared to $337 million in fiscal 2020 while the Wireline division contributed $2,107 million over the twelve-month period as compared to $2,054 million in fiscal 2020. The Wireless increase of $56 million, or 16.6%, over the comparable period primarily reflects an increase in service revenues, improved equipment margins, and a $15 million decrease in bad debt expense, partially offset by additional costs in connection with the expansion of the Shaw retail footprint in the current year. Wireline adjusted EBITDA of $2,107 million for fiscal 2021 increased 2.6%, resulting in a Wireline operating margin of 49.6%, an improvement of 130-basis points over fiscal 2020. The increase primarily reflects the impact of decreased operating costs, including a $13 million decrease in bad debt expense, partially offset by a decrease in Consumer revenue and an increase in equity-based compensation costs as noted above.

Restructuring costs

Restructuring costs generally include severance, employee related costs and other costs directly associated with a restructuring program. During the first, second and third quarters of fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded costs of $12 million in the first quarter of fiscal 2021, $1 million in the second quarter, and $1 million in the third quarter of fiscal 2021 primarily related to severance and employee related costs.

Amortization

(millions of Canadian dollars)	2021	2020	Change %
Amortization revenue (expense)			
Deferred equipment revenue	**11**	16	(31.3)
Deferred equipment costs	**(47)**	(65)	(27.7)
Property, plant and equipment, intangibles and other	**(1,183)**	(1,168)	1.3

Amortization of deferred equipment revenue and deferred equipment costs decreased 31.3% and 27.7% respectively for the year ended August 31, 2021 as a result of declining satellite equipment purchases and installations during the year compared with prior years. Amortization of property, plant and equipment, intangibles and other increased 1.3% for the year ended August 31, 2021 and reflects the amortization of new expenditures exceeding the amortization of assets that became fully amortized during the period.

Amortization of financing costs and Interest expense

(millions of Canadian dollars)	2021	2020	Change %
Amortization of financing costs – long-term debt	**2**	3	(33.3)
Interest expense	**231**	274	(15.7)

Interest expense for the year ended August 31, 2021 decreased over the comparable periods and primarily reflects the impact of a $35 million reduction of tax related interest expense resulting from a revision of liabilities for uncertain tax positions that became statute barred in the year as well as lower average outstanding debt balances in the period and the decrease in the weighted average interest rate.

Other income and expenses

(millions of Canadian dollars)	2021	2020	Increase / (decrease)
Gain on disposal of fixed assets and intangibles	**3**	(3)	6
Costs associated with Rogers Transaction	**(23)**	–	(23)
Debt Redemption Penalty	**–**	(17)	17
Gain on fair value adjustment of private investment	**27**	–	27
Other	**(9)**	4	(13)
	(2)	(16)	14

Other generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities as well as the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership. In the second quarter of fiscal 2021, the Company recorded a $27 million fair value gain on private investments while in the third and fourth quarters of fiscal 2021, the Company recorded $18 million and $5 million, respectively, in Transaction-related advisory, legal, financial, and other professional costs.

Income taxes

(millions of Canadian dollars)	2021	2020	Increase / (decrease)
Current income tax expense	**30**	120	(90)
Deferred income tax expense	**16**	59	(43)
	46	179	(133)

Income taxes are lower in fiscal 2021 compared to fiscal 2020 mainly due to a $125 million revision to liabilities for uncertain tax positions that became statute barred in 2021 as well as the recognition of a $78 million tax benefit associated with previously unrecognized tax losses in the fourth quarter of 2021 driven by management's expectations that sufficient future taxable profit will be available to fully utilize such losses, offset by the effect of higher pre-tax income.

Earnings per share

(millions of Canadian dollars except per share amounts)	2021	2020	Change %
Net income	**986**	688	43.3
Weighted average number of participating shares outstanding during period (millions)	**504**	515	
Earnings per share			
Basic and diluted	**1.94**	1.32	

Net income

Net income was $986 million in 2021 compared to $688 million in 2020. The year-over-year changes are summarized in the table below.

(millions of Canadian dollars)	
Increased adjusted EBITDA [(1)]	**109**
Increased amortization	**(1)**
Decreased interest expense	**43**
Change in other net costs and revenue [(2)]	**14**
Decreased income taxes	**133**
	298

(1) See "Key Performance Drivers" for more information about this non-GAAP financial measure.

(2) Net other costs and revenue include gains and losses on disposals of fixed assets and intangibles, accretion of long-term liabilities and provisions, debt retirement costs, transaction related costs, gains and losses on private investments, realized and unrealized foreign exchange differences and other losses as detailed in the Consolidated Statements of Income.

Net other costs and revenues had a $14 million favourable impact on net income primarily due to the impact of a $27 million fair value gain on private investments recorded in the current year and a $17 million debt redemption penalty in fiscal 2020, partially offset by $23 million in Transaction-related advisory, legal, financial, and other professional costs and higher foreign exchange losses in fiscal 2021.

SEGMENTED OPERATIONS REVIEW

WIRELINE

Adjusted EBITDA margin(1)	**49.6%**	48.3%	2.7

(1) See "Key Performance Drivers" for more information about this non-GAAP financial measure and non-GAAP ratio.

Wireline RGUs decreased by 248,785 in the current fiscal year, compared to net losses of 234,492 RGUs in fiscal 2020. Total Business RGU gains of 10,151 were more than fully offset by total Consumer RGU losses of 258,936 in the year which included net losses in cable Video of 107,641, Phone of 77,030, satellite Video of 60,149, and Internet of 14,116.

Wireline division revenues of $4,249 million in fiscal 2021 were essentially flat compared to $4,250 million in the prior year. Business division revenues increased $17 million, or 3.0%, mainly due to Internet revenue growth and continued demand for the Smart suite of products, despite the challenging circumstances due to impacts of COVID-19 and considering the majority of Shaw Business revenue comes from the small to medium sized business sector. These increases were fully offset by the Consumer division as revenues decreased $18 million, or 0.5%, compared to fiscal 2020 as the incremental $20 million in revenue related to the third quarter release of a provision following the CRTC decision on the final aggregated TPIA rates that date back to August 2019 and growth in Internet revenue were fully offset by declines in Video, Satellite, and Phone subscribers and revenue.

Adjusted EBITDA of $2,107 million increased 2.6% over the comparable period mainly due to decreased operating costs, partially offset by a decrease in Consumer revenue and higher equity-based compensation costs of approximately $24 million due to the significant increase in Shaw's share price in the year in connection with the Transaction announcement on March 15, 2021. The decrease in operating costs includes a $13 million decrease in bad debt expense as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables.

WIRELESS

(millions of Canadian dollars)	2021	2020	Change %
Service	**891**	815	9.3
Equipment and other	**381**	351	8.5
Wireless revenue	**1,272**	1,166	9.1
Adjusted EBITDA(1)	**393**	337	16.6
Adjusted EBITDA margin(1)	**30.9%**	28.9%	6.9

(1) See "Key Performance Drivers" for more information about this non-GAAP financial measure and non-GAAP ratio.

In Wireless, the Company gained 294,857 net subscribers in the year, consisting of 257,114 postpaid and 37,743 prepaid additions, bringing its total customer base to over 2.1 million.

Wireless revenue for the year of $1,272 million increased $106 million, or 9.1%, over the prior year. The increase in revenue reflects higher service revenues of $76 million due to an increased subscriber base, including significant Shaw Mobile additions, along with an increase in equipment revenues of $30 million. The increase in service revenue was driven by RGU growth of 17.3%, while ARPU of $37.35 in fiscal 2021 decreased from $38.95 in the prior year, reflecting Shaw Mobile customer growth.

Adjusted EBITDA for the year of $393 million increased $56 million, or 16.6%, over the prior year primarily due to an increase in service revenues, improved equipment margins, and a $15 million decrease in bad debt expense as COVID-19 did not have a significant impact on our customers' ability to pay their bills as expected, combined with an increased focus on collecting aged receivables. This is partially offset by additional costs in connection with the expansion of the Shaw Mobile retail footprint in the current year.

Capital Expenditures and Equipment Costs

	Year ended August 31,		
(millions of Canadian dollars)	2021	2020	Change %

Upgrades and enhancements	**351**	331	6.0
Replacement	**34**	26	30.8
Buildings and other	**59**	95	(37.9)
Total as per Note 26 to the audited annual consolidated financial statements	**723**	815	(11.3)
Wireless			
Total as per Note 26 to the audited annual consolidated financial statements	**280**	296	(5.4)
Consolidated total as per Note 26 to the audited annual consolidated financial statements	**1,003**	1,111	(9.7)

Capital investment was $1,003 million in fiscal 2021 compared to $1,111 million in fiscal 2020. The decrease was driven primarily by a decrease in the Wireline division mainly due to lower success-based costs while the Wireless division decreased as a result of lower planned capital expenditures in the year.

Wireline

Success-based capital for fiscal 2021 of $170 million was $73 million lower than fiscal 2020. The current year decrease in success-based capital was due primarily to lower equipment purchases in the year.

Capital spend on the combined upgrades and enhancement, and replacement categories was $385 million for the year, a $28 million increase over fiscal 2020 driven primarily by higher planned Wireline spend on network infrastructure.

Capital spend on new housing development of $109 million in the year was $11 million lower than the prior fiscal year, driven by a decrease in residential and commercial customer network growth and acquisition.

Investment in buildings and other of $59 million in fiscal 2021 decreased $36 million over fiscal 2020 primarily related to higher corporate related costs in the comparable period as well as the impact of proceeds received from the disposal of corporate assets in the current period.

Wireless

Capital investment of $280 million in fiscal 2021 decreased $16 million compared to fiscal 2020, primarily due to lower network and IT related investment partially offset by increased spending related to retail and office space in the current year. In fiscal 2021, the Company continued to focus on investment in the wireless network and infrastructure, specifically the continued deployment of 700 MHz spectrum, 600 MHz spectrum, LTE and small cells as well as enhancements to the back-office systems, retail locations and other corporate initiatives.

FINANCIAL POSITION

Total assets were $15.8 billion at August 31, 2021, compared to $16.2 billion at August 31, 2020. The following is a discussion of significant changes in the Consolidated Statements of Financial Position since August 31, 2020.

Current assets decreased $266 million primarily due to a decrease in cash of $408 million and a decrease in the current portion of contract assets of $35 million, partially offset by increased accounts receivable of $33 million, inventories of $3 million, other current assets of $54 million, and income taxes recoverable of $87 million. Cash decreased primarily due to the payment of $605 million in dividends, $300 million for preferred share redemptions, $336 million for share repurchases, as described below, and cash outlays for investing activities, partially offset by funds flow from operations. Refer to "Liquidity and Capital Resources" for more information.

Accounts receivable increased $33 million mainly due to timing, as the Company continues to migrate customers from two-month advance billing to one-month advance billing.

The current portion of contract assets decreased $35 million over the period due to a $19 million decrease in deferred Wireline costs as a result of lower onboarding promotional activity for new subscribers over the past year and a $16 million decrease due to a decrease in Wireless subscribers participating in the Company's discretionary wireless handset discount program over the past year. Under IFRS 15, up-front promotional offers, such as onboarding or switch credits, offered to new two-year value-plan customers are recorded as a contract asset and amortized over the life of the contract against future service revenues while the portion of the Wireless discount relating to the handset is applied against equipment revenue at the point in time that the handset is transferred to the customer while the portion relating to service revenue is recorded as a contract asset and amortized over the life of the contract against future service revenues.

Property, plant and equipment decreased $123 million as the amortization of capital and right-of-use assets exceeded the capital investments and additions to right-of-use assets in the year.

Current liabilities decreased $128 million during the period primarily due to an $11 million decrease in accounts payable, a decrease in income taxes payable of $57 million, and a decrease of $55 million in current provisions.

Accounts payable and accrued liabilities decreased due to the timing of payments and fluctuations in various payables including capital expenditures and tax remittances. The decrease in current provisions was mainly due to a $35 million reduction to the interest expense provision, a $20 million provision release related to the CRTC decision on final aggregated TPIA rates and the payment of outstanding restructuring costs in the period.

Lease liabilities decreased $25 million mainly due to principal repayments of $110 million, partially offset by $85 million in net new lease liabilities in the period.

Shareholders' equity decreased $190 million mainly due to the $300 million redemption of the Preferred Shares on June 30, 2021. Retained earnings increased as the current period income of $986 million was greater than the dividends of $599 million and the impact of shares repurchased under the NCIB program of $207 million. Share capital decreased $403 million due to the impact of 14,783,974 Class B Shares repurchased under the terms of the Company's NCIB program and the redemption of the preferred shares as noted above, which were partially offset by the issuance of 688,403 Class B Shares under the Company's stock option and RSU plans. Accumulated other comprehensive loss decreased $40 million due to the remeasurements recorded on employee benefit plans in the period.

As at October 15, 2021, share capital is as reported at August 31, 2021 with the exception of the issuance of a total 52,393 Class B Shares upon exercise of options under the Company's stock option plan.

CONSOLIDATED CASH FLOW ANALYSIS

Operating activities

(millions of Canadian dollars)	2021	2020	Change %
Funds flow from operations	**2,249**	1,989	13.1
Net change in non-cash working capital balances related to operations	**(326)**	(69)	>100.0
	1,923	1,920	0.2

Funds flow from operations in fiscal 2021 decreased over the comparable period primarily due to a large decrease in the net change in non-cash balances related to operations partially offset by an increase in the funds flow from operations. The net change in non-cash balances related to operations fluctuated over the comparative period due to changes in accounts receivable, inventory and other current asset balances, and the timing of payments of current income taxes payable and accounts payable and accrued liabilities.

Investing activities

(millions of Canadian dollars)	2021	2020	Decrease
Cash flow used in investing activities	**(997)**	(1,154)	157

In fiscal 2021, cash used in investing activities decreased over the comparable period primarily due to a decrease in additions to property, plant and equipment of $112 million, a decrease in additional to intangibles of $12 million and a decrease to additions to investment and other assets of $4 million, partially offset by an increase in proceeds on disposal of property, plant and equipment of $19 million received in the current period.

Financing activities

The changes in financing activities during 2021 and 2020 were as follows:

(millions of Canadian dollars)	2021	2020
Increase in short-term borrowings	**–**	160
Issuance of long-term debt	**–**	1,300
Repayment of long-term debt	**(1)**	(2,068)

Payment of lease liabilities	**(110)**	(112)
Issuance of Class B Shares	**18**	9
Purchase of Class B Shares	**(336)**	(140)
Dividends paid on Class A Shares and Class B Shares	**(597)**	(573)
Dividends paid on Preferred Shares	**(8)**	(9)
Payment of distributions to non-controlling interests	**–**	(2)
Redemption of Preferred Shares	**(300)**	–
	(1,334)	(1,449)

LIQUIDITY AND CAPITAL RESOURCES

In fiscal 2021, the Company generated $961 million of free cash flow. Shaw used its free cash flow along with cash of $408 million and proceeds from the issuance of Class B Shares of $18 million to pay common share dividends of $597 million, repurchase $336 million in Class B Shares under the Company's NCIB program, redeem $300 million in preferred shares, pay $25 million in restructuring costs and $23 million in Transaction related costs, and fund the net working capital change.

Debt structure and financial policy

Shaw structures its borrowings generally on an unsecured and standalone basis. While certain non-wholly owned subsidiaries are subject to contractual restrictions which may prevent the transfer of funds to Shaw, there are no similar restrictions with respect to wholly-owned subsidiaries of the Company.

The Company has an accounts receivable securitization program with a Canadian financial institution which allows it to sell certain trade receivables into the program. As at August 31, 2021, the proceeds of the sales were committed up to a maximum of $200 million (with $200 million drawn under the program as at August 31, 2021). The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables remain recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivables has no claim on any of our other assets.

As at August 31, 2021, the net debt leverage ratio for the Company was 2.3x. The terms of the Arrangement Agreement require Shaw to obtain Rogers' consent prior to incurring certain types of indebtedness.

The Company calculates net debt leverage ratio as follows[(1)]:

(millions of Canadian dollars)	**2021**	**2020**
Short-term borrowings	**200**	200
Current portion of long-term debt	**1**	1
Current Portion of Lease Liabilities	**110**	113
Long-term debt	**4,549**	4,547
Lease Liabilities	**1,135**	1,157
50% of outstanding preferred shares	**–**	147
Cash	**(355)**	(763)
(A) Net debt [(2)]	**5,640**	5,402
(B) Adjusted EBITDA [(2)]	**2,500**	2,391
(A/B) Net debt leverage ratio [(3)]	**2.3x**	2.3x

(1) The following contains a breakdown of the components in the calculation of net debt leverage ratio, which is a non-GAAP ratio.
(2) See "Key Performance Drivers" for more information about these non-GAAP financial measures.
(3) Net debt leverage ratio is a non-GAAP ratio and should not be considered as a substitute or alternative for a GAAP measure and may not be a reliable way to compare us to other companies. See "Key Performance Drivers" for further information about this ratio.

On November 2, 2020, the Company announced that it had received approval from the TSX to establish an NCIB program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

During the year ended August 31, 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 million under the NCIB program. In connection with the announcement of the Transaction on March 15, 2021, the Company suspended share buybacks under its NCIB program.

Shaw's credit facilities are subject to customary covenants which include maintaining minimum or maximum financial ratios.

	Covenant as at August 31, 2021	Covenant Limit
Shaw Credit Facilities		
Total Debt to Operating Cash Flow[(1)] Ratio	1.92:1	< 5.00:1
Operating Cash Flow[(1)] to Fixed Charges[(2)] Ratio	10.23:1	> 2.00:1

(1) Operating Cash Flow, for the purposes of the covenants, is calculated as net earnings before interest expense, depreciation, amortization, restructuring, and current and deferred income taxes, excluding profit or loss from investments accounted for on an equity basis, less payments made with regards to lease liabilities for the most recently completed fiscal quarter multiplied by four, plus cash dividends and other cash distributions received in the most recently completed four fiscal quarters from investments accounted for on an equity basis.

(2) Fixed Charges are defined as the aggregate interest expense, excluding the interest related to lease liabilities, for the most recently completed fiscal quarter multiplied by four.

As at August 31, 2021, Shaw is in compliance with these covenants and based on current business plans, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants over the life of the borrowings which currently mature in December of 2024.

On June 30, 2021, the Company redeemed all of its issued and outstanding Preferred Shares in accordance with their terms (as set out in the Company's articles) at a price equal to $25.00 per Preferred Share, less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300 million.

As at August 31, 2021, the Company had $355 million of cash on hand and its $1.5 billion bank credit facility was fully undrawn.

Preferred Share Dividends

On June 30, 2016, 1,987,607 of the Company's Series A Shares were converted into an equal number of Series B Shares in accordance with the notice of conversion right issued on May 31, 2016. As a result of the conversion, the Company had 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding on June 30, 2016. The Company redeemed all of its issued and outstanding Series A Shares and Series B Shares on June 30, 2021.

Prior to the redemption of the Preferred Shares, the annual fixed dividend rate for the Series A Shares, payable quarterly, was reset to 2.791% for the five-year period from and including June 30, 2016 to but excluding June 30, 2021. The floating quarterly dividend rates for the Series B Shares were set as follows:

Period	Annual Dividend Rate
June 30, 2016 to September 29, 2016	2.539%
September 30, 2016 to December 30, 2016	2.512%
December 31, 2016 to March 30, 2017	2.509%
March 31, 2017 to June 29, 2017	2.480%
June 30, 2017 to September 29, 2017	2.529%
September 30, 2017 to December 30, 2017	2.742%
December 31, 2017 to March 30, 2018	2.872%
March 31, 2018 to June 29, 2018	3.171%
June 30, 2018 to September 29, 2018	3.300%
September 30, 2018 to December 30, 2018	3.509%
December 31, 2018 to March 30, 2019	3.713%
March 31, 2019 to June 29, 2019	3.682%
June 30, 2019 to September 29, 2019	3.687%
September 30, 2019 to December 30, 2019	3.638%
December 31, 2019 to March 30, 2020	3.652%
March 31, 2020 to June 29, 2020	3.638%
June 30, 2020 to September 29, 2020	2.255%
September 30, 2020 to December 30, 2020	2.149%
December 31, 2020 to March 30, 2021	2.109%
March 31, 2021 to June 29, 2021	2.073%

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These were the final dividends on the Preferred Shares, which were paid separately from the aggregate Redemption Price and in the usual manner. Following payment of the June 30, 2021 dividends, there were no accrued and unpaid dividends on the Preferred Shares.

Based on the aforementioned financing activities, available credit facilities and forecasted free cash flow, the Company expects to have sufficient liquidity to fund operations, obligations and working capital requirements, including maturing debt, during the upcoming year. The terms of the Arrangement Agreement require that the Company maintain sufficient liquidity to pay an $800 million termination fee payable by Shaw in certain circumstances.

Off-balance sheet arrangement and guarantees

Guarantees

Generally, it is not the Company's policy to issue guarantees to non-controlled affiliates or third parties; however, it has entered into certain agreements as more fully described in Note 27 to the Consolidated Financial Statements. As disclosed therein, Shaw believes it is remote that these agreements would require any cash payment.

Contractual obligations

The amounts of estimated future payments under the Company's contractual obligations at August 31, 2021 are detailed in the following table.

	Payments due by period				
(millions of Canadian dollars)	**Total**	**Within 1 year**	**2 – 3 years**	**4 – 5 years**	**More than 5 years**
Short-term borrowings	200	200	—	—	—
Long-term debt[(1)]	7,330	219	1,409	395	5,307
Lease liabilities	1,596	151	291	260	894
Purchase obligations[(2)]	1,002	420	297	174	111
Property, plant and equipment	166	157	9	—	—
	10,294	1,147	2,006	829	6,312

(1) Includes principal repayments and interest payments.
(2) Includes contractual obligations under service, product, and wireless device contracts, program related agreements and exclusive rights to use intellectual property in Canada.

Share Capital and Listings

The Company is authorized to issue a limited number of Class A Shares; an unlimited number of Class B Shares; an unlimited number of Class 1 Preferred Shares issuable in series and an unlimited number of Class 2 Preferred Shares issuable in series, of which 12,000,000 were designated the Series A Shares and 12,000,000 were designated the Series B Shares. The authorized number of Class A Shares is limited, subject to certain exceptions, to the lesser of that number of such shares (i) currently issued and outstanding; and (ii) that may be outstanding after any conversion of Class A Shares into Class B Shares.

As at October 15, 2021, there are 22,372,064 Class A Shares and 476,589,655 Class B Shares issued and outstanding. There were also 7,440,247 options to purchase Class B Shares and 36,428 RSUs that will settle in Class B Shares issued from treasury outstanding. Shaw is traded on the Toronto and New York stock exchanges and is included in the S&P/TSX 60 Index (Symbol: TSX – SJR.B, NYSE – SJR and TSXV – SJR.A). For more information, please visit www.shaw.ca.

The following table sets forth, for each month during the fiscal year ending August 31, 2021, the monthly price range and volume traded for the Class A Shares on the TSX Venture Exchange (TSXV) and for the Class B Shares, Series A Shares and Series B Shares on the TSX.

	Class A Shares(1) TSX Venture-SJR.A			Class B Shares(1) TSX-SJR.B			Series A Shares(1)(2) TSX-SJR.PR.A			Series B Shares(1)(2) TSX-SJR.PR.B

(1) Trading price and volume data is obtained from the TMX group.
(2) All issued and outstanding Series A Shares and Series B Shares were redeemed on June 30, 2021.

Share Splits

There have been four splits of the Company's Class A and Class B Shares: July 30, 2007 (2 for 1); February 7, 2000 (2 for 1); May 18, 1994 (2 for 1); and September 23, 1987 (3 for 1). In addition, as a result of the Arrangement referred to in the Management Information Circular dated July 22, 1999, a Shareholder's Adjusted Cost Base was reduced for tax purposes.

ADDITIONAL INFORMATION

Additional information relating to Shaw, including the Company's 2021 Annual Information Form, can be found on SEDAR at www.sedar.com.

COMPLIANCE WITH NYSE CORPORATE GOVERNANCE LISTING STANDARDS

Disclosure of the Company's corporate governance practices which differ from the New York Stock Exchange (NYSE) corporate governance listing standards are posted on Shaw's website, www.shaw.ca (under Investor Relations, Corporate Governance, Compliance with NYSE Corporate Governance Listing Standards).

CERTIFICATION

The Company's Executive Chair & Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer have filed certifications regarding Shaw's disclosure controls and procedures and internal control over financial reporting (ICFR).

As at August 31, 2021, the Company's management, together with its Executive Chair & Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer, has evaluated the effectiveness of the design and operation of each of the Company's disclosure controls and procedures and ICFR. Based on these evaluations, the Chief Executive Officer and Executive Vice President, Chief Financial & Corporate Development Officer have concluded that the Company's disclosure controls and procedures and the Company's ICFR are effective.

Other than the items described below, there have been no changes in the Company's ICFR during the fiscal year that have materially affected, or are reasonably likely to materially affect, Shaw's ICFR.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING AND REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

October 29, 2021

Management's Responsibility for Financial Reporting

The accompanying consolidated financial statements of Shaw Communications Inc. (the "Company") and all the information in this annual report are the responsibility of management and have been approved by the Board of Directors.

The financial statements have been prepared by management in accordance with International Financial Reporting Standards (IFRS). When alternative accounting methods exist, management has chosen those it deems most appropriate in the circumstances. Financial statements are not precise since they include certain amounts based on estimates and judgments. Management has determined such amounts on a reasonable basis in order to ensure that the financial statements are presented fairly, in all material respects. Management has prepared the financial information presented elsewhere in the annual report and has ensured that it is consistent with the financial statements.

Management has a system of internal controls designed to provide reasonable assurance that the financial statements are accurate and complete in all material respects. The internal control system includes an internal audit function and an established business conduct policy that applies to all employees. Management believes that the systems provide reasonable assurance that transactions are properly authorized and recorded, financial information is relevant, reliable and accurate and that the Company's assets are appropriately accounted for and adequately safeguarded.

The Board of Directors is responsible for ensuring management fulfils its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board carries out this responsibility through its Audit Committee.

The Audit Committee is appointed by the Board and its directors are unrelated and independent. The Committee meets periodically with management, as well as the external auditors, to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues; to satisfy itself that each party is properly discharging its responsibilities; and, to review the annual report, the financial statements and the external auditors' report. The Audit Committee reports its findings to the Board for consideration when approving the financial statements for issuance to the shareholders. The Committee also considers, for review by the Board and approval by the shareholders, the engagement or re-appointment of the external auditors.

The financial statements have been audited by Ernst & Young LLP, the external auditors, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB")" on behalf of the shareholders. Ernst & Young LLP has full and free access to the Audit Committee.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Also, projections of any of the effectiveness of internal control are subject to the risk that the controls may become inadequate because of changes in conditions or that the degree of compliance with the policies and procedures may deteriorate. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to the financial statement preparation and presentation.

Management conducted an evaluation of the effectiveness of the system of internal control over financial reporting based on the framework in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded that the Company's system of internal control over financial reporting was effective as at August 31, 2021.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Shaw Communications Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated statements of financial position of Shaw Communications Inc. (the "Company") as of August 31, 2021 and 2020, the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at August 31, 2021 and 2020, and its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standards Board.

Report on Internal Control over Financial Reporting

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of August 31, 2021, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission framework (2013) and our report dated October 29, 2021 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the account or disclosure to which it relates.

Key Audit Matter	**Valuation of the Wireless cash generating unit's indefinite-life intangibles**
Description of the Matter	As more fully described in Note 9 to the consolidated financial statements, the Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2021 and the recoverable amount of the cash generating units exceeds their carrying value. Management performed an assessment of indicators of impairment as at August 31, 2021. Auditing management's impairment test is complex and judgmental due to the estimation required in determining the recoverable amount of the cash generating units. The recoverable amount was estimated using a discounted cash flow and is sensitive to assumptions such as revenue growth rate, earnings growth rate, earnings before interest, tax and amortization margin, terminal operating discount rate, terminal growth rate and terminal operating income before restructuring costs and amortization multiple.
How We Addressed the Matter in Our Audit	We obtained an understanding of management's process for performing their impairment assessment. We evaluated the design and tested the operating effectiveness of controls over the Company's processes to determine the recoverable amount. For example, we tested controls over the Company's strategic planning process as well as controls over the review of the significant assumptions in estimating the recoverable amount of the cash generating units. To test the estimated recoverable amount of the goodwill and indefinite-life intangible assets, our audit procedures included, among others, assessing the methodology used and testing the significant assumptions discussed above and the underlying data used by the Company in its analysis. We also involved an EY valuation specialist to assist us. We compared the significant assumptions used by management to historical and current trends. We audited the forecasted revenue by evaluating future subscriber growth, expected customer churn, and average rate per subscriber unit. We assessed the historical accuracy of management's estimates and performed sensitivity analyses on significant assumptions to evaluate changes in the recoverable amount of the cash generating units that would result from changes in the assumptions. We obtained management's assessment of indicators of impairment as at August 31, 2021 and evaluated management's assessment through review of actual results and the updated revenue forecast. We assessed the adequacy of the Company's disclosure in the consolidated financial statements.

Ernst & Young LLP

Chartered Professional Accountants

We have served as the Company's auditor since 1966.

Calgary, Canada
October 29, 2021

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Shaw Communications Inc.:

Opinion on Internal Control over Financial Reporting

We have audited Shaw Communications Inc.'s internal control over financial reporting as of August 31, 2021, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). In our opinion, Shaw Communications Inc. (the "Company") maintained, in all material respects, effective internal control over financial reporting as of August 31, 2021, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated statements of financial position as at August 31, 2021 and 2020, the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the years then ended, and the related notes and our report dated October 29, 2021 expressed an unqualified opinion thereon.

Basis of Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Controls over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(all amounts in millions of Canadian dollars except share and per share amounts)

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless").

The Company was incorporated under the laws of the Province of Alberta on December 9, 1966 under the name Capital Cable Television Co. Ltd. and was subsequently continued under the Business Corporations Act (Alberta) on March 1, 1984 under the name Shaw Cablesystems Ltd. Its name was changed to Shaw Communications Inc. on May 12, 1993. The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX – SJR.B, NYSE – SJR, and TSXV – SJR.A). The registered office of the Company is located at Suite 900, 630 – 3rd Avenue S.W., Calgary, Alberta, Canada T2P 4L4.

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators, including the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The consolidated financial statements of the Company for the years ended August 31, 2021 and 2020, were approved by the Board of Directors on October 28, 2021 and authorized for issue.

Basis of presentation

These consolidated financial statements have been prepared primarily under the historical cost convention and are expressed in millions of Canadian dollars unless otherwise indicated. Other measurement bases used are outlined below and in the applicable notes. The consolidated statements of income are presented using the nature classification for expenses.

Certain comparative figures have been reclassified to conform to the current year's presentation.

Basis of consolidation

(i) Subsidiaries

The consolidated financial statements include the accounts of the Company and those of its subsidiaries, which are entities over which the Company has control. Control exists when the Company has power over an investee, is exposed to or has rights to variable returns from its involvement and has the ability to affect those returns. Intercompany transactions and balances are eliminated on consolidation. The results of operations of subsidiaries acquired during the period are included from their respective dates of acquisition, being the time at which the Company obtains control. Consolidation of a subsidiary ceases when the Company loses control. A change in ownership interests of a subsidiary, without a loss of control, is accounted for as an equity transaction. The Company assesses control through share ownership and voting rights.

Non-controlling interests arise from business combinations in which the Company acquires less than 100% ownership interest. At the time of acquisition, non-controlling interests are measured at either fair value or their proportionate share of the fair value of the acquiree's identifiable assets. The Company determines the measurement basis on a transaction by transaction basis. Subsequent to acquisition, the carrying amount of non-controlling interests is increased or decreased for their share of changes in equity.

(ii) Joint operations

A joint operation is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. The consolidated financial statements include the Company's proportionate share of the assets, liabilities, revenues, and expenses of its interests in joint operations.

The Company's joint operations consist of a 33.33% interest in the Burrard Landing Lot 2 Holdings Partnership (the "Partnership"). The Partnership owns and leases commercial space in Shaw Tower in Vancouver, BC, which is the Company's headquarters for its lower mainland operations. In classifying its 33.33% interest in the Partnership as a joint operation, the Company considered the terms and conditions of the partnership agreement and other facts and circumstances including the primary purpose of Shaw Tower which is to provide lease space to the partners.

Revenue and expenses

The Company has multiple deliverable arrangements comprised of upfront fees (subscriber connection and installation fee revenue, customer premise equipment revenue, handset equipment revenue) and related subscription and service revenue. Upfront fees charged to customers do not constitute separate units of accounting, therefore these revenue streams are assessed as an integrated package.

(i) Revenue

The Company records revenue from contracts with customers in accordance with the following five steps:

(1) identify the contract(s) with a customer;

(2) identify the performance obligations in the contract;

(3) determine the transaction price;

(4) allocate the transaction price to the performance obligations in the contract; and,

(5) recognize revenue when (or as) we satisfy a performance obligation.

Revenue for each performance obligation is recognized either over time or at a point in time. For performance obligations satisfied over time, revenue is recognized as the services are provided. Revenues on certain long-term contracts are recognized using output methods based on products delivered, performance completed to date and time elapsed. Revenue from Cable, Internet, Phone, Direct-to-Home (DTH) and Wireless customers includes subscriber revenue earned as services are provided. Satellite distribution services and telecommunications service revenue is recognized in the period in which the services are rendered to customers. In addition to monthly service plans, the Company also offers multi-year service plans in which the total amount of the contractual service revenue is accounted for on a straight-line basis over the term of the plan. Fees for wireless voice, text and data services on a pay-per-use basis are recognized in the period that the service is provided.

Revenue from data centre customers includes colocation and other services revenue, including managed infrastructure revenue. Colocation revenue is recognized on a straight-line line basis over the term of the customer contract. Other services revenue, including managed infrastructure revenue, is recognized as the services are provided.

Revenue for performance obligations satisfied at a point in time is recognized when control of the item or service transfers to the customer. Revenue from the direct sale of equipment to wireless subscribers or dealers is recognized when the equipment is delivered and accepted by the subscribers or dealers.

For bundled arrangements (e.g. wireless handsets, voice and data services, internet services), items are accounted for as separate performance obligations if the item meets the definition of a distinct good or service. Stand-alone selling prices are determined using observable prices adjusted for market conditions and other factors, as appropriate. The Company offers a discretionary wireless handset discount program, whereby the subscriber earns the applicable discount by maintaining services with the Company, such that the receivable relating to the discount at inception of the transaction is reduced over a period of time. This discount is allocated proportionately between the equipment and service revenues, with the equipment discount recognized when the handset is delivered and the corresponding service discount is classified as a contract asset. The contract asset is reduced on a straight-line basis over the period which the discount is forgiven to a maximum of two years with an offsetting reduction to service revenue. The Company also offers a plan allowing customers to receive a larger up-front handset discount than they would otherwise qualify for if they pay a predetermined incremental charge to their existing service plan on a monthly basis. The charge is billed on a monthly basis but is recognized as revenue when the handset is delivered and accepted by the subscriber. The amount receivable is classified as part of other current or other long-term assets, as applicable, in the consolidated statements of financial position. When wireless equipment and services are bundled with wireline services, revenue is allocated across the Company's segments based on the relative stand-alone selling prices of the goods and services delivered.

When a customer can modify their contract within predefined terms such that we are not able to enforce the transaction price agreed to, but can only contractually enforce a lower amount, we allocate revenue between performance obligations using the minimum enforceable rights and obligations and any excess amount is recognized as revenue as its earned.

(ii) Contract assets and liabilities

We record a contract asset when we have provided goods and services to our customer but our right to related consideration for the performance obligation is conditional on satisfying other performance obligations. Contract assets are transferred to trade receivables when our right to consideration becomes conditional only as to the passage of time. A contract liability is recognized when we receive consideration in advance of the transfer of products or services to the customer. We account for contract assets and liabilities on a contract-by-contract basis, with each contract presented as either a net contract asset or a net contract liability accordingly.

Subscriber connection fees received from Cable, Internet, Phone and Wireless customers are deferred as contract liabilities and recognized as revenue on a straight-line basis over two to three years. The costs of physically connecting a new home are capitalized as part of the distribution system and costs of disconnections are expensed as incurred.

Initial setup fees related to the installation of data centre services and installation revenue received on contracts with commercial business customers are deferred as contract liabilities and recognized as revenue on a straight-line basis over the related service contract, which generally span two to ten years. Direct and incremental costs associated with the installation of services or service contract, in an amount not exceeding the upfront revenue, are deferred as contract assets and recognized as an operating expense on a straight-line basis over the same period.

(iii) Deferred commission cost assets

We defer the incremental cost to obtain or fulfill a contract with a customer over their expected period of benefit to the extent they are recoverable. These costs include certain commissions paid to internal and external representatives. We defer them as deferred commission cost assets in other assets and amortize them to operating costs over the pattern of the transfer of goods and services to the customer, which is typically evenly over either 24 or 36 consecutive months.

Direct and incremental initial selling, administrative and connection costs, including commissions related to subscriber acquisitions are deferred and recognized as an operating expense on a straight-line basis over three years.

(iv) Deferred equipment revenue and deferred equipment costs

Revenue from sales of DTH equipment is deferred and recognized on a straight-line basis over three years commencing when subscriber service is activated. The total cost of the equipment, including installation, represents an inventoriable cost which is deferred and recognized on a straight-line basis over the same period. The DTH equipment is generally sold to customers at cost or a subsidized price in order to expand the Company's customer base.

Recognition of deferred equipment revenue and deferred equipment costs is recorded as deferred equipment revenue amortization and deferred equipment costs amortization, respectively.

(v) Deferred IRU revenue

Prepayments received under indefeasible right to use (IRU) agreements are amortized on a straight-line basis into income over the term of the agreement and included in amortization of property, plant and equipment, intangibles and other in the consolidated statements of income.

Cash

Cash is presented net of outstanding cheques. When the amount of outstanding cheques and the amount drawn under the Company's revolving term facility are greater than the amount of cash, the net amount is presented as bank indebtedness.

Securitization of trade receivables

Sales of trade receivables in securitization transactions are recognized as collateralized short-term borrowings as we do not transfer control and substantially all the risks and rewards of ownership to another entity and thus do not result in our de-recognition of the trade receivables sold.

Allowance for doubtful accounts

The Company maintains an allowance for doubtful accounts for the estimated expected credit losses resulting from the inability of its customers to make required payments. In determining the allowance, the Company considers factors such as the number of days the account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances.

Inventories

Inventories include subscriber equipment such as DTH receivers, which are held pending rental or sale at cost or at a subsidized price and wireless handsets, accessories and SIM cards. When subscriber DTH equipment is sold, the equipment revenue and equipment costs are deferred and amortized over three years. When the subscriber equipment is rented, it is transferred to property, plant and equipment and amortized over its useful life. Inventories are determined on a first-in, first-out basis, and are stated at cost due to the eventual capital nature as either an addition to property, plant and equipment or deferred equipment costs.

Inventories of wireless handsets, accessories and SIM cards are carried at the lower of cost and net realizable value. Cost is determined using the weighted average method and includes expenditures incurred in acquiring the inventories and bringing them to their existing condition and location. Net realizable value is the estimated selling price in the ordinary course of business, less selling expenses.

Property, plant and equipment

Property, plant and equipment are recorded at purchase cost. Direct labour and other directly attributable costs incurred to construct new assets, upgrade existing assets and connect new subscribers are capitalized as well as borrowing costs on qualifying assets. In addition, any asset removal and site restoration costs in connection with the retirement of assets are capitalized. Repairs and maintenance expenditures are charged to operating expense as incurred. Amortization is recorded on a straight-line basis over the estimated useful lives of assets as follows:

Asset	Estimated useful life
Cable, Wireless and telecommunications distribution system	3-20 years
Digital cable terminals and modems	3-5 years
Satellite audio, video and data network equipment and DTH receiving equipment	3-15 years
Buildings	15-40 years
Data processing	4-10 years
Other	4-20 years

The Company reviews the estimates of useful lives on a regular basis.

Leases

Leases are typically entered into for network infrastructure and equipment, including transponders, and land and buildings relating to the Company's wireless and wireline networks, office space and retail stores. At inception of a contract, the Company assesses whether the contract contains a lease. A lease contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

Lease liabilities are initially measured at the present value of future lease payments at the commencement date, discounted using the interest rate implicit in the lease or, if not readily determinable, the Company's incremental borrowing rate. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Lease payments included in the measurement of the lease liability consist of:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or rate;
- amounts expected to be payable under a residual value guarantee; and
- payments relating to purchase options and renewal option periods that are reasonably certain to be exercised, or periods subject to termination options that are not reasonably certain to be exercised.

The initial lease term included in the measurement of the lease liability consists of:

- the non-cancellable period of the lease;
- periods covered by options to extend the lease, where the Company is reasonably certain to exercise the option; and
- periods covered by options to terminate the lease, where the Company is reasonably certain not to exercise the option.

Lease liabilities are subsequently measured at amortized cost. Lease liabilities are remeasured when there is a lease modification, and a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The interest expense for lease liabilities is recorded in *Interest expense* in the Consolidated Statements of Income.

Variable lease payments that do not depend on an index or rate are not included in the measurement of lease liabilities and right-of-use assets. The related payments are expensed in *Operating, general and administrative expenses* in the period in which the event or condition that triggers those payments occurs.

Right-of-use assets are initially measured at cost, which comprises the initial amount of the lease obligation adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The Company presents right-of-use assets in *Property, plant and equipment.*

If the Company obtains ownership of the leased asset by the end of the lease term or the costs of the right-of-use asset reflects the exercise of a purchase option, we depreciate the right-of-use asset from the lease commencement date to the end of the useful life of the underlying asset. Otherwise, right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life or the end of the lease term. Right-of-use assets are periodically reduced by impairment losses, if any, and adjusted for certain remeasurements on the related lease liability. The depreciation charge for right-of-use assets is recorded in *Amortization – Property, plant and equipment*.

Other long-term assets

Other long-term assets primarily include (i) equipment costs, as described in the revenue and expenses accounting policy, deferred and amortized on a straight-line basis over three to five years, (ii) the non-current portion of wireless handset discounts receivable as described in the revenue and expenses accounting policy, (iii) credit facility arrangement fees amortized on a straight-line basis over the term of the facility, (iv) long-term receivables, (v) network capacity leases, (vi) the non-current portion of prepaid maintenance and support contracts, and (vii) direct costs in connection with initial setup fees and installation of services, as described in the revenue and expenses accounting policy, deferred and amortized on a straight-line basis over two to ten years.

Intangibles

The excess of the cost of acquiring cable, satellite, media, data centre and wireless businesses over the fair value of related net identifiable tangible and intangible assets acquired is allocated to goodwill. Net identifiable intangible assets acquired consist of amounts allocated to broadcast rights and licences, wireless spectrum licences, trademarks, brands, program rights, customer relationships and software assets. Broadcast rights and licences, wireless spectrum licences, trademarks and brands represent identifiable assets with indefinite useful lives.

Customer relationships represent the value of customer contracts and relationships acquired in a business combination and are amortized on a straight-line basis over their estimated useful lives ranging from 4 – 15 years.

Software that is not an integral part of the related hardware is classified as an intangible asset. Internally developed software assets are recorded at historical cost and include direct material and labour costs as well as borrowing costs on qualifying assets. Software assets are amortized on a straight-line basis over estimated useful lives ranging from 3 – 10 years. The Company reviews the estimates of lives and useful lives on a regular basis.

Borrowing costs

The Company capitalizes borrowing costs on qualifying assets that take more than one year to construct or develop using the Company's weighted average cost of borrowing which approximated 5% (2020 – 5%).

Impairment

(i) Goodwill and indefinite-life intangibles

The Company tests goodwill and indefinite-life intangibles for impairment annually (as at February 1) and when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of each cash-generating unit (CGU) is determined based on the higher of the CGU's fair value less costs to sell (FVLCS) and its value in use (VIU). A CGU is the smallest identifiable group of assets that generate cash flows that are independent of the cash inflows from other assets or groups of assets. The Company's cash generating units are Cable, Satellite, and Wireless. Where the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

(ii) Non-financial assets with finite useful lives

For non-financial assets, such as property, plant and equipment and finite-life intangible assets, an assessment is made at each reporting date as to whether there is an indication that an asset may be impaired. If any indication exists, the recoverable amount of the asset is determined based on the higher of FVLCS and VIU. Where the carrying amount of the asset exceeds its recoverable amount, the asset is considered impaired and written down to its recoverable amount. Previously recognized impairment losses are reviewed for possible reversal at each reporting date and all or a portion of the impairment is reversed if the asset's value has increased.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The timing or amount of the outflow may still be uncertain. Provisions are measured using the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, taking into account risks and uncertainties associated with the obligation. Provisions are discounted where the time value of money is considered material.

(i) Asset retirement obligations

The Company recognizes the fair value of a liability for an asset retirement obligation in the period in which it is incurred, on a discounted basis, with a corresponding increase to the carrying amount of property and equipment, primarily in respect of wireless and transmitter sites. This cost is amortized on the same basis as the related asset. The liability is subsequently increased for the passage of time and the accretion is recorded in the income statement as accretion of long-term liabilities and provisions. The discount rates applied are subsequently adjusted to current rates as required at the end of reporting periods. Revisions due to the estimated timing of cash flows or the amount required to settle the obligation may result in an increase or decrease in the liability. Actual costs incurred upon settlement of the obligation are charged against the liability to the extent recorded.

(ii) Restructuring provisions

Restructuring provisions, primarily in respect of employee termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised to those affected that the plan will be carried out.

(iii) Other provisions

Provisions for disputes, legal claims and contingencies are recognized when an outflow to settle the matter is probable. The Company establishes provisions after taking into consideration legal assessments (if applicable), expected availability of insurance or other recourse and other available information.

Deferred credits

Deferred credits primarily include: (i) prepayments received under IRU agreements amortized on a straight-line basis into income over the term of the agreement, (ii) equipment revenue, as described in the revenue and expenses accounting policy, deferred and amortized over three to five years, and (iii) a deposit on a future fibre sale.

Income taxes

The Company accounts for income taxes using the liability method, whereby deferred income tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities measured using substantively enacted tax rates and laws that will be in effect when the differences are expected to reverse. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset and they relate to income taxes levied by the same authority in the same taxable entity. Income tax expense for the period is the tax payable for the period using tax rates substantively enacted at the reporting date, any adjustments to taxes payable in respect of previous years and any change during the period in deferred income tax assets and liabilities, except to the extent that they relate to a business combination or divestment, items recognized directly in equity or in other comprehensive income. The Company records interest and penalties related to income taxes in interest expense.

Tax credits and government grants

The Company receives tax credits primarily related to its research and development activities. Government financial assistance is recognized when management has reasonable assurance that the conditions of the government programs are met and accounted for as a reduction of related costs, whether capitalized and amortized or expensed in the period the costs are incurred.

Foreign currency translation

Transactions originating in foreign currencies are translated into Canadian dollars at the exchange rate at the date of the transaction. Monetary assets and liabilities are translated at the period-end rate of exchange and non-monetary items are translated at historic exchange rates. The net foreign exchange gain (loss) recognized on the translation and settlement of current monetary assets and liabilities was $12 (2020 – $5) and is included in other gains (losses).

Financial instruments other than derivatives

Financial instruments have been classified and measured at amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). Cash and financial instruments have been classified as FVTPL and are recorded at fair value with any change in fair value immediately recognized in income (loss). Investments in equity securities are classified and measured at FVTPL. Loans and receivables and financial liabilities are carried at amortized cost. None of the Company's financial liabilities are classified as FVTPL.

Finance costs and discounts associated with the issuance of debt securities are netted against the related debt instrument and amortized to income using the effective interest rate method. Accordingly, long-term debt accretes over time to the principal amount that will be owing at maturity.

Derivative financial instruments and hedging activities

The Company uses derivative financial instruments, such as foreign currency forward purchase contracts, to manage risks from fluctuations in foreign exchange rates. All derivative financial instruments are recorded at fair value in the consolidated statements of financial position. The Company may elect to apply hedge accounting to certain derivative instruments. With hedge accounting, changes in the fair value of derivative financial instruments designated as cash flow hedges are recorded in other comprehensive income (loss) until the variability of cash flows relating to the hedged asset or liability is recognized in income (loss). When an anticipated transaction is subsequently recorded as a non-financial asset, the amounts recognized in other comprehensive income (loss) are reclassified to the initial carrying amount of the related asset. Where hedge accounting is not permissible or derivatives are not designated in a hedging relationship, they are classified as held-for-trading and the changes in fair value are immediately recognized in income (loss).

Instruments that have been entered into by the Company to hedge exposure to foreign currency risk are reviewed on a regular basis to ensure the hedges are still effective and that hedge accounting continues to be appropriate.

Fair value measurements

Fair value estimates are made at a specific point in time, based on relevant market information and information about the underlying asset or liability. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon their own market assumptions.

The fair value hierarchy consists of the following three levels:

Level 1 Inputs are quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs for the asset or liability are based on observable market data, either directly or indirectly, other than quoted prices.

Level 3 Inputs for the asset or liability are not based on observable market data.

The Company determines whether transfers have occurred between levels in the fair value hierarchy by assessing the impact of events and changes in circumstances that could result in a transfer at the end of each reporting period.

Employee benefits

The Company accrues its obligations under its employee benefit plans, net of plan assets. The cost of pensions and other retirement benefits earned by certain employees is actuarially determined using the projected benefit method pro-rated on service and management's best estimate of salary escalation and retirement ages of employees. Past service costs from plan initiation and amendments are recognized immediately in the income statement. Remeasurements include actuarial gains or losses and the return on plan assets (excluding interest income). Actuarial gains and losses occur because assumptions about benefit plans relate to a long time frame and differ from actual experiences. These assumptions are revised based on actual experience of the plans such as changes in discount rates, expected retirement ages and projected salary increases. Remeasurements are recognized in other comprehensive income (loss) on an annual basis, at a minimum, and on an interim basis when there are significant changes in assumptions.

August 31 is the measurement date for the Company's employee benefit plans. The last actuarial valuations for funding purposes for the various plans were performed effective August 31, 2021 and the next actuarial valuations for funding purposes are effective August 31, 2022.

Share-based compensation

The Company has a stock option plan for directors, officers, employees, and consultants to the Company. The exercise price of options to purchase Class B Shares is determined by the Board, or a committee thereof, at a price not less than the closing price of the Class B Shares on the TSX on the trading day immediately preceding the date on which the options are granted. Any consideration paid on the exercise of stock options, together with any contributed surplus recorded at the date the options vested, is credited to share capital. The Company calculates the fair value of share-based compensation awarded to employees using the Black-Scholes option pricing model. The fair value of options are expensed and credited to contributed surplus over the vesting period of the options using the graded vesting method.

The Company has a restricted share unit (RSU) and performance share unit (PSU) plan which provides that RSUs may be granted to officers, employees and directors of the Company, and PSUs may be granted to officers and employees of the Company. RSUs vest on either the first, second and third anniversary of the grant date or 100% on the third anniversary of the grant date and compensation is recognized on a straight-line basis over the three-year vesting period. PSUs vest 100% on the third anniversary of the grant date. RSUs and PSUs will be settled in either cash or Class B Shares as determined by the Human Resources and Compensation Committee at the time of the grant and the obligation for RSUs and PSUs is measured at the end of each period at fair value using the Black-Scholes option pricing model and the number of outstanding RSUs and PSUs. For PSUs, the performance criteria is set by the by the Human Resources and Compensation Committee at the time of the grant, and typically requires the achievement of a minimum level of performance, otherwise the payout is zero, while maximum performance is capped at 150%. On settlement of vested PSUs, the number of Class B Shares issued or delivered, or the amount of cash payment will be multiplied by the applicable performance factor.

The Company has a deferred share unit (DSU) plan for its Board of Directors. Compensation cost is recognized immediately as DSUs vest when granted. DSUs will be settled in cash and the obligation is measured at the end of each period at fair value using the Black-Scholes option pricing model and the number of outstanding DSUs.

Directors may elect to receive their compensation in cash, RSUs, DSUs, or a combination thereof. Any director who has not met their share ownership guidelines is generally required to elect to receive at least 50% of their annual compensation in DSUs and/or RSUs.

The Company has an employee share purchase plan (the "ESPP") under which eligible employees may contribute to a maximum of 5% of their monthly base compensation. The Company contributes an amount equal to 25% of the participant's contributions, increasing to 33% once an employee reaches 10 years of continuous service, and records such amounts as compensation expense.

Earnings per share

Basic earnings per share is based on net income attributable to equity shareholders adjusted for dividends on preferred shares and is calculated using the weighted average number of Class A Shares and Class B Shares outstanding during the period. Diluted earnings per share is calculated by considering the effect of all potentially dilutive instruments. In calculating diluted earnings per share, any proceeds from the exercise of stock options and other dilutive instruments are assumed to be used to purchase Class B Shares at the average market price during the period.

Guarantees

The Company discloses information about certain types of guarantees that it has provided, including certain types of indemnities, without regard to whether it will have to make any payments under the guarantees.

Estimation uncertainty and critical judgments

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates and significant changes in assumptions could cause an impairment in assets. The following require the most difficult, complex or subjective judgments which result from the need to make estimates about the effects of matters that are inherently uncertain.

Estimation uncertainty

The following are key assumptions concerning the future and other key sources of estimation uncertainty that could impact the carrying amount of assets and liabilities and results of operations in future periods.

(i) Allowance for doubtful accounts

The Company is required to make an estimate of expected credit losses on its receivables. The estimated allowance required is a matter of judgment and the actual loss eventually sustained may be more or less than the estimate, depending on events which have yet to occur and which cannot be foretold, such as future business, personal and economic conditions.

(ii) Contractual service revenue

The Company is required to make judgments and estimates that affect the amount and timing of revenue from contracts with customers, including estimates of the stand-alone selling prices of wireline and wireless products and services, the identification of performance obligations within a contract and the timing of satisfaction of performance obligations under long-term contracts.

Determining the deferral criteria for the costs incurred to obtain or fulfill a contract requires us to make significant judgments. We expect incremental commission fees paid to internal and external representatives as a result of obtaining contracts with customers to be recoverable.

(iii) Property, plant and equipment

The Company is required to estimate the expected useful lives of its property, plant and equipment. These estimates of useful lives involve significant judgment. In determining these estimates, the Company takes into account industry trends and company-specific factors, including changing technologies and expectations for the in-service period of these assets. Management's judgment is also required in determination of the amortization method, the residual value of assets and the capitalization of labour and overhead.

(iv) Leases

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets. These include determining whether a contract contains a lease, determining the contract term, including whether or not to exercise renewal or termination options, and determining the interest rate used for discounting future cash flows.

(v) Business combinations – purchase price allocation

Purchase price allocations involve uncertainty because management is required to make assumptions and judgments to estimate the fair value of the identifiable assets acquired and liabilities assumed in business combinations. Fair value estimates are based on quoted market prices and widely accepted valuation techniques, including discounted cash flow (DCF) analysis. Such estimates include assumptions about inputs to the valuation techniques, industry economic factors and business strategies.

(vi) Impairment

The Company estimates the recoverable amount of its CGUs using a FVLCS calculation based on a DCF analysis or market approach or a VIU calculation based on a DCF analysis. Where a DCF analysis is used, significant judgments are inherent in this analysis including estimating the amount and timing of the cash flows attributable to the broadcast rights and licences, the selection of an appropriate discount rate, and the identification of appropriate terminal growth rate assumptions. In this analysis, the Company estimates the discrete future cash flows associated with the intangible asset for five years and determines a terminal value. The future cash flows are based on the Company's estimates of future operating results, economic conditions and the competitive environment. The terminal value is estimated using both a perpetuity growth assumption and a multiple of operating income before restructuring costs and amortization. The discount rates used in the analysis are based on the Company's weighted average cost of capital and an assessment of the risk inherent in the projected cash flows. In analyzing the FVLCS determined by a DCF analysis, the Company also considers a market approach determining a recoverable amount for each unit and total entity value determined using a market capitalization approach. Recent market transactions are taken into account, when available. The key assumptions used to determine the recoverable amounts, including a sensitivity analysis, are included in Note 9. A DCF analysis uses significant unobservable inputs and is therefore considered a level 3 fair value measurement.

(vii) Employee benefit plans

The amounts reported in the financial statements relating to the defined benefit pension plans are determined using actuarial valuations that are based on several assumptions including the discount rate and rate of compensation increase. While the Company believes these assumptions are reasonable, differences in actual results or changes in assumptions could affect employee benefit obligations and the related income statement impact. The most significant assumption used to calculate the net employee benefit plan expense is the discount rate. The discount rate is the interest rate used to determine the present value of the future cash flows that is expected will be needed to settle employee benefit obligations. It is based on the yield of long-term, high-quality corporate fixed income investments closely matching the term of the estimated future cash flows and is reviewed and adjusted as changes are required.

(viii) Income taxes

The Company is required to estimate income taxes using substantively enacted tax rates and laws in effect or that will be in effect when the temporary differences are expected to reverse. In determining the measurement of tax uncertainties, the Company recognizes an income tax benefit only when it is probable that the tax benefit will be realized. Realization of deferred income tax assets is dependent on generating sufficient taxable income during the period in which the temporary differences are deductible. Although realization is not assured, management believes it is more likely than not that all recognized deferred income tax assets will be realized based on reversals of deferred income tax liabilities, projected operating results and tax planning strategies available to the Company and its subsidiaries.

(ix) Contingencies

The Company is subject to various claims and contingencies related to lawsuits, taxes and commitments under regulatory, contractual and other commercial obligations. Contingent losses are recognized by a charge to income when it is likely that a future event will confirm that an asset has been impaired or a liability incurred at the date of the financial statements and the amount can be reasonably estimated. Significant changes in assumptions as to the likelihood and estimates of the amount of a loss could result in recognition of additional liabilities.

Critical judgements

The following are critical judgements apart from those involving estimation:

(i) Determination of a CGU

Management's judgment is required in determining the Company's cash generating units (CGU) for the impairment assessment of its indefinite-life intangible assets. The CGUs have been determined considering operating activities and asset management and are Cable, Satellite, and Wireless.

(ii) Broadcast rights and licences and spectrum licences – indefinite-life assessment

A number of the Company's businesses are dependent upon broadcast licences (or operate pursuant to an exemption order) granted and issued by the CRTC or wireless spectrum licences issued by Innovation, Science and Economic Development Canada (ISED). While these licences must be renewed from time to time, the Company has never failed to do so. In addition, there are currently no legal, regulatory or competitive factors that limit the useful lives of these assets.

Standards, interpretations and amendments to standards issued but not yet effective

The Company has not yet adopted certain standards and interpretations that have been issued but are not yet effective. The following pronouncements are being assessed to determine the impact on the Company's results and financial position but the impacts are not expected to be material:

- *Proceeds before Intended Use* (Amendments to IAS 16, *Property, Plant and Equipment*) was amended to prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing the asset to capable operations. These amendments are required to be applied for annual periods commencing on or after January 1, 2022, however earlier application is permitted.

- *Onerous Contracts – Costs of Fulfilling a Contract* (Amendments to IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*) was amended to clarify which costs should be included in determining the cost of fulfilling a potential onerous contract. These amendments are required to be applied for annual periods commencing on or after January 1, 2022, however earlier application is permitted.

- *Classification of Liabilities as Current or Non-Current* (Amendments to IAS 1, *Presentation of Financial Statements*) was amended to clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period and specifies that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability. The amendments are effective January 1, 2023 with early application permitted. The amendments are required to be adopted retrospectively.

3. ACCOUNTS RECEIVABLE

	2021 $	2020 $
Subscriber and trade receivables	**362**	326
Due from related parties (note 29)	**–**	1
Miscellaneous receivables	**17**	15
	379	342
Less allowance for doubtful accounts (note 30)	**(78)**	(74)
	301	268

Included in operating, general and administrative expenses is a provision for doubtful accounts of $25 (2020 – $60).

4. INVENTORIES

	2021 $	2020 $
Wireless devices and accessories	**33**	40
DTH subscriber equipment	**23**	20
Other – built to suit	**7**	–
	63	60

5. OTHER CURRENT ASSETS

	2021 $	2020 $
Prepaid expenses	**103**	89
Costs incurred to obtain or fulfill a contract with a customer	**59**	61
Wireless handset receivables	**168**	127
Current portion of derivatives	**1**	–
	331	277

6. INVESTMENTS AND OTHER ASSETS

	2021 $	2020 $
Investments in private entities	**70**	42

The Company has a portfolio of minor investments in various private entities. During fiscal 2021, the Company recorded a net fair value adjustment of $27 relating to these investments. This gain is included in other gains (losses) on the Consolidated Statements of Income for the year ended August 31, 2021.

7. PROPERTY, PLANT AND EQUIPMENT

	August 31, 2021			August 31, 2020		
	Cost $	Accumulated amortization $	Net book value $	Cost $	Accumulated amortization $	Net book value $
Cable and telecommunications distribution system	**7,475**	**3,957**	**3,518**	7,189	3,699	3,490
Digital cable terminals and modems	**853**	**541**	**312**	937	579	358
Satellite audio, video and data network and DTH receiving equipment	**106**	**66**	**40**	114	68	46
Land and buildings	**646**	**318**	**328**	645	293	352

Assets under construction	**417**	**–**	**417**	420	–	420
Property, plant and equipment excluding right-of-use assets	**10,127**	**5,301**	**4,826**	9,943	5,047	4,896
Right-of-use assets (note 14)	**1,474**	**281**	**1,193**	1,387	141	1,246
Property, plant and equipment	**11,601**	**5,582**	**6,019**	11,330	5,188	6,142

Changes in the net carrying amounts of property, plant and equipment for 2021 and 2020 are summarized as follows:

	August 31, 2020					August 31, 2021
	Net book value $	Additions $	Transfers $	Amortization $	Disposals and writedown $	Net book value $
Cable and telecommunications distribution system	**3,490**	**441**	**215**	**(625)**	**(3)**	**3,518**
Digital cable terminals and modems	**358**	**146**	**–**	**(196)**	**4**	**312**
Satellite audio, video and data network and DTH receiving equipment	**46**	**8**	**(1)**	**(13)**	**–**	**40**
Land and buildings	**352**	**4**	**2**	**(29)**	**(1)**	**328**
Data centre infrastructure, data processing and other	**230**	**24**	**24**	**(52)**	**(15)**	**211**
Assets under construction	**420**	**239**	**(242)**	**–**	**–**	**417**
	4,896	**862**	**(2)**	**(915)**	**(15)**	**4,826**

	August 31, 2019					August 31, 2020
	Net book value $	Additions $	Transfers $	Amortization $	Disposals and writedown $	Net book value $
Cable and telecommunications distribution system	3,420	393	265	(585)	(3)	3,490
Digital cable terminals and modems	368	214	–	(223)	(1)	358
Satellite audio, video and data network and DTH receiving equipment	60	6	(1)	(17)	(2)	46
Land and buildings	375	6	1	(30)	–	352
Data centre infrastructure, data processing and other	199	63	29	(54)	(7)	230
Assets under construction	461	257	(298)	–	–	420
	4,883	939	(4)	(909)	(13)	4,896

In 2021, the Company recognized a net gain of $3 (2020 – net loss of $3) on the disposal of property, plant and equipment.

8. OTHER LONG-TERM ASSETS

	2021 $	2020 $
Equipment costs subject to a deferred revenue arrangement	**49**	67
Long-term Wireless handset receivables	**45**	35
Costs incurred to obtain or fulfill a contract with a customer	**33**	37
Credit facility arrangement fees	**3**	4
Other	**33**	20
	163	163

Amortization provided in the accounts for 2021 amounted to $47 (2020 – $65) and was recorded as amortization of deferred equipment costs.

9. INTANGIBLES AND GOODWILL

	2021 $	2020 $
Broadcast rights and licences		
Cable systems	**4,016**	4,016
DTH and satellite services	**1,013**	1,013
	5,029	5,029
Wireless spectrum licences	**2,445**	2,445
Other intangibles		
Software	**483**	479
Customer relationships	**39**	44
	7,996	7,997
Goodwill		
Cable and telecommunications systems	**79**	79
Wireless	**201**	201
	280	280
Net book value	**8,276**	8,277

Broadcast rights and licences, trademark, brands and wireless spectrum licences have been assessed as having indefinite useful lives. While licences must be renewed from time to time, the Company has never failed to do so. In addition, there are currently no legal, regulatory, competitive or other factors that limit the useful lives of these assets.

The changes in the carrying amount of intangibles with indefinite useful lives, and therefore not subject to amortization, are as follows:

	Broadcast rights and licences $	Goodwill $	Wireless spectrum licences $
September 1, 2019	5,029	280	2,445
Additions	–	–	–
Disposition	–	–	–
August 31, 2020	**5,029**	**280**	**2,445**
Additions	**–**	**–**	**–**
Disposition	**–**	**–**	**–**
August 31, 2021	**5,029**	**280**	**2,445**

Intangibles subject to amortization are as follows:

	August 31, 2021			August 31, 2020		
	Cost	Accumulated amortization	Net book value	Cost	Accumulated amortization	Net book value
Software	**897**	**416**	**481**	806	335	471
Software under construction	**2**	**–**	**2**	8	–	8
Customer relationships	**114**	**75**	**39**	114	70	44
	1,013	**491**	**522**	928	405	523

The changes in the carrying amount of intangibles subject to amortization are as follows:

	Software $	Software under construction $	Customer relationships $	Total $
September 1, 2019	440	11	54	505
Additions	144	–	–	144
Transfers	7	(3)	–	4
Dispositions	–	–	–	–
Amortization	(120)	–	(10)	(130)
August 31, 2020	**471**	**8**	**44**	**523**
Additions	**138**	**–**	**–**	**138**
Transfers	**8**	**(6)**	**–**	**2**
Dispositions	**–**	**–**	**–**	**–**
Amortization	**(136)**	**–**	**(5)**	**(141)**
August 31, 2021	**481**	**2**	**39**	**522**

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2021 and the recoverable amount of the CGUs exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2021 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2021 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2021 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2021 do not represent events or changes in circumstance that would be indicative of impairment at August 31, 2021.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2021, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal operating income before restructuring costs and amortization multiple
Cable	5.0%	0.0%	9.7x
Satellite	6.0%	-8.0%	6.5x
Wireless	6.0%	1.0%	6.1x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal operating income before restructuring costs and amortization multiple
Cable	16.4%	13.8%	1.9%
Satellite	6.5%	4.2%	3.6%
Wireless	21.9%	13.5%	2.1%

10. SHORT-TERM BORROWINGS

The Company has an accounts receivable securitization program with a Canadian financial institution which will allow it to sell certain trade receivables into the program up to a maximum of $200. The term of this program extends to May 29, 2022. The Company continues to service and retain substantially all of the risks and rewards relating to the trade receivables sold, and therefore, the trade receivables are recognized on the Company's Consolidated Statements of Financial Position and the funding received is recorded as a current liability (revolving floating rate loans) secured by the trade receivables. The buyer's interest in the accounts receivable ranks ahead of the Company's interest and the program restricts it from using the trade receivables as collateral for any other purpose. The buyer of the trade receivables has no claim on any of the Company's other assets.

A summary of our accounts receivable securitization program as at August 31, 2021 is as follows:

	2021 $	2020 $
Accounts receivable securitization program, beginning of period	**200**	40
Proceeds received from accounts receivable securitization	**–**	160
Repayment of accounts receivable securitization	**–**	–
Accounts receivable securitization program, end of period	**200**	200

	2021 $	2020 $
Trade accounts receivable sold to buyer as security	**416**	446
Short-term borrowings from buyer	**(200)**	(200)
Overcollateralization	**216**	246

11. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	2021 $	2020 $
Trade	**112**	82
Program rights	**4**	4
Accrued liabilities	**521**	541
Accrued network fees	**117**	129
Interest and dividends	**210**	217
Related parties (note 29)	**24**	26
	988	999

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $12 has been paid in fiscal 2021 relating to these initiatives. The remaining $1 costs of are expected to be paid out within the next 5 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $1 in the third quarter, $1 in the second quarter and $12 in the first quarter primarily related to severance and employee related costs, of which $13 has been paid as at August 31, 2021. The remaining $1 costs are expected to be paid within the next 5 months.

(3) During the third quarter of fiscal 2021, the Company recorded a $20 reversal following the CRTC decision on final aggregated Third Party Internet Access rates and a $35 reduction of the interest expense provision.

Corporate

Bank loans

The Company has an unsecured $1.5 billion bank credit facility, which includes a maximum revolving term or swingline facility of $50, with a syndicate of banks which matures in December 2024. The facility can be used for working capital and general corporate purposes.

The terms of the Arrangement Agreement require that the Company maintain sufficient liquidity to pay an $800 million termination fee payable by Shaw in certain circumstances.

Funds are available to the Company in both Canadian and US dollars. At August 31, 2021, $4 (2020 – $3) has been drawn as committed letters of credit against the revolving term facility. Interest rates fluctuate with Canadian prime and bankers' acceptance rates, US bank base rates and LIBOR rates. Excluding the revolving term facility, the effective interest rate on actual borrowings under the credit facility during 2021 was nil (2020 – 2.81%). The effective interest rate on the revolving term facility for 2021 was 3.62% (2020 – 4.05%).

Senior notes

The senior notes are unsecured obligations and rank equally and rateably with all existing and future senior indebtedness. The fixed rate notes are redeemable at the Company's option at any time, in whole or in part, prior to maturity at 100% of the principal amount plus a make-whole premium.

Other

Burrard Landing Lot 2 Holdings Partnership

The Company has a 33.33% interest in the Partnership which built the Shaw Tower project with office/retail space and living/working space in Vancouver, BC. In the fall of 2004, the commercial construction of the building was completed and in February 2014, the Partnership refinanced its debt. The Partnership received a mortgage loan and used the proceeds to prepay the outstanding balance of the previous mortgage and loan excess funds to each of its partners. The mortgage loan matures on November 1, 2024 and bears interest at 4.683% compounded semi-annually with interest only payable for the first five years. Interest and principal payments commenced on April 1, 2019. The mortgage loan is collateralized by the property and the commercial rental income from the building with no recourse to the Company.

In February 2018, the Partnership received an additional mortgage loan of $30 and used the proceeds to loan excess funds to each of its partners, of which the Company received $10. The additional loan matures on November 1, 2024 and bears interest at 4.14% compounded semi-annually. Monthly mortgage payments consist of both principal and interest components.

Debt covenants

The Company and its subsidiaries have undertaken to maintain certain covenants in respect of the credit agreements and trust indentures described above. The Company and its subsidiaries were in compliance with these covenants at August 31, 2021.

Long-term debt repayments

Mandatory principal repayments on all long-term debt in each of the next five years and thereafter are as follows:

	$
2022	1
2023	1
2024	1,001
2025	44
2026	–
Thereafter	3,550

Current	**110**
Long-term	**1,135**
Balance as at August 31, 2021	**1,245**

Lease liabilities are subject to amortization schedules, which results in the principal being repaid over various periods, including reasonably expected renewals. The weighted average interest rate on lease liabilities was approximately 3.55% as at August 31, 2021. Refer to Note 30 for a maturity analysis of the Company's lease liabilities.

The Company leases Ku-band and C-band transponders on the Anik F1R, Anik F2 and Anik G1 satellites. As part of the Ku-band transponder agreements with Telesat Canada, the Company is committed to paying annual transponder maintenance and licence fees for each transponder from the time the satellite becomes operational for a period of 15 years. As at August 31, 2021, the Company has recorded lease liabilities of $246 relating to these transponders.

Below is a summary of the Company's other expenses related to leases included in operating, general and administrative expenses.

	2021 $	2020 $
Expenses related to variable lease components not included in lease liabilities	**20**	20
Expenses related to low-value leases	**33**	32
	53	52

Deposit on future fibre sale	**2**	2
	389	406

Amortization of deferred credits for 2021 amounted to $25 (2020 – $29) and was recorded in the accounts as described below.

IRU agreements are in place for periods ranging from 21 to 60 years and are being amortized to income over the agreement periods. Amortization in respect of the IRU agreements for 2021 amounted to $13 (2020 – $13) and was recorded as other amortization. Amortization of equipment revenue for 2021 amounted to $11 (2020 – $16).

17. SHARE CAPITAL

Authorized

The Company is authorized to issue a limited number of Class A Shares of no par value, as described below; an unlimited number of Class B Shares of no par value; an unlimited number of Class 1 Preferred Shares issuable in series; and an unlimited number of Class 2 Preferred Shares issuable in series, of which 12,000,000 were designated Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A ("Series A Shares") and 12,000,000 were designated Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B ("Series B Shares").

The authorized number of Class A Shares is limited, subject to certain exceptions, to the lesser of that number of shares (i) currently issued and outstanding and (ii) that may be outstanding after any conversion of Class A Shares into Class B Shares.

Class A Shares and Class B Shares

Class A Shares are convertible at any time into an equivalent number of Class B Shares. In the event that a take-over bid is made for Class A Shares, in certain circumstances, the Class B Shares are convertible into an equivalent number of Class A Shares.

Changes in Class A Share capital and Class B Share capital in 2021 and 2020 are as follows:

	Class A Shares		Class B Shares	
	Number	$	Number	$
September 1, 2019	22,372,064	2	494,389,771	4,310

August 31, 2021	**22,372,064**	**2**	**476,537,262**	**4,197**

Series A and B Shares

The Series A Shares and Series B Shares represented series of Class 2 Preferred Shares that were classified as equity since redemption, at $25.00 per Series A Share and Series B Share, was at the Company's option and payment of dividends was at the Company's discretion.

On June 30, 2021 (the "Redemption Date"), the Company redeemed all of its issued and outstanding Preferred Shares in accordance with their terms (as set out in the Company's articles) at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld.

On the Redemption Date, there were 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price paid by Shaw on the Redemption Date to redeem the Preferred Shares was $300.

Share transfer restriction

The Articles of the Company empower the directors to refuse to issue or transfer any share of the Company that would jeopardize or adversely affect the right of Shaw Communications Inc. or any subsidiary to obtain, maintain, amend or renew a licence to operate a broadcasting undertaking pursuant to the Broadcasting Act (Canada).

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

During the year ended August 31, 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 under the NCIB program. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $207 and was charged to retained earnings.

In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

Dividend Reinvestment Plan

On October 24, 2019, in accordance with the terms of our Dividend Reinvestment Plan (DRIP), the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Shares delivered under the DRIP. These changes to the DRIP were applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019 and all other dividends payable thereafter.

18. SHARE-BASED COMPENSATION AND AWARDS

Stock option plan

Under the Company's stock option plan, directors, officers, employees, and consultants are eligible to receive stock options to acquire Class B Shares with terms not to exceed ten years from the date of grant and for such number of Class B Shares as the Board, or a committee thereof, determines in its discretion. An option is not immediately exercisable, but rather is exercisable on vesting dates determined by the Board from time to time. The Company's current practice is to award options for terms of ten years with 20% of the options in a grant vesting on each of the first through fifth anniversaries of the grant date. The Board, or a committee thereof, may grant options at an exercise price not less than the closing price of the Class B Shares on the TSX on the trading day immediately preceding the date on which the options are granted. The maximum number of Class B Shares issuable under the plan may not exceed 62,000,000. As at August 31, 2021, 40,319,392 Class B Shares have been issued under the plan.

The changes in options are as follows:

	2021		2020	
	Number	Weighted average exercise price $	Number	Weighted average exercise price $
Outstanding, beginning of year	**7,358,130**	**26.36**	8,363,031	26.11
Granted	**1,423,000**	**21.82**	84,000	26.88
Forfeited	**(599,260)**	**26.33**	(681,168)	26.65
Exercised[(1)]	**(681,980)**	**25.84**	(407,733)	21.57
Outstanding, end of year	**7,499,890**	**25.56**	7,358,130	26.36

[(1)] The weighted average Class B Share price for the options exercised for the year ended August 31, 2021 was $33.67 (2020 – $25.60).

The following table summarizes information about the options outstanding at August 31, 2021:

	Options outstanding			Options exerciseable	
Range of prices	Number outstanding	Weighted average remaining contractual life	Weighted average exercise price	Number exercisable	Weighted average exercise price
$19.75 to $22.76	1,485,575	8.79	21.80	67,575	21.28
$22.77 to $26.17	1,501,060	4.34	24.42	1,352,360	24.33
$26.18 to $26.32	1,540,595	6.10	26.28	971,695	26.27
$26.33 to $27.55	1,505,605	5.62	27.05	1,022,705	27.12
$27.56 to $30.87	1,467,055	5.46	28.27	1,134,755	28.33

The weighted average estimated fair value at the date of the grant for common share options granted for the year ended August 31, 2021 was $1.42 (2020 – $1.83) per option. The fair value of each option granted was estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted-average assumptions:

	2021	2020
Dividend yield	**5.43%**	4.41%
Risk-free interest rate	**0.50%**	1.45%
Expected life of options	**7 years**	7 years
Expected volatility factor of the future expected market price of Class B Shares	**20.00%**	15.90%

Expected volatility has been estimated based on the historical share price volatility of the Company's Class B Shares.

Restricted share unit plan and Performance share unit plan

The Company has an RSU/PSU plan which provides that RSUs may be granted to directors, officers and employees of the Company and PSUs may be granted to officers and employees of the Company. Vested RSUs and PSUs will be settled in either cash or Class B Shares as determined by the Human Resources and Compensation Committee at the time of the grant. The cash payout will be based on the market value of a Class B Share at the time of the payout. When cash dividends are paid on Class B Shares, holders are credited with additional RSUs or PSUs, as applicable, equal to the dividend.

For PSUs, the performance criteria is set by the Human Resources and Compensation Committee at the time of the grant, and typically requires the achievement of a minimum level of performance, otherwise the payout is zero, while maximum performance is capped at 150%. On settlement of vested PSUs, the number of Class B Shares issued or delivered, or the amount of cash payment will be multiplied by the applicable performance factor.

During 2021, $22 was recognized as compensation expense (2020 – $9). The carrying value and intrinsic value of combined RSUs and PSUs at August 31, 2021 was $30 and $30, respectively (August 31, 2020 – $12 and $12, respectively).

Deferred share unit plan

The Company has a DSU plan for its Board of Directors whereby directors may elect to receive their annual cash compensation, or a portion thereof, in DSUs and/or RSUs, provided that any director who has not met the applicable share ownership guideline is generally required to elect to receive at least 50% of his or her annual compensation in DSUs and/or RSUs. In addition, the Company may adjust and/or supplement directors' compensation with periodic grants of DSUs. A DSU is a right that tracks the value of one Class B Share. Holders will be entitled to a cash payout when they cease to be a director. The cash payout will be based on market value of a Class B Share at the time of payout. When cash dividends are paid on Class B Shares, holders are credited with DSUs equal to the dividend. DSUs do not have voting rights as there are no shares underlying the plan.

During 2021, $11 was recognized as compensation expense (2020 – $2). The carrying value and intrinsic value of DSUs at August 31, 2021 was $35 and $33, respectively (August 31, 2020 – $24 and $20, respectively).

Employee share purchase plan

Generally, all Canadian, non-unionized, full time or part time employees of the Company are eligible to enroll in the ESPP. Under the ESPP, eligible employees may contribute to a maximum of 5% of their monthly base compensation. The Company contributes an amount equal to 25% of the employee's contributions, increasing to 33% once an employee reaches 10 years of continuous service.

During 2021, $5 was recorded as compensation expense (2020 – $5).

19. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	2021	2020
Numerator for basic and diluted earnings per share ($)		
Net income	**986**	688
Deduct: dividends on Preferred Shares	**(7)**	(9)
Net income attributable to common shareholders	**979**	679
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**504**	515
Effect of dilutive securities[1]	**1**	–
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**505**	515
Basic and diluted earnings per share ($)	**1.94**	1.32

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the year ended August 31, 2021, 174,031 options were excluded from the diluted earnings per share calculation (2020 – 6,380,558).

20. DIVIDENDS

Common share dividends

The holders of Class A Shares and Class B Shares are entitled to receive such dividends as the Board of Directors determines to declare on a share-for-share basis, as and when any such dividends are declared or paid. The holders of Class B Shares are entitled to receive during each dividend period, in priority to the payment of dividends on the Class A Shares, an additional dividend amount of $0.0025 per share per annum. This additional dividend amount is subject to proportionate adjustment in the event of future consolidations or subdivisions of shares and in the event of any issue of shares by way of stock dividend. After payment or setting aside for payment of the additional non-cumulative dividends on the Class B Shares, holders of Class A Shares and Class B Shares participate equally, share for share, as to all subsequent dividends declared.

Preferred share dividends

Holders of the Series A Shares were entitled to receive, as and when declared by the Company's Board of Directors, a cumulative quarterly fixed dividend yielding 4.50% annually for the initial period ending June 30, 2016. Commencing

June 30, 2016, the dividend rate was reset to 2.791% for the five year period ending June 30, 2021. Thereafter, the dividend rate was to be reset every five years at a rate equal to the then current 5-year Government of Canada bond yield plus 2.00%. Holders of Series A Shares had the right, at their option, to convert their shares into Series B Shares, subject to certain conditions, on June 30, 2016 and on June 30 every five years thereafter. As noted in note 17, the Company redeemed all of the Series A Shares on June 30, 2021.

On June 30, 2016, 1,987,607 Series A Shares were converted into an equal number of Series B Shares. The Series B Shares also represented a series of Class 2 preferred shares and holders were entitled to receive cumulative quarterly dividends, as and when declared by the Company's Board of Directors, at a rate set quarterly equal to the then current three-month Government of Canada Treasury Bill yield plus 2.00%. The floating quarterly dividend rate for the Series B Shares were set as follows:

Period	Annual Dividend Rate
June 30, 2016 to September 29, 2016	2.539%
September 30, 2016 to December 30, 2016	2.512%
December 31, 2016 to March 30, 2017	2.509%
March 31, 2017 to June 29, 2017	2.480%
June 30, 2017 to September 29, 2017	2.529%
September 30, 2017 to December 30, 2017	2.742%
December 31, 2017 to March 30, 2018	2.872%
March 31, 2018 to June 29, 2018	3.171%
June 30, 2018 to September 29, 2018	3.300%
September 30, 2018 to December 30, 2018	3.509%
December 31, 2018 to March 30, 2019	3.713%
March 31, 2019 to June 29, 2019	3.682%
June 30, 2019 to September 29, 2019	3.687%
September 30, 2019 to December 30, 2019	3.638%
December 31, 2019 to March 30, 2020	3.652%
March 31, 2020 to June 29, 2020	3.638%
June 30, 2020 to September 29, 2020	2.255%
September 30, 2020 to December 30, 2020	2.149%
December 1, 2020 to March 30, 2021	2.109%
March 31, 2021 to June 29, 2021	2.073%

As noted in note 17, the Company redeemed all of the Series B Shares on June 30, 2021 and accordingly, the final dividends on the Preferred Shares were paid by Shaw on the Redemption Date.

Dividend reinvestment plan

The Company has a DRIP that allows holders of Class A Shares and Class B Shares who are residents of Canada and, effective December 16, 2016, the United States, to automatically reinvest monthly cash dividends to acquire additional Class B Shares. For the two-month period ended October 30, 2019, Class B Shares distributed under the Company's DRIP were new shares issued from treasury at a 2% discount from the 5 day weighted average market price immediately preceding the applicable dividend payment date.

On October 25, 2019, in accordance with the terms of its DRIP, the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Shares delivered under the DRIP. These changes to the DRIP applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019 and all other dividends payable thereafter.

Dividends declared

The dividends per share recognized as distributions to common shareholders for dividends declared during the year ended August 31, 2021 and 2020 are as follows:

2021		2020	
Class A Voting Share	**Class B Share**	**Class A Voting Share**	**Class B Share**
1.1825	1.1850	1.1825	1.1850

The dividends per share recognized as distributions to preferred shareholders for dividends declared during the year ended August 31, 2020 and 2019 are as follows:

2021		2020	
Series A Share	**Series B Share**	**Series A Share**	**Series B Share**
0.5233	0.3957	0.6978	0.8240

On October 29, 2021, the Company declared dividends of $0.098542 per Class A Share and $0.09875 per Class B Share payable on each of December 30, 2021, January 28, 2022 and February 25, 2022 to shareholders of record at the close of business on December 15, 2021, January 14, 2022 and February 15, 2022, respectively.

21. OTHER COMPREHENSIVE INCOME (LOSS) AND ACCUMULATED OTHER COMPREHENSIVE LOSS

Components of other comprehensive income and the related income tax effects for 2021 are as follows:

	Amount $	Income taxes $	Net $
Items that may subsequently be reclassified to income			
Change in unrealized fair value of derivatives designated as cash flow hedges	**(1)**	**–**	**(1)**
Adjustment for hedged items recognized in the period	**6**	**(1)**	**5**
	5	**(1)**	**4**
Items that will not be subsequently reclassified to income			
Remeasurements on employee benefit plans:	**48**	**(12)**	**36**
	53	**(13)**	**40**

Components of other comprehensive income and the related income tax effects for 2020 are as follows:

	Amount $	Income taxes $	Net $
Items that may subsequently be reclassified to income			
Change in unrealized fair value of derivatives designated as cash flow hedges	(5)	1	(4)
Adjustment for hedged items recognized in the period	(3)	1	(2)
	(8)	2	(6)
Items that will not be subsequently reclassified to income			
Remeasurements on employee benefit plans:	2	(1)	1
	(6)	1	(5)

Accumulated other comprehensive loss is comprised of the following:

	2021 $	2020 $
Items that may subsequently be reclassified to income		
Change in unrealized fair value of derivatives designated as cash flow hedges	**(1)**	(5)
Items that will not be subsequently reclassified to income		
Remeasurements on employee benefit plans:	**(58)**	(94)
	(59)	(99)

22. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	Contract Liabilities
August 31, 2019	158	238
Increase in contract assets from revenue recognized during the period	200	–
Contract assets transferred to trade receivables	(170)	–
Contract terminations transferred to trade receivables	(16)	–
Revenue recognized included in contract liabilities at the beginning of the year	–	(231)
Increase in contract liabilities during the period	–	218
August 31, 2020	**172**	**225**
Increase in contract assets from revenue recognized during the period	**140**	**–**
Contract assets transferred to trade receivables	**(171)**	**–**
Contract terminations transferred to trade receivables	**(16)**	**–**
Revenue recognized included in contract liabilities at the beginning of the year	**–**	**(219)**
Increase in contract liabilities during the period	**–**	**222**
August 31, 2021	**125**	**228**

	Contract Assets	Contract Liabilities
Current	132	211
Long-term	40	14
Balance as at August 31, 2020	172	225
Current	**97**	**213**
Long-term	**28**	**15**
Balance as at August 31, 2021	**125**	**228**

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the year ended August 31, 2021 and 2020. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

August 31, 2019	94
Additions to deferred commission cost assets	84
Amortization recognized on deferred commission cost assets	(80)
August 31, 2020	**98**
Additions to deferred commission cost assets	**75**
Amortization recognized on deferred commission cost assets	**(81)**
August 31, 2021	**92**
Current	61
Long-term	37
Balance as at August 31, 2020	98
Current	**59**
Long-term	**33**
Balance as at August 31, 2021	**92**

Commission costs are amortized over a period ranging from 24 to 36 months.

Disaggregation of revenue

	2021 $	2020 $
Services		
Wireline – Consumer	**3,665**	3,683
Wireline – Business	**584**	567
Wireless	**891**	815
	5,140	5,065
Equipment and other		
Wireless	**381**	351
	381	351
Intersegment eliminations	**(12)**	(9)
Total revenue	**5,509**	5,407

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at August 31, 2021:

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,583	742	151	77	30	2	2,585
Wireless	348	101	–	–	–	–	449
Total	**1,931**	**843**	**151**	**77**	**30**	**2**	**3,034**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

23. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	2021 $	2020 $
Employee salaries and benefits [(1)]	**664**	657
Purchases of goods and services	**2,359**	2,373
	3,023	3,030

(1) For the year ended August 31, 2021, employee salaries and benefits include restructuring costs of $14 (2020 – $14).

24. OTHER GAINS (LOSSES)

	2021 $	2020 $
Gain on disposal of fixed assets and intangibles	**3**	(3)
Costs associated with Rogers Transaction	**(23)**	–
Debt Redemption Penalty	**–**	(17)
Fair value adjustment of private investments	**27**	–
Other [(1)]	**(9)**	4
	(2)	(16)

(1) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

25. INCOME TAXES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company's net deferred tax liability consists of the following:

	2021 $	2020 $
Deferred tax assets	**2**	1
Deferred tax liabilities	**(1,998)**	(1,968)
Net deferred tax liability	**(1,996)**	(1,967)

Significant changes recognized to deferred income tax assets (liabilities) are as follows:

	Property, plant and equipment and software assets $	Broadcast rights, licences, customer relationships, trademark and brands $	Partnership income $	Non-capital loss carry-forwards $	Accrued charges $	Capital Loss Carry-Forwards $	Total $
Balance at August 31, 2019	(299)	(1,626)	(32)	93	(7)	–	(1,871)
Recognized in statement of income	(51)	(10)	21	13	(32)	–	(59)
Effect of IFRS 16 adoption	(4)	–	–	–	4	–	–
Effect of IFRIC 23 adoption	(40)	2	–	–	–	–	(38)
Recognized in other comprehensive income	–	–	–	–	1	–	1
Balance at August 31, 2020	**(394)**	**(1,634)**	**(11)**	**106**	**(34)**	**–**	**(1,967)**
Recognized in statement of income	**(18)**	**(16)**	**(62)**	**56**	**21**	**3**	**(16)**
Recognized in other comprehensive income	**–**	**–**	**–**	**–**	**(13)**	**–**	**(13)**
Balance at August 31, 2021	**(412)**	**(1,650)**	**(73)**	**162**	**(26)**	**3**	**(1,996)**

The Company has capital loss carryforwards of approximately $27 for which no deferred income tax asset has been recognized in the accounts. These capital losses can be carried forward indefinitely.

The Company has taxable temporary differences associated with its investment in its subsidiaries. No deferred tax liabilities have been provided with respect to such temporary differences as the Company is able to control the timing of the reversal and such reversal is not probable in the foreseeable future.

The income tax expense differs from the amount computed by applying the statutory rates to income before income taxes for the following reasons:

	2021	**2020**
Current statutory income tax rate	**25.5%**	26.3%
Income tax expense at current statutory rates	**263**	228
Net increase (decrease) in taxes resulting from:		
Recognition of previously unrecognized tax losses	**(81)**	(22)
Revision to liabilities for uncertain tax positions	**(125)**	–
Other	**(11)**	(27)
Income tax expense	**46**	179

The statutory income tax rate for the Company decreased from 26.3% in 2020 to 25.5% in 2021 as a result of provincial tax rate changes.

The components of income tax expense are as follows:

	2021 $	**2020 $**
Current income tax expense	**155**	120
Current tax recovery from revision to liabilities for uncertain tax positions	**(125)**	–
Deferred tax expense related to temporary differences	**97**	81
Deferred tax recovery from the recognition of previously unrecognized tax losses	**(81)**	(22)
Income tax expense	**46**	179

26. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

	2021 $	2020 $
Revenue		
Wireline	**4,249**	4,250
Wireless	**1,272**	1,166
	5,521	5,416
Intersegment eliminations	**(12)**	(9)
	5,509	5,407
Adjusted EBITDA [(1)]		
Wireline	**2,107**	2,054
Wireless	**393**	337
	2,500	2,391
Restructuring costs	**(14)**	(14)
Amortization	**(1,219)**	(1,217)
Operating income	**1,267**	1,160
Interest		
Operating	**228**	267
Other/non-operating	**3**	7
	231	274
Current taxes [(2)]		
Operating	**155**	113
Other/non-operating	**(125)**	7
	30	120

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

(2) Current taxes are lower for the year ended August 31, 2021 due mainly to a revision to liabilities for uncertain tax positions that became statute barred in the period of $125.

Capital expenditures

	2021 $	2020 $
Capital expenditures accrual basis		
Wireline	**701**	784
Wireless	**280**	296
	981	1,080
Equipment costs (net of revenue)		
Wireline	**22**	31
Capital expenditures and equipment costs (net)		
Wireline	**723**	815
Wireless	**280**	296
	1,003	1,111
Reconciliation to Consolidated Statements of Cash Flows		
Additions to property, plant and equipment	**858**	970
Additions to equipment costs (net)	**21**	31
Additions to other intangibles	**138**	150
Total of capital expenditures and equipment costs (net) per Consolidated Statements of Cash Flows	**1,017**	1,151
Increase (decrease) in working capital and other liabilities related to capital expenditures	**7**	(38)
Less: Proceeds on disposal of property, plant and equipment	**(21)**	(2)
Total capital expenditures and equipment costs (net) reported by segments	**1,003**	1,111

27. COMMITMENTS AND CONTINGENCIES

Commitments

The Company has the following future minimum payments for their contractual commitments that are not recognized as liabilities as at August 31, 2021:

	Purchase Obligations (1)	Property, Plant and Equipment
Within one year	420	157
1 to 3 years	297	9
3 to 5 years	174	–
Over 5 years	111	–
	1,002	166

(1) Includes contractual obligations under service, product, and wireless device contracts, program related agreements and exclusive rights to use intellectual property in Canada.

Contingencies

The Company and its subsidiaries are involved in litigation matters arising in the ordinary course and conduct of its business. Although resolution of such matters cannot be predicted with certainty, management does not consider the Company's exposure to litigation to be material to these consolidated financial statements.

Guarantees

In the normal course of business the Company enters into indemnification agreements and has issued irrevocable standby letters of credit and commercial surety bonds with and to third parties.

Indemnities

Many agreements related to acquisitions and dispositions of business assets include indemnification provisions where the Company may be required to make payment to a vendor or purchaser for breach of contractual terms of the agreement with respect to matters such as litigation, income taxes payable or refundable or other ongoing disputes. The indemnification period usually covers a period of two to four years. Also, in the normal course of business, the Company has provided indemnifications in various commercial agreements, customary for the telecommunications industry, which may require payment by the Company for breach of contractual terms of the agreement. Counterparties to these agreements provide the Company with comparable indemnifications. The indemnification period generally covers, at maximum, the period of the applicable agreement plus the applicable limitations period under law.

The maximum potential amount of future payments that the Company would be required to make under these indemnification agreements is not reasonably quantifiable as certain indemnifications are not subject to limitation. However, the Company enters into indemnification agreements only when an assessment of the business circumstances would indicate that the risk of loss is remote. At August 31, 2021, management believes it is remote that the indemnification provisions would require any material cash payment.

The Company indemnifies its directors and officers against any and all claims or losses reasonably incurred in the performance of their service to the Company to the extent permitted by law.

Irrevocable standby letters of credit and commercial surety bonds

The Company and certain of its subsidiaries have granted irrevocable standby letters of credit and commercial surety bonds, issued by high rated financial institutions, to third parties to indemnify them in the event the Company does not perform its contractual obligations. As of August 31, 2021, such instruments amounted to $4. The Company has not recorded any additional liability with respect to these instruments, as the Company does not expect to make any payments in excess of what is recorded on the Company's consolidated financial statements. The instruments mature at various dates during fiscal 2022 to fiscal 2023.

28. EMPLOYEE BENEFIT PLANS

Defined contribution pension plans

The Company has defined contribution pension plans for its non-union employees and, for the majority of these employees, contributes 5% of eligible earnings to the maximum amount deductible under the Income Tax Act. Effective January 1, 2019, the Company introduced a voluntary pension contribution matching program whereby, in addition to the 5% of Company contributions, employees who make voluntary contributions will receive a 25% match on contributions up to 5% of their eligible earnings. For union employees, the Company contributes amounts up to 9.8% of earnings to the individuals' registered retirement savings plans. Total pension costs in respect of these plans were $30 (2020 – $31) of which $23 (2020 – $24) was expensed and the remainder capitalized.

Defined benefit pension plans

The Company has two non-registered retirement plans for designated executives and senior executives. The following is a summary of the accrued benefit liabilities recognized in the consolidated statements of financial position.

	2021 $	**2020 $**
Non-registered plans		
Accrued benefit obligation	**489**	513
Fair value of plan assets	**468**	445
Accrued benefit liabilities and deficit	**21**	68

The plans expose the Company to a number of risks, of which the most significant are as follows:

(i) Volatility in market conditions: The accrued benefit obligations are calculated using discount rates with reference to bond yields closely matching the term of the estimated cash flows while many of the assets are invested in other types of assets. If plan assets underperform these yields, this will result in a deficiency. Changing market conditions in conjunction with discount rate volatility will result in volatility of the accrued benefit liabilities. To mitigate some of the investment risk, the Company has established long-term funding targets where the time horizon and risk tolerance are specified.

(ii) Selection of accounting assumptions: The calculation of the accrued benefit obligations involves projecting future cash flows of the plans over a long time frame. This means that assumptions used can have a material impact on the consolidated statements of financial position and comprehensive income because in practice, future experience of the plans may not be in line with the selected assumptions.

Non-registered pension plans

The Company provides a supplemental executive retirement plan (SERP) for certain of its senior executives and retirees. Benefits under this plan are based on the employees' length of service and their highest three-year average rate of eligible pensionable earnings during their years of service. In 2012, the Company closed the plan to new participants and amended the plan to freeze base salary levels at August 31, 2012 for purposes of determining eligible pensionable earnings. Employees are not required to contribute to this plan.

The Company provides an executive retirement plan (ERP) for certain executives not covered by the SERP. Benefits under this plan are comprised of defined contribution and defined benefit components and are based on the employees' length of service as well as final average earnings during their years of service. Employees are not required to contribute to this plan.

The table below shows the change in benefit obligation and funding status and the fair value of plan assets.

	SERP $	ERP $	2021 Total $	SERP $	ERP $	2020 Total $
Accrued benefit obligation, beginning of year	**477**	**36**	**513**	478	27	505
Current service cost	**–**	**9**	**9**	2	9	11
Interest cost	**13**	**1**	**14**	14	1	15
Payment of benefits to employees	**(20)**	**(2)**	**(22)**	(19)	(2)	(21)
Transfer from DC plan	**–**	**1**	**1**	–	1	1
Remeasurements:						
Effect of changes in demographic assumptions	**–**	**–**	**–**	16	–	16
Effect of changes in financial assumptions	**(24)**	**(3)**	**(27)**	13	1	14
Effect of experience adjustments	**1**	**–**	**1**	(27)	(1)	(28)
Accrued benefit obligation, end of year	**447**	**42**	**489**	477	36	513
Fair value of plan assets, beginning of year	**415**	**30**	**445**	417	19	436
Employer contributions	**–**	**10**	**10**	–	12	12
Interest income	**11**	**–**	**11**	12	1	13
Transfer from DC plan	**–**	**1**	**1**	–	1	1
Payment of benefits	**(20)**	**(2)**	**(22)**	(19)	(2)	(21)
Return on plan assets, excluding interest income	**22**	**1**	**23**	5	(1)	4
Fair value of plan assets, end of year	**428**	**40**	**468**	415	30	445
Accrued benefit liability and plan deficit, end of year	**19**	**2**	**21**	62	6	68

The weighted average duration of the defined benefit obligation of the SERP and ERP at August 31, 2021 is 14.5 years and 15.9 years, respectively.

The underlying plan assets of the SERP and ERP at August 31, 2021 are invested in the following:

	SERP	ERP
Cash and cash equivalents	199	25
Fixed income securities	69	5
Equity securities – Canadian	52	4
Equity securities – Foreign	108	6
	428	40

All fixed income and equity securities have a quoted price in active market.

The tables below show the significant weighted-average assumptions used to measure the pension obligation and cost for the plans.

Accrued benefit obligation	2021 SERP %	2021 ERP %	2020 SERP %	2020 ERP %
Discount rate	**3.10**	**3.10**	2.70	2.70
Rate of compensation increase	**3.00**[(1)]	**3.00**	3.00[(1)]	3.00

Benefit cost for the year	2021 SERP %	2021 ERP %	2020 SERP %	2020 ERP %
Discount rate	**2.70**	**2.70**	2.90	2.90
Rate of compensation increase	**3.00**[(1)]	**3.00**	3.00[(1)]	3.00

(1) Applies only to incentive compensation component of eligible pensionable earnings.

The calculation of the accrued benefit obligation is sensitive to the assumptions above. A one percentage point decrease in the discount rate would have increased the accrued benefit obligation at August 31, 2021 by $72. A one percentage point increase in the rate of compensation increase would have increased the accrued benefit obligation by $2.

When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the present value of the defined benefit obligation has been calculated using the projected benefit method which is the same method that is applied in calculating the defined benefit liability recognized in the consolidated statements of financial position. The sensitivity analysis presented above may not be representative of the actual change in the accrued benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some assumptions may be correlated.

The net pension benefit plan expense, which is included in employee salaries and benefits expense, is comprised of the following components:

	SERP	ERP	2021 Total	SERP	ERP	2020 Total
Current service cost	**–**	**9**	**9**	2	9	11
Interest cost	**13**	**1**	**14**	14	1	15
Interest income	**(11)**	**–**	**(11)**	(12)	(1)	(13)
Pension expense	**2**	**10**	**12**	4	9	13

Other benefit plans

The Company has post-employment benefits plans that provide post-retirement health and life insurance coverage to certain executive level retirees and are funded on a pay-as-you-go basis. The table below shows the change in the accrued post-retirement obligation which is recognized in the consolidated statements of financial position.

	2021	2020
Accrued benefit obligation and plan deficit, beginning of year	**4**	4
Current service cost	**–**	–
Interest cost	**–**	–
Payment of benefits to employees	**–**	–
Remeasurements:		
Effect of changes in demographic assumptions	**1**	–
Effect of changes in financial assumptions	**(1)**	–
Effect of experience adjustments	**1**	–
Accrued benefit obligation and plan deficit, end of year	**5**	4

The weighted average duration of the benefit obligation at August 31, 2021 is 16.7 years.

The post-retirement benefit plan expense, which is included in employee salaries and benefits expense, is $nil (2020 – $nil) and is comprised of current service and interest cost.

The discount rates used to measure the post-retirement benefit cost for the year and the accrued benefit obligation as at August 31, 2021 were 3.10% and 2.70%, respectively (2020 – 2.70% and 2.90%, respectively). A one percentage point decrease in the discount rate would have increased the accrued benefit obligation at August 31, 2021 by $1.

Employer contributions

The Company's estimated contributions to the defined benefit plans in fiscal 2022 is $nil.

29. RELATED PARTY TRANSACTIONS

Controlling shareholder

Voting control of the Company is held by Shaw Family Living Trust (SFLT) and its subsidiaries. As at August 31, 2021, SFLT and its subsidiaries held, directly or indirectly, or exercised control or direction over 17,662,400 Class A Shares, representing approximately 79% of the issued and outstanding Class A Shares, for the benefit of the descendants of the late JR Shaw and Carol Shaw. The sole trustee of SFLT is a private company controlled by a board consisting of seven directors, including as at August 31, 2021, Bradley S. Shaw, four other members of his family, and two independent directors.

The Class A Shares are the only shares entitled to vote in all circumstances. Accordingly, SFLT and its subsidiaries are able to elect a majority of the Board of Directors of the Company and to control the vote on matters submitted to a vote of the Company's Class A Shares.

Significant investments in subsidiaries

The following are the significant subsidiaries of the Company, all of which are incorporated or partnerships in Canada.

	Ownership Interest	
	August 31, 2021	**August 31, 2020**
Shaw Cablesystems Limited	**100%**	100%
Shaw Cablesystems G.P.	**100%**	100%
Shaw Envision Inc.	**100%**	100%
Shaw Telecom Inc.	**100%**	100%
Shaw Telecom G.P.	**100%**	100%
Shaw Satellite Services Inc.	**100%**	100%
Star Choice Television Network Incorporated	**100%**	100%
Shaw Satellite G.P.	**100%**	100%
Freedom Mobile Inc.	**100%**	100%

Key management personnel and Board of Directors

Key management personnel consist of the most senior executive team and along with the Board of Directors, and have the authority and responsibility for planning, directing and controlling the activities of the Company.

Compensation

The compensation expense of key management personnel and Board of Directors is as follows:

	2021 $	2020 $
Short-term employee benefits	**20**	17
Post-employment pension benefits	**7**	3
Termination benefits	**–**	11
Share-based compensation	**22**	6
	49	37

Transactions

The Company paid $2 (2020 – $2) for collection, installation, and maintenance services to a company controlled by a Director of the Company.

During the year, the Company paid $4 (2020 – $10) for remote control units to a supplier where Directors of the Company hold positions on the supplier's board of directors.

At August 31, 2021, the Company had $nil owing in respect of these transactions (2020 – $1).

During the year, network fees of $24 (2020 – $27) were paid to a programmer where a Director of the Company holds a position on the programmer's board of directors.

At August 31, 2021, the Company had $4 owing in respect of these transactions (2020 – $4).

In fiscal 2019, the Company completed the sale of a non-core parcel of land and the building located thereon (the "Property"), to an affiliate of SFLT (the "Purchaser"). As part of the transaction, the Purchaser agreed to lease back the Property to the Company for a term of three years at market rental rates (which was also based on appraisals from the two independent valuators) allowing the Company to monetize a non-core asset. The transaction was approved by the independent Board members of the Company. At August 31, 2021, the Company had a remaining lease liability of $nil (2020 - $1) in respect of this lease which is included in the amounts disclosed in Note 14.

Other related parties

The Company has entered into certain transactions and agreements in the normal course of business with certain of its related parties. These transactions are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

Corus

The Company and Corus are subject to common voting control. During the year, network fees of $116 (2020 – $121), advertising fees of $5 (2020 – $6), and administrative fees of $1 (2020 – $1) were paid to various Corus subsidiaries and entities subject to significant influence. In addition, the Company provided administrative, advertising and other services for $1 (2020 – $1), uplink of television signals for $4 (2020 – $5), and Internet services and lease of circuits for $5 (2020 – $6). At August 31, 2021, the Company had a net of $20 owing in respect of these transactions (2020 – $21).

As part of a regulatory requirement where Shaw pays Corus in lieu of either providing the news coverage directly or contributing into a fund managed by the CRTC, Shaw paid $12 (2020 – $13) as part of the Local News Community Investment program.

The Company provided Corus with advertising spots in return for radio and television advertising. No monetary consideration was exchanged for these transactions and no amounts were recorded in the accounts.

Burrard Landing Lot 2 Holdings Partnership

During the year, the Company paid $10 (2020 – $11) to the Partnership for lease of office space in Shaw Tower. Shaw Tower, located in Vancouver, BC, is the Company's headquarters for its lower mainland operations. At August 31, 2021, the Company had a remaining lease liability of $57 (2020 - $67) in respect of the office space lease which is included in the amounts disclosed in Note 14.

30. FINANCIAL INSTRUMENTS

Fair values

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and Other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at estimated fair value based on information available with respect to investees' operational and financing activities. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market rates. Other notes and debentures are valued based upon current trading values for similar instruments.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined using an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

The carrying value and estimated fair value of long-term debt are as follows:

	August 31, 2021		August 31, 2020	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion) [(1)]	**4,550**	**5,263**	4,548	5,613

[(1)] Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

Risk management

The Company is exposed to various market risks including currency risk and interest rate risk, as well as credit risk and liquidity risk associated with financial assets and liabilities. The Company has designed and implemented various risk management strategies, discussed further below, to ensure the exposure to these risks is consistent with its risk tolerance and business objectives.

Market risk

Market risk is the risk that the fair value or cash flows of a financial instrument will fluctuate as a result of changes in market prices, including foreign exchange and interest rates, the Company's share price and market price of publicly traded investments.

Currency risk

Certain of the Company's capital expenditures and operating costs are incurred in US dollars, while its revenue is primarily denominated in Canadian dollars. Decreases in the value of the Canadian dollar relative to the US dollar could have an adverse effect on the Company's cash flows. To mitigate some of the uncertainty in respect to capital expenditures and operating costs, the Company regularly enters into forward contracts in respect of US dollar commitments. With respect to 2021, the Company entered into forward contracts to purchase US $132 over a period of 12 months commencing in September 2020 at an average exchange rate of 1.3544 Cdn. At August 31, 2021 the Company had forward contracts to purchase US $132 over a period of 12 months commencing September 2021 at an average exchange rate of 1.2666 Cdn in respect of US dollar commitments.

Interest rate risk

Due to the capital-intensive nature of its operations, the Company utilizes long-term financing extensively in its capital structure. The primary components of this structure are an unsecured bank credit facility and various Canadian senior notes with varying maturities issued in the public markets as more fully described in Note 13. The Company also has an accounts receivable securitization program as described in Note 10.

Interest on the Company's unsecured bank credit facility and accounts receivable securitization program are based on floating rates, while the senior notes are fixed-rate obligations. When drawn, the Company utilizes its credit facility to finance day-to-day operations and, depending on market conditions, periodically converts the bank loans to fixed-rate instruments through public market debt issues. As at August 31, 2021, 100% of the Company's consolidated long-term debt was fixed with respect to interest rates.

Sensitivity analysis

The sensitivity to currency risk has been determined based on a hypothetical change in Canadian dollar to US dollar foreign exchange rates of 10%. Foreign exchange forward contracts would be impacted by this hypothetical change resulting in a change to other comprehensive income by $12 net of tax (2020 – $13). A portion of the Company's accounts receivables and accounts payable and accrued liabilities is denominated in US dollars; however, due to their short-term nature, there is no significant market risk arising from fluctuations in foreign exchange rates.

Interest on the Company's unsecured bank credit facility and accounts receivable securitization program are based on floating rates. As at August 31, 2021 there is no significant market risk arising from interest rate fluctuations within a reasonably contemplated range from their actual amounts.

At August 31, 2021, a one dollar change in the Company's Class B Shares would have had an impact on net income of $2 (August 31, 2020 – $1) in respect of the Company's DSU, RSU, and PSU plans.

Credit risk

Accounts receivable in respect of the Consumer, Business and Wireless divisions are not subject to any significant concentrations of credit risk due to the Company's large and diverse customer base. As at August 31, 2021, the Company had accounts receivable of $301 (August 31, 2020 – $268), net of the allowance for doubtful accounts of $78 (August 31, 2020 – $74). The Company maintains an allowance for doubtful accounts for the expected credit losses resulting from the inability of its customers to make required payments.

	2021 $	**2020 $**
Balance, beginning of period	**74**	63
Additions (doubtful accounts expense)	**25**	60
Net usage	**(21)**	(49)
Balance, end of period	**78**	74

In determining the allowance, the Company considers factors such as the number of days the customer account is past due, whether or not the customer continues to receive service, the Company's past collection history and changes in business circumstances. As at August 31, 2021, $124 (August 31, 2020 – $105) of accounts receivable is considered to be past due, defined as amounts outstanding past normal credit terms and conditions. Uncollectible accounts receivable are charged against the allowance account based on the age of the account and payment history. The Company believes that its allowance for doubtful accounts is sufficient to reflect the related credit risk.

The Company mitigates credit risk of subscriber receivables through advance billing and procedures to downgrade or suspend services on accounts that have exceeded agreed credit terms and routinely assesses the financial strength of its business customers through periodic review of payment practices.

Credit risks associated with US currency contracts arise from the inability of counterparties to meet the terms of the contracts. In the event of non-performance by the counterparties, the Company's accounting loss would be limited to the net amount that it would be entitled to receive under the contracts and agreements. In order to minimize the risk of counterparty default under its swap agreements, the Company assesses the creditworthiness of its swap counterparties.

Liquidity risk

Liquidity risk is the risk that the Company will experience difficulty in meeting obligations associated with financial liabilities. The Company manages its liquidity risk by monitoring cash flow generated from operations, available borrowing capacity, and by managing the maturity profiles of its long-term debt.

The Company's undiscounted contractual maturities as at August 31, 2021 are as follows:

	Short-term borrowings	Accounts payable and accrued liabilities[1]	Long-term debt repayable at maturity	Leases (note 14)	Interest payments
Within one year	200	988	1	151	218
1 to 3 years	–	–	1,002	291	407
3 to 5 years	–	–	44	260	351
Over 5 years	–	–	3,550	894	1,757
	200	988	4,597	1,596	2,733

[1] Includes accrued interest and dividends of $210.

31. CONSOLIDATED STATEMENTS OF CASH FLOWS

(i) Funds flow from operations

	2021 $	2020 $
Net income from operations	**986**	688
Adjustments to reconcile net income to funds flow from operations:		
Amortization	**1,221**	1,220
Deferred income tax expense (recovery)	**16**	59
Share-based compensation	**1**	2
Defined benefit pension plans	**2**	1
Fair value adjustments for private investments	**(27)**	–
Net change in contract asset balances	**47**	(14)
Loss (gain) on disposal of fixed assets and intangibles	**(3)**	3
Loss on write-down of assets	**–**	7
Other	**6**	23
Funds flow from operations	**2,249**	1,989

(ii) Interest and income taxes paid and interest received and classified as operating activities are as follows:

	2021 $	2020 $
Interest paid	**265**	287
Income taxes paid (net of refunds)	**174**	134
Interest received	**4**	7

Included in interest paid is interest on lease liabilities of $45 for the year ended August 31, 2021 (2020 – $44).

(iii) Non-cash transactions

The Consolidated Statements of Cash Flows exclude the following non-cash transactions:

	2021 $	2020 $
Issuance of Class B Shares:		
Dividend reinvestment plan (note 20)	–	37

32. CAPITAL STRUCTURE MANAGEMENT

The Company's objectives when managing capital are:

(i) to maintain a capital structure which optimizes the cost of capital, provides flexibility and diversity of funding sources and timing of debt maturities, and adequate anticipated liquidity for organic growth and strategic acquisitions;

(ii) to maintain compliance with debt covenants; and

(iii) to manage a strong and efficient capital base to maintain investor, creditor and market confidence.

The Company defines capital as comprising all components of shareholders' equity (other than non-controlling interests and amounts in accumulated other comprehensive income/loss), long-term debt (including the current portion thereof), lease liabilities (including the current portion thereof), short-term borrowings and bank indebtedness less cash.

	2021 $	2020 $
Cash	**(355)**	(763)
Short-term borrowings	**200**	200
Long-term debt repayable at maturity	**4,597**	4,599
Lease liabilities	**1,245**	1,270
Share capital	**4,199**	4,602
Contributed surplus	**27**	27
Retained earnings	**1,876**	1,703
	11,789	11,638

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of underlying assets. The Company may also from time to time change or adjust its objectives when managing capital in light of the Company's business circumstances, strategic opportunities, or the relative importance of competing objectives as determined by the Company. There is no assurance that the Company will be able to meet or maintain its currently stated objectives. Further, the terms of the Arrangement Agreement require the Company to obtain Rogers' consent prior to incurring certain types of indebtedness.

The Company's credit facilities are subject to covenants which include maintaining minimum or maximum financial ratios, including total debt to operating cash flow/adjusted earnings before interest, taxes, depreciation and amortization, and operating cash flow to fixed charges. At August 31, 2021, the Company was in compliance with these covenants and based on current business plans and economic conditions, the Company is not aware of any condition or event that would give rise to non-compliance with the covenants.

Other than the redemption of the Company's preferred shares as discussed in note 17, the Company's overall capital structure management strategy remains unchanged from the prior year.

Telecom Notice of Consultation CRTC 2020-187

PDF version

Ottawa, 11 June 2020

Public record: 1011-NOC2020-0187

Call for comments – Appropriate network configuration for disaggregated wholesale high-speed access services

Deadline for submission of interventions: 9 September 2020

[Submit an intervention or view related documents]

In an effort to facilitate the deployment of disaggregated wholesale high-speed access (HSA) services, the Commission is issuing this notice of consultation to address the appropriate network and service configurations for the disaggregated wholesale HSA service regime for all wholesale HSA service providers across the country, including the option of a modified level of disaggregation on the networks of Bell Canada, Cogeco, RCCI, and Videotron.

The Commission is also suspending the proceeding to set final rates, terms, and conditions for disaggregated wholesale HSA services in Ontario and Quebec until a later date.

Background

1. The Commission regulates wholesale high-speed access (HSA) services provided by large cable carriers and large telephone companies (collectively, the wholesale HSA service providers). Competitors[1] can use these services to provide their own retail Internet access and other services.

2. The Commission has initiated a number of proceedings to advance the regime for disaggregated wholesale HSA services. To date, it has considered proposed wholesale HSA service rates, terms, and conditions for certain wholesale HSA service providers in Ontario and Quebec, and launched, and subsequently suspended, the process to extend the implementation of the disaggregated wholesale HSA service regime to other wholesale HSA service providers, including those outside Ontario and Quebec.

3. In Telecom Regulatory Policy 2015-326, the Commission reviewed its wholesale services framework. It determined, among other things, that wholesale HSA services, which are used to support retail competition for services such as local telephone, television, and Internet access services, would continue to be mandated; however, the

[1] For the purposes of this notice, "competitors" refers to telecommunications services providers that operate in a given territory and that are not mandated to provide wholesale HSA services.

provision of aggregated wholesale HSA services would no longer be mandated and would be phased out in conjunction with the implementation of disaggregated wholesale HSA services.

4. The Commission determined that disaggregated wholesale HSA services would first be implemented in Ontario and Quebec, where there was significant demand. The Commission's objective at that time was also to ensure an orderly transition from the aggregated wholesale HSA service regime to the disaggregated one.

5. In Telecom Decision 2016-379, the Commission made its determinations on the proposed disaggregated wholesale HSA service configurations of Bell Canada; Cogeco Communications inc. (Cogeco); Quebecor Media Inc., on behalf of Videotron Ltd. (Videotron); and Rogers Communications Canada Inc. (RCCI) in Ontario and Quebec, with a view to providing Canadians with more choice in services such as Internet access. Increased choice was expected to drive competition, resulting in further investment in telecommunications facilities.

6. Subsequently, the Commission directed those four companies to file tariffs and supporting cost studies for their disaggregated wholesale HSA service configurations that reflected the determinations set out in Telecom Decision 2016-379.

7. In Telecom Order 2017-312, the Commission made disaggregated wholesale HSA services available and set out interim rates, terms, and conditions for these services in Ontario and Quebec.

8. By letter dated 6 July 2018, the Commission requested that other wholesale HSA service providers, namely Bell MTS Inc. (Bell MTS); Bragg Communications Incorporated, carrying on business as Eastlink (Eastlink); Saskatchewan Telecommunications (SaskTel); Shaw Cablesystems G.P. (Shaw); and TELUS Communications Inc. (TCI) submit proposed configurations, along with supporting rationale, for their disaggregated wholesale HSA services in their respective serving territories. Bell Canada and RCCI were also asked to submit proposed configurations for the services in their respective serving territories outside Ontario and Quebec (hereafter, the follow-up proceeding).

9. After the filing of proposed configurations and a subsequent request from the Canadian Network Operators Consortium Inc. (CNOC) for further process, the Commission issued a letter, dated 24 October 2018, in which it noted that it was suspending the follow-up proceeding.

10. Subsequently, CNOC filed an application, dated 7 November 2018, in which it requested that the Commission review and vary Telecom Regulatory Policy 2015-326 and Telecom Decision 2016-379.

Issues and Commission's assessment

11. The Commission notes that, in separate proceedings, parties have raised issues related to the regulatory framework for wholesale HSA services and, specifically, related to the transition from aggregated to disaggregated wholesale HSA services.

12. CNOC identified some of these issues in its application. In particular, CNOC raised significant concerns with respect to the current regulatory framework for wholesale wireline services and the deployment of and transition to disaggregated wholesale HSA services. Among other things, CNOC requested a significantly reduced level of disaggregation on Bell Canada's network,[2] and possibly on the networks of Cogeco, RCCI, and Videotron, to address barriers to the use of disaggregated wholesale HSA services.

13. In addition, parties to the follow-up proceeding raised concerns regarding the level of disaggregation required for the service configurations. For instance, wholesale HSA service providers in Western Canada proposed that the Commission adopt lower levels of disaggregation in their networks, submitting that this approach would minimize disruption to their networks and the impact on competitors.

14. The Commission does not have confirmation that there has been any implementation of the disaggregated wholesale HSA service regime in its existing configurations.

15. In light of the above, the Commission considers that the objectives and transition plan established in Telecom Regulatory Policy 2015-326 may not be achieved without further measures. Examining the question of reducing the level of disaggregation for the services in question is timely and warranted, given that such a reduction may be required to facilitate deployment of these services across the country and to minimize any negative effects on competition that might be occurring in the markets for wholesale HSA services.

16. The Commission considers that, by establishing disaggregated wholesale HSA service configurations with the appropriate level of disaggregation for all wholesale HSA service providers in all regions across Canada, mandated access to fibre would begin for all wholesale HSA service providers, thereby making higher speeds accessible to competitors on both cable and telephone company networks.

17. In light of all the above, and in an effort to facilitate the deployment of disaggregated wholesale HSA services, the Commission is calling for comments, as set out below, to consider the appropriate level of disaggregation and configurations for a disaggregated wholesale HSA service regime for all wholesale HSA service providers across the country.

---

[2] A reduced level of disaggregation would entail interconnecting to fewer central offices or head-ends, as opposed to connecting to each central office or head-end (full disaggregation), to access disaggregated wholesale HSA services throughout the serving territory.

18. In addition, if parties and interested persons consider them relevant, up to date and responsive to the questions below, they are not prevented from refiling their submissions filed in the follow-up proceeding as part of this proceeding, with any necessary updates and responses to the questions set out below.

19. In light of this call for comments, the Commission is also suspending the proceeding to set final rates, terms, and conditions for disaggregated wholesale HSA services in Ontario and Quebec until a later date, after the close of this proceeding. The existing interim rates, terms, and conditions established in Telecom Order 2017-312 will remain in effect.

20. As noted in a Commission letter also issued today, the Commission is closing the proceeding associated with CNOC's application. With respect to the issues raised by CNOC in its application and not addressed in this notice, namely the addition of port and fibre strand sharing functionality for all incumbent carriers' disaggregated HSA services, and access to fibre-to-the-premises (FTTP) facilities over aggregated HSA services, the Commission considers that it would be appropriate to address these issues in future proceedings.

Call for comments

21. In order to ensure that the Commission has the factual record necessary to make a determination, the wholesale HSA service providers, namely Bell Aliant, a division of Bell Canada (Bell Aliant); Bell Canada; Bell MTS; Cogeco; Eastlink; RCCI; SaskTel; Shaw; TCI; and Videotron, are made parties to this proceeding and are to file responses to the questions set out below. The Commission also invites submissions from interested persons on those questions.

22. In their interventions, interested persons and the wholesale HSA service providers should provide supporting rationale and all evidence on which they relied to formulate their positions. They should structure their submissions according to the questions identified in this notice.

    i. Provide your view, with supporting rationale and evidence, on whether or not the existing disaggregated wholesale HSA service regime supports an orderly, cost-effective transition from aggregated to disaggregated wholesale HSA services. If not, provide your view on how disaggregated wholesale HSA services should be modified to facilitate the deployment of the services.

    ii. Specify, with supporting rationale, what factors should be taken into account in developing disaggregated wholesale HSA service configurations that include a reduced level of disaggregation (as opposed to full disaggregation) and that would allow for an efficient, cost-effective deployment of the disaggregated wholesale HSA service regime across the country. If you are of the view that the current level of disaggregation is appropriate, explain why, taking into account the factors you have specified.

In response to questions iii to vi below, the Commission invites interested persons and the wholesale HSA service providers to consider a variety of factors, including the following:

- achieving minimal disruption to the wholesale HSA service provider's existing network and the planned evolution of the network;
- reducing changes to the wholesale HSA service provider's network, taking into account existing and planned network architecture;
- establishing a minimum addressable market at a competitor point of interconnection, taking into account geographical considerations (e.g. the distinction between rural and urban areas, where applicable);
- minimizing barriers to entry for competitors, such as costs for transport or for point of interconnection implementation; and
- minimizing the deployment timeline and costs.

In addition, interested persons and the wholesale HSA service providers are to comment on how their positions and proposals are consistent with the objectives of the *Telecommunications Act* (the Act) as well as with the 2006 Policy Direction[3] and the 2019 Policy Direction[4] (collectively, the Policy Directions).

iii. Propose a configuration (or configurations) for disaggregated wholesale HSA services that includes a reduced level of disaggregation (as opposed to full disaggregation), that takes into account the factors set out above, and that is consistent with the Act and with the Policy Directions. The wholesale HSA service providers are to provide their respective configurations.

iv. Explain, with supporting rationale, how the proposed configuration(s) will allow for an efficient, cost-effective deployment of the disaggregated wholesale HSA service regime.

v. For the proposed configuration(s), provide the network access diagram reflecting the factors in response to question ii above.

vi. Indicate whether there are any other issues with respect to the proposed configuration(s). If so, specify these issues.

Procedure

23. The *Canadian Radio-television and Telecommunications Commission Rules of Practice and Procedure* (the Rules of Procedure) apply to this proceeding. The Rules

---

[3] *Order Issuing a Direction to the CRTC on Implementing the Canadian Telecommunications Policy Objectives*, SOR/2006-355, 14 December 2006

[4] *Order Issuing a Direction to the CRTC on Implementing the Canadian Telecommunications Policy Objectives to Promote Competition, Affordability, Consumer Interests and Innovation*, SOR/2019-227, 17 June 2019

of Procedure set out, among other things, the rules for the content, format, filing, and service of interventions, answers, replies, and requests for information; the procedure for filing confidential information and requesting its disclosure; and the conduct of public hearings. Accordingly, the procedure set out below must be read in conjunction with the Rules of Procedure and related documents, which can be found on the Commission's website at www.crtc.gc.ca, under "Statutes and regulations." The guidelines set out in Broadcasting and Telecom Information Bulletin 2010-959 provide information to help interested persons and parties understand the Rules of Procedure so that they can more effectively participate in Commission proceedings.

24. The wholesale HSA providers listed in paragraph 21 above are made parties to this proceeding.

25. The wholesale HSA service providers are to submit their responses to requests for information set out in the Appendix to this notice by **13 July 2020.**

26. The wholesale HSA service providers must file interventions with the Commission regarding the above-noted issues by **9 September 2020**.

27. Interested persons who wish to become parties to this proceeding must file interventions with the Commission regarding the above-noted issues by **9 September 2020**. The interventions must be filed in accordance with section 26 of the Rules of Procedure.

28. Parties are permitted to coordinate, organize, and file, in a single submission, interventions by other interested persons who share their position. Information on how to file this type of submission, known as a joint supporting intervention, as well as a template for the accompanying cover letter to be filed by parties, can be found in Telecom Information Bulletin 2011-693.

29. All documents required to be served on parties to the proceeding must be served using the contact information contained in the interventions.

30. All parties may file replies to interventions with the Commission by **9 November 2020**.

31. The Commission encourages interested persons and parties to monitor the record of this proceeding, available on the Commission's website at www.crtc.gc.ca, for additional information that they may find useful when preparing their submissions.

32. Submissions longer than five pages should include a summary. Each paragraph of all submissions should be numbered, and the line ***End of document*** should follow the last paragraph. This will help the Commission verify that the document has not been damaged during electronic transmission.

33. Pursuant to Broadcasting and Telecom Information Bulletin 2015-242, the Commission expects incorporated entities and associations, and encourages all Canadians, to file submissions for Commission proceedings in accessible formats

(for example, text-based file formats that enable text to be enlarged or modified, or read by screen readers). To provide assistance in this regard, the Commission has posted on its website guidelines for preparing documents in accessible formats.

34. Submissions must be filed by sending them to the Secretary General of the Commission using **only one** of the following means:

by completing the
[Intervention form]

or

by mail to
CRTC, Ottawa, Ontario K1A 0N2

or

by fax to
819-994-0218

35. Parties who send documents electronically must ensure that they will be able to prove, upon Commission request, that filing, or where required, service of a particular document was completed. Accordingly, parties must keep proof of the sending and receipt of each document for 180 days after the date on which the document is filed or served. The Commission advises parties who file or serve documents by electronic means to exercise caution when using email for the service of documents, as it may be difficult to establish that service has occurred.

36. In accordance with the Rules of Procedure, a document must be received by the Commission and all relevant parties by 5 p.m. Vancouver time (8 p.m. Ottawa time) on the date it is due. Parties are responsible for ensuring the timely delivery of their submissions and will not be notified if their submissions are received after the deadline. Late submissions, including those due to postal delays, will not be considered by the Commission and will not be made part of the public record.

37. The Commission will not formally acknowledge submissions. It will, however, fully consider all submissions, which will form part of the public record of the proceeding, provided that the procedure for filing set out above has been followed.

Important notice

38. All information that parties provide as part of this public process, except information designated confidential, whether sent by postal mail, fax, email, or through the Commission's website at www.crtc.gc.ca, becomes part of a publicly accessible file and will be posted on the Commission's website. This includes all personal information, such as full names, email addresses, postal/street addresses, and telephone and fax numbers.

39. The personal information that parties provide will be used and may be disclosed for the purpose for which the information was obtained or compiled by the Commission, or for a use consistent with that purpose.

40. Documents received electronically or otherwise will be posted on the Commission's website in their entirety exactly as received, including any personal information contained therein, in the official language and format in which they are received. Documents not received electronically will be available in PDF format.

41. The information that parties provide to the Commission as part of this public process is entered into an unsearchable database dedicated to this specific public process. This database is accessible only from the web page of this particular public process. As a result, a general search of the Commission's website with the help of either its search engine or a third-party search engine will not provide access to the information that was provided as part of this public process.

Availability of documents

42. Electronic versions of the interventions and other documents referred to in this notice are available on the Commission's website at www.crtc.gc.ca by using the public record number provided at the beginning of this notice or by visiting the "Consultations and hearings – Have your say!" section, then selecting "our applications and processes that are open for comment." Documents can then be accessed by clicking on the links in the "Subject" and "Related Documents" columns associated with this particular notice.

43. Documents are also available at the following address, upon request, during normal business hours.

Appendix to Telecom Notice of Consultation CRTC 2020-187

Requests for information

Bell Aliant, Bell MTS, and SaskTel

1. For April 2020 (or for the most recent month of available data), provide the following information for your networks in the regions in which you are an incumbent, by province:
   a) the total number of central offices;
   b) the total number of central offices capable of providing high-speed Internet access services using legacy digital subscriber line (DSL), fibre-to-the-node (FTTN), and/or FTTP technology;
   c) the total number of aggregated wholesale HSA service end-customers; and
   d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 1), the following information for each central office capable of providing high-speed Internet access services using legacy DSL, FTTN, and/or FTTP technology:
   a) the name of each central office;
   b) the Common Language Location Identifier (CLLI) of each central office;
   c) the civic address of each central office;
   d) the longitude and latitude of each central office;
   e) the name of the associated exchange;
   f) indicate whether there is existing equipment at each central office that supports a competitor interface allowing a competitor to connect to aggregated wholesale HSA service. If the answer is “No,” specify the name and CLLI of the central office with router equipment that this central office is connected to in order to access end-customers of the aggregated wholesale HSA service at this office. Specify the maximum available competitor interface speed;
   g) the number of local wireline network access services (NAS) served by each central office;
   h) the total number of premises passed that are capable of receiving HSA services for each central office, along with a breakdown by legacy DSL, FTTN, and FTTP technologies;

i) the number of end-customers subscribing to the company's retail residential high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

j) the number of end-customers subscribing to the company's retail business high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

k) the total number of aggregated wholesale HSA service end-customers served at each central office; and

l) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that central office.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

   a) the total number of retail high-speed Internet service end-customers served by the company over fixed wireline networks, and the associated revenue;

   b) a breakdown of the retail high-speed Internet service connections over fixed-wireline networks by speed, and the associated revenue;

   c) the number of premises passed by HSA facilities that are capable of receiving HSA services (such as retail Internet service or wholesale HSA service). Provide the total number of premises passed and a breakdown by access technology deployed (i.e. for copper-based HSA access facilities, provide the number of premises passed by FTTN facilities, by legacy DSL facilities, and by both FTTN and legacy DSL facilities; for FTTP facilities, provide the total number of premises passed and the number of premises passed by FTTP facilities only);

   d) the total number of wholesale HSA service end-customers that the company serves, along with a breakdown of the number of end-customer wholesale HSA service connections by speed, and the associated revenue for each speed; and

   e) if applicable to the company, the total number of wholesale HSA service capacity-based billing (CBB) increments and the associated revenue.

Bell Canada

1. For April 2020 (or for the most recent month of available data) provide the following information for your networks in the regions in which you are an incumbent, by province:

   a) the total number of central offices;

   b) the total number of central offices capable of providing high-speed Internet access services using legacy DSL, FTTN, and/or FTTP technology;

c) the total number of aggregated wholesale HSA service end-customers; and

d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 2), the following information for each central office capable of providing high-speed Internet access services using legacy DSL, FTTN, and/or FTTP technology:

a) the name of each central office;

b) the CLLI of each central office;

c) the civic address of each central office;

d) the longitude and latitude of each central office;

e) the name of the associated exchange;

f) Bell Canada stated in its response to requests for information in the disaggregated wholesale HSA service proceeding that if a competitor wants a 10 GigE interface (or 100 GigE at some central offices), the competitor has to connect at central offices with distribution routers (DRs). Otherwise, it can connect to Ethernet switches that are connected to DRs.[5] For each central office, indicate whether it is equipped with a DR or DRs. If there is no local DR and a competitor wishes to connect at a local Ethernet switch, provide the CLLI of the central office with a DR that the local Ethernet switch would be connected to in order to provide the service. Specify the maximum GigE interface speed that is supported;

g) the number of local wireline NAS served by each central office;

h) the total number of premises passed that are capable of receiving HSA services at each central office, along with a breakdown by legacy DSL, FTTN, and FTTP technologies;

i) the number of end-customers subscribing to the company's retail residential high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

j) the number of end-customers subscribing to the company's retail business high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

k) the total number of aggregated wholesale HSA service end-customers served at each central office;

[5] Refer to response to request for information entitled Bell Canada (CRTC)2Mar18-19 Decision 2016-379.

l) where applicable, the total number of disaggregated wholesale HSA service end-customers served at each central office; and

m) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that central office.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

   a) the total number of retail high-speed Internet service end-customers served by the company over fixed wireline networks, and the associated revenue;

   b) a breakdown of the retail high-speed Internet service connections over fixed wireline networks by speed, and the associated revenue;

   c) the number of premises passed for providing HSA services (retail Internet service or wholesale HSA service). Provide the total number of premises passed and a breakdown by access technology deployed (i.e. for copper-based HSA access facilities, provide the number of premises passed by FTTN facilities, by legacy DSL facilities, and by both FTTN and legacy DSL facilities; for FTTP facilities, provide the total number of premises passed and the number of premises passed by FTTP facilities only);

   d) the total number of wholesale HSA service end-customers that the company serves, and a breakdown of the end-customer wholesale service connections by speed, along with the associated revenue; and

   e) the total number of wholesale HSA service CBB increments and the associated revenue.

TCI

1. For April 2020 (or for the most recent month of available data) provide the following information for your networks in the regions in which you are an incumbent, by province:

   a) the total number of central offices;

   b) the total number of central offices capable of providing high-speed Internet access services using legacy DSL, FTTN, and/or FTTP technology;

   c) the total number of aggregated wholesale HSA service end-customers; and

   d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 3), the following information for each central office capable of providing high-speed Internet access services using legacy DSL, FTTN, and/or FTTP technology:

a) the name of each central office;

b) the CLLI of each central office;

c) the civic address of each central office;

d) the longitude and latitude of each central office;

e) the name of the associated exchange;

f) indicate whether there is a routed edge (RE) at the central office. If there is no RE, identify which central office with an RE its access devices supporting HSA are homed to. Specify the maximum Network-to-Network Interface Service (NNI) speed in gigabits per second (Gbps).

g) the number of local wireline NAS served by each central office;

h) the total number of premises passed that are capable of receiving HSA services at each central office, along with a breakdown by legacy DSL, FTTN, and FTTP technologies;

i) the number of end-customers subscribing to the company's retail residential high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

j) the number of end-customers subscribing to the company's retail business high-speed Internet access service at each central office, broken down by legacy DSL, FTTN, and FTTP technologies;

k) the total number of aggregated wholesale HSA service end-customers served by each central office; and

l) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that central office.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

   a) the total number of retail high-speed Internet service end-customers that the company serves over fixed wireline networks, and the associated revenue;

   b) a breakdown of the retail high-speed Internet service connections over fixed wireline networks by speed, and the associated revenue;

   c) the number of premises passed for providing high-speed access services (retail Internet service or wholesale HSA service). Provide the total number of premises passed and a breakdown by access technology deployed (i.e. for copper-based HSA access facilities, provide the number of premises passed by FTTN facilities, by legacy DSL facilities, and by both FTTN and legacy DSL facilities; for FTTP facilities, provide the total number of premises passed and the number of premises passed by FTTP facilities only); and

d) the total number of wholesale HSA service end-customers that the company serves, and a breakdown of the end-customer wholesale service connections by speed, along with the associated revenue.

Cogeco, Eastlink, and RCCI

1. For April 2020 (or for the most recent month of available data), provide the following information for your networks in the regions in which you are an incumbent, by province:

   a) the total number of sites with cable modem terminating systems (CMTS) and/or converged cable access platforms (CCAP);

   b) the total number of sites capable of providing high-speed Internet access services;

   c) the total number of aggregated wholesale HSA service end-customers; and

   d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 4), the following information for your respective company sites that contain CMTS and/or CCAP equipment:

   a) the name of each site;

   b) the civic address of each site;

   c) the longitude and latitude of each site;

   d) the number of CMTS at each site;

   e) the number of CCAP at each site;

   f) identify the site or sites with routing equipment to which the CMTS and/or CCAP at this site is/are connected;

   g) the total number of premises passed that are capable of receiving HSA services at each site, along with a breakdown by access technology deployed (i.e. premises passed by hybrid fibre-coaxial [HFC] facilities, by FTTP facilities, and by both HFC and FTTP facilities);

   h) the number of cable television subscribers served by each site;

   i) the number of end-customers subscribing to the company’s retail residential high-speed Internet access services at each site, broken down by HFC facilities and FTTP facilities;

   j) the number of end-customers subscribing to the company’s retail business high-speed Internet access services at each site, broken down by HFC facilities and FTTP facilities;

k) the total number of aggregated wholesale HSA service end-customers served by each site;

l) where applicable, the total number of disaggregated wholesale HSA service end-customers served by each site; and

m) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that site.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

   a) the total number of retail high-speed Internet service end-customers served by the company over fixed wireline networks, and the associated revenue;

   b) a breakdown of the retail high-speed Internet service connections over fixed wireline networks by speed, and the associated revenue;

   c) the number of premises passed for providing HSA services (retail Internet service or wholesale HSA service). Provide the total premises passed and a breakdown by access technology deployed (i.e. for HFC facilities, FTTP facilities, and both HFC and FTTP facilities);

   d) the total number of aggregated wholesale HSA service end-customers that the company serves, and a breakdown of the end-customer wholesale service connections by speed, along the associated revenue; and

   e) the total number of wholesale HSA service CBB increments and the associated revenue.

Shaw

1. For April 2020 (or for the most recent month of available data), provide the following information for your networks in the regions in which you are an incumbent, by province:

   a) the total number of sites with CMTS and/or CCAP;

   b) the total number of sites capable of providing high-speed Internet access services;

   c) the total number of aggregated wholesale HSA service end-customers; and

   d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 5), the information requested below for your respective company sites that contain CMTS and/or CCAP:

   a) the name of each site;

b) the civic address of each site;

c) the longitude and latitude of each site;

d) the number of CMTS at each site;

e) the number of CCAP at each site;

f) Shaw has described its sites as either hub sites or core sites.[6] For each site, indicate whether it is a hub site or a core site. If the site is a hub site, indicate the core site(s) at which its CMTS and/or CCAP is/are connected to routing equipment;

g) the total number of premises passed that are capable of receiving HSA services at each site, along with a breakdown by access technology deployed (i.e., premises passed by HFC facilities, by FTTP facilities, and by both HFC and FTTP facilities);

h) the number of television subscribers served by each site;

i) the number of end-customers, for each site, subscribing to the company's retail residential high-speed Internet access services, broken down by HFC facilities and FTTP facilities;

j) the number of end-customers, for each site, subscribing to the company's retail business high-speed Internet access services, broken down by HFC facilities and FTTP facilities;

k) the total number of aggregated wholesale HSA service end-customers served by each site; and

l) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that site.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

a) the total number of retail high-speed Internet service end-customers served by the company over fixed wireline networks, and the associated revenue;

b) a breakdown of the retail high-speed Internet service connections over fixed wireline networks by speed, and the associated revenue;

c) the number of premises passed for providing HSA services (retail Internet service or wholesale HSA service). Provide the total number of premises passed and a breakdown by access technology deployed (i.e. for HFC facilities, FTTP facilities, and both HFC and FTTP facilities);

---

[6] See disaggregated third-party Internet access technical proposal entitled *Re: Follow-up process to consider implementation issues of disaggregated wholesale HSA services, including over FTTP access facilities, in other regions – Shaw Disaggregated TPIA Architecture*, 25 September 2018.

d) the total number of aggregated wholesale HSA service end-customers that the company serves, and a breakdown of the end-customer wholesale service connections by speed, along with the associated revenue; and

e) the total number of wholesale HSA service CBB increments and the associated revenue.

Videotron

1. For April 2020 (or for the most recent month of available data), provide the following information for your networks in the regions in which you are an incumbent, by province:

   a) the total number of sites with CMTS and/or CCAP;

   b) the total number of sites capable of providing high-speed Internet access services;

   c) the total number of aggregated wholesale HSA service end-customers; and

   d) a breakdown of the total number of aggregated wholesale HSA service end-customers by competitor (i.e. provide the name of each competitor making use of the service and the associated number of aggregated wholesale HSA service end-customers).

2. For April 2020 (or for the most recent month of available data) provide, in the Excel spreadsheet (Attachment 6), the following information for your company sites that contain CMTS and/or CCAP:

   a) the name of each site;

   b) the civic address of each site;

   c) the longitude and latitude of each site;

   d) the number of CMTS at each site;

   e) the number of CCAP at each site;

   f) Videotron has submitted that CMTS and CCAP in all its sites are interconnected to two backbone routers.[7] Identify the backbone router sites to which the CMTS and/or CCAP at each site is/are connected;

   g) the total number of premises passed that are capable of receiving HSA services at each site, along with a breakdown by access technology deployed (i.e. premises passed by HFC facilities, by FTTP facilities, and by both HFC and FTTP facilities);

   h) the number of cable television subscribers served by each site;

---

[7] See Videotron's proposed configuration submission entitled *Instance de suivi visant à examiner les questions de mise en œuvre des services d'accès haute vitesse de gros dégroupés, y compris par l'intermédiaire d'installations de fibre jusqu'au locaux de l'abonné*, 25 September 2015 [in French only].

i) for each site, the number of end-customers subscribing to the company’s retail residential high-speed Internet access services;

j) for each site, the number of end-customers subscribing to the company’s retail business high-speed Internet access services;

k) the total number of aggregated wholesale HSA service end-customers served by each site;

l) where applicable, the total number of disaggregated wholesale HSA service end-customers served by each site; and

m) the five competitors with the largest number of aggregated wholesale HSA service end-customers. For each of the identified competitors, specify the number of aggregated wholesale HSA service end-customers it serves at that site.

3. For the historical year 2019 and forecast years 2020 and 2021, provide the following information, by province:

a) the total number of retail high-speed Internet service end-customers that the company serves over fixed wireline networks, and the associated revenue;

b) a breakdown of the retail high-speed Internet service connections over fixed wireline networks by speed, and the associated revenue;

c) the number of premises passed for providing HSA services (retail Internet service or wholesale HSA service). Provide the total number of premises passed and a breakdown by access technology deployed (i.e. for HFC facilities, FTTP facilities, and both HFC and FTTP facilities);

d) the total number of aggregated wholesale HSA service end-customers that the company serves, and a breakdown of the end-user wholesale service connections by speed, along with the associated revenue; and

e) the total number of wholesale HSA service CBB increments and the associated revenue.

EXPLANATION OF SYMBOLS

List symbols are used to denote revisions :

A	Increase in rate.
C	Changes in wording where neither an increase nor reductions in rates or charges results therefrom.
D	Discontinued rate or regulation.
N	New wording, rate or charge.
NC	Reformatting of existing material with no change to rate or charge.
R	Reduction of rate.
#	Changed items numbering or lettering.

TABLE OF CONTENTS

TPIA Service

Item 100 Definitions

For the purposes of this Tariff :

« *Act* » means the Telecommunications Act (S.C.1993, ch.38 as amended)

« Applicant » is an ISP requesting TPIA Service.

« *Carrier* » is the company owning the transmission facilities that are used by the Customer in order to interconnect to one or more POIs designated by Shaw.

«*CRTC*» means the Canadian Radio-Television and Telecommunications Commission.

«*CSU/DSU*» means Channel Service Unit/Data Service Unit.

« *Customer* » is a telecommunications service provider that subscribes to the TPIA Service.

« *Customer Service Group* (CSG) » is the group of employees that have been designated by Shaw as being responsible for the processing of TPIA Service requests, and the safeguarding of confidential Customer information.

« *DHCP* » means « Dynamic Host Configuration Protocol » and is a mechanism for allocating IP addresses dynamically so that addresses can be reused when hosts no longer need them.

« *End-User* » is a subscriber of a Customer or of a Wholesale Customer.

« *Internet Service Provider* » or « *ISP* » is a company or organization offering Retail IS to the public.

« *Person* » means a partnership, firm, body corporate or politic, government or department thereof and the legal representative of such person.

« *Point of Interconnection* » or « *POI* » is the physical meeting point between the Customer's transmission facilities and Shaw's access and distribution network.

« *Premises* » is the continuous property and the building or buildings located thereon, or the part or parts of a building, occupied by a Customer or an End-User.

« *Service* » or « *TPIA Service* » means the Third Party Internet Access Service.

« *TPIA Service Agreement* » is a contract between the Customer and Shaw specifying the mutual obligations of Shaw and the Customer related to the TPIA Service.

« *Wholesale Customer* » is a telecommunications service provider that obtains from the Customer, either directly or indirectly through another telecommunication service provider, services that use or include TPIA Service.

TPIA Service

Item 101 Description of Service

Section 1 – Description of Service

This Tariff sets out the basic rights and obligations of Shaw Cablesystems GP and its Customers who subscribe to the TPIA Service.

1.1 The TPIA Service is a service offered to ISPs by Shaw pursuant to Telecom Decisions CRTC 98-9 and 99-9. The Service allows Customers to provide High-Speed access connectivity to their Wholesale Customer and End-Users through cable modems that are compatible with Shaw’s access and distribution network and systems.

1.2 The Customer may use the TPIA Service to provide services, subject to the following conditions:

a) The Customer may not provision usage of more than one IP address by modem.
b) TPIA Service does not support the routing or transmission of IP multicast traffic through the POI.
c) The Customer may resell TPIA Service to a Wholesale Customer in accordance with the terms of this Tariff. The Customer is responsible for ensuring that any Wholesale Customer complies with this Tariff and with the TPIA Service Agreement.
d) The POI may only be used by the Customer in conjunction with Shaw's TPIA service.

1.3 Because the Commission has forborne, in Telecom Regulatory Policy CRTC 2009-19, with respect to the regulation of this service as set out in that decision, Shaw may also provide the service in this tariff at rates and on terms different from the tariffed rates and terms pursuant to an agreement entered into between Shaw and the Customer that has been filed with the Commission for the public record.

1.4 The Customer, and its wholesale customers and subordinate wholesale customers, must be registered with the CRTC as a Reseller of Telecommunications Services or a Reseller of High-Speed Retail Internet Services prior to receiving the TPIA Service. Further, Customer, and its wholesale customers and subordinate wholesale customers, is required to comply with the consumer safeguards set out in the Appendix to Telecom Regulatory Policy CRTC 2017-11 or any subsequent CRTC directives.

Item 102 Terms and Conditions

Section 1 - General

1.1 Nowhere in the tariff or in an Agreement entered into between Shaw and its customer with respect to this service, shall there be a limitation, restriction or other term that is less favourable than the basis on which Shaw uses its facilities to offer its own higher speed retail Internet Service.

1.2 TPIA Service offered by Shaw is subject to the terms and conditions contained in:

a) this Tariff;

b) any written agreements, including the TPIA Service Agreement, to the extend that they are not inconsistent with this Tariff, unless any such agreements expressly overrides this Tariff and have been approved by the CRTC.

All of the above bind both Shaw and its Customers.

1.3 These terms do not limit Shaw's liability in case of deliberate fault or gross negligence, anti-competitive conduct, or of breach of contract where the breach results from the gross negligence of Shaw.

1.4 As Per Telecom Decision CRTC 2002-13 and Telecom Regulatory Policy CRTC 2017-11, Customers of TPIA must make available to End-Users the following information within a reasonable period of time, in Braille, large print or computer diskette or such other format as is mutually agreed upon by the parties:

a) upon request of End-Users who are blind:
   i) billing statements;
   ii) bill inserts sent to End-Users about new services or changes in rates for existing services; and
   iii) any bill inserts that are mandated from time to time by the Commission; and

b) upon request of End-Users or potential End-Users who are blind, information setting out the rates, terms and conditions of service.

However, in the case of a request for an excessively large volume of information, the service provider may limit the alternative format to computer diskette or any other electronic format mutually agreed upon by the parties.

Section 2 Effective Date of Changes

2.1 Subject to Section 2.2, changes to this Tariff, as approved by the CRTC, take effect on their effective date even though Applicants or Customers have not been notified of them or have paid or been billed at the old rate.

2.2 Where the Service to be provided by an agreed-upon date was not provided, through no fault of the Applicant or Customer, and in the meantime a rate increase has gone into effect, the non-recurring charges in place prior to the increase apply.

Item 102 Terms and Conditions – cont'd

Section 3 Availability of Service

3.1 Shaw is not required to provide Service to an Applicant where:

a) Shaw would have to incur unusual expenses that the Applicant will not pay; or

b) the Applicant owes amounts to Shaw that are past due; or

c) the Applicant does not provide a reasonable deposit or alternative to a deposit pursuant to this Tariff.

3.2 Shaw is not required to provide Service to locations where it does not offer Retail IS.

3.3 TPIA Service is offered only in locations where Shaw currently offers its retail high-speed Internet service and where the appropriate facilities, equipment and necessary resources are available, as determined by Shaw.

3.4 Shaw does not warrant that the Service shall at all times be available. Requests for TPIA Service will be accommodated on a "first-come first-served basis", based on the date of a completed application for TPIA Service.

Item 102 Terms and Conditions – cont'd

3.5 In the event that the End-User's premises are located upon or within real property to which Shaw has not the requisite access or use right, access to the inside wire may not be available to Shaw. In these circumstances, Shaw cannot guarantee availability of the TPIA Service.

Section 4 Shaw Right to Enter Premises

4.1 Shaw's agents and employees may, at reasonable hours, enter Premises on which service is or is to be provided to install, inspect, repair and remove its facilities, to inspect and perform necessary maintenance in cases of network affecting disruption involving Applicant, Customer or End-User provided equipment.

4.2 Prior to entering premises, Shaw must obtain permission as the case may be, from the Applicant, Customer, the End-User or other responsible Person.

4.3 Entry is not subject to Section 4.1 and 4.2 in cases or emergency or where entry is pursuant to a court order.

4.4 Upon request, Shaw's agent or employee must show valid Shaw identification prior to entering the Premises.

Section 5 Interconnection

5.1 Customers are responsible to interconnect to one or more POIs designated by Shaw. Interconnecting to a POI makes it possible for a Customer to provide services Wholesale Customer or End-Users served by that POI. POI locations and interconnection procedures can be obtained from Shaw's CSG. A Customer wishing to interconnect at a POI may do so in accordance with the terms, conditions, rates and charges contained in the TPIA Service Agreement and the TPIA Tariff.

5.2 Customers are responsible for providing transmission facilities between their Premises and the POI. Interconnections at the POI must be made via (a) Fast Ethernet 100Base-FX, (b) Gigabit Ethernet, (c) 10 Gigabit Ethernet or other mutually-agreed on high-speed telecommunications facility as agreed to in the TPIA Service Agreement. The rates in this Tariff do not include the provision of such transmission facility(ies). 10 Gigabit Ethernet interconnecting circuits will be installed only where a speed order of 3 Gbps or greater is placed. The Customer must maintain a speed order of at least 3 Gbps on each 10 Gigabit Ethernet interconnecting circuit.

Shaw supports speeds in increments of 100 Mbps downstream. For each order by Customer to increase or decrease its interconnection speed, Shaw will charge the Capacity Rate Service Charges, as specified in Item 103, Section 3 – Service Elements, of this Tariff provided no physical changes to the interconnecting circuits are required. These orders (known as non-complex orders) will be completed within 15 business days of receipt of the order. Orders requiring physical changes to interconnecting circuits (known as complex orders) will be treated as subsequent requests in accordance with Item 103, Section 3.1, and will be completed within 60 business days of receipt of the order.

5.3 The location for interconnection, requested date, type of interconnection and other information must be provided, in the application for TPIA Service Application. Additional costs incurred by Shaw, as a result of changes to the application by the Customer, will be charged to the Customer.

TPIA Service

5.4 Shaw does not warrant that its facilities or equipment are compatible with any specific facilities or equipment of the Customer.

5.5 The Customer has overall responsibility for monitoring the performance of the transmission facilities between its Premises and the POI. Shaw is not responsible to the Customer, Wholesale Customer or their End-Users for the design, engineering, testing or performance of the Customer’s or its Wholesale Customers’ transmission facilities or the quality of the end-to-end services provided over them by the Customer or its Wholesale Customer to its End Users.

5.6 Shaw may at its own discretion at any time change the location of the POI. The Customer will bear its own costs resulting from the relocation of any POI.

Item 102 Terms and Conditions – cont'd

5.8 The Applicant or Customer must provide to Shaw a non-refundable deposit of $1,000 for each POI in which it wishes to interconnect. Shaw will commence all necessary work following receipt of that deposit. The deposit will be applied to the POI charges required in order to interconnect at each POI.

5.9 The Customer may interconnect to a POI only in connection with the TPIA Service. Shaw will maintain a current list of POIs in this tariff.

5.10 Shaw and the Customer will provide each other advance written notice of POI and network change that affect the other party six months before the proposed change or when Shaw or the Customer makes the decision to proceed with the change, whichever is earlier. In either case a minimum six month notice is required.

Section 5 Interconnection

5.10 The Customer shall not implement any changes to its facilities or equipment or knowingly permit its End-Users to implement changes to their equipment which would, in the reasonable assessment of Shaw, materially affect Shaw's operations, services or network, without Shaw's prior consent, which shall not unreasonably be withheld.

5.11 The facilities or equipment used by the Customer, the Customer's carrier, or the Customer's End-Users, when interconnected to the network of Shaw, shall not:

a) interfere with or impair any service offered over any facilities of Shaw or over the facilities of any carrier interconnecting to Shaw's network;

b) cause damage to Shaw's network;

c) impair the privacy of any communication carried over Shaw's facilities; or

d) create hazards to Shaw's employees or to the public.

5.12 A customer who has deliberately, or by virtue of a lack or reasonable care, caused loss or damage to Shaw's facilities, may be charged the cost of restoration or replacement of these facilities. In all cases, Customers are liable for damage caused to Shaw's facilities or equipment by the Customer, the Customer's employees or the Customer's End-Users.

Section 6 Maintenance, Repairs and Modification to Shaw's Network

6.1 Shaw assumes the costs of maintenance and repairs required due to normal wear and tear to its facilities, except that Shaw may charge for the additional expense incurred when the Applicant or Customer requires maintenance or repair work to be performed outside of regular working hours.

6.2 Shaw shall respond to Customer trouble reports only after the Customer has first determined that the trouble does not originate from its installations or equipment or the equipment of its End-Users. Where, at the request of the Customer, Shaw responds to a trouble report, and the trouble is determined by Shaw to originate from the Customer's installations or equipment or the equipment of its End-Users or the Customer's carrier, the Customer shall be charged the rates and charges set out in Item 103 of the Tariff.

TPIA Service

Item 102 Terms and Conditions – cont'd

6.3 Shaw reserves the right to modify, in whole or in part, the design, function, operation, technology or layout of its network, facilities, equipment or other components as Shaw, in its sole discretion, considers necessary. Shaw shall not be responsible to the Customer's carrier, the Customer's End-Users, or any other Person, for their facilities, equipment or other components, in whole or in part, which cease to be compatible with Shaw facilities or which become inoperative because of such modifications to Shaw's network, facilities, equipment, or other components.

Section 7 Transfer of End-Users

7.1 Before requesting the addition of or the transfer of an End-User to the TPIA Service, the Customer must obtain the prior consent of the End-User.

7.2 If the transfer of an End-User is validly disputed by the End-User or by an other Customer on behalf of the End-User, the End-User will be transferred back to the TPIA Service of the last authorized Customer. The Customer requesting the transfer must then provide to Shaw's CSG evidence of End-User authorization. If such End-User authorization is not provided within 15 business days from the date of request by Shaw's CSG, the Customer will be deemed to have requested an unauthorized transfer.

7.3 The Customer having requested the unauthorized transfer shall pay a $60 charge to the authorized Customer.

7.4 For the purposes of Sections 7.1, 7.2 and 7.3 above, Shaw will be deemed to be a Customer.

Section 8 Restrictions on Use of Service

8.1 Customers and their End-Users are prohibited from using Shaw's TPIA Service or permitting it to be used for a purpose or in a manner that is contrary to any applicable law or regulation. Prohibited activities included, but are not limited to posting or disseminating material which is unlawful, posting or disseminating material which violates the copyright or other intellectual property rights of others, and any fraudulent activities.

8.2 Customers are prohibited from using Shaw's Service or permitting their End-Users to use it so as to prevent a fair and proportionate use by others or to interfere with their use by others.

8.3 Customer can only use the TPIA Service to provide services under the terms and conditions specified in this Tariff.

8.4 Customer's End-Users may not exceed the monthly data transfer limits for each product set by Shaw and detailed in Shaw's Acceptable Use Policy (AUP). Shaw reserves the right to monitor bandwidth usage, transmissions made or content posted or distributed via the TPIA Service and to take any measure that it deems necessary, in its sole discretion, to ensure compliance with these terms and conditions or to maintain the integrity of its network.

8.5 No payment may be exacted, directly or indirectly, from any Person by any party other than Shaw for the use of Shaw's Service except where otherwise stipulated by special agreement.

8.6 The provision of the TPIA Service, under this Tariff or the TPIA Service Agreement, does not constitute a joint undertaking by Shaw and its Customers in the provisioning of this Service.

Section 9 Cable Modems

9.1 The End-User cable modem is provided and maintained by the Customer or its End-User. The rates in this Tariff do not include the provision of the End-User cable modem.

Item 102 Terms and Conditions – cont'd

9.2 The TPIA Service is provided only in connection with cable modems compatible with Shaw's access and distribution system. Shaw will maintain a list of compatible cable modem models. Shaw may change this list at any time with written prior notice when Shaw makes the decision to proceed with the change that results in a cable modem model no longer being connected to and compatible with Shaw's access and distribution network and systems. In all cases, a minimum of 6 months written notice is required.

9.3 Shaw remotely provisions and configures the End-User cable modem and remotely performs network checks and tests on the status of the End-User cable modem.

Section 10 Deposits and other guarantees

10.1 Except for the deposit provided for in Section 5.9, Shaw will not require a deposit from an Applicant or Customer at any time unless the Applicant or Customer:

a) has no credit history with Shaw and will not provide satisfactory credit information;

b) has an unsatisfactory credit rating with Shaw due to previous payment practices regarding Shaw's services; or

c) presents an abnormal risk of loss.

10.2 Shaw will inform the Applicant or Customer of the specific reason for requiring a deposit, and of the possibility of providing an alternative to a deposit, such as arranging for third party payment, a bank letter of credit or a written guarantee from a third Person whose credit is established to the satisfaction of Shaw.

10.3 An Applicant or Customer may provide an alternative to a deposit provided it is reasonable in the circumstances.

10.4 Deposits earn interest at the Toronto Dominion Bank's prime rate, calculated on the balance of the deposit, and the interest earned before the monthly billing period. The interest will be credited to the account each month, or upon refund of the deposit.

10.5 Shaw will review the continued appropriateness of deposits and alternative arrangements at six-month intervals. When Service is terminated or the conditions which originally justified the deposit or alternative are no longer present, Shaw will promptly refund the deposit, with interest, or return the guarantee or other written undertaking, retaining any amount then owed to it by the Customer.

Section 11 Confidentiality of Customer Records

11.1 A Customer may request information regarding its account, and Shaw shall provide the information requested if:

a) the Customer has given Shaw sufficient advance notice and details of the information sought to allow Shaw to comply with the request, and

b) the Customer agrees to reimburse Shaw for costs if Shaw would incur unusual expenses to provide the information.

11.2 Unless a Customer consents in writing or disclosure is pursuant to a legal power, all information kept by Shaw regarding the customer, other than the customer's name, address and listed telephone number, are confidential any may not be disclosed by Shaw to third parties.

TPIA Service

Item 102 Terms and Conditions – cont'd

11.3 The Customer cannot assign its rights or obligations pursuant to the TPIA Service Agreement without having obtained the prior written consent of Shaw, which consent shall not unreasonably be withheld.

Section 12 Limitation of Liability

12.1 Shaw is in no way liable for the content transmitted over its facilities. Shaw's liability with respect to the provision of the Service is limited to providing the Service, subject to the terms and conditions described in this Tariff or the TPIA Service Agreement or any related agreement.

12.2 Shaw does not guarantee uninterrupted working of its Service and/or facilities.

12.3 Where there are omissions, interruptions, delays, errors or defects in transmission, or failures or defects in Shaw facilities, Shaw's liability is limited to a refund of charges, on request, proportionate to the length of time the problem existed. However, where the problem is occasioned by Shaw's negligence, Shaw is also liable for the amount calculated in accordance with section 12.5. Except for interruptions due to events of force majeure, the Customer shall be entitled, in such case, to a credit, provided that;

a) Shaw is notified by the Customer;
b) A written request for credit is filed by the Customer with Shaw within fifteen (15) days of such notification.

12.4 Shaw cannot be held liable by the Customer, the Customer's Carrier, or the Customer's End-Users or any other Person, for damages resulting from errors, omissions, interruptions, delays, transmission errors, transmission defects, network outages, failures or defects in its facilities or the Service, or for damages from any other causes except to the extent that such damages are attributable to gross negligence or deliberate fault of Shaw.

12.5 Except with regard to physical injuries, death or damages to the Customer's premises or other property occasioned by its negligence, Shaw's liability for negligence is limited to three times the monthly charges related to Service subscribed by the Customer pursuant to the present Tariff.

12.6 Shaw is not liable for;

a) any act or omission on the part of the Customer or its Wholesale Customer or its or their respective employees, agents or contractors arising from the furnishing of services by the Customer or its Wholesale Customers;
b) any act or omission of the Customer's Carrier whose facilities are used by the Customer to interconnect to Shaw's designated POI;
c) defamation or copyright infringement arising from content transmitted or received over Shaw's facilities;
d) infringement of patents arising from combining or using the Customer or the Customer's Carrier facilities with Shaw's facilities.

12.7 Customers of the TPIA Service shall indemnify Shaw against claims made by the Customer's Carrier or the Customer's End-Users.

Section 13 Payment

13.1 The TPIA Service contained in this Tariff is made available to ISPs as Customers of the TPIA Service. The Customer is billed on a monthly or one-time basis, where applicable, by Shaw for the Service it provides pursuant to this Tariff.

Item 102 Terms and Conditions – cont'd

13.2 Monthly rates are payable in advance the first day of each month. One-time charges are payable thirty (30) days from the date of billing. The mere lapse of time in performing the obligations to pay under this Tariff will put the Customer in default. Without limiting the scope of this provision, any unpaid amount by the Customer will bear interest as of the thirtieth (30) day following the invoice date at a rate of 1.5% per month (or 19.5% annually). Interest will be calculated on a daily basis and compounded monthly on the last day of each thirty (30) day period following the invoice date. Any partial payment shall be applied first to the interest, then to the principal, beginning with the earliest outstanding amount from the due date, irrespective of charges added to the Customer's invoice.

13.3 Subject to Section 13.5 and 13.6, charges cannot be considered past due until the next bill has been generated.

13.4 In exceptional circumstances, for example when a Customer presents an abnormal risk of loss to Shaw, prior to the normal billing date, Shaw may request payment from the Customer on an interim basis for the non-recurring charges that have accrued providing the Customer with details regarding the charges in question. In such cases, subject to Section 13.5, the charges can be considered past due three days after they are incurred or three days after Shaw demands payment, whichever occurs later.

13.5 No charge disputed by a Customer can be considered past due unless Shaw has reasonable grounds for believing that the purpose of the dispute is to evade or delay payment.

13.6 Shaw may request immediate payment in extreme situations, provided that a notice has been issued pursuant to Section 13.4 and the abnormal risk of loss has substantially increased since that notice was given or Shaw has reasonable grounds for believing that the Customer intends to defraud Shaw.

Section 14 Minimum Contract Period and Cancellation Before Service Commencement

14.1 The minimum contract period for the TPIA Service is one (1) year commencing from the date the Service is provided, except where Shaw has stipulated a longer period for provision of special construction or special assemblies. The minimum contract period does not apply to End-User charges.

14.2

14.3 A Customer who cancels or delays a request for Service before installation work has started cannot be charged by Shaw. Installation work is considered to have started when the Customer has completed and returned its application for the TPIA Service Application and Shaw has incurred any related expenses. A Customer who cancels or delays a request for Service after installation work has started but before Service has started, will be charged the lesser of the full charge for the entire minimum contract period plus the POI Access Charge and the estimated costs incurred in installation less estimated net salvage. The estimated installation costs include the costs of unsalvaged equipment and materials specifically provided or used plus the cost of installing, including engineering, supply expense, labor and supervision, and any other disbursements resulting from the installation and removal work.

Item 102 Terms and Conditions – cont'd

Section 15 Renewal

15.1 The Service will be automatically renewed for subsequent periods of one year unless the Customer has given to Shaw a notice of cancellation of the Service 90 days prior to the end of the initial period or any renewal thereof.

Section 16 Customer-Initiated Termination of Service

16.1 Customers who give Shaw 90 days prior notice may terminate their Service after expiry of the minimum contract period or any renewal thereof, in which case they must pay charges due for Service which has been furnished.

16.2 Before expiry of the minimum contract period or any renewal thereof, customers may terminate their service upon prior written notice to Shaw in which case they must pay a termination charge equal to the total remaining balance of the monthly rates for the minimum contract period or any renewal thereof.

Section 17 Shaw-Initiated Suspension or Termination of Service

17.1 Shaw may suspend or terminate a Customer's Service only where the Customer:

a) fails to pay an account of the Customer that is past due, provided it exceeds five hundred dollars ($500) or has been past due for more than two months;

b) fails to provide or maintain a reasonable deposit or alternative when required to do so pursuant to this Tariff;

c) fails to comply with the terms of a deferred payment agreement;

d) repeatedly fails to provide Shaw with reasonable entry and access in conformity with Section 4 of Item 102;

e) contravenes Sections 5.10 and 5.11 of Item 102;

f) contravenes Sections 8.1 or 8.2 of Item 102; or

g) fails to provide payment when requested by Shaw pursuant to Section 13.6 of Item 102.

17.2 Shaw may not suspend or terminate Service in the following circumstances:

a) where the Customer is prepared to enter into and honour a reasonable deferred payment agreement; or

b) where there is a dispute regarding the basis of the proposed suspension or termination, provided payment is being made for undisputed outstanding amounts and Shaw does not have reasonable grounds for believing that the purpose of that dispute is to evade or delay payment.

17.3 Prior to suspension or termination of Service, Shaw will provide the Customer with reasonable advance notice, stating:

a) the reason for the proposed suspension or termination and the amount owing (if any);

b) the schedule suspension or termination date;

c) that a reasonable deferred payment agreement can be entered into (where the reason for suspension or termination is failure to pay);

d) the reconnection charge;

e) the telephone number of a Shaw representative with whom any dispute may be discussed; and

f) that disputes unresolved with this representative may be referred to a senior Shaw manager.

Item 102 Terms and Conditions – cont'd

Where repeated efforts to contact the Customer have failed, Shaw will deliver such advance notice to the billing address.

For the purposes of Item 102.17.3, reasonable advance notice for the termination or suspension of the service of a Customer that is a competitor will generally be at least 30 days.

Section 17 Shaw-Initiated Suspension or Termination of Service

17.4 In addition to the notice required by Section 17.3, Shaw will, at least twenty-four (24) hours prior to suspension or termination of the Service, advise the Customer or any other responsible Person that suspension or termination is imminent, except where;

a) repeated efforts to so advise have failed;

b) immediate action must be taken to protect Shaw from network harm resulting from Customer provided installations or equipment or from the use of the Service by the Customer; or

c) the suspension or termination occurs by virtue of a failure to provide payment when requested by Shaw pursuant to Section 13.6.

17.5 Notwithstanding the provisions of Sections 17.3 and 17.4, nothing contained within this Tariff shall be deemed to preclude Shaw from suspending or terminating forthwith the TPIA Service to a Customer or its End-User if such immediate action is necessary in the circumstances, in the reasonable assessment of Shaw, to maintain the integrity of its network. In cases of such suspension or termination, the Customer will be promptly notified by Shaw and afforded the opportunity to correct the condition that gave rise to the suspension or termination.

17.6 Except with Customer consent or in exceptional circumstances, suspension or termination of Service may occur only on business days between 8 a.m. and 4 p.m., unless the business day precedes a non-business day in which case disconnection may not occur after 12 noon.

17.7 All services provided to its End-Users by the Customer or its Wholesale Customers via the TPIA Service and Shaw's network will be affected as a result of suspension or termination of the Service. No suspension or termination of the End-User's basic cable service provided by Shaw will result from suspension or termination of the TPIA Service.

17.8 Suspension or termination of Service does not affect the Customer's obligation to pay any amount owed to Shaw.

17.9 In the case of suspension of Service, Shaw must make a daily pro rata allowance based on the monthly charge for the Service.

17.10 In the case of termination of Service pursuant to this section, the Customer must pay a termination charge equal to the total remaining balance of the monthly rates for the minimum contract period or any renewal thereof.

17.11 In the case of termination or suspension of Service, reconnection and disconnection charges may apply.

17.12 Where it becomes apparent that suspension or termination of the Service occurred in error or was otherwise improper, Shaw must restore Service during business hours on the next working day, at the latest, unless exceptional circumstances do not permit this, and no reconnection charges shall be levied.

Item 102 Terms and Conditions – cont'd

Section 18 Shaw-Initiated Disconnection of a Customer's End-User

18.1 Shaw may disconnect an End-User of a Customer only where the End-User:

a) contravenes Sections 5.10 and 5.11 of Item 102;
b) contravenes Sections 8.1 or 8.2 of Item 102;
c) contravenes Section 8.4 of Item 102 by continuing to exceed the monthly data transfer limits outlined in Shaw's Acceptable Use Policy (AUP) after receiving two (2) prior notices from Shaw advising of the violation.

18.2 Prior to disconnection of an End-User, Shaw will provide the Customer with reasonable advance notice stating:

a) the reason for the proposed disconnection of the End-User;
b) the scheduled disconnection;
c) the reconnection charge;
d) the telephone number of a Shaw representative with whom any dispute may be discussed;
e) that disputes unresolved with this representative may be referred to a senior Shaw Manager.

Where repeated efforts to contact the Customer have failed, Shaw must deliver such advance notice to the billing address.

18.3 In addition to the notice required by Section 18.2, Shaw will, at least twenty-four (24) hours prior to disconnection of an End-User, advise the Customer that disconnection of its End-User is imminent, except where:

a) repeated efforts to so advise have failed;
b) immediate action must be taken to protect Shaw from End-User provided equipment or from the use of the Service by an End-User.

18.4 Notwithstanding the provisions of Sections 18.2 and 18.3, nothing contained within this Tariff shall be deemed to preclude Shaw from disconnecting forthwith any End-User if such action is necessary in the circumstances, in the reasonable assessment of Shaw, to maintain the integrity of its network. In cases of such disconnection, the Customer will be promptly notified by Shaw and its End-User afforded the opportunity to correct the condition that gave rise to the disconnection.

18.5 Shaw must restore the connection of the End-User, without undue delay, where the grounds for disconnection of the End-User no longer exist. Reconnection charges may apply.

18.6 Where it becomes apparent that disconnection occurred in error or was otherwise improper, Shaw must restore connection during business hours, on the next working day, at the latest, unless exceptional circumstances do not permit this, and no reconnection charges shall be levied.

Section 19 Second-Level Testing of Cable Modems

19.1 Customers may submit DOCSIS-certified modems to Shaw for testing. Shaw will undertake second-level testing of the cable modem to ensure compatibility with Shaw's network.

19.2 No second-level testing of the cable modem is required where the same cable modem model has previously been found to be compatible with Shaw's network or that is the same model as that used by Shaw for its retail IS.

19.3 The specific combination of the firmware, hardware and software defines the cable modem model. Changes to one of these elements would constitute a change to the cable modem model.

19.4 A summary of the second-level test plan and the list of cable modem models that have passed second-level testing are available upon request.

Item 103 Rates and Charges

Section 3 Service Elements

3.1 TPIA Service consists of the following elements:

a) ISP Registration Fee: A charge applies and provides for the processing of the request for the TPIA Service;

b) Initial Report Fee: A one-time charge for engineering, operations and administration work required to provide the Initial Report as described in the Shaw TPIA Service Agreement.

c) Subsequent Report Fee: A charge for the engineering, operations and administration work required to provide a Subsequent Report for revised or additional interconnection facilities to an ISP already connected to the POI and not requiring additional fibre placement or splicing.

d) POI Entrance Fee: A one-time charge for connection from the POI to the ISP Port on the router.

e) POI Configuration Fee: A one-time charge for connection from existing facilities within the POI Premises to the ISP Port on the router.

f) TPIA Transport: A monthly rate applies and provides for the use of Shaw's network between the POI and the Customer's End-Users' Premises. The demarcation point is the port on the End-User's cable modem. The End-User's cable modem is not provided by Shaw nor is Shaw responsible for any repairs or maintenance to the cable modem.

g) Installation (Standard): An Installation (Standard) charge provides for the connection of an outlet and signal strength test at the End-User's premise.

h) Transfer Charge: A charge applies when a customer transfers an End-User from Shaw's retail IS or another Customer of the TPIA Service.

i) POI Capacity Charge:
   i) Monthly Capacity Rate per 100 Mbps downstream: Monthly capacity charges pro-rated based on the speed change order implementation date.
   ii) Monthly Capacity Change Service Charges: These charges apply to each order to increase or decrease interconnection speed, provided no physical changes to interconnecting circuits are required (i.e. non-complex orders). These charges are a per-order rate plus an additional per-interface rate for each interconnecting circuit affected by the order.

j) Second-level testing of cable modems: A charge will be applied when a Customer submits a cable modem to Shaw for second-level testing:
   i) the fee does not apply to one cable modem model submitted by a Customer for second-level testing, per 12-month period;
   ii) the fee does not apply to second-level testing of a cable modem model where the cable modem model fails second-level testing, to a maximum of two failures; and
   iii) cable modem testing failures, referenced in ii), shall not be considered the one free second-level testing, referenced in i), unless that cable modem model has already failed second-level testing twice.

3.2 Where it is apparent that an End-User's aerial drop requires replacement Shaw will undertake the required work without prior consultation with the Customer.

Item 103 Rates and Charges

Section 3 Service Elements

Rates and Charges for TPIA Service Elements				
		Monthly Rate	**Charge**	
Access Service Speed Bands				
Band 1: 0 Mbps to 10 Mbps Downstream and up to 1 Mbps Upstream		$9.34		
	Lite Speed (up to 1 Mbps download/256 Kbps upload) (Note 1)		n/a	
	Internet 5 (up to 5 Mbps download/512 Kbps upload)		n/a	
	High Speed (up to 7.5 Mbps download/512 Kbps upload) (Note 1)		n/a	
	High Speed 10 (up to 10 Mbps download/ 512 Kbps upload) (Note 3)		n/a

Item 105 Shaw's Internet Traffic Management Practices (ITMP)

Section 1 ITMP General

1.1 In accordance with Telecom Regulatory Policy CRTC 2009-657, Shaw's ITMPs are not approved by the CRTC and as such the information contained herein with regard to Shaw's ITMPs is provided for information purposes only.

1.2 To ensure the proportional use by all end-users and to maintain the integrity of the network, Shaw has implemented technical ITMPs that will apply equally to Shaw's own Retail IS End-Users and the End-Users of the Shaw TPIA Service.

1.3 Shaw's ITMPs were introduced to quickly address upstream congestion caused by some classes of applications while standard network expansion activities are undertaken to increase the bandwidth availability for all users.

1.4 In the event of upstream congestion on a serving area node, the amount of upstream bandwidth allotted to P2P applications completing non real-time file transfer activity within that serving area node may be reduced to 80 kbps per End-User. This could result in the upload of the non real-time P2P file transfer taking longer to complete than during times of non-congestion. Shaw's ITMPs are not applied to downstream data transfer, real-time interactive or time-sensitive Internet applications.

1.5 Prior to implementing new ITMPs or undertaking material changes to existing ITMPs, Shaw will provide the TPIA Customer with a minimum of sixty (60) days advance notice.

1.6 Shaw will not be required to provide advance notification of any changes to its ITMPs that are a matter of housekeeping or result in a less restrictive ITMP. In these situations the changes will be effective on the date Shaw provides notification to TPIA Customers.

1.7 Pursuant to paragraph 64 of Telecom Regulatory Policy CRTC 2009-657, TPIA Customers are required to provide information regarding technical ITMPs to their End-Users within thirty (30) days of Shaw issuing revised ITMP tariff pages, or where applicable, Commission approval of the tariff pages is granted.

1.8 If Shaw provides notification of changes in accordance with Item 1.6 above, TPIA Customers are required to provide notification of the changes to their customers as soon as reasonably possible.

1.9 Pursuant to paragraph 104 of Telecom Regulatory Policy CRTC 2009-657, any End-User personal information collected by TPIA Customers for the purpose of traffic management cannot be used for other purposes or disclosed to other parties. The aggregated information may only be collected and used for the purposes of network planning and engineering of the network.

This is **Exhibit K** in support of the

Affidavit of Christopher Hickey,

solemnly affirmed before me on April 22, 2022

in accordance with O. Reg. 431/20, Administering Oath or Declaration Remotely

Geoff Batstone

ITEM
226 **Wholesale Internet ADSL Service**

ITEM
226.1 **Service Description**

Wholesale Internet ADSL Service is a broadband access service based on Asymmetric Digital Subscriber Line (ADSL) technology. This service will enable a Service Provider to establish a high speed data access path between its End-user's premises and the Company's Serving Central Office.

Wholesale Internet ADSL Service uses available bandwidth above the voice-band on the same local loop used by the Company or a CLEC to provide residential or business Primary Exchange Service to the End-user or on Dry Loops. The Service is limited to lines terminating on single line station equipment. ADSL Access Service allows for the simultaneous use of the End-user's telephone line for voice service.

Wholesale Internet ADSL Service:

- requires a Network-to-Network Interface ("NNI") which provides for the aggregation of End-user traffic associated with a single service provider from every ADSL-enabled wire centre in the Company's operating territory;

- provides ADSL access over End-user loops that qualify for ADSL service where the ADSL serving equipment is located either in a host wire centre or at a remote location (i.e., a location other than a host wire centre). In the case of a remote location, Wholesale Internet ADSL Service includes the facilities required to transport ADSL traffic between the remote location and the host wire centre that serves that remote location;

- supports Point to Point Protocol over Ethernet (PPPoE) or RFC 1483 Bridged sessions across the Company's backbone network (Note: Effective November 15, 2011, RFC 1483 Bridged Session is no longer available to new Customers);

- includes Permanent Virtual Circuits (PVC) to provide ATM network connectivity between ADSL Access arrangements and a NNI by aggregating traffic associated with each ADSL Access served from groups of wire centres to a Broadband Access Server (BAS) and subsequently aggregating such traffic from all Company-provided BAS to the ADSL NNI; and

- provides for a single domain name. Additional domain names are available upon request in accordance with the rates, terms and conditions below.

Connectivity between the ADSL NNI point of demarcation (located in a Company wire centre) and the Service Provider's Point of Presence (PoP) can be established using appropriate facilities provided by the Company or third party facility providers, or via central office links that terminate on the Service Provider's co-located transmission equipment.

ITEM
226 **Wholesale Internet ADSL Service**

ITEM
226.1 **Service Description**

ADSL VPOP Network-to-Network Interface Service

The ADSL VPOP Network-to-Network Interface Service ("A-NNI") provides an interconnection between the Company's Network and a Service Provider's Network. The interface options available are E100 or E1000. This interconnection allows the Service Provider to receive and transmit traffic that is supported by the Company's Network. These services are limited to Asymmetrical Digital Subscriber Line (ADSL). Such traffic will be exchanged in Point to Point Protocol over Ethernet (PPPoE). RFC 1483 and RFC 1490 bridged protocol data unit encapsulation formats are grandfathered and are not available for new customers. N

Because the Commission has forborne, in Telecom Regulatory Policy CRTC 2009-19, with respect to the regulation of this service as set out in that decision, the Company may also provide the service in this tariff at rates and on terms different from the tariffed rates and terms pursuant to an agreement entered into between the Company and a competitor that has been filed with the Commission for the public record. M

ITEM
226 **Wholesale Internet ADSL Service- Continued**

ITEM
226.1 **Service Description - Continued**

Definitions

"*Asymmetrical Digital Subscriber Line (ADSL)*" means a technology that delivers high-speed digital data-transmission downstream to an End-user at a higher bandwidth (higher-speed) and upstream to an ADSL Service Provider at a lower bandwidth (lower-speed), on a common copper individual access-line. This technology allows the End-user to receive high-speed digital data transmission and individual-line exchange service simultaneously on the same access-line.

ADSL VPOP Network-to-Network Interface (A-NNI) provides an interconnection between the Company's Network and a Service Provider's Network. N
|

"Customer" refers to a Service Provider.

"*Customer Cutover or Access Upgrade*" encompasses the case where a customer requires a larger bandwidth access at its Point of Presence (PoP) site to accommodate growth in end user traffic. The Customer may also be relocating its PoP site access or transferring all of its existing subscribers to a different access which does not necessarily require an upgrade in bandwidth.

"*Customer Name Change*" is when a Customer requests that its billing or company name to be changed to a different billing or official company name.

"*Dry Loop*" is an unbundled local loop which is not used for primary exchange service.

"DSLSP" is a provider of Digital Subscriber Line-based applications, such as high-speed Internet access and Local Area Network extensions, to the public for compensation. A DSLSP is not operating as a CLEC.

"*End-user*" is defined as being the Service Provider's customer.

"*Mergers and Acquisitions*" are when a Customer transfers a portion or all of its subscriber base to another Customer. This is also applicable when two different Customers are merging in order to become only one new company, or when a single company divides to become multiple companies.

"NNI" is a network-to-network interface as set out in Item 217, Network to Network Interface Service. C

"*Service Provider*" includes either a CLEC or a DSLSP.

"*Serving Central Office*" is the first Company Central Office that an End-user's premises is connected to.

"Voice Service" refers to services that use the voice-band portion of the local loop and includes voice transmission, permissive data or facsimile.

ITEM 226 **Wholesale Internet ADSL Service- Continued**

ITEM 226.2 **Conditions of Service**

1. Wholesale Internet ADSL Service is available only from suitably equipped Company Central Offices as determined by the Company and shall be provided subject to the availability of suitable equipment and facilities as determined by the Company.

2. Wholesale Internet ADSL will only be provisioned over Company-owned loops used by the Company to provide Primary Exchange Service, unbundled local loops which are owned by the Company and used by a CLEC to provision voice services or Company-owned Dry Loops.

3. Where Wholesale Internet ADSL service is provisioned over Company-owned Dry Loops, the Customer will be required to lease the Type A unbundled loop under the terms and conditions specified in the former TCI Carrier Access Tariff (CRTC 18008), Item 215, Local Network Interconnection and Component Unbundling (in Alberta), or TCBC Carrier Access Tariff (CRTC 1017), Item 105, Local Network Interconnection and Component Unbundling (in British Columbia). Monthly rates are in Item 226.3 c. C | | | | D ||

4. The Company will not offer additional services to the End-Users over an unbundled local loop being used by a competitor for the Wholesale Internet ADSL Service when it is provided over Dry Loops.

5. The loop facility to the End-user must qualify for Wholesale Internet ADSL Service.

6. The point of demarcation for Wholesale Internet ADSL Service is as defined in Item 217, Network to Network Interface Service. The point of demarcation for E100 and E1000 A-NNI service provided in this tariff is the Ethernet patch panel.

7. The Company is not responsible for inside wiring charges beyond the End-user's customer demarcation point.

8. The ADSL equipment is subject to operational constraints related to the characteristics of the underlying loop facility. Wholesale Internet ADSL Service is offered on a best-effort basis. Service Providers may use Wholesale Internet ADSL Service to establish high-speed connections to only those End-user premises located within the operational range of the ADSL serving equipment associated with particular Company Serving Central Offices and suitably equipped remote locations. Service Providers may not use Wholesale Internet ADSL Service to establish high-speed connections to End-user premises located beyond the range of the ADSL serving equipment or served by the Company or CLEC voice service having excessive bridge taps, equipped with load coils or which is not capable of supporting metallic continuity.

9 One ADSL Access is required for each End-user.

10. The NNI is provided in Item 217, Network to Network Interface Service. Service Providers may use the NNI in Item 217 for all of the traffic types listed in Item 217.1.

ITEM
226 **Wholesale Internet ADSL Service- Continued**

ITEM
226.2 **Conditions of Service – Continued**

11. A-NNI Service is provided under the terms and conditions in this Tariff Item. Service Providers may only use A-NNI Service for ADSL VPOP traffic. N

11A. A-NNI is available in designated Central Offices and shall be provided subject to the availability of suitable equipment and facilities. The Company shall determine the Company Central Office(s) from which A-NNI shall be provided. Not all Company Central Offices with A-NNI are capable of provisioning every A-NNI interface option. If suitable equipment and/or facilities are not available for certain interface option, the Company will not provision that particular A-NNI option.

11B. The provision of A-NNI is subject to the ability of the Company and the Service Provider to satisfactorily test and exchange data using the standards stated in section 226.1.

11C. When it is necessary for the Company to install special equipment or to incur an unusual expense to establish A-NNI, the Service Provider shall pay an additional charge based on the equipment installed or the unusual expense incurred.

11D. A-NNI Service may be connected to Service Provider equipment using either Co-location, or an access service configuration for E100 or E1000 service. (NOTE: The E1000 interface only supports Internet ADSL Services in Edmonton, Calgary and the Lower Mainland.)

11E. In the Co-location configuration, the Service Provider must subscribe to Co-location, where applicable; obtain a Company Ethernet CO Link, provided under Tariff Item 221; provide its own fibre-patch panel, as well as the connection between the patch panel and its equipment. In Alberta, Co-location is provided under Carrier Access Tariff (CRTC 18008), Item 255 or 250. In British Columbia, Co-location is provided under Carrier Access Tariff (CRTC 1017), Item 110.

11F. In the access service configuration, the Service Provider must subscribe to the Company's Ethernet Access Service, provided under General Tariff (CRTC 21461) Item 519, as well as an Ethernet CO Link.

11G. In the event that the Service Provider wishes to relocate A-NNI service location(s) or change A-NNI service speeds, the Service Provider will be required to pay the A-NNI change fee specified in Item 226.3b.

12. The Customer is responsible for managing the capacity of the NNI. The Company is not responsible for any service deterioration or packet loss due to the Customer over utilization of the NNI. F

ITEM
226 **Wholesale Internet ADSL Service- Continued**

ITEM
226.2 **Conditions of Service – Continued**

13. When Wholesale Internet ADSL Service is used by a service provider to provide services to its customers, the service provider shall abide by the conditions set out in the Resale and Sharing tariff (CRTC 21461, Item 410), as applicable. N

14. If an End-user cancels its Company or CLEC provided voice service or if it is otherwise removed from service, billing for Wholesale Internet ADSL Service will continue until the Company has been notified by the Service Provider that Wholesale Internet ADSL Service is to be terminated.

15. Where the End-user's voice service, as provided by the Company or a CLEC, currently meets the Company's technical requirements for Wholesale Internet ADSL Service, in particular metallic continuity, the Company will provide the Service Provider with a minimum of one year's advance notice of any facility change that would eliminate metallic continuity on that End-user's loop.

16. Service Providers subscribing to Wholesale Internet ADSL Service will be responsible for obtaining the following elements required to make the service operational:

    a. RADIUS Server;

    b. IP address assignment and Internet access;

    c. ADSL or other compatible high speed modem, subject to the Company's acceptance;

ITEM
226 **Wholesale Internet ADSL Service- Continued**

ITEM
226.2 **Conditions of Service - Continued**

d. any PC connectivity equipment/software and IP address configuration for the End user's PC;

e. Filters – In some circumstances, End-users may detect audible noise on their telephone line following the installation of the modem, necessitating the use of voice/data filters installed directly in the telephone jack;

f. ATM or Ethernet connectivity between the Company's broadband network and service provider's PoP; and

g. Client software required in the End-user's PC to enable a PPPoE connection through the network to the End-user's desired ISP

17. Equipment attached to the Company's network at the End-user's premises must be certified or connected through a certified network protection device in accordance with the former TCI General tariff (CRTC 18001) Item 110 (Attachments) in Alberta, or TCBC General Tariff (CRTC 1005) Item 170 (Interconnection Services – General) in British Columbia, as applicable.

ITEM
226 **Wholesale Internet ADSL Service- Continued**

ITEM
226.2 **Conditions of Service – Continued**

18. The Maximum Line Speeds available under ADSL Access Service are as follows:

a. 1 Mbps Service (Residential End-users only)
Up to 1 Mbps downstream
Up to 256 Kb/s upstream

b. 1.5 to 6.0 Mbps Service (Residential and Business End-users)
Up to 6.0 Mbps downstream
Up to 1.0 Mbps upstream

c. 15 Mbps Service (Residential and Business End-users) – see condition 19
Up to 15 Mbps downstream
Up to 1.0 Mbps upstream

d. 25 Mbps Service (Residential and Business End-users) – see condition 19
Up to 25 Mbps downstream
Up to 2.5 Mbps upstream (Residential) and up to 5.0 Mbps (Business)

d. 50 Mbps Service (Residential and Business End-users) – see condition 19
Up to 50 Mbps downstream
Up to 10 Mbps upstream

e. 75 Mbps Service (Residential and Business End-users) – see condition 19
Up to 75 Mbps downstream
Up to 15 Mbps upstream

f. 100 Mbps Service (Business End-users) – see condition 19
Up to 100 Mbps downstream
Up to 20 Mbps upstream

g. 150 Mbps Service (Residential and Business End-users) – see condition 19 N
Up to 150 Mbps downstream |
Up to 25 Mbps upstream |

Many factors affect speeds and actual speeds may vary and are not guaranteed.

Residential and Business End-user classifications are in accordance with CRTC 18001, Item 425 and, CRTC 1005, Item 26.

19. 15 Mbps, 25 Mbps, 50 Mbps, 75 Mbps, 100 Mbps and 150 Mbps services are only supported on Point to Point Protocol over Ethernet (PPPoE) network connections. C
20. Wholesale Internet ADSL service does not support the routing or transmission of multicasting traffic.
21. Wholesale Internet ADSL service does not support the sharing of modems between the Company and the Wholesale Internet ADSL service customer.

ITEM 226 **Wholesale Internet ADSL Service – Continued**

ITEM 226.2 **Conditions of Service – Continued**

22. As a condition of service under this tariff, and in accordance with *Review of the Internet traffic management practices of Internet service providers*, Telecom Regulatory Policy CRTC 2009-657 ("TRP 2009 -657"), paragraphs 50, 66 and 104, customers employing Internet Traffic Management Practices (ITMPs) shall:

    a.) whether or not they are Canadian carriers, abide by the requirements of subsection 27 (2) of the *Telecommunications Act* with regard to any ITMPs they employ;
    b.) abide by the disclosure requirements described in TRP 2009-657; and
    c.) not use for other purposes personal information collected for the purposes of traffic management and not disclose such information.

23. The Customer is responsible for the installation, operation and maintenance of any equipment, apparatus or devices that the Customer or end-user provides and which is attached or connected to or used with the Company's facilities and or equipment. When, as a result of a service issue raised by the Customer to TELUS and at the request of the Customer to test the services provided by the Company, the Company completes testing activities and finds that there is no fault in the Company's facilities; or when a truck roll is required to an end-users premises and no trouble is found in the Company's facilities and/or equipment but such trouble continues to be present when the Customer-provided equipment is reconnected to the Company's facilities and or equipment, a charge as specified in CRTC 18002 Item 1820.3 (for Alberta) and CRTC 1005 Item 170.10 and Item 170.12 (for British Columbia) applies. If however, within a one week period, testing activities identify a fault with the Company's facilities, no charge will apply.

24. The rates, terms and conditions identified herein supersede and replace any rates, terms and conditions in contracts for similar services entered into prior to the approved effective date of this Tariff Item.

25. Wholesale Internet ADSL services are only available on the Company's fibre to the node facilities. Wholesale Internet ADSL services are not available on the Company's fibre to the premises facilities.

26. If an End-user chooses to receive Internet service from the Wholesale Internet ADSL service customer and IPTV service from the Company, and a second loop is available, the Wholesale Internet ADSL service customer shall pay the unbundled loop rates and charges set out in TCI Carrier Access Tariff (CRTC 18008), Item 215, Local Network Interconnection and Component Unbundling (in Alberta), or TCBC Carrier Access Tariff (CRTC 1017), Item 105, Local Network Interconnection and Component Unbundling (in British Columbia). If a second loop is not available, a bonded configuration of Wholesale Internet ADSL service will not be provided.

MM – Moved from page 226-7

ITEM 226.3

Rates (Note 6)

The following rates and charges apply to the various components of the service:

a. Monthly Access and Service Charges (Notes 2, 4, 5)

Residential ADSL Access Service (Note 1)	Monthly Rate	Service Charge	
1 Mbps Service, per access	$17.40	$70.56	
1.5 to 6.0 Mbps Service, per access	19.18	70.56	
10 to 19 Mbps Access Service Speed Band	20.21	70.56	R
15 Mbps Service, per access			
20 to 29 Mbps Access Service Speed Band	21.90	70.56	|
25 Mbps Service, per access			
30 to 69 Mbps Access Service Speed Band	24.34	70.56	|
50 Mbps Service, per access			
30 to 69 Mbps Access Service Speed Band - Bonded	34.40	70.56	|
50 Mbps bonded Service, per access (Note 3)			
70 to 100 Mbps Access Service Speed Band	29.05	70.56	|
75 Mbps Service, per access			
70 to 100 Mbps Access Service Speed Band - Bonded	37.38	70.56	|
75 Mbps bonded Service, per access (Note 3)			
101 to 150 Mbps Access Service Speed Band - Bonded	57.66	70.56	|
150 Mbps bonded Service, per access (Note 3)			

Business ADSL Access Service (Note 1)	Monthly Rate	Service Charge	
1.5 to 6.0 Mbps Service, per access	$19.18	$70.56	
10 to 19 Mbps Access Service Speed Band	20.21	70.56	|
15 Mbps Service, per access			
20 to 29 Mbps Access Service Speed Band	21.90	70.56	|
25 Mbps Service, per access			
30 to 69 Mbps Access Service Speed Band	24.34	70.56	|
50 Mbps Service, per access			
30 to 69 Mbps Access Service Speed Band - Bonded	34.40	70.56	|
50 Mbps bonded Service, per access (Note 3)			
70 to 100 Mbps Access Service Speed Band	29.05	70.56	|
75 Mbps Service, per access			
70 to 100 Mbps Access Service Speed Band - Bonded	37.38	70.56	|
75 Mbps bonded Service, per access (Note 3)			
100 Mbps bonded Service, per access (Note 3)			
101 to 150 Mbps Access Service Speed Band - Bonded	57.66	70.56	|
150 Mbps bonded Service, per access (Note 3)			

ITEM
226.3 **Rates**

Note 1: Residential and Business End-user classifications are in accordance with CRTC 18001, Item 425 and, CRTC 1005, Item 26. M

Note 2: A minimum charge of one month will be applied for all Wholesale Internet ADSL Service Accesses that are disconnected within one month of installation.

Note 3: Bonded configuration uses two copper pairs or dry loops. Refer to Conditions of Service **-** Item 226.2.2 and 2.26.3 for additional information.

Note 4: Refer to the available Maximum Line Speeds specified in the Conditions of Service – Item 226.2.18

Note 5: Various Access Service Speed Bands with similar costs are grouped in a band and an access rate would apply for a specific access speed service within each band, pursuant to Telecom Decision CRTC 2016-117.

Note 6: Telecom Order 2019-288 has been stayed by the Federal Court of Appeal so the interim rates (and interim tariff) remains in effect.

d. Other Fees Associated with Wholesale Internet ADSL Service: C

i) *ADSL CO Access Fees*: Two fee options are available to the Customer. The first fee option is applied on a per CO basis as these are activated by the customer. The second fee option provides for the activation of all serving areas in the Company's territory.

ii) *Multiple Domain Names*: One time rates apply for programming the Broadband Access Server (BAS), on the same PVC, with the first additional domain name and subsequent additional domain names on the same order.

iii) *Administration Fees*: Administration Fees provide for business office work that is required to perform the following functions: Customer Name Change, Mergers and Acquisitions and Customer Cutover or Access upgrades, including Access speed changes for End-users.

iv) *ADSL Access PVC Administration Fee*: The Wholesale Internet ADSL PVC Administration Fee addresses the work required to remap PVCs from each of the Company's BASs to the Customer's PoP site allowing for end user authentication. The number of PVCs is dependent upon the number and specific location of the serving areas the Customer has chosen to offer service. As larger urban centres require more BASs, this translates into higher numbers of PVCs that may be impacted by mergers and acquisitions, customer cutover or access upgrades and potentially name changes.

Other Fees Associated with ADSL Access Service	Contract Period Rate per month		Rate ($)
