(1) Costs incurred to obtain or fulfill a contract with a customer are capitalized and subsequently amortized as an expense over the average life of a customer.

(2) As described in the revenue and expenses accounting policy detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2018, these amounts relate to the current portion of wireless handset receivables.

6. SHORT-TERM BORROWINGS

Effective May 29, 2019, the Company amended the terms of its accounts receivable securitization program to extend the term of the program to May 29, 2022 and increase the sales committed up to a maximum of $200 million.

A summary of our accounts receivable securitization program is as follows:

	May 31, 2019	August 31, 2018
Trade accounts receivable sold to buyer as security	**403**	429
Short-term borrowings from buyer	**(40)**	(40)
Over-collateralization	**363**	389

	Three months ended May 31,		Nine months ended May 31,

[all amounts in millions of Canadian dollars, except share and per share amounts]

10. INCOME TAXES

On May 28, 2019, the Alberta government passed Bill 3, the Job Creation Tax Cut, which will reduce the Alberta provincial corporate tax rates from 12% to 8% in a phased approach between July 1, 2019 and January 1, 2022. As these changes were considered substantively enacted on May 28, 2019, we recognized a $102 recovery of deferred tax for the three months ended May 31, 2019 related to this change.

(1) Long-term debt is presented net of unamortized discounts and finance costs.
(2) Current portion of long-term debt includes amounts due within one year in respect of senior notes due October 1, 2019 and the Burrard Landing loans.

On November 2, 2018, the Company issued $500 senior notes at a rate of 3.80% due November 2, 2023 and $500 senior notes at a rate of 4.40% due November 2, 2028.

On November 21, 2018, the Company amended the terms of its bank credit facility to extend the maturity date to December 2023.

On December 4, 2018, the Company entered into new unsecured letter of credit facilities, under which letters of credit were issued in favour of and filed with Innovation, Science and Economic Development Canada ("ISED") to fulfill the pre-auction financial deposit requirement with respect to its application to participate in the 600 MHz spectrum auction which occurred during the period from March 14, 2019 to April 10, 2019. The Company's wireless subsidiary, Freedom Mobile Inc., successfully acquired 11 paired blocks of 20-year 600 MHz spectrum, across its wireless operating footprint, for a total price of $492. In accordance with 600 MHz auction terms, 20% ($98) was paid to ISED on April 26, 2019 and the remaining 80% balance ($394) was paid on May 24, 2019. As of May 31, 2019, all of the letters of credit were cancelled and the unsecured letter of credit facilities were all terminated.

16. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at cost. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

The carrying values and estimated fair values of long-term debt are as follows:

	May 31, 2019		August 31, 2018	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**5,307**	**5,933**	4,311	4,788

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

17. INVESTMENTS AND OTHER ASSETS

	May 31, 2019	August 31, 2018
Publicly traded companies	–	615
Investments in private entities	**37**	45
	37	660

During the three months ended May 31, 2019, the Company disposed of a portfolio investment with a book value of $10 for proceeds of $25.

Corus Entertainment Inc.

On May 31, 2019, the Company sold all of its 80,630,383 Class B non-voting participating shares of Corus at a price of $6.80 per share. Proceeds, net of transaction costs were $526, which resulted in a loss of $109 for the three and nine months ended May 31, 2019.

The Company's weighted average ownership of Corus for the nine months ended May 31, 2019 was 38% (2018 – 39%). For the three and nine months ended May 31, 2019, the Company received dividends of $5 (2018 - $23) and $10 (2018 - $69) from Corus, respectively.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

Summary financial information for Corus through the disposal date is as follows:

Summarized statement of earnings of Corus:

	Three months ended May 31,		Nine months ended May 31,	
	2019	2018	**2019**	2018
Revenue	**458**	441	**1,310**	1,268
Net income attributable to:				
Shareholders	**66**	(936)	**133**	(818)
Non-controlling interest	**7**	7	**19**	20
	73	(929)	**152**	(798)
Other comprehensive income (loss), attributable to shareholders	**(24)**	5	**(40)**	18
Comprehensive income	**49**	(924)	**112**	(780)
Equity income from associates, excluding goodwill impairment	**20**	25	**46**	71
Impairment of investment in associate[(1)]	**–**	(284)	**–**	(284)
Equity income from associates[(2)]	**20**	(259)	**46**	(213)
Other comprehensive income (loss) from equity accounted associates[(2)]	**(7)**	2	**(13)**	7
	13	(257)	**33**	(206)

(1) The Company assessed its investment in Corus for indicators of impairment, which included a significant and sustained decrease in the share price as well as the recording by Corus of an impairment charge against their goodwill and broadcast license intangibles, and found that there was evidence that impairment had occurred. The Company compared the recoverable amount to the carrying value and determined that an impairment charge of $284 million was required. The recoverable amount was determined based on the value in use of the investment.

(2) The Company's share of income and other comprehensive income reflect the weighted average proportion of Corus net income and other comprehensive income attributable to shareholders for the three and nine month periods ended May 31, 2019 and 2018.

Carrying amount at August 31, 2018	**615**
Share of equity at disposition date	**46**
Share of other comprehensive income (loss) of associates	**(13)**
Dividends received to disposition date	**(10)**
Carrying value at disposition date	**638**
Proceeds on disposal, net of transaction costs	**526**
Reclassification of accumulated gain from other comprehensive income related to the sale of an associate	**(3)**
Loss on sale of investment	**109**

18. INTANGIBLES AND GOODWILL

In April 2019, the Company acquired 11 paired blocks of 20-year 600 MHz spectrum, across its wireless operating footprint, for a total price of $492 million. The spectrum acquisition rights secured through the auction include 30 MHz across each of British Columbia, Alberta and Southern Ontario as well as 20 MHz in Eastern Ontario.

The purchase was funded from cash on hand.

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2019 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2019 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2019 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2019 would not result in any impairment loss.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

Any changes in economic conditions since the impairment testing conducted as at February 1, 2019 do not represent events or changes in circumstance that would be indicative of impairment at May 31, 2019.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2019, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal operating income before restructuring costs and amortization multiple
Cable	6.5%	1.5%	7.4X
Satellite	7.5%	-3.0%	5.4X
Wireless	9.3%	1.0%	4.5X

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal operating income before restructuring costs and amortization multiple
Cable	16.4%	14.2%	4.8%
Satellite	8.1%	9.7%	5.6%
Wireless	15.2%	7.7%	8.0%

19. RELATED PARTY TRANSACTIONS

On May 15, 2019, the Company completed the sale of a non-core parcel of land and the building located thereon (the "Property"), to an affiliate of Shaw Family Living Trust ("SFLT") (the "Purchaser"), for total net proceeds of approximately $45. The Property had a net book value of approximately $4 resulting in a gain on disposition of approximately $41. The purchase price was determined based on appraisals performed by two independent valuators. As part of the transaction, the Purchaser agreed to lease back the Property to the Company for a term of three years at market rental rates (which was also based on appraisals from the two independent valuators) allowing the Company to monetize a non-core asset. The transaction was approved by the independent Board members of the Company.

This is Exhibit 35 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange ("TSX"), TSX Venture Exchange ("TSXV") and New York Stock Exchange ("NYSE") (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in compliance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB").

The condensed interim consolidated financial statements of the Company for the three and six months ended February 29, 2020 were authorized for issue by the Board of Directors on April 9, 2020.

a) Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2019 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

Certain comparative figures have been reclassified to conform to the current period's presentation.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2019.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements except as noted below.

b) New accounting standards

We adopted the following new accounting standards effective September 1, 2019.

- IFRS 16 *Leases* was issued on January 2016 and replaces IAS 17 *Leases*. The new standard requires entities to recognize lease assets and lease obligations on the balance sheet. For lessees, IFRS 16 removes the classification of leases as either operating leases or finance leases, instead requiring that leases be capitalized by recognizing the present value of the lease payments and showing them

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

as lease assets (right-of-use assets) and representing the right to use the underlying leased asset. If lease payments are made over time, the Company recognizes a lease liability representing its obligation to make future lease payments. Certain short-term leases (less than 12 months) and leases of low value may be exempted from the requirements and may continue to be treated as operating leases if certain elections are made. Lessors will continue with a dual lease classification model. Classification will determine how and when a lessor will recognize lease revenue, and what assets would be recorded.

As a result of adopting IFRS 16, the Company recognized a significant increase to both assets and liabilities on our Consolidated Statements of Financial Position as well as a decrease to operating costs, as a result of removing the lease expense, an increase to depreciation and amortization, due to the depreciation of the right-of-use asset, and an increase to finance costs, due to the accretion of the lease liability. Relative to the results of applying the previous standard, although actual cash flows are unaffected, the Company’s statement of cash flows will reflect increases in cash flows from operating activities offset equally by decreases in cash flows from financing activities.

Implementation
We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented are not restated. We recognized lease liabilities at September 1, 2019 for leases previously classified as operating leases, measured at the present-value of the lease payments using our incremental borrowing rate at that date, with the corresponding right-of-use asset generally measured at an equal amount, adjusted for any prepaid or accrued rent outstanding as at August 31, 2019.

As permitted by IFRS 16, we applied certain practical expedients to facilitate the initial adoption and ongoing application of IFRS 16 including the following:
- not separate fixed non-lease components from lease components for certain classes of underlying assets. Each lease component and any associated non-lease components will be accounted for as a single lease component;
- apply a single discount rate to a portfolio of leases with similar characteristics;
- exclude initial direct costs from measuring the right-of-use asset as at September 1, 2019; and
- use hindsight in determining the lease term where the contract contains purchase, extension, or termination options.

On transition, we have not elected the recognition exemptions on short-term leases or low-value leases; however, we may choose to elect these recognition exemptions on a class-by-class basis for new classes and on a lease-by-lease basis, respectively, in the future.

In December 2019, the IFRS Interpretations Committee issued a final agenda decision in regards to the determination of the lease term for cancellable or renewable leases under IFRS 16. The Company is currently assessing the impact of this interpretation on its financial.

There was no significant impact for contracts in which we are the lessor.

(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

- IFRIC 23 *Uncertainty over Income Tax Treatments* was issued in 2017 to clarify how to apply the recognition and measurement requirements in IAS 12 *Income Taxes* when there is uncertainty over income tax treatments. It was required to be applied for annual periods commencing January 1, 2019, which for the Company was the annual period commencing September 1, 2019. The cumulative effect of the initial application of the new standard has been reflected as an adjustment to retained earnings at September 1, 2019. Refer to "Transition adjustments" below for details.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

Prior to adopting IFRS 16, our total minimum operating lease commitments as at August 31, 2019 was $919 million. The weighted average discount rate applied to the total lease liabilities was 3.50% at September 1, 2019. The difference between the total of the minimum lease payments set out in Note 27 in our 2019 Audited Financial Statements and the total lease liability recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at August 31, 2019;
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts, but which do not qualify to be accounted for as a lease liability, such as variable lease payments not tied to an index or rate.

d) Fiscal 2019 Accounting Policies Updated for IFRS 16

Leases

The following accounting policy applies as of September 1, 2019 following the adoption of IFRS 16. Prior to September 1, 2019, IAS 17 was applied as disclosed in the Company's 2019 annual consolidated financial statements, as permitted by transition provisions of IFRS 16.

Leases are typically entered into for network infrastructure and equipment, including transponders, and land and buildings relating to the Company's wireless and wireline networks, office space and retail stores. At inception of a contract, the Company assesses whether the contract contains a lease. A lease contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

Lease liabilities are initially measured at the present value of future lease payments at the commencement date, discounted using the interest rate implicit in the lease or, if not readily determinable, the Company's incremental borrowing rate. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Lease payments included in the measurement of the lease liability are comprised of:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or rate;
- Amounts expected to be payable under a residual value guarantee; and
- Payments relating to purchase options and renewal option periods that are reasonably certain to be exercised, or periods subject to termination options that are not reasonably certain to be exercised.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

The initial lease term included in the measurement of the lease liability is comprised of:

- The non-cancellable period of the lease;
- Periods covered by options to extend the lease, where the Company is reasonably certain to exercise the option; and
- Periods covered by options to terminate the lease, where the Company is reasonably certain not to exercise the option.

Lease liabilities are subsequently measured at amortized cost. Lease liabilities are remeasured when there is a lease modification, and a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The interest expense for lease liabilities is recorded in *Interest expense* in the Consolidated Statements of Income.

Variable lease payments that do not depend on an index or rate are not included in the measurement of lease liabilities and right-of-use assets. The related payments are expensed in *Operating, general and administrative expenses* in the period in which the event or condition that triggers those payments occurs.

Right-of-use assets are initially measured at cost, which comprises the initial amount of the lease obligation adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The Company presents right-of-use assets in *Property, plant and equipment.*

If we obtain ownership of the leased asset by the end of the lease term or the costs of the right-of-use asset reflects the exercise of a purchase option, we depreciate the right-of-use asset from the lease commencement date to the end of the useful life of the underlying asset. Otherwise, right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life or the end of the lease term. Right-of-use assets are periodically reduced by impairment losses, if any, and adjusted for certain remeasurements on the related lease liability. The depreciation charge for right-of-use assets is recorded in *Amortization – Property, plant and equipment.*

Significant Judgments and Estimates

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets. These include determining whether a contract contains a lease, determining the contract term, including whether or not to exercise renewal or termination options, and determining the interest rate used for discounting future cash flows.

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Chief Executive Officer, the President and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, Wi-Fi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended		Six months ended	
	February 29, 2020	February 28, 2019	**February 29, 2020**	February 28, 2019

Amortization	**(300)**	(264)	**(603)**	(526)
Operating income	**300**	284	**585**	565
Current taxes				
Operating	**22**	35	**54**	70
Other/non-operating	**1**	7	**5**	7
	23	42	**59**	77

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses. We previously referred to this measure as "Operating income before restructuring and amortization" but have renamed it to better align with language used by various stakeholders of the Company.

5. LEASE LIABILITIES

Below is a summary of the activity related to the Company's lease liabilities for the six months ended February 29, 2020.

	2020
Balance as at September 1, 2019	1,324
Net additions	**38**
Interest on lease liabilities	**22**
Interest payments on lease liabilities	**(22)**
Principal payments of lease liabilities	**(57)**
Other	**-**
Balance as at February 29, 2020	**1,305**
Current	113
Long-term	1,211
Balance as at September 1, 2019	1,324
Current	**114**
Long-term	**1,191**
Balance as at February 29, 2020	**1,305**

6. SHORT-TERM BORROWINGS

	February 29, 2020	August 31, 2019
Credit facility	**55**	-
Accounts receivable securitization program	**200**	40
	255	40

During the period, the Company borrowed US$34 million (CAD$45 million) and CAD$10 million on its bank credit facility. Concurrent with the borrowings, the Company entered into a cross-currency interest rate swap to reduce the interest cost associated with the borrowings under the credit facility. This swap was not designated as a hedge for accounting purposes. Refer to Note 15 – Fair Value for additional details on this arrangement.

A summary of our accounts receivable securitization program is as follows:

	February 29, 2020	August 31, 2019
Trade accounts receivable sold to buyer as security	**437**	434
Short-term borrowings from buyer	**(200)**	(40)

(1) Long-term debt is presented net of unamortized discounts and finance costs.

(2) Current portion of long-term debt includes amounts due within one year in respect of senior notes due October 1, 2019 and the Burrard Landing loans.

On October 1, 2019, the Company repaid $1,250 of 5.65% senior notes at their maturity.

On November 21, 2019, the Company amended the terms of its bank credit facility to extend the maturity date to December 2024.The facility can be used for working capital and general corporate purposes.

On December 9, 2019 the Company issued $800 of senior notes, comprised of $500 principal amount of 3.30% senior notes due 2029 and $300 principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792, along with cash on hand, were used to fund the redemption of the $500 principal amount of 5.50% senior notes due 2020 and the $300 principal amount of 3.15% senior notes due 2021.

On December 24, 2019, the Company redeemed the $500 principal amount of 5.50% senior notes due December 7, 2020 and the $300 principal amount of 3.15% senior notes due February 19, 2021. In conjunction with the redemption, the Company paid make whole premiums of $17 and accrued interest of $5.

Shares repurchased	-	-	(3,964,730)	(35)	-	-	-	-
February 29, 2020	**22,372,064**	**2**	**492,115,775**	**4,318**	**10,012,393**	**245**	**1,987,607**	**48**

Normal Course Issuer Bid

On October 29, 2019, the Company announced that it had received approval from the Toronto Stock Exchange (“TSX”) to establish a normal course issuer bid (“NCIB”) program. The program commenced on November 1, 2019 and will remain in effect until October 31, 2020. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,758,127 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 18, 2019.

During the six months ended February 29, 2020, the Company purchased 3,964,730 Class B Non-Voting Shares for cancellation for a total cost of approximately $105 under the NCIB. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $70 and was charged to retained earnings.

From March 1, 2020 to March 31, 2020, the Company purchased an additional 1,191,173 Class B Non-Voting Shares for cancellation for a total cost of approximately $25 under the NCIB.

Dividend Reinvestment Plan

On October 24, 2019, in accordance with the terms of our Dividend Reinvestment Plan (the “DRIP”), the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Non-Voting Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Non-Voting Shares delivered under the DRIP. These changes to the DRIP were applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019.

Issuance of Class B Non-Voting Shares:				
Dividend reinvestment plan	**-**	54	**37**	107

15. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 29, 2020 and February 28, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	February 29, 2020		August 31, 2019	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,051**	**4,839**	5,308	6,014

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

During the quarter, the Company entered into a cross-currency interest rate swap with a member of the Company's lending syndicate with a notional amount of $34 USD for a term of one month. The swap requires that funds are exchanged back in one month at the same terms unless both parties agree to extend the swap for an additional month. By borrowing in US dollars, the Company may access lower interest rates. The swap mitigates the risk of changes in the value of the US Dollar LIBOR borrowings as it will be exchanged for the same Canadian equivalent in one month. The swap is not designated as a hedge for accounting purposes. The fair value of this cross-currency interest rate swap at February 29, 2020 is $nil and is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

[all amounts in millions of Canadian dollars, except share and per share amounts]

16. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2020 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2020 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2020 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2020 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2020 do not represent events or changes in circumstance that would be indicative of impairment at February 29, 2020.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2020, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	**Terminal growth rate**	**Terminal adjusted EBITDA multiple**
Cable	6.0%	0.5%	8.0x
Satellite	7.0%	-4.0%	6.7x
Wireless	7.0%	1.0%	5.3x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

Satellite	7.8%	5.5%	7.4%
Wireless	18.2%	10.1%	9.4%

17. SUBSEQUENT EVENTS

Subsequent to February 29, 2020, the World Health Organization (WHO) declared COVID-19 a pandemic. In response to the WHO declaration and continuing spread of COVID-19, several social distancing measures taken by the Company and third parties including governments, regulatory authorities, businesses and our customers that could negatively impact the Company's operations and financial results in future periods. Given the unprecedented and pervasive impact of changing circumstances surrounding the COVID-19 pandemic, there is inherently more uncertainty associated with our future operating assumptions and expectations as compared to prior periods. As such, it is not possible to estimate the impacts COVID-19 will have on the Company's financial position or results of operations in future periods. While the direct impacts of COVID-19 are not determinable at this time, the Company has available liquidity of $1.5 billion and a certain degree of flexibility in its operating and investing plans to mitigate the impacts of COVID-19. Subsequent to February 29, 2020, the Company drew an additional $200 under its credit facility to add to its existing cash balance as at February 29, 2020.

This is Exhibit 36 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange ("TSX"), TSX Venture Exchange ("TSXV") and New York Stock Exchange ("NYSE") (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in compliance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB").

The condensed interim consolidated financial statements of the Company for the three months ended November 30, 2019 were authorized for issue by the Audit Committee on January 12, 2020.

a) Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2019 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

Certain comparative figures have been reclassified to conform to the current period's presentation.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2019.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements except as noted below.

b) New accounting standards

We adopted the following new accounting standards effective September 1, 2019.

- IFRS 16 *Leases* was issued on January 2016 and replaces IAS 17 *Leases*. The new standard requires entities to recognize lease assets and lease obligations on the balance sheet. For lessees, IFRS 16 removes the classification of leases as either operating leases or finance leases, instead requiring that leases be capitalized by recognizing the present value of the lease payments and showing them as lease assets (right-of-use assets) and representing the right to use the underlying leased asset. If lease payments are made over time, the Company recognizes a lease liability representing its obligation to make future lease payments. Certain short-term leases (less than 12 months) and leases of low-value may be exempted from the requirements and may continue to be treated as operating leases if certain elections are made. Lessors will continue with a dual lease classification model. Classification will determine how and when a lessor will recognize lease revenue, and what assets would be recorded.

As a result of adopting IFRS 16, the Company recognized a significant increase to both assets and liabilities on our Consolidated Statements of Financial Position as well as a decrease to operating costs, as a result of removing the lease expense, an increase to depreciation and amortization, due to the depreciation of the right-of-use asset, and an increase to finance costs, due to the accretion of the lease liability. Relative to the results of applying the previous standard, although actual cash flows are unaffected, the Company's statement of cash flows will reflect increases in cash flows from operating activities offset equally by decreases in cash flows from financing activities.

Implementation
We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented are not restated. We recognized lease liabilities at September 1, 2019 for leases previously classified as operating leases, measured at the present-value of the lease payments using our incremental borrowing rate at that date, with the corresponding right-of-use asset generally measured at an equal amount, adjusted for any prepaid or accrued rent outstanding as at August 31, 2019.

As permitted by IFRS 16, we applied certain practical expedients to facilitate the initial adoption and ongoing application of IFRS 16 including the following:

- not separate fixed non-lease components from lease components for certain classes of underlying assets. Each lease component and any associated non-lease components will be accounted for as a single lease component;
- apply a single discount rate to a portfolio of leases with similar characteristics;
- exclude initial direct costs from measuring the right-of-use asset as at September 1, 2019; and
- use hindsight in determining the lease term where the contract contains purchase, extension, or termination options.

On transition, we have not elected the recognition exemptions on short-term leases or low-value leases; however, we may choose to elect these recognition exemptions on a class-by-class basis for new classes and lease-by-lease basis, respectively, in the future.

There was no significant impact for contracts in which we are the lessor.

- IFRIC 23 *Uncertainty over Income Tax Treatments* was issued in 2017 to clarify how to apply the recognition and measurement requirements in IAS 12 *Income Taxes* when there is uncertainty over income tax treatments. It was required to be applied for annual periods commencing January 1, 2019, which for the Company was the annual period commencing September 1, 2019. The cumulative effect of the initial application of the new standard has been reflected as an adjustment to retained earnings at September 1, 2019. Refer to "Transition adjustments" below for details.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

Prior to adopting IFRS 16, our total minimum operating lease commitments as at August 31, 2019 was $919 million. The weighted average discount rate applied to the total lease liabilities was 3.50% at September 1, 2019. The difference between the total of the minimum lease payments set out in Note 27 in our 2019 Audited Financial Statements and the total lease liability recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at August 31, 2019;
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts but which do not qualify to be accounted for as a lease liability, such as variable lease payments not tied to an index or rate.

d) Fiscal 2019 Accounting Policies Updated for IFRS 16

Leases

The following accounting policy applies as of September 1, 2019 following the adoption of IFRS 16. Prior to September 1, 2019, IAS 17 was applied as disclosed in the Company's 2019 annual consolidated financial statements, as permitted by transition provisions of IFRS 16.

Leases are typically entered into for network infrastructure and equipment, including transponders, and land and buildings relating to the Company's wireless and wireline networks, office space and retail stores. At inception of a contract, the Company assesses whether the contract contains a lease. A lease contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

Lease liabilities are initially measured at the present value of future lease payments at the commencement date, discounted using the interest rate implicit in the lease or, if not readily determinable, the Company's incremental borrowing rate. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Lease payments included in the measurement of the lease liability are comprised of:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or rate;
- Amounts expected to be payable under a residual value guarantee; and
- Payments relating to purchase options and renewal option periods that are reasonably certain to be exercised, or periods subject to termination options that are not reasonably certain to be exercised.

The initial lease term included in the measurement of the lease liability is comprised of:

- The non-cancellable period of the lease;
- Periods covered by options to extend the lease, where the Company is reasonably certain to exercise the option; and
- Periods covered by options to terminate the lease, where the Company is reasonably certain not to exercise the option.

Lease liabilities are subsequently measured at amortized cost using the effective interest method. Lease liabilities are remeasured when there is a lease modification, and a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The interest expense for lease liabilities is recorded in *Interest expense* in the Consolidated Statements of Income.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

Variable lease payments that do not depend on an index or rate are not included in the measurement of lease liabilities and right-of-use assets. The related payments are expensed in *Operating, general and administrative expenses* in the period in which the event or condition that triggers those payments occurs.

Right-of-use assets are initially measured at cost, which comprises the initial amount of the lease obligation adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The Company presents right-of-use assets in *Property, plant and equipment.*

If we obtain ownership of the leased asset by the end of the lease term or the costs of the right-of-use asset reflects the exercise of a purchase option, we depreciate the right-of-use asset from the lease commencement date to the end of the useful life of the underlying asset. Otherwise, right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life or the end of the lease term. Right-of-use assets are periodically reduced by impairment losses, if any, and adjusted for certain remeasurements on the related lease liability. The depreciation charge for right-of-use assets is recorded in *Amortization – Property, plant and equipment.*

Significant Judgments and Estimates

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets. These include determining whether a contract contains a lease, determining the contract term, including whether or not to exercise renewal or termination options, and determining the interest rate used for discounting future cash flows.

(unaudited)

November 30, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Chief Executive Officer, the President and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, Wi-Fi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended November 30,	
	2019	2018
Revenue		
Wireline	**1,067**	1,083
Wireless	**318**	272
	1,385	1,355
Intersegment eliminations	**(2)**	(1)
	1,383	1,354
Adjusted EBITDA[1]		
Wireline	**517**	500
Wireless	**71**	44
	588	544
Restructuring costs	**-**	(1)
Amortization	**(303)**	(262)
Operating income	**285**	281
Current taxes		
Operating	**32**	50
Other/non-operating	**4**	(15)
	36	35

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses. We previously referred to this measure as "Operating income before restructuring and amortization" but have renamed it to better align with language used by various stakeholders of the Company.

(1) Long-term debt is presented net of unamortized discounts and finance costs.

(2) Current portion of long-term debt includes amounts due within one year in respect of senior notes due October 1, 2019 and the Burrard Landing loans.

On October 1, 2019, the Company repaid $1,250 of 5.65% senior notes at their maturity.

On November 21, 2019, the Company amended the terms of its bank credit facility to extend the maturity date to December 2024.The facility can be used for working capital and general corporate purposes.

Subsequent to quarter-end, on December 9, 2019 the Company issued $800 of senior notes, comprised of $500 principal amount of 3.30% senior notes due 2029 and $300 principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792, along with cash on hand, were used to fund the redemption of the $500 principal amount of 5.50% senior notes due 2020 and the $300 principal amount of 3.15% senior notes due 2021.

On December 24, 2019, the Company redeemed the $500 principal amount of 5.50% senior notes due December 7, 2020 and the $300 principal amount of 3.15% senior notes due February 19, 2021. In conjunction with the redemption, the Company paid make whole premiums of $17 and accrued interest of $5.

Normal Course Issuer Bid

On October 29, 2019, the Company announced that it had received approval from the Toronto Stock Exchange (“TSX”) to establish a normal course issuer bid (“NCIB”) program. The program commenced on November 1, 2019 and will remain in effect until October 31, 2020. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,758,127 Class B Shares representing 5% of all of the issued and outstanding Class B Shares as at October 18, 2019.

During the three months ended November 30, 2019, the Company purchased 919,731 Class B Non-Voting Shares for cancellation for a total cost of approximately $25 under the NCIB. The average book value of the shares repurchased was $8.78 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $17 and was charged to retained earnings.

From December 1, 2019 to December 31, 2019, the Company purchased an additional 938,273 Class B Non-Voting Shares for cancellation for a total cost of approximately $25 under the NCIB.

Dividend Reinvestment Plan

On October 24, 2019, in accordance with the terms of our Dividend Reinvestment Plan (the “DRIP”), the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Shares delivered under the DRIP. These changes to the DRIP were applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019.

10. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended November 30,	
	2019	2018
Numerator for basic and diluted earnings per share ($)		
Net income	**162**	186
Deduct: dividends on Preferred Shares	**(2)**	(2)
Net income attributable to common shareholders	**160**	184
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Non-Voting Shares for basic earnings per share	**518**	507
Effect of dilutive securities [1]	**-**	1
Weighted average number of Class A Shares and Class B Non-Voting Shares for diluted earnings per share	**518**	508
Basic earnings per share ($)		
Basic and diluted	**0.31**	0.36

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three months ended November 30, 2019, 4,966,252 (2018 – 6,976,976) options were excluded from the diluted earnings per share calculation.

11. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	**Contract Liabilities**

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the three months ended November 30, 2019. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

Balance as at September 1, 2019	94
Additions to deferred commission cost assets	**28**
Amortization recognized on deferred commission cost assets	**(20)**
Balance as at November 30, 2019	**102**

Current	59
Long-term	35
Balance as at August 31, 2019	94
Current	**60**
Long-term	**42**
Balance as at November 30, 2019	**102**

Commission costs are amortized over a period ranging from 24 to 36 months.

Disaggregation of revenue

	Three months ended November 30,	
	2019	2018
Services		
Wireline - Consumer[(1)]	**924**	945
Wireline - Business[(1)]	**143**	138

Deferred income tax expense	**12**	20
Share-based compensation	**-**	1
Defined benefit pension plans	**(2)**	3
Equity income of an associate or joint venture	**-**	(23)
Net change in contract asset balances	**(28)**	(10)
Other	**2**	(2)
Funds flow from continuing operations	**450**	438

(ii) Interest and income taxes paid and interest received and classified as operating activities are as follows:

	Three months ended November 30,	
	2019	2018
Interest paid	**109**	87
Income taxes paid (net of refunds)	**34**	52
Interest received	**4**	1

(iii) Non-cash transactions:

The Consolidated Statements of Cash Flows exclude the following non-cash transactions:

	Three months ended November 30,	
	2019	2018
Issuance of Class B Non-Voting Shares:		
Dividend reinvestment plan	**37**	53

15. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2019 and 2018
[all amounts in millions of Canadian dollars, except share and per share amounts]

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

The carrying values and estimated fair values of long-term debt and a contingent liability are as follows:

	November 30, 2019		August 31, 2019	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**4,059**	**4,740**	5,308	6,014

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

16. SUBSEQUENT EVENTS

On December 9, 2019 the Company issued $800 of senior notes, comprised of $500 principal amount of 3.30% senior notes due 2029 and $300 principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792, along with cash on hand, were used to fund the redemption of the $500 principal amount of 5.50% senior notes due 2020 and the $300 principal amount of 3.15% senior notes due 2021.

On December 12, 2019, the Company drew an additional $80 under its accounts receivable securitization program with a Canadian financial institution, bringing the total amount drawn under the program to $200. The program is now fully drawn.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange ("TSX"), TSX Venture Exchange ("TSXV") and New York Stock Exchange ("NYSE") (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These unaudited interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in compliance with International Accounting Standard ("IAS") 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board ("IASB").

The unaudited interim consolidated financial statements of the Company for the three and nine months ended May 31, 2020 were authorized for issue by the Board of Directors on July 10, 2020.

a) Basis of presentation

These unaudited interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2019 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

Certain comparative figures have been reclassified to conform to the current period's presentation.

The notes presented in these unaudited interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these unaudited interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2019.

In March 2020, the World Health Organization (WHO) declared COVID-19 a pandemic. In response to the WHO declaration and continuing spread of COVID-19, several social distancing measures were taken by the Company and third parties including governments, regulatory authorities, businesses and our customers that could negatively impact the Company's operations and financial results in future periods. Given the unprecedented and pervasive impact of changing circumstances surrounding the COVID-19 pandemic, there is inherently more uncertainty associated with our future operating assumptions and expectations as compared to prior periods. As such, it is not possible to estimate the impacts COVID-19 will have on the Company's financial position or results of operations in future periods. While the direct impacts of COVID-19 are not determinable at this time, the Company has available liquidity of $1.5 billion and a certain degree of flexibility in its operating and investing plans to mitigate the impacts of COVID-19.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

The unaudited interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements except as noted below.

b) New accounting standards

We adopted the following new accounting standards effective September 1, 2019.

- IFRS 16 *Leases* was issued on January 2016 and replaces IAS 17 *Leases*. The new standard requires entities to recognize lease assets and lease obligations on the balance sheet. For lessees, IFRS 16 removes the classification of leases as either operating leases or finance leases, instead requiring that leases be capitalized by recognizing the present value of the lease payments and showing them as lease assets (right-of-use assets) and representing the right to use the underlying leased asset. If lease payments are made over time, the Company recognizes a lease liability representing its obligation to make future lease payments. Certain short-term leases (less than 12 months) and leases of low value may be exempted from the requirements and may continue to be treated as operating leases if certain elections are made. Lessors will continue with a dual lease classification model. Classification will determine how and when a lessor will recognize lease revenue, and what assets would be recorded.

  As a result of adopting IFRS 16, the Company recognized a significant increase to both assets and liabilities on our Consolidated Statements of Financial Position as well as a decrease to operating costs, as a result of removing the lease expense, an increase to depreciation and amortization, due to the depreciation of the right-of-use asset, and an increase to finance costs, due to the accretion of the lease liability. Relative to the results of applying the previous standard, although actual cash flows are unaffected, the Company's statement of cash flows will reflect increases in cash flows from operating activities offset equally by decreases in cash flows from financing activities.

  Implementation
  We adopted IFRS 16 using a modified retrospective approach whereby the financial statements of prior periods presented are not restated. We recognized lease liabilities at September 1, 2019 for leases previously classified as operating leases, measured at the present-value of the lease payments using our incremental borrowing rate at that date, with the corresponding right-of-use asset generally measured at an equal amount, adjusted for any prepaid or accrued rent outstanding as at August 31, 2019.

  As permitted by IFRS 16, we applied certain practical expedients to facilitate the initial adoption and ongoing application of IFRS 16 including the following:
  - not separate fixed non-lease components from lease components for certain classes of underlying assets. Each lease component and any associated non-lease components will be accounted for as a single lease component;
  - apply a single discount rate to a portfolio of leases with similar characteristics;
  - exclude initial direct costs from measuring the right-of-use asset as at September 1, 2019; and
  - use hindsight in determining the lease term where the contract contains purchase, extension, or termination options.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

On transition, we have not elected the recognition exemptions on short-term leases or low-value leases; however, we may choose to elect these recognition exemptions on a class-by-class basis for new classes and on a lease-by-lease basis, respectively, in the future.

In December 2019, the IFRS Interpretations Committee issued a final agenda decision in regards to the determination of the lease term for cancellable or renewable leases under IFRS 16. The Company is currently assessing the impact of this interpretation on its financial statements.

There was no significant impact for contracts in which we are the lessor.

- IFRIC 23 *Uncertainty over Income Tax Treatments* was issued in 2017 to clarify how to apply the recognition and measurement requirements in IAS 12 *Income Taxes* when there is uncertainty over income tax treatments. It was required to be applied for annual periods commencing January 1, 2019, which for the Company was the annual period commencing September 1, 2019. The cumulative effect of the initial application of the new standard has been reflected as an adjustment to retained earnings at September 1, 2019. Refer to "Transition adjustments" below for details.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

Prior to adopting IFRS 16, our total minimum operating lease commitments as at August 31, 2019 was $919 million. The weighted average discount rate applied to the total lease liabilities was 3.50% at September 1, 2019. The difference between the total of the minimum lease payments set out in Note 27 in our 2019 Audited Financial Statements and the total lease liability recognized on transition was a result of:

- the inclusion of lease payments beyond minimum commitments relating to reasonably certain renewal periods or extension options that had not yet been exercised as at August 31, 2019;
- the effect of discounting on the minimum lease payments; and
- certain costs to which we are contractually committed under lease contracts, but which do not qualify to be accounted for as a lease liability, such as variable lease payments not tied to an index or rate.

d) Fiscal 2019 Accounting Policies Updated for IFRS 16

Leases

The following accounting policy applies as of September 1, 2019 following the adoption of IFRS 16. Prior to September 1, 2019, IAS 17 was applied as disclosed in the Company's 2019 annual consolidated financial statements, as permitted by transition provisions of IFRS 16.

Leases are typically entered into for network infrastructure and equipment, including transponders, and land and buildings relating to the Company's wireless and wireline networks, office space and retail stores. At inception of a contract, the Company assesses whether the contract contains a lease. A lease contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

Lease liabilities are initially measured at the present value of future lease payments at the commencement date, discounted using the interest rate implicit in the lease or, if not readily determinable, the Company's incremental borrowing rate. A single incremental borrowing rate is applied to a portfolio of leases with similar characteristics.

Lease payments included in the measurement of the lease liability are comprised of:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or rate;
- Amounts expected to be payable under a residual value guarantee; and
- Payments relating to purchase options and renewal option periods that are reasonably certain to be exercised, or periods subject to termination options that are not reasonably certain to be exercised.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

The initial lease term included in the measurement of the lease liability is comprised of:
- The non-cancellable period of the lease;
- Periods covered by options to extend the lease, where the Company is reasonably certain to exercise the option; and
- Periods covered by options to terminate the lease, where the Company is reasonably certain not to exercise the option.

Lease liabilities are subsequently measured at amortized cost. Lease liabilities are remeasured when there is a lease modification, and a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. The interest expense for lease liabilities is recorded in *Interest expense* in the Consolidated Statements of Income.

Variable lease payments that do not depend on an index or rate are not included in the measurement of lease liabilities and right-of-use assets. The related payments are expensed in *Operating, general and administrative expenses* in the period in which the event or condition that triggers those payments occurs.

Right-of-use assets are initially measured at cost, which comprises the initial amount of the lease obligation adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The Company presents right-of-use assets in *Property, plant and equipment.*

If the company obtains ownership of the leased asset by the end of the lease term or the costs of the right-of-use asset reflects the exercise of a purchase option, we depreciate the right-of-use asset from the lease commencement date to the end of the useful life of the underlying asset. Otherwise, right-of-use assets are depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life or the end of the lease term. Right-of-use assets are periodically reduced by impairment losses, if any, and adjusted for certain remeasurements on the related lease liability. The depreciation charge for right-of-use assets is recorded in *Amortization – Property, plant and equipment.*

Significant Judgments and Estimates

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the lease liabilities and the valuation of right-of-use assets. These include determining whether a contract contains a lease, determining the contract term, including whether or not to exercise renewal or termination options, and determining the interest rate used for discounting future cash flows.

[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, Wi-Fi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended May 31,		Nine months ended May 31,	
	2020	2019	**2020**	2019
Revenue				
Wireline	**1,063**	1,075	**3,193**	3,229
Wireless	**252**	249	**872**	766
	1,315	1,324	**4,065**	3,995
Intersegment eliminations	**(3)**	(2)	**(7)**	(5)
	1,312	1,322	**4,058**	3,990
Adjusted EBITDA[1]				
Wireline	**508**	475	**1,544**	1,472
Wireless	**101**	53	**253**	147
	609	528	**1,797**	1,619
Restructuring costs	**(14)**	-	**(14)**	(1)
Amortization	**(302)**	(263)	**(905)**	(788)
Operating income	**293**	265	**878**	830
Current taxes				
Operating	**18**	10	**72**	80
Other/non-operating	**1**	(2)	**6**	5
	19	8	**78**	85

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses. We previously referred to this measure as "Operating income before restructuring and amortization" but have renamed it to better align with language used by various stakeholders of the Company.

(1) During fiscal 2018, the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative. A total of $127 has been paid in fiscal 2020. The remaining costs are expected to be paid out within the next 8 months.

(2) During fiscal 2020, the Company restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. In connection with the restructuring, the Company recorded $14 in the third quarter primarily related to severance and employee related costs, of which $12 has been paid as at May 31, 2020. The remaining costs are expected to be paid within the next 3 months.

(1) Long-term debt is presented net of unamortized discounts and finance costs.

(2) Current portion of long-term debt includes amounts due within one year in respect of senior notes due October 1, 2019 and the Burrard Landing loans.

On October 1, 2019, the Company repaid $1,250 of 5.65% senior notes at their maturity.

On November 21, 2019, the Company amended the terms of its bank credit facility to extend the maturity date to December 2024.The facility can be used for working capital and general corporate purposes.

On December 9, 2019 the Company issued $800 of senior notes, comprised of $500 principal amount of 3.30% senior notes due 2029 and $300 principal amount of 4.25% senior notes due 2049. The net proceeds of the offering of $792, along with cash on hand, were used to fund the redemption of the $500 principal amount of 5.50% senior notes due 2020 and the $300 principal amount of 3.15% senior notes due 2021.

On December 24, 2019, the Company redeemed the $500 principal amount of 5.50% senior notes due December 7, 2020 and the $300 principal amount of 3.15% senior notes due February 19, 2021. In conjunction with the redemption, the Company paid make whole premiums of $17 and accrued interest of $5.

On April 22, 2020 the Company issued $500 principal amount of senior notes at a rate of 2.90% due December 9, 2030.

9. OTHER LONG-TERM LIABILITIES

	May 31, 2020	August 31, 2019
Pension liabilities(1)	**27**	69
Post retirement liabilities	**4**	4
Other	**-**	2
	31	75

(1) In the third quarter of the fiscal year, the accumulated benefit obligation of the Supplemental Executive Retirement Plan was adjusted by $54 as a result of a 30 bps increase in the discount rate from August 31, 2019 as well as changes in demographic assumptions. The cost and related accrued benefit obligation of the Company's non-registered pension plans are determined using actuarial valuations. The actuarial valuations involve estimates and actuarial assumptions including discount rates and rate of compensation increase (financial assumptions) as well as mortality rates and retirement rates (demographic assumptions). Due to the long-term nature of the non-registered pension plans, such estimates are subject to significant uncertainty. Remeasurements related to the effect of experience adjustments arise when the non-registered pension plans' experience differs from the experience expected using the actuarial assumptions.

10. SHARE CAPITAL

Changes in share capital during the nine months ended May 31, 2020 are as follows:

	Class A Shares		Class B Non-Voting Shares		Series A Preferred Shares		Series B Preferred Shares	
	Number	$	Number	$	Number	$	Number	$
August 31, 2019	22,372,064	2	494,389,771	4,310	10,012,393	245	1,987,607	48

Issued upon restricted share unit exercises	-	-	4,507	-	-	-	-	-
Issued pursuant to dividend reinvestment plan	-	-	1,445,494	37	-	-	-	-
Shares repurchased	-	-	(5,614,672)	(49)	-	-	-	-
May 31, 2020	**22,372,064**	**2**	**490,485,333**	**4,304**	**10,012,393**	**245**	**1,987,607**	**48**

Normal Course Issuer Bid

On October 29, 2019, the Company announced that it had received approval from the Toronto Stock Exchange ("TSX") to establish a normal course issuer bid ("NCIB") program. The program commenced on November 1, 2019 and will remain in effect until October 31, 2020. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,758,127 Class B Non-Voting Shares representing 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 18, 2019.

During the nine months ended May 31, 2020, the Company purchased 5,614,672 Class B Non-Voting Shares for cancellation for a total cost of approximately $140 under the NCIB. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $91 and was charged to retained earnings. The Company suspended the program in April 2020.

[all amounts in millions of Canadian dollars, except share and per share amounts]

Dividend Reinvestment Plan

On October 24, 2019, in accordance with the terms of our Dividend Reinvestment Plan (the "DRIP"), the Company announced that in lieu of issuing shares from treasury, it will satisfy its share delivery obligations under the DRIP by purchasing Class B Non-Voting Shares on the open market. In addition, the Company reduced its discount from 2% to 0% for the Class B Non-Voting Shares delivered under the DRIP. These changes to the DRIP were applied to the dividends payable on November 28, 2019 to shareholders of record on November 15, 2019.

11. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended May 31,		Nine months ended May 31,	
	2020	2019	**2020**	2019
Numerator for basic and diluted earnings per share ($)				
Net income	**184**	227	**513**	566
Deduct: net income attributable to non-controlling interests in subsidiaries	**-**	(2)	**-**	(2)
Deduct: dividends on Preferred Shares	**(3)**	(3)	**(7)**	(7)
Net income attributable to common shareholders	**181**	222	**506**	557
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Non-Voting Shares for basic earnings per share	**513**	512	**516**	510
Effect of dilutive securities [(1)]	**-**	-	**-**	-
Weighted average number of Class A Shares and Class B Non-Voting Shares for diluted earnings per share	**513**	512	**516**	510
Basic earnings per share ($)				
Basic and diluted	**0.35**	0.43	**0.98**	1.09

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and nine months ended May 31, 2020, 7,523,834 (May 31, 2019 – 4,602,448) and 6,619,109 (May 31, 2019 - 6,226,089) options were excluded from the diluted earnings per share calculation, respectively.

Disaggregation of revenue

	Three months ended May 31,		Nine months ended May 31,	
	2020	2019	**2020**	2019
Services				
Wireline - Consumer[(1)]	**923**	935	**2,766**	2,813
Wireline - Business[(1)]	**140**	140	**427**	416
Wireless	**206**	176	**604**	508
	1,269	1,251	**3,797**	3,737
Equipment and other				
Wireless	**46**	73	**268**	258
	46	73	**268**	258
Intersegment eliminations	**(3)**	(2)	**(7)**	(5)
Total revenue	**1,312**	1,322	**4,058**	3,990

(1) As a result of a realignment of management responsibilities, revenues relating to the Wholesale TPIA Services and Broadcast Services operations, previously reported under the Business division are now reported as part of the Consumer division. Fiscal 2019 results have been restated to reflect this change.

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at May 31, 2020.

	Within 1 year	**Within 2 years**	**Total**
Wireline	2,658	936	3,594
Wireless	423	137	560
Total	**3,081**	**1,073**	**4,154**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer.

13. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended May 31,		Nine months ended May 31,

16. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2020 and May 31, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	May 31, 2020		August 31, 2019	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**4,547**	**5,339**	5,308	6,014

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

In the second quarter of fiscal 2020, the Company entered into a cross-currency interest rate swap with a member of the Company's lending syndicate with a notional amount of $34 USD for a term of one month. The swap required that funds were exchanged back in one month at the same terms unless both parties agreed to extend the swap for an additional month. The Company did not extend the swap in the current quarter. By borrowing in US dollars, the Company may access lower interest rates. The swap mitigated the risk of changes in the value of the US Dollar LIBOR borrowings. The swap was not designated as a hedge for accounting purposes.

17. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2020 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2020 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2020 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2020 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2020 do not represent events or changes in circumstance that would be indicative of impairment at May 31, 2020.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2020, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal adjusted EBITDA multiple
Cable	6.0%	0.5%	8.0x
Satellite	7.0%	-4.0%	6.7x
Wireless	7.0%	1.0%	5.3x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal adjusted EBITDA multiple
Cable	15.0%	12.5%	6.2%
Satellite	7.8%	5.5%	7.4%
Wireless	18.2%	10.1%	9.4%

This is Exhibit 38 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 28, 2021 and February 29, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three and six months ended February 28, 2021 were authorized for issue by the Board of Directors on April 14, 2021.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2020 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2020.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended		Six months ended	
	February 28, 2021	February 29, 2020	**February 28, 2021**	February 29, 2020
Revenue				
Wireline	**1,054**	1,063	**2,110**	2,130
Wireless	**336**	302	**653**	620
	1,390	1,365	**2,763**	2,750
Intersegment eliminations	**(3)**	(2)	**(6)**	(4)
	1,387	1,363	**2,757**	2,746
Adjusted EBITDA[(1)]				
Wireline	**540**	519	**1,072**	1,036
Wireless	**97**	81	**172**	152
	637	600	**1,244**	1,188
Restructuring costs	**(1)**	-	**(13)**	-
Amortization	**(303)**	(300)	**(608)**	(603)
Operating income	**333**	300	**623**	585
Current taxes				
Operating	**43**	22	**78**	54
Other/non-operating	**1**	1	**2**	5
	44	23	**80**	59

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $12 has been paid in fiscal 2021 relating to these initiatives. The remaining costs are expected to be paid out within the next 11 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $1 in the second quarter and $12 in the first quarter primarily related to severance and employee related costs, of which $12 has been paid as at February 28, 2021. The remaining costs are expected to be paid within the next 11 months.

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Non-Voting Participating Shares (“Class B Shares”) representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 28, 2021 and February 29, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

During the six months ended February 28, 2021, the Company purchased 13,224,772 Class B Shares for cancellation for a total cost of approximately $300 under the NCIB program. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $184 and was charged to retained earnings.

From March 1, 2021 to March 12, 2021, the Company purchased an additional 1,559,202 Class B Shares for cancellation for a total cost of approximately $36 under the NCIB program. In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 18), the Company suspended share buybacks under its NCIB program.

11. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended		Six months ended	
	February 28, 2021	February 29, 2020	**February 28, 2021**	February 29, 2020
Numerator for basic and diluted earnings per share ($)				
Net income	**217**	167	**380**	329
Deduct: dividends on Preferred Shares	**(2)**	(2)	**(4)**	(4)
Net income attributable to common shareholders	**215**	165	**376**	325
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**505**	516	**509**	517
Effect of dilutive securities [1]	**-**	-	**-**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**505**	516	**509**	517
Basic earnings per share ($)				
Basic and diluted	**0.43**	0.32	**0.74**	0.63

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and six months ended February 28, 2021, 8,199,698 (February 29, 2020 – 5,852,922) and 7,852,637 (February 29, 2020 – 5,719,981) options were excluded from the diluted earnings per share calculation, respectively.

Balance as at August 31, 2020	172	225
Current	**128**	**206**
Long-term	**35**	**15**
Balance as at February 28, 2021	**163**	**221**

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the six months ended February 28, 2021. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

August 31, 2020	98
Additions to deferred commission cost assets	**39**
Amortization recognized on deferred commission cost assets	**(41)**
Balance as at February 28, 2021	**96**

Intersegment eliminations	**(3)**	(2)	**(6)**	(4)
Total revenue	**1,387**	1,363	**2,757**	2,746

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at February 28, 2021.

	Within 1 year	**Within 2 years**	**Within 3 years**	**Within 4 years**	**Within 5 years**	**Thereafter**	**Total**
Wireline	1,553	672	159	88	28	1	2,501
Wireless	415	137	-	-	-	-	552
Total	**1,968**	**809**	**159**	**88**	**28**	**1**	**3,053**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

13. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended		Six months ended	
	February 28, 2021	February 29, 2020	**February 28, 2021**	February 29, 2020

16. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	February 28, 2021		August 31, 2020	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,549**	**5,378**	4,548	5,613

[1] Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

[all amounts in millions of Canadian dollars, except share and per share amounts]

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

17. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2021 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2021 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2021 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2021 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2021 do not represent events or changes in circumstance that would be indicative of impairment at February 28, 2021.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2021, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal adjusted EBITDA multiple
Cable	5.0%	0.0%	9.7x
Satellite	6.0%	-8.0%	6.5x
Wireless	6.0%	1.0%	6.1x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal adjusted EBITDA multiple
Cable	16.4%	13.8%	1.9%
Satellite	6.5%	4.2%	3.6%
Wireless	21.9%	13.5%	2.1%

18. SUBSEQUENT EVENT

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Shares in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash. The Transaction is subject to the approval of shareholders as well as other customary closing conditions including court and stock exchange approval and approvals from Canadian regulators. In connection with the announcement of the Transaction on March 15, 2021, the Company suspended share buybacks under its normal course issuer bid (NCIB) program. Subject to receipt of all required approvals, the Transaction is expected to close in the first half of 2022.

Under the terms of the Arrangement Agreement, Rogers has the right to cause the Company to redeem its outstanding preferred shares on June 30, 2021 in accordance with their terms by providing written notice to Shaw. As of the date of these financial statements, Rogers has not exercised this right.

This is Exhibit 39 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, SJR.PR.A, SJR.PR.B, NYSE - SJR, and TSXV - SJR.A).

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three months ended November 30, 2020 were authorized for issue by the Audit Committee on January 12, 2021.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2020 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2020.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended November 30,	
	2020	2019
Revenue		
Wireline	**1,056**	1,067
Wireless	**317**	318
	1,373	1,385
Intersegment eliminations	**(3)**	(2)
	1,370	1,383
Adjusted EBITDA[(1)]		
Wireline	**532**	517
Wireless	**75**	71
	607	588
Restructuring costs	**(12)**	-
Amortization	**(305)**	(303)
Operating income	**290**	285
Current taxes		
Operating	**35**	32
Other/non-operating	**1**	4
	36	36

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

Long-term	80	-	-	80
Balance as at November 30, 2020	**80**	**23**	**90**	**193**

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $nil has been paid in fiscal 2021 relating to these initiatives. The remaining costs are expected to be paid out within the next 2 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $12 in the first quarter primarily related to severance and employee related costs, of which $2 has been paid as at November 30, 2020. The remaining costs are expected to be paid within the next 14 months.

Shares repurchased	-	-	(3,269,444)	(30)	-	-	-	-
November 30, 2020	**22,372,064**	**2**	**487,517,388**	**4,278**	**10,012,393**	**245**	**1,987,607**	**48**

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Non-Voting Participating Shares ("Class B Non-Voting Shares") representing approximately 5% of all of the issued and outstanding Class B Non-Voting Shares as at October 22, 2020.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

During the three months ended November 30, 2020, the Company purchased 3,269,444 Class B Non-Voting Shares for cancellation for a total cost of approximately $76 under the NCIB program. The average book value of the shares repurchased was $8.78 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $46 and was charged to retained earnings.

From December 1, 2020 to December 31, 2020, the Company purchased an additional 3,273,356 Class B Non-Voting Shares for cancellation for a total cost of approximately $75 under the NCIB program.

10. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended November 30,	
	2020	2019
Numerator for basic and diluted earnings per share ($)		
Net income	**163**	162
Deduct: dividends on Preferred Shares	**(2)**	(2)
Net income attributable to common shareholders	**161**	160
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Non-Voting Shares for basic earnings per share	**513**	518
Effect of dilutive securities [(1)]	**-**	-
Weighted average number of Class A Shares and Class B Non-Voting Shares for diluted earnings per share	**513**	518
Basic earnings per share ($)		
Basic and diluted	**0.31**	0.31

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three months ended November 30, 2020, 6,736,626 (November 30, 2019 – 4,966,252) options were excluded from the diluted earnings per share calculation.

[all amounts in millions of Canadian dollars, except share and per share amounts]

Disaggregation of revenue

	Three months ended November 30,	
	2020	2019
Services		
Wireline - Consumer	**911**	924
Wireline - Business	**145**	143
Wireless	**215**	196
	1,271	1,263
Equipment and other		
Wireless	**102**	122
	102	122
Intersegment eliminations	**(3)**	(2)
Total revenue	**1,370**	1,383

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at November 30, 2020.

	Within 1 year	**Within 2 years**	**Within 3 years**	**Within 4 years**	**Within 5 years**	**Thereafter**	**Total**
Wireline	1,501	596	151	87	26	-	2,361
Wireless	414	118	-	-	-	-	532
Total	**1,915**	**714**	**151**	**87**	**26**	**-**	**2,893**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

12. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended November 30,	
	2020	2019
Employee salaries and benefits(1)	**153**	157
Purchase of goods and services	**622**	638
	775	795

(1) For the three months ended November 30, 2020, employee salaries and benefits include $12 (2019 - $nil) in restructuring costs.

	Three months ended November 30,	
	2020	2019
Interest paid	**75**	109
Income taxes paid (net of refunds)	**94**	34
Interest received	**2**	4

(iii) Non-cash transactions:

The Consolidated Statements of Cash Flows exclude the following non-cash transactions:

	Three months ended November 30,	
	2020	2019
Issuance of Class B Non-Voting Shares:		
Dividend reinvestment plan	**-**	37

15. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2020 and November 30, 2019
[all amounts in millions of Canadian dollars, except share and per share amounts]

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	November 30, 2020		August 31, 2020	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,549**	**5,561**	4,548	5,613

[1] Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Other long-term liabilities

The fair value of contingent consideration arising from a business acquisition is determined by calculating the present value of the probability weighted assessment of the likelihood that revenue targets will be met and the estimated timing of such payments.

(v) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

This is Exhibit 40 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2021 and May 31, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the “Company”) is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities (“Wireline”); and wireless services for voice and data communications (“Wireless”). The Company’s shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the “Arrangement Agreement”) with Rogers Communications Inc. (“Rogers”), under which Rogers will acquire all of Shaw’s issued and outstanding Class A Participating Shares (“Class A Shares”) and Class B Non-Voting Participating Shares (“Class B Shares”) in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the “Transaction”). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the “Shaw Family Shareholders”)) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the “Rogers Shares”) on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw’s Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen’s Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen’s Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators, including the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2021 and May 31, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three and nine months ended May 31, 2021 were authorized for issue by the Board of Directors on June 30, 2021.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2020 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2020.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Revenue				
Wireline	**1,080**	1,063	**3,190**	3,193
Wireless	**298**	252	**951**	872
	1,378	1,315	**4,141**	4,065
Intersegment eliminations	**(3)**	(3)	**(9)**	(7)
	1,375	1,312	**4,132**	4,058
Adjusted EBITDA(1)				
Wireline	**527**	508	**1,599**	1,544
Wireless	**115**	101	**287**	253
	642	609	**1,886**	1,797
Restructuring costs	**(1)**	(14)	**(14)**	(14)
Amortization	**(300)**	(302)	**(909)**	(905)
Operating income	**341**	293	**963**	878
Current taxes(2)				
Operating	**39**	18	**117**	72
Other/non-operating	**(127)**	1	**(125)**	6
	(88)	19	**(8)**	78

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

(2) Current taxes are lower for the three and nine months ended May 31, 2021 due mainly to a revision to liabilities for uncertain tax positions that became statute barred in the period of $125.

Current	-	2	40	42
Long-term	81	-	-	81
Balance as at May 31, 2021	**81**	**2**	**40**	**123**

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2020 restructured certain operations within the Wireline segment and announced a realignment of the senior leadership team. A total of $12 has been paid in fiscal 2021 relating to these initiatives. The remaining costs are expected to be paid out within the next 8 months.

(2) During fiscal 2021, the Company made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. In connection with the restructuring, the Company recorded $1 in the third quarter, $1 in the second quarter and $12 in the first quarter primarily related to severance and employee related costs, of which $13 has been paid as at May 31, 2021. The remaining costs are expected to be paid within the next 8 months.

(3) During the third quarter of fiscal 2021, the Company recorded a $20 reversal following the CRTC decision on final aggregated Third Party Internet Access rates and a $35 reduction of tax related interest expense.

Series A and B Preferred Shares

On May 28, 2021, the Company announced that it intends to redeem all of its issued and outstanding Cumulative Redeemable Rate Reset Class 2 Preferred Shares, Series A (the "Series A Shares") and Cumulative Redeemable Floating Rate Class 2 Preferred Shares, Series B (the "Series B Shares", and together with the Series A Shares, the "Preferred Shares") in accordance with their terms (as set out in the Company's articles) on June 30, 2021 (the "Redemption Date") at a price equal to $25.00 per Preferred Share (the "Redemption Price"), less any tax required to be deducted or withheld.

As at May 31, 2021, there are 10,012,393 Series A Shares and 1,987,607 Series B Shares issued and outstanding. Accordingly, the aggregate Redemption Price payable by Shaw to redeem the Preferred Shares will be $300 million. As notice was provided to the holders of the Series A Shares and Series B Shares on May 28, 2021, these amounts have been reclassified from share capital to current liabilities as at May 31, 2021.

On April 14, 2021, the Company's Board of Directors declared a dividend of $0.17444 per Series A Share and $0.12956 per Series B Share, each payable on June 30, 2021 to holders of record on June 15, 2021. These will be the final dividends on the Preferred Shares. Upon payment of the June 30, 2021 dividends, there will be no accrued and unpaid dividends on the Preferred Shares as at the Redemption Date.

Subsequent to quarter-end, both the aggregate Redemption Price of $300 and the final dividends on the Preferred Shares were paid by Shaw on the Redemption Date.

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and will remain in effect until November 4, 2021. As approved by the TSX, the Company has the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020.

During the nine months ended May 31, 2021, the Company purchased 14,783,974 Class B Shares for cancellation for a total cost of approximately $336 under the NCIB program. The average book value of the shares repurchased was $8.77 per share and was charged to share capital. The excess of the market price over the average book value, including transaction costs, was approximately $207 and was charged to retained earnings.

In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

[all amounts in millions of Canadian dollars, except share and per share amounts]

11. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Numerator for basic and diluted earnings per share ($)				
Net income	**354**	184	**734**	513
Deduct: dividends on Preferred Shares	**(2)**	(3)	**(6)**	(7)
Net income attributable to common shareholders	**352**	181	**728**	506
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	513	**505**	516
Effect of dilutive securities [(1)]	**2**	-	**-**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	513	**505**	516
Basic earnings per share ($)				
Basic	**0.71**	0.35	**1.44**	0.98
Diluted	**0.70**	0.35	**1.44**	0.98

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and nine months ended May 31, 2021, nil (May 31, 2020 – 7,523,834) and 4,072,443 (May 31, 2020 – 6,619,109) options were excluded from the diluted earnings per share calculation, respectively.

12. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	**Contract Liabilities**
Balance as at August 31, 2020	172	225

[all amounts in millions of Canadian dollars, except share and per share amounts]

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the nine months ended May 31, 2021. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

August 31, 2020	98
Additions to deferred commission cost assets	**54**
Amortization recognized on deferred commission cost assets	**(61)**
Balance as at May 31, 2021	**91**
Current	61
Long-term	37
Balance as at August 31, 2020	98
Current	**59**
Long-term	**32**
Balance as at May 31, 2021	**91**

Commission costs are amortized over a period ranging from 24 to 36 months.

Disaggregation of revenue

	Three months ended May 31,		Nine months ended May 31,

[all amounts in millions of Canadian dollars, except share and per share amounts]

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at May 31, 2021.

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,644	716	136	71	22	2	2,591
Wireless	373	114	-	-	-	-	487
Total	**2,017**	**830**	**136**	**71**	**22**	**2**	**3,078**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

13. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended May 31,		Nine months ended May 31,	
	2021	2020	**2021**	2020
Employee salaries and benefits[1]	**183**	166	**490**	483
Purchase of goods and services	**551**	551	**1,770**	1,792
	734	717	**2,260**	2,275

(1) For the three and nine months ended May 31, 2021, employee salaries and benefits include $1 (2020 - $14) and $14 (2020 - $14) in restructuring costs respectively.

14. OTHER GAINS (LOSSES)

Debt redemption penalty	**–**	–	**–**	(17)
Other [2]	**(4)**	7	**(8)**	4
	(21)	7	**4**	(15)

(1) The Company has incurred a number of Transaction related advisory, legal, financial, and other professional fees in connection with the proposed acquisition of Shaw by Rogers. As these costs do not relate to ongoing operations, they have been classified as non-operating expenses. Please refer to Note 1 for further details on the Transaction.

(2) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

17. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	May 31, 2021		August 31, 2020	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)(1)	**4,550**	**5,215**	4,548	5,613

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

[all amounts in millions of Canadian dollars, except share and per share amounts]

18. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company conducted its annual impairment test on goodwill and indefinite-life intangibles as at February 1, 2021 and the recoverable amount of the cash generating units exceeded their carrying value.

A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Cable cash generating unit as at February 1, 2021 would not result in any impairment loss. A hypothetical decline of 10% in the recoverable amount of the broadcast rights and licences for the Satellite cash generating unit as at February 1, 2021 would not result in an impairment loss. A hypothetical decline of 10% in the recoverable amount of the Wireless generating unit as at February 1, 2021 would not result in any impairment loss.

Any changes in economic conditions since the impairment testing conducted as at February 1, 2021 do not represent events or changes in circumstance that would be indicative of impairment at May 31, 2021.

Significant estimates inherent to this analysis include discount rates and the terminal value. At February 1, 2021, the estimates that have been utilized in the impairment tests reflect any changes in market conditions and are as follows:

		Terminal value	
	Post-tax discount rate	Terminal growth rate	Terminal adjusted EBITDA multiple
Cable	5.0%	0.0%	9.7x
Satellite	6.0%	-8.0%	6.5x
Wireless	6.0%	1.0%	6.1x

A sensitivity analysis of significant estimates is conducted as part of every impairment test. With respect to the impairment tests performed in the second quarter, the estimated decline in recoverable amount for the sensitivity of significant estimates is as follows:

	Estimated decline in recoverable amount		
		Terminal value	
	1% increase in discount rate	1% decrease in terminal growth rate	0.5 times decrease in terminal adjusted EBITDA multiple
Cable	16.4%	13.8%	1.9%
Satellite	6.5%	4.2%	3.6%
Wireless	21.9%	13.5%	2.1%

This is Exhibit 41 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

February 28, 2022 and February 28, 2021
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

On March 24, 2022, the Canadian Radio television and Telecommunications Commission (CRTC) completed its comprehensive review and approved the transfer of Shaw's licenced broadcasting undertakings to Rogers, marking an important milestone towards closing of the Transaction. The Transaction remains subject to other customary closing conditions including approvals from the Competition Bureau and Innovation, Science and Economic Development Canada (ISED). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

February 28, 2022 and February 28, 2021
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three and six months ended February 28, 2022 were authorized for issue by the Board of Directors on April 12, 2022.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2021 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2021.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended February 28,		Six months ended February 28,	
	2022	2021	**2022**	2021
Revenue				
Wireline	**1,040**	1,054	**2,097**	2,110
Wireless	**323**	336	**655**	653
	1,363	1,390	**2,752**	2,763
Intersegment eliminations	**(4)**	(3)	**(7)**	(6)
	1,359	1,387	**2,745**	2,757
Adjusted EBITDA(1)				
Wireline	**509**	540	**1,033**	1,072

Balance as at February 28, 2022	**78**	**1**	**46**	**125**

(1) During fiscal 2018 the Company offered a voluntary departure program to a group of eligible employees as part of a total business transformation initiative and in fiscal 2021 made a number of changes to its organizational structure in an effort to streamline the business, consolidate certain functions, and reduce redundancies between the Wireless and Wireline segments. A total of $1 has been paid in fiscal 2022 relating to these initiatives. The remaining costs are expected to be paid out within the next 11 months.

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and ended November 4, 2021. As approved by the TSX, the Company had the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020. In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

[all amounts in millions of Canadian dollars, except share and per share amounts]

12. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended February 28,		Six months ended February 28,	
	2022	2021	**2022**	2021
Numerator for basic and diluted earnings per share ($)				
Net income	**196**	217	**392**	380
Deduct: dividends on Preferred Shares	**-**	(2)	**-**	(4)
Net income attributable to common shareholders	**196**	215	**392**	376
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	505	**499**	509
Effect of dilutive securities [(1)]	**2**	-	**2**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	505	**501**	509
Earnings per share ($)				
Basic	**0.39**	0.43	**0.79**	0.74
Diluted	**0.39**	0.43	**0.78**	0.74

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and six months ended February 28, 2022, nil (February 28, 2021 – 8,199,698) and nil (February 28, 2021 – 7,852,637) options were excluded from the diluted earnings per share calculation, respectively.

13. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	Contract Liabilities
Balance as at August 31, 2021	125	228
Increase in contract assets from revenue recognized during the year	**50**	**-**

[all amounts in millions of Canadian dollars, except share and per share amounts]

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at February 28, 2022.

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,762	822	169	91	28	4	2,876
Wireless	345	111	-	-	-	-	456
Total	**2,107**	**933**	**169**	**91**	**28**	**4**	**3,332**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

14. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended February 28,		Six months ended February 28,	
	2022	2021	**2022**	2021
Employee salaries and benefits[1]	**170**	154	**334**	307
Purchase of goods and services	**557**	597	**1,146**	1,219
	727	751	**1,480**	1,526

(1) For the three and six months ended February 28, 2022, employee salaries and benefits include $nil (February 28, 2021 - $1) and $nil (February 28, 2021 - $13) in restructuring costs, respectively.

15. OTHER GAINS (LOSSES)

	Three months ended February 28,		Six months ended February 28,	
	2022	2021	**2022**	2021
Gain on disposal of fixed assets	**2**	1	**2**	1
Fair value adjustment for private investments	**–**	27	**–**	27
Transaction costs [1]	**(3)**	–	**(5)**	–
Other [2]	**(4)**	(2)	**(6)**	(4)
	(5)	26	**(9)**	24

(1) The Company has incurred a number of Transaction-related advisory, legal, financial, and other professional fees in connection with the proposed acquisition of Shaw by Rogers. As these costs do not relate to ongoing operations, they have been classified as non-operating expenses. Please refer to Note 1 for further details on the Transaction.

(2) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

18. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	February 28, 2022		August 31, 2021	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,551**	**4,896**	4,550	5,263

[1] Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

[all amounts in millions of Canadian dollars, except share and per share amounts]

19. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company performs its annual impairment test on goodwill and indefinite-life intangibles as at February 1 each year. There have been no changes to the assets and liabilities making up the CGUs since the last test performed as at February 1, 2021. The prior test also resulted in a recoverable amount that exceeded the carrying amount by a substantial margin. The Company performed a qualitative assessment of the factors impacting the determination of recoverable amount and concluded that the likelihood that a recoverable amount calculation as at February 1, 2022, would be less than the carrying amount of the CGUs is remote. As such, the key assumptions used in the impairment test remain consistent with those disclosed for the February 1, 2021 test.

This is Exhibit 42 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

The Transaction remains subject to other customary closing conditions including approvals from certain Canadian regulators, including the Competition Bureau, Innovation, Science and Economic Development Canada (ISED) and the Canadian Radio-television and Telecommunications Commission (CRTC). Subject to the receipt of all required approvals, and the satisfaction of all closing conditions, the Transaction is expected to close in the first half of 2022.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three months ended November 30, 2021 were authorized for issue by the Audit Committee on January 11, 2022.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2021 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2021.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

[all amounts in millions of Canadian dollars, except share and per share amounts]

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended November 30,	
	2021	2020
Revenue		
Wireline	**1,057**	1,056
Wireless	**332**	317
	1,389	1,373
Intersegment eliminations	**(3)**	(3)
	1,386	1,370
Adjusted EBITDA(1)		
Wireline	**524**	532
Wireless	**109**	75
	633	607
Restructuring costs	**-**	(12)
Amortization	**(300)**	(305)
Operating income	**333**	290
Current taxes		
Operating	**87**	35
Other/non-operating	**3**	1
	90	36

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

9. SHARE CAPITAL

Changes in share capital during the three months ended November 30, 2021 are as follows:

	Class A Shares		**Class B Shares**	
	Number	$	Number	$
August 31, 2021	22,372,064	2	476,537,262	4,197
Issued upon stock option plan exercises	-	-	128,158	4
November 30, 2021	**22,372,064**	**2**	**476,665,420**	**4,201**

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and ended November 4, 2021. As approved by the TSX, the Company had the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020. In connection with the announcement of the Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

10. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended November 30,	
	2021	2020
Numerator for basic and diluted earnings per share ($)		
Net income	**196**	163
Deduct: dividends on Preferred Shares	**-**	(2)
Net income attributable to common shareholders	**196**	161
Denominator (millions of shares)		
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	513
Effect of dilutive securities [1]	**2**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	513
Basic and diluted earnings per share ($)	**0.39**	0.31

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three months ended November 30, 2021, nil (November 30, 2020 – 6,736,626) options were excluded from the diluted earnings per share calculation.

11. REVENUE

Contract assets and liabilities

The table below provides a reconciliation of the significant changes to the current and long-term portion of contract assets and liabilities balances during the year.

	Contract Assets	Contract Liabilities
Balance as at August 31, 2021	125	228
Increase in contract assets from revenue recognized during the year	**27**	**-**
Contract assets transferred to trade receivables	**(35)**	**-**
Contract terminations transferred to trade receivables	**(5)**	**-**
Revenue recognized included in contract liabilities at the beginning of the year	**-**	**(215)**
Increase in contract liabilities during the year	**-**	**215**
Balance as at November 30, 2021	**112**	**228**

	Contract Assets	Contract Liabilities
Current	97	213
Long-term	28	15
Balance as at August 31, 2021	125	228
Current	**85**	**212**
Long-term	**27**	**16**
Balance as at November 30, 2021	**112**	**228**

Deferred commission cost assets

The table below provides a summary of the changes in the deferred commission cost assets recognized from the incremental costs incurred to obtain contracts with customers during the three months ended November 30, 2021. We believe these amounts to be recoverable through the revenue earned from the related contracts. The deferred commission cost assets are presented within other current assets (when they will be amortized into net income within twelve months of the date of the financial statements) or other long-term assets.

August 31, 2021	92
Additions to deferred commission cost assets	**25**
Amortization recognized on deferred commission cost assets	**(20)**
Balance as at November 30, 2021	**97**

Current	59
Long-term	33
Balance as at August 31, 2021	92
Current	**61**
Long-term	**36**
Balance as at November 30, 2021	**97**

Commission costs are amortized over a period ranging from 24 to 36 months.

(unaudited)

November 30, 2021 and November 30, 2020
[all amounts in millions of Canadian dollars, except share and per share amounts]

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at November 30, 2021.

	Within 1 year	Within 2 years	Within 3 years	Within 4 years	Within 5 years	Thereafter	Total
Wireline	1,711	824	183	98	34	5	2,855
Wireless	352	104	-	-	-	-	456
Total	**2,063**	**928**	**183**	**98**	**34**	**5**	**3,311**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

12. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended November 30,	
	2021	2020
Employee salaries and benefits(1)	**164**	153
Purchase of goods and services	**589**	622
	753	775

(1) For the three months ended November 30, 2021, employee salaries and benefits include $nil (November 30, 2020 - $12) in restructuring costs.

13. OTHER GAINS (LOSSES)

	Three months ended November 30,	
	2021	2020
Transaction costs (1)	**(2)**	–
Other (2)	**(2)**	(2)
	(4)	(2)

(1) The Company has incurred a number of Transaction-related advisory, legal, financial, and other professional fees in connection with the proposed acquisition of Shaw by Rogers. As these costs do not relate to ongoing operations, they have been classified as non-operating expenses. Please refer to Note 1 for further details on the Transaction.

(2) Other gains (losses) generally includes realized and unrealized foreign exchange gains and losses on US dollar denominated current assets and liabilities and the Company's share of the operations of Burrard Landing Lot 2 Holdings Partnership.

16. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	November 30, 2021		August 31, 2021	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,551**	**5,110**	4,550	5,263

[1] Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

This is Exhibit 43 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2022 and May 31, 2021
[all amounts in millions of Canadian dollars, except share and per share amounts]

1. CORPORATE INFORMATION

Shaw Communications Inc. (the "Company") is a diversified Canadian connectivity company whose core operating business is providing: Cable telecommunications, Satellite video services and data networking to residential customers, businesses and public-sector entities ("Wireline"); and wireless services for voice and data communications ("Wireless"). The Company's shares are listed on the Toronto Stock Exchange (TSX), TSX Venture Exchange (TSXV) and New York Stock Exchange (NYSE) (Symbol: TSX - SJR.B, NYSE - SJR, and TSXV - SJR.A).

On March 15, 2021, the Company announced that it had entered into an arrangement agreement (the "Arrangement Agreement") with Rogers Communications Inc. ("Rogers"), under which Rogers will acquire all of Shaw's issued and outstanding Class A Participating Shares ("Class A Shares") and Class B Non-Voting Participating Shares ("Class B Shares") in a transaction valued at approximately $26 billion, inclusive of approximately $6 billion of Shaw debt (the "Rogers-Shaw Transaction"). Holders of Shaw Class A Shares and Class B Shares (other than the Shaw Family Living Trust, the controlling shareholder of Shaw, and related persons (collectively the "Shaw Family Shareholders")) will receive $40.50 per share in cash. The Shaw Family Shareholders will receive 60% of the consideration for their shares in the form of Class B Non-Voting Shares of Rogers (the "Rogers Shares") on the basis of the volume-weighted average trading price for the Rogers Shares for the 10 trading days ending March 12, 2021, and the balance in cash.

The Rogers-Shaw Transaction is being implemented by way of a court-approved plan of arrangement under the *Business Corporations Act* (Alberta). At the special meeting of Shaw shareholders held on May 20, 2021, the Company obtained approval of the plan of arrangement by the holders of Shaw's Class A Shares and Class B Shares in the manner required by the interim order granted by the Court of Queen's Bench of Alberta on April 19, 2021. On May 25, 2021, the Court of Queen's Bench of Alberta issued a final order approving the plan of arrangement.

Regulatory Approval Status

On March 24, 2022, the CRTC completed its comprehensive review and approved the transfer of Shaw's licenced broadcasting undertakings to Rogers, marking an important milestone towards closing of the Rogers-Shaw Transaction. On April 27, 2022, the National Pensioners Federation and Public Interest Advocacy Centre (NPF-PIAC) filed a Petition to the federal Cabinet requesting that the CRTC decision approving the change of ownership and effective control of Shaw's licensed broadcasting assets be set aside or referred back to the CRTC for reconsideration and hearing. On June 22, 2022, Cabinet declined to consider the NPF-PIAC Petition.

The Rogers-Shaw Transaction remains under review by Innovation, Science and Economic Development Canada ("ISED"), as the Minister of Innovation, Science and Industry must approve any direct or indirect transfer of Shaw's spectrum licences.

In accordance with the terms of the Arrangement Agreement, Rogers and Shaw filed pre-merger notifications pursuant to Part IX of the Competition Act (Canada) in April 2021 to trigger the Competition Bureau's review of the Rogers-Shaw Transaction. On May 9, 2022, the Commissioner of Competition (the "Commissioner") filed applications to the Competition Tribunal (the "Tribunal") seeking an order to prevent the Rogers-Shaw Transaction from proceeding and an interim injunction to prevent closing until the Competition Bureau's case can be heard by the Tribunal. The Commissioner must ultimately prove his case before the Tribunal in a hearing in order to prevent the Rogers-Shaw Transaction from being completed.

On May 30, 2022, the Commissioner's interim injunction application was resolved on the basis that Rogers and Shaw agreed to not proceed with closing the Rogers-Shaw Transaction until either a negotiated settlement is agreed with the Commissioner or the Tribunal has ruled on the matter. As a result, there is no need for the Tribunal to hear the Commissioner's application for an interim injunction. Resolving the interim injunction application allows the parties to focus on addressing the Commissioner's concerns with the Rogers-Shaw Transaction in order to reach a settlement.

[all amounts in millions of Canadian dollars, except share and per share amounts]

Agreement to Sell Freedom Mobile to Quebecor

Subsequent to quarter-end, on June 17, 2022, Rogers and Shaw entered into a divestiture agreement for the sale of Freedom Mobile to Quebecor Inc. ("Quebecor") for a purchase price of $2.85 billion (the "Freedom Transaction"), which is subject to regulatory approvals from the Commissioner and the Minister of Innovation, Science and Industry (the "Minister"), and conditional on: (i) the completion of the Rogers-Shaw Transaction; and (ii) entering into definitive documentation on or before July 15, 2022, or such later date as Rogers and Quebecor reasonably agree to in writing. Shaw, Rogers and Quebecor strongly believe the agreement effectively addresses the concerns raised by the Commissioner and the Minister regarding viable and sustainable wireless competition in Canada.

Under the terms of the divestiture agreement, Quebecor will acquire all Freedom Mobile-branded wireless and Internet customers as well as all of Freedom Mobile's infrastructure, spectrum and retail locations. The agreement does not contemplate the divestiture of Shaw Mobile-branded wireless subscribers. The Freedom Transaction includes long-term agreements by Shaw and Rogers to provide Quebecor transport services (including backhaul and backbone), roaming services and other services for the provision of Freedom's mobile wireless network. Rogers and Quebecor will provide each other with customary transition services as are necessary to operate Freedom's business for a reasonable period of time post-closing and to facilitate the separation of Freedom's business from the other businesses and operations of Shaw and its affiliates. The parties will work expeditiously and in good faith to finalize definitive documentation on or before July 15, 2022, or such later date as Rogers and Quebecor reasonably agree to in writing. Closing of the Freedom Transaction will occur substantially concurrently with closing of the Rogers-Shaw Transaction.

Rogers and Shaw Continue to Work with Regulatory Authorities to Secure the Requisite Regulatory Approvals

Rogers and Shaw continue to engage constructively with the Competition Bureau in an effort to reach a negotiated settlement, which offers the most expeditious path forward to closing the Rogers-Shaw Transaction and delivering its benefits to Canadians. While the divestiture agreement with Quebecor provides a basis for advancing settlement negotiations with the Commissioner, Rogers and Shaw are also taking the necessary steps to oppose the Commissioner's application to prevent the Rogers-Shaw Transaction. On June 3, 2022, each of Rogers and Shaw filed a written response disputing the basis for the Commissioner's application, and on June 16, 2022, the Commissioner filed his written reply to these responses. On June 17, 2022, the Tribunal issued an order setting the timeframe for its consideration of the Commissioner's application. The Tribunal's scheduling order includes a voluntary mediation process, currently scheduled for July, in which the parties have agreed to participate. Should it be required, the Tribunal hearing of the Commissioner's application is expected to occur in November and December of this calendar year.

In order to permit continued engagement with the pending regulatory approval processes, Rogers, Shaw and the Shaw Family Living Trust agreed to extend the Outside Date for closing the Rogers-Shaw Transaction from June 13, 2022 to July 31, 2022 in accordance with the terms of the Arrangement Agreement. Subject to receipt of all required approvals and satisfaction of all closing conditions, the parties are working towards closing of Rogers-Shaw Transaction on or before July 31, 2022. Nonetheless, the time required for Rogers and Shaw to address the Commissioner's concerns and agree on the terms of a negotiated settlement with the Commissioner (or any associated litigation, including the Tribunal hearing), as well as ISED approval, and any appeals of the outcomes of these processes, is uncertain and could result in further delays in or prevent the closing of the Rogers-Shaw Transaction.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

May 31, 2022 and May 31, 2021
[all amounts in millions of Canadian dollars, except share and per share amounts]

2. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Statement of compliance

These condensed interim consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and in compliance with International Accounting Standard (IAS) 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

The condensed interim consolidated financial statements of the Company for the three and nine months ended May 31, 2022 were authorized for issue by the Board of Directors on June 30, 2022.

Basis of presentation

These condensed interim consolidated financial statements have been prepared primarily under the historical cost convention except as detailed in the significant accounting policies disclosed in the Company's consolidated financial statements for the year ended August 31, 2021 and are expressed in millions of Canadian dollars unless otherwise indicated. The condensed interim consolidated statements of income are presented using the nature classification for expenses.

The notes presented in these condensed interim consolidated financial statements include only significant events and transactions occurring since the Company's last fiscal year end and are not fully inclusive of all matters required to be disclosed by IFRS in the Company's annual consolidated financial statements. As a result, these condensed interim consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended August 31, 2021.

The condensed interim consolidated financial statements follow the same accounting policies and methods of application as the most recent annual consolidated financial statements.

3. BUSINESS SEGMENT INFORMATION

The Company's chief operating decision makers are the Executive Chair & Chief Executive Officer, the President, and the Executive Vice President, Chief Financial & Corporate Development Officer and they review the operating performance of the Company by segments, which are comprised of Wireline and Wireless. The chief operating decision makers utilize adjusted earnings before interest, income taxes, depreciation and amortization ("adjusted EBITDA") for each segment as a key measure in making operating decisions and assessing performance.

The Wireline segment provides Cable telecommunications services including Video, Internet, WiFi, Phone, Satellite Video and data networking through a national fibre-optic backbone network to Canadian consumers, North American businesses and public-sector entities. The Wireless segment provides wireless services for voice and data communications serving customers in Ontario, British Columbia and Alberta through Freedom Mobile and in British Columbia and Alberta through Shaw Mobile.

Both of the Company's reportable segments are substantially located in Canada. Information on operations by segment is as follows:

Operating information

	Three months ended May 31,		Nine months ended May 31,	
	2022	2021	**2022**	2021
Revenue				
Wireline	**1,038**	1,080	**3,135**	3,190
Wireless	**311**	298	**966**	951
	1,349	1,378	**4,101**	4,141
Intersegment eliminations	**(3)**	(3)	**(10)**	(9)
	1,346	1,375	**4,091**	4,132
Adjusted EBITDA(1)				
Wireline	**515**	527	**1,548**	1,599
Wireless	**129**	115	**362**	287
	644	642	**1,910**	1,886
Restructuring costs	**-**	(1)	**-**	(14)
Amortization	**(304)**	(300)	**(909)**	(909)
Operating income	**340**	341	**1,001**	963
Current taxes				
Operating	**71**	39	**239**	117
Other/non-operating	**-**	(127)	**5**	(125)
	71	(88)	**244**	(8)

(1) Adjusted EBITDA does not have any standardized meaning prescribed by IFRS and is therefore unlikely to be comparable to similar measures presented by other issuers; the Company defines adjusted EBITDA as revenues less operating, general and administrative expenses.

[all amounts in millions of Canadian dollars, except share and per share amounts]

11. SHARE CAPITAL

Changes in share capital during the nine months ended May 31, 2022 are as follows:

	Class A Shares		Class B Shares	
	Number	$	Number	$
August 31, 2021	22,372,064	2	476,537,262	4,197
Issued upon stock option plan exercises	-	-	454,285	13
Issued upon restricted share unit exercises	-	-	10,085	-
May 31, 2022	**22,372,064**	**2**	**477,001,632**	**4,210**

Normal Course Issuer Bid

On November 2, 2020, the Company announced that it had received approval from the TSX to establish a normal course issuer bid (NCIB) program. The program commenced on November 5, 2020 and ended November 4, 2021. As approved by the TSX, the Company had the ability to purchase for cancellation up to 24,532,404 Class B Shares representing approximately 5% of all of the issued and outstanding Class B Shares as at October 22, 2020. In connection with the announcement of the Rogers-Shaw Transaction on March 15, 2021 (as discussed in more detail in Note 1), the Company suspended share buybacks under its NCIB program.

12. EARNINGS PER SHARE

Earnings per share calculations are as follows:

	Three months ended May 31,		Nine months ended May 31,	
	2022	2021	**2022**	2021
Numerator for basic and diluted earnings per share ($)				
Net income	**203**	354	**595**	734
Deduct: dividends on Preferred Shares	**-**	(2)	**-**	(6)
Net income attributable to common shareholders	**203**	352	**595**	728
Denominator (millions of shares)				
Weighted average number of Class A Shares and Class B Shares for basic earnings per share	**499**	499	**499**	505
Effect of dilutive securities [(1)]	**2**	2	**2**	-
Weighted average number of Class A Shares and Class B Shares for diluted earnings per share	**501**	501	**501**	505
Earnings per share ($)				
Basic	**0.41**	0.71	**1.19**	1.44
Diluted	**0.41**	0.70	**1.19**	1.44

(1) The earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options since their impact is anti-dilutive. For the three and nine months ended May 31, 2022, nil (May 31, 2021 – nil) and nil (May 31, 2021 – 4,072,443) options were excluded from the diluted earnings per share calculation, respectively.

Wireless	**245**	225	**722**	658
	1,283	1,305	**3,857**	3,848
Equipment and other				
Wireless	**66**	73	**244**	293
	66	73	**244**	293
Intersegment eliminations	**(3)**	(3)	**(10)**	(9)
Total revenue	**1,346**	1,375	**4,091**	4,132

Remaining performance obligations

The following table includes revenues expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) as at May 31, 2022.

	Within 1 year	**Within 2 years**	**Within 3 years**	**Within 4 years**	**Within 5 years**	**Thereafter**	**Total**
Wireline	1,770	772	155	84	22	3	2,806
Wireless	337	102	-	-	-	-	439
Total	**2,107**	**874**	**155**	**84**	**22**	**3**	**3,245**

When estimating minimum transaction prices allocated to the remaining unfilled, or partially unfulfilled, performance obligations, Shaw applied the practical expedient to not disclose information about remaining performance obligations that have original expected duration of one year or less and for those contracts where we bill the same value as that which is transferred to the customer. The estimated amounts disclosed are based upon contractual terms and maturities. Revenues recognized based on actual minimum transaction price, and the timing thereof, will differ from these estimates due to the frequency with which the actual durations of contracts with customers do not match their contractual maturities.

14. OPERATING, GENERAL AND ADMINISTRATIVE EXPENSES AND RESTRUCTURING COSTS

	Three months ended May 31,		Nine months ended May 31,	
	2022	2021	**2022**	2021

18. FAIR VALUE

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments

The fair value of financial instruments has been determined as follows:

(i) Current assets and current liabilities

The fair value of financial instruments included in current assets and current liabilities approximates their carrying value due to their short-term nature.

(ii) Investments and other assets and other long-term assets

The fair value of publicly traded investments is determined by quoted market prices. Investments in private entities which do not have quoted market prices in an active market and whose fair value cannot be readily measured are carried at approximate fair value. No published market exists for such investments. These equity investments have been made as they are considered to have the potential to provide future benefit to the Company and accordingly, the Company has no current intention to dispose of these investments in the near term. The fair value of long-term receivables approximates their carrying value as they are recorded at the net present values of their future cash flows, using an appropriate discount rate.

(iii) Long-term debt

The carrying value of long-term debt is at amortized cost based on the initial fair value as determined at the time of issuance or at the time of a business acquisition. The fair value of publicly traded notes is based upon current trading values. The fair value of finance lease obligations is determined by discounting future cash flows using a rate for loans with similar terms, conditions and maturity dates. The carrying value of bank credit facilities approximates fair value as the debt bears interest at rates that fluctuate with market values. Other notes and debentures are valued based upon current trading values for similar instruments.

The carrying value and estimated fair value of long-term debt are as follows:

	May 31, 2022		August 31, 2021	
	Carrying value	**Estimated fair value**	Carrying value	Estimated fair value
Liabilities				
Long-term debt (including current portion)[1]	**4,552**	**4,487**	4,550	5,263

(1) Level 2 fair value – determined by valuation techniques using inputs based on observable market data, either directly or indirectly, other than quoted prices.

(iv) Derivative financial instruments

The fair value of US currency forward purchase contracts is determined by an estimated credit-adjusted mark-to-market valuation using observable forward exchange rates at the end of reporting periods and contract forward rates.

May 31, 2022 and May 31, 2021
[all amounts in millions of Canadian dollars, except share and per share amounts]

19. INTANGIBLES AND GOODWILL

Impairment testing of indefinite-life intangibles and goodwill

The Company performs its annual impairment test on goodwill and indefinite-life intangibles as at February 1 each year. There have been no changes to the assets and liabilities making up the CGUs since the last test performed as at February 1, 2021. The prior test also resulted in a recoverable amount that exceeded the carrying amount by a substantial margin. The Company performed a qualitative assessment of the factors impacting the determination of recoverable amount and concluded that the likelihood that a recoverable amount calculation as at February 1, 2022, would be less than the carrying amount of the CGUs is remote. As such, the key assumptions used in the impairment test remain consistent with those disclosed for the February 1, 2021 test.

As a result of the announcement Rogers and Shaw are engaged in a process to sell Freedom Mobile conditioned on the closure of the Rogers-Shaw Transaction, management reviewed the estimated recoverable amount of its Wireless CGU and determined that there was no impairment as at May 31, 2022.

20. SUBSEQUENT EVENT

On June 17, 2022, Rogers and Shaw entered into a divestiture agreement for the sale of Freedom Mobile to Quebecor Inc. ("Quebecor") for a purchase price of $2.85 billion (the "Freedom Transaction"), which is subject to regulatory approvals from the Commissioner and the Minister of Innovation, Science and Industry (the "Minister"), and conditional on: (i) the completion of the Rogers-Shaw Transaction; and (ii) entering into definitive documentation on or before July 15, 2022, or such later date as Rogers and Quebecor reasonably agree to in writing. Given the circumstances surrounding the planned sale, management concluded that this bid is not indicative of impairment.

This is Exhibit 44 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC. AND ITS SUBSIDIARIES
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2014 and 2013

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. and its subsidiaries are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of the Corporation and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the Corporation's annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with the Corporation's management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

Pierre Dion
President and Chief Executive Officer

Jean-François Pruneau
Senior Vice President and Chief Financial Officer

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

We have audited the accompanying consolidated financial statements of Quebecor Inc. and its subsidiaries, which comprise the consolidated balance sheets as at December 31, 2014, 2013 and January 1, 2013 and the consolidated statements of income, comprehensive income, equity and cash flows for the years ended December 31, 2014 and 2013, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Quebecor Inc. and its subsidiaries as at December 31, 2014, 2013 and January 1, 2013, and their financial performance and their cash flows for the years ended December 31, 2014 and 2013 in accordance with International Financial Reporting Standards.

Jean La Couture, Director

QUEBECOR INC. AND ITS SUBSIDIARIES

SEGMENTED INFORMATION

Years ended December 31, 2014 and 2013
(in millions of Canadian dollars)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media Inc. ("Quebecor Media") and in subsidiaries controlled by Quebecor Media. The percentages of voting rights and of equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	75.4 %	75.4 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	51.5 %
Sun Media Corporation	100.0 %	100.0 %
Quebecor Media Printing Inc.	100.0 %	100.0 %
Archambault Group Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet, business solutions, cable and mobile telephony services in Canada and is engaged in the rental of movies, televisual products and console games through its video-on-demand service and rentals stores. This segment also operates retail stores specialized in the sale of cultural and entertainment products, and offers online sales of downloadable music and books in Québec. The operations of the Media segment in Québec include the printing, publishing and distribution of daily newspapers, the printing of commercial inserts, the operation of an over-the-air television network, the operation of television specialty services, the operation of studio, soundstage and equipment leasing and post-production services for the film and television industries, the operation of Internet portals and specialized sites, the publishing of books and magazines, the distribution of books, magazines and movies and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass show production, sporting and cultural events management, music production, distribution and streaming, the operation of two Quebec Major Junior Hockey League ("QMJHL") teams, and the operation and management of the future Québec City amphitheatre.

In 2014, the Corporation changed its organisational structure and its operations are now managed through the following three segments: Telecommunications, Media, and Sports and Entertainment. The reorganization consisted in (a) the creation of the new Media segment, which includes all activities of the previous News Media and Broadcasting segments, as well as the book publishing and distribution activities previously included in the Leisure and Entertainment segment, (b) the creation of the new Sports and Entertainment segment, which includes all operating, production, distribution and management activities of the previous Leisure and Entertainment segment relating to music, entertainment, sports and the future Québec City amphitheatre, and (c) the transfer of the retail businesses from the previous Leisure and Entertainment segment to the Telecommunications segment. Accordingly, prior period figures in the Corporation's segmented information have been reclassified to reflect these changes.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

[1] The Chief Executive Officer uses adjusted operating income as the measure of profit to assess the performance of each segment. Adjusted operating income is referred as a non-International Financial Reporting Standards (“IFRS”) measure and is defined as net loss before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, impairment of assets and other special items, impairment of goodwill and intangible assets, loss on debt refinancing, income taxes and loss from discontinued operations.

See accompanying notes to consolidated financial statements.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board.

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (note 1(k) and 1(w)), the liability related to stock-based compensation (note 1(u)) and the net defined benefit liability (note 1(v)), and are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation and its subsidiaries operate ("functional currency").

Comparative figures for the year ended December 31, 2013 have been restated to conform to the presentation adopted for the year ended December 31, 2014.

(b) Changes in accounting policies

On January 1, 2014, the Corporation adopted retrospectively IFRIC 21 – *Levies*, which clarifies the timing of accounting for a liability in relation with outflow of resources that is imposed by governments in accordance with legislation, based on the activity that triggers the payment. The adoption of this interpretation did not have a material impact on the consolidated financial statements.

In May 2014, the IFRS Interpretations Committee ("the Committee") published a summary of its meeting discussion on the accounting for a financial instrument that is convertible into a variable number of shares subject to a cap or a floor. The Committee noted that different accounting treatments had been used by issuers in the past for this type of instrument. Although interpretation analysis of alternative treatments were expressed and provided by some market participants to the Committee, the Committee decided not to add this issue to its agenda and noted that this instrument should be accounted for as a liability in its entirety. As such, the Corporation retrospectively changed its accounting policy for the accounting of its convertible debentures to be in line with the Committee discussions. Accordingly, the Corporation's convertible debentures are now accounted for as a financial liability and the cap and floor conversion prices features are now accounted for separately as embedded derivatives at fair value, with changes in fair value being recorded in income. The following tables summarize the impact of this change of accounting policy on previously reported financial information.

Consolidated statement of income and comprehensive income

	2013
Financial expenses	$ 13.6
Loss on valuation and translation of financial instruments	145.5
Deferred income taxes	(4.4)
Net loss and comprehensive loss attributable to shareholders	$ (154.7)
Earnings per share attributable to shareholders:	
Basic	$ (1.25)

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Changes in accounting policies (continued)

Consolidated balance sheets

Increase (decrease)	2013	2012
Accounts payable and accrued charges	$ (11.6)	$ (10.7)
Convertible debentures	500.0	500.0
Other liabilities[1]	40.7	(119.2)
Deferred income tax liability	25.9	30.2
Equity component of convertible debentures	(398.3)	(398.3)
Retained earnings	(156.7)	(2.0)

[1] Embedded derivatives related to the convertible debentures are presented with other liabilities.

(c) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent's ownership interest in them. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(d) Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation's consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred.

Non-controlling interests in an entity acquired are presented in the consolidated balance sheet within equity, separately from the equity attributable to shareholders and are initially measured at fair value.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Foreign currency translation

Financial statements of the foreign operations disposed in 2014 (note 8) were translated using the rate in effect at the balance sheet date for assets and liabilities, and using the average exchange rates during the period for revenues and expenses. Adjustments arising from foreign currency translation since January 1, 2010 were recorded in other comprehensive income.

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transactions. Translation gains and losses on assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments, unless hedge accounting is used.

(f) Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under “Deferred revenue” when customers are invoiced.

Revenue recognition policies for each of the Corporation’s main activities are as follows:

<u>Telecommunications</u>

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet, cable telephony or mobile telephony, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income. Operating revenues from cable and other services, such as Internet access, cable and mobile telephony, are recognized when services are rendered. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate. Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction of related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction of related equipment sales on activation. Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided.

Revenues from the retail activities are recognized at the time of delivery, net of provisions for estimated returns based on historical rate of returns.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition (continued)

Media

Advertising revenues derived from the sale of advertising airtime are recognized when the advertisement has been broadcast on television. Advertising revenues derived from the newspapers and magazines publishing activities are recognized when the publication is delivered. Website advertising is recognized when advertisements are placed on websites.

Revenues derived from subscriptions to specialty television channels are recognized on a monthly basis at the time service is rendered.

Revenues from the sale or distribution of newspapers, magazines and books, are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns.

Revenues derived from subscription to online publications are recognized over the period of the subscription.

Sports and Entertainment

Revenues derived from entertainment products distribution are recognized on delivery of the products, net of provisions for estimated returns based on historical rate of returns.

Revenues derived from show production and sporting and cultural event management are recognized once the event or production occurs or when services are rendered.

(g) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units (“CGUs”), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews at each balance sheet date whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs to sell and the value in use of the asset or the CGU. Fair value less costs to sell represents the amount an entity could obtain at the valuation date from the asset’s disposal in an arm’s length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU’s carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment losses had been previously recognized.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(h) Barter transactions

In the normal course of operations, the Media segment principally offer advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of the goods and services provided.

For the year ended December 31, 2014, the Corporation recorded $14.5 million of barter advertising revenues ($15.2 million in 2013).

(i) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized in other comprehensive income or otherwise directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and due to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(j) Leases

Assets under leasing agreements are classified at the inception of the lease as (i) finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee, or as (ii) operating leases for all other leases.

Operating lease rentals are recognized in the consolidated statement of income on a straight-line basis over the period of the lease. Any lessee incentives are deferred and then recognized evenly over the lease term.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments

Classification, recognition and measurement

Financial instruments are classified as held-for-trading, available-for-sale, held-to-maturity, loans and receivables, or as other financial liabilities, and measurement in subsequent periods depends on their classification. The Corporation has classified its financial instruments (except derivative financial instruments) as follows:

Held-for-trading	Loans and receivables	Available-for-sale	Other liabilities
• Cash and cash equivalents • Bank indebtedness • Exchangeable debentures	• Accounts receivable • Loans and other long-term receivables included in “Other assets”	• Other portfolio investments included in “Other assets”	• Accounts payable and accrued charges • Provisions • Long-term debt • Convertible debentures • Other long-term financial liabilities included in “Other liabilities”

Financial instruments held-for-trading are measured at fair value with changes recognized in income as a gain or loss on valuation and translation of financial instruments. Available-for-sale portfolio investments are measured at fair value or at cost in the case of equity investments that do not have a quoted market price in an active market and where fair value is insufficiently reliable, and changes in fair value are recorded in other comprehensive income. Financial assets classified as loans and receivables and financial liabilities classified as other liabilities are initially measured at fair value and subsequently measured at amortized cost, using the effective interest rate method of amortization. Liabilities recognized as a result of contingent consideration arising from a business acquisition and included in other liabilities, are initially recorded at their acquisition-date fair value and re-measured at fair value in subsequent periods. These changes in fair value are recorded in income as other special items.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debt resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of these derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(l) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(m) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are met.

(n) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(o) Trade receivables

Trade receivables are stated at their nominal value, less an allowance for doubtful accounts and an allowance for sales returns. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. Individual accounts receivables are written off when management deems them not collectible.

(p) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

In particular, inventories related to broadcasting activities, which primarily are comprised of programs and broadcast and distribution rights, are accounted for as follows:

(i) Programs produced and productions in progress

Programs produced and productions in progress related to broadcasting activities are accounted for at the lesser of cost and net realizable value. Cost includes direct charges for goods and services and the share of labour and general expenses related to each production. The cost of each program is charged to operating expenses when the program is broadcast.

(ii) Broadcast rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. The Corporation records the broadcast rights acquired as inventory and the obligations incurred under a license agreement as a liability when the broadcast period begins and all of the following conditions have been met: (a) the cost of each program, movies, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the broadcast license agreement; (c) the programs, movies or series are available for first showing or telecast or the live event is broadcasted.

Amounts paid for broadcast rights before all of the above conditions are met are recorded as prepaid broadcast rights.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Inventories (continued)

(ii) Broadcast rights (continued)

Broadcast rights are classified as current or long-term, based on management's estimate of the broadcast period. These rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on the manner future economic benefits from these rights will be generated. Broadcast rights payable are classified as current or long-term liabilities based on the payment terms included in the license.

(iii) Distribution rights

Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records an inventory and a liability for the distribution rights and obligations incurred under a license agreement when (a) the cost of the license is known or can be reasonably estimated, (b) the televisual product and movie has been accepted in accordance with the conditions of the license agreement, and (c) the televisual product or movie is available for distribution.

Amounts paid for distribution rights before all of the above conditions are met are recorded as prepaid distribution rights. Distribution rights are charged to operating expenses using the individual film forecast computation method based on actual revenues realized over total future economic benefits expected.

Estimates of future revenues used to determine net realizable values of inventories related to the broadcasting or distribution of television products and movies, are examined periodically by management and revised as necessary. The carrying value of programs produced and productions in progress, broadcast rights and distribution rights is reduced to net realizable value, as necessary, based on this assessment.

(q) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statement of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

(r) Property, plant and equipment

Property, plant and equipment are stated at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment when the development of the asset commenced after January 1, 2010. Expenditures, such as maintenance and repairs, are expensed as incurred.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Property, plant and equipment (continued)

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful life
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at each financial year-end. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and economic life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for these assets. A decommissioning obligation is however recorded for the rental of sites related to the advanced mobile network.

Videotron Ltd. (“Videotron”) is engaged in an agreement to operate a shared Long Term Evolution mobile network in the Province of Québec and in the Ottawa region.

(s) Goodwill and intangible assets

<u>Goodwill</u>

For all business acquisitions entered into since January 1, 2010, goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. When the Corporation acquires less than 100% of the equity interests in the business acquired at the acquisition date, goodwill attributable to the non-controlling interests is also recognized at fair value.

For business acquisitions that occurred prior to January 1, 2010, goodwill represented the excess of the cost of acquisition over the Corporation’s interest in the fair value of the identifiable assets and liabilities of the business acquired at the date of acquisition. No goodwill attributable to non-controlling interests was recognized for these business acquisitions.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(g)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(s) Goodwill and intangible assets (continued)

Intangible assets

Broadcasting licenses and mastheads have indefinite useful lives and are not amortized. In particular, given the low cost of renewal of broadcasting licenses, management believes it is economically compelling to renew the licenses and to comply with all rules and conditions attached to those licenses.

Internally generated intangible assets are mainly comprised of internal costs in connection with the development of software to be used internally or for providing services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset that commenced after January 1, 2010 are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful life
Spectrum licenses	10 years
Software	3 to 7 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at each financial year-end. Any change is accounted for prospectively as a change in accounting estimate.

(t) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

(u) Stock-based compensation

Stock-based awards to employees that call for settlement in cash or other assets at the option of the employee are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

Estimates of the fair value of stock option awards are determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 24.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive income and in accumulated other comprehensive income. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation;
- changes in the net benefit asset limit or in the minimum funding liability.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent to which the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers rebate on telecommunication services, health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion prices features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statement of income as a gain or loss on valuation and translation of financial instruments.

(x) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from these estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs to sell or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statement of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 17.

(ii) Fair value of derivative financial instruments, including embedded derivatives

Derivative financial instrument must be accounted for at their fair value, which is estimated using valuation models based on a number of assumptions such as future cash flows, period-end swap rates, foreign exchange rates, and credit default premium. Also, the fair value of embedded derivatives related to early settlement options on debt is determined with option pricing models using market inputs, including volatility, discount factors and underlying instruments adjusted implicit interest rate and credit premium. The assumptions used in the valuation models have a significant impact on the gain or loss on valuation and translation of financial instruments recorded in the consolidated statement of income, the gain or loss on valuation of financial instruments recorded in the consolidated statement of comprehensive income, and the carrying value of derivative financial instruments in the consolidated balance sheet. A description of valuation models used and sensitivity analysis on key assumptions are presented in note 29.

(iii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statement of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statement of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheet. Key assumptions and sensitivity analysis on the discount rate are presented in note 31.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(iv) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to third parties at the date of assessment. An assessment of the probable outcomes of legal proceedings or other contingency is also required. A description of the main provisions, including management expectations on the potential effect on the consolidated financial statements of the possible outcomes of legal disputes, is presented in note 20.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Determination of useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Determination of CGUs for the purpose of impairment test

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets. In identifying assets to group in CGUs, the Corporation considers, among other factors, offering bundled services, sharing telecommunication or broadcasting networks infrastructure, integration of media assets, geographical proximity, similarity on exposure to market risk, and materiality. The determination of CGUs could affect the results of impairment tests and, as the case may be, the impairment charge recorded in the consolidated statement of income.

(iii) Determination if early settlement options are not closely related to their debt contract

Early settlement options are not considered closely related to their debt contract when the corresponding option exercise price is not approximately equal to the amortized cost of the debt. Judgment is required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statement of income.

(iv) Interpretation of laws and regulations

Interpretation of laws and regulation, including tax regulations, requires judgment from management that could have an impact on the recognition of provisions for legal litigation and income taxes in the consolidated financial statements.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(y) Recent accounting pronouncements

The Corporation has not yet completed its assessment of the impact of the adoption of these pronouncements on its consolidated financial statements.

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk management activities undertaken by entities.

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2017, with early adoption permitted.

IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles based five-step model to be applied to all contracts with customers.

2. REVENUES

The breakdown of revenues between services rendered and product sales is as follows:

	2014	2013
Services rendered	**$ 3,252.1**	$ 3,168.8
Product sales	**464.0**	478.7
	$ 3,716.1	$ 3,647.5

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

3. EMPLOYEE COSTS AND PURCHASE OF GOODS AND SERVICES

The main components are as follows:

	2014	2013
Employee costs	**$ 836.9**	$ 848.1
Less: Employee costs capitalized to property, plant and equipment and intangible assets	**(156.7)**	(145.4)
	680.2	702.7
Purchase of goods and services:		
Royalties, rights and creation costs	**666.5**	649.1
Cost of retail products	**323.9**	289.5
Marketing, circulation and distribution expenses	**82.2**	82.5
Service and printing contracts	**151.4**	163.1
Paper, ink and printing supplies	**46.9**	49.1
Other	**366.1**	341.4
	1,637.0	1,574.7
	$ 2,317.2	$ 2,277.4

4. FINANCIAL EXPENSES

	2014	2013 (restated, note 1(b))
Interest on long-term debt and on debentures	**$ 338.9**	$ 366.6
Amortization of financing costs and long-term debt discount	**8.7**	12.0
Interest on net defined benefit liability	**5.1**	11.4
Loss on foreign currency translation on short-term monetary items	**4.0**	2.7
Other	**(6.0)**	(4.4)
	$ 350.7	$ 388.3

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

5. LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	2014	2013 (restated, note 1(b))
Loss on embedded derivatives related to long term debt and derivative financial instruments for which hedge accounting is not used	**$ 7.9**	$ 173.2
Loss on embedded derivatives related to convertible debentures	**91.6**	140.0
(Gain) loss on reversal of embedded derivatives upon debt redemption	**(1.1)**	72.9
Gain on the ineffective portion of cash flow hedges	**(0.5)**	(1.7)
Gain on the ineffective portion of fair value hedges	**(3.2)**	–
	$ 94.7	$ 384.4

6. RESTRUCTURING OF OPERATIONS, IMPAIRMENT OF ASSETS AND OTHER SPECIAL ITEMS

	2014	2013
Restructuring of operations	**$ 10.5**	$ 8.7
Loss related to a legal litigation	**34.3**	–
Impairment of assets	**6.7**	2.1
Loss on disposal of assets	**0.1**	0.8
Other	**2.8**	–
	$ 54.4	$ 11.6

Telecommunications

In 2014, the Telecommunications segment recorded a charge for restructuring costs of $3.3 million ($1.8 million in 2013) and a charge for impairment of assets of $3.4 million (none in 2013).

Also in 2014, the Telecommunications segment recorded a charge of $34.3 million, including interest, as a result of an unfavorable judgment against Videotron in a legal action. Videotron intends to appeal this judgment.

Media

In recent years, the Media segment has implemented various restructuring initiatives to reduce operating costs. As a result of these initiatives, restructuring costs of $6.5 million, mainly for the reduction of positions, were recorded in 2014 ($6.7 million in 2013). As part of these restructuring initiatives, a loss on disposal of assets of $0.1 million was recorded in 2014 (a gain of $0.1 million in 2013), while a charge for impairment of assets of $2.1 million was recorded in 2013.

In 2014, the Media segment also recorded a charge for impairment of assets of $3.3 million related to broadcasting assets and other special charges of $2.6 million mainly related to business acquisitions (none in 2013).

6. RESTRUCTURING OF OPERATIONS, IMPAIRMENT OF ASSETS AND OTHER SPECIAL ITEMS (continued)

Other segments

In 2014, other segments recorded a charge for restructuring costs of $0.7 million ($0.2 million in 2013) and other special charges of $0.2 million (none in 2013). A loss on disposal of assets of $0.9 million was recorded in 2013.

7. IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS

2014

During the second quarter of 2014, the Corporation performed its annual impairment tests on its CGUs. The Corporation concluded that the recoverable amount based on fair value less costs of disposal was less than the carrying amount of its Newspapers CGU, which revenues continued to be negatively affected by the digital transformation and weak market conditions in the newspaper industry. Accordingly, the Media segment recorded a non-cash goodwill impairment charge of $190.0 million (without any tax consequence), of which $160.0 million is presented as part of discontinued operations.

During the third quarter of 2014, the Corporation completed its annual review of its three-year strategic plan. Market conditions in the television industry led the Corporation to perform an impairment test on its Broadcasting CGU. The Corporation concluded that the recoverable amount based on fair value less costs of disposal was less than the carrying amount of the CGU. Accordingly, a non-cash impairment charge of $41.7 million on broadcasting licenses (including $20.9 million without any tax consequence) and a non-cash goodwill impairment charge of $9.3 million (including $3.9 million without any tax consequence) were recorded in the Media segment.

2013

During the third quarter of 2013, the Corporation performed impairment tests on its Newspapers, Music and Book CGUs due to weak market conditions in their respective industries. Accordingly, the Media segment recorded a non-cash goodwill impairment charges of $229.0 million for its Newspaper CGU (without any tax consequence), of which $214.5 million is presented as part of discontinued operations. A non-cash impairment charge of $56.0 million on mastheads and customer relationships assets was also recorded as part of discontinued operations. A non-cash goodwill impairment charge of $11.9 million for the Book CGU (without any tax consequence) and of $8.9 million for the Music CGU (without any tax consequence) was also recorded by the Corporation.

8. DISCONTINUED OPERATIONS

2014

- In January 2014, the Corporation ceased its door-to-door distribution of flyers and weekly newspapers in the Province of Québec.
- On June 1, 2014, the Corporation sold its 74 Québec weeklies for a cash consideration of $75.0 million, of which $1.3 million is receivable as of December 31, 2014. An amount of $4.7 million was also received in 2014 relating to adjustments of working capital items transferred.
- On September 2, 2014, the Corporation sold its Nurun Inc. ("Nurun") subsidiary for a cash consideration consisting of $125.0 million, less cash disposed of $18.1 million. An amount of $8.2 million was also received relating to certain transaction adjustments.
- On October 6, 2014, the Corporation announced a transaction whereby it will sell all of its English-language newspaper operations in Canada, consisting of 175 newspapers and publications, the Canoe English portal and 8 printing plants, including the Islington, Ontario plant, for a cash consideration of $316.0 million. The transaction price will be payable in cash, subject to the customary adjustments and a $10.0 million adjustment, related primarily to real estate properties disposed by the Corporation subsequent to this transaction. The transaction is subject to authorization by the Competition Bureau. While the transaction is under review, Quebecor Media continues to operate all the businesses involved in the transaction.

2013

- On June 1, 2013, the Corporation sold its specialized Web site *Jobboom* for a cash consideration of $57.5 million, less cash disposed of $5.4 million.
- On November 29, 2013, the Corporation also sold its specialized Web site *Réseau Contact* for a cash consideration of $7.5 million, less cash disposed of $0.4 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. DISCONTINUED OPERATIONS (continued)

The results of operations and cash flows related to these businesses were reclassified as discontinued operations in the consolidated statements of income, comprehensive income and cash flows as follows:

Consolidated statements of income and comprehensive income

	2014	2013
Revenues	**$ 586.1**	$ 765.5
Employee costs	**231.8**	313.8
Purchase of goods and services	**259.7**	357.1
Depreciation and amortization	**25.1**	36.8
Financial expenses	**0.8**	2.0
Restructuring of operations, impairment of assets and other special items	**8.5**	20.0
Impairment of goodwill and intangible assets	**160.0**	270.5
Loss before income taxes	**(99.8)**	(234.7)
Current income taxes	**14.2**	13.2
Deferred income taxes	**1.0**	(16.5)
Gain on disposal of businesses	**49.5**	37.6
Loss from discontinued operations	**(65.5)**	(193.8)
Other comprehensive (loss) income:		
(Loss) gain on translation of net investments in foreign operations	**(1.7)**	4.4
Defined benefits plans:		
Re-measurement (loss) gain	**(7.9)**	31.9
Deferred income taxes	**2.0**	(8.0)
	(7.6)	28.3
Comprehensive loss from discontinued operations	**$ (73.1)**	$ (165.5)

Consolidated statements of cash flows

	2014	2013
Cash flows related to operating activities	**$ 72.3**	$ 19.0
Cash flows related to investing activities	**2.4**	(13.7)
Cash flows provided by discontinued operations	**$ 74.7**	$ 5.3

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. DISCONTINUED OPERATIONS (continued)

Components of assets and liabilities classified as held for sale in the consolidated balance sheet are as follows:

	2014	2013
Current assets	**$ 70.6**	$ 9.0
Property, plant and equipment	**171.4**	1.7
Intangible assets	**26.1**	17.6
Goodwill	**130.0**	48.6
Assets held for sale	**398.1**	76.9
Current liabilities	**(61.0)**	(9.0)
Long-term liabilities	**(36.9)**	–
Liabilities held for sale	**(97.9)**	(9.0)
Net assets held for sale	**$ 300.2**	$ 67.9

9. LOSS ON DEBT REFINANCING

<u>**2014**</u>

- In April 2014, Quebecor Media redeemed all of its issued and outstanding 7.75% Senior Notes due March 2016 in aggregate principal amount of US$380.0 million and settled its related hedging contracts for a total cash consideration of $367.8 million.
- In April 2014, Videotron redeemed US$260.0 million in aggregate principal amount of its issued and outstanding 9.125% Senior Notes due April 2018 for a total cash consideration of $295.4 million.

These transactions resulted in a total loss of $18.7 million in 2014, including a gain of $10.8 million previously reported in other comprehensive income.

<u>**2013**</u>

- In July 2013, Videotron redeemed US$380.0 million in aggregate principal amount of its issued and outstanding 9.125% Senior Notes due April 2018 and settled its related hedging contracts for a total cash consideration of $399.6 million.
- In August 2013, Quebecor Media redeemed US$265.0 million in aggregate principal amount of its issued and outstanding 7.75% Senior Notes due March 2016 and settled its related hedging contracts for a total cash consideration of $306.1 million.

These transactions resulted in a total loss of $18.9 million in 2013, including a gain of $14.5 million previously reported in other comprehensive income.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. BUSINESS ACQUISITIONS

2014

- In December 2014, the Media segment acquired, through TVA Group Inc. ("TVA Group"), substantially all of the assets (including certain operational liabilities assumed) of Global Vision A.R. Ltd. and its subsidiary ("Global Vision") for a purchase price of $116.1 million in cash. The purchase price is subject to a post-closing adjustment on working capital items. Global Vision operates in the film and television industry by offering soundstage and equipment leasing and post-production services. The assets acquired include Mel's La Cité du Cinéma in Montréal and Studio Melrose in Saint-Hubert, which facilities are used for both local and foreign film and television production, including American blockbusters. The purpose of this acquisition was to invest in sectors that are a good fit with the Media segment activities, with the effect of diversifying the segment revenues. Goodwill related to this acquisition arised principally from the reputation of assembled workforce, future growth and expected synergies.
- In 2014, the Corporation also acquired other businesses such as les Remparts de Québec, a hockey team from the QMJHL.

The preliminary purchase price allocation between the fair value of identifiable assets and liabilities related to business acquisitions in 2014 is summarized as follows:

		2014
Assets acquired		
Non-cash current assets	$	9.6
Property, plant and equipment		96.4
Intangible assets		17.1
Goodwill		18.0
		141.1
Liabilities assumed		
Non-cash current liabilities		(7.0)
Other long-term liabilities		(1.3)
		(8.3)
Net assets acquired at fair value	$	132.8
Consideration		
Cash	$	132.3
Balance payable		0.5
	$	132.8

The pro forma revenues and net income in 2014 would not have been significantly different than actual figures, if all business acquisitions had occurred at the beginning of the year.

The amount of goodwill that is deductible for tax purposes is $18.0 million in 2014 (none in 2013).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. BUSINESS ACQUISITIONS (continued)

2013

- In May 2013, the Sports and Entertainment segment acquired a Québec City sporting and cultural event management company.
- In July 2013, the Media segment acquired, through TVA Group, a magazine publisher and a book publisher in the Province of Québec.

11. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.9% in 2014 (26.9% in 2013), and income taxes in the consolidated statements of income:

		2014		2013 (restated, note 1(b))
Income taxes at domestic statutory tax rate	**$**	**35.6**	$	(26.6)
(Reduction) increase resulting from:				
Effect of provincial tax rate differences		**(0.8)**		(0.2)
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates		**42.4**		38.5
Change in benefit arising from the recognition of current and prior year tax losses		**2.2**		5.5
Non-deductible impairment of goodwill		**9.0**		9.5
Other		**2.9**		1.1
Income taxes	**$**	**91.3**	$	27.8

QUEBECOR INC. AND ITS SUBSIDIARIES

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

11. INCOME TAXES (continued)

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2014	2013	**2014**	2013
		(restated, note 1(b))		(restated, note 1(b))
Loss carryforwards	**$ 102.7**	$ 110.5	**$ 1.0**	$ 9.6
Accounts payable, accrued charges, provisions and deferred revenue	**7.3**	11.4	**4.1**	(0.5)
Defined benefit plans	**36.6**	27.2	**4.9**	1.8
Property, plant and equipment	**(444.8)**	(440.6)	**(59.5)**	14.9
Goodwill, intangible assets and other assets	**(75.6)**	(93.4)	**50.9**	(18.9)
Long-term debt, derivative financial instruments and convertible debentures	**(122.0)**	(95.5)	**5.6**	(65.0)
Benefits from a general partnership	**(56.5)**	(87.4)	**(30.9)**	(14.0)
Other	**(2.8)**	(2.7)	**–**	0.1
	$ (555.1)	$ (570.5)	**$ (23.9)**	$ (72.0)

Changes in the net deferred income tax liability are as follows:

	Note	**2014**	2013
			(restated, note 1(b))
Balance as of beginning of the year		**$ (570.5)**	$ (600.4)
Recognized in income as continuing operations		**25.8**	55.5
Recognized in income as discontinued operations	8	**(1.0)**	16.5
Recognized in other comprehensive income as continuing operations		**(8.6)**	(29.6)
Recognized in other comprehensive income as discontinued operations	8	**2.0**	(8.0)
Business acquisitions and disposals		**(2.4)**	(4.2)
Other		**(0.4)**	(0.3)
Balance as of the end of the year		**$ (555.1)**	$ (570.5)
Deferred income tax asset		**$ 7.8**	$ 28.1
Deferred income tax liability		**(528.8)**	(598.6)
Deferred income tax liability included in liabilities held for sale		**(34.1)**	–
		$ (555.1)	$ (570.5)

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

11. INCOME TAXES (continued)

As of December 31, 2014, the Corporation had loss carryforwards for income tax purposes of $35.0 million available to reduce future taxable income, including $22.3 million that will expire between 2031 and 2034, and $12.7 million that can be carried forward indefinitely. Of these losses, an amount of $15.0 million has not been recognized. The Corporation also had capital losses of $1,053.9 million that can be carried forward indefinitely and applied only against future capital gains, of which $211.1 million were not recognized.

There are no income tax consequences attached to the payment of dividends in 2014 or 2013 by the Corporation to its shareholders.

12. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net loss attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation’s subsidiaries on net (loss) income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net (loss) income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2014	2013 (restated, note 1(b))
Income (loss) from continuing operations attributable to shareholders	**$ 19.2**	$ (142.5)
Impact of assumed conversion of stock options of subsidiaries	**(0.3)**	–
Income (loss) income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 18.9**	$ (142.5)
Net loss attributable to shareholders	**$ (30.1)**	$ (288.6)
Impact of assumed conversion of stock options of subsidiaries	**(0.3)**	–
Net loss attributable to shareholders, adjusted for dilution effect	**$ (30.4)**	$ (288.6)
Weighted average number of diluted shares outstanding (in millions)	**123.0**	124.0

For the year ended December 31, 2014 and 2013, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation since their impact is anti-dilutive. During the year ended December 31, 2014, 90,000 options of the Corporation’s plan, no options of the Quebecor Media’s plan, and 525,368 options of TVA Group’s plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive (none in 2013, respectively).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. ACCOUNTS RECEIVABLE

	Note	2014	2013
Trade	29(c)	**$ 397.8**	$ 492.5
Other		**51.6**	73.8
		$ 449.4	$ 566.3

14. INVENTORIES

	2014	2013
Raw materials and supplies	**$ 21.0**	$ 26.7
Finished goods	**115.7**	140.8
Programs, broadcast and distribution rights	**73.3**	60.5
Work in progress	**2.2**	11.4
	$ 212.2	$ 239.4

Cost of inventories included in purchase of goods and services amounted to $873.4 million in 2014 ($830.2 million in 2013), of which $155.2 million is presented as part of discontinued operations in 2014 ($181.5 million in 2013). Write-downs of inventories totalling $4.4 million were recognized in purchase of goods and services in 2014 ($5.1 million in 2013).

QUEBECOR INC. AND ITS SUBSIDIARIES

As of December 31, 2014	**$ 554.1**	**$ 291.5**	**$ 32.3**	**$ 60.5**	**$ –**	**$ 7.4**	**$ 945.8**

1 Videotron has the option, effective as of January 1, 2014, to sell its unused AWS spectrum licence in the Toronto region to Rogers Communications Partnership for a price of $180.0 million. The spectrum licence was purchased at a cost of $96.4 million in 2008.

2 In 2014, Videotron acquired seven 700 MHz spectrum licences, covering the entirety of the provinces of Québec, Ontario (except Northern Ontario), Alberta and British Columbia, for a total price of $233.3 million, for which Videotron made a cash deposit of $15.9 million in 2013 and paid the balance in 2014.

3 Includes also the net change in assets related to discontinued operations.

The cost of internally generated intangible assets, mainly composed of software, was $415.8 million as of December 31, 2014 ($364.1 million as of December 31, 2013). For the year ended December 31, 2014, the Corporation recorded additions of internally generated intangible assets of $62.0 million ($45.2 million in 2013).

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. INTANGIBLE ASSETS (continued)

The accumulated amortization and impairment losses of internally generated intangible assets, mainly composed of software, was $209.8 million as of December 31, 2014 ($174.1 million as of December 31, 2013). For the year ended December 31, 2014, the Corporation recorded $44.8 million of amortization for its internally generated intangible assets ($42.1 million in 2013). The net carrying value of internally generated intangible assets was $206.0 million as of December 31, 2014 ($190.0 million as of December 31, 2013).

Broadcasting licenses are allocated to the Broadcasting CGU and mastheads are allocated to the Newspaper CGU, both part of the Media Segment.

17. GOODWILL

For the years ended December 31, 2014 and 2013, changes in the net carrying amount of goodwill are as follows:

Cost		
Balance as of December 31, 2012	$	6,993.2
Business acquisitions		5.7
Business disposals		(19.5)
Reclassification to assets held for sale		(118.6)
Other		2.1
Balance as of December 31, 2013		6,862.9

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

The net carrying amount of goodwill as of December 31, 2014 and 2013 is allocated to the following significant groups of CGUs:

Industry segment	Group of CGUs	**2014**	2013
Telecommunications	Telecommunications	**$ 2,570.3**	$ 2,570.3
Media	Newspapers	**85.0**	405.0
	Magazines	**35.8**	35.8
	Specialty film and television services	**12.3**	–
	Broadcasting	**–**	9.3
	Book publishing and distribution	**4.4**	4.4
Sports and Entertainment	Sports and Entertainment	**6.8**	1.0
Disposed business[1]		**–**	35.7
Total		**$ 2,714.6**	$ 3,061.5

[1] The goodwill in 2013 related to the Nurun subsidiary sold in September 2014 (note 8).

<u>Recoverable amounts</u>

Recoverable amounts of CGUs were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenues generated by a CGU or for each nature of expenses as well as for future capital expenditures. As such, assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcasting programming strategy, bargaining agreements, Canadian GDP rates and operating cost structures.

A perpetual growth rate is used for cash flows beyond the strategic plan three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transactions metrics and other financial information available, instead of using primarily the discounted cash flow method.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

Recoverable amounts (continued)

The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant group of CGUs:

	2014		2013	
Group of CGUs	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications:				
Telecommunications[1]	**8.9 %**	**2.5 %**	9.0 %	3.0 %
Media				
Newspapers[2]	**11.4**	**0.0**	12.7	0.0
Magazines[1]	**15.9**	**1.0**	16.4	1.0
Broadcasting[2]	**11.1**	**1.0**	11.3	1.0
Book publishing and distribution[1]	**15.8**	**1.0**	15.4	0.5

1 The recoverable amounts of these CGUs were based on value in use in 2014.

2 The recoverable amounts of these CGUs were based on fair value less costs of disposal in 2014 using a discounted cash flow method, except for the English newspapers activities, for which the fair value less costs of disposal was based on the metrics of an announced transaction (note 8). These fair values are classified as level 3 in the fair value hierarchy described in note 27(b).

Sensitivity of recoverable amounts

The following table presents, for each principal group of CGUs, the change in the discount rate or in the perpetual growth rate used for the tests performed that would have been required in order for the recoverable amount to equal the carrying value of the CGU as of the most recent impairment tests in 2014:

Group of CGUs[1]	**Incremental increase in pre-tax discount rate (WACC)**	**Incremental decrease in perpetual growth rate**
Telecommunications	4.8 %	5.2 %
Media:		
Magazines	4.0	5.7
Book publishing and distribution	8.4	12.7

1 No sensitivity tests were performed for CGUs on which impairment charges were recorded in the latest impairment tests.

Current portion	**$ 5.3**	**$ 51.4**	**$ 56.7**
Non-current portion	**–**	**4.7**	**4.7**

The recognition of provisions, in terms of both timing and amounts, requires the exercise of judgment based on relevant circumstances and events that can be subject to change over time. Provisions are primarily comprised of the following:

Restructuring of operations

Provisions for restructuring activities primarily cover severance payments related to initiatives to eliminate positions in the Media segment.

Contingencies and legal disputes

There are a number of legal proceedings against the Corporation and its subsidiaries that are pending. In the opinion of the management of the Corporation and its subsidiaries, the outcome of those proceedings is not expected to have a material adverse effect on the Corporation’s results or on its financial position. Management of the Corporation, after taking legal advice, has established provisions for specific claims or actions considering the facts of each case. The Corporation cannot determine when and if a payment related to these provisions will be made.

Other

Other provisions are principally related to contingent liability on business acquisition and decommissioning obligation.

21. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2016 in an amount of $150.0 million. The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares owned of Quebecor Media.

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in August 2017. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facilities of Quebecor Media are comprised of (a) a US$350.0 million secured term loan "B" facility issued in August 2013, bearing interest at LIBOR, subject to a LIBOR floor of 0.75%, plus a premium of 2.50% and (b) a $300.0 million secured revolving credit facility, bearing interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio, and maturing in January 2017. The term loan "B" facility provides for quarterly amortization payments totaling 1.00% per annum of the original principal amount, with the balance payable on August 17, 2020. These credit facilities contain covenants such as maintaining certain financial ratios, limitations on Quebecor Media's ability to incur additional indebtedness, pay dividends and make other distributions. They are secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2014, the credit facilities of Quebecor Media were secured by assets with a carrying value of $4,707.1 million ($4,668.4 million in 2013). As of December 31, 2014 and 2013, no amount was drawn on the revolving credit facility, while the balance of the term loan "B" was $400.0 million ($371.9 million in 2013).

(v) The long-term credit facility for the CAN dollar equivalent of €59.4 million, bears interest at Bankers' acceptance rate, plus a premium, and matures in July 2015. The facility is secured by all the property and assets of Quebecor Media, now owned and hereafter acquired. This facility mostly contains the same covenants as the revolving credit facility described in (iv).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(vi) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends or make other distributions. Some notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the notes and at a decreasing premium thereafter, while the remaining notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2014:

Principal amount	Annual nominal interest rate	Effective interest rate (after discount or premium at issuance)	Maturity date	Interest payable every 6 months on
Quebecor Media				
$ 325.0	7.375 %	7.375 %	January 15, 2021	June and December 15
US$ 850.0	5.750 %	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	6.625 %	January 15, 2023	June and December 15
Videotron				
US$ 175.0	6.375 %	6.444 %	December 15, 2015	June and December 15
US$ 75.0	9.125 %	9.375 %	April 15, 2018	June and December 15
$ 300.0	7.125 %	7.125 %	January 15, 2020	June and December 15
$ 300.0	6.875 %	6.875 %	July 15, 2021	June and December 15
US$ 800.0	5.000 %	5.000 %	July 15, 2022	January and July 15
US$ 600.0[1]	5.375 %	5.375 %	June 15, 2024	June and December 15
$ 400.0[2]	5.625 %	5.625 %	June 15, 2025	April and October 15

1 The notes were issued in April 2014 for net proceeds of $654.5 million, net of financing fees of $7.8 million.

2 The notes were issued in June 2013 for net proceeds of $394.8 million, net of financing fees of $5.2 million.

(vii) The bank credit facilities provide for a $575.0 million secured revolving credit facility that matures in July 2018 and a $75.0 million secured export financing facility providing for a term loan that matures in June 2018. The revolving credit facility bears interest at Bankers' acceptance rate, Canadian prime rate or U.S. prime rate, plus a margin, depending on Videotron's leverage ratio. Advances under the export financing facility bear interest at Bankers' acceptance rate plus a margin. The bank credit facilities are secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2014, the bank credit facilities were secured by assets with a carrying value of $6,238.3 million ($7,013.7 million in 2013). The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on Videotron's ability to incur additional indebtedness, pay dividends and make other distributions. As of December 31, 2014 and 2013, no amount was drawn on the revolving credit facility. As of December 31, 2014, $37.5 million ($48.2 million in 2013) was outstanding on the export financing facility.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(viii) The bank credit facilities of TVA Group are comprised of a secured revolving credit facility in the amount of $150.0 million, maturing in February 2019, and a secured term loan in the amount of $75.0 million, maturing in November 2019. TVA Group's revolving credit facility bears interest at floating rates based on Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate plus a premium determined by a leverage ratio. The term loan bears interest at floating rates based on Bankers' acceptance rate or Canadian prime rate plus a premium determined by a leverage ratio. The term loan provides for quarterly amortization payments commencing on December 20, 2015. The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends and make other distributions. They are secured by liens on all of its movable assets and an immovable hypothec on its head office building. The term loan has replaced the previous term loan at its maturity on December 11, 2014. As of December 31, 2014 and 2013, no amount was drawn on the revolving credit facility, and as of December 31, 2014, $74.8 million was outstanding on the term loan ($75.0 million in 2013).

On December 31, 2014, the Corporation and its subsidiaries were in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2015	$	230.1
2016		63.4
2017		51.8
2018		105.5
2019		56.9
2020 and thereafter		4,819.0

22. OTHER LIABILITIES

	Note		2014		2013
					(restated, note 1(b))
Defined benefit plans	31	**$**	**136.8**	$	113.3
Embedded derivatives related to convertible debentures			**232.2**		140.6
Deferred revenue			**25.7**		33.8
Stock-based compensation[1]	24		**14.4**		18.1
Other[2]			**17.7**		13.6
		$	**426.8**	$	319.4

[1] The current portion of $15.1 million of stock-based compensation is included in accounts payable and accrued charges ($18.2 million in 2013) (note 19).

[2] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal nominal amount outstanding of $844.9 million as of December 31, 2014 and 2013 and a combined carrying value of $2.1 million as of December 31, 2014 and 2013. Exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligation without any consideration.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares ("Class B Shares") on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2012	39,175,572	$ 8.7	85,759,592	$ 326.4
Class A Shares converted into Class B Shares	(150,900)	–	150,900	–
Shares purchased and cancelled	–	–	(1,603,700)	(6.2)
Balance as of December 31, 2013	39,024,672	8.7	84,306,792	320.2
Class A Shares converted into Class B Shares	(51,500)	–	51,500	–
Shares purchased and cancelled	–	–	(455,000)	(1.7)
Balance as of December 31, 2014	**38,973,172**	**$ 8.7**	**83,903,292**	**$ 318.5**

On July 31, 2014, the Corporation filed a normal course issuer bid for a maximum of 500,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2014. The purchases can be made from August 13, 2014 to August 12, 2015 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All shares purchased under the bid will be cancelled.

In 2014, the Corporation purchased and cancelled 455,000 Class B Shares for a total cash consideration of $11.7 million (1,603,700 Class B Shares for a total cash consideration of $36.4 million in 2013). The excess of $10.0 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2014 ($30.2 million in 2013).

On March 10, 2015, the Board of Directors of the Corporation declared a dividend of $0.025 per share on Class A Shares and Class B Shares, or approximately $3.1 million, payable on April 21, 2015 to shareholders of record at the close of business on March 27, 2015.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 13,000,000 of Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of the Corporation and its subsidiaries. The exercise price of each option is equal to the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. Options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price, or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant.

The following table gives details on changes to outstanding options for the years ended December 31, 2014 and 2013:

	2014		2013	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**2,369,182**	**$ 21.13**	723,264	$ 18.64
Granted	**1,010,000**	**26.30**	1,645,918	22.23
Exercised	**(527,208)**	**18.83**	–	–
Cancelled	**(1,541,974)**	**21.71**	–	–
Balance at end of year	**1,310,000**	**$ 25.36**	2,369,182	$ 21.13
Vested options at end of year	**–**	**$ –**	527,208	$ 18.83

During the year ended December 31, 2014, 527,208 stock options of the Corporation were exercised for a cash consideration of $4.2 million (none in 2013).

The following table gives summary information on outstanding options as of December 31, 2014:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$22.23 to 30.24	**1,310,000**	**9.18**	**$ 25.36**	**–**	**$ –**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Mid-term stock-based compensation plan

Under the mid-term stock-based compensation plan, participants are entitled to receive a cash payment at the end of a three-year period based on the appreciation of the Corporation Class B Share price, and subject to the achievement of certain non-market performance criteria. The following table provides details of changes to outstanding units in the mid-term stock-based compensation plan for the years ended December 31, 2014 and 2013:

		2014		2013
	Units	**Weighted average exercise price**	Units	Weighted average exercise price
Balance at beginning of year	**2,263,516**	**$ 19.92**	1,757,146	$ 15.99
Granted	**1,388,447**	**26.47**	1,180,818	22.08
Exercised	**(480,148)**	**18.76**	(674,448)	13.46
Cancelled	**(2,368,298)**	**21.86**	–	–
Balance at end of year	**803,517**	**$ 26.22**	2,263,516	$ 19.92

During the year ended December 31, 2014, a cash consideration of $3.7 million was paid upon exercise of 480,148 units ($3.9 million for 674,448 units in 2013).

(iii) Deferred stock unit plan

The Quebecor deferred stock unit ("DSU") plan is for the benefit of the Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on the Corporation's Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of the Corporation's Class B Shares on the date of redemption. As of December 31, 2014 and 2013, the total number of DSUs outstanding under this plan was 160,338 and 178,216, respectively.

(b) Quebecor Media stock option plan

Under a stock option plan established by Quebecor Media, 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media and its subsidiaries. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

QUEBECOR INC. AND ITS SUBSIDIARIES

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Compensation Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Compensation Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

The following table gives details on changes to outstanding options granted as of December 31, 2014 and 2013:

		2014		2013
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**1,647,309**	**$ 52.67**	1,349,007	$ 45.02
Granted	**271,000**	**63.96**	921,711	57.60
Exercised	**(218,750)**	**46.28**	(554,309)	42.43
Cancelled	**(67,600)**	**58.85**	(69,100)	51.03
Balance at end of year	**1,631,959**	**$ 55.15**	1,647,309	$ 52.67
Vested options at end of year	**263,823**	**$ 46.74**	186,298	$ 45.12

During the year ended December 31, 2014, 218,750 of Quebecor Media's stock options were exercised for a cash consideration of $3.6 million (554,309 stock options for $8.8 million in 2013).

The following table gives summary information on outstanding options as of December 31, 2014:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$30.47 to 44.45	71,663	3.28	$ 40.03	71,663	$ 40.03

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 Class B Shares, non-voting, participating, without par value of TVA Group ("Class B Non-Voting Shares of TVA Group") have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of Class B Shares on the Toronto Stock Exchange the day before the option is granted. Options granted prior to January 2006 usually vest equally over a four-year period, with the first 25% vesting on the second anniversary date of the date of grant. Beginning January 2006, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the Class B Non-Voting Shares of TVA Group and the exercise price of the option or, subject to certain conditions, exercise their options to purchase Class B Non-Voting Shares of TVA Group at the exercise price. The market value is defined as the average closing market price of the Class B Non-Voting Shares of TVA Group for the last five trading days preceding the date on which the option was exercised.

The following table gives details on changes to outstanding options for the years ended December 31, 2014 and 2013:

		2014		2013
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**691,076**	**$ 16.54**	819,421	$ 16.34
Granted	**30,000**	**8.90**	–	–
Cancelled	**(69,208)**	**15.32**	(128,345)	15.29
Expired	**(126,500)**	**20.75**	–	–
Balance at end of year	**525,368**	**$ 15.25**	691,076	$ 16.54
Vested options at end of year	**495,368**	**$ 15.63**	691,076	$ 16.54

The following table gives summary information on outstanding options as of December 31, 2014:

			Outstanding options		**Vested options**
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$8.90	30,000	9.58	$ 8.90	–	$ –
$14.50 to 21.38	495,368	2.15	15.63	495,368	15.63
$8.90 to 21.38	**525,368**	**2.57**	**$ 15.25**	**495,368**	**$ 15.63**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(d) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans as of December 31, 2014 and 2013:

December 31, 2014	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**1.69 %**	**1.38 %**	**1.07 %**
Dividend yield	**0.31 %**	**1.37 %**	**– %**
Expected volatility	**26.89 %**	**18.99 %**	**32.61 %**
Expected remaining life	**6.0 years**	**3.58 years**	**1.21 year**

December 31, 2013	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	1.92 %	1.75 %	1.05 %
Dividend yield	0.38 %	1.55 %	– %
Expected volatility	27.25 %	23.26 %	32.56 %
Expected remaining life	4.6 years	4.0 years	1.0 year

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Dividend yield is based on the current average yield.

(e) Liability of vested options

As of December 31, 2014, the liability for all vested options was $6.3 million as calculated using the intrinsic value ($7.5 million as of December 31, 2013).

(f) Consolidated compensation charge

For the year ended December 31, 2014, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $5.8 million ($23.6 million in 2013), of which a charge of $0.9 million ($0.5 million in 2013) is presented as part of discontinued operations.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. CONVERTIBLE DEBENTURES

On October 11, 2012, the Corporation issued $500.0 million in aggregate principal amount of convertible debentures bearing interest at an annual rate of 4.125% and maturing in October 2018. Interest is payable semi-annually in cash, in Quebecor Class B Shares, or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B Share, subject to a floor price of $19.25 per share (that is, a maximum number of 25,974,026 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the floor price) and a ceiling price of $24.06 per share (that is, a minimum number of 20,779,220 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

The convertible debentures are presented separately as a financial liability and the cap and floor feature are presented as embedded derivatives in other liabilities (note 22). The fair value of these embedded derivatives as of December 31, 2014 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 1.41% (2.02% in 2013), a dividend yield of 0.31% (0.38% in 2013), and an expected volatility of 20.40% (26.39% in 2013). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2014 would have increased the loss on embedded derivatives related to convertible debentures by $19.2 million, while a one dollar decrease in the market price of a Quebecor Class B share would have decreased the loss by $19.1 million.

26. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

	Translation of net investments in foreign operations	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2012	$ (2.1)	$ 29.0	$ (77.2)	$ (50.3)
Other comprehensive income (loss)	3.3	(45.0)	68.9	27.2
Balance as of December 31, 2013	1.2	(16.0)	(8.3)	(23.1)
Other comprehensive income (loss)	(1.2)	(13.2)	(26.9)	(41.3)
Balance as of December 31, 2014	**$ –**	**$ (29.2)**	**$ (35.2)**	**$ (64.4)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 9 1/2-year period.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

27. COMMITMENTS

Leases and other commitments

The Corporation rents premises and equipment under operating leases and has entered into long-term commitments to purchase services, capital equipment, broadcasting rights, and to pay royalties. The operating leases have various terms, escalation clauses, purchase options and renewal rights. The minimum payments for the coming years are as follows:

	Continuing operations		Discontinued operations	
	Leases	Other commitments	Leases	Other commitments
2015	$ 49.6	$ 274.9	$ 5.7	$ 1.4
2016 to 2019	121.0	561.2	11.5	2.1
2020 and thereafter	92.4	629.3	1.2	–

The Corporation and its subsidiaries' operating lease expenses amounted to $69.3 million in 2014 ($72.6 million in 2013), of which $7.2 million ($9.9 million in 2013) is presented as part of discontinued operations.

Business acquisition

In November 2014, the Media segment, through TVA Group, reached an agreement to acquire 15 magazine titles in Canada for a cash consideration of $55.5 million, subject to authorization by the Competition Bureau, which was received on March 2, 2015.

28. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual values of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2018. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2014, the maximum exposure with respect to these guarantees was $14.5 million and no liability has been recorded in the consolidated balance sheet.

28. GUARANTEES (continued)

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the subsidiary of the Corporation as a franchiser has provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures and derivative financial instruments. As a result of their use of financial instruments, the Corporation and its subsidiaries are exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation and its subsidiaries use derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation and its subsidiaries do not intend to settle their derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar		Notional amount sold		Notional amount bought
Quebecor Media					
2016[1]	1.0154	US$	320.0	$	324.9
Videotron					
Less than 1 year	1.1198	$	106.3	US$	94.9
2017[2]	1.1204	US$	260.0	$	291.3

(ii) Interest rate swaps

Maturity		Notional amount	Pay/ receive	Fixed rate	Floating rate
TVA Group					
December 2017	$	44.0	Pay fixed/ Receive floating	2.03%	Bankers' acceptances 1 month

(a) Description of derivative financial instruments (continued)

(iii) Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023[1]	2007 to 2016	US$ 320.0	7.69%	0.9977
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan "B"	2013 to 2020	US$ 345.6	Bankers' acceptances 3 months + 2.77%	1.0346
Videotron				
6.375% Senior Notes due 2015	2005 to 2015	US$ 175.0	5.98%	1.1781
9.125% Senior Notes due 2018	2008 to 2018	US$ 75.0	9.64%	1.0215
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024[2]	2008 to 2017	US$ 260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptances 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039

[1] Quebecor Media initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 7.75% Senior Notes due 2016 redeemed in 2012. These swaps are now used to set in CAN dollars all coupon payments through 2016 on US$431.3 million of notional amount under its 5.75% Senior Notes due 2023 and issued on October 11, 2012. In conjunction with the repurposing of these swaps, Quebecor Media has entered into US$320.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the March 15, 2016 notional exchange.

[2] Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued on April 9, 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation and its subsidiaries include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 7, *Financial Instruments: Disclosures*, the Corporation has considered the following fair value hierarchy that reflects the significance of the inputs used in measuring its other financial instruments accounted for at fair value in the consolidated balance sheets:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using level 1 and level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value on the consolidated balance sheets, is determined using level 2 inputs.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium estimated using a combination of observable and unobservable inputs in the market (level 3 inputs) to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as level 2.

The fair value of early settlement options recognized as embedded derivatives and embedded derivative related to convertible debentures is determined by option pricing models using level 2 market inputs, including volatility, discount factors and underlying instruments adjusted implicit interest rate and credit premium.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments (continued)

The carrying value and fair value of long term debt, convertible debentures and derivative financial instruments as of December 31, 2014 and 2013 are as follows:

	2014		2013	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
			(restated, note 1(b))	
Long-term debt[1,2]	**$ (5,326.7)**	**$ (5,444.7)**	$ (5,140.7)	$ (5,200.0)
Convertible debentures[3]	**(711.8)**	**(711.8)**	(615.1)	(615.1)
Derivative financial instruments[4]				
Early settlement options	**8.2**	**8.2**	14.5	14.5
Foreign exchange forward contracts[5]	**4.2**	**4.2**	1.8	1.8
Interest rate swaps	**(0.5)**	**(0.5)**	–	–
Cross-currency interest rate swaps[5]	**294.4**	**294.4**	(53.2)	(53.2)

[1] The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

[2] The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

[3] The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

[4] The fair value of derivative financial instruments designated as hedges is an asset position of $298.6 million as of December 31, 2014 (an asset position of $18.6 million as of December 31, 2013).

[5] The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2014, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2014, 8.5% of trade receivables were 90 days past their billing date (9.8% as of December 31, 2013) of which 57.3% had an allowance for doubtful accounts (46.5% as of December 31, 2013).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2014 and 2013:

	2014	2013
Balance as of beginning of year	**$ 28.4**	$ 29.6
Charged to income	**32.1**	41.3
Utilization	**(34.5)**	(42.5)
Reclassification to assets held for sale	**(4.2)**	–
Balance as of end of year	**$ 21.8**	$ 28.4

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management (continued)

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of their use of derivative financial instruments, the Corporation and its subsidiaries are exposed to the risk of non-performance by a third party. When the Corporation and its subsidiaries enter into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation and its subsidiaries will not be able to meet their financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation and its subsidiaries manage this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 7.2 years as of December 31, 2014 (6.9 years as of December 31, 2013).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, and dividends in the future. The Corporation has access to cash flows generated by its subsidiaries through dividends paid by Quebecor Media.

As of December 31, 2014, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative instruments, less estimated future receipts on derivative instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 5.2**	$ 5.2	$ –	$ –	$ –
Accounts payable and accrued charges	**650.2**	650.2	–	–	–
Long-term debt[1]	**5,326.7**	230.1	115.2	162.4	4,819.0
Convertible debentures[2]	**663.7**	–	–	663.7	–
Interest payments[3]	**2,274.7**	284.7	625.8	583.7	780.5
Derivative instruments[4]	**(308.9)**	4.7	51.0	(8.2)	(356.4)
Total	**$ 8,611.6**	**$ 1,174.9**	**$ 792.0**	**$ 1,401.6**	**$ 5,243.1**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2014 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2014.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation and its subsidiaries have entered into transactions to hedge the foreign currency risk exposure on their U.S.-dollar-denominated debt obligations outstanding as of December 31, 2014, to hedge their exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock-in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The following table summarizes the estimated sensitivity on income and other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar as of December 31, 2014:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10		
U.S.-dollar-denominated accounts payable	$ (1.0)	$ –
Gain on valuation and translation of financial instruments and derivative financial instruments	2.7	49.5
Decrease of $0.10		
U.S.-dollar-denominated accounts payable	1.0	–
Gain on valuation and translation of financial instruments and derivative financial instruments	(2.7)	(49.5)

Interest rate risk

Some of the Corporation's and its subsidiaries' bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation and its subsidiaries bear interest at fixed rates. The Corporation and its subsidiaries have entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2014, after taking into account the hedging instruments, long-term debt was comprised of 82.6 % fixed-rate debt (81.6% in 2013) and 17.4 % floating-rate debt (18.4% in 2013).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2014 is $8.6 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Interest rate risk (continued)

The estimated sensitivity on income and other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2014, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	**$ 0.8**	**$ (22.2)**
Decrease of 100 basis points	**(0.8)**	**22.2**

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivative related to convertible debentures, net assets and liabilities related to derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2014 and 2013 is as follows:

	2014	2013 (restated, note 1(b))
Bank indebtedness	**$ 5.2**	$ 0.5
Long-term debt	**5,278.3**	5,076.5
Embedded derivatives related to convertible debentures	**232.2**	140.6
Convertible debentures	**500.0**	500.0
Derivative financial instruments	**(298.1)**	51.4
Cash and cash equivalents	**(395.3)**	(476.6)
Net liabilities	**5,322.3**	5,292.4
Equity	**$ 1,063.3**	$ 1,195.4

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. RELATED PARTY TRANSACTIONS

Key management personnel compensation

Key management personnel comprise members of the Board of Directors and key senior management of the Corporation and its main subsidiaries. Their compensation is as follows:

	2014	2013
Salaries and short-term benefits	**$ 11.0**	$ 9.9
Share-based compensation	**(0.1)**	18.4
Other long-term benefits	**7.9**	4.3
	$ 18.8	$ 32.6

Operating transactions

During the year ended December 31, 2014, the Corporation and its subsidiaries made purchases and incurred rent charges with affiliated corporations in the amount of $2.9 million ($3.3 million in 2013), which are included in purchase of goods and services. The Corporation and its subsidiaries made sales to affiliated corporations in the amount of $3.3 million ($3.5 million in 2013). These transactions were accounted for at the consideration agreed between parties.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, and defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The pension plans of the Corporation are registered with a Québec or federal regulatory authority.

The Corporation’s funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future payment of amortization payments when the degree of solvability of the pension plans is less than 100% as defined by the relevant Québec and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with provisions of plans.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, independent members of the Corporation’s management, or the Corporation in accordance with the provisions of the plans. Under the Corporation’s rules of governance, the approbation and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation’s management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of securities transactions are assigned to trustees within a mandate given by the pension committee or the Corporation, as the case may be. Policies include those on investment objectives, risk mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation’s funding requirement.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2014 and 2013:

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Change in benefit obligations				
Benefit obligations at beginning of year	**$ 991.6**	$ 1,019.0	**$ 54.3**	$ 60.6
Service costs	**31.4**	38.6	**1.1**	1.3
Interest costs	**50.9**	49.8	**2.6**	2.5
Plan participants' contributions	**14.6**	15.0	**–**	–
Actuarial loss (gain) arising from:				
Demographic assumptions	**12.2**	26.3	**0.4**	2.1
Financial assumptions	**136.7**	(89.7)	**4.8**	(5.5)
Participant experience	**(2.3)**	(12.9)	**3.5**	(2.5)
Benefits and settlements paid	**(54.4)**	(55.2)	**(1.5)**	(1.4)
Plan amendments and other	**1.1**	0.8	**–**	(2.8)
Benefit obligations at end of year	**$ 1,181.8**	$ 991.7	**$ 65.2**	$ 54.3

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Change in plan assets				
Fair value of plan assets at beginning of year	**$ 976.7**	$ 815.6	**$ –**	$ –
Actual return on plan assets	**118.7**	129.5	**–**	–
Employer contributions	**60.0**	71.8	**1.5**	1.4
Plan participants' contributions	**14.6**	15.0	**–**	–
Benefits and settlements paid	**(54.4)**	(55.2)	**(1.5)**	(1.4)
Fair value of plan assets at end of year	**$ 1,115.6**	$ 976.7	**$ –**	$ –

As of December 31, 2014, the weighted average duration of defined benefit obligation was 16.7 years (15.7 years in 2013). The Corporation expects future benefit payments of $54.7 million in 2015.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The Corporation's investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed**,** whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2014	2013
Equity securities:		
Canadian	**22.4 %**	24.0 %
Foreign	**32.3**	34.3
Debt securities	**41.8**	38.6
Other	**3.5**	3.1
	100.0 %	100.0 %

The fair value of plan assets is principally based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amount recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Benefit obligations	**$ (1,181.8)**	$ (991.7)	**$ (65.2)**	$ (54.3)
Fair value of plan assets	**1,115.6**	976.7	**–**	–
Plan deficit	**(66.2)**	(15.0)	**(65.2)**	(54.3)
Asset limit and minimum funding adjustment	**(4.4)**	(32.6)	**–**	–
Net amount recognized[1]	**$ (70.6)**	$ (47.6)	**$ (65.2)**	$ (54.3)

[1] The net amount recognized for 2014 consists of a liability of $136.8 million ($113.3 million in 2013) included in other liabilities (note 22) and of an asset of $3.3 million ($11.4 million in 2013) included in other assets (note 18), and a liability of $2.3 million included with liabilities held for sale.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Actuarial (loss) gain on benefit obligations	**$ (146.6)**	$ 76.3	**$ (8.7)**	$ 5.9
Actual return on plan assets, less interest income anticipated as part of the interest on net defined benefit liability	**71.6**	91.8	**–**	–
Asset limit and minimum funding adjustment	**29.8**	(32.6)	**–**	–
Re-measurements recorded in other comprehensive income	**$ (45.2)**	$ 135.5	**$ (8.7)**	$ 5.9

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Employee costs:				
Service costs	**$ 31.4**	$ 38.6	**$ 1.1**	$ 1.3
Curtailment loss (gain) and other	**3.7**	2.5	**–**	(2.9)
Interest on net defined benefit liability	**2.6**	10.3	**2.5**	2.5
Net benefit costs	**$ 37.7**	$ 51.4	**$ 3.6**	$ 0.9

[1] Net benefit costs of $5.1 million in 2014 were presented as part of discontinued operations ($7.7 million in 2013).

The expense related to defined contribution pension plans amounted to $15.3 million in 2014 ($15.1 million in 2013), of which $1.5 million ($1.5 million in 2013) is presented as part of discontinued operations.

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefits plans will be $49.2 million in 2015 based on the most recent financial actuarial reports filed and the expected transaction described in note 8 (contributions of $61.5 million were paid in 2014).

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2014 and 2013
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions (continued)

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2014 and 2013 and current periodic benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2014	2013	**2014**	2013
Benefit obligations				
Rates as of year-end:				
Discount rate	**4.10%**	4.90%	**4.10%**	4.90%
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00
Current periodic costs				
Rates as of preceding year-end:				
Discount rate	**4.90%**	4.40%	**4.90%**	4.40%
Rate of compensation increase	**3.00**	3.25	**3.00**	3.25

The assumed average retirement age of participants used was of 62 years in 2014 and 2013.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 8.5 % at the end of 2014. These costs, as per the estimate, are expected to decrease gradually over the next 10 years to 6.0% and to remain at that level thereafter.

Sensitivity analysis

A decrease of 10 basis points in the discount rate would have had the following impacts, before income tax, for the year ended December 31, 2014:

	Pension benefits			**Postretirement benefits**		
Increase (decrease)	**Obligation in balance sheet**	**Income**	**Other comprehensive income**	**Obligation in balance sheet**	**Income**	**Other comprehensive income**
Discount rate	$ 19.6	$ (1.5)	$ (19.6)	$ 1.3	$ –	$ (1.3)

There are limitations to the above sensitivity analysis since it only considers the impacts of a decrease of 10 basis points in the discount rate assumption (at the beginning of the year having an impact on income and at the end of the year having an impact on comprehensive income) without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to these assumptions would not have a significant impact on the consolidated financial statements.

32. SUBSEQUENT EVENTS

In January 2015, Videotron entered into new unsecured on demand credit facilities, under which letters of credit were issued and filed with Industry Canada as pre-auction financial deposits in respect to its application to participate to the 2500 MHz and AWS-3 spectrum auctions. Under Industry Canada's published rules respecting restrictions on communications during the auction process, it is strictly forbidden for the Corporation to disclose the amount of the letters of credit, which can be withdrawn by Videotron at any time prior to the auction commencement. On March 6, 2015, Quebecor Media and its subsidiary Videotron announced that it had acquired four 30 MHz licences in the auction for AWS-3 commercial mobile spectrum at a total price of $31.8 million. The process will resume on April 14, 2015 with the auction for spectrum in the 2500 MHz band.

On February 4, 2015, TVA Group filed a final short form prospectus with the securities regulatory authorities in the 10 Canadian provinces in connection with a proposed rights offering, in which all holders of TVA Group's outstanding Class A Common Shares, voting, participating, without par value ("Class A Shares of TVA Group") and Class B Non-Voting Shares of TVA Group as of February 18, 2015 received rights to subscribe for Class B Non-Voting Shares of TVA Group for aggregate gross proceeds of approximately $110.0 million ("the Rights Offering"). The final short form prospectus and relevant documentation were mailed on February 23, 2015 to all holders of Class A Shares of TVA Group and Class B Non-Voting Shares of TVA Group. The closing date of the Rights Offering is anticipated to occur on or about March 20, 2015. In accordance with a standby commitment agreement entered into with TVA Group, Quebecor Media has provided a standby commitment pursuant to which it will be required to acquire any Class B Non-Voting Shares of TVA Group not subscribed for under the Rights Offering, subject to certain conditions.

On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group, and ordered Bell ExpressVu Limited Partnership ("Bell ExpressVu"), a subsidiary of Bell, to pay compensation totalling $137.0 million for having deliberately neglected to implement an appropriate security system to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005. The judgement stated that Bell ExpressVu knew and must have foreseen that this practice would cause serious harm to its competitors, including Videotron, its main rival in Québec.

This is Exhibit 45 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC. AND ITS SUBSIDIARIES
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2015 and 2014

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. and its subsidiaries are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of the Corporation and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the Corporation's annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with the Corporation's management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

Pierre Dion
President and Chief Executive Officer

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

We have audited the accompanying consolidated financial statements of Quebecor Inc. and its subsidiaries, which comprise the consolidated balance sheets as at December 31, 2015 and 2014 and the consolidated statements of income, comprehensive income, equity and cash flows for the years ended December 31, 2015 and 2014, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Quebecor Inc. and its subsidiaries as at December 31, 2015 and 2014, and their financial performance and their cash flows for the years ended December 31, 2015 and 2014 in accordance with International Financial Reporting Standards.

On behalf of the Board of Directors,

The Right Honourable Brian Mulroney, P.C., C.C., LL.D.,
Chairman of the Board

Jean La Couture,
Director

QUEBECOR INC. AND ITS SUBSIDIARIES

SEGMENTED INFORMATION

Years ended December 31, 2015 and 2014
(in millions of Canadian dollars)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media Inc. (“Quebecor Media”) and in subsidiaries controlled by Quebecor Media. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	81.1 %	81.1 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies, televisual products and video games through its video-on-demand service and rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network, the operation of specialty television services, the operation of studio rental, soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized sites, the publishing of books and magazines, the distribution of books, magazines and movies, the distribution and production of music, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, and the operation of two Quebec Major Junior Hockey League (“QMJHL”) teams.

In the fourth quarter of 2015, the Corporation changed its organizational structure and transferred its music distribution and production operations from the Sports and Entertainment segment to the Media segment. Accordingly, prior period figures in the Corporation’s segmented information have been reclassified to reflect those changes.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

Purchase of goods and services	1,139.0	534.5	5.7	(129.9)	1,549.3
Adjusted operating income[1]	1,353.2	58.4	(2.8)	1.0	1,409.8
Depreciation and amortization					661.1
Financial expenses					350.3
Loss on valuation and translation of financial instruments					94.7
Loss on litigation, restructuring of operations and other items					49.6
Impairment of goodwill and other assets					81.0
Loss on debt refinancing					18.7
Income before income taxes					$ 154.4
Additions to property, plant and equipment	$ 606.1	$ 32.1	$ 5.3	$ 0.5	$ 644.0
Additions to intangible assets	304.7	9.3	0.1	3.2	317.3

1 The Chief Executive Officer uses adjusted operating income as the measure of profit to assess the performance of each segment. Adjusted operating income is referred to as a non-International Financial Reporting Standards ("IFRS") measure and is defined as net income (loss) before depreciation and amortization, financial expenses, (gain) loss on valuation and translation of financial instruments, (gain) loss on litigation, restructuring of operations and other items, impairment of goodwill and other assets, loss on debt refinancing, income taxes and loss from discontinued operations.

See accompanying notes to consolidated financial statements.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board.

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (note 1(k) and 1(w)), the liability related to stock-based compensation (note 1(u)) and the net defined benefit liability (note 1(v)), and they are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation and its subsidiaries operate ("functional currency").

Comparative figures for the year ended December 31, 2014 have been restated to conform to the presentation adopted for the year ended December 31, 2015.

(b) Change in accounting estimates

In the second quarter of 2015, the Corporation changed its assessment of the useful life of its spectrum licences used in the operation of its Telecommunications segment. In light of recent spectrum auctions and developments in the telecommunications industry, the Corporation is now of the view that these spectrum licences have an indefinite useful life based on the following facts:

- The Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development ("ISED") Canada;
- The Corporation has the financial and operational ability to renew these spectrum licences;
- Currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences;
- The Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Accordingly, the Corporation ceased to amortize spectrum licences used in its operations as of April 1, 2015 and no amortization expense has been recorded after this date. The straight-line amortization expense recorded relating to these licences was $13.9 million in 2015 ($55.4 million in 2014).

(c) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent corporation's ownership interest in them. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation's consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

Non-controlling interests in an entity acquired are presented in the consolidated balance sheets within equity, separately from the equity attributable to shareholders, and are initially measured at fair value.

(e) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transactions. Translation gains and losses on assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments, unless hedge accounting is used.

Financial statements of the foreign operations disposed of in 2014 (note 10) were translated using the rate in effect at the balance sheet date for assets and liabilities, and using the average exchange rates during the period for revenues and expenses.

(f) Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under "Deferred revenue" when customers are invoiced.

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony, over-the-top video, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition (continued)

Telecommunications (continued)

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from cable and other services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;
- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers, magazines, books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Studio, soundstage and equipment leasing revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from leasing, and from ticket, food and beverage sales at the Videotron Centre are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

(h) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

For the year ended December 31, 2015, the Corporation recorded $10.3 million of barter advertising revenues ($14.5 million in 2014).

(i) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized in other comprehensive income or otherwise directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Income taxes (continued)

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and due to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(j) Leases

Assets under leasing agreements are classified at the inception of the lease as (i) finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee, or as (ii) operating leases for all other leases.

Operating lease rentals are recognized in the consolidated statement of income on a straight-line basis over the period of the lease. Any lessee incentives are deferred and then recognized evenly over the lease term.

(k) Financial instruments

Classification, recognition and measurement

Financial instruments are classified as held-for-trading, available-for-sale, loans and receivables, or as other financial liabilities, and measurement in subsequent periods depends on their classification. The Corporation has classified its financial instruments (except derivative financial instruments) as follows:

Held-for-trading	**Loans and receivables**	**Available-for-sale**	**Other liabilities**
• Cash and cash equivalents • Bank indebtedness • Exchangeable debentures included in "Other liabilities"	• Accounts receivable • Loans and other long-term receivables included in "Other assets"	• Other portfolio investments included in "Other assets"	• Accounts payable and accrued charges • Provisions • Long-term debt • Convertible debentures • Other long-term financial liabilities included in "Other liabilities"

Financial instruments held-for-trading are measured at fair value with changes recognized in income as a gain or loss on valuation and translation of financial instruments. Available-for-sale portfolio investments are measured at fair value or at cost in the case of equity investments that do not have a quoted market price in an active market and where fair value is insufficiently reliable, and changes in fair value are recorded in other comprehensive income. Financial assets classified as loans and receivables and financial liabilities classified as "Other liabilities" are initially measured at fair value and subsequently measured at amortized cost, using the effective interest rate method of amortization. Liabilities recognized as a result of contingent consideration arising from a business acquisition and included in "Other liabilities", are initially recorded at their acquisition-date fair value and re-measured at fair value in subsequent periods. These changes in fair value are recorded in the consolidated statements of income as other items.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

Any change in the fair value of the derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

(l) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(m) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are met.

(n) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(o) Trade receivables

Trade receivables are stated at their nominal value, less an allowance for doubtful accounts and an allowance for sales returns. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. Individual accounts receivables are written off when management deems them not collectible.

(p) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Inventories (continued)

In particular, inventories related to broadcasting activities, which primarily comprise programs and broadcast and distribution rights, are accounted for as follows:

(i) Programs produced and productions in progress

Programs produced and productions in progress related to broadcasting activities are accounted for at the lesser of cost and net realizable value. Cost includes direct charges for goods and services and the share of labour and general expenses related to each production. The cost of each program is charged to operating expenses when the program is broadcast.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are classified as current or long-term assets, based on management’s estimate of the broadcast or distribution period. These rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on how future economic benefits from those rights will be generated. Broadcast and distribution rights payable are classified as current or long-term liabilities based on the payment terms included in the licence.

Estimates of future revenues used to determine the net realizable values of inventories related to the broadcasting or distribution of television products and movies are examined periodically by management and revised as necessary. The carrying value of programs produced and productions in progress, broadcast rights and distribution rights is reduced to the net realizable value, as necessary, based on this assessment.

(q) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statement of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	**Estimated useful life**
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets. A decommissioning obligation is however recorded for the rental of sites related to the mobile network.

Videotron Ltd. (“Videotron”) is engaged in an agreement to operate a shared LTE network in the Province of Québec and in the Ottawa region.

(s) Goodwill and intangible assets

<u>Goodwill</u>

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. When the Corporation acquires less than 100% of the equity interests in the business acquired at the acquisition date, goodwill attributable to the non-controlling interests is also recognized at fair value.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(g)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(s) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by ISED Canada, (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future (note 1 (b)).

Broadcasting licences, mastheads and sport franchises have also an indefinite useful life and are not amortized. In particular, given the low cost of renewal of broadcasting licences, management believes it is economically compelling to renew the licences and to comply with all rules and conditions attached to those licences. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of those assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful life
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(t) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(u) Stock-based compensation

Stock-based awards to employees that call for settlement in cash or other assets at the option of the employee are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

Estimates of the fair value of stock option awards are determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 24.

(v) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive loss and in accumulated other comprehensive loss. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation;
- changes in the net benefit asset limit or in the minimum funding liability.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services, health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(w) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion prices features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(x) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecast of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 17.

(ii) Fair value of derivative financial instruments, including embedded derivatives

Derivative financial instruments must be accounted for at their fair value, which is estimated using valuation models based on a number of assumptions such as future cash flows, period-end swap rates, foreign exchange rates, and credit default premium. Also, the fair value of embedded derivatives related to convertible debentures and to early settlement options on debt is determined with option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium. The assumptions used in the valuation models have a significant impact on the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, the gain or loss on valuation of financial instruments recorded in the consolidated statements of comprehensive income, and the carrying value of derivative financial instruments in the consolidated balance sheets. A description of valuation models used and sensitivity analysis on key assumptions are presented in note 29.

(x) Use of estimates and judgments (continued)

(iii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 31.

(iv) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. More specifically, an assessment of the probable outcomes of legal proceedings or other contingencies is also required. A description of the main provisions, including management expectations on the potential effect on the consolidated financial statements of the possible outcomes of legal disputes, is presented in note 20.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and the future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changed its conclusion in the future, as it did in 2015 (note 1 (b)).

(iii) CGU's determination for the purpose of impairment tests

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets. In identifying assets to group in CGUs, the Corporation considers, among other factors, offering bundled services, sharing telecommunication or broadcasting network infrastructure, integration of media assets, geographical proximity, similarity on exposure to market risk, and materiality. The determination of CGUs could affect the results of impairment tests and, as the case may be, the impairment charge recorded in the consolidated statements of income.

(iv) Determination if early settlement options are not closely related to their debt contract

Early settlement options are not considered closely related to their debt contract when the corresponding option exercise price is not approximately equal to the amortized cost of the debt. Judgment is therefore required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(v) Interpretation of laws and regulations

Interpretation of laws and regulation, including tax regulations, requires judgment from management that could have an impact on the recognition of provisions for legal litigation and income taxes in the consolidated financial statements.

(y) Recent accounting pronouncements

The Corporation has not yet completed its assessment of the impact of the adoption of these pronouncements on its consolidated financial statements.

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles based, five-step model to be applied to all contracts with customers.

(iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted provided that the IFRS 15 has been applied or is applied at the same time as IFRS 16.

IFRS 16 sets out the new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

2. REVENUES

The breakdown of revenues between services rendered and product sales is as follows:

	2015	2014
Services rendered	**$ 3,504.2**	$ 3,245.5
Product sales	**375.3**	362.2
	$ 3,879.5	$ 3,607.7

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

3. EMPLOYEE COSTS AND PURCHASE OF GOODS AND SERVICES

The main components are as follows:

	2015	2014
Employee costs	**$ 874.0**	$ 805.6
Less employee costs capitalized to property, plant and equipment and to intangible assets	**(176.6)**	(157.0)
	697.4	648.6
Purchase of goods and services:		
Royalties, rights and creation costs	**729.3**	662.2
Cost of products sold	**306.7**	252.2
Service contracts	**159.7**	151.4
Marketing, circulation and distribution expenses	**97.5**	81.3
Building expenses	**78.8**	65.5
Other	**369.4**	336.7
	1,741.4	1,549.3
	$ 2,438.8	$ 2,197.9

4. FINANCIAL EXPENSES

	2015	2014
Interest on long-term debt and on debentures	**$ 311.6**	$ 338.9
Amortization of financing costs and long-term debt discount	**7.1**	8.7
Interest on net defined benefit liability	**5.9**	5.1
Loss on foreign currency translation on short-term monetary items	**6.4**	4.0
Other	**4.0**	(6.4)
	$ 335.0	$ 350.3

5. (GAIN) LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	2015	2014
Loss on embedded derivatives related to long-term debt and derivative financial instruments for which hedge accounting is not used	**$ 6.2**	$ 7.9
(Gain) loss on embedded derivatives related to convertible debentures	**(10.5)**	91.6
Gain on reversal of embedded derivatives on debt redemption	**(0.4)**	(1.1)
Loss (gain) on the ineffective portion of cash flow hedges	**1.6**	(0.5)
Gain on the ineffective portion of fair value hedges	**(3.6)**	(3.2)
	$ (6.7)	$ 94.7

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

6. (GAIN) LOSS ON LITIGATION, RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

	2015	2014
(Gain) loss on litigation	**$ (138.1)**	$ 34.3
Restructuring of operations	**19.2**	9.0
Other items	**2.0**	6.3
	$ (116.9)	$ 49.6

(Gain) loss on litigation

On March 6, 2015, the Court of Appeal of Quebec ruled in favour of Videotron and TVA Group Inc. (“TVA Group”), and ordered Bell ExpressVu Limited Partnership (“Bell ExpressVu”), a subsidiary of Bell Canada, to pay Videotron $135.3 million and TVA Group $0.6 million, including interest, for negligence in failing to implement an appropriate security system to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada rejected Bell ExpressVu’s application for leave to appeal the judgment. The related $139.1 million gain was recorded in 2015.

In 2014, a charge of $34.3 million, including interest, was accounted for as a result of an unfavorable judgment against Videotron in a legal action. Videotron is currently appealing this judgment. $1.0 million in interest relating to this litigation was recorded in 2015.

Restructuring of operations and other items

In 2015, the Telecommunications segment recorded a charge for restructuring costs of $8.8 million, mainly related to the migration of its subscribers from analog to digital services ($1.8 million in 2014), and a charge for other items of $0.3 million ($3.4 million in 2014).

The Media segment has implemented various restructuring initiatives to reduce operating costs and, as a result, restructuring costs of $9.8 million, mainly for the reduction of positions, were recorded in 2015 ($6.5 million in 2014). In 2015, the Media segment also recorded a charge for other items of $0.7 million, mainly related to business acquisitions ($2.7 million in 2014).

In 2015, other segments recorded a charge for restructuring costs of $0.6 million ($0.7 million in 2014), and a charge for other items of $1.0 million ($0.2 million in 2014).

7. IMPAIRMENT OF GOODWILL AND OTHER ASSETS

	2015	2014
Impairment of goodwill	**$ 85.0**	$ 39.3
Impairment of property, plant and equipment	**76.5**	–
Impairment of intangible assets	**69.2**	41.7
	$ 230.7	$ 81.0

7. IMPAIRMENT OF GOODWILL AND OTHER ASSETS (continued)

2015

In 2015, the Corporation performed impairment tests on its CGUs and concluded that the recoverable amounts of its Newspapers and Broadcasting CGUs were less than their carrying values. The recoverable amounts of these CGUs were negatively impacted by the decrease in newspaper and commercial printing volumes at the Mirabel printing plant, plus the continuing pressure on advertising revenues in the newspaper and television industries. Accordingly, a goodwill impairment charge of $85.0 million (without any tax consequence) and an impairment charge on other assets of $81.9 million, mainly related to Mirabel printing plant assets, were recorded for the Newspapers CGU. An impairment charge of $60.1 million on the TVA Network's broadcasting licence (including $30.1 million without any tax consequence) was recorded for the Broadcasting CGU.

An impairment charge on intangible assets of $3.7 million was also recorded in 2015 in other segments.

2014

In 2014, the Corporation performed impairment tests on its CGUs and concluded that the recoverable amounts of its Newspapers and Broadcasting CGUs were less than their carrying values. The recoverable amounts of these CGUs were negatively impacted by the digital transformation and weak market conditions in the newspaper and broadcasting industries. The Corporation recorded a goodwill impairment charge of $190.0 million for the Newspapers CGU (without any tax consequence), of which $160.0 million is presented as part of discontinued operations. An impairment charge of $41.7 million on the TVA Network's broadcasting licence (including $20.9 million without any tax consequence) and a goodwill impairment charge of $9.3 million (including $3.9 million without any tax consequence) were recorded for the Broadcasting CGU.

8. LOSS ON DEBT REFINANCING

2015

- On April 10, 2015, Videotron redeemed all of its issued and outstanding 6.375% Senior Notes due December 15, 2015, in aggregate principal amount of US$175.0 million, and the related hedging contracts were unwound for a total cash consideration of $204.5 million.
- On July 16, 2015, Videotron redeemed all of its issued and outstanding 9.125% Senior Notes due April 15, 2018, in aggregate principal amount of US$75.0 million, and the related hedging contracts were unwound for a total cash consideration of $75.9 million.
- On July 16, 2015, Videotron redeemed all of its issued and outstanding 7.125% Senior Notes due January 15, 2020, in aggregate principal amount of $300.0 million, for a total cash consideration of $310.7 million.

These transactions resulted in a total loss of $12.1 million in 2015, net of a gain of $3.9 million previously reported in other comprehensive income.

2014

- In April 2014, Quebecor Media redeemed all of its issued and outstanding 7.75% Senior Notes due March 2016, in aggregate principal amount of US$380.0 million and settled its related hedging contracts for a total cash consideration of $367.8 million.
- In April 2014, Videotron redeemed US$260.0 million in aggregate principal amount of its issued and outstanding 9.125% Senior Notes due April 2018 for a total cash consideration of $295.4 million.

These transactions resulted in a total loss of $18.7 million in 2014, net of a gain of $10.8 million previously reported in other comprehensive income.

QUEBECOR INC. AND ITS SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.9% in 2015 and 2014 and income taxes in the consolidated statements of income:

	2015	2014
Income taxes at domestic statutory tax rate	**$ 78.8**	$ 41.5
(Reduction) increase resulting from:		
Effect of provincial tax rate differences	**–**	(0.8)
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates	**10.1**	42.4
Change in benefit arising from the recognition of current and prior year tax losses	**(1.3)**	2.2
Non-deductible impairment of goodwill	**22.9**	9.0
Other[1]	**(17.4)**	2.9
Income taxes	**$ 93.1**	$ 97.2

[1] Includes in 2015 a decrease of $16.1 million in income tax liability resulting from recent developments in tax audit matters, jurisprudence and tax legislation.

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2015	2014	**2015**	2014
Loss carryforwards	**$ 105.6**	$ 102.7	**$ (2.9)**	$ 1.0
Accounts payable, accrued charges, provisions and deferred revenue	**14.6**	7.3	**(7.7)**	4.1
Defined benefit plans	**42.8**	36.6	**1.5**	4.9
Property, plant and equipment	**(397.6)**	(444.8)	**(27.0)**	4.6
Goodwill, intangible assets and other assets	**(93.0)**	(75.6)	**29.4**	(13.2)
Long-term debt, derivative financial instruments and exchangeable debentures	**(178.3)**	(122.0)	**14.3**	5.6
Benefits from a general partnership	**(67.6)**	(56.5)	**11.1**	(30.9)
Other	**(10.7)**	(2.8)	**8.7**	–
	$ (584.2)	$ (555.1)	**$ 27.4**	$ (23.9)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. INCOME TAXES (continued)

Changes in the net deferred income tax liability are as follows:

	Note		**2015**		2014
Balance at beginning of year		**$**	**(555.1)**	$	(570.5)
Recognized in income as continuing operations			**(29.7)**		24.7
Recognized in income as discontinued operations	10		**2.3**		0.1
Recognized in other comprehensive income as continuing operations			**(34.3)**		(8.6)
Recognized in other comprehensive income as discontinued operations	10		**–**		2.0
Business acquisitions and disposals	10, 12		**31.8**		(2.4)
Other			**0.8**		(0.4)
Balance at end of year		**$**	**(584.2)**	$	(555.1)
Deferred income tax asset		**$**	**29.5**	$	7.8
Deferred income tax liability			**(613.7)**		(528.8)
Deferred income tax liability included in liabilities held for sale			**–**		(34.1)
		$	**(584.2)**	$	(555.1)

As of December 31, 2015, the Corporation had loss carryforwards for income tax purposes of $60.2 million available to reduce future taxable income, including $47.7 million that will expire between 2031 and 2035, and $12.5 million that can be carried forward indefinitely. Of these losses, an amount of $12.5 million has not been recognized. The Corporation also had capital losses of $1,102.7 million that can be carried forward indefinitely and applied only against future capital gains, of which $259.9 million were not recognized.

There are no income tax consequences attached to the payment of dividends in 2015 or 2014 by the Corporation to its shareholders.

10. DISCONTINUED OPERATIONS

<u>2015</u>

- In February 2015, the Corporation closed its specialty channel, SUN News.
- On April 13, 2015, the Corporation completed the sale, initially announced on October 6, 2014, of all of its English-language newspaper operations in Canada, consisting of more than 170 newspapers and publications, the Canoe English-language portal and 8 printing plants, including the Islington, Ontario plant, for a cash consideration consisting of $305.5 million, less cash disposed of $1.9 million. An amount of $1.3 million was also paid as an adjustment related to working capital items.
- On September 27, 2015, the Corporation completed the sale of Archambault Group Inc.'s retail operations, consisting of the 14 Archambault stores, the *archambault.ca* website, and the English-language Paragraphe Bookstore, for a cash consideration consisting of $14.5 million, less cash disposed of $1.1 million, and a balance receivable of $3.0 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. DISCONTINUED OPERATIONS (continued)

2014

- In January 2014, the Corporation ceased its door-to-door distribution of flyers and weekly newspapers in the Province of Québec.
- On June 1, 2014, the Corporation sold its 74 Québec weeklies for a cash consideration of $75.0 million and a net amount of $4.0 million relating to adjustments of working capital items. The Corporation received $78.4 million in 2014 and a final balance of $0.6 million in 2015.
- On September 2, 2014, the Corporation sold its Nurun Inc. subsidiary for a cash consideration consisting of $125.0 million, less cash disposed of $18.1 million. An amount of $8.2 million was also received relating to certain transaction adjustments.

The results of operations and cash flows related to those businesses were reclassified as discontinued operations in the consolidated statements of income, comprehensive income and cash flows as follows:

Consolidated statements of income and comprehensive income

	2015	2014
Revenues	**$ 194.1**	$ 723.2
Employee costs	**54.3**	264.2
Purchase of goods and services	**133.2**	375.3
Depreciation and amortization	**2.0**	31.0
Financial expenses	**0.2**	1.2
Restructuring of operations and other items	**23.9**	13.3
Impairment of goodwill and other assets	**–**	160.0
Loss before income taxes	**(19.5)**	(121.8)
Current income taxes	**(1.1)**	9.4
Deferred income taxes	**(2.3)**	(0.1)
(Loss) gain on disposal of businesses	**(3.6)**	49.5
Loss from discontinued operations	**(19.7)**	(81.6)
Other comprehensive loss:		
Loss on translation of net investments in foreign operations	**–**	(1.7)
Defined benefit plans:		
Re-measurement loss	**–**	(7.9)
Deferred income taxes	**–**	2.0
	–	(7.6)
Comprehensive loss from discontinued operations	**$ (19.7)**	$ (89.2)

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. DISCONTINUED OPERATIONS (continued)

Consolidated statements of cash flows

	2015	2014
Cash flows related to operating activities	**$ (21.3)**	$ 71.2
Cash flows related to investing activities	**(1.2)**	0.7
Cash flows (used in) provided by discontinued operations	**$ (22.5)**	$ 71.9

Components of assets and liabilities classified as held for sale in the consolidated balance sheet as of December 31, 2014 are as follows:

Current assets	$ 70.6
Property, plant and equipment	171.4
Intangible assets	26.1
Goodwill	130.0
Assets held for sale	398.1
Current liabilities	(61.0)
Long-term liabilities	(36.9)
Liabilities held for sale	(97.9)
Net assets held for sale	$ 300.2

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income (loss) attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income (loss) attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income (loss) attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2015	2014
Income from continuing operations attributable to shareholders	**$ 165.6**	$ 29.0
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**4.2**	(0.3)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 169.8**	$ 28.7
Net income (loss) attributable to shareholders	**$ 151.8**	$ (30.1)
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**4.2**	(0.3)
Net income (loss) attributable to shareholders, adjusted for dilution effect	**$ 156.0**	$ (30.4)
Weighted average number of shares outstanding (in millions)	**122.7**	123.0
Potentially dilutive effect of stock options and of convertible debentures of the Corporation	**21.0**	–
Weighted average number of diluted shares outstanding (in millions)	**143.7**	123.0

For the year ended December 31, 2015 and 2014, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options of the Corporation and of the Corporation's subsidiaries since their impact is anti-dilutive. During the year ended December 31, 2015, no option of the Corporation's plan (90,000 in 2014), 364,500 options of the Quebecor Media's plan (none in 2014), and 463,371 options of TVA Group's plan (525,368 in 2014) were excluded from the diluted earnings per share calculation since their impact is anti-dilutive.

For the year ended December 31, 2014, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation since their impact is anti-dilutive.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS

(a) Non-controlling interests acquisitions

2015

- On March 20, 2015, TVA Group completed a rights offering, whereby TVA Group received aggregate gross proceeds of $110.0 million from the issuance of 19,434,629 Class B Shares, non-voting, participating, without par value of TVA Group ("Class B Non-Voting Shares of TVA Group"). Under the rights offering, Quebecor Media has subscribed to 17,300,259 Class B Non-Voting Shares of TVA Group at a total cost of $97.9 million; accordingly, its aggregate equity interest in TVA Group increased from 51.5% to 68.4%. The increase of Quebecor Media's interest in TVA Group was accounted for as an equity transaction and resulted in an increase of retained earnings of $14.1 million and in an equivalent decrease of non-controlling interests.
- On September 9, 2015, Quebecor Media repurchased 7,268,324 of its Common Shares held by CDP Capital d'Amérique Investissement inc., a subsidiary of Caisse de dépôt et placement du Québec, for an aggregate purchase price of $500.0 million paid in cash. This transaction resulted in an increase of the Corporation interest in Quebecor Media from 75.4% to 81.1% and was accounted for as an equity transaction. Accordingly, the excess of $301.4 million of the purchase price over the carrying value of non-controlling interests of $198.6 million acquired was recorded as a $294.1 million reduction of retained earnings and as a $7.3 million increase of accumulated other comprehensive loss.
- Other non-controlling interests acquisitions were made in 2015 resulting in a decrease of retained earnings of $1.7 million and in an equivalent increase of non-controlling interests.

(b) Business acquisitions

2015

- On March 11, 2015, the Telecommunications segment acquired 4Degrees Colocation Inc. ("4Degrees Colocation") and its data center, the largest in Québec City, for a purchase price of $35.5 million in cash. An amount of $0.2 million was received in June 2015 as an adjustment related to working capital items. The acquisition enables Videotron to meet its business customers' growing technological and hosting needs. Goodwill arising from this acquisition mainly reflects 4Degrees Colocation's expertise and future growth potential.
- On April 12, 2015, TVA Group acquired 14 magazines, including some magazines that will be owned and operated in partnership, for a purchase price of $55.5 million in cash and a post-closing adjustment of $0.8 million, paid in the fourth quarter of 2015. The transaction is in line with the strategy of investing in the production and distribution of high-quality, rich, diverse entertainment and news media content. Goodwill arising from this acquisition mainly reflects content quality and anticipated synergies.
- In 2015, the Corporation also acquired other businesses, such as Marathon de Québec, included in the Sports and Entertainment segment.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS (continued)

(b) Business acquisitions (continued)

2014

- In December 2014, the Media segment acquired, through TVA Group, substantially all of the assets (including assuming certain operational liabilities) of Global Vision A.R. Ltd. – now operated by Mels Studios and Postproduction G.P. (“MELS”) – for a purchase price of $116.1 million in cash and a post-closing adjustment of $1.2 million paid in 2015. MELS operates in the film and television industry by offering studio, soundstage and equipment leasing and post-production services. The assets acquired include Mel’s La Cité du Cinéma in Montréal and Studio Melrose in Saint-Hubert, which facilities are used for both local and foreign film and television production, including American blockbusters. The purpose of this acquisition was to invest in sectors that are a good fit with the Media segment’s activities, with the effect of diversifying segment revenues. Goodwill arising from this acquisition reflects the reputation of the workforce, future growth potential and expected synergies.
- In 2014, the Corporation also acquired other businesses, such as the Remparts de Québec, a hockey team in the QMJHL, included in the Sports and Entertainment segment.

The purchase price allocation between the fair value of identifiable assets and liabilities related to business acquisitions in 2015 and 2014 is summarized as follows:

	2015	2014
Assets acquired		
Non-cash current assets	**$ 20.1**	$ 9.6
Property, plant and equipment	**13.9**	96.4
Intangible assets	**32.0**	17.1
Goodwill	**48.8**	18.0
Other assets	**2.1**	–
	116.9	141.1
Liabilities assumed		
Non-cash current liabilities	**(21.2)**	(7.0)
Deferred income taxes	**(0.2)**	–
Other long-term liabilities	**–**	(1.3)
	(21.4)	(8.3)
Net assets acquired at fair value	**95.5**	132.8
Non-controlling interests	**(0.8)**	–
	$ 94.7	$ 132.8
Consideration		
Cash	**$ 94.5**	$ 132.3
Balance payable	**0.2**	0.5
	$ 94.7	$ 132.8

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS (continued)

(b) Business acquisitions (continued)

The pro forma revenues and net income in 2015 would not have been significantly different than the actual figures if all business acquisitions had occurred at the beginning of the year.

The amount of goodwill that is deductible for tax purposes is $7.6 million in 2015 ($18.0 million in 2014).

13. ACCOUNTS RECEIVABLE

	Note	**2015**	2014
Trade	29(c)	**$ 433.0**	$ 397.8
Other		**61.1**	51.6
		$ 494.1	$ 449.4

14. INVENTORIES

	2015	2014
Raw materials and supplies	**$ 22.6**	$ 21.0
Finished goods	**112.9**	115.7

[1] Videotron holds an option to sell its unused AWS spectrum licence in the Toronto area to Rogers Communications Partnership for a price of $180.0 million. The spectrum licence was purchased at a cost of $96.4 million in 2008.

[2] In 2014, Videotron acquired seven 700 MHz spectrum licences, covering the entirety of the provinces of Québec, Ontario (except Northern Ontario), Alberta and British Columbia, for a total price of $233.3 million, for which Videotron made a cash deposit of $15.9 million in 2013 and paid the balance in 2014.

[3] In 2015, Videotron acquired four AWS-3 spectrum licences, covering the Province of Québec and the Ottawa region, and eighteen 2500 MHz spectrum licences, covering the Province of Québec, the Ottawa region, the cities of Toronto, Vancouver, Calgary and Edmonton, for a total price of $219.0 million.

[4] Also includes the net change in assets related to discontinued operations.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. INTANGIBLE ASSETS (continued)

The cost of internally generated intangible assets, mainly composed of software, was $448.5 million as of December 31, 2015 ($415.8 million as of December 31, 2014). For the year ended December 31, 2015, the Corporation recorded additions of internally generated intangible assets of $36.3 million ($62.0 million in 2014).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $245.8 million as of December 31, 2015 ($209.8 million as of December 31, 2014). For the year ended December 31, 2015, the Corporation recorded $39.2 million in amortization on its internally generated intangible assets ($44.8 million in 2014). The net carrying value of internally generated intangible assets was $202.7 million as of December 31, 2015 ($206.0 million as of December 31, 2014).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, mastheads are allocated to the Newspapers and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU.

17. GOODWILL

For the years ended December 31, 2015 and 2014, changes in the net carrying amount of goodwill are as follows:

	2015	2014
Cost		
Balance at beginning of year	**$ 5,584.3**	$ 6,862.9
Business acquisitions (note 12)	**48.8**	18.0
Business disposals	**(32.0)**	(93.9)
Reclassification to assets held for sale	**–**	(1,203.0)
Other	**–**	0.3
Balance at end of year	**5,601.1**	5,584.3
Accumulated amortization and impairment losses		
Balance at beginning of year	**2,869.7**	3,801.4
Impairment loss (note 7)	**85.0**	199.3
Business disposals	**(32.0)**	(58.0)
Reclassification to assets held for sale	**–**	(1,073.0)
Balance at end of year	**2,922.7**	2,869.7
Net carrying amount	**$ 2,678.4**	$ 2,714.6

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

The net carrying amount of goodwill as of December 31, 2015 and 2014 was allocated to the following significant CGU groups:

	2015	2014
CGU groups		
Telecommunications	**$ 2,589.9**	$ 2,570.3
Newspapers	**–**	85.0
Magazines	**70.0**	35.8
Other[1]	**18.5**	23.5
Total	**$ 2,678.4**	$ 2,714.6

[1] Includes the CGUs related to Speciality film and television services, Book publishing and distribution, and Sports and Entertainment.

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

Recoverable amounts (continued)

The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

	2015		2014	
CGU groups	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications[1]	**9.0 %**	**2.5 %**	9.0 %	2.5 %
Newspapers[2]	**–**	**–**	11.5	0.0
Magazines[3]	**16.0**	**0.0**	16.0	1.0
Other[3]	**11.0 to 16.0**	**0.0 to 2.0**	11.0 to 16.0	1.0

1 As allowed by IAS 36, *Impairment of assets*, the recoverable amount calculated in the 2014 annual impairment test was used in the test performed in 2015 for this CGU. Accordingly, pre-tax discount rates and perpetual growth rates are the same in 2015 and 2014. The recoverable amount of this CGU was based on value in use, using the discounted cash flow method.

2 In 2015, the recoverable amount of the Newspapers CGU was based a fair value less costs of disposal. More specifically, the fair value of the CGU was based on the individual assets which were estimated using external valuation reports, comparable transaction metrics, and other financial information available. These fair values are classified as Level 3 in the fair value hierarchy described in note 29(b). In 2014, the recoverable amounts of the Newspapers CGU was based on a fair value less costs of disposal, using a discounted cash flow method, except for the English newspapers' activities, for which the fair value was based on the metrics of the sale transaction announced in 2014 (note 10).

3 In 2015 and 2014, the recoverable amounts of these CGUs were based on value in use, using the discounted cash flow method.

Sensitivity of recoverable amounts

The following table presents, for the Corporation's significant CGU groups, the change in the discount rate or in the perpetual growth rate used in the tests performed that would have been required for the recoverable amount to equal the carrying value of the CGU as of the most recent impairment tests in 2015:

CGU groups[1]	**Incremental increase in pre-tax discount rate (WACC)**	**Incremental decrease in perpetual growth rate**
Telecommunications[2]	5.0 %	5.0 %
Magazines	2.0	1.5

1 No sensitivity tests were performed for CGUs on which impairment charges were recorded in the latest impairment tests.

2 Since the recoverable amount calculated in the 2014 annual impairment test was used in the test performed in 2015 for this CGU, sensitivity tests are the same as those disclosed in 2014.

The recognition of provisions, in terms of both timing and amounts, requires the exercise of judgment based on relevant circumstances and events that can be subject to change over time. Provisions are primarily comprised of the following:

Restructuring of operations

Provisions for restructuring activities primarily cover severance payments related to initiatives to eliminate positions in the Media segment.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. PROVISIONS AND CONTINGENCIES (continued)

Contingencies and legal disputes

There are a number of legal proceedings against the Corporation and its subsidiaries that are pending. In the opinion of the management of the Corporation and its subsidiaries, the outcome of those proceedings is not expected to have a material adverse effect on the Corporation's results or on its financial position. Management of the Corporation, after taking legal advice, has established provisions for specific claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

Other

Other provisions are principally related to decommissioning obligations.

21. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2016 in an amount of $150.0 million. The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares owned of Quebecor Media.

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in August 2017. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facilities of Quebecor Media are comprised of a US$350.0 million secured term loan "B" facility bearing interest at LIBOR, subject to a LIBOR floor of 0.75%, plus a premium of 2.50% and a $300.0 million secured revolving credit facility, bearing interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio, and maturing in January 2017. The term loan "B" facility provides for quarterly amortization payments totaling 1.00% per annum of the original principal amount, with the balance payable on August 17, 2020. These credit facilities contain covenants such as maintaining certain financial ratios, limitations on Quebecor Media's ability to incur additional indebtedness, pay dividends and make other distributions. They are secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2015, the credit facilities of Quebecor Media were secured by assets with a carrying value of $3,326.5 million ($3,177.3 million in 2014). As of December 31, 2015, $2.0 million had been drawn on the revolving credit facility (no amount was drawn in 2014), and the balance of the term loan "B" is $472.0 million ($400.0 million in 2014).

(v) The other credit facility matured in July 2015 and was not renewed.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(vi) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2015:

Principal amount	Annual nominal interest rate	Effective interest rate (after discount or premium at issuance)	Maturity date	Interest payable every 6 months on
Quebecor Media				
$ 325.0	7.375 %	7.375 %	January 15, 2021	June and December 15
US$ 850.0	5.750 %	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	6.625 %	January 15, 2023	June and December 15
Videotron				
$ 300.0	6.875 %	6.875 %	July 15, 2021	June and December 15
US$ 800.0	5.000 %	5.000 %	July 15, 2022	January and July 15
US$ 600.0[1]	5.375 %	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	5.625 %	June 15, 2025	April and October 15
$ 375.0[2]	5.750 %	5.750 %	January 15, 2026	March and September 15

1 The Notes were issued in April 2014 for net proceeds of $654.5 million, net of financing fees of $7.8 million.

2 The Notes were issued in September 2015 for net proceeds of $370.1 million, net of financing fees of $4.9 million.

(vii) The bank credit facilities provide for a $615.0 million secured revolving credit facility that matures in July 2020, a $350.0 million unsecured revolving credit facility that matures in July 2020 and a $75.0 million secured export financing facility providing for a term loan that matures in June 2018. The revolving credit facilities bear interest at Bankers' acceptance rate, Canadian prime rate or U.S. prime rate, plus a margin, depending on Videotron's leverage ratio. Advances under the export financing facility bear interest at Bankers' acceptance rate plus a margin. The secured bank credit facilities are secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2015, the secured bank credit facilities were secured by assets with a carrying value of $7,646.3 million ($6,238.3 million in 2014). The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2015, $246.7 million had been drawn on the secured revolving credit facilities (no amount was drawn in 2014), $26.8 million was outstanding on the export financing facility ($37.5 million in 2014), and no amount was drawn on the unsecured revolving credit facility.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(viii) The bank credit facilities of TVA Group comprise a secured revolving credit facility in the amount of $150.0 million, maturing in February 2019, and a secured term loan in the amount of $75.0 million, maturing in November 2019. TVA Group's revolving credit facility bears interest at floating rates based on Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate plus a premium determined by a leverage ratio. The term loan bears interest at floating rates based on Bankers' acceptance rate or Canadian prime rate plus a premium determined by a leverage ratio. The term loan provides for quarterly amortization payments commencing on December 20, 2015. The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. They are secured by liens on all of its movable assets and an immovable hypothec on its Head Office building. As of December 31, 2015 and 2014, no amount had been drawn on the revolving credit facility, and as of December 31, 2015, $73.8 million was outstanding on the term loan ($74.8 million in 2014).

On December 31, 2015, the Corporation and its subsidiaries were in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2016	$	44.0
2017		53.9
2018		19.2
2019		56.8
2020		704.2
2021 and thereafter		5,014.4

22. OTHER LIABILITIES

	Note		**2015**		2014
Defined benefit plans	31	**$**	**158.9**	$	136.8
Embedded derivatives related to convertible debentures	25		**221.7**		232.2

23. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares (“Class A Shares”) with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares (“Class B Shares”) on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2013	39,024,672	$ 8.7	84,306,792	$ 320.2
Class A Shares converted into Class B Shares	(51,500)	–	51,500	–
Shares purchased and cancelled	–	–	(455,000)	(1.7)
Balance as of December 31, 2014	38,973,172	8.7	83,903,292	318.5
Class A Shares converted into Class B Shares	(46,800)	–	46,800	–
Shares purchased and cancelled	–	–	(413,300)	(1.6)
Balance as of December 31, 2015	**38,926,372**	**$ 8.7**	**83,536,792**	**$ 316.9**

On July 30, 2015, the Corporation filed a normal course issuer bid for a maximum of 500,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2015. The purchases can be made from August 13, 2015 to August 12, 2016 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All shares purchased under the bid will be cancelled.

In 2015, the Corporation purchased and cancelled 413,300 Class B Shares for a total cash consideration of $12.4 million (455,000 Class B Shares for a total cash consideration of $11.7 million in 2014). The excess of $10.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2015 ($10.0 million in 2014).

On March 8, 2016, the Board of Directors of the Corporation declared a dividend of $0.035 per share on Class A Shares and Class B Shares, or approximately $4.3 million, payable on April 19, 2016 to shareholders of record at the close of business on March 25, 2016.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 13,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of the Corporation and its subsidiaries. The exercise price of each option is equal to the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. Options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price, or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant.

The following table gives details on changes to outstanding options for the years ended December 31, 2015 and 2014:

		2015		2014
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**1,310,000**	**$ 25.36**	2,369,182	$ 21.13
Granted	**–**	**–**	1,010,000	26.30
Exercised	**–**	**–**	(527,208)	18.83
Cancelled	**–**	**–**	(1,541,974)	21.71
Balance at end of year	**1,310,000**	**$ 25.36**	1,310,000	$ 25.36
Vested options at end of year	**100,000**	**$ 22.23**	–	$ –

During the year ended December 31, 2014, 527,208 stock options of the Corporation were exercised for a cash consideration of $4.2 million.

The following table gives summary information on outstanding options as of December 31, 2015:

			Outstanding options		**Vested options**
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$22.23 to 30.24	**1,310,000**	**8.18**	**$ 25.36**	**100,000**	**$ 22.23**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Mid-term stock-based compensation plan

Under the mid-term stock-based compensation plan, participants are entitled to receive a cash payment at the end of a three-year period based on the appreciation of the Corporation Class B Share price, and subject to the achievement of certain non-market performance criteria. The following table provides details of changes to outstanding units in the mid-term stock-based compensation plan for the years ended December 31, 2015 and 2014:

		2015		2014
	Units	**Weighted average exercise price**	Units	Weighted average exercise price
Balance at beginning of year	**803,517**	**$ 26.22**	2,263,516	$ 19.92
Granted	**672,829**	**31.62**	1,388,447	26.47
Exercised	**–**	**–**	(480,148)	18.76
Cancelled	**–**	**–**	(2,368,298)	21.86
Balance at end of year	**1,476,346**	**$ 28.68**	803,517	$ 26.22

During the year ended December 31, 2014, a cash consideration of $3.7 million was paid upon the exercise of 480,148 units.

(iii) Deferred stock unit plan

The Quebecor deferred stock unit ("DSU") plan is for the benefit of the Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on the Corporation's Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of the Corporation's Class B Shares on the date of redemption. As of December 31, 2015 and 2014, the total number of DSUs outstanding under this plan was 170,982 and 160,338, respectively.

(b) Quebecor Media stock option plan

Under a stock option plan established by Quebecor Media, 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media and its subsidiaries. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Compensation Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Compensation Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

The following table gives details on changes to outstanding options granted as of December 31, 2015 and 2014:

	2015		2014	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**1,631,959**	**$ 55.15**	1,647,309	$ 52.67
Granted	**369,500**	**70.56**	271,000	63.96
Exercised	**(480,165)**	**50.35**	(218,750)	46.28
Cancelled	**(38,800)**	**59.01**	(67,600)	58.85
Balance at end of year	**1,482,494**	**$ 60.44**	1,631,959	$ 55.15
Vested options at end of year	**244,261**	**$ 51.44**	263,823	$ 46.74

During the year ended December 31, 2015, 480,165 of the Quebecor Media's stock options were exercised for a cash consideration of $9.5 million (218,750 stock options for $3.6 million in 2014).

The following table gives summary information on outstanding options as of December 31, 2015:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$37.91 to 53.40	181,083	4.58	$ 47.12	129,283	$ 45.35
$57.35 to 70.56	1,301,411	8.17	62.30	114,978	58.28
$37.91 to 70.56	**1,482,494**	**7.73**	**$ 60.44**	**244,261**	**$ 51.44**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 Class B Non-Voting Shares of TVA Group have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of Class B Shares on the Toronto Stock Exchange the day before the option is granted. Options granted prior to January 2006 usually vest equally over a four-year period, with the first 25% vesting on the second anniversary date of the date of grant. Beginning January 2006, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the Class B Non-Voting Shares of TVA Group and the exercise price of the option or, subject to certain conditions, exercise their options to purchase Class B Non-Voting Shares of TVA Group at the exercise price. The market value is defined as the average closing market price of the Class B Non-Voting Shares of TVA Group for the last five trading days preceding the date on which the option was exercised.

The following table gives details on changes to outstanding options for the years ended December 31, 2015 and 2014:

		2015		2014
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**525,368**	**$ 15.25**	691,076	$ 16.54
Granted	**80,000**	**6.85**	30,000	8.90
Cancelled	**(82,366)**	**13.68**	(69,208)	15.32
Expired	**(59,631)**	**21.28**	(126,500)	20.75
Balance at end of year	**463,371**	**$ 13.30**	525,368	$ 15.25
Vested options at end of year	**369,371**	**$ 14.81**	495,368	$ 15.63

The following table gives summary information on outstanding options as of December 31, 2015:

		Outstanding options			**Vested options**
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$6.85 to 8.90	100,000	8.94	$ 7.47	6,000	$ 8.90
$14.62 to 15.99	363,371	1.43	14.91	363,371	14.91
$6.85 to 15.99	**463,371**	**3.05**	**$ 13.30**	**369,371**	**$ 14.81**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(d) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans as of December 31, 2015 and 2014:

December 31, 2015	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**0.95 %**	**0.80 %**	**0.68 %**
Distribution yield	**0.42 %**	**1.50 %**	**– %**
Expected volatility	**20.88 %**	**19.30 %**	**67.83 %**
Expected remaining life	**5.0 years**	**3.64 years**	**1.83 years**

December 31, 2014	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	1.69 %	1.38 %	1.07 %
Distribution yield	0.31 %	1.37 %	– %
Expected volatility	26.89 %	18.99 %	32.61 %
Expected remaining life	6.0 years	3.58 years	1.21 years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(e) Liability of vested options

As of December 31, 2015, the liability for all vested options was $5.5 million as calculated using the intrinsic value ($6.3 million as of December 31, 2014).

(f) Consolidated compensation charge

For the year ended December 31, 2015, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $9.2 million ($5.8 million in 2014), of which a net reversal of the charge of $0.3 million (a charge of $1.0 million in 2014) is presented as part of discontinued operations.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. CONVERTIBLE DEBENTURES

On October 11, 2012, the Corporation issued $500.0 million in aggregate principal amount of convertible debentures bearing interest at an annual rate of 4.125% and maturing in October 2018. Interest is payable semi-annually in cash, in Quebecor Class B Shares, or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B Share, subject to a floor price of $19.25 per share (that is, a maximum number of 25,974,026 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the floor price) and a ceiling price of $24.06 per share (that is, a minimum number of 20,779,220 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

The convertible debentures are presented separately as a financial liability and the cap and floor feature are presented as embedded derivatives in other liabilities (note 22). The fair value of these embedded derivatives as of December 31, 2015 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 0.70% (1.41% in 2014), a dividend yield of 0.42% (0.31% in 2014), and an expected volatility of 19.60% (20.40% in 2014). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2015 would have decreased the gain on embedded derivatives related to convertible debentures by $19.2 million, while a one dollar decrease in the market price of a Quebecor Class B share would have increased the gain by $19.0 million.

26. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Translation of net investments in foreign operations	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2013	$ 1.2	$ (16.0)	$ (8.3)	$ (23.1)
Other comprehensive loss	(1.2)	(13.2)	(26.9)	(41.3)
Balance as of December 31, 2014	–	(29.2)	(35.2)	(64.4)
Other comprehensive loss	–	(23.3)	(16.2)	(39.5)
Non-controlling interests acquisition (note 12)	–	(5.1)	(2.2)	(7.3)
Balance as of December 31, 2015	**$ –**	**$ (57.6)**	**$ (53.6)**	**$ (111.2)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 8 1/2-year period.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

27. COMMITMENTS

The Corporation rents premises and equipment under operating leases and has entered into long-term commitments to purchase services, capital equipment, broadcasting rights, and to pay royalties. The operating leases have various terms, escalation clauses, purchase options and renewal rights. The minimum payments for the coming years are as follows:

	Leases	Other commitments
2016	$ 51.3	$ 253.6
2017 to 2020	117.8	493.6
2021 and thereafter	84.7	592.8

The Corporation and its subsidiaries' operating lease expenses amounted to $66.9 million in 2015 ($69.3 million in 2014), of which $6.0 million ($14.7 million in 2014) is presented as part of discontinued operations.

28. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms), and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2015, the maximum exposure with respect to these guarantees was $28.4 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. GUARANTEES (continued)

Other

One of the Corporation's subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of their use of financial instruments, the Corporation and its subsidiaries are exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation and its subsidiaries use derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation and its subsidiaries do not intend to settle their derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar		Notional amount sold		Notional amount bought
Quebecor Media					
2016[1]	1.0154	US$	320.0	$	324.9
Videotron					
Less than 1 year	1.3105	$	168.7	US$	128.7
2017[2]	1.3849	US$	260.0	$	360.1

1 See footnote 1 below "Cross-currency interest rate swaps" table.

2 See footnote 2 below "Cross-currency interest rate swaps" table.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(a) Description of derivative financial instruments (continued)

(ii) Interest rate swaps

Maturity	Notional amount	Pay/ receive	Fixed rate	Floating rate
TVA Group				
2017	$ 38.5	Pay fixed/ Receive floating	2.03%	Bankers' acceptances 1 month

(iii) Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023[1]	2007 to 2016	US$ 320.0	7.69%	0.9977
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan "B"	2013 to 2020	US$ 342.1	Bankers' acceptance 3 months + 2.77%	1.0346

[1] Quebecor Media initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 7.75% Senior Notes due 2016 redeemed in 2012. These swaps are now used to set in CAN dollars all coupon payments through 2016 on US$431.3 million of notional amount under its 5.75% Senior Notes due 2023 and issued in 2012. In conjunction with the repurposing of these swaps, Quebecor Media has entered into US$320.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the March 15, 2016 notional exchange.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(a) Description of derivative financial instruments (continued)

(iii) Cross-currency interest rate swaps (continued)

Hedged item	Hedging instrument				
	Period covered		Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Videotron					
5.000% Senior Notes due 2022	2014 to 2022	US$	543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$	256.9	5.81%	1.0016
5.375% Senior Notes due 2024[2]	2008 to 2017	US$	260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$	158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$	441.4	5.62%	1.1039

[2] Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued in 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation and its subsidiaries include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair value measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its other financial instruments accounted for at fair value in the consolidated balance sheets:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value in the consolidated balance sheets, is determined using Level 2 inputs.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments (continued)

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of early settlement options recognized as embedded derivatives and embedded derivative related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2015 and 2014 are as follows:

		2015		2014
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1, 2]	**$ (5,892.5)**	**$ (5,894.9)**	$ (5,326.7)	$ (5,444.7)
Convertible debentures[3]	**(706.4)**	**(706.4)**	(711.8)	(711.8)
Derivative financial instruments[4]				
Early settlement options	**1.0**	**1.0**	8.2	8.2
Foreign exchange forward contracts[5]	**9.3**	**9.3**	4.2	4.2
Interest rate swaps	**(0.8)**	**(0.8)**	(0.5)	(0.5)
Cross-currency interest rate swaps[5]	**945.2**	**945.2**	294.4	294.4

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $953.7 million as of December 31, 2015 ($298.6 million as of December 31, 2014).

5 The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2015, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2015, 10.4% of trade receivables were 90 days past their billing date (8.5% as of December 31, 2014) of which 40.4% had an allowance for doubtful accounts (52.3% as of December 31, 2014).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2015 and 2014:

		2015		2014
Balance at beginning of year	**$**	**21.8**	$	28.4
Charged to income		**32.1**		32.1
Utilization		**(30.9)**		(34.5)
Reclassification to assets held for sale		**–**		(4.2)
Balance at end of year	**$**	**23.0**	$	21.8

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of their use of derivative financial instruments, the Corporation and its subsidiaries are exposed to the risk of non-performance by a third party. When the Corporation and its subsidiaries enter into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation and its subsidiaries will not be able to meet their financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation and its subsidiaries manage this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 7.0 years as of December 31, 2015 (7.2 years as of December 31, 2014).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, and dividends in the future. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2015, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative instruments, less estimated future receipts on derivative instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 34.3**	$ 34.3	$ –	$ –	$ –
Accounts payable and accrued charges	**654.9**	654.9	–	–	–
Long-term debt[1]	**5,892.5**	44.0	73.1	761.0	5,014.4
Convertible debentures[2]	**704.0**	–	704.0	–	–
Interest payments[3]	**2,076.9**	263.9	612.3	561.4	639.3
Derivative instruments[4]	**(950.9)**	(1.8)	(17.7)	(112.9)	(818.5)
Total	**$ 8,411.7**	**$ 995.3**	**$ 1,371.7**	**$ 1,209.5**	**$ 4,835.2**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2015 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2015.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation’s financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation’s consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation and its subsidiaries have entered into transactions to hedge the foreign currency risk exposure on their U.S.-dollar-denominated debt obligations outstanding as of December 31, 2015, to hedge their exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock-in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation’s sensitivity to variations in foreign exchange rates is economically limited.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2015 is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of $0.10	$ **2.2**	$ **50.2**
Decrease of $0.10	**(2.2)**	**(50.2)**

Interest rate risk

Some of the Corporation's and its subsidiaries' bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation and its subsidiaries bear interest at fixed rates. The Corporation and its subsidiaries have entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2015, after taking into account the hedging instruments, long-term debt was comprised of 82.5% fixed-rate debt (82.6% in 2014) and 17.5% floating-rate debt (17.4% in 2014).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2015 was $8.6 million.

The estimated sensitivity on income and on other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2015, as per the Corporation's valuation models, is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of 100 basis points	**$ (3.2)**	**$ (50.5)**
Decrease of 100 basis points	**3.2**	**50.5**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivative related to convertible debentures, net assets and liabilities related to derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2015 and 2014 is as follows:

	2015	2014
Bank indebtedness	**$ 34.3**	$ 5.2
Long-term debt	**5,856.4**	5,278.3
Embedded derivatives related to convertible debentures	**221.7**	232.2
Convertible debentures	**500.0**	500.0
Derivative financial instruments	**(953.7)**	(298.1)
Cash and cash equivalents	**(18.6)**	(395.3)
Net liabilities	**5,640.1**	5,322.3
Equity	**$ 652.0**	$ 1,063.3

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

		2015		2014
Salaries and short-term benefits	**$**	**10.5**	$	11.0
Share-based compensation		**6.6**		(0.1)
Other long-term benefits		**1.5**		7.9
	$	**18.6**	$	18.8

Operating transactions

During the year ended December 31, 2015, the Corporation and its subsidiaries made purchases and incurred rent charges with affiliated corporations in the amount of $3.4 million ($2.9 million in 2014), which are included in purchase of goods and services. The Corporation and its subsidiaries made sales to affiliated corporations in the amount of $3.3 million ($3.3 million in 2014). These transactions were accounted for at the consideration agreed between parties.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation’s pension plans are registered with a Québec or federal regulatory authority.

The Corporation’s funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future payment of amortization payments when the degree of solvency of the pension plans is less than 100% as defined by the relevant Québec and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, independent members of the Corporation’s management or the Corporation, in accordance with the provisions of each plan. Under the Corporation’s rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation’s management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committee or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation’s funding requirement.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2015 and 2014:

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,181.8**	$ 991.6	**$ 65.2**	$ 54.3
Service costs	**36.4**	31.4	**1.7**	1.1
Interest costs	**49.0**	50.9	**2.7**	2.6
Plan participants' contributions	**13.1**	14.6	**–**	–
Actuarial loss arising from:				
Demographic assumptions	**–**	12.2	**–**	0.4
Financial assumptions	**19.9**	136.7	**1.3**	4.8
Participant experience	**6.1**	(2.3)	**–**	3.5
Benefits and settlements paid	**(66.5)**	(54.4)	**(1.7)**	(1.5)
Curtailment, amendments and other	**(7.0)**	1.1	**–**	–
Benefit obligations at the end of the year	**$ 1,232.8**	$ 1,181.8	**$ 69.2**	$ 65.2

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,115.6**	$ 976.7	**$ –**	$ –
Actual return on plan assets	**59.3**	118.7	**–**	–
Employer contributions	**43.3**	60.0	**1.7**	1.5
Plan participants' contributions	**13.1**	14.6	**–**	–
Benefits and settlements paid	**(66.5)**	(54.4)	**(1.7)**	(1.5)
Fair value of plan assets at the end of the year	**$ 1,164.8**	$ 1,115.6	**$ –**	$ –

As of December 31, 2015, the weighted average duration of defined benefit obligations was 16.0 years (16.7 years in 2014). The Corporation expects future benefit payments of $59.2 million in 2016.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The Corporation's investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed**,** whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2015	2014
Equity securities:		
Canadian	**21.4 %**	22.4 %
Foreign	**33.8**	32.3
Debt securities	**42.3**	41.8
Other	**2.5**	3.5
	100.0 %	100.0 %

The fair value of plan assets is principally based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amount recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Benefit obligations	**$ (1,232.8)**	$ (1,181.8)	**$ (69.2)**	$ (65.2)
Fair value of plan assets	**1,164.8**	1,115.6	**–**	–
Plan deficit	**(68.0)**	(66.2)	**(69.2)**	(65.2)
Asset limit and minimum funding adjustment	**(21.7)**	(4.4)	**–**	–
Net amount recognized[1]	**$ (89.7)**	$ (70.6)	**$ (69.2)**	$ (65.2)

[1] The net amount recognized for 2015 consists of a liability of $158.9 million included in Other liabilities (note 22) and for 2014, it consists of an asset of $3.3 million included in Other assets (note 18), a liability of $136.8 million included in Other liabilities and a liability of $2.3 million included in liabilities held for sale.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Actuarial loss on benefit obligations	**$ (26.0)**	$ (146.6)	**$ (1.3)**	$ (8.7)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**16.2**	71.6	**–**	–
Asset limit and minimum funding adjustment	**(17.3)**	29.8	**–**	–
Re-measurements recorded in other comprehensive income	**$ (27.1)**	$ (45.2)	**$ (1.3)**	$ (8.7)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Employee costs:				
Service costs	**$ 36.4**	$ 31.4	**$ 1.7**	$ 1.1
Curtailment, settlement and other	**(2.8)**	3.7	**–**	–
Interest on net defined benefit liability	**3.5**	2.6	**2.4**	2.5
Net benefit costs[1]	**$ 37.1**	$ 37.7	**$ 4.1**	$ 3.6

[1] Net benefit gains of $6.0 million in 2015 were presented as part of discontinued operations (net benefit costs of $5.1 million in 2014).

The expense related to defined contribution pension plans amounted to $16.0 million in 2015 ($15.3 million in 2014), of which $0.4 million ($1.5 million in 2014) is presented as part of discontinued operations.

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $42.0 million in 2016, based on the most recent financial actuarial reports filed (contributions of $45.0 million were paid in 2015).

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

QUEBECOR INC. AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2015 and 2014
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions (continued)

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2015 and 2014 and current periodic benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2015	2014	**2015**	2014
Benefit obligations				
Rates as of year-end:				
Discount rate	**4.00 %**	4.10 %	**4.00 %**	4.10 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00
Current periodic costs				
Rates as of preceding year-end:				
Discount rate	**4.10 %**	4.90 %	**4.10 %**	4.90 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00

The assumed average retirement age of participants used was of 62 years in 2015 and 2014.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 7.0 % at the end of 2015. These costs, as per the estimate, are expected to decrease gradually over the next 10 years to 4.5% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $18.9 million and the postretirement benefits obligation by $1.4 million as of December 31, 2015. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

32. SUBSEQUENT EVENT

On January 7, 2016, Videotron acquired Fibrenoire Inc. (“Fibrenoire”), a company that provides businesses with fibre-optic connectivity services. The transaction will enable Videotron Business Solutions and Fibrenoire to join forces to meet the growing demand from business customers for fibre-optic connectivity. The purchase price was $125.0 million, including $120.6 million paid at the closing, subject to certain adjustments.

This is Exhibit 46 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2016 and 2015

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of the Corporation and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the Corporation's annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with the Corporation's management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

Pierre Karl Péladeau
President and Chief Executive Officer

Jean-François Pruneau
Senior Vice President and Chief Financial Officer

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

We have audited the accompanying consolidated financial statements of Quebecor Inc., which comprise the consolidated balance sheets as at December 31, 2016 and 2015 and the consolidated statements of income, comprehensive income, equity and cash flows for the years ended December 31, 2016 and 2015, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Quebecor Inc. as at December 31, 2016 and 2015, and its financial performance and its cash flows for the years ended December 31, 2016 and 2015 in accordance with International Financial Reporting Standards.

QUEBECOR INC.

SEGMENTED INFORMATION

Years ended December 31, 2016 and 2015

(in millions of Canadian dollars)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media Inc. (“Quebecor Media”) refers to Quebecor Media Inc. and its subsidiaries. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media and in subsidiaries controlled by Quebecor Media. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	81.1 %	81.1 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions (including data centers), cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies, televisual products and video games through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized web sites, the publishing of books and magazines, the distribution of books, magazines and movies, the distribution and production of music, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, and the operation of two Quebec Major Junior Hockey League teams.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

Additions to intangible assets	312.3	9.3	34.6	4.4	360.6

[1] The Chief Executive Officer uses adjusted operating income as the measure of profit to assess the performance of each segment. Adjusted operating income is referred to as a non-International Financial Reporting Standards ("IFRS") measure and is defined as net income before depreciation and amortization, financial expenses, loss (gain) on valuation and translation of financial instruments, restructuring of operations, litigation and other items, impairment of goodwill and other assets, loss on debt refinancing, income taxes and loss from discontinued operations.

See accompanying notes to consolidated financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board.

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (note 1(k) and 1(w)), the liability related to stock-based compensation (note 1(u)) and the net defined benefit liability (note 1(v)), and they are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation operates ("functional currency").

Comparative figures for the year ended December 31, 2015 have been restated to conform to the presentation adopted for the year ended December 31, 2016.

(b) Change in accounting estimates

In the second quarter of 2015, the Corporation changed its assessment of the useful life of its spectrum licences used in the operation of its Telecommunications segment. In light of recent spectrum auctions and developments in the telecommunications industry, the Corporation is now of the view that these spectrum licences have an indefinite useful life based on the following facts:

- The Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development ("ISED") Canada;
- The Corporation has the financial and operational ability to renew these spectrum licences;
- Currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences;
- The Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Accordingly, the Corporation ceased to amortize spectrum licences used in its operations as of April 1, 2015 and no amortization expense has been recorded after this date. The straight-line amortization expense recorded relating to these licences was $13.9 million in 2015.

(c) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent corporation's ownership interest in them. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation's consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

Non-controlling interests in an entity acquired are presented in the consolidated balance sheets within equity, separately from the equity attributable to shareholders, and are initially measured at fair value.

(e) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transactions. Translation gains and losses on assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments, unless hedge accounting is used.

(f) Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under "Deferred revenue" when customers are invoiced.

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony and over-the-top video service, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition (continued)

Telecommunications (continued)

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video service are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;
- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers, magazines, books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment leasing revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from leasing, and from ticket (including season tickets), food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising under the form of venue signage or sponsorships, are recognized ratably over the period of the agreement;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

(h) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

For the year ended December 31, 2016, the Corporation recorded $11.7 million of barter advertising revenues ($10.3 million in 2015).

(i) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized in other comprehensive income or otherwise directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Income taxes (continued)

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and due to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(j) Leases

Assets under leasing agreements are classified at the inception of the lease as (i) finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee, or as (ii) operating leases for all other leases.

Operating lease rentals are recognized in the consolidated statement of income on a straight-line basis over the period of the lease. Any lessee incentives are deferred and then recognized evenly over the lease term.

(k) Financial instruments

Classification, recognition and measurement

Financial instruments are classified as held-for-trading, available-for-sale, loans and receivables, or as other financial liabilities, and measurement in subsequent periods depends on their classification. The Corporation has classified its financial instruments (except derivative financial instruments) as follows:

Held-for-trading	Loans and receivables	Available-for-sale	Other liabilities
• Cash and cash equivalents • Bank indebtedness • Exchangeable debentures included in "Other liabilities"	• Accounts receivable • Loans and other long-term receivables included in "Other assets"	• Other portfolio investments included in "Other assets"	• Accounts payable and accrued charges • Long-term debt • Convertible debentures • Other long-term financial liabilities included in "Other liabilities"

Financial instruments held-for-trading are measured at fair value with changes recognized in income as a gain or loss on valuation and translation of financial instruments. Available-for-sale portfolio investments are measured at fair value or at cost in the case of equity investments that do not have a quoted market price in an active market and where fair value is insufficiently reliable, and changes in fair value are recorded in other comprehensive income. Financial assets classified as loans and receivables and financial liabilities classified as "Other liabilities" are initially measured at fair value and subsequently measured at amortized cost, using the effective interest rate method of amortization. Liabilities recognized as a result of contingent consideration arising from a business acquisition and included in "Other liabilities", are initially recorded at their acquisition-date fair value and re-measured at fair value in subsequent periods. These changes in fair value are recorded in the consolidated statements of income as other items.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

(l) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(m) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are met.

(n) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(o) Trade receivables

Trade receivables are stated at their nominal value, less an allowance for doubtful accounts and an allowance for sales returns. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. Individual accounts receivables are written off when management deems them not collectible.

(p) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Inventories (continued)

In particular, inventories related to broadcasting activities, which primarily comprise programs and broadcast and distribution rights, are accounted for as follows:

(i) Programs produced and productions in progress

Programs produced and productions in progress related to broadcasting activities are accounted for at the lesser of cost and net realizable value. Cost includes direct charges for goods and services and the share of labour and general expenses related to each production. The cost of each program is charged to operating expenses when the program is broadcast.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are classified as current or long-term assets, based on management's estimate of the broadcast or distribution period. These rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on how future economic benefits from those rights will be generated. Broadcast and distribution rights payable are classified as current or long-term liabilities based on the payment terms included in the licence.

Estimates of future revenues used to determine the net realizable values of inventories related to the broadcasting or distribution of television products and movies are examined periodically by management and revised as necessary. The carrying value of programs produced and productions in progress, broadcast rights and distribution rights is reduced to the net realizable value, as necessary, based on this assessment.

(q) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statement of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful life
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets. A decommissioning obligation is however recorded for the rental of sites related to the mobile network.

Videotron Ltd. (“Videotron”) is engaged in an agreement to operate a shared LTE network in the Province of Québec and the Ottawa region.

(s) Goodwill and intangible assets

Goodwill

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. When the Corporation acquires less than 100% of the equity interests in the business acquired at the acquisition date, goodwill attributable to the non-controlling interests is also recognized at fair value.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(g)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(s) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by ISED Canada, (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future (note 1 (b)).

Broadcasting licences, trademarks and sport franchises have also an indefinite useful life and are not amortized. In particular, given the low cost of renewal of broadcasting licences, management believes it is economically compelling to renew the licences and to comply with all rules and conditions attached to those licences. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of those assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful life
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(t) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(u) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") and performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 24.

(v) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive loss and in accumulated other comprehensive loss. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation;
- changes in the net benefit asset limit or in the minimum funding liability.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services, health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(w) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion prices features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(x) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 16.

(ii) Fair value of derivative financial instruments, including embedded derivatives

Derivative financial instruments must be accounted for at their fair value, which is estimated using valuation models based on a number of assumptions such as future cash flows, period-end swap rates, foreign exchange rates, and credit default premium. Also, the fair value of embedded derivatives related to convertible debentures and to early settlement options on debt is determined with option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium. The assumptions used in the valuation models have a significant impact on the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, the gain or loss on valuation of financial instruments recorded in the consolidated statements of comprehensive income, and the carrying value of derivative financial instruments in the consolidated balance sheets. A description of valuation models used and sensitivity analysis on key assumptions are presented in note 28.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(iii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 30.

(iv) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. More specifically, an assessment of the probable outcomes of legal proceedings or other contingencies is also required. A description of the main provisions, including management expectations on the potential effect on the consolidated financial statements of the possible outcomes of legal disputes, is presented in note 19.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and the future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changed its conclusion in the future, as it did in 2015 (note 1 (b)).

(iii) CGU's determination for the purpose of impairment tests

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets. In identifying assets to group in CGUs, the Corporation considers, among other factors, offering bundled services, sharing telecommunication or broadcasting network infrastructure, integration of media assets, geographical proximity, similarity on exposure to market risk, and materiality. The determination of CGUs could affect the results of impairment tests and, as the case may be, the impairment charge recorded in the consolidated statements of income.

(iv) Determination if early settlement options are not closely related to their debt contract

Early settlement options are not considered closely related to their debt contract when the corresponding option exercise price is not approximately equal to the amortized cost of the debt. Judgment is therefore required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(v) Interpretation of laws and regulations

Interpretation of laws and regulation, including tax regulations, requires judgment from management that could have an impact on the recognition of provisions for legal litigation and income taxes in the consolidated financial statements.

(y) Recent accounting pronouncements

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

The Corporation does not expect its consolidated financial statements to be materially impacted by the adoption of IFRS 9.

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to be applied to all contracts with customers.

The Corporation expects that the adoption of IFRS 15 will have significant impacts on its consolidated financial statements, more specifically in its Telecommunications segment, with regards to the timing in the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs to obtain a contract and of certain other costs.

Under IFRS 15, the total consideration from a contract with multiple deliverables will need to be allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile services under contracts with multiple deliverables. Among other impacts, the adoption of IFRS 15 will result in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of revenues will therefore change under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract will remain the same.

In addition, under IFRS 15, certain costs to obtain a contract will be capitalized and amortized as operating expenses over the contract term or over the period of time the customer is expected to remain a customer of the Corporation. Currently, such costs are expensed as incurred. Also, the capitalization of connection costs will no longer be limited to the related connection revenues.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(y) Recent accounting pronouncements (continued)

(iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted, provided that the IFRS 15 is applied at the same time as IFRS 16.

IFRS 16 sets out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

The Corporation expects that the adoption of IFRS 16 will have significant impacts on its consolidated financial statements since all of the Corporation segments are engaged in various long-term leases on premises and equipment.

Under IFRS 16, most lease charges will be expensed as an asset amortization charge, along with a financial charge on the asset related financial liabilities. As operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the statement of income.

Loss (gain) on reversal of embedded derivatives on debt redemption	**0.2**	(0.4)
	$ 70.3	$ (6.7)

6. RESTRUCTURING OF OPERATIONS, LITIGATION AND OTHER ITEMS

	2016	2015
Restructuring of operations	**$ 26.1**	$ 19.2
Litigation	**1.1**	(138.1)
Other items	**0.8**	2.0
	$ 28.0	$ (116.9)

Restructuring of operations

In 2016, the Telecommunications segment recorded a charge for restructuring costs of $14.3 million, mainly related to the migration of its subscribers from analog to digital services ($8.8 million in 2015).

The Media segment has implemented various restructuring initiatives to reduce operating costs and, as a result, restructuring costs of $10.1 million, mainly for the reduction of positions, were recorded in 2016 ($9.8 million in 2015).

Other segments recorded a charge for restructuring costs of $1.7 million in 2016 ($0.6 million in 2015).

Litigation

On March 6, 2015, the Court of Appeal of Quebec ruled in favour of Videotron and TVA Group Inc. ("TVA Group"), and ordered Bell ExpressVu Limited Partnership ("Bell ExpressVu"), a subsidiary of Bell Canada, to pay Videotron $135.3 million and TVA Group $0.6 million, including interest, for negligence in failing to implement an appropriate security system to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada rejected Bell ExpressVu's application for leave to appeal the judgment. The related $139.1 million gain was recorded in 2015.

In 2014, a charge of $34.3 million, including interest, was accounted for as a result of an unfavorable judgment against Videotron in a legal action. Videotron is currently appealing this judgment. $1.1 million in interest relating to this litigation was recorded in 2016 ($1.0 million in 2015).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2016 and 2015
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

7. IMPAIRMENT OF GOODWILL AND OTHER ASSETS

	2016	2015
Impairment of goodwill	**$ 40.1**	$ 85.0
Impairment of property, plant and equipment	**–**	76.5
Impairment of intangible assets	**0.8**	69.2
	$ 40.9	$ 230.7

2016

During the third quarter of 2016, the Corporation performed an impairment test of its Magazines CGU in light of the continuous downtrend in advertising revenues in this industry. The Corporation concluded that the recoverable amount was less than the carrying amount of the Magazines CGU and recorded a goodwill impairment charge of $40.1 million (without any tax consequence).

An impairment charge on intangible assets of $0.8 million was also recorded in 2016 in the Media segment.

2015

In 2015, the Corporation performed impairment tests on its CGUs and concluded that the recoverable amounts of its Newspapers and Broadcasting CGUs were less than their carrying values. The recoverable amounts of these CGUs were negatively impacted by the decrease in newspaper and commercial printing volumes at the Mirabel printing plant, plus the continuing pressure on advertising revenues in the newspaper and television industries. Accordingly, a goodwill impairment charge of $85.0 million (without any tax consequence) and an impairment charge on other assets of $81.9 million, mainly related to Mirabel printing plant assets, were recorded for the Newspapers CGU. An impairment charge of $60.1 million on the TVA Network's broadcasting licence (including $30.1 million without any tax consequence) was recorded for the Broadcasting CGU.

An impairment charge on intangible assets of $3.7 million was also recorded in 2015 in other segments.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. LOSS ON DEBT REFINANCING

2016

- On December 2, 2016, Videotron issued a notice for the redemption of an aggregate principal amount of $175.0 million of its issued and outstanding 6.875% Senior Notes due July 15, 2021, at a redemption price of 103.438% of their principal amount. On January 5, 2017, the Senior Notes were redeemed for a cash consideration of $181.0 million.

This transaction resulted in a loss of $7.3 million in 2016.

2015

- On April 10, 2015, Videotron redeemed all of its issued and outstanding 6.375% Senior Notes due December 15, 2015, in aggregate principal amount of US$175.0 million, and the related hedging contracts were unwound for a total cash consideration of $204.5 million.
- On July 16, 2015, Videotron redeemed all of its issued and outstanding 9.125% Senior Notes due April 15, 2018, in aggregate principal amount of US$75.0 million, and the related hedging contracts were unwound for a total cash consideration of $75.9 million.
- On July 16, 2015, Videotron redeemed all of its issued and outstanding 7.125% Senior Notes due January 15, 2020, in aggregate principal amount of $300.0 million, for a total cash consideration of $310.7 million.

These transactions resulted in a total loss of $12.1 million in 2015, net of a gain of $3.9 million previously reported in other comprehensive income.

9. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.9% in 2016 and 2015 and income taxes in the consolidated statements of income:

	2016	2015
Income taxes at domestic statutory tax rate	**$ 98.6**	$ 78.8
Increase (reduction) resulting from:		
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates	**19.4**	10.1
Change in benefit arising from the recognition of current and prior year tax losses	**(0.5)**	(1.3)
Change in deferred tax balances due to a change in substantively enacted tax rates	**(6.7)**	–
Non-deductible impairment of goodwill	**10.8**	22.9
Other[1]	**(3.8)**	(17.4)
Income taxes	**$ 117.8**	$ 93.1

[1] Includes in 2015 a decrease of $16.1 million in income tax liability resulting from developments in tax audit matters, jurisprudence and tax legislation.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. INCOME TAXES (continued)

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2016	2015	**2016**	2015
Loss carryforwards	**$ 103.8**	$ 105.6	**$ 1.8**	$ (2.9)
Accounts payable, accrued charges, provisions and deferred revenue	**20.6**	14.6	**(6.0)**	(7.7)
Defined benefit plans	**35.9**	42.8	**(1.9)**	1.5
Property, plant and equipment	**(412.9)**	(397.6)	**11.7**	(27.0)
Goodwill, intangible assets and other assets	**(119.6)**	(93.0)	**22.7**	29.4
Long-term debt, derivative financial instruments and exchangeable debentures	**(161.1)**	(178.3)	**(1.3)**	14.3
Benefits from a general partnership	**(0.6)**	(67.6)	**(67.0)**	11.1
Other	**(11.0)**	(10.7)	**(0.4)**	8.7
	$ (544.9)	$ (584.2)	**$ (40.4)**	$ 27.4

Changes in the net deferred income tax liability are as follows:

	Note	**2016**	2015
Balance at beginning of year		**$ (584.2)**	$ (555.1)
Recognized in income as continuing operations		**40.4**	(29.7)
Recognized in income as discontinued operations	31	**–**	2.3
Recognized in other comprehensive income		**7.1**	(34.3)
Business acquisitions and disposals	11, 31	**(7.5)**	31.8
Other		**(0.7)**	0.8
Balance at end of year		**$ (544.9)**	$ (584.2)
Deferred income tax asset		**$ 16.0**	$ 29.5
Deferred income tax liability		**(560.9)**	(613.7)
		$ (544.9)	$ (584.2)

As of December 31, 2016, the Corporation had loss carryforwards for income tax purposes of $38.2 million available to reduce future taxable income, that will expire between 2030 and 2036. These losses have been recognized. The Corporation also had capital losses of $1,087.3 million that can be carried forward indefinitely and applied only against future capital gains, of which $244.5 million were not recognized.

There are no income tax consequences attached to the payment of dividends in 2016 or 2015 by the Corporation to its shareholders.

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2016	2015
Income from continuing operations attributable to shareholders	**$ 194.7**	$ 165.6
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(0.5)**	4.2
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 194.2**	$ 169.8
Net income attributable to shareholders	**$ 194.7**	$ 151.8
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(0.5)**	4.2
Net income attributable to shareholders, adjusted for dilution effect	**$ 194.2**	$ 156.0
Weighted average number of shares outstanding (in millions)	**122.3**	122.7
Potentially dilutive effect of stock options and of convertible debentures of the Corporation	**0.4**	21.0
Weighted average number of diluted shares outstanding (in millions)	**122.7**	143.7

For the year ended December 31, 2016 and 2015, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of certain stock options of the Corporation and of the Corporation's subsidiaries since their impact is anti-dilutive. During the year ended December 31, 2016, 357,632 options of TVA Group's plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive (364,500 options of the Quebecor Media's plan and 463,371 options of TVA Group's plan were excluded in 2015).

For the year ended December 31, 2016, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation since their impact is anti-dilutive.

11. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS

(a) Non-controlling interests acquisitions

2015

- On March 20, 2015, TVA Group completed a rights offering, whereby TVA Group received aggregate gross proceeds of $110.0 million from the issuance of 19,434,629 Class B Shares, non-voting, participating, without par value of TVA Group ("TVA Group Class B Shares"). Under the rights offering, Quebecor Media has subscribed to 17,300,259 TVA Group Class B Shares at a total cost of $97.9 million; accordingly, its aggregate equity interest in TVA Group increased from 51.5% to 68.4%. The increase of Quebecor Media's interest in TVA Group was accounted for as an equity transaction and resulted in an increase of retained earnings of $14.1 million and in an equivalent decrease of non-controlling interests.
- On September 9, 2015, Quebecor Media repurchased 7,268,324 of its Common Shares held by CDP Capital d'Amérique Investissement inc., a subsidiary of Caisse de dépôt et placement du Québec, for an aggregate purchase price of $500.0 million paid in cash. This transaction resulted in an increase of the Corporation interest in Quebecor Media from 75.4% to 81.1% and was accounted for as an equity transaction. Accordingly, the excess of $301.4 million of the purchase price over the carrying value of non-controlling interests of $198.6 million acquired was recorded as a $294.1 million reduction of retained earnings and as a $7.3 million increase of accumulated other comprehensive loss.
- Other non-controlling interests acquisitions were made in 2015 resulting in a decrease of retained earnings of $1.7 million and in an equivalent increase of non-controlling interests.

(b) Business acquisitions

2016

- On January 7, 2016, Videotron acquired Fibrenoire inc., a company that provides businesses with fibre-optic connectivity services, for a purchase price of $125.0 million. At closing, Videotron paid an amount of $119.1 million, net of cash acquired of $1.8 million. A post-closing adjustment of $0.2 million was received in the second quarter of 2016. The purchase balance was paid in February 2017 for an amount of $5.9 million, including interests. Goodwill arising from this acquisition reflects anticipated synergies and future growth potential.
- An amount of $0.6 million was also paid in 2016 relating to balances payable on prior business acquisitions.

2015

- On March 11, 2015, the Telecommunications segment acquired 4Degrees Colocation Inc. ("4Degrees Colocation") and its data center, the largest in Québec City, for a purchase price of $35.5 million in cash. A post-closing adjustment of $0.2 million was received in the second quarter of 2015. The acquisition enables Videotron to meet its business customers' growing technological and hosting needs. Goodwill arising from this acquisition mainly reflects 4Degrees Colocation's expertise and future growth potential.
- On April 12, 2015, TVA Group acquired 14 magazines, including some magazines that will be owned and operated in partnership, for a purchase price of $55.5 million in cash and a post-closing adjustment of $0.8 million, paid in the fourth quarter of 2015. The transaction is in line with the strategy of investing in the production and distribution of high-quality, rich, diverse entertainment and news media content. Goodwill arising from this acquisition mainly reflects content quality and anticipated synergies.
- In 2015, the Corporation also acquired other businesses, such as Marathon de Québec, included in the Sports and Entertainment segment.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

11. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS (continued)

(b) Business acquisitions (continued)

The purchase price allocation between the fair value of identifiable assets and liabilities related to business acquisitions in 2016 and 2015 is summarized as follows:

	2016	2015
Assets acquired		
Non-cash current assets	$ 5.5	$ 20.1
Property, plant and equipment	32.7	13.9
Intangible assets	15.6	32.0
Goodwill	87.1	48.8
Other assets	–	2.1
	140.9	116.9
Liabilities assumed		
Non-cash current liabilities	(3.1)	(21.2)
Deferred income taxes	(7.5)	(0.2)
Other long-term liabilities	(5.7)	–
	(16.3)	(21.4)
Net assets acquired at fair value	124.6	95.5
Non-controlling interests	–	(0.8)
	$ 124.6	$ 94.7
Consideration		
Cash	$ 119.0	$ 94.5
Balance payable	5.6	0.2
	$ 124.6	$ 94.7

The pro forma revenues and net income in 2016 would not have been significantly different than the actual figures if all business acquisitions had occurred at the beginning of the year.

The amount of goodwill that is deductible for tax purposes is $0.1 million in 2016 ($7.6 million in 2015).

QUEBECOR INC.

[1] Videotron has the option to sell its unused AWS spectrum licence in the Toronto area to Rogers Communications Partnership for a price of $180.0 million, subject to regulatory approvals. The spectrum licence was purchased at a cost of $96.4 million in 2008.

[2] In 2015, Videotron acquired four AWS-3 spectrum licences, covering the Province of Québec and the Ottawa region, and eighteen 2500 MHz spectrum licences, covering the Province of Québec, the Ottawa region, the cities of Toronto, Vancouver, Calgary, and Edmonton, for a total price of $219.0 million.

[3] Also includes the net change in assets related to discontinued operations.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. INTANGIBLE ASSETS (continued)

The cost of internally generated intangible assets, mainly composed of software, was $504.7 million as of December 31, 2016 ($449.1 million as of December 31, 2015). For the year ended December 31, 2016, the Corporation recorded additions of internally generated intangible assets of $66.0 million ($36.9 million in 2015).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $284.3 million as of December 31, 2016 ($245.8 million as of December 31, 2015). For the year ended December 31, 2016, the Corporation recorded $44.3 million in amortization on its internally generated intangible assets ($39.2 million in 2015). The net carrying value of internally generated intangible assets was $220.4 million as of December 31, 2016 ($203.3 million as of December 31, 2015).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU.

16. GOODWILL

For the years ended December 31, 2016 and 2015, changes in the net carrying amount of goodwill are as follows:

	2016	2015
Cost		
Balance at beginning of year	**$ 5,601.1**	$ 5,584.3
Business acquisitions (note 11)	**87.1**	48.8
Business disposals	**–**	(32.0)
Balance at end of year	**5,688.2**	5,601.1
Accumulated amortization and impairment losses		
Balance at beginning of year	**2,922.7**	2,869.7
Impairment loss (note 7)	**40.1**	85.0
Business disposals	**–**	(32.0)
Balance at end of year	**2,962.8**	2,922.7
Net carrying amount	**$ 2,725.4**	$ 2,678.4

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. GOODWILL (continued)

The net carrying amount of goodwill as of December 31, 2016 and 2015 was allocated to the following significant CGU groups:

	2016	2015
CGU groups		
Telecommunications	**$ 2,677.0**	$ 2,589.9
Magazines	**29.9**	70.0
Other[1]	**18.5**	18.5
Total	**$ 2,725.4**	$ 2,678.4

1 Includes the CGUs related to Speciality film and television services, Book publishing and distribution, and Sports and Entertainment.

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2016 and 2015
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. GOODWILL (continued)

Recoverable amounts (continued)

The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

	2016		2015	
CGU groups [1, 2]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications	**8.5 %**	**2.5 %**	9.0 %	2.5 %
Magazines	**15.5**	**(1.0)**	16.0	0.0
Other	**12.0 to 16.5**	**0.0 to 2.0**	11.0 to 16.0	0.0 to 2.0

1 In 2016 and 2015, the recoverable amounts of all CGUs, except the Newspaper CGU, were based on value in use, using the discounted cash flow method.

2 The recoverable amount of the Newspapers CGU determined as part of the goodwill impairment test performed in 2015 was based a fair value less costs of disposal (note 7). More specifically, the fair value of the CGU was based on the individual assets which were estimated using external valuation reports, comparable transaction metrics, and other financial information available. These fair values are classified as Level 3 in the fair value hierarchy described in note 28(b).

Sensitivity of recoverable amounts

The following table presents, for the Corporation's significant CGU groups, the change in the discount rate or in the perpetual growth rate used in the tests performed that would have been required for the recoverable amount to equal the carrying value of the CGU as of the most recent impairment tests in 2016:

CGU groups[1]	**Incremental increase in pre-tax discount rate (WACC)**	**Incremental decrease in perpetual growth rate**
Telecommunications	6.0 %	6.5 %
Magazines[1]	–	–

1 The recoverable amount as per the latest impairment test equals the carrying value of the CGU as an impairment charge was recorded as a result of the test.

The recognition of provisions, in terms of both timing and amounts, requires the exercise of judgment based on relevant circumstances and events that can be subject to change over time. Provisions are primarily comprised of the following:

Restructuring of operations

Provisions for restructuring activities primarily cover severance payments related to initiatives to eliminate positions in the Media segment.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

19. PROVISIONS AND CONTINGENCIES (continued)

Contingencies and legal disputes

There are a number of legal proceedings against the Corporation that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on the Corporation's results or on its financial position. Management of the Corporation, after taking legal advice, has established provisions for specific claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

Other

Other provisions are principally related to decommissioning obligations.

20. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2019 in an amount of $150.0 million. The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares owned of Quebecor Media.

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in August 2017. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facilities of Quebecor Media are comprised of a US$350.0 million secured term loan "B" facility that matures in August 2020 and is bearing interest at LIBOR, subject to a LIBOR floor of 0.75%, plus a premium of 2.50% and a $300.0 million secured revolving credit facility that matures in July 2020 and is bearing interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The term loan "B" facility provides for quarterly amortization payments totaling 1.00% per annum of the original principal amount, with the balance payable on August 17, 2020. These credit facilities contain covenants such as maintaining certain financial ratios, limitations on the Quebecor Media's ability to incur additional indebtedness, pay dividends, and make other distributions. They are secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2016, the credit facilities were secured by assets with a carrying value of $3,123.2 million ($3,328.3 million in 2015). As of December 31, 2016, no amount was drawn on the revolving credit facility ($2.0 million was drawn in 2015), and the balance of the term loan "B" is $453.4 million ($472.0 million in 2015).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. LONG-TERM DEBT (continued)

(v) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2016:

Principal amount	Annual nominal interest rate	Effective interest rate (after discount or premium at issuance)	Maturity date	Interest payable every 6 months on
Quebecor Media				
$ 325.0	7.375 %	7.375 %	January 15, 2021	June and December 15
US$ 850.0	5.750 %	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	6.625 %	January 15, 2023	June and December 15
Videotron				
$ 300.0	6.875 %	6.875 %	July 15, 2021	June and December 15
US$ 800.0	5.000 %	5.000 %	July 15, 2022	January and July 15
US$ 600.0[1]	5.375 %	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	5.625 %	June 15, 2025	April and October 15
$ 375.0[2]	5.750 %	5.750 %	January 15, 2026	March and September 15

1 The Notes were issued in April 2014 for net proceeds of $654.5 million, net of financing fees of $7.8 million.

2 The Notes were issued in September 2015 for net proceeds of $370.1 million, net of financing fees of $4.9 million.

(vi) The bank credit facilities provide for a $630.0 million secured revolving credit facility that matures in July 2021, a $335.0 million unsecured revolving credit facility that matures in July 2021, and a $75.0 million secured export financing facility providing for a term loan that matures in June 2018. The revolving credit facilities bear interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a margin, depending on Videotron's leverage ratio. Advances under the export financing facility bear interest at Bankers' acceptance rate plus a margin. The secured bank credit facilities are secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2016, the secured bank credit facilities were secured by assets with a carrying value of $5,804.3 million ($7,646.3 million in 2015). The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2016, $209.4 million had been drawn on the secured revolving credit facilities ($246.7 million was drawn in 2015), $16.1 million was outstanding on the export financing facility ($26.8 million in 2015), and no amount was drawn on the unsecured revolving credit facility.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2016 and 2015
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. LONG-TERM DEBT (continued)

(vii) The bank credit facilities of TVA Group comprise a secured revolving credit facility in the amount of $150.0 million, maturing in February 2019, and a secured term loan in the amount of $75.0 million, maturing in November 2019. TVA Group's revolving credit facility bears interest at floating rates based on Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate plus a premium determined by a leverage ratio. The term loan bears interest at floating rates based on Bankers' acceptance rate or Canadian prime rate plus a premium determined by a leverage ratio. The term loan provides for quarterly amortization payments commencing on December 20, 2015. The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. They are secured by liens on all of its movable assets and an immovable hypothec on its Head Office building. As of December 31, 2016 and 2015, no amount had been drawn on the revolving credit facility, and as of December 31, 2016, $69.6 million was outstanding on the term loan ($73.8 million in 2015).

On December 31, 2016, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2017	$	51.8
2018		19.2
2019		56.8
2020		442.5
2021		834.5
2022 and thereafter		4,296.0

21. CONVERTIBLE DEBENTURES

On October 11, 2012, the Corporation issued $500.0 million in aggregate principal amount of convertible debentures bearing interest at an annual rate of 4.125% and maturing in October 2018. Interest is payable semi-annually in cash, in Quebecor Class B Shares, or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B Share, subject to a floor price of $19.25 per share (that is, a maximum number of 25,974,026 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the floor price) and a ceiling price of $24.06 per share (that is, a minimum number of 20,779,220 Quebecor Class B Shares corresponding to a ratio of $500.0 million to the ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

The convertible debentures are presented separately as a financial liability and the cap and floor feature are presented as embedded derivatives in other liabilities (note 22). The fair value of these embedded derivatives as of December 31, 2016 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 0.89% (0.70% in 2015), a dividend yield of 0.48% (0.42% in 2015), and an expected volatility of 20.66% (19.60% in 2015). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2016 would have increased the loss on embedded derivatives related to convertible debentures by $20.1 million, while a one dollar decrease in the market price of a Quebecor Class B share would have decreased the loss by $20.0 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

22. OTHER LIABILITIES

	Note		2016		2015
Defined benefit plans	30	**$**	**144.9**	$	158.9
Embedded derivatives related to convertible debentures	21		**290.0**		221.7
Deferred revenue			**20.7**		18.9

Other[2]			**38.6**		29.8
		$	**516.2**	$	448.2

[1] The current $24.9 million portion of stock-based compensation is included in accounts payable and accrued charges ($10.8 million in 2015) (note 18).

[2] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal nominal amount outstanding of $844.9 million as of December 31, 2016 and 2015 and a combined carrying value of $2.1 million as of December 31, 2016 and 2015. Exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligation without any consideration.

23. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares ("Class B Shares") on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares			Class B Shares		
	Number		Amount	Number		Amount
Balance as of December 31, 2014	38,973,172	$	8.7	83,903,292	$	318.5

Shares purchased and cancelled	–		–	(413,300)		(1.6)
Balance as of December 31, 2015	38,926,372		8.7	83,536,792		316.9
Class A Shares converted into Class B Shares	(128,100)		(0.1)	128,100		0.1
Shares purchased and cancelled	–		–	(609,300)		(2.3)
Balance as of December 31, 2016	**38,798,272**	**$**	**8.6**	**83,055,592**	**$**	**314.7**

23. CAPITAL STOCK (continued)

(b) Issued and outstanding capital stock (continued)

On August 3, 2016, the Corporation filed a normal course issuer bid for a maximum of 500,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares representing approximately 2.4% of issued and outstanding Class B Shares as of August 3, 2016. The purchases can be made from August 15, 2016 to August 14, 2017 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All shares purchased under the bid will be cancelled.

In 2016, the Corporation purchased and cancelled 609,300 Class B Shares for a total cash consideration of $22.7 million (413,300 Class B Shares for a total cash consideration of $12.4 million in 2015). The excess of $20.4 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2016 ($10.8 million in 2015).

On March 14, 2017, the Board of Directors of the Corporation declared a dividend of $0.045 per share on Class A Shares and Class B Shares, or approximately $5.5 million, payable on April 25, 2017 to shareholders of record at the close of business on March 31, 2017.

24. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 13,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of the Corporation. The exercise price of each option is equal to the weighted average trading price of the Corporation’s Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. Options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price, or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2016 and 2015
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans(continued)

(i) Stock option plan(continued)

The following table gives details on changes to outstanding options for the years ended December 31, 2016 and 2015:

	2016		2015	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning and end of year	**1,310,000**	**$ 25.36**	1,310,000	$ 25.36
Vested options at end of year	**246,666**	**$ 23.42**	100,000	$ 22.23

The following table gives summary information on outstanding options as of December 31, 2016:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$22.23 to 30.24	**1,310,000**	**7.17**	**$ 25,36**	**246,666**	**$ 23,42**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Mid-term stock-based compensation plan

Under the mid-term stock-based compensation plan, participants are entitled to receive a cash payment at the end of a three-year period based on the appreciation of the Corporation Class B Share price, and subject to the achievement of certain non-market performance criteria. The following table provides details of changes to outstanding units in the mid-term stock-based compensation plan for the years ended December 31, 2016 and 2015:

	2016			2015		
	Units		**Weighted average exercise price**	Units		Weighted average exercise price
Balance at beginning of year	**1,476,346**	**$**	**28.68**	803,517	$	26.22
Granted	**–**		**–**	672,829		31.62
Exercised	**(48,722)**		**21.78**	–		–
Balance at end of year	**1,427,624**	**$**	**28,92**	1,476,346	$	28.68

During the year ended December 31, 2016, a cash consideration of $0.6 million was paid upon the exercise of 48,722 units.

(iii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of the Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on the Corporation's Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of the Corporation's Class B Shares on the date of redemption. As of December 31, 2016 and 2015, the total number of DSUs outstanding under this plan was 198,142 and 170,982, respectively.

(b) Quebecor Media stock option plan

Under a stock option plan established by Quebecor Media, 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

The following table gives details on changes to outstanding options granted as of December 31, 2016 and 2015:

	2016		2015	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**1,482,494**	**$ 60.44**	1,631,959	$ 55.15
Granted	**–**	**–**	369,500	70.56
Exercised	**(399,689)**	**56.48**	(480,165)	50.35
Cancelled	**(101,900)**	**63.79**	(38,800)	59.01
Balance at end of year	**980,905**	**$ 61.71**	1,482,494	$ 60.44
Vested options at end of year	**163,550**	**$ 54.90**	244,261	$ 51.44

During the year ended December 31, 2016, 399,689 of the Quebecor Media's stock options were exercised for a cash consideration of $6.5 million (480,165 stock options for $9.5 million in 2015).

The following table gives summary information on outstanding options as of December 31, 2016:

	Outstanding options			Vested options	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$37.91 to 53.40	85,700	3.39	$ 46.32	68,500	$ 44.90
$57.35 to 70.56	895,205	7.28	63.18	95,050	62.11
$37.91 to 70.56	**980,905**	**6.94**	**$ 61.71**	**163,550**	**$ 54.90**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Shares have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised.

The following table gives details on changes to outstanding options for the years ended December 31, 2016 and 2015:

	2016		2015	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**463,371**	**$ 13.30**	525,368	$ 15.25
Granted	**–**	**–**	80,000	6.85
Cancelled	**–**	**–**	(82,366)	13.68
Expired	**(105,739)**	**15.29**	(59,631)	21.28
Balance at end of year	**357,632**	**$ 12.71**	463,371	$ 13.30
Vested options at end of year	**283,632**	**$ 14.11**	369,371	$ 14.81

The following table gives summary information on outstanding options as of December 31, 2016:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$6.85 to 11.83	100,000	7.94	$ 7.47	26,000	$ 7.80
$11.84 to 14.75	257,632	0.85	14.75	257,632	14.75
$6.85 to 14.75	**357,632**	**2.83**	**$ 12.71**	**283,632**	**$ 14.11**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(d) Deferred share unit and performance share unit plans

On July 10, 2016, TVA Group established a DSU plan and a PSU plan for its employees based on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans. As of December 31, 2016, 159,499 DSUs and 212,671 PSUs were outstanding under these plans.

On July 13, 2016, Quebecor also established a DSU plan and a PSU plan for its employees and those of its subsidiaries. Both plans are based on Quebecor Class B Subordinate Shares ("Quebecor Class B Shares") and, in the case of the DSU plan, also on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans. As of December 31, 2016, 79,841 DSUs based on Quebecor Class B Shares, 49,828 DSUs based on TVA Group Class B Shares and 102,212 PSUs based on Quebecor Class B Shares were outstanding under these plans.

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans as of December 31, 2016 and 2015:

December 31, 2016	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**1.25 %**	**1.10 %**	**0.91 %**
Distribution yield	**0.48 %**	**1.33 %**	**– %**
Expected volatility	**19.27 %**	**18.93 %**	**35.48 %**
Expected remaining life	**4.0 years**	**3.0 years**	**1.9 years**

December 31, 2015	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	0.95 %	0.80 %	0.68 %
Distribution yield	0.42 %	1.50 %	– %
Expected volatility	20.88 %	19.30 %	67.83 %
Expected remaining life	5.0 years	3.6 years	1.8 years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(f) Liability of vested options

As of December 31, 2016, the liability for all vested options was $7.3 million as calculated using the intrinsic value ($5.5 million as of December 31, 2015).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2016, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $23.1 million ($9.2 million in 2015, of which a net reversal of the charge of $0.3 million were presented as part of discontinued operations).

25. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2014	$ (29.2)	$ (35.2)	$ (64.4)
Other comprehensive loss	(23.3)	(16.2)	(39.5)
Non-controlling interests acquisition	(5.1)	(2.2)	(7.3)
Balance as of December 31, 2015	(57.6)	(53.6)	(111.2)
Other comprehensive (loss) income	(12.2)	17.3	5.1
Balance as of December 31, 2016	**$ (69.8)**	**$ (36.3)**	**$ (106.1)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 1/2-year period.

26. COMMITMENTS

The Corporation rents premises and equipment under operating leases and has entered into long-term commitments to purchase services, capital equipment, broadcasting rights, and to pay royalties. The operating leases have various terms, escalation clauses, purchase options and renewal rights. The minimum payments for the coming years are as follows:

	Leases	Other commitments
2017	$ 48.7	$ 197.7
2018 to 2021	99.8	477.3
2022 and thereafter	80.6	528.8

The Corporation’s operating lease expenses amounted to $62.8 million in 2016 ($66.9 million in 2015, of which $6.0 million was presented as part of discontinued operations).

27. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms), and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2016, the maximum exposure with respect to these guarantees was $24.2 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation’s subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold		Notional amount bought	
Videotron					
Less than 1 year	1.3249	$	220.2	US$	166.2
2017[1]	1.3849	US$	260.0	$	360.1

[1] *See* footnote 1 below "Cross-currency interest rate swaps" table.

(ii) Interest rate swaps

Maturity	Notional amount	Pay/ receive	Fixed rate	Floating rate
TVA Group				
2017	$ 33.0	Pay fixed/ Receive floating	2.03%	Bankers' acceptances 1 month

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(iii) Cross-currency interest rate swaps

Hedged item					Hedging instrument
	Period covered		Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media					
5.750% Senior Notes due 2023	2016 to 2023	US$	431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$	418.7	6.85%	0.9759
Term loan “B”	2013 to 2020	US$	338.6	Bankers’ acceptance 3 months + 2.77%	1.0346
Videotron					
5.000% Senior Notes due 2022	2014 to 2022	US$	543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$	256.9	5.81%	1.0016
5.375% Senior Notes due 2024[1]	2008 to 2017	US$	260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$	158.6	Bankers’ acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$	441.4	5.62%	1.1039

[1] Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued in 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair value measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value in the consolidated balance sheets, is determined using Level 2 inputs.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of early settlement options recognized as embedded derivatives and embedded derivative related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's adjusted implicit interest rate and credit premium.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2016 and 2015 are as follows:

		2016		2015
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1, 2]	**$ (5,700.8)**	**$ (5,866.6)**	$ (5,892.5)	$ (5,894.9)
Convertible debentures[3]	**(780.0)**	**(780.0)**	(706.4)	(706.4)
Derivative financial instruments[4]				
Early settlement options	**0.4**	**0.4**	1.0	1.0
Foreign exchange forward contracts[5]	**2.5**	**2.5**	9.3	9.3
Interest rate swaps	**(0.3)**	**(0.3)**	(0.8)	(0.8)
Cross-currency interest rate swaps[5]	**806.5**	**806.5**	945.2	945.2

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $808.7 million as of December 31, 2016 ($953.7 million as of December 31, 2015).

5 The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2016, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2016, 13.0% of trade receivables were 90 days past their billing date (10.4% as of December 31, 2015) of which 32.5% had an allowance for doubtful accounts (40.4% as of December 31, 2015).

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2016 and 2015
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management (continued)

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2016 and 2015:

		2016		2015
Balance at beginning of year	**$**	**23.0**	$	21.8
Charged to income		**36.1**		32.1
Utilization		**(31.0)**		(30.9)
Balance at end of year	**$**	**28.1**	$	23.0

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 6.1 years as of December 31, 2016 (7.0 years as of December 31, 2015).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, share repurchases, dividends to shareholders and dividends or distributions to non-controlling interests in the future. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2016, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative instruments, less estimated future receipts on derivative instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 18.9**	$ 18.9	$ –	$ –	$ –
Accounts payable and accrued charges	**705.9**	705.9	–	–	–
Long-term debt[1]	**5,700.8**	51.8	76.0	1,277.0	4,296.0
Convertible debentures[2]	**775.5**	–	775.5	–	–
Interest payments[3]	**1,768.5**	257.3	588.6	513.3	409.3
Derivative instruments[4]	**(841.5)**	(17.9)	1.0	(98.0)	(726.6)
Total	**$ 8,128.1**	**$ 1,016.0**	**$ 1,441.1**	**$ 1,692.3**	**$ 3,978.7**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2016 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2016.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2016, to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock-in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2016 is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10	$ **2.0**	$ **43.0**
Decrease of $0.10	**(2.0)**	**(43.0)**

A variance of $0.10 in the 2016 average exchange rate of CAN dollar per one U.S. dollar would had resulted in a variance of $4.0 million on unhedged purchase of goods and services in 2016 and $6.5 million on unhedged acquisitions of tangible and intangible assets in 2016.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2016, after taking into account the hedging instruments, long-term debt was comprised of 83.2% fixed-rate debt (82.5% in 2015) and 16.8% floating-rate debt (17.5% in 2015).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2016 was $8.2 million.

The estimated sensitivity on income and on other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2016, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	$ **(2.4)**	$ **(37.3)**
Decrease of 100 basis points	**2.4**	**37.3**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivative related to convertible debentures, derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2016 and 2015 is as follows:

	2016	2015
Bank indebtedness	**$ 18.9**	$ 34.3
Long-term debt	**5,668.7**	5,856.4
Embedded derivatives related to convertible debentures	**290.0**	221.7
Convertible debentures	**500.0**	500.0
Derivative financial instruments	**(808.7)**	(953.7)
Cash and cash equivalents	**(22.3)**	(18.6)
Net liabilities	**5,646.6**	5,640.1
Equity	**$ 847.2**	$ 652.0

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2016	2015
Salaries and short-term benefits	**$ 10.1**	$ 10.5
Share-based compensation	**15.1**	6.6
Other long-term benefits	**2.0**	1.5
	$ 27.2	$ 18.6

Operating transactions

The Corporation made sales to affiliated corporations in the amount of $3.0 million in 2016 ($3.3 million in 2015). During the year ended December 31, 2016, the Corporation made no purchases and incurred no rent charges with affiliated corporations ($3.4 million in 2015, which were included in purchase of goods and services). These transactions were accounted for at the consideration agreed between parties.

30. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation's pension plans are registered with a provincial or federal regulatory authority.

The Corporation's funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future payment of amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation's management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation's rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation's management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation's funding requirement.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2016 and 2015:

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,232.8**	$ 1,181.8	**$ 69.2**	$ 65.2
Service costs	**34.9**	36.4	**1.8**	1.7
Interest costs	**49.7**	49.0	**2.8**	2.7
Plan participants' contributions	**11.9**	13.1	**–**	–
Actuarial loss (gain) arising from:				
Financial assumptions	**20.8**	19.9	**1.4**	1.3
Participant experience	**(0.4)**	6.1	**–**	–
Benefits and settlements paid	**(63.1)**	(66.5)	**(1.8)**	(1.7)
Curtailment, amendments and other	**0.6**	(7.0)	**–**	–
Benefit obligations at the end of the year	**$ 1,287.2**	$ 1,232.8	**$ 73.4**	$ 69.2

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,164.8**	$ 1,115.6	**$ –**	$ –
Actual return on plan assets	**98.0**	62.2	**–**	–
Employer contributions	**35.1**	43.3	**1.8**	1.7
Plan participants' contributions	**11.9**	13.1	**–**	–
Administrative fees	**(2.3)**	(2.9)	**–**	–
Benefits and settlements paid	**(63.1)**	(66.5)	**(1.8)**	(1.7)
Fair value of plan assets at the end of the year	**$ 1,244.4**	$ 1,164.8	**$ –**	$ –

As of December 31, 2016, the weighted average duration of defined benefit obligations was 16.2 years (16.0 years in 2015). The Corporation expects future benefit payments of $65.5 million in 2017.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed, whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2016	2015
Equity securities:		
Canadian	**23.6 %**	21.4 %
Foreign	**31.9**	33.8
Debt securities	**41.2**	42.3
Other	**3.3**	2.5
	100.0 %	100.0 %

The fair value of plan assets is principally based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amount recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Benefit obligations	**$ (1,287.2)**	$ (1,232.8)	**$ (73.4)**	$ (69.2)
Fair value of plan assets	**1,244.4**	1,164.8	**–**	–
Plan deficit	**(42.8)**	(68.0)	**(73.4)**	(69.2)
Asset limit and minimum funding adjustment	**(19.8)**	(21.7)	**–**	–
Net amount recognized[1]	**$ (62.6)**	$ (89.7)	**$ (73.4)**	$ (69.2)

[1] The net amount recognized for 2016 consists of an asset of $8.9 million included in Other assets (note 17) (none in 2015) and a liability of $144.9 million included in "Other Liabilities" (note 22) ($158.9 million in 2015).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Actuarial loss on benefit obligations	**$ (20.4)**	$ (26.0)	**$ (1.4)**	$ (1.3)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**51.8**	16.2	**–**	–
Asset limit and minimum funding adjustment	**2.8**	(17.3)	**–**	–
Re-measurements gain (loss) recorded in other comprehensive income	**$ 34.2**	$ (27.1)	**$ (1.4)**	$ (1.3)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Employee costs:				
Service costs	**$ 34.9**	$ 36.4	**$ 1.8**	$ 1.7
Administrative fees, curtailment and other	**3.0**	(2.8)	**–**	–
Interest on net defined benefit liability	**4.4**	3.5	**2.8**	2.4
Net benefit costs[1]	**$ 42.3**	$ 37.1	**$ 4.6**	$ 4.1

[1] Net benefit gains of $6.0 million in 2015 were presented as part of discontinued operations.

The expense related to defined contribution pension plans amounted to $16.8 million in 2016 ($16.0 million in 2015).

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $30.5 million in 2017, based on the most recent financial actuarial reports filed (contributions of $36.9 million were paid in 2016).

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions (continued)

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2016 and 2015 and current periodic benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2016	2015	**2016**	2015
Benefit obligations				
Rates as of year-end:				
Discount rate	**3.90 %**	4.00 %	**3.90 %**	4.00 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00
Current periodic costs				
Rates as of preceding year-end:				
Discount rate	**4.00 %**	4.10 %	**4.00 %**	4.10 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00

The assumed average retirement age of participants used was of 62 years in 2016 and 2015.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 6.5 % at the end of 2016. These costs, as per the estimate, are expected to decrease gradually over the next 8 years to 4.5% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $19.8 million and the postretirement benefits obligation by $1.5 million as of December 31, 2016. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. DISCONTINUED OPERATIONS

In February 2015, the Corporation closed its specialty channel, SUN News.

On April 13, 2015, the Corporation completed the sale, initially announced on October 6, 2014, of all of its English-language newspaper operations in Canada, consisting of more than 170 newspapers and publications, the Canoe English-language portal and 8 printing plants, including the Islington, Ontario plant, for a cash consideration consisting of $305.5 million, less cash disposed of $1.9 million. An amount of $1.3 million was also paid as an adjustment related to working capital items.

On September 27, 2015, the Corporation completed the sale of Archambault Group Inc.'s retail operations, consisting of the 14 Archambault stores, the archambault.ca website, and the English-language Paragraphe Bookstore, for a cash consideration consisting of $14.5 million, less cash disposed of $1.1 million, and a balance of $3.0 million received in 2016.

The results of operations and cash flows related to those businesses were reclassified as discontinued operations in the consolidated statements of income, comprehensive income and cash flows as follows:

Consolidated statements of income and comprehensive income

		2015
Revenues	$	194.1
Employee costs		54.3
Purchase of goods and services		133.2
Depreciation and amortization		2.0
Financial expenses		0.2
Restructuring of operations and other items		23.9
Loss before income taxes		(19.5)
Current income taxes		(1.1)
Deferred income taxes		(2.3)
Loss on disposal of businesses		(3.6)
Loss and comprehensive loss from discontinued operations	$	(19.7)

Consolidated statements of cash flows

		2015
Cash flows related to operating activities	$	(21.3)
Cash flows related to investing activities		(1.2)
Cash flows used in discontinued operations	$	(22.5)

This is Exhibit 47 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

Consolidated financial statements of

QUEBECOR INC.

Years ended December 31, 2017 and 2016

QUEBECOR INC.
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2017 and 2016

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of the Corporation and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the Corporation's annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with the Corporation's management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

Pierre Karl Péladeau
President and Chief Executive Officer

Jean-François Pruneau
Senior Vice President and Chief Financial Officer

March 13, 2018

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

We have audited the accompanying consolidated financial statements of Quebecor Inc., which comprise the consolidated balance sheets as at December 31, 2017 and 2016 and the consolidated statements of income, comprehensive income, equity and cash flows for the years ended December 31, 2017 and 2016, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Quebecor Inc. as at December 31, 2017 and 2016, and its financial performance and its cash flows for the years ended December 31, 2017 and 2016 in accordance with International Financial Reporting Standards.

On behalf of the Board of Directors,

The Right Honourable Brian Mulroney, P.C., C.C., LL.D.
Chairman of the Board

Jean La Couture
Director

QUEBECOR INC.
SEGMENTED INFORMATION

Years ended December 31, 2017 and 2016
(in millions of Canadian dollars)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media Inc. (“Quebecor Media”) refers to Quebecor Media Inc. and its subsidiaries. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media and in subsidiaries controlled by Quebecor Media. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	81.5 %	81.5 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions (including data centers), cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies, televisual products and video games through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the distribution of movies, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

In 2017, the Corporation changed its organisational structure and as a result, the book publishing and distribution activities, as well as the music production and distribution activities that were previously presented with the Media segment are now presented with the Sports and Entertainment segment. Prior period figures in the Corporation’s segmented information have been reclassified to reflect these changes.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

[1] The Chief Executive Officer uses adjusted operating income as the measure of profit to assess the performance of each segment. Adjusted operating income is referred to as a non-International Financial Reporting Standards ("IFRS") measure and is defined as net income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and other assets, loss on debt refinancing, income taxes and income from discontinued operations.

See accompanying notes to consolidated financial statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board.

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (note 1(j) and 1(v)), the liability related to stock-based compensation (note 1(t)) and the net defined benefit liability (note 1(u)), and they are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation operates ("functional currency").

Comparative figures for the year ended December 31, 2016 have been restated to conform to the presentation adopted for the year ended December 31, 2017.

(b) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the Corporation's ownership interest in them. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(c) Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation's consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

Non-controlling interests in an entity acquired are presented in the consolidated balance sheets within equity, separately from the equity attributable to shareholders, and are initially measured at fair value.

(d) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transactions. Translation gains and losses on assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under “Deferred revenue” when customers are invoiced.

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony and over-the-top video service, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video service are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;
- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition (continued)

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment leasing revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Revenues from leasing and from ticket (including season tickets), food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising under the form of venue signage or sponsorships, are recognized ratably over the period of the agreement;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

(g) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

For the year ended December 31, 2017, the Corporation recorded $12.2 million of barter advertising revenues ($11.7 million in 2016).

(h) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized in other comprehensive income or otherwise directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and due to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Leases

Assets under leasing agreements are classified at the inception of the lease as (i) finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee, or as (ii) operating leases for all other leases.

Operating lease rentals are recognized in the consolidated statement of income on a straight-line basis over the period of the lease. Any lessee incentives are deferred and then recognized evenly over the lease term.

(j) Financial instruments

Classification, recognition and measurement

Financial instruments are classified as held-for-trading, available-for-sale, loans and receivables, or as other financial liabilities, and measurement in subsequent periods depends on their classification. The Corporation has classified its financial instruments (except derivative financial instruments) as follows:

Held-for-trading	**Loans and receivables**	**Available-for-sale**	**Other liabilities**
• Cash and cash equivalents • Bank indebtedness • Exchangeable debentures included in “Other Liabilities”	• Accounts receivable • Loans and other long-term receivables included in “Other Assets”	• Other portfolio investments included in “Other Assets”	• Accounts payable and accrued charges • Long-term debt • Convertible debentures • Other long-term financial liabilities included in “Other Liabilities”

Financial instruments held-for-trading are measured at fair value with changes recognized in income as a gain or loss on valuation and translation of financial instruments. Available-for-sale portfolio investments are measured at fair value or at cost in the case of equity investments that do not have a quoted market price in an active market and where fair value is insufficiently reliable, and changes in fair value are recorded in other comprehensive income. Financial assets classified as loans and receivables and financial liabilities classified as “Other liabilities” are initially measured at fair value and subsequently measured at amortized cost, using the effective interest rate method of amortization. Liabilities recognized as a result of contingent consideration arising from a business acquisition and included in “Other liabilities”, are initially recorded at their acquisition-date fair value and re-measured at fair value in subsequent periods. These changes in fair value are recorded in the consolidated statements of income as other items.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments (continued)

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

(k) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(l) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are met.

(m) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(n) Trade receivables

Trade receivables are stated at their nominal value, less an allowance for doubtful accounts and an allowance for sales returns. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. Individual accounts receivables are written off when management deems them not collectible.

(o) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Inventories (continued)

In particular, inventories related to broadcasting activities, which primarily comprise programs and broadcast and distribution rights, are accounted for as follows:

(i) Programs produced and productions in progress

Programs produced and productions in progress related to broadcasting activities are accounted for at the lesser of cost and net realizable value. Cost includes direct charges for goods and services and the share of labour and general expenses related to each production. The cost of each program is charged to operating expenses when the program is broadcast.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are classified as current or long-term assets, based on management's estimate of the broadcast or distribution period. These rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on how future economic benefits from those rights will be generated. Broadcast and distribution rights payable are classified as current or long-term liabilities based on the payment terms included in the licence.

Estimates of future revenues used to determine the net realizable values of inventories related to the broadcasting or distribution of television products and movies are examined periodically by management and revised as necessary. The carrying value of programs produced and productions in progress, broadcast rights and distribution rights is reduced to the net realizable value, as necessary, based on this assessment.

(p) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statement of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful life
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets. A decommissioning obligation is however recorded for the rental of sites related to the mobile network.

Videotron Ltd. ("Videotron") is engaged in an agreement to operate a shared LTE network in the Province of Québec and the Ottawa region.

(r) Goodwill and intangible assets

Goodwill

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. When the Corporation acquires less than 100% of the equity interests in the business acquired at the acquisition date, goodwill attributable to the non-controlling interests is also recognized at fair value.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(f)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development Canada, (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Broadcasting licences, trademarks and sport franchises have also an indefinite useful life and are not amortized. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Software is recorded at cost. In particular, internally generated intangible assets such as software and Web site development are mainly comprised of internal costs in connection with the development of those assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful life
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(s) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(t) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") and performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 25.

(u) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive loss and in accumulated other comprehensive loss. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation;
- changes in the net benefit asset limit or in the minimum funding liability.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(u) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services, health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(v) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion prices features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(w) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 17.

(ii) Fair value of derivative financial instruments, including embedded derivatives

Derivative financial instruments must be accounted for at their fair value, which is estimated using valuation models based on a number of assumptions such as future cash flows, period-end swap rates, foreign exchange rates, and credit default premium. Also, the fair value of embedded derivatives related to convertible debentures and to early settlement options on debt is determined with option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium. The assumptions used in the valuation models have a significant impact on the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, the gain or loss on valuation of financial instruments recorded in the consolidated statements of comprehensive income, and the carrying value of derivative financial instruments in the consolidated balance sheets. A description of valuation models used and sensitivity analysis on key assumptions are presented in note 29.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Use of estimates and judgments (continued)

(iii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 31.

(iv) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. More specifically, an assessment of the probable outcomes of legal proceedings or other contingencies is also required. A description of the main provisions, including management expectations on the potential effect on the consolidated financial statements of the possible outcomes of legal disputes, is presented in note 20.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and the future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changed its conclusion in the future.

(iii) CGU's determination for the purpose of impairment tests

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets. In identifying assets to group in CGUs, the Corporation considers, among other factors, offering bundled services, sharing telecommunication or broadcasting network infrastructure, integration of media assets, geographical proximity, similarity on exposure to market risk, and materiality. The determination of CGUs could affect the results of impairment tests and, as the case may be, the impairment charge recorded in the consolidated statements of income.

(iv) Determination if early settlement options are not closely related to their debt contract

Early settlement options are not considered closely related to their debt contract when the corresponding option exercise price is not approximately equal to the amortized cost of the debt. Judgment is therefore required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Use of estimates and judgments (continued)

(v) Interpretation of laws and regulations

Interpretation of laws and regulation, including tax regulations, requires judgment from management that could have an impact on the recognition of provisions for legal litigation and income taxes in the consolidated financial statements.

(x) Recent accounting pronouncements

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018.

On January 1, 2018, the Corporation will adopt the new rules under IFRS 9 which simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

The adoption of IFRS 9 will have no material impact on the consolidated financial statements.

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018.

On January 1, 2018, the Corporation will adopt on a fully retrospective basis the new rules under IFRS 15 which specify how and when an entity should recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to be applied to all contracts with customers.

The adoption of IFRS 15 will have significant impacts on the consolidated financial statements, mainly in the Telecommunications segment, with regards to the timing of the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs, such as costs to obtain a contract and connection costs.

Under IFRS 15, the total consideration from a contract with multiple deliverables will be allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile devices and services under contracts with multiple deliverables and for a fixed period of time. Under IFRS 15, promotional offers related to the sale of mobile devices previously accounted for as a reduction in related equipment sales on activation, now need to be considered in the total consideration to be allocated to all performance obligations. Among other impacts, the adoption of IFRS 15 will result in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of these revenues will therefore change under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract will remain the same as under the previous rules. The portion of revenues that is earned without having been invoiced will be presented as contract assets in the consolidated balance sheets. All other types of revenues have not been impacted by the adoption of IFRS 15.

In addition, under IFRS 15, certain costs, mainly sales commissions, to obtain a contract will be capitalized and amortized as operating expenses over the contract term or over the period of time the customer is expected to remain a customer of the Corporation. Currently, such costs are expensed as incurred. Also, the capitalization of connection costs will no longer be limited to the related connection revenues as it is under the current rules. These capitalized costs will be included in “Other Assets” as contract costs in the consolidated balance sheet.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Recent accounting pronouncements (continued)

(ii) IFRS 15 – *Revenue from Contracts with Customers* (continued)

The retroactive adoption of IFRS 15 will have the following impacts on the 2017 and 2016 consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		**2017**		2016
Revenues	**$**	**22.4**	$	52.5
Purchase of goods and services		**(12.4)**		(13.2)
Deferred income tax expense		**9.2**		17.4
Net income and comprehensive income	**$**	**25.6**	$	48.3
Net income and comprehensive income attributable to:				
Shareholders	**$**	**20.8**	$	39.2
Non-controlling interests		**4.8**		9.1
Earnings per share attributable to shareholders	**$**	**0.09**	$	0.16

Consolidated balance sheets

Increase (decrease)		**December 31, 2017**		December 31, 2016
Contract assets	**$**	**183.6**	$	155.8
Other assets		**92.5**		85.4
Deferred income tax liability		**73.2**		63.9
Retained earnings		**165.4**		143.7
Non-controlling interests		**37.5**		33.6

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Recent accounting pronouncements (continued)

(iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted, provided that the IFRS 15 is applied at the same time as IFRS 16.

IFRS 16 sets out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

Under IFRS 16, most lease charges will be expensed as an asset amortization charge, along with a financial charge on the asset related financial liabilities. Since operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the statement of income.

The Corporation expects that the adoption of IFRS 16 will have significant impacts on its consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment. However, the adoption impacts on the consolidated financial statements have not yet been measured.

2. REVENUES

The breakdown of revenues between services rendered and product sales is as follows:

	2017	2016
Services rendered	**$ 3,792.7**	$ 3,668.2
Product sales	**329.7**	348.4
	$ 4,122.4	$ 4,016.6

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

3. EMPLOYEE COSTS AND PURCHASE OF GOODS AND SERVICES

The main components are as follows:

	2017	2016
Employee costs	**$ 899.5**	$ 898.1
Less employee costs capitalized to property, plant and equipment and to intangible assets	**(187.4)**	(183.3)
	712.1	714.8
Purchase of goods and services:		
Royalties, rights and creation costs	**677.9**	701.9
Cost of products sold	**373.7**	352.4
Service contracts	**172.3**	168.7
Marketing, circulation and distribution expenses	**108.9**	113.8
Building expenses	**93.8**	87.0
Other	**390.3**	383.9
	1,816.9	1,807.7
	$ 2,529.0	$ 2,522.5

4. FINANCIAL EXPENSES

	2017	2016
Interest on long-term debt and on debentures	**$ 299.4**	$ 311.9
Amortization of financing costs and long-term debt discount	**7.1**	7.1
Interest on net defined benefit liability	**6.3**	7.2
(Gain) loss on foreign currency translation on short-term monetary items	**(2.0)**	0.5
Other	**(1.8)**	1.3
	$ 309.0	$ 328.0

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

5. LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	2017	2016
Loss on embedded derivatives related to convertible debentures	**$ 197.4**	$ 68.2
Loss on the ineffective portion of fair value hedges	**3.0**	2.0
Loss on the ineffective portion of cash flow hedges	**–**	0.1
Gain on embedded derivatives related to long-term debt	**(0.6)**	(0.2)
Loss on reversal of embedded derivatives on debt redemption	**–**	0.2
	$ 199.8	$ 70.3

6. RESTRUCTURING OF OPERATIONS, LITIGATION AND OTHER ITEMS

In 2017, a net charge of $17.2 million was recorded relating to various cost reduction across the Corporation, the migration of subscribers from analog to digital services in the Telecommunications segment and developments in certain legal disputes (a net charge of $28.0 million in 2016).

7. GAIN ON SALE OF SPECTRUM LICENCES

On June 20, 2017, Videotron sold its AWS spectrum licence in the greater Toronto region to Rogers Communications Canada Inc. for a cash consideration of $184.2 million, pursuant to the transfer option held by Videotron since 2013. The sale resulted in a gain on disposal of $87.8 million.

On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHz wireless spectrum licences outside Québec to Shaw Communications Inc. for a cash consideration of $430.0 million. The sale resulted in a gain on disposal of $243.1 million.

As a result of these transactions, tax benefits of $31.8 million, on previous years' capital losses, were recognized in the consolidated statement of income in 2017.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. IMPAIRMENT OF GOODWILL AND OTHER ASSETS

	2017	2016
Impairment of goodwill	**$ 30.0**	$ 40.1
Impairment of intangible assets	**13.8**	0.8
	$ 43.8	$ 40.9

2017

During the third quarter of 2017, the Corporation performed an impairment test of its Magazines CGU in light of the continuous downtrend in revenues in this industry. The Corporation concluded that the recoverable amount was less than the carrying amount of the Magazines CGU and recorded a goodwill impairment charge of $30.0 million (including $1.5 million without any tax consequence) and an impairment charge of $12.4 million on intangible assets (including $3.1 million without any tax consequence).

An impairment charge on intangible assets of $1.4 million was also recorded in 2017 in other segments.

2016

During the third quarter of 2016, the Corporation performed an impairment test of its Magazines CGU in light of the continuous downtrend in advertising revenues in this industry. The Corporation concluded that the recoverable amount was less than the carrying amount of the Magazines CGU and recorded a goodwill impairment charge of $40.1 million (without any tax consequence).

An impairment charge on intangible assets of $0.8 million was also recorded in 2016 in other segments.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. LOSS ON DEBT REFINANCING

2017

- On May 1, 2017, Videotron redeemed all of its issued and outstanding 6.875% Senior Notes due July 15, 2021, in aggregate principal amount of $125.0 million, for a cash consideration of $129.3 million.
- On May 1, 2017, Quebecor Media redeemed all of its issued and outstanding 7.375% Senior Notes due January 15, 2021, in aggregate principal amount of $325.0 million, for a cash consideration of $333.0 million.

These transactions resulted in a total loss of $15.6 million in 2017.

2016

- On December 2, 2016, Videotron issued a notice for the redemption of an aggregate principal amount of $175.0 million of its issued and outstanding 6.875% Senior Notes due July 15, 2021. On January 5, 2017, the Senior Notes were redeemed for a cash consideration of $181.0 million.

This transaction resulted in a loss of $7.3 million in 2016.

10. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.8% in 2017 (26.9% in 2016) and income taxes in the consolidated statements of income:

	2017	2016
Income taxes at domestic statutory tax rate	**$ 167.9**	$ 98.6
Increase (reduction) resulting from:		
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates	**4.4**	19.4
Change in benefit arising from the recognition of current and prior year tax losses (note 7)	**(34.4)**	(0.5)
Change in deferred tax balances due to a change in substantively enacted tax rates	**–**	(6.7)
Non-deductible impairment of goodwill	**0.4**	10.8
Other	**(0.3)**	(3.8)
Income taxes	**$ 138.0**	$ 117.8

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. INCOME TAXES (continued)

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2017	2016	**2017**	2016
Loss carryforwards	**$ 90.4**	$ 103.8	**$ 13.4**	$ 1.8
Accounts payable, accrued charges, provisions and deferred revenue	**17.7**	20.6	**2.9**	(6.0)
Defined benefit plans	**38.8**	35.9	**(1.9)**	(1.9)
Property, plant and equipment	**(498.0)**	(412.9)	**85.1**	11.7
Goodwill, intangible assets and other assets	**(174.7)**	(132.6)	**42.1**	22.7
Long-term debt, derivative financial instruments and exchangeable debentures	**(125.7)**	(161.1)	**(7.4)**	(1.3)
Benefits from a general partnership	**–**	(0.6)	**(0.6)**	(67.0)
Other	**8.7**	2.0	**(4.4)**	(0.4)
	$ (642.8)	$ (544.9)	**$ 129.2**	$ (40.4)

Changes in the net deferred income tax liability are as follows:

	Note	**2017**	2016
Balance at beginning of year		**$ (544.9)**	$ (584.2)
Recognized in income as continuing operations		**(129.2)**	40.4
Recognized in income as discontinued operations		**2.9**	–
Recognized in other comprehensive income		**29.0**	7.1
Business acquisitions and disposals	12	**–**	(7.5)
Other		**(0.6)**	(0.7)
Balance at end of year		**$ (642.8)**	$ (544.9)
Deferred income tax asset		**$ 33.2**	$ 16.0
Deferred income tax liability		**(676.0)**	(560.9)
		$ (642.8)	$ (544.9)

As of December 31, 2017, the Corporation had loss carryforwards for income tax purposes of $23.5 million available to reduce future taxable income, that will expire between 2035 and 2037. These losses have been recognized. The Corporation also had capital losses of $772.6 million that can be carried forward indefinitely and applied only against future capital gains. All capital losses have been recognized.

There are no income tax consequences attached to the payment of dividends in 2017 or 2016 by the Corporation to its shareholders.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2017	2016
Income from continuing operations attributable to shareholders	**$ 357.8**	$ 194.7
Impact of assumed conversion of stock options of subsidiaries	**(1.1)**	(0.5)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 356.7**	$ 194.2
Net income attributable to shareholders	**$ 369.7**	$ 194.7
Impact of assumed conversion of stock options of subsidiaries	**(1.1)**	(0.5)
Net income attributable to shareholders, adjusted for dilution effect	**$ 368.6**	$ 194.2
Weighted average number of shares outstanding (in millions)	**241.8**	244.6
Potentially dilutive effect of stock options of the Corporation	**0.3**	0.8
Weighted average number of diluted shares outstanding (in millions)	**242.1**	245.4

During the year ended December 31, 2017, 60,000 options of TVA Group Inc.'s ("TVA Group") plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive (357,632 options of TVA Group's plan were excluded in 2016).

The diluted earnings per share calculation also does not take into consideration the potential dilutive effect of convertible debentures of the Corporation in 2017 and 2016 since their impact is anti-dilutive.

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS

(a) Non-controlling interests acquisitions

2017

- In conjunction with the sale of its AWS spectrum licence on June 20, 2017 (note 7), and in accordance with the provisions of the share repurchase agreement dated September 2015 between Quebecor Media and CDP Capital d'Amérique Investissement inc. ("CDP Capital"), Quebecor Media repurchased and cancelled, on July 6, 2017, 541,899 of its Common Shares held by CDP Capital for an amount of $37.7 million. On the same day, Quebecor Media also paid off a security held by CDP Capital for an amount of $6.2 million. This transaction resulted in an increase in the Corporation's interest in Quebecor Media from 81.1% to 81.5% and was accounted for as an equity transaction. Accordingly, the $27.0 million excess of the shares repurchase value and the security payment over the carrying value of non-controlling interests acquired, in the amount of $16.9 million, was recorded as a $26.6 million reduction in retained earnings and as a $0.4 million increase in accumulated other comprehensive loss.

(b) Business acquisitions

2017

- In 2017, the Corporation acquired a business, included in the Sports and Entertainment segment, for a cash consideration of $0.2 million.

2016

- On January 7, 2016, Videotron acquired Fibrenoire inc., a company that provides businesses with fibre-optic connectivity services, for a purchase price of $125.0 million. At closing, Videotron paid an amount of $119.1 million, net of cash acquired of $1.8 million. A post-closing adjustment of $0.2 million was received in the second quarter of 2016. The purchase price balance was paid in February 2017 for an amount of $5.6 million plus interests of $0.3 million.
- An amount of $0.6 million was also paid in 2016 relating to balances payable on prior business acquisitions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS (continued)

(b) Business acquisitions (continued)

The purchase price allocation between the fair value of identifiable assets and liabilities related to business acquisitions in 2016 is summarized as follows:

	2016
Assets acquired	
Non-cash current assets	$ 5.5
Property, plant and equipment	32.7
Intangible assets	15.6
Goodwill	87.1
Other assets	–
	140.9
Liabilities assumed	
Non-cash current liabilities	(3.1)
Deferred income taxes	(7.5)
Other long-term liabilities	(5.7)
	(16.3)
Net assets acquired at fair value	124.6
Non-controlling interests	–
	$ 124.6
Consideration	
Cash	$ 119.0
Balance payable	5.6
	$ 124.6

No amount of goodwill is deductible for tax purposes in 2017 ($0.1 million in 2016).

QUEBECOR INC.

As of December 31, 2017	**$ 475.8**	**$ 373.8**	**$ 54.4**	**$ 14.3**	**$ 64.8**	**$ 983.1**

The cost of internally generated intangible assets, mainly composed of software, was $566.5 million as of December 31, 2017 ($504.7 million as of December 31, 2016). For the year ended December 31, 2017, the Corporation recorded additions of internally generated intangible assets of $70.5 million ($66.0 million in 2016).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $323.3 million as of December 31, 2017 ($283.8 million as of December 31, 2016). For the year ended December 31, 2017, the Corporation recorded $44.9 million in amortization on its internally generated intangible assets ($43.8 million in 2016). The net carrying value of internally generated intangible assets was $243.2 million as of December 31, 2017 ($220.9 million as of December 31, 2016).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL

For the years ended December 31, 2017 and 2016, changes in the net carrying amount of goodwill are as follows:

	2017	2016
Cost		
Balance at beginning of year	**$ 5,688.2**	$ 5,601.1
Business acquisitions (note 12)	**0.4**	87.1
Balance at end of year	**5,688.6**	5,688.2
Accumulated amortization and impairment losses		
Balance at beginning of year	**2,962.8**	2,922.7
Impairment losses (note 8)	**30.0**	40.1
Balance at end of year	**2,992.8**	2,962.8
Net carrying amount	**$ 2,695.8**	$ 2,725.4

The net carrying amount of goodwill as of December 31, 2017 and 2016 was allocated to the following significant CGU groups:

CGU groups	**2017**	2016
Telecommunications	**$ 2,677.0**	$ 2,677.0
Magazines	**–**	30.0
Other[1]	**18.8**	18.4
Total	**$ 2,695.8**	$ 2,725.4

[1] Includes the CGUs related to Speciality film and television services, Book publishing and distribution, and Sports and Entertainment.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method.

The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

	2017		2016	
CGU groups [1]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications	**8.5 %**	**2.5 %**	8.5 %	2.5 %
Magazines	**15.5**	**(2.0)**	15.5	(1.0)
Other	**12.0 to 16.5**	**0.0 to 2.0**	12.0 to 16.5	0.0 to 2.0

[1] In 2017 and 2016, the recoverable amounts of all CGUs were based on value in use, using the discounted cash flow method.

Sensitivity of recoverable amounts

No reasonable changes in the discount rate or in the perpetual growth rate used in the most recent test performed would have caused the recoverable amount of the Telecommunication CGU to equal its carrying value.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. OTHER ASSETS

	2017	2016
Programs, broadcast and distribution rights	**$ 43.1**	$ 44.7
Deferred connection costs	**10.4**	13.5
Other	**44.2**	33.7

Non-current portion (included in “Other Liabilities”)	**1.9**	**17.4**	**19.3**

The recognition of provisions, in terms of both timing and amounts, requires the exercise of judgment based on relevant circumstances and events that can be subject to change over time. Provisions are primarily comprised of the following:

Restructuring of operations

Provisions for restructuring activities primarily cover severance payments related to initiatives to eliminate positions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. PROVISIONS AND CONTINGENCIES (continued)

Contingencies and legal disputes

There are a number of legal proceedings against the Corporation that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on the Corporation's results or on its financial position. Management of the Corporation, after taking legal advice, has established provisions for specific claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

Other

Other provisions are principally related to decommissioning obligations.

21. LONG-TERM DEBT

		$ 5,516.2	$ 5,616.9

21. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2019 in an amount of $300.0 million. The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares owned of Quebecor Media.

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in October 2022. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facilities of Quebecor Media are comprised of a US$350.0 million secured term loan "B" facility that matures in August 2020 and is bearing interest at LIBOR plus a premium of 2.25% and a $300.0 million secured revolving credit facility that matures in July 2020 and is bearing interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The term loan "B" facility provides for quarterly amortization payments totaling 1.00% per annum of the original principal amount, with the balance payable on August 17, 2020. These credit facilities contain covenants such as maintaining certain financial ratios, limitations on the Quebecor Media's ability to incur additional indebtedness, pay dividends, and make other distributions. They are secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2017, the credit facilities were secured by assets with a carrying value of $3,045.4 million ($3,123.2 million in 2016). As of December 31, 2017 and 2016, no amount had been drawn on the revolving credit facility, and as of December 31, 2017, $420.4 million was outstanding on the term loan "B" ($453.4 million in 2016).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(v) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2017:

Principal amount	Annual nominal interest rate	Effective interest rate (after discount or premium at issuance)	Maturity date	Interest payable every 6 months on
Quebecor Media				
US$ 850.0	5.750 %	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	6.625 %	January 15, 2023	June and December 15
Videotron				
US$ 800.0	5.000 %	5.000 %	July 15, 2022	January and July 15
US$ 600.0	5.375 %	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	5.625 %	June 15, 2025	April and October 15
$ 375.0	5.750 %	5.750 %	January 15, 2026	March and September 15
US$ 600.0[1]	5.125 %	5.125 %	April 15, 2027	April and October 15

[1] The Notes were issued in April 2017 for net proceeds of $794.5 million, net of financing fees of $9.9 million.

(vi) The bank credit facilities provide for a $965.0 million secured revolving credit facility that matures in July 2021 and a $75.0 million secured export financing facility providing for a term loan that matures in June 2018. The revolving credit facility bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a margin, depending on Videotron's leverage ratio. Advances under the export financing facility bear interest at Bankers' acceptance rate plus a margin. The bank credit facilities are secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2017, the bank credit facilities were secured by assets with a carrying value of $6,665.7 million ($5,804.3 million in 2016). The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2017, no amount had been drawn on the secured revolving credit facility ($209.4 million was drawn in 2016) and $5.4 million was outstanding on the export financing facility ($16.1 million in 2016).

(vii) The bank credit facilities of TVA Group comprise a secured revolving credit facility in the amount of $150.0 million, maturing in February 2019, and a secured term loan in the amount of $75.0 million, maturing in November 2019. TVA Group's revolving credit facility bears interest at floating rates based on Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate plus a premium determined by a leverage ratio. The term loan bears interest at floating rates based on Bankers' acceptance rate or Canadian prime rate plus a premium determined by a leverage ratio. The term loan provides for quarterly amortization payments commencing on December 20, 2015. The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. They are secured by liens on all of its movable assets and an immovable hypothec on its Head Office building. As of December 31, 2017 and 2016, no amount had been drawn on the revolving credit facility, and as of December 31, 2017, $62.9 million was outstanding on the term loan ($69.6 million in 2016).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

On December 31, 2017, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2018	$ 20.4
2019	233.5
2020	414.5
2021	1.4
2022	1,050.2
2023 and thereafter	3,852.1

22. CONVERTIBLE DEBENTURES

On October 11, 2012, the Corporation issued $500.0 million in aggregate principal amount of convertible debentures bearing interest at an annual rate of 4.125% and maturing in October 2018. As of December 31, 2017, the aggregate principal amount of outstanding convertible debentures amounted to $450.0 million ($500.0 million in 2016). Interest is payable semi-annually in cash, in Quebecor Class B Subordinate Voting Shares ("Class B Shares"), or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B Share, subject to a floor price of $9.625 per share (that is, a maximum number of 46,753,247 Quebecor Class B Shares corresponding to a ratio of $450.0 million to the floor price) and a ceiling price of $12.03125 per share (that is, a minimum number of 37,402,597 Quebecor Class B Shares corresponding to a ratio of $450.0 million to the ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

On July 14, 2017, Quebecor received a notice related to the conversion of an aggregate principal amount of $50.0 million of convertible debentures into 4,155,844 Quebecor Class B Shares. The Corporation exercised its option to pay in cash and accordingly, paid an amount in cash of $95.2 million on September 6, 2017. This transaction resulted in no gain or loss as the total carrying value of convertible debentures and related embedded derivatives was equal to the amount paid.

The convertible debentures are presented separately as a financial liability and the cap and floor feature are presented as embedded derivatives. The fair value of these embedded derivatives as of December 31, 2017 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 1.51% (0.89% in 2016), a dividend yield of 0.46% (0.48% in 2016), and an expected volatility of 13.80% (20.66% in 2016). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2017 would have increased the loss on embedded derivatives related to convertible debentures by $37.4 million, while a one dollar decrease in the market price of a Quebecor Class B share would have decreased the loss by $37.4 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. OTHER LIABILITIES

	Note		**2017**		2016
Defined benefit plans	31	**$**	**149.4**	$	144.9
Embedded derivatives related to convertible debentures	22		**–**		290.0
Deferred revenue			**17.4**		20.7
Stock-based compensation[1]	25		**15.3**		22.0
Other[2]			**33.7**		38.6
		$	**215.8**	$	516.2

[1] The current $24.6 million portion of stock-based compensation is included in accounts payable and accrued charges ($24.9 million in 2016) (note 19).

[2] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal nominal amount outstanding of $844.9 million as of December 31, 2017 and 2016 and a combined carrying value of $2.1 million as of December 31, 2017 and 2016. Exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligation without any consideration.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2015	77,852,744	$ 8.7	167,073,584	$ 316.9
Class A Shares converted into Class B Shares	(256,200)	(0.1)	256,200	0.1
Shares purchased and cancelled	–	–	(1,218,600)	(2.3)
Balance as of December 31, 2016	77,596,544	8.6	166,111,184	314.7
Class A Shares converted into Class B Shares	(216,600)	–	216,600	–
Shares purchased and cancelled	–	–	(5,590,700)	(10.5)
Shares issued upon exercise of stock options	–	–	100,000	1.1
Balance as of December 31, 2017	**77,379,944**	**$ 8.6**	**160,837,084**	**$ 305.3**

On August 9, 2017, the Corporation filed normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.4% of issued and outstanding Class B Shares as of August 1, 2017. The purchases can be made from August 15, 2017 to August 14, 2018 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On December 15, 2017, the maximum number of Class B Shares that may be repurchased under the Corporation's normal course issuer bid program was increased to 8,400,000, representing approximately 9.9% of the Class B Shares public float as of August 1, 2017.

In 2017, the Corporation purchased and cancelled 5,590,700 Class B Shares for a total cash consideration of $127.5 million (1,218,600 Class B Shares for a total cash consideration of $22.7 million in 2016). The excess of $117.0 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2017 ($20.4 million in 2016).

In 2017, 100,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $1.1 million. As a result of this transaction, contributed surplus was increased by $1.2 million and stock-based compensation liability was reduced by the same amount.

On November 15, 2017, a stock split of the Corporation's outstanding Class A Shares and Class B Shares on a two-for-one basis was performed. Accordingly, all references to the number of shares, per share amounts and share-based compensation information of the Corporation in these consolidated financial statements have been retrospectively restated to reflect the impact of the stock split.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. CAPITAL STOCK (continued)

On March 13, 2018, the Board of Directors of the Corporation declared a dividend of $0.0275 per share on Class A Shares and Class B Shares, or approximately $6.6 million, payable on April 24, 2018 to shareholders of record at the close of business on March 30, 2018.

25. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 26,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of the Corporation. The exercise price of each option is equal to the weighted average trading price of the Corporation's Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. Options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant.

The following table gives details on changes to outstanding options for the years ended December 31, 2017 and 2016:

	2017		2016	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**2,620,000**	**$ 12.68**	2,620,000	$ 12.68
Exercised	**(1,260,000)**	**12.82**	–	–
Cancelled	**(580,000)**	**12.97**	–	–
Balance at end of year	**780,000**	**$ 12.25**	2,620,000	$ 12.68
Vested options at end of year	**686,666**	**$ 11.97**	493,332	$ 11.71

During the year ended December 31, 2017, 1,160,000 of the Corporation's stock options were exercised for a cash consideration of $8.2 million (none in 2016) and 100,000 Class B Shares of the Corporation were issued upon exercise of stock options (note 24) (none in 2016).

As of December 31, 2017, exercise prices of all outstanding and vested options are from $11.11 to $15.12 and the number of years to maturity of all outstanding options is 5.83 years.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Mid-term stock-based compensation plan

Under a mid-term stock-based compensation plan, participants are entitled to receive a cash payment at the end of a three-year period based on the appreciation of the Corporation Class B Share price, and subject to the achievement of certain non-market performance criteria. The following table provides details of changes to outstanding units in the mid-term stock-based compensation plan for the years ended December 31, 2017 and 2016:

		2017		2016
	Units	**Weighted average exercise price**	Units	Weighted average exercise price
Balance at beginning of year	**2,855,248**	**$ 14.46**	2,952,692	$ 14.34
Exercised	**(2,281,882)**	**14.12**	(97,444)	10.89
Cancelled	**(386,146)**	**15.81**	–	–
Balance at end of year	**187,220**	**$ 15.81**	2,855,248	$ 14.46

During the year ended December 31, 2017, a cash consideration of $9.8 million was paid upon the exercise of 2,281,882 units ($0.6 million upon the exercise of 97,444 units in 2016).

(iii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of the Corporation’s directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of the Corporation’s Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on the Corporation’s Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of the Corporation’s Class B Shares on the date of redemption. As of December 31, 2017 and 2016, the total number of DSUs outstanding under this plan was 341,750 and 396,284, respectively.

(b) Quebecor Media stock option plan

Under a stock option plan established by Quebecor Media, 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

The following table gives details on changes to outstanding options granted as of December 31, 2017 and 2016:

	2017		2016	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**980,905**	**$ 61.71**	1,482,494	$ 60.44
Exercised	**(215,978)**	**59.40**	(399,689)	56.48
Cancelled	**(169,100)**	**60.65**	(101,900)	63.79
Balance at end of year	**595,827**	**$ 62.84**	980,905	$ 61.71
Vested options at end of year	**226,200**	**$ 58.78**	163,550	$ 54.90

During the year ended December 31, 2017, 215,978 of the Quebecor Media's stock options were exercised for a cash consideration of $5.5 million (399,689 stock options for $6.5 million in 2016).

The following table gives summary information on outstanding options as of December 31, 2017:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$37.91 to 53.40	55,200	2.85	$ 45.69	55,200	$ 45.69
$57.35 to 70.56	540,627	6.46	64.60	171,000	63.01
$37.91 to 70.56	**595,827**	**6.13**	**$ 62.84**	**226,200**	**$ 58.78**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Shares have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised.

The following table gives details on changes to outstanding options for the years ended December 31, 2017 and 2016:

	2017		2016	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**357,632**	**$ 12.71**	463,371	$ 13.30
Cancelled	**(134,915)**	**12.86**	–	–
Expired	**(162,717)**	**14.75**	(105,739)	15.29
Balance at end of year	**60,000**	**$ 6.85**	357,632	$ 12.71
Vested options at end of year	**24,000**	**$ 6.85**	283,632	$ 14.11

As of December 31, 2017, the exercise price of all outstanding and vested options is $6.85 and the number of years to maturity of all outstanding options is 7.09 years.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(d) Deferred share unit and performance share unit plans

On July 10, 2016, TVA Group established a DSU plan and a PSU plan for its employees based on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans.

On July 13, 2016, Quebecor also established a DSU plan and a PSU plan for its employees and those of its subsidiaries. Both plans are based on Quebecor Class B Subordinate Shares ("Quebecor Class B Shares") and, in the case of the DSU plan, also on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans.

The following table provides details of changes to outstanding units in the DSU and PSU plans for the year ended December 31, 2017:

	Outstanding units	
	DSU	PSU
Quebecor		
Balance at beginning of year	159,682	204,424
Granted	142,679	182,441
Exercised	(9,894)	(15,780)
Cancelled	(43,430)	(53,046)
Balance at end of year	**249,037**	**318,039**
TVA Group		
Balance at beginning of year	209,327	212,671
Granted	144,702	147,937
Exercised	(17,978)	–
Cancelled	(69,662)	(89,971)
Balance at end of year	**266,389**	**270,637**

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans as of December 31, 2017 and 2016:

December 31, 2017	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**1.82 %**	**1.80 %**	**1.97 %**
Distribution yield	**0.46 %**	**1.12 %**	**– %**
Expected volatility	**17.43 %**	**16.70 %**	**50.78 %**
Expected remaining life	**2.4 years**	**2.3 years**	**3.6 years**

December 31, 2016	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	1.25 %	1.10 %	0.91 %
Distribution yield	0.48 %	1.33 %	– %
Expected volatility	19.27 %	18.93 %	35.48 %
Expected remaining life	4.0 years	3.0 years	1.9 years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(f) Liability of vested options

As of December 31, 2017, the liability for all vested options was $15.9 million as calculated using the intrinsic value ($7.3 million as of December 31, 2016).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2017, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $21.0 million ($23.1 million in 2016).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

26. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2015	$ (57.6)	$ (53.6)	$ (111.2)
Other comprehensive (loss) income	(12.2)	17.3	5.1
Balance as of December 31, 2016	(69.8)	(36.3)	(106.1)
Other comprehensive income (loss)	58.3	(2.5)	55.8
Non-controlling interests acquisition (note 12)	(0.2)	(0.2)	(0.4)
Balance as of December 31, 2017	**$ (11.7)**	**$ (39.0)**	**$ (50.7)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivative financial instruments designated as cash flow hedges. The balance is expected to reverse over a 9 1/4-year period.

27. COMMITMENTS

The Corporation rents premises and equipment under operating leases and has entered into long-term commitments to purchase services, tangible and intangible assets, broadcasting rights, and to pay licences and royalties. The operating leases have various terms, escalation clauses, purchase options and renewal rights. The minimum payments for the coming years are as follows:

	Leases	Other commitments
2018	$ 47.0	$ 228.2
2019 to 2022	76.6	600.0
2023 and thereafter	75.0	543.1

The Corporation’s operating lease expenses amounted to $63.8 million in 2017 ($62.8 million in 2016).

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2017, the maximum exposure with respect to these guarantees was $20.5 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation’s subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock-in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.2936	$ 151.4	US$ 117.0

(a) Description of derivative financial instruments (continued)

(ii) Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan "B"	2013 to 2020	US$ 335.1	Bankers' acceptance 3 months + 2.77%	1.0346
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair value measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value in the consolidated balance sheets, is determined using Level 2 inputs.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation’s valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of early settlement options recognized as embedded derivatives and embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument’s adjusted implicit interest rate and credit premium.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2017 and 2016 are as follows:

	2017			2016
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1, 2]	**$ (5,572.1)**	**$ (5,883.3)**	$ (5,700.8)	$ (5,866.6)
Convertible debentures[3]	**(888.5)**	**(888.5)**	(780.0)	(780.0)
Derivative financial instruments[4]				
Early settlement options	**–**	**–**	0.4	0.4
Foreign exchange forward contracts[5]	**(4.5)**	**(4.5)**	2.5	2.5
Interest rate swaps	**–**	**–**	(0.3)	(0.3)
Cross-currency interest rate swaps[5]	**562.2**	**562.2**	806.5	806.5

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $557.7 million as of December 31, 2017 ($808.7 million as of December 31, 2016).

5 The value of foreign exchange forward contracts entered into to lock in the value of existing hedging positions is netted from the value of the offset financial instruments.

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2017, no customer balance represented a significant portion of the Corporation’s consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2017, 11.3% of trade receivables were 90 days past their billing date (13.0% as of December 31, 2016) of which 31.1% had an allowance for doubtful accounts (32.5% as of December 31, 2016).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management (continued)

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2017 and 2016:

	2017	2016
Balance at beginning of year	**$ 28.1**	$ 23.0
Charged to income	**21.6**	36.1
Utilization	**(28.6)**	(31.0)
Balance at end of year	**$ 21.1**	$ 28.1

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.9 years as of December 31, 2017 (6.1 years as of December 31, 2016).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases, dividends to shareholders and dividends or distributions to non-controlling interests. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2017, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 0.8**	$ 0.8	$ –	$ –	$ –
Accounts payable and accrued charges	**738.7**	738.7	–	–	–
Long-term debt[1]	**5,572.1**	20.4	648.0	1,051.6	3,852.1
Convertible debentures[2]	**886.4**	886.4	–	–	–
Interest payments[3]	**1,690.7**	250.3	554.3	517.2	368.9
Derivative financial instruments[4]	**(552.7)**	0.6	(71.0)	(203.0)	(279.3)
Total	**$ 8,336.0**	**$ 1,897.2**	**$ 1,131.3**	**$ 1,365.8**	**$ 3,941.7**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2017 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $9.625 per share and a ceiling price of $12.03125. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2017.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2017, and to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2017 is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10	$ **1.6**	$ **40.4**
Decrease of $0.10	**(1.6)**	**(40.4)**

A variance of $0.10 in the 2017 average exchange rate of CAN dollar per one U.S. dollar would had resulted in a variance of $3.2 million on the value of unhedged purchase of goods and services in 2017 and $5.7 million on the value of unhedged acquisitions of tangible and intangible assets in 2017.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2017, after taking into account the hedging instruments, long-term debt was comprised of 84.7% fixed-rate debt (83.2% in 2016) and 15.3% floating-rate debt (16.8% in 2016).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2017 was $7.7 million.

The estimated sensitivity on income and on other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures (note 22), as of December 31, 2017, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	$ **(1.4)**	$ **(21.2)**
Decrease of 100 basis points	**1.4**	**21.2**

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2017 and 2016 is as follows:

	2017	2016
Bank indebtedness	**$ 0.8**	$ 18.9
Long-term debt	**5,536.6**	5,668.7
Embedded derivatives related to convertible debentures	**442.2**	290.0
Convertible debentures	**450.0**	500.0
Derivative financial instruments	**(557.7)**	(808.7)
Cash and cash equivalents	**(864.9)**	(22.3)
Net liabilities	**5,007.0**	5,646.6
Equity	**$ 1,206.1**	$ 847.2

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2017	2016
Salaries and short-term benefits	**$ 9.7**	$ 10.1
Share-based compensation	**10.0**	15.1
Other long-term benefits	**10.1**	2.0
	$ 29.8	$ 27.2

Operating transactions

The Corporation made sales to affiliated corporations in the amount of $2.8 million in 2017 ($3.0 million in 2016). These transactions were accounted for at the consideration agreed between parties.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation's pension plans are registered with a provincial or federal regulatory authority.

The Corporation's funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation's management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation's rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation's management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation's funding requirement.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2017 and 2016:

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,287.2**	$ 1,232.8	**$ 73.4**	$ 69.2
Service costs	**33.9**	34.9	**1.9**	1.8
Interest costs	**50.3**	49.7	**2.9**	2.8
Plan participants' contributions	**11.5**	11.9	**–**	–
Actuarial loss (gain) arising from:				
Financial assumptions	**82.6**	20.8	**5.4**	1.4
Demographic assumptions	**(8.6)**	–	**–**	–
Participant experience	**4.6**	(0.4)	**(21.2)**	–
Benefits and settlements paid	**(73.6)**	(63.1)	**(1.9)**	(1.8)
Plan transfer	**(55.4)**	–	**–**	–
Other	**0.4**	0.6	**–**	–
Benefit obligations at the end of the year	**$ 1,332.9**	$ 1,287.2	**$ 60.5**	$ 73.4

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,244.4**	$ 1,164.8	**$ –**	$ –
Actual return on plan assets	**106.5**	98.0	**–**	–
Employer contributions	**36.4**	35.1	**1.9**	1.8
Plan participants' contributions	**11.5**	11.9	**–**	–
Administrative fees	**(2.5)**	(2.3)	**–**	–
Benefits and settlements paid	**(73.6)**	(63.1)	**(1.9)**	(1.8)
Plan transfer	**(55.4)**	–	**–**	–
Fair value of plan assets at the end of the year	**$ 1,267.3**	$ 1,244.4	**$ –**	$ –

As of December 31, 2017, the weighted average duration of defined benefit obligations was 16.5 years (16.2 years in 2016). The Corporation expects future benefit payments of $69.6 million in 2018.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed**,** whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2017	2016
Equity securities:		
Canadian	**23.6 %**	23.6 %
Foreign	**32.3**	31.9
Debt securities	**40.8**	41.2
Other	**3.3**	3.3
	100.0 %	100.0 %

The fair value of plan assets is principally based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amounts recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Benefit obligations	**$ (1,332.9)**	$ (1,287.2)	**$ (60.5)**	$ (73.4)
Fair value of plan assets	**1,267.3**	1,244.4	**–**	–
Plan deficit	**(65.6)**	(42.8)	**(60.5)**	(73.4)
Asset limit and minimum funding adjustment	**(20.4)**	(19.8)	**–**	–
Net amount recognized[1]	**$ (86.0)**	$ (62.6)	**$ (60.5)**	$ (73.4)

[1] The net amount recognized for 2017 consists of an asset of $2.9 million included in "Other Assets" (note 18) ($8.9 million in 2016) and a liability of $149.4 million included in "Other Liabilities" (note 23) ($144.9 million in 2016).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Actuarial (loss) gain on benefit obligations	**$ (78.6)**	$ (20.4)	**$ 15.8**	$ (1.4)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**59.1**	51.8	**–**	–
Asset limit and minimum funding adjustment	**(0.1)**	2.8	**–**	–
Re-measurements (loss) gain recorded in other comprehensive income	**$ (19.6)**	$ 34.2	**$ 15.8**	$ (1.4)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Employee costs:				
Service costs	**$ 33.9**	$ 34.9	**$ 1.9**	$ 1.8
Administrative fees and other	**3.0**	3.0	**–**	–
Interest on net defined benefit liability	**3.4**	4.4	**2.9**	2.8
Net benefit costs	**$ 40.3**	$ 42.3	**$ 4.8**	$ 4.6

The expense related to defined contribution pension plans amounted to $16.8 million in 2017 and 2016.

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $38.6 million in 2018, based on the most recent financial actuarial reports filed (contributions of $38.3 million were paid in 2017).

<u>Assumptions</u>

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2017 and 2016
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions (continued)

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2017 and 2016 and current periodic benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2017	2016	**2017**	2016
Benefit obligations				
Rates as of year-end:				
Discount rate	**3.50 %**	3.90 %	**3.50 %**	3.90 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00
Current periodic costs				
Rates as of preceding year-end:				
Discount rate	**3.90 %**	4.00 %	**3.90 %**	4.00 %
Rate of compensation increase	**3.00**	3.00	**3.00**	3.00

The assumed average retirement age of participants used was of 62 years in 2017 and 2016.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 6.50 % at the end of 2017. These costs, as per the estimate, are expected to decrease gradually over the next 10 years to 4.5% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $22.0 million and the postretirement benefits obligation by $1.2 million as of December 31, 2017. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

J. Bitran

This is Exhibit 48 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2018 and 2017

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of the Corporation and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the Corporation's annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with the Corporation's management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

Opinion

We have audited the consolidated financial statements of Quebecor Inc. and its subsidiaries (the "Corporation"), which comprise the consolidated balance sheets as at December 31, 2018 and 2017, and the consolidated statements of income, comprehensive income, equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Corporation as at December 31, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Corporation in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information. The other information comprises

- Management's Discussion and Analysis.
- The information, other than the consolidated financial statements and our auditor's report thereon, in the Annual Report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The Annual Report is expected to be made available to us after the date of the auditor's report. If based on the work we will perform on this other information, we conclude there is a material misstatement of other information, we are required to report that fact to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Corporation's financial reporting process.

INDEPENDENT AUDITORS' REPORT

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Corporation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Corporation to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Corporation to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Corporation audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Lily Adam.

See accompanying notes to consolidated financial statements.

On March 12, 2019, the Board of Directors approved the consolidated financial statements for the years ended December 31, 2018, 2017 and 2016.

On behalf of the Board of Directors,

The Right Honourable Brian Mulroney, P.C., C.C., LL.D.
Chairman of the Board

Normand Provost
Director

QUEBECOR INC.
SEGMENTED INFORMATION

Years ended December 31, 2018 and 2017
(in millions of Canadian dollars)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media Inc. (“Quebecor Media”) and in subsidiaries controlled by Quebecor Media. On June 22, 2018, Quebecor Media became a wholly owned subsidiary of the Corporation. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media Inc. refers to Quebecor Media Inc. and its subsidiaries. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	100.0 %	100.0 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies, televisual products and video games through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the distribution of movies, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

[1] The Chief Executive Officer uses adjusted EBITDA as the measure of profit to assess the performance of each segment. Adjusted EBITDA is referred to as a non-International Financial Reporting Standards ("IFRS") measure and is defined as net income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and intangible assets, loss on debt refinancing, income taxes and income from discontinued operations.

See accompanying notes to consolidated financial statements.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (notes 1(k) and 1(x)), the liability related to stock-based compensation (note 1(v)) and the net defined benefit liability (note 1(w)), and they are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation operates ("functional currency").

Comparative figures for the year ended December 31, 2017 have been restated to conform to the presentation adopted for the year ended December 31, 2018.

(b) Changes in accounting policies

(i) IFRS 9 – *Financial Instruments*

On January 1, 2018, the Corporation adopted the new rules under IFRS 9, *Financial Instruments*, which simplify the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

Under the new rules, most of financial assets and liabilities of the Corporation are now classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value. The Corporation is also using the IFRS 9 expected credit losses method to estimate the provision for expected credit losses on its financial assets.

The adoption of IFRS 9 had no impact on the consolidated financial statements.

(ii) IFRS 15 – *Revenue from Contracts with Customers*

On January 1, 2018, the Corporation adopted, on a fully retrospective basis, the new rules under IFRS 15, *Revenue from Contracts with Customers,* which specify how and when an entity should recognize revenue, and which also require the entity to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to apply to each contract with a customer (note 1(f)).

The adoption of IFRS 15 had significant impacts on the consolidated financial statements, mainly in the Telecommunications segment, with regard to the timing of the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs, such as the costs to obtain a contract and connection costs.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Changes in accounting policies (continued)

(ii) IFRS 15 – *Revenue from Contracts with Customers* (continued)

Under IFRS 15, the total consideration from a contract with multiple deliverables is now allocated to all performance obligations in the contract, based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile devices and services under contracts with multiple deliverables and for a fixed period of time. Under IFRS 15, promotional offers related to the sale of mobile devices, previously accounted for as a reduction in related equipment sales on activation, are now considered in the total consideration to be allocated to all performance obligations. Among other impacts, the adoption of IFRS 15 results in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of these revenues therefore changes under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract remains the same as under the previous rules. The portion of revenues that is earned without having been invoiced is now presented as contract assets in the consolidated balance sheets, which asset is realized during the term of the contract. The long-term portion of contract assets is included in “Other assets” in the consolidated balance sheets. All other types of revenue have not been impacted by the adoption of IFRS 15.

In addition, under IFRS 15, certain costs to obtain a contract, mainly sales commissions, are capitalized and amortized as operating expenses over the period of time the customer is expected to maintain its service or over the contract term. Previously, such costs were expensed as incurred. Also, the capitalization of connection costs is no longer limited to the related connection revenues as under the previous rules. These capitalized costs are included in “Other assets” as contract costs in the consolidated balance sheets.

The adoption of IFRS 15 had no impact on cash flows from operating, investing and financing activities.

The retroactive adoption of IFRS 15 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)	2017	2016
Revenues	$ 22.4	$ 52.5
Purchase of goods and services	(12.4)	(13.2)
Deferred income tax expense	9.2	17.4
Net income and comprehensive income	$ 25.6	$ 48.3
Net income and comprehensive income attributable to:		
Shareholders	$ 20.8	$ 39.2
Non-controlling interests	4.8	9.1
Earnings per share attributable to shareholders	$ 0.09	$ 0.16

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Changes in accounting policies (continued)

(ii) IFRS 15 – *Revenue from Contracts with Customers* (continued)

Consolidated balance sheets

Increase (decrease)	December 31, 2017	December 31, 2016
Other assets:		
Contract assets[1]	$ 183.6	$ 155.8
Contract costs[2]	92.5	85.4
Deferred income tax liability	73.2	63.9
Retained earnings	165.4	143.7
Non-controlling interests	37.5	33.6

1 The current portion of contract assets is $132.8 million as of December 31, 2017 and $106.6 million as of December 31, 2016.

2 The current portion of contract costs is $55.9 million as of December 31, 2017 and $49.4 million as of December 31, 2016, and is presented under “Other current assets”.

(c) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent Corporation’s ownership interest. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(d) Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation’s consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

Non-controlling interests in an entity acquired are presented in the consolidated balance sheets within equity, separately from the equity attributable to shareholders.

(e) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transaction. Translation gains and losses on monetary assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- The parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- The entity can identify each party's rights regarding the goods or services to be transferred;
- The entity can identify the payment terms for the goods or services to be transferred;
- The contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- It is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as "Deferred revenues" in the consolidated balance sheets. Deferred revenues are usually recognized as revenues in the subsequent year.

<u>Telecommunications</u>

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video services are recognized when services are provided;
- Revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- Operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- Cable connection and mobile activation revenues are deferred and recognized as revenues over the period of time the customer is expected to remain a customer of the Corporation or over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition (continued)

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment leasing revenues are recognized over the rental period; and
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Revenues from renting the arena and from tickets (including season tickets), food concession sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising in the form of venue signage or sponsorships, are recognized ratably over the period of the agreement; and
- Revenues derived from sporting and cultural event management are recognized when services are provided.

(g) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Impairment of assets (continued)

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

(h) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

(i) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized either in other comprehensive income or directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(j) Leases

Assets under leasing agreements are classified at the inception of the lease as (i) finance leases whenever the terms of the lease substantially transfer all the risks and rewards of ownership of the asset to the lessee, or as (ii) operating leases for all other leases.

Operating lease rentals are recognized in the consolidated statements of income on a straight-line basis over the period of the lease. Any lessee incentives are deferred and recognized evenly over the lease term.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments

Classification, recognition and measurement

Most of financial assets and liabilities are classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value through other comprehensive income or through profit or loss. Contingent consideration arising from a business acquisition or disposal are measured at fair value at the transaction date with subsequent changes in fair value recorded in the consolidated statements of income.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.
- The Corporation has established a hedge ratio of one-for-one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

The Corporation measures and records the effectiveness of its hedging relationships as follows:

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(l) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(m) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

(n) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(o) Accounts receivable and contract assets

Accounts receivable and contract assets are presented net of a provision for expected credit losses. The Corporation is using the IFRS 9 expected credit losses method to estimate that provision, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions. Amounts receivable are written off when deemed uncollectible.

(p) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Inventories (continued)

In particular, inventories related to broadcasting activities, which primarily comprise programs and broadcast and distribution rights, are accounted for as follows:

(i) Programs produced and productions in progress

Programs produced and productions in progress related to broadcasting activities are accounted for at the lesser of cost and net realizable value. Cost includes direct charges for goods and services and the share of labour and general expenses related to each production. The cost of each program is charged to operating expenses when the program is broadcast.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are classified as current or long-term assets, based on management's estimate of the broadcast or distribution period. These rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on how future economic benefits from those rights will be generated. Broadcast and distribution rights payable are classified as current or long-term liabilities based on the payment terms included in the licence.

Estimates of future revenues used to determine the net realizable value of inventories related to the broadcasting or distribution of television products and movies are examined periodically by management and revised as necessary. The carrying value of programs produced and productions in progress, of broadcast and distribution rights is reduced to the net realizable value, if necessary, based on this assessment.

(q) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statements of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful lives
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets. A decommissioning obligation is however recorded for the rental of sites related to the mobile network.

Videotron Ltd. (“Videotron”) is engaged in an agreement to operate a shared LTE network in the Province of Québec and the Ottawa region.

(s) Goodwill and intangible assets

Goodwill

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(g)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(s) Goodwill and intangible assets (continued)

<u>Intangible assets</u>

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development Canada ("ISED Canada"), (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Broadcasting licences, trademarks and sport franchises also have an indefinite useful life and are not amortized. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful lives
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(t) Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(u) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

(v) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 25.

(w) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized; and
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive loss and in accumulated other comprehensive loss. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation;
- changes in the net benefit asset limit or in the minimum funding liability.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services, health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(x) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(y) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 17.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(y) Use of estimates and judgments (continued)

(ii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 31.

(iii) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. More specifically, an assessment of the probable outcomes of legal proceedings or other contingencies is also required. A description of the main provisions, including management expectations on the potential effect of the possible outcomes of legal disputes on the consolidated financial statements, is presented in note 20.

(iv) Contingent considerations

Contingent considerations arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations are based will be met in the future. The assessment of these contingent potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations recognized and any subsequent changes in fair value recorded in the consolidated statements of income.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

(iii) Interpretation of laws and regulations

Interpretation of laws and regulation, including tax regulations, requires judgment from management that could have an impact on the recognition of provisions for legal litigation and income taxes in the consolidated financial statements.

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(z) Recent accounting pronouncements

(i) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019.

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease will be initially measured on a present value basis.

The adoption of IFRS 16 has significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges will be expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the consolidated statements of income.

Under IFRS 16, principal payments of the lease liability will be presented as financing activities in the consolidated statements of cash flows, whereas under the current standard these payments are presented as operating activities.

The retroactive adoption of IFRS 16 will have the following impacts on the 2018 and 2017 consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		**2018**		2017
Purchase of goods and services	**$**	**(47.7)**	$	(45.5)
Depreciation and amortization		**36.4**		35.3
Financial expenses		**8.5**		9.9
Restructuring of operations		**(0.7)**		0.3
Deferred income tax expense		**0.9**		–
Net income and comprehensive income	**$**	**2.6**	$	–
Net income and comprehensive income attributable to:				
Shareholders	**$**	**2.1**	$	0.2
Non-controlling interests		**0.4**		(0.2)
Earnings per share attributable to shareholders	**$**	**0.01**	$	–

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(z) Recent accounting pronouncements (continued)

(i) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019. (continued)

Consolidated balance sheets

Increase (decrease)	**December 31, 2018**	December 31, 2017
Right-of-use assets	**$ 123.7**	$ 144.6
Provisions	**(1.4)**	(1.4)
Lease liabilities[1]	**144.4**	167.9
Other liabilities	**(4.3)**	(3.4)
Deferred income tax liability	**(3.9)**	(4.9)
Deficit	**10.9**	9.1
Non-controlling interests	**(0.2)**	(4.5)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.4 million as of December 31, 2017.

(ii) IFRIC 23 – *Uncertainty over Income Tax Treatments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019.

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments. The adoption of IFRIC 23 will not have a material impact on the consolidated financial statements.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

4. FINANCIAL EXPENSES

	2018	2017
Interest on long-term debt and on debentures	**$ 312.9**	$ 299.4
Amortization of financing costs and long-term debt discount	**7.1**	7.1
Interest on net defined benefit liability	**6.7**	6.3
Loss (gain) on foreign currency translation on short-term monetary items	**2.3**	(2.0)
Other	**(5.5)**	(3.4)
	$ 323.5	$ 307.4

5. LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	2018	2017
Loss on embedded derivatives related to convertible debentures	**$ 60.4**	$ 197.4
Other	**0.9**	2.4
	$ 61.3	$ 199.8

6. RESTRUCTURING OF OPERATIONS, LITIGATION AND OTHER ITEMS

In 2018, a net charge of $14.9 million was recorded relating mainly to various cost reduction initiatives across the Corporation and disposal of assets (net charges of $17.2 million in 2017 which were related to cost reduction initiatives, developments in certain litigations and the migration of subscribers from analog to digital services in the Telecommunications segment).

In 2018, an impairment charge on assets of $14.9 million was also recorded mainly in the Telecommunications segment as a result of restructuring initiatives.

7. GAIN ON SALE OF SPECTRUM LICENCES

On June 20, 2017, Videotron sold its Advanced Wireless Service (“AWS-1”) spectrum licence in the greater Toronto region to Rogers Communications Canada Inc. for a cash consideration of $184.2 million, pursuant to the transfer option held by Videotron since 2013. The sale resulted in a gain on disposal of $87.8 million.

On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHz wireless spectrum licences outside Québec to Shaw Communications Inc. for a cash consideration of $430.0 million. The sale resulted in a gain on disposal of $243.1 million.

As a result of these transactions, tax benefits of $31.8 million, on previous years’ capital losses, were recognized in the consolidated statement of income in 2017.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS

		2018		2017
Impairment of goodwill	**$**	**–**	$	30.0
Impairment of intangible assets		**–**		13.8
	$	**–**	$	43.8

2017

During the third quarter of 2017, the Corporation performed an impairment test of its Magazines CGU in light of the continuous downtrend in revenues in this industry. The Corporation concluded that the recoverable amount was less than the carrying amount of the Magazines CGU and recorded a goodwill impairment charge of $30.0 million (including $1.5 million without any tax consequence) and an impairment charge of $12.4 million on intangible assets (including $3.1 million without any tax consequence).

An impairment charge on intangible assets of $1.4 million was also recorded in 2017 in other segments.

9. LOSS ON DEBT REFINANCING

2017

- On May 1, 2017, Videotron redeemed all of its issued and outstanding 6.875% Senior Notes due July 15, 2021, in aggregate principal amount of $125.0 million, for a cash consideration of $129.3 million.
- On May 1, 2017, Quebecor Media redeemed all of its issued and outstanding 7.375% Senior Notes due January 15, 2021, in aggregate principal amount of $325.0 million, for a cash consideration of $333.0 million.

These transactions resulted in a total loss of $15.6 million in 2017.

10. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.7% in 2018 (26.8% in 2017) and income taxes in the consolidated statements of income:

		2018		2017 (restated, note 1(b))
Income taxes at domestic statutory tax rate	**$**	**159.5**	$	175.9
Increase (reduction) resulting from:				
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates		**14.9**		4.4
Change in benefit arising from the recognition of current and prior year tax losses (note 7)		**(12.0)**		(34.4)
Non-deductible impairment of goodwill		**–**		0.4
Other		**(0.5)**		(0.4)
Income taxes	**$**	**161.9**	$	145.9

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. INCOME TAXES (continued)

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2018	2017 (restated, note 1(b))	**2018**	2017 (restated, note 1(b))
Loss carryforwards	**$ 102.6**	$ 90.4	**$ (12.2)**	$ 13.4
Accounts payable, accrued charges, provisions and deferred revenue	**17.6**	17.7	**0.1**	2.9
Defined benefit plans	**43.6**	38.8	**(3.1)**	(1.9)
Contract assets	**(54.3)**	(48.5)	**5.8**	7.4
Property, plant and equipment	**(481.0)**	(498.0)	**(17.0)**	83.8
Goodwill, intangible assets and other assets	**(233.4)**	(199.4)	**34.0**	43.9
Long-term debt, derivative financial instruments and exchangeable debentures	**(132.7)**	(125.7)	**1.3**	(7.4)
Other	**10.2**	8.7	**(1.9)**	(5.0)
	$ (727.4)	$ (716.0)	**$ 7.0**	$ 137.1

Changes in the net deferred income tax liability are as follows:

	2018	2017 (restated, note 1(b))
Balance at beginning of year	**$ (716.0)**	$ (608.8)
Recognized in income as continuing operations	**(7.0)**	(137.1)
Recognized in other comprehensive income	**(4.0)**	29.0
Other	**(0.4)**	0.9
Balance at end of year	**$ (727.4)**	$ (716.0)
Deferred income tax asset	**$ 51.8**	$ 33.2
Deferred income tax liability	**(779.2)**	(749.2)
	$ (727.4)	$ (716.0)

As of December 31, 2018, the Corporation had loss carryforwards for income tax purposes of $19.4 million available to reduce future taxable income, that will expire between 2035 and 2038. These losses have been recognized. The Corporation also had capital losses of $782.5 million that can be carried forward indefinitely and applied only against future capital gains. All capital losses have been recognized.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

10. INCOME TAXES (continued)

There are no income tax consequences attached to the payment of dividends in 2018 or 2017 by the Corporation to its shareholders.

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2018	2017
		(restated, note 1(b))
Income from continuing operations attributable to shareholders	**$ 398.0**	$ 375.7
Impact of assumed conversion of stock options of subsidiaries	**(0.8)**	(1.1)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 397.2**	$ 374.6
Net income attributable to shareholders	**$ 401.5**	$ 390.5
Impact of assumed conversion of stock options of subsidiaries	**(0.8)**	(1.1)
Net income attributable to shareholders, adjusted for dilution effect	**$ 400.7**	$ 389.4
Weighted average number of shares outstanding (in millions)	**239.3**	241.8
Potentially dilutive effect of stock options of the Corporation	**0.5**	0.3
Weighted average number of diluted shares outstanding (in millions)	**239.8**	242.1

During the year ended December 31, 2018, 340,000 options of TVA Group Inc.'s ("TVA Group") plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive (60,000 options of TVA Group's plan were excluded in 2017).

The diluted earnings per share calculation also does not take into consideration the potential dilutive effect of convertible debentures of the Corporation in 2018 and 2017 since their impact is anti-dilutive.

.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS

(a) Non-controlling interests acquisitions

2018

In 2018, the Corporation increased its interest in Quebecor Media from 81.5% to 100.0% as a result of the following transactions:

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), for a total aggregate purchase price of $1.54 billion, paid in cash. Cash on hand and drawings under the Videotron secured revolving credit facility were used to finance this transaction.
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital, in consideration of the issuance by the Corporation to CDP Capital of $150.0 million aggregate principal amount of convertible debentures (note 22).

The purchase of CDP Capital's minority interest in Quebecor Media was accounted for as an equity transaction. The excess of $1,217.4 million of the purchase price over the carrying value of non-controlling interests of $472.6 million acquired was recorded as a $1,198.2 million decrease of retained earnings and as a $19.2 million increase of accumulated other comprehensive loss.

2017

- On July 6, 2017, Quebecor Media repurchased and cancelled 541,899 of its Common Shares held by CDP Capital for an amount of $37.7 million. On the same day, Quebecor Media also paid off a security held by CDP Capital for an amount of $6.2 million. This transaction resulted in an increase in the Corporation's interest in Quebecor Media from 81.1% to 81.5% and was accounted for as an equity transaction. Accordingly, the $27.0 million excess of the shares repurchase value and the security payment over the carrying value of non-controlling interests acquired, in the amount of $17.8 million, was recorded as a $25.7 million reduction in retained earnings and as a $0.4 million increase in accumulated other comprehensive loss.

(b) Business acquisitions

2018

- In 2018, the Corporation acquired businesses, included in the Media segment and in the Sport and Entertainment segment, for a total cash consideration of $10.3 million.

2017

- In 2017, the Corporation acquired a business, included in the Sports and Entertainment segment, for a cash consideration of $0.2 million.
- In 2017, a purchase price balance of $5.6 million was paid relating to a prior year business acquisition.

An amount of $0.6 million of goodwill is deductible for tax purposes in 2018 (none in 2017).

The cost of internally generated intangible assets, mainly composed of software, was $593.0 million as of December 31, 2018 ($566.5 million as of December 31, 2017). For the year ended December 31, 2018, the Corporation recorded additions of internally generated intangible assets of $43.4 million ($70.5 million in 2017).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $360.6 million as of December 31, 2018 ($323.3 million as of December 31, 2017). For the year ended December 31, 2018, the Corporation recorded $40.7 million in amortization on its internally generated intangible assets ($44.9 million in 2017). The net carrying value of internally generated intangible assets was $232.4 million as of December 31, 2018 ($243.2 million as of December 31, 2017).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU.

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. GOODWILL (continued)

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method.

The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

		2018		2017
CGU groups[1]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications	**9.0 %**	**2.5 %**	8.5 %	2.5 %
Magazines	**–**	**–**	15.5	(2.0)
Other	**11.5 to 16.50**	**0.0 to 2.0**	12.0 to 16.5	0.0 to 2.0

1 In 2018 and 2017, the recoverable amounts of all CGUs were based on value in use, using the discounted cash flow method.

Sensitivity of recoverable amounts

No reasonable changes in the discount rate or in the perpetual growth rate used in the most recent test performed would have caused the recoverable amount of the Telecommunication CGU to equal its carrying value.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. OTHER ASSETS

	2018	2017 (restated, note 1(b))
Contract assets[1]	**$ 204.9**	$ 183.6
Contract costs[2]	**103.0**	102.9
Programs, broadcast and distribution rights	**120.3**	121.4
Other	**48.5**	44.2
	476.7	452.1
Less current portion of contract assets	**(144.4)**	(132.8)
Less current portion of contract costs (included in “Other current assets”)	**(53.4)**	(55.9)
Less current portion of program, broadcast and distribution rights (included in “Inventories”)	**(77.3)**	(78.3)
	$ 201.6	$ 185.1

[1] Impairment loss on contract assets resulting from mobile contracts being cancelled prior their initial term amounted to $25.8 million in 2018 ($16.1 million in 2017), net of the early termination penalty charged to the customer. In current and comparative periods, there were no significant cumulative catch-up adjustments to revenue that affected the corresponding contract asset, including adjustments arising from a change in an estimate of the transaction price or a contract modification. There were also no significant changes in the time frame for a performance obligation to be satisfied.

[2] Amortization amounted to $63.2 million in 2018 ($59.4 million in 2017).

19. ACCOUNTS PAYABLE AND ACCRUED CHARGES

	2018	2017
Trade and accruals	**$ 619.5**	$ 516.3
Salaries and employee benefits	**140.6**	144.0
Interest payable	**50.5**	53.8

20. PROVISIONS AND CONTINGENCIES

	Restructuring of operations	Contingencies, legal disputes and other	Total
Balance as of December 31, 2017	$ 5.9	$ 38.8	$ 44.7
Recognized in income	14.9	8.5	23.4
Payments	(13.8)	(1.7)	(15.5)
Other	–	0.9	0.9
Balance as of December 31, 2018	**$ 7.0**	**$ 46.5**	**$ 53.5**
Current portion	**$ 4.8**	**$ 28.7**	**$ 33.5**
Non-current portion (included in “Other liabilities”)	**2.2**	**17.8**	**20.0**

The recognition of provisions, in terms of both timing and amounts, requires the exercise of judgment based on relevant circumstances and events that can be subject to change over time. Provisions are primarily comprised of the following:

Restructuring of operations

Provisions for restructuring activities primarily cover severance payments related to initiatives to eliminate positions.

Contingencies and legal disputes

There are a number of legal proceedings against the Corporation that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on the Corporation’s results or on its financial position. Management of the Corporation, after taking legal advice, has established provisions for specific claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

Other

Other provisions are principally related to decommissioning obligations.

21. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2020 in an amount of $50.0 million ($300.0 million in 2017). The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares owned of Quebecor Media. As of December 31, 2018, $5.0 million had been drawn on the secured revolving credit facility ($175.6 million in 2017).

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in October 2022. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facilities of Quebecor Media are comprised of a US$350.0 million secured term loan "B" facility that matures in August 2020 and is bearing interest at LIBOR plus a premium of 2.25% and a $300.0 million secured revolving credit facility that matures in July 2020 and is bearing interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The term loan "B" facility provides for quarterly amortization payments totaling 1.00% per annum of the original principal amount, with the balance payable on August 17, 2020. These credit facilities contain covenants such as maintaining certain financial ratios, limitations on Quebecor Media ability to incur additional indebtedness, pay dividends, and make other distributions. They are secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2018, the credit facilities were secured by assets with a carrying value of $1,707.0 million ($3,045.4 million in 2017). As of December 31, 2018, and 2017, no amount had been drawn on the revolving credit facility, and as of December 31, 2018, $451.7 million was outstanding on the term loan "B" ($420.4 million in 2017).

On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility to extend the maturity date to July 2022 and to change certain conditions and terms of the facility.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(v) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Senior Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2018:

Principal amount	Annual nominal interest rate	Effective interest rate (after discount or premium at issuance)	Maturity date	Interest payable every 6 months on
Quebecor Media				
US$ 850.0	5.750 %	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	6.625 %	January 15, 2023	June and December 15
Videotron				
US$ 800.0	5.000 %	5.000 %	July 15, 2022	January and July 15
US$ 600.0	5.375 %	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	5.625 %	June 15, 2025	April and October 15
$ 375.0	5.750 %	5.750 %	January 15, 2026	March and September 15
US$ 600.0[1]	5.125 %	5.125 %	April 15, 2027	April and October 15

[1] The Notes were issued in April 2017 for net proceeds of $794.5 million, net of financing fees of $9.9 million.

(vi) The debts of these subsidiaries are non-recourse to Quebecor Media.

(vii) The bank credit facility provides for a $1,500.0 million ($965.0 million in 2017) secured revolving credit facility that matures in July 2023. The revolving credit facility bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a margin, depending on Videotron's leverage ratio. The bank credit facility is secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2018, the bank credit facility was secured by assets with a carrying value of $7,639.2 million ($6,665.7 million in 2017). The bank credit facility contains covenants such as maintaining certain financial ratios, limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2018, $742.0 million had been drawn on the secured revolving credit facility (no amount was drawn in 2017, while $5.4 million was outstanding in 2017 on an export financing facility that matured in June 2018).

In December 2018, Videotron entered into new unsecured on demand credit facilities, under which letters of credit were issued and filed with ISED Canada as pre-auction financial deposits in respect to its application to participate to the 600 MHz spectrum auction. Under ISED Canada published rules respecting restrictions on communications during the auction process, it is strictly forbidden for the Corporation to disclose the amount of the letters of credit, which can be withdrawn by Videotron at anytime prior to the auction commencement.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

21. LONG-TERM DEBT (continued)

(viii) The bank credit facilities of TVA Group comprise a secured revolving credit facility in the amount of $150.0 million, maturing in February 2019, and a secured term loan in the amount of $75.0 million, maturing in November 2019. TVA Group's revolving credit facility bears interest at floating rates based on Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate plus a premium determined by a leverage ratio. The term loan bears interest at floating rates based on Bankers' acceptance rate or Canadian prime rate plus a premium determined by a leverage ratio. The term loan provides for quarterly amortization payments commencing on December 20, 2015. The bank credit facilities contain covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. They are secured by liens on all of its movable assets and an immovable hypothec on its Head Office building. As of December 31, 2018 and 2017, no amount had been drawn on the revolving credit facility, and as of December 31, 2018, $52.9 million was outstanding on the term loan ($62.9 million in 2017).

On February 13, 2019, TVA Group amended its $150.0 million secured revolving credit facility to extend the maturity date to February 2020 and to change certain conditions and terms of the facility.

On December 31, 2018, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2019	$ 57.9
2020	454.4
2021	1.4
2022	1,135.5
2023	2,401.2
2024 and thereafter	2,411.3

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

22. CONVERTIBLE DEBENTURES

	Interest rate			2018		2017
Convertible Debentures maturing June 2024 (i), (ii)	4.00	%	**$**	**150.0**	$	–
Convertible Debentures maturing October 2018 (i), (iii)	4.125	%		**–**		450.0
			$	**150.0**	$	450.0

(i) Interest on the convertible debentures is payable semi-annually in cash, in Quebecor Class B Subordinate Voting Shares ("Quebecor Class B Shares") or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B share, subject to a floor price per share and a ceiling price per share. At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

(ii) On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. The convertible debentures are convertible into Quebecor Class B Shares in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture.

(iii) The outstanding 4.125% convertible debentures due October 15, 2018 for an aggregate principal amount of $450.0 million as of December 31, 2017 were redeemed in 2018 as a result of the following transactions:

- In February and May 2018, the Corporation issued notices of redemption of its 4.125% convertible debentures for a total aggregate principal amount of $87.5 million. Redemption prices were paid in cash upon redemption of these debentures.
- On August 21, 2018, the Corporation issued a notice of redemption on October 12, 2018 of all its remaining outstanding 4.125% convertible debentures for a total aggregate principal amount of $362.5 million. Pursuant to the terms of the convertible debentures, the Corporation elected to exercise its share redemption payment right with respect to the entire outstanding debentures. Consequently, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018 (note 24).

On July 14, 2017, Quebecor received a notice of conversion of an aggregate principal amount of $50.0 million of convertible debentures due October 15, 2018. The Corporation exercised its option to pay in cash.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

22. CONVERTIBLE DEBENTURES (continued)

The convertible debentures are presented separately as a financial liability and the cap and floor feature are presented as embedded derivatives. The fair value of these embedded derivatives as of December 31, 2018 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 2.07% (1.51% in 2017), a dividend yield of 0.77% (0.46% in 2017), and an expected volatility of 18.25% (13.80% in 2017). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2018 would have increased the loss on embedded derivatives related to convertible debentures by $3.9 million, while a one dollar decrease in the market price of a Quebecor Class B share would have decreased the loss by $3.9 million.

23. OTHER LIABILITIES

	Note		2018		2017
Defined benefit plans	31	$	**164.6**	$	149.4
Embedded derivatives related to convertible debentures	22		**5.2**		–
Deferred revenues			**14.6**		17.4
Stock-based compensation[1]	25		**20.5**		15.3
Other[2]			**35.1**		33.7
		$	**240.0**	$	215.8

[1] The current $21.4 million portion of stock-based compensation is included in accounts payable and accrued charges ($24.6 million in 2017) (note 19).

[2] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal nominal amount outstanding of $844.9 million as of December 31, 2018 and 2017 and a combined carrying value of $2.1 million as of December 31, 2018 and 2017. Exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligation without any consideration.

24. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2016	77,596,544	$ 8.6	166,111,184	$ 314.7
Class A Shares converted into Class B Shares	(216,600)	–	216,600	–
Shares purchased and cancelled	–	–	(5,590,700)	(10.5)
Shares issued upon exercise of stock options	–	–	100,000	1.1
Balance as of December 31, 2017	77,379,944	8.6	160,837,084	305.3
Class A Shares converted into Class B Shares	(130,700)	–	130,700	–
Shares purchased and cancelled	–	–	(11,390,300)	(34.1)
Shares issued upon exercise of stock option	–	–	100,000	1.3
Shares issued upon redemption of convertible debentures (note 22 (iii))	–	–	30,129,869	784.8
Balance as of December 31, 2018	**77,249,244**	**$ 8.6**	**179,807,353**	**$ 1,057.3**

On August 8, 2018, the Corporation filed normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 7,800,000 Class B Shares representing approximately 5% of issued and outstanding Class B Shares as of August 1, 2018. The purchases can be made from August 15, 2018 to August 14, 2019 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2018, the Corporation purchased and cancelled 11,390,300 Class B Shares for a total cash consideration of $291.7 million (5,590,700 Class B Shares for a total cash consideration of $127.5 million in 2017). The excess of $257.6 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2018 ($117.0 million in 2017).

In 2018, 100,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $1.3 million (100,000 Class B Shares for a cash consideration of $1.1 million in 2017). As a result of this transaction, contributed surplus was increased by $1.2 million ($1.2 million in 2017) and stock-based compensation liability was reduced by the same amount.

On March 12, 2019, the Board of Directors of the Corporation declared a dividend of $0.055 per share on Class A Shares and Class B Shares, or approximately $14.1 million, payable on April 23, 2019 to shareholders of record at the close of business on March 29, 2019.

25. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 26,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of Quebecor. The exercise price of each option is equal to the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. As per the provisions of the plan, options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. Holders of options have committed to obtain the consent of the Corporation before exercising their right to subscribe the shares for which they exercise their options.

The following table gives details on changes to outstanding options for the years ended December 31, 2018 and 2017:

		2018		2017
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**780,000**	**$ 12.25**	2,620,000	$ 12.68
Granted	**1,322,892**	**26.52**	–	–
Exercised	**(100,000)**	**12.75**	(1,260,000)	12.82
Cancelled	**(20,000)**	**26.52**	(580,000)	12.97
Balance at end of year	**1,982,892**	**$ 21.60**	780,000	$ 12.25
Vested options at end of year	**680,000**	**$ 12.17**	686,666	$ 11.97

During the year ended December 31, 2018, 100,000 Class B Shares of the Corporation were issued upon exercise of stock options (100,000 Class B Shares issued in 2017) (note 24). In 2017, 1,160,000 of the Corporation's stock options were exercised for a cash consideration of $8.2 million.

The following table gives summary information on outstanding options as of December 31, 2018:

		Outstanding options		**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$11.11 to 15.12	680,000	4.78	$ 12.17	680,000	$ 12.17
$26.52	1,302,892	9.78	26.52	–	–
$11.11 to 26.52	**1,982,892**	**7.28**	**$ 21.60**	**680,000**	**$ 12.17**

25. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Mid-term stock-based compensation plan

Under a mid-term stock-based compensation plan, participants are entitled to receive a cash payment at the end of a three-year period based on the appreciation of the Quebecor Class B share price, and subject to the achievement of certain non-market performance criteria. All the 187,220 units outstanding as of December 31, 2017 were exercised in 2018 for a cash consideration of $1.6 million (2,281,882 units for a cash consideration of $9.8 million in 2017).

(iii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of Corporation’s directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on Quebecor Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of Quebecor Class B Shares on the date of redemption. As of December 31, 2018, and 2017, the total number of DSUs outstanding under this plan was 351,861 and 341,750, respectively.

(b) Quebecor Media stock option plan

Under a stock option plan established by the Quebecor Media 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

The following table gives details on changes to outstanding options granted as of December 31, 2018 and 2017:

		2018		2017
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**595,827**	**$ 62.84**	980,905	$ 61.71
Exercised	**(263,227)**	**60.31**	(215,978)	59.40
Cancelled	**(14,200)**	**70.06**	(169,100)	60.65
Balance at end of year	**318,400**	**$ 64.61**	595,827	$ 62.84
Vested options at end of year	**170,500**	**$ 61.07**	226,200	$ 58.78

During the year ended December 31, 2018, 263,227 of the Quebecor Media's stock options were exercised for a cash consideration of $10.7 million (215,978 stock options for $5.5 million in 2017).

The following table gives summary information on outstanding options as of December 31, 2018:

	Outstanding options			**Vested options**	
Range of exercise price	**Number**	**Weighted average years to maturity**	**Weighted average exercise price**	**Number**	**Weighted average exercise price**
$50.10 to 57.64	103,350	5.70	$ 56.05	40,500	$ 55,33

25. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Shares have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised. Holders of options have committed to obtain the consent of TVA Group before exercising their right to subscribe the shares for which they exercise their options.

The following table gives details on changes to outstanding options for the years ended December 31, 2018 and 2017:

		2018		2017
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**60,000**	**$ 6.85**	357,632	$ 12.71
Granted	**280,000**	**2.16**	–	–
Cancelled	**–**	**–**	(134,915)	12.86
Expired	**–**	**–**	(162,717)	14.75
Balance at end of year	**340,000**	**$ 2.99**	60,000	$ 6.85
Vested options at end of year	**36,000**	**$ 6,85**	24,000	$ 6.85

As of December 31, 2018, exercise prices of all outstanding options are from $2.16 to $6.85 and the average of years to maturity is 9.1.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(d) Deferred share unit and performance share unit plans

On July 10, 2016, TVA Group established a DSU plan and a PSU plan for its employees based on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans.

On July 13, 2016, Quebecor also established a DSU plan and a PSU plan for its employees and those of its subsidiaries. Both plans are based on Quebecor Class B Shares and, in the case of the DSU plan, also on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans. As of December 31, 2018, 171,551 DSUs based on Quebecor Class B Shares, 262,282 DSUs based on TVA Group Class B Shares, 253,421 PSUs based on Quebecor Class B Shares and 270,637 PSUs based on TVA Group Class B Shares were outstanding under these plans.

QUEBECOR INC.

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

25. STOCK-BASED COMPENSATION PLANS (continued)

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans as of December 31, 2018 and 2017:

December 31, 2018	**Quebecor**		**Quebecor Media**		**TVA Group**	
Risk-free interest rate	**2.04**	**%**	**1.97**	**%**	**2.06**	**%**
Distribution yield	**0.77**	**%**	**1.13**	**%**	**–**	**%**
Expected volatility	**17.79**	**%**	**16.11**	**%**	**47.07**	**%**
Expected remaining life	**4.3**	**years**	**1.5**	**years**	**5.2**	**years**

December 31, 2017	Quebecor		Quebecor Media		TVA Group	
Risk-free interest rate	1.83	%	1.80	%	1.97	%
Distribution yield	0.46	%	1.12	%	–	%
Expected volatility	17.58	%	16.70	%	50.78	%
Expected remaining life	2.4	years	2.3	years	3.6	years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(f) Liability of vested options

As of December 31, 2018, the liability for all vested options was \$16.4 million as calculated using the intrinsic value (\$15.9 million as of December 31, 2017).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2018, a consolidated charge related to all stock-based compensation plans was recorded in the amount of \$19.4 million (\$21.0 million in 2017).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

26. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2016	$ (69.8)	$ (36.3)	$ (106.1)
Other comprehensive income (loss)	58.3	(2.5)	55.8
Non-controlling interests acquisition	(0.2)	(0.2)	(0.4)
Balance as of December 31, 2017	(11.7)	(39.0)	(50.7)
Other comprehensive loss	(8.6)	(4.2)	(12.8)
Non-controlling interests acquisition (note 12)	(10.4)	(8.8)	(19.2)
Balance as of December 31, 2018	**$ (30.7)**	**$ (52.0)**	**$ (82.7)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivative financial instruments designated as cash flow hedges. The balance is expected to reverse over an 8 1/4-year period.

27. COMMITMENTS

The Corporation rents premises and equipment under operating leases and has entered into long-term commitments to purchase services, tangible and intangible assets, broadcasting rights, and to pay licences and royalties. The operating leases have various terms, escalation clauses, purchase options and renewal rights. The minimum payments for the coming years are as follows:

	Leases	Other commitments
2019	$ 44,5	$ 247.4
2020 to 2023	74,7	648.4
2024 and thereafter	73,7	455.7

The Corporation’s operating lease expenses amounted to $61.6 million in 2018 ($63.8 million in 2017).

28. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2018, the maximum exposure with respect to these guarantees was $19.3 million and no liability has been recorded in the consolidated balance sheets.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation’s subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock-in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2018 and 2017 are as follows:

	2018		2017	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,461.7)**	**$ (6,444.9)**	$ (5,572.1)	$ (5,883.3)
Convertible debentures[2]	**(150.6)**	**(150.6)**	(888.5)	(888.5)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**6.7**	**6.7**	(4.5)	(4.5)
Cross-currency interest rate swaps	**880.3**	**880.3**	562.2	562.2

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $840.6 million as of December 31, 2018 ($525.7 million in 2017) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $46.4 million as of December 31, 2018 ($32.0 million in 2017).

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2018, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2018, the provision for expected credit losses represented 2.7% of the gross amount of accounts receivable and contract assets (2.9% as of December 31, 2017), while 11.7% of trade receivable were 90 days past their billing date (11.3% as of December 31, 2017).

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management (continued)

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2018 and 2017:

		2018		2017
Balance at beginning of year	**$**	**21.1**	$	28.1
Changes in expected credit losses charged to income		**19.6**		21.6
Write-off		**(20.2)**		(28.6)
Balance at end of year	**$**	**20.5**	$	21.1

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.1 years as of December 31, 2018 (5.9 years as of December 31, 2017).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases, dividends to shareholders and dividends or distributions to non-controlling interests. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

QUEBECOR INC.

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2018, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 24.3**	$ 24.3	$ –	$ –	$ –
Accounts payable and accrued charges	**832.0**	832.0	–	–	–
Long-term debt[1]	**6,461.7**	57.9	455.8	3,536.7	2,411.3
Convertible debentures[2]	**150.0**	–	–	–	150.0
Interest payments[3]	**1,546.9**	260.8	595.7	443.4	247.0
Derivative financial instruments[4]	**(892.7)**	0.2	(105.1)	(618.1)	(169.7)
Total	**$ 8,122.2**	**$ 1,175.2**	**$ 946.4**	**$ 3,362.0**	**$ 2,638.6**

[1] The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

[2] Based on the market value at December 31, 2018 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $26.85 per share and a ceiling price of $33.5625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

[3] Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2018.

[4] Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

<u>Foreign currency risk</u>

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2018, and to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2018 is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10	$ **1.3**	$ **34.8**
Decrease of $0.10	**(1.3)**	**(34.8)**

A variance of $0.10 in the 2018 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $2.4 million on the value of unhedged purchase of goods and services and $4.4 million on the value of unhedged acquisitions of tangible and intangible assets in 2018.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2018, after taking into account the hedging instruments, long-term debt was comprised of 76.3% fixed-rate debt (84.7% in 2017) and 23.7% floating-rate debt (15.3% in 2017).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2018 was $13.2 million.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures (note 22), as of December 31, 2018, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	$ **(1.9)**	$ **(28.1)**
Decrease of 100 basis points	**1.9**	**28.1**

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2018 and 2017 is as follows:

	2018	2017
Bank indebtedness	**$ 24.3**	$ 0.8
Long-term debt	**6,428.2**	5,536.6
Embedded derivatives related to convertible debentures	**5.2**	442.2
Convertible debentures	**150.0**	450.0
Derivative financial instruments	**(887.0)**	(557.7)
Cash and cash equivalents	**(21.0)**	(864.9)
Net liabilities	**5,699.7**	5,007.0
Equity	**$ 577.9**	$ 1,409.0

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercompany transactions, and the declaration and payment of dividends or other distributions.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2018	2017
Salaries and short-term benefits	**$ 10.6**	$ 9.7
Share-based compensation	**8.1**	10.0
Other long-term benefits	**2.5**	10.1
	$ 21.2	$ 29.8

Operating transactions

The Corporation made sales to affiliated corporations in the amount of $2.8 million in 2018 and 2017. These transactions were accounted for at the consideration agreed between parties.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation’s pension plans are registered with a provincial or federal regulatory authority.

The Corporation’s funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation’s management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation’s rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation’s management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation’s funding requirement.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2018 and 2017:

	Pension benefits		Postretirement benefits	
	2018	2017	**2018**	2017
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,332.9**	$ 1,287.2	**$ 60.5**	$ 73.4
Service costs	**36.4**	33.9	**2.1**	1.9
Interest costs	**46.4**	50.3	**2.8**	2.9
Plan participants' contributions	**11.1**	11.5	**–**	–
Actuarial (gain) loss arising from:				
Financial assumptions	**(76.2)**	82.6	**20.5**	5.4
Demographic assumptions	**–**	(8.6)	**(12.3)**	–
Participant experience	**(1.3)**	4.6	**(0.5)**	(21.2)
Benefits and settlements paid	**(56.0)**	(73.6)	**(1.7)**	(1.9)
Plan transfer	**–**	(55.4)	**–**	–
Other	**1.2**	0.4	**–**	–
Benefit obligations at the end of the year	**$ 1,294.5**	$ 1,332.9	**$ 71.4**	$ 60.5

	Pension benefits		Postretirement benefits	
	2018	2017	**2018**	2017
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,267.3**	$ 1,244.4	**$ –**	$ –
Actual return on plan assets	**(37.5)**	106.5	**–**	–
Employer contributions	**34.9**	36.4	**1.7**	1.9
Plan participants' contributions	**11.1**	11.5	**–**	–
Administrative fees	**(2.5)**	(2.5)	**–**	–
Benefits and settlements paid	**(56.0)**	(73.6)	**(1.7)**	(1.9)
Plan transfer	**–**	(55.4)	**–**	–
Fair value of plan assets at the end of the year	**$ 1,217.3**	$ 1,267.3	**$ –**	$ –

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

As of December 31, 2018, the weighted average duration of defined benefit obligations was 15.6 years (16.5 years in 2017). The Corporation expects future benefit payments of $64.8 million in 2019.

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed**,** whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2018	2017
Equity securities:		
Canadian	**21.1 %**	23.6 %
Foreign	**31.2**	32.3
Debt securities	**46.6**	40.8
Other	**1.1**	3.3
	100.0 %	100.0 %

The fair value of equity and debt securities is based on quoted prices in an active market, while the fair value of other investments is not based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amounts recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		Postretirement benefits	
	2018	2017	**2018**	2017
Benefit obligations	**$ (1,294.5)**	$ (1,332.9)	**$ (71.4)**	$ (60.5)
Fair value of plan assets	**1,217.3**	1,267.3	**–**	–
Plan deficit	**(77.2)**	(65.6)	**(71.4)**	(60.5)
Asset limit and minimum funding adjustment	**(16.0)**	(20.4)	**–**	–
Net amount recognized[1]	**$ (93.2)**	$ (86.0)	**$ (71.4)**	$ (60.5)

[1] The net liability recognized for 2018 is $164.6 million and is included in "Other liabilities" (note 23) (an asset of $2.9 million was included in "Other assets" in 2017 and a liability of $149.4 million was included in "Other liabilities" in 2017).

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2018	2017	**2018**	2017
Actuarial gain (loss) on benefit obligations	**$ 77.5**	$ (78.6)	**$ (7.7)**	$ 15.8
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**(80.9)**	59.1	**–**	–
Asset limit and minimum funding adjustment	**5.0**	(0.1)	**–**	–
Re-measurements gain (loss) recorded in other comprehensive income	**$ 1.6**	$ (19.6)	**$ (7.7)**	$ 15.8

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2018	2017	**2018**	2017
Employee costs:				
Service costs	**$ 36.4**	$ 33.9	**$ 2.1**	$ 1.9
Administrative fees and other	**3.7**	3.0	**–**	–
Interest on net defined benefit liability	**3.9**	3.4	**2.8**	2.9
Net benefit costs	**$ 44.0**	$ 40.3	**$ 4.9**	$ 4.8

The expense related to defined contribution pension plans amounted to $19.8 million in 2018 ($17.6 million in 2017).

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $33.4 million in 2019, based on the most recent financial actuarial reports filed (contributions of $36.6 million were paid in 2018).

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions (continued)

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2018 and 2017 and current periodic benefit costs are as follows:

	Pension and postretirement benefits	
	2018	2017
Benefit obligations		
Rates as of year-end:		
Discount rate	**3.90 %**	3.50 %
Rate of compensation increase	**3.00**	3.00
Current periodic costs		
Rates as of preceding year-end:		
Discount rate	**3.50 %**	3.90 %
Rate of compensation increase	**3.00**	3.00

The assumed average retirement age of participants used was of 62 years in 2018 and 2017.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 7.9 % at the end of 2018. These costs, as per the estimate, are expected to decrease gradually over the next 10 years to 5.1% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $17.5 million and the postretirement benefits obligation by $1.5 million as of December 31, 2018. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2018 and 2017
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

32. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data centers operations for an amount of $261.6 million which was fully paid in cash at the date of transaction. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, an estimated gain on disposal of $118.0 million will be accounted for in the first quarter of 2019, while an amount of $53.0 million from the proceeds received at the date of transaction will be deferred in connection with the estimated present value of the future conditional adjustments. The amount deferred will be revaluated on a quarterly basis and any change will be recorded in income from discontinued operations.

In 2017, a gain of $14.6 million, was accounted for mainly for digital credits in connection with the English-language newspaper operations sold in 2015.

The results of operations and cash flows of these businesses were reclassified as discontinued operations in the consolidated statement of income and cash flows are as follows:

	2018	2017
Revenues	**$ 19.8**	$ 19.7
Expenses	**14.6**	14.8
Income taxes	**1.4**	1.3
Gain related to a business sold in 2015	**–**	(14.6)
Income from discontinued operations	**$ 3.8**	$ 18.2

	2018	2017
Cash flows related to operating activities	**$ 10.4**	$ 20.4
Cash flows related to investing activities	**(1.9)**	(3.5)
Cash flows provided by (used in) discontinued operations	**$ 8.5**	$ 16.9

Components of assets and liabilities classified as held for sale in the consolidated balance sheet are as follows:

	2018
Current assets	**$ 1.3**
Property, plant and equipment	**72.5**
Intangible assets and goodwill	**21.2**
Assets held for sale	**95.0**
Current liabilities held for sale	**(6.6)**
Net assets held for sale	**$ 88.4**

This is Exhibit 49 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2019 and 2018

MANAGEMENT’S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of Quebecor Inc. and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements and that assets are properly accounted for and safeguarded, and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the financial statements principally through its Audit Committee, consisting solely of outside directors. The Audit Committee reviews the annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit Committee meets with Quebecor Inc.’s management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

INDEPENDENT AUDITORS' REPORT

To the shareholders of
Quebecor Inc.

Opinion

We have audited the consolidated financial statements of Quebecor Inc. and its subsidiaries (the "Corporation"), which comprise the consolidated balance sheets as at December 31, 2019, 2018 and 2017, and the consolidated statements of income, comprehensive income, equity and cash flows for the years ended December 31, 2019 and 2018, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Corporation as at December 31, 2019, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2019 and 2018 in accordance with International Financial Reporting Standards (IFRSs).

Basis of opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Corporation in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information. The other information comprises

- Management's Discussion and Analysis.
- The information, other than the consolidated financial statements and our auditor's report thereon, in the Annual Report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The Annual Report is expected to be made available to us after the date of the auditor's report. If based on the work we will perform on this other information, we conclude there is a material misstatement of other information, we are required to report that fact to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Corporation's financial reporting process.

INDEPENDENT AUDITORS' REPORT

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Corporation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Corporation to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Corporation to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Corporation audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Lily Adam.

On March 11, 2020, the Board of Directors approved the consolidated financial statements for the years ended December 31, 2019, 2018 and 2017.

On behalf of the Board of Directors,

(signed)

The Right Honourable Brian Mulroney, P.C., C.C., LL.D.
Chairman of the Board

(signed)

Normand Provost
Director

QUEBECOR INC.
SEGMENTED INFORMATION

Years ended December 31, 2019 and 2018
(in millions of Canadian dollars)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with interests in Quebecor Media Inc. ("Quebecor Media") and in subsidiaries controlled by Quebecor Media. On June 22, 2018, Quebecor Media became a wholly owned subsidiary of the Corporation. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media Inc. refers to Quebecor Media Inc. and its subsidiaries. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	100.0 %	100.0 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

Additions to intangible assets	190.2	4.8	3.5	(1.1)	197.4

[1] The Chief Executive Officer uses adjusted EBITDA as the measure of profit to assess the performance of each segment. Adjusted EBITDA is referred to as a non-IFRS measure and is defined as net income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, income taxes and income from discontinued operations.

See accompanying notes to consolidated financial statements.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (notes 1(k) and 1(x)), the liability related to stock-based compensation (note 1(v)) and the net defined benefit liability (note 1(w)), and they are presented in Canadian dollars ("CAN dollars"), which is the currency of the primary economic environment in which the Corporation operates ("functional currency").

Comparative figures for the year ended December 31, 2018 have been restated to conform to the presentation adopted for the year ended December 31, 2019.

(b) Changes in accounting policies

(i) IFRS 16 – *Leases*

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related lease liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis.

The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income.

Principal payments of the lease liability are now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities.

The retrospective adoption of IFRS 16 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		2018
Purchase of goods and services	$	(44.2)
Depreciation and amortization		32.9
Financial expenses		8.5
Restructuring of operations, litigation and other items		(0.7)
Deferred income tax expense		0.9
Net income and comprehensive income	$	2.6
Net income and comprehensive income attributable to:		
Shareholders	$	2.2
Non-controlling interests		0.4

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Changes in accounting policies (continued)

(i) IFRS 16 – *Leases* (continued)

Consolidated balance sheets

Increase (decrease)	December 31, 2018	December 31, 2017
Other current assets	$ (2.2)	$ (2.2)
Property, plant and equipment	15.5	15.5
Right-of-use assets	112.6	133.5
Provisions	(1.5)	(1.4)
Lease liabilities[1]	144.4	167.9
Other liabilities	(4.3)	(3.4)
Deferred income tax liability	(3.3)	(4.3)
Deficit	9.2	7.2
Non-controlling interests	(0.2)	(4.8)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.8 million as of December 31, 2017.

(ii) IFRIC 23 - *Uncertainty over Income Tax Treatments*

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments.

The adoption of IFRIC 23 had no impact on the consolidated financial statements

(c) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent corporation’s ownership interest. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(d) Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation’s consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transaction. Translation gains and losses on monetary assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments.

(f) Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party's rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as “Deferred revenues” in the consolidated balance sheets. Deferred revenues are usually recognized as revenues in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- cable connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Revenue recognition (continued)

Media

The Media segment recognizes each of its main activities' revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment leasing revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;
- revenues from the sale of advertising in the form of venue signage or sponsorships, are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

(g) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Impairment of assets (continued)

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

(h) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

(i) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized either in other comprehensive income or directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(j) Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the term lease, less incentive payments received, using the Corporation incremental borrowing rate at that date or interest rate implicit in the lease. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interests on lease liabilities are recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments

Classification, recognition and measurement

Most of financial assets and liabilities are classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value through other comprehensive income or through profit or loss. Contingent consideration and future conditional adjustments arising from a business acquisition or disposal are measured at fair value at the transaction date with subsequent changes in fair value recorded in the consolidated statements of income.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.
- The Corporation has established a hedge ratio of one-for-one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

The Corporation measures and records the effectiveness of its hedging relationships as follows:

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(l) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(m) Tax credits and government assistance

The Corporation has access to several government programs designed to support production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, the Corporation receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

(n) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(o) Accounts receivable and contract assets

Accounts receivable and contract assets are presented net of a provision for expected credit losses. The Corporation is using the IFRS 9 expected credit losses method to estimate that provision, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions. Amounts receivable are written off when deemed uncollectible.

(p) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Inventories (continued)

In particular, inventories related to audiovisual content are accounted for as follows:

(i) Productions

Productions are accounted for at the lesser of cost and net realizable value. Cost includes direct employees and goods and services costs and general expenses allocated to each production. The production costs are charged to operating expenses when the productions are broadcast or using a method based on how future economic benefits from the productions will be generated.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined, (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are charged to operating expenses when televisual products and movies are broadcast over the contract period, using a method based on how future economic benefits from those rights will be generated.

Estimates of future revenues used to determine the net realizable value of inventories related to audiovisual content are examined periodically by management and revised as necessary. The carrying value of the related inventories is reduced to the net realizable value, if necessary, based on this assessment.

(q) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statements of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct cable and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful lives
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its cable distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets.

Videotron Ltd. ("Videotron") is engaged in an agreement to operate a shared LTE network in the Province of Québec and the Ottawa region.

(s) Goodwill and intangible assets

<u>Goodwill</u>

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(g)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(s) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development Canada, (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Broadcasting licences, trademarks and sport franchises also have an indefinite useful life and are not amortized. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships and other intangible assets acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful lives
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(t) Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(u) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

(v) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 23.

(w) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized; and;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(w) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive loss and in accumulated other comprehensive loss. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation; and
- changes in the net benefit asset limit or in the minimum funding liability.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services and health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(x) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(y) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 15.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(y) Use of estimates and judgments (continued)

(ii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 30.

(iii) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. More specifically, an assessment of the probable outcomes of legal proceedings or other contingencies is also required. Management expectations on the potential effect of the possible outcomes of legal disputes on the consolidated financial statements, is presented in note 27.

(iv) Contingent considerations and future conditional adjustment

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations and future conditional adjustments are based will be met in the future. The assessment of these contingent potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

(iii) Interpretation of laws and regulations

Interpretation of laws and regulation, including those of the Canadian Radio-television and Telecommunications Commission ("CRTC") and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions and income taxes in the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

7. INCOME TAXES (continued)

Changes in the net deferred income tax liability are as follows:

		2019		2018 (restated, note 1(b))
Balance at beginning of year	**$**	**(724.1)**	$	(711.7)
Recognized in income as continuing operations		**(97.8)**		(7.9)
Recognized in other comprehensive income		**16.6**		(4.0)
Business acquisitions		**(4.1)**		–
Discontinued operations and other		**(18.6)**		(0.5)
Balance at end of year	**$**	**(828.0)**	$	(724.1)
Deferred income tax asset	**$**	**31.2**	$	51.8
Deferred income tax liability		**(859.2)**		(775.9)
	$	**(828.0)**	$	(724.1)

As of December 31, 2019, the Corporation had loss carryforwards for income tax purposes of $14.9 million available to reduce future taxable income, that will expire between 2035 and 2039. These losses have been recognized. The Corporation also had capital losses of $638.5 million that can be carried forward indefinitely and applied only against future capital gains. All capital losses have been recognized.

There are no income tax consequences attached to the payment of dividends by the Corporation to its shareholders.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2019	2018 (restated, note 1(b))
Income from continuing operations attributable to shareholders	**$ 555.3**	$ 400.2
Impact of assumed conversion of stock options of subsidiaries	**(0.5)**	(0.8)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 554.8**	$ 399.4
Net income attributable to shareholders	**$ 652.8**	$ 403.7
Impact of assumed conversion of stock options of subsidiaries	**(0.5)**	(0.8)
Net income attributable to shareholders, adjusted for dilution effect	**$ 652.3**	$ 402.9
Weighted average number of shares outstanding (in millions)	**255.6**	239.3
Potentially dilutive effect of stock options of the Corporation (in millions)	**0.2**	0.5
Weighted average number of diluted shares outstanding (in millions)	**255.8**	239.8

During the year ended December 31, 2019, 515,000 options of TVA Group Inc.'s ("TVA Group") plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive (340,000 options of TVA Group's plan were excluded in 2018).

The diluted earnings per share calculation also does not take into consideration the potential dilutive effect of convertible debentures of the Corporation in 2019 and 2018 since their impact is anti-dilutive.

.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. NON-CONTROLLING INTERESTS AND BUSINESS ACQUISITIONS

(a) Non-controlling interests acquisitions

In 2018, the Corporation increased its interest in Quebecor Media from 81.5% to 100.0% as a result of the following transactions:

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), for a total aggregate purchase price of $1.54 billion, paid in cash. Cash on hand and drawings under the Videotron secured revolving credit facility were used to finance this transaction.
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital, in consideration of the issuance by the Corporation to CDP Capital of $150.0 million aggregate principal amount of convertible debentures (note 22).

The purchase of CDP Capital's minority interest in Quebecor Media was accounted for as an equity transaction. The excess of $1,221.6 million of the purchase price over the carrying value of non-controlling interests of $468.4 million acquired was recorded as a $1,202.4 million decrease of retained earnings and as a $19.2 million increase of accumulated other comprehensive loss.

(b) Business acquisitions

2019

- On February 13, 2019, TVA Group acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consist mainly of intangible assets and goodwill.
- On April 1, 2019, TVA Group acquired the Incendo Media inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An amount of $0.6 million relating to certain post-closing adjustment was also received during the third quarter of 2019. The purchase price is subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of intangible assets and goodwill.

2018

- In 2018, the Corporation acquired businesses, included in the Media segment and in the Sport and Entertainment segment, for a total cash consideration of $10.3 million.

10. ACCOUNTS RECEIVABLE

	2019	2018
Trade	**$ 461.0**	$ 468.0

Net carrying amount						
As of December 31, 2018	$ 475.8	$ 427.8	$ 55.4	$ 9.5	$ 166.8	$ 1,135.3
As of December 31, 2019	**$ 731.6**	**$ 533.1**	**$ 66.3**	**$ 9.5**	**$ 103.5**	**$ 1,444.0**

The cost of internally generated intangible assets, mainly composed of software, was $651.8 million as of December 31, 2019 ($593.0 million as of December 31, 2018). For the year ended December 31, 2019, the Corporation recorded additions of internally generated intangible assets of $65.2 million ($43.4 million in 2018).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $401.8 million as of December 31, 2019 ($360.6 million as of December 31, 2018). For the year ended December 31, 2019, the Corporation recorded $45.2 million in amortization on its internally generated intangible assets ($40.7 million in 2018). The net carrying value of internally generated intangible assets was $250.1 million as of December 31, 2019 ($232.4 million as of December 31, 2018).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU.

14. RIGHT-OF-USE ASSETS

Changes in the net carrying amount of right-of-use assets which mainly relates to leases of premises and vehicles, are as follows:

	2019	2018
		(restated, note 1(b))
Cost		
Balance at beginning of year	**$ 278.7**	$ 281.9
Additions financed with lease obligations	**33.9**	17.1
Retirement and other	**(12.7)**	(24.6)
Balance at end of year	**299.9**	274.4
Accumulated depreciation		
Balance at beginning of year	**166.1**	148.4
Depreciation	**35.5**	36.4
Retirement and other	**(12.1)**	(23.0)
Balance at end of year	**189.5**	161.8
Net carrying amount	**$ 110.4**	$ 112.6

The Corporation do not recognize right-of-use assets and lease liabilities for short-term leases and leases of low value assets.

15. GOODWILL

For the years ended December 31, 2019 and 2018, changes in the net carrying amount of goodwill are as follows:

	2019	2018
Cost		
Balance at beginning of year	**$ 5,671.1**	$ 5,688.6
Business acquisitions	**14.6**	2.1
Reclassification to assets held for sale	**–**	(19.6)
Balance at end of year	**5,685.7**	5,671.1
Accumulated impairment losses		
Balance at beginning and at end of year	**2,992.8**	2,992.8
Net carrying amount	**$ 2,692.9**	$ 2,678.3

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. GOODWILL (continued)

The net carrying amount of goodwill as of December 31, 2019 and 2018 was allocated to the following significant CGU groups:

	2019	2018
CGU groups		
Telecommunications	**$ 2,656.1**	$ 2,656.1
Other[1]	**36.8**	22.2
Total	**$ 2,692.9**	$ 2,678.3

[1] Includes mainly the CGUs related to Film and television activities, Book publishing and distribution activities, and Sports and Entertainment activities.

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method. The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

	2019		2018	
CGU groups[1]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications[2]	**9.0 %**	**2.5 %**	9.0 %	2.5 %
Other	**11.0 to 14.0**	**(1.0) to 2.0**	11.5 to 16.5	0.0 to 2.0

[1] In 2019 and 2018, the recoverable amounts of all CGUs were based on value in use, using the discounted cash flow method.

[2] The same recoverable amount used in the 2018 annual impairment test was used in 2019. Accordingly, pre-tax discount rate and perpetual growth rate are the same in 2019 and 2018.

No reasonable changes in the discount rate or in the perpetual growth rate used in the most recent test performed would have caused the recoverable amount of the Telecommunication CGU to equal its carrying value.

		582.8		493.5
Less current portion of contract assets		**(168.3)**		(144.4)
Less current portion of audiovisual content (included in “Inventories”)		**(119.3)**		(94.1)
Less current portion of contract costs (included in “Other current assets”)		**(54.5)**		(53.4)
	$	**240.7**	$	201.6

1 Impairment loss on contract assets resulting from mobile contracts being cancelled prior their initial term amounted to $19.7 million in 2019 ($25.8 million in 2018), net of the early termination penalty charged to the customer. In current and comparative periods, there were no significant cumulative catch-up adjustments to revenue that affected the corresponding contract asset, including adjustments arising from a change in an estimate of the transaction price or a contract modification. There were also no significant changes in the time frame for a performance obligation to be satisfied.

2 Amortization amounted to $63.6 million in 2019 ($63.2 million in 2018).

18. LONG-TERM DEBT (continued)

(i) The bank credit facility of Quebecor is a revolving credit facility maturing in 2020 in an amount of $50.0 million. The availability under this facility is dependent on the market value of a portion of the Corporation's interest in Quebecor Media. The credit agreement governing this credit facility contains covenants such as limiting its ability to incur additional indebtedness. The borrowed amounts bear interest at floating rates based on Bankers' acceptance rate, U.S. London Interbank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by a leverage ratio. The credit facility is secured by a limited number of shares of Quebecor Media. As of December 31, 2019, $11.0 million was drawn on the secured revolving credit facility ($5.0 million as of December 31, 2018).

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in October 2022. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facility of Quebecor Media provides for a $300.0 million secured revolving credit facility that matures in July 2022 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by Quebecor Media's leverage ratio. This credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Quebecor Media's ability to incur additional indebtedness, pay dividends, and make other distributions. It is secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2019, the credit facility was secured by assets with a carrying value of $1,727.4 million ($1,714.6 million in 2018). An amount of $9.0 million was drawn on the secured revolving credit facility as of December 31, 2019 (none as of December 31, 2018). An amount of $451.7 million was outstanding as of December 31, 2018 on a term loan "B" prepaid in 2019.

(v) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Senior Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2019:

Principal amount		Annual nominal interest rate	Maturity date	Interest payable every 6 months on
Quebecor Media				
US$	850.0	5.750 %	January 15, 2023	June and December 15
$	500.0	6.625 %	January 15, 2023	June and December 15
Videotron				
US$	800.0	5.000 %	July 15, 2022	January and July 15
US$	600.0	5.375 %	June 15, 2024	June and December 15
$	400.0	5.625 %	June 15, 2025	April and October 15
$	375.0	5.750 %	January 15, 2026	March and September 15
US$	600.0[1]	5.125 %	April 15, 2027	April and October 15
$	800.0[2]	4.500 %	January 15, 2030	April and October 15

[1] The Notes were issued in April 2017 for net proceeds of $794.5 million, net of financing fees of $9.9 million.

[2] The Notes were issued in October 2019 for net proceeds of $790.7 million, net of financing fees of $9.3 million.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. LONG-TERM DEBT (continued)

(vi) The debts of these subsidiaries are non-recourse to Quebecor Media.

(vii) The bank credit facility of Videotron provides for a $1,500.0 million secured revolving credit facility that matures in July 2023 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by Videotron's leverage ratio. The bank credit facility is secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2019, the bank credit facility was secured by assets with a carrying value of $8,062.9 million ($7,748.9 million in 2018). The bank credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2019, $89.3 million was drawn on the secured revolving credit facility ($742.0 million was drawn as of December 31, 2018).

(viii) The bank credit facility of TVA Group provides for a secured revolving credit facility in the amount of $150.0 million that matures in February 2020 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by TVA Group's leverage ratio. The bank credit facility contains covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. The credit facility is secured by liens on all of its movable assets and an immovable hypothec on its Head Office building. As of December 31, 2019, $44.9 million was drawn on the revolving credit facility (none as of December 31, 2018). An amount of $52.9 million was outstanding as of December 31, 2018 on a secured term loan repaid in 2019.

On February 21, 2020, TVA Group amended it secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions.

On December 31, 2019, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2020	$	57.2
2021		1.4
2022		1,092.7
2023		1,701.0
2024		779.4
2025 and thereafter		2,354.4

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. LONG-TERM DEBT (continued)

Changes in long-term debt are as follows:

	2019	2018
Balance at beginning of year	$ 6,428.2	$ 5,536.6
Net change under revolving facilities, net of financing fees	(589.5)	565.8
Issuance of long-term debt, net of financing fees	790.7	–
Repayment of long-term debt	(488.6)	(20.5)
Foreign currency translation	(198.2)	342.0
Amortization of financing fees ang long-term debt discount	8.1	7.1
Change in fair value related to hedged interest rate risk	6.6	(3.3)
Other	0.2	0.5
Balance at end of year	**$ 5,957.5**	$ 6,428.2

19. LEASE LIABILITIES

Changes in lease liabilities are as follows:

	2019	2018 (restated, note 1(b))
Balance at beginning of year	$ 144.4	$ 167.9
Lease obligations financing right-of-use assets	33.9	17.1
Repayments	(39.4)	(40.0)
Other	(1.0)	(0.6)
Balance at end of year	**$ 137.9**	$ 144.4

Interest rates on lease liabilities ranged from 0.6% to 9.3% as of December 31, 2019 and 2018.

Repayments of lease liabilities over the coming years are as follows:

2020	$ 31.3
2021	23.3
2022	17.4
2023	13.7
2024	8.6
2025 and thereafter	43.6

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. OTHER LIABILITIES

	Note		**2019**		2018
					(restated, note 1(b))
Defined benefit plans	30	**$**	**221.5**	$	164.6
Contingent considerations and future conditional adjustments			**57.4**		–
Other[1]			**92.3**		104.3
		$	**371.2**	$	268.9

[1] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal amount outstanding of $844.9 million as of December 31, 2019 and 2018 and a combined carrying value of $2.1 million as of December 31, 2019 and 2018. The exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligations without any consideration.

21. CONVERTIBLE DEBENTURES

	Interest rate		**2019**		2018
Convertible Debentures maturing June 2024 (i), (ii)	4.000 %	**$**	**150.0**	$	150.0
Convertible Debentures maturing October 2018 (i), (iii)	4.125 %		**–**		–
		$	**150.0**	$	150.0

(i) Interest on the convertible debentures is payable semi-annually in cash, in Quebecor Class B Subordinate Voting Shares ("Quebecor Class B Shares") or with the proceeds from the sale of Quebecor Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Quebecor Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Quebecor Class B share, subject to a floor price per share and a ceiling price per share. At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Quebecor Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Quebecor Class B Shares and (ii) the then current market price of a Quebecor Class B share.

21. CONVERTIBLE DEBENTURES (continued)

(ii) On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. The convertible debentures are convertible into Quebecor Class B Shares in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture.

(iii) The outstanding 4.125% convertible debentures due October 15, 2018 for an aggregate principal amount of $450.0 million as of December 31, 2017 were redeemed in 2018 as a result of the following transactions:

- In February and May 2018, the Corporation issued notices of redemption of its 4.125% convertible debentures for a total aggregate principal amount of $87.5 million. Redemption prices were paid in cash upon redemption of these debentures.
- On August 21, 2018, the Corporation issued a notice of redemption on October 12, 2018 of all its remaining outstanding 4.125% convertible debentures for a total aggregate principal amount of $362.5 million. Pursuant to the terms of the convertible debentures, the Corporation elected to exercise its share redemption payment right with respect to the entire outstanding debentures. Consequently, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018 (note 24).

The principal amount of the convertible debentures is presented separately as a financial liability and the conversion features related to the floor and ceiling prices are presented as embedded derivatives. The fair value of these embedded derivatives as of December 31, 2019 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 1.80% (2.07% in 2018), a dividend yield of 1.35% (0.77% in 2018), and an expected volatility of 18.08% (18.25% in 2018). A one dollar increase in the market price of a Quebecor Class B share as of December 31, 2019 would have increased the loss on embedded derivatives related to convertible debentures by $3.8 million, while a one dollar decrease in the market price of a Quebecor Class B share would have decreased the loss by $3.8 million.

22. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2017	77,379,944	$ 8.6	160,837,084	$ 305.3
Class A Shares converted into Class B Shares	(130,700)	–	130,700	–
Shares purchased and cancelled	–	–	(11,390,300)	(34.1)
Shares issued upon exercise of stock options	–	–	100,000	1.3
Shares issued upon redemption of convertible debentures (note 22 (iii))	–	–	30,129,869	784.8
Balance as of December 31, 2018	77,249,244	8.6	179,807,353	1,057.3
Class A Shares converted into Class B Shares	(35,410)	–	35,410	–
Shares purchased and cancelled	–	–	(3,107,356)	(18.3)
Shares issued upon exercise of stock option	–	–	680,000	8.3
Balance as of December 31, 2019	**77,213,834**	**$ 8.6**	**177,415,407**	**$ 1,047.3**

On August 7, 2019, the Corporation filed normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2019, the Corporation purchased and cancelled 3,107,356 Class B Shares for a total cash consideration of $94.6 million (11,390,300 Class B Shares for a total cash consideration of $291.7 million in 2018). The excess of $76.3 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in increase of deficit in 2019 ($257.6 million in 2018).

In 2019, 680,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $8.3 million (100,000 Class B Shares for a cash consideration of $1.3 million in 2018). As a result of this transaction, contributed surplus was increased by $12.7 million ($1.2 million in 2018) and stock-based compensation liability was reduced by the same amount.

On March 11, 2020, the Board of Directors of the Corporation declared a dividend of $0.20 per share on Class A Shares and Class B Shares, or approximately $50.8 million, payable on April 21, 2020, to shareholders of record at the close of business on March 27, 2020.

23. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 26,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of Quebecor. The exercise price of each option is equal to the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. As per the provisions of the plan, options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. Holders of options have committed to obtain the consent of the Corporation before exercising their right to subscribe the shares for which they exercise their options.

The following table gives details on changes to outstanding options for the years ended December 31, 2019 and 2018:

		2019		2018
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**1,982,892**	**$ 21.60**	780,000	$ 12.25
Granted	**1,403,250**	**31.61**	1,322,892	26.52
Exercised	**(680,000)**	**12.17**	(100,000)	12.75
Cancelled	**(201,250)**	**28.57**	(20,000)	26.52
Balance at end of year	**2,504,892**	**$ 29.21**	1,982,892	$ 21.60
Vested options at end of year	**–**	**$ –**	680,000	$ 12.17

During the year ended December 31, 2019, the Corporation issued 680,000 Class B Shares upon exercise of stock options (100,000 Class B Shares issued in 2018) (note 22).

As of December 31, 2019, exercise prices of all outstanding options are from $26.52 to $32.20 and the average of years to maturity is 9.1.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on Quebecor Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of Quebecor Class B Shares on the date of redemption. As of December 31, 2019, the total number of DSUs outstanding under this plan was 357,470.

(b) Quebecor Media stock option plan

Under a stock option plan established by the Quebecor Media 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

The following table gives details on changes to outstanding options granted as of December 31, 2019 and 2018:

	2019		2018	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**318,400**	**$ 64.61**	595,827	$ 62.84
Exercised	**(147,400)**	**62.41**	(263,227)	60.31
Cancelled	**(41,800)**	**69.91**	(14,200)	70.06
Balance at end of year	**129,200**	**$ 65.41**	318,400	$ 64.61
Vested options at end of year	**97,550**	**$ 63.74**	170,500	$ 61.07

During the year ended December 31, 2019, 147,400 of the Quebecor Media's stock options were exercised for a cash consideration of $7.4 million (263,227 stock options for $10.7 million in 2018).

As of December 31, 2019, exercise prices of all outstanding options are from $50.01 to $70.56 and the average of years to maturity is 4.5.

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Shares have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of TVA Group Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised. Holders of options have committed to obtain the consent of TVA Group before exercising their right to subscribe the shares for which they exercise their options.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan (continued)

The following table gives details on changes to outstanding options for the years ended December 31, 2019 and 2018:

		2019		2018
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**340,000**	**$ 2.99**	60,000	$ 6.85
Granted	**290,000**	**2.05**	280,000	2.16
Cancelled	**(115,000)**	**3.13**	–	–
Balance at end of year	**515,000**	**$ 2.43**	340,000	$ 2.99
Vested options at end of year	**28,000**	**$ 6.85**	36,000	$ 6.85

As of December 31, 2019, exercise prices of all outstanding options are from $2.05 to $6.85 and the average of years to maturity is 8.8.

(d) Deferred share unit and performance share unit plans

Quebecor established a DSU plan and PSU plan for its employees and those of its subsidiaries based on Quebecor Class B Shares and, in the case of the DSU plan, also on TVA Group Class B Shares. TVA Group also established a DSU plan and a PSU plan for its employees based on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans. As of December 31, 2019, 158,855 DSUs based on Quebecor Class B Shares, 231,286 DSUs based on TVA Group Class B Shares, 117,972 PSUs based on Quebecor Class B Shares and 131,129 PSUs based on TVA Group Class B Shares were outstanding under these plans. A cash consideration of $5.4 million was paid upon PSUs redemption in 2019.

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans:

December 31, 2019	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**1.80 %**	**1.79 %**	**1.80 %**
Distribution yield	**1.35 %**	**1.00 %**	**– %**
Expected volatility	**17.94 %**	**14.53 %**	**51.81 %**
Expected remaining life	**5.1 years**	**1.1 years**	**4.9 years**

December 31, 2018	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	2.04 %	1.97 %	2.06 %
Distribution yield	0.77 %	1.13 %	– %
Expected volatility	17.79 %	16.11 %	47.07 %
Expected remaining life	4.3 years	1.5 years	5.2 years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(f) Liability of vested options

As of December 31, 2019, the liability for all vested options was $6.0 million as calculated using the intrinsic value ($16.4 million as of December 31, 2018).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $13.6 million ($19.4 million in 2018).

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2017	$ (11.7)	$ (39.0)	$ (50.7)
Other comprehensive loss	(8.6)	(4.2)	(12.8)
Non-controlling interests acquisition	(10.4)	(8.8)	(19.2)
Balance as of December 31, 2018	(30.7)	(52.0)	(82.7)
Other comprehensive income (loss)	70.6	(52.0)	18.6
Balance as of December 31, 2019	**$ 39.9**	**$ (104.0)**	**$ (64.1)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivative financial instruments designated as cash flow hedges. The balance is expected to reverse over a 7 1/4-year period.

25. COMMITMENTS

The Corporation has entered into long-term commitments to purchase services, tangible and intangible assets, broadcasting rights, and to pay licences and royalties. The minimum payments for the coming years are as follows:

2020	$ 462.8
2021 to 2024	787.3
2025 and thereafter	422.2

26. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

27. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

On August 15, 2019, the CRTC issued an order finalizing the rates, retroactively to March 31, 2016, by which the large cable and telephone companies provide aggregated wholesale access to their high-speed internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation consolidated financial statements. The new proposed rates are substantially lower than interim rates and could represent a retrospective reduction in earnings of approximately $22.0 million (before income taxes) in 2019 and approximately $30.0 million (before income taxes) from March 31, 2016 to December 31, 2018. On September 13, 2019, a coalition of cable companies (including Videotron) and Bell Canada filed separate appeals of the CRTC's order with the Federal Court of Appeal arguing, among other things, that the order is marked by numerous errors of law and jurisdiction resulting in wholesale rates that are unreasonably low. The cable companies and Bell Canada also filed separate requests to stay the implementation of the order pending disposition of their appeals. On November 22, 2019, the leave to appeal was granted by the Federal Court of Appeal and the interim stay of the CRTC's order granted by this court on September 27, 2019, was extended until a final ruling by the Federal Court of Appeal is made. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation’s financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation’s activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency and (ii) to achieve a targeted balance of fixed- and floating-rate debts. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.3195	$ 139.2	US$ 105.5

(a) Description of derivative financial instruments (continued)

(ii) Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2019 and 2018 are as follows:

		2019		2018
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (5,986.1)**	**$ (6,376.2)**	$ (6,461.7)	$ (6,444.9)
Convertible debenture[2]	**(162.0)**	**(162.0)**	(150.6)	(150.6)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**(2.1)**	**(2.1)**	6.7	6.7
Cross-currency interest rate swaps	**679.8**	**679.8**	880.3	880.3

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $635.5 million as of December 31, 2019 ($840.6 million in 2018) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $42.2 million as of December 31, 2019 ($46.4 million in 2018).

QUEBECOR INC.

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2019, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2019, the provision for expected credit losses represented 2.5% of the gross amount of accounts receivable and contract assets (2.7% as of December 31, 2018), while 7.2 % of trade receivable were 90 days past their billing date (11.7% as of December 31, 2018).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2019 and 2018:

		2019		2018
Balance at beginning of year	**$**	**20.5**	$	21.1
Changes in expected credit losses charged to income		**18.8**		19.6
Write-off		**(19.7)**		(20.2)
Balance at end of year	**$**	**19.6**	$	20.5

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.2 years as of December 31, 2019 (5.1 years as of December 31, 2018).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases and dividends to shareholders. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2019, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt and on convertible debentures, and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	$ **29.4**	$ 29.4	$ –	$ –	$ –
Accounts payable and accrued charges	**793.7**	793.7	–	–	–
Long-term debt[1]	**5,986.1**	57.2	1,094.1	2,480.4	2,354.4
Convertible debentures[2]	**150.0**	–	–	150.0	–
Interest payments on long-term debt[3]	**1,514.9**	253.3	616.3	314.2	331.1
Lease liabilities	**137.9**	31.3	40.7	22.3	43.6
Interest payments on lease liabilities	**44.5**	6.5	9.2	6.2	22.6
Derivative financial instruments[4]	**(607.8)**	1.6	(236.6)	(397.8)	25.0
Total	**$ 8,048.7**	**$ 1,173.0**	**$ 1,523.7**	**$ 2,575.3**	**$ 2,776.7**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 Based on the market value at December 31, 2019 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $26.85 per share and a ceiling price of $33.5625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2019.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging on principal debt denominated in U.S. dollars.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways and mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2019, and to hedge its exposure on certain purchases of set-top boxes, gateways and mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2019 is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10	$ 1.2	$ 38.8
Decrease of $0.10	(1.2)	(38.8)

A variance of $0.10 in the 2019 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $2.9 million on the value of unhedged purchases of goods and services and $6.6 million on the value of unhedged acquisitions of tangible and intangible assets in 2019.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2019, after taking into account the hedging instruments, long-term debt was comprised of 93.9% fixed-rate debt (76.3% in 2018) and 6.1% floating-rate debt (23.7% in 2018).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2019 was $3.3 million.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures (note 21), as of December 31, 2019, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	$ (1.5)	$ (18.0)
Decrease of 100 basis points	1.5	18.0

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2019 and 2018 is as follows:

	2019	2018
Bank indebtedness	**$ 29.4**	$ 24.3
Long-term debt	**5,957.5**	6,428.2
Convertible debentures	**150.0**	150.0
Embedded derivatives related to convertible debentures	**15.8**	5.2
Lease liabilities	**137.9**	144.4
Derivative financial instruments	**(677.7)**	(887.0)
Cash and cash equivalents	**(14.0)**	(21.0)
Net liabilities	**5,598.9**	5,844.1
Equity	**$ 1,072.1**	$ 568.5

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercorporation transactions, and the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2019	2018
Salaries and short-term benefits	**$ 10.9**	$ 10.6
Share-based compensation	**4.9**	8.1
Other long-term benefits	**2.5**	2.5
	$ 18.3	$ 21.2

Operating transactions

The Corporation made sales to affiliated corporations in the amount of $3.8 million in 2019 ($2.8 million in 2018). These transactions were accounted for at the consideration agreed between parties.

30. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, various final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation's pension plans are registered with a provincial or federal regulatory authority.

The Corporation's funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation's management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation's rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation's management, or the Audit Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation's funding requirement.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2019 and 2018:

	Pension benefits		Postretirement benefits	
	2019	2018	**2019**	2018
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,294.5**	$ 1,332.9	**$ 71.4**	$ 60.5
Service costs	**30.4**	36.4	**2.3**	2.1
Interest costs	**51.9**	46.4	**2.6**	2.8
Plan participants' contributions	**10.0**	11.1	**–**	–
Actuarial loss (gain) arising from:				
Financial assumptions	**168.4**	(76.2)	**14.1**	20.5
Demographic assumptions	**6.4**	–	**0.3**	(12.3)
Participant experience	**(3.3)**	(1.3)	**(3.0)**	(0.5)
Benefits and settlements paid	**(67.5)**	(56.0)	**(1.6)**	(1.7)
Plan amendments and other	**1.9**	1.2	**(23.2)**	–
Benefit obligations at the end of the year	**$ 1,492.7**	$ 1,294.5	**$ 62.9**	$ 71.4
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,217.3**	$ 1,267.3	**$ –**	$ –
Actual return on plan assets	**155.9**	(37.5)	**–**	–
Employer contributions	**32.5**	34.9	**1.6**	1.7
Plan participants' contributions	**10.0**	11.1	**–**	–
Administrative fees	**(2.4)**	(2.5)	**–**	–
Benefits and settlements paid	**(67.5)**	(56.0)	**(1.6)**	(1.7)
Fair value of plan assets at the end of the year	**$ 1,345.8**	$ 1,217.3	**$ –**	$ –

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

As of December 31, 2019, the weighted average duration of defined benefit obligations was 15.5 years (15.6 years in 2018). The Corporation expects future benefit payments of $63.1 million in 2020.

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed**,** whereby a mix of equities and fixed-income investments is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2019		2018	
Equity securities:				
Canadian	**16.5**	**%**	21.1	%
Foreign	**25.4**		31.2	
Debt securities	**57.4**		46.6	
Other	**0.7**		1.1	
	100.0	**%**	100.0	%

The fair value of equity and debt securities is based on quoted prices in an active market, while the fair value of other investments is not based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amounts recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		**Postretirement benefits**	
	2019	2018	**2019**	2018
Benefit obligations	**$ (1,492.7)**	$ (1,294.5)	**$ (62.9)**	$ (71.4)
Fair value of plan assets	**1,345.8**	1,217.3	**–**	–
Plan deficit	**(146.9)**	(77.2)	**(62.9)**	(71.4)
Asset limit and minimum funding adjustment	**(11.7)**	(16.0)	**–**	–
Net amount recognized[1]	**$ (158.6)**	$ (93.2)	**$ (62.9)**	$ (71.4)

[1] The net liability recognized for 2019 is $221.5 million ($164.6 million in 2018) and is included in "Other liabilities" (note 20).

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2019	2018	**2019**	2018
Actuarial (loss) gain on benefit obligations	**$ (171.5)**	$ 77.5	**$ (11.4)**	$ (7.7)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**107.9**	(80.9)	**–**	–
Asset limit and minimum funding adjustment	**4.9**	5.0	**–**	–
Re-measurements (loss) gain recorded in other comprehensive income	**$ (58.7)**	$ 1.6	**$ (11.4)**	$ (7.7)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2019	2018	**2019**	2018
Employee costs:				
Service costs	**$ 30.4**	$ 36.4	**$ 2.3**	$ 2.1
Plan amendments, administrative fees and other	**4.4**	3.7	**(23.2)**	–
Interest on net defined benefit liability	**4.4**	3.9	**2.6**	2.8
Net benefit costs (gain)	**$ 39.2**	$ 44.0	**$ (18.3)**	$ 4.9

The expense related to defined contribution pension plans amounted to $19.6 million in 2019 ($19.8 million in 2018).

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $33.6 million in 2020, based on the most recent financial actuarial reports filed (contributions of $34.6 million were paid in 2019).

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2019 and 2018 and current periodic benefit costs are as follows:

	Pension and postretirement benefits	
	2019	2018
Benefit obligations		
Rates as of year-end:		
Discount rate	**3.10 %**	3.90 %
Rate of compensation increase	**3.00**	3.00
Current periodic costs		
Rates as of preceding year-end:		
Discount rate	**3.90 %**	3.50 %
Rate of compensation increase	**3.00**	3.00

The assumed average retirement age of participants used ranged from 59 to 62 years.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 7.60 % at the end of 2019. These costs, as per the estimate, are expected to decrease gradually over the next 8 years to 5.50% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $21.5 million and the postretirement benefits obligation by $1.3 million as of December 31, 2019. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data centers operations for an amount of $261.6 million which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments.

The results of operations and cash flows of this business were reclassified as discontinued operations in the consolidated statement of income and cash flows are as follows:

		2019		2018
Revenues	**$**	**1.5**	$	19.8
Expenses		**1.2**		14.6
Income taxes		**–**		1.4
Gain on disposal of a business, net of income taxes		**97.2**		–
Income from discontinued operations	**$**	**97.5**	$	3.8

		2019		2018
Cash flows related to operating activities	**$**	**(0.7)**	$	10.4
Cash flows related to investing activities		**–**		(1.9)
Cash flows (used in) provided by discontinued operations	**$**	**(0.7)**	$	8.5

Components of assets and liabilities classified as held for sale in the consolidated balance sheet are as follows:

		2018
Current assets	$	1.3
Property, plant and equipment		72.5
Intangible assets and goodwill		21.2
Assets held for sale		95.0
Current liabilities held for sale		(6.6)
Net assets held for sale	$	88.4

This is Exhibit 50 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2020 and 2019

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of Quebecor Inc. and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements, that assets are properly accounted for and safeguarded and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the consolidated financial statements principally through its Audit and Risk Management Committee, consisting solely of outside directors. The Audit and Risk Management Committee reviews the annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit and Risk Management Committee meets with Quebecor Inc.'s management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit and Risk Management Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Quebecor Inc.

Opinion

We have audited the consolidated financial statements of Quebecor Inc. and its subsidiaries (the "Corporation"), which comprise the consolidated balance sheets as at December 31, 2020 and 2019, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Corporation as at December 31, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Corporation in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key Audit Matter	How our audit addressed the key audit matter
Timing of revenue recognition from subscriber services in the Telecommunications segment	
As disclosed in Note 1 (e) to the consolidated financial statements, the Telecommunications segment recognizes revenue from subscriber services, such as television distribution, Internet access and wireline and mobile telephony, when the services are provided. Operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided, and the portion of revenues that is invoiced and unearned is presented as deferred revenue. The Corporation recognized $3,622.6 million of revenues for the year ended December 31, 2020 related to these services.	To test the timing of revenue recognition from subscriber services, our audit procedures included, among others, the following: • We obtained an understanding, evaluated the design, and tested the operating effectiveness of manual controls, as well as the application controls and the IT general controls with the assistance of our IT specialists, related to the timing of revenue recognition for Telecommunications subscriber services; • We reperformed management's calculation of the entire deferred revenue balance related to these subscriber services as of December 31, 2020;

INDEPENDENT AUDITOR'S REPORT (continued)

The Corporation's revenue recognition process involves several information technology ("IT") applications responsible for the initiation, processing, and recording of transactions from the Corporation's various customers, and the calculation and allocation of revenue by service in accordance with the Corporation's accounting policy. The timing of revenue recognition is considered a key audit matter due to the complexity in our audit procedures considering the high volume of subscribers, each receiving different services with varying invoicing schedules.

- We tested a sample of the relevant data used for the calculation of the deferred revenue balance related to the Telecommunications subscriber services as of December 31, 2020, by comparing the invoice date, the invoice amount, and the types of services to the invoice and the related cash receipt;
- We corroborated, by agreeing to supporting documentation, the appropriateness of any manual entries posted to the deferred revenue accounts; and
- We independently developed expectations of revenue per user by service type and compared it to the average revenue per user by service type.

Capitalization of labor costs to property, plant and equipment and to intangible assets in the Telecommunications segment

As disclosed in Note 3 to the consolidated financial statements, $200.0 million of labor costs were capitalized to property, plant and equipment and to intangible assets during the year ended December 31, 2020, of which a significant portion relates to the Telecommunications segment.

Given the high volume of internal projects for which many employees are working on, the capitalization of labor costs is considered to be a key audit matter in the Telecommunications segment.

To test the capitalization of labor costs to property, plant and equipment and to intangible assets in the Telecommunications segment, our audit procedures included, among others, the following:

- We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls related to the capitalization of labor costs;
- We discussed with project managers, for a sample of significant projects, the nature of the project and the nature of the costs capitalized, and analyzed variances compared to the budget for each cost category, including labor costs. We corroborated variances compared to the budget to supporting documents such as invoices or employee timesheets;
- We corroborated time capitalized by comparing the number of hours worked by an employee on a specific project to the approved timesheet; and
- We also performed analytical procedures by comparing the proportion of internal labor per project to prior year.

INDEPENDENT AUDITOR'S REPORT (continued)

Other Information

Management is responsible for the other information. The other information comprises:

- Management's Discussion and Analysis;
- The information, other than the consolidated financial statements and our auditor's report thereon, in the Annual Report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The Annual Report is expected to be made available to us after the date of the auditor's report. If based on the work we will perform on this other information, we conclude there is a material misstatement of other information, we are required to report that fact to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Corporation's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

INDEPENDENT AUDITOR'S REPORT (continued)

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Corporation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Corporation to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Corporation to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Lily Adam.

On behalf of the Board of Directors,

(signed)

The Right Honourable Brian Mulroney, P.C., C.C., LL.D.
Chairman of the Board

(signed)

Normand Provost
Director

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	100.0 %	100.0 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter segment sales. Transactions between segments are measured at exchange amounts between the parties.

COVID-19 pandemic

The COVID-19 pandemic is having a significant impact on the economic environment in Canada and around the world. On March 13, 2020, in order to limit the spread of the virus, the Québec government imposed a number of restrictions and special preventive measures, including the suspension of business activities deemed non-essential, across Québec. The Québec government subsequently implemented a gradual reopening plan, which was followed at the end of December 2020 by new restrictions and the suspension of some business activities due to the second wave of the pandemic. This health crisis curtailed the operations of many of Quebecor's business partners and led to a significant slowdown in some of the Corporation's segments in 2020. Among other impacts, the restrictions and preventive measures imposed by the Québec government caused a significant reduction in volume at Videotron Ltd.'s ("Videotron") retail outlets and delays in client migration to its new Helix entertainment and home management platform; lower advertising revenues, a significant decrease in sports events broadcast by the TVA Sports specialty channel, and reduced film and audiovisual content activity in the Media segment; and the cancellation of most shows and events and the interruption of music and book distribution activities in the Sports and Entertainment segment. Despite the constraints created by this pandemic, Quebecor has continued and will continue to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Because of the slowdown in the economy, approximately 10% of Quebecor's workforce have received benefits in 2020 under the Corporation's assistance program. During the health crisis, this program provides financial assistance to employees temporarily laid off or to employees on stand-by in addition to the Canadian wage subsidy programs. Due to significant decreases in their revenues, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Emergency Wage Subsidy, and subsidies totalling $49.6 million were recorded in 2020 as a reduction in employee costs. Given the uncertainty about the evolution of the pandemic, the full impact of the health crisis over its duration cannot be determined with certainty.

1 The Chief Executive Officer uses adjusted EBITDA as the measure of profit to assess the performance of each segment. Adjusted EBITDA is referred as a non-IFRS measure and is defined as net income before depreciation and amortization, financial expenses, (gain) loss on valuation and translation of financial instruments, restructuring of operations and other items, income taxes and income from discontinued operations.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (notes 1(j) and 1(w)), the liability related to stock-based compensation (note 1(u)) and the net defined benefit liability (note 1(v)), and they are presented in Canadian dollars (“CAN dollars”), which is the currency of the primary economic environment in which the Corporation operates (“functional currency”).

Comparative figures for the year ended December 31, 2019 have been restated to conform to the presentation adopted for the year ended December 31, 2020.

(b) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent corporation’s ownership interest. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(c) Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Results of operations of a business acquired are included in the Corporation’s consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

(d) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transaction. Translation gains and losses on monetary assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party's rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as “Deferred revenue” in the consolidated balance sheets. Deferred revenue is usually recognized as revenue in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- operating revenues from subscriber services, such as television distribution, Internet access, wireline and mobile telephony, and over-the-top video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- wireline connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition (continued)

Media

The Media segment recognizes each of its main activities' revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment leasing revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;
- revenues from the sale of advertising in the form of venue signage or sponsorships, are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

(f) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Impairment of assets (continued)

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

(g) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

(h) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized either in other comprehensive income or directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation's operations, there are a number of uncertain tax positions due to the complexity of certain transactions and to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or that the income tax liability is no longer probable.

(i) Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the term lease, less incentive payments received, using the Corporation incremental borrowing rate at that date or interest rate implicit in the lease. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interests on lease liabilities are recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments

Classification, recognition and measurement

Most of financial assets and liabilities are classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value through other comprehensive income or through profit or loss. Contingent consideration and future conditional adjustments arising from a business acquisition or disposal are measured at fair value at the transaction date with subsequent changes in fair value recorded in the consolidated statements of income.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation has established a hedge ratio of one-for-one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

The Corporation measures and records the effectiveness of its hedging relationships as follows:

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financing fees

Financing fees related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(l) Tax credits and government assistance

The Corporation has access to several government programs designed to support large investment projects, production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Emergency Wage Subsidy program available during the health crisis related to the COVID-19. The Corporation also receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

(m) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers’ acceptances and term deposits.

(n) Accounts receivable and contract assets

Accounts receivable and contract assets are presented net of a provision for expected credit losses. The Corporation is using the IFRS 9 expected credit losses method to estimate that provision, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions. Amounts receivable are written off when deemed uncollectible.

(o) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Inventories (continued)

In particular, inventories related to audiovisual content are accounted for as follows:

(i) Productions

Productions are accounted for at the lesser of cost and net realizable value. Cost includes direct employees and goods and services costs and general expenses allocated to each production. The production costs are charged to operating expenses when the productions are broadcast or using a method based on how future economic benefits from the productions will be generated.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movies, series or right to broadcast a live event is known or can be reasonably determined, (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; and (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are charged to operating expenses when televisual products and movies are broadcast or distributed over the contract period, using a method based on how future economic benefits from those rights will be generated.

Estimates of future revenues used to determine the net realizable value of inventories related to audiovisual content are examined periodically by management and revised as necessary. The carrying value of the related inventories is reduced to the net realizable value, if necessary, based on this assessment.

(p) Long-term investments

Investments in companies subject to significant influence are accounted for using the equity method. Under the equity method, the share of the results of operations of the associated corporation is recorded in the consolidated statements of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government grants and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct wireline and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful lives
Buildings and leasehold improvements	10 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

The Corporation does not record any decommissioning obligations in connection with its wireline distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets.

Videotron is engaged in an agreement to operate a shared LTE network in the Province of Québec and the Ottawa region.

(r) Goodwill and intangible assets

Goodwill

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(f)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized based on the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development Canada, (ii) the Corporation has the financial and operational ability to renew these spectrum licences, (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Broadcasting licences, trademarks and sport franchises also have an indefinite useful life and are not amortized. These intangibles assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships and other intangible assets acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	Estimated useful lives
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(s) Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation’s telecommunication network are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(t) Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected, that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

(u) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units (“DSUs”) or performance share units (“PSUs”), or that call for settlement in cash at the option of the employee, as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 23.

(v) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees’ pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management’s best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized; and;
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive (loss) income and in accumulated other comprehensive (loss) income. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments on liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation; and
- changes in the net benefit asset limit or in the minimum funding liability.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services and health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(w) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(x) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 15.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(ii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and on the carrying value of other assets or other liabilities in the consolidated balance sheets. Key assumptions and a sensitivity analysis on the discount rate are presented in note 30.

(iii) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. It can also require an assessment of the probable outcomes of legal proceedings or other contingencies. Management expectations on the potential effect of the possible outcomes of legal disputes on the consolidated financial statements, is presented in note 27.

(iv) Contingent considerations and future conditional adjustments

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations and future conditional adjustments are based will be met in the future. The assessment of these contingent potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

(iii) Interpretation of laws and regulations

Interpretation of laws and regulation, including those of the Canadian Radio-television and Telecommunications Commission ("CRTC") and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions, income taxes and capital expenditures in the consolidated financial statements.

	2020	2019
(Gain) loss on embedded derivatives related to convertible debentures	**$ (9.3)**	$ 5.7
Other	**1.3**	0.8
	$ (8.0)	$ 6.5

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

In 2020, a charge of $30.7 million was recorded in connection with cost reduction initiatives in the Corporation's various segments ($9.8 million in 2019).

In 2020, an impairment charge on assets of $8.5 million was also recorded as a result of restructuring initiatives ($18.8 million in 2019).

7. INCOME TAXES

The following table reconciles income taxes at the Corporation's domestic statutory tax rate of 26.5% in 2020 (26.6% in 2019) and income taxes in the consolidated statements of income:

	2020	2019
Income taxes at domestic statutory tax rate	**$ 209.3**	$ 203.9
Increase (reduction) resulting from:		
Effect of non-deductible charges, non-taxable income and differences between current and future tax rates	**(3.6)**	1.1
Other	**0.1**	0.7
Income taxes	**$ 205.8**	$ 205.7

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

7. INCOME TAXES (continued)

The significant items comprising the Corporation's net deferred income tax liability and their impact on the deferred income tax expense are as follows:

	Consolidated balance sheets		Consolidated income statements	
	2020	2019	**2020**	2019
Loss carryforwards	**$ 79.2**	$ 81.1	**$ (2.8)**	$ 3.0
Defined benefit plans	**85.8**	58.4	**(4.9)**	3.9
Contract assets	**(65.5)**	(58.8)	**6.7**	4.5
Property, plant and equipment	**(467.6)**	(489.6)	**(22.0)**	8.6
Goodwill, intangible assets and other assets	**(322.9)**	(301.8)	**20.3**	64.3
Long-term debt, derivative financial instruments and exchangeable debentures	**(130.9)**	(137.8)	**(0.5)**	3.0
Other	**19.2**	20.5	**0.3**	10.5
	$ (802.7)	$ (828.0)	**$ (2.9)**	$ 97.8

Changes in the net deferred income tax liability are as follows:

	2020	2019
Balance at beginning of year	**$ (828.0)**	$ (724.1)
Recognized in income as continuing operations	**2.9**	(97.8)
Recognized in other comprehensive income	**28.9**	16.6
Business acquisitions	**(0.8)**	(4.1)
Discontinued operations and other	**(5.7)**	(18.6)
Balance at end of year	**$ (802.7)**	$ (828.0)
Deferred income tax asset	**$ 45.5**	$ 31.2
Deferred income tax liability	**(848.2)**	(859.2)
	$ (802.7)	$ (828.0)

As of December 31, 2020, the Corporation had loss carryforwards for income tax purposes of $18.0 million available to reduce future taxable income, that will expire between 2031 and 2040. These losses have been recognized. The Corporation also had capital losses of $609.1 million that can be carried forward indefinitely and applied only against future capital gains. All capital losses have been recognized.

There are no income tax consequences attached to the payment of dividends by the Corporation to its shareholders.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

		2020		2019
Income from continuing operations attributable to shareholders	**$**	**574.0**	$	555.3
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries		**(5.1)**		(0.5)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$**	**568.9**	$	554.8
Net income attributable to shareholders	**$**	**607.2**	$	652.8
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries		**(5.1)**		(0.5)
Net income attributable to shareholders, adjusted for dilution effect	**$**	**602.1**	$	652.3
Weighted average number of shares outstanding (in millions)		**251.6**		255.6
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)		**4.7**		0.2
Weighted average number of diluted shares outstanding (in millions)		**256.3**		255.8

During the year ended December 31, 2019, 515,000 options of TVA Group Inc. ("TVA Group") plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive.

The diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation in 2019 since their impact is anti-dilutive.

.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. BUSINESS ACQUISITIONS

2020

- On December 31, 2020, Videotron closed the acquisition of Télédistribution Amos inc. and its network in Abitibi-Témiscamingue for a cash consideration of $32.9 million, net of cash acquired of $0.1 million. The acquired assets consist mainly of the network, intangible assets and goodwill.
- On June 17, 2020, the Sports and Entertainment segment acquired the Théâtre Capitole, a concert hall in Québec, for a cash consideration of $10.8 million, net of an assumed working capital liability. The acquired assets consist mainly of the building and equipment.

2019

- On February 13, 2019, TVA Group acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consist mainly of intangible assets and goodwill.
- On April 1, 2019, TVA Group acquired the Incendo Media inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. A first payment of $3.4 million on the balance payable was made in the fourth quarter of 2020. An amount of $0.6 million relating to certain post-closing adjustment was also received during the third quarter of 2019. The purchase price is subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of intangible assets and goodwill.

10. ACCOUNTS RECEIVABLE

	2020	2019
Trade	**$ 496.6**	$ 461.0
Other	**104.0**	87.0
	$ 600.6	$ 548.0

11. INVENTORIES

	2020	2019
Audiovisual content	**$ 138.0**	$ 119.3
Finished goods	**83.6**	93.5
Raw materials and supplies	**29.1**	27.6
	$ 250.7	$ 240.4

Cost of inventories included in purchase of goods and services amounted to $744.4 million in 2020 ($721.8 million in 2019). Write-downs of inventories totalling $6.9 million were recognized in purchase of goods and services in 2020 ($6.3 million in 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. PROPERTY, PLANT AND EQUIPMENT

Changes in the net carrying amount of property, plant and equipment are as follows:

	Land, buildings and leasehold improvements	Machinery and equipment	Telecom-munication networks	Projects under development	Total
Cost					
Balance as of December 31, 2018	$ 613.2	$ 1,872.2	$ 6,009.2	$ 91.0	$ 8,585.6

Reclassification	–	129.0	(129.0)	–
Retirement, disposals and other	–	(21.7)	(4.9)	(26.6)
Balance as of December 31, 2020	**$ 979.3**	**$ 1,389.5**	**$ 372.3**	**$ 2,741.1**
Accumulated amortization and impairment losses				
Balance as of December 31, 2018	$ 247.7	$ 639.9	$ 166.6	$ 1,054.2
Amortization	–	105.2	11.5	116.7
Retirement, disposals and other	–	(7.5)	(4.9)	(12.4)
Balance as of December 31, 2019	247.7	737.6	173.2	1,158.5
Amortization	–	133.0	10.4	143.4
Retirement, disposals and other	–	(21.7)	(5.8)	(27.5)
Balance as of December 31, 2020	**$ 247.7**	**$ 848.9**	**$ 177.8**	**$ 1,274.4**
Net carrying amount				
As of December 31, 2019	$ 731.6	$ 533.1	$ 179.3	$ 1,444.0
As of December 31, 2020	**$ 731.6**	**$ 540.6**	**$ 194.5**	**$ 1,466.7**

[1] On April 10, 2019, Videotron acquired 10 spectrum licences in the 600 MHz band covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $255.8 million.

[2] Includes a $50.3 million government credit for large investment projects receivable in 2020.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. INTANGIBLE ASSETS (continued)

The cost of internally generated intangible assets, mainly composed of software, was $732.5 million as of December 31, 2020 ($651.8 million as of December 31, 2019). For the year ended December 31, 2020, the Corporation recorded additions of internally generated intangible assets of $98.6 million ($65.2 million in 2019).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, was $437.2 million as of December 31, 2020 ($401.8 million as of December 31, 2019). For the year ended December 31, 2020, the Corporation recorded $52.2 million in amortization on its internally generated intangible assets ($45.2 million in 2019). The net carrying value of internally generated intangible assets was $295.3 million as of December 31, 2020 ($250.1 million as of December 31, 2019).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU. The net carrying value of intangible assets with an indefinite useful life was $741.1 million as of December 31, 2020 and 2019.

14. RIGHT-OF-USE ASSETS

Changes in the net carrying amount of right-of-use assets which mainly relates to leases of premises and vehicles, are as follows:

	2020	2019
Cost		
Balance at beginning of year	**$ 304.8**	$ 283.6
Additions financed with lease obligations	**77.4**	33.9
Retirement and other	**(25.6)**	(12.7)
Balance at end of year	**356.6**	304.8
Accumulated depreciation		
Balance at beginning of year	**194.4**	171.0
Depreciation	**37.7**	35.5
Retirement and other	**(18.6)**	(12.1)
Balance at end of year	**213.5**	194.4
Net carrying amount	**$ 143.1**	$ 110.4

The Corporation do not recognize right-of-use assets and lease liabilities for short-term leases and leases of low value assets.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. GOODWILL

Changes in the net carrying amount of goodwill are as follows:

		2020		2019
Cost				
Balance at beginning of year	**$**	**5,685.7**	$	5,671.1
Business acquisitions		**21.1**		14.6
Balance at end of year		**5,706.8**		5,685.7
Accumulated impairment losses				
Balance at beginning and at end of year		**2,992.8**		2,992.8
Net carrying amount	**$**	**2,714.0**	$	2,692.9

The net carrying amount of goodwill as of December 31, 2020 and 2019 was allocated to the following significant CGU groups:

		2020		2019
CGU groups				
Telecommunications	**$**	**2,679.2**	$	2,656.1
Other[1]		**34.8**		36.8
Total	**$**	**2,714.0**	$	2,692.9

[1] Includes mainly the CGUs related to Film, audiovisual content and television activities, Book publishing and distribution activities, and Sports and Entertainment activities.

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of products and services offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. GOODWILL (continued)

Recoverable amounts (continued)

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method. The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

	2020		2019	
CGU groups[1]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications	**8.5 %**	**2.0 %**	9.0 %	2.5 %
Other	**10.5 to 15.5**	**0.0 to 2.0**	11.0 to 14.0	(1.0) to 2.0

1 In 2020 and 2019, the recoverable amounts of all CGUs were based on value in use, using the discounted cash flow method.

No reasonable changes in the discount rate or in the perpetual growth rate used in the most recent test performed would have caused the recoverable amount of the Telecommunication CGU to equal its carrying value.

16. OTHER ASSETS

	2020	2019
Contract assets[1]	**$ 247.2**	$ 221.5
Audiovisual content	**195.3**	174.0
Contract costs[2]	**148.2**	112.2
Other	**178.9**	75.1
	769.6	582.8
Less current portion of contract assets	**(174.9)**	(160.3)
Less current portion of audiovisual content (included in "Inventories")	**(138.0)**	(119.3)
Less current portion of contract costs (included in "Other current assets")	**(59.9)**	(54.5)
	$ 396.8	$ 248.7

1 Impairment loss on contract assets resulting from mobile contracts being cancelled prior their initial term amounted to $20.5 million in 2020 ($19.7 million in 2019), net of the early termination penalty charged to the customer. In current and comparative periods, there were no significant cumulative catch-up adjustments to revenue that affected the corresponding contract asset, including adjustments arising from a change in an estimate of the transaction price or a contract modification. There were also no significant changes in the time frame for a performance obligation to be satisfied.

2 Amortization amounted to $65.9 million in 2020 ($63.6 million in 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. ACCOUNTS PAYABLE, ACCRUED CHARGES AND PROVISIONS

	2020	2019
Trade and accruals	**$ 666.8**	$ 578.7
Salaries and employee benefits	**126.4**	145.8
Interest payable	**56.2**	57.0
Provisions	**18.4**	15.9
Stock-based compensation	**4.4**	12.2
	$ 872.2	$ 809.6

18. LONG-TERM DEBT

	Effective interest rate as of December 31, 2020	2020	2019
Quebecor			
Bank credit facility (i)		**$ –**	$ 11.0
Other loan (ii)	3.76 %	**45.9**	47.2
		45.9	58.2
Quebecor Media (iii)			
Bank credit facility (iv)	– %	**–**	9.0
Senior Notes (v)		**1,593.4**	1,611.7
		1,593.4	1,620.7
Videotron (iii), (vi)			
Bank credit facility (vii)	– %	**–**	89.3
Senior Notes (v)		**4,120.0**	4,173.0
		4,120.0	4,262.3
TVA Group (iii), (vi)			
Bank credit facility (viii)	2.14 %	**27.1**	44.9
Total long-term debt		**5,786.4**	5,986.1
Change in fair value related to hedged interest rate risk		**16.8**	9.1
Financing fees, net of amortization		**(29.8)**	(37.7)
		(13.0)	(28.6)
		5,773.4	5,957.5
Less current portion		**(28.5)**	(57.2)
		$ 5,744.9	$ 5,900.3

As of December 31, 2020, the carrying value of long-term debt denominated in U.S. dollars, excluding financing fees, was $3,655.1 million ($3,718.8 million as of December 31, 2019) while the net fair value of related hedging derivative instruments was in an asset position of $605.1 million ($679.8 million as of December 31, 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. LONG-TERM DEBT (continued)

(i) On July 15, 2020, the revolving credit facility of Quebecor in an amount of $50.0 million expired and was not renewed.

(ii) This mortgage loan bears interest at a fixed rate, payable every month, and matures in October 2022. The Corporation shall repay the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(iii) The debts of these subsidiaries are non-recourse to Quebecor.

(iv) The bank credit facility of Quebecor Media provides for a $300.0 million secured revolving credit facility that matures in July 2022 and bears interest at Bankers' acceptance rate, London Inter-Bank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by Quebecor Media's leverage ratio. This credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Quebecor Media's ability to incur additional indebtedness, pay dividends, and make other distributions. It is secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2020, the credit facility was secured by assets with a carrying value of $1,130.2 million ($1,727.4 million in 2019). As of December 31, 2020, no amount was drawn on the secured revolving credit facility ($9.0 million as of December 31, 2019).

(v) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Senior Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2020:

Principal amount	Annual nominal interest rate	Maturity date	Interest payable every 6 months on
Quebecor Media			
US$ 850.0	5.750 %	January 15, 2023	June and December 15
$ 500.0	6.625 %	January 15, 2023	June and December 15
Videotron			
US$ 800.0	5.000 %	July 15, 2022	January and July 15
US$ 600.0	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	June 15, 2025	April and October 15
$ 375.0	5.750 %	January 15, 2026	March and September 15
US$ 600.0	5.125 %	April 15, 2027	April and October 15
$ 800.0[1]	4.500 %	January 15, 2030	April and October 15

[1] The Notes were issued in October 2019 for net proceeds of $790.7 million, net of financing fees of $9.3 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. LONG-TERM DEBT (continued)

(vi) The debts of these subsidiaries are non-recourse to Quebecor Media.

(vii) The bank credit facility of Videotron provides for a $1,500.0 million secured revolving credit facility that matures in July 2023 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by Videotron's leverage ratio. The bank credit facility is secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2020, the bank credit facility was secured by assets with a carrying value of $8,114.0 million ($8,062.9 million in 2019). The bank credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Videotron's ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2020, no amount was drawn on the secured revolving credit facility ($89.3 million as of December 31, 2019).

(viii) The bank credit facility of TVA Group provides for a secured revolving credit facility in the amount of $75.0 million that matures in February 2021 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by TVA Group's leverage ratio. The bank credit facility contains covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. The credit facility is secured by liens on all of its movable assets and an immovable hypothec on its head office building. As of December 31, 2020, $27.1 million was drawn on the revolving credit facility ($44.9 million as of December 31, 2019).

On February 11, 2021, TVA Group amended its secured revolving credit facility to extend its term to February 2022.

On December 31, 2020, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2021	$ 28.5
2022	1,062.5
2023	1,593.4
2024	763.5
2025	400.0
2026 and thereafter	1,938.5

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

18. LONG-TERM DEBT (continued)

Changes in long-term debt are as follows:

	2020	2019
Balance at beginning of year	**$ 5,957.5**	$ 6,428.2
Net change under revolving facilities, net of financing fees	**(127.0)**	(589.5)
Issuance of long-term debt, net of financing fees	**–**	790.7
Repayment of long-term debt	**(1.3)**	(488.6)
Foreign currency translation	**(71.4)**	(198.2)
Amortization of financing fees	**8.1**	8.1
Change in fair value related to hedged interest rate risk	**7.7**	6.6
Other	**(0.2)**	0.2
Balance at end of year	**$ 5,773.4**	$ 5,957.5

19. LEASE LIABILITIES

Changes in lease liabilities are as follows:

	2020	2019
Balance at beginning of year	**$ 137.9**	$ 144.4
Lease obligations financing right-of-use assets	**77.4**	33.9
Repayments	**(41.9)**	(39.4)
Other	**(0.1)**	(1.0)
	173.3	137.9
Less current portion	**(34.3)**	(31.3)
	$ 139.0	$ 106.6

Interest rates on lease liabilities ranged from 1.9% to 9.3% as of December 31, 2020 and 2019.

Repayments of lease liabilities over the coming years are as follows:

2021	$ 34.3
2022	27.8
2023	25.1
2024	19.6
2025	10.2
2026 and thereafter	56.3

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

20. OTHER LIABILITIES

	Note	2020	2019
Defined benefit plans	30	**$ 323.8**	$ 221.5
Contingent considerations and future conditional adjustments		**21.9**	57.4
Other[1]		**77.1**	92.3
		$ 422.8	$ 371.2

[1] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal amount outstanding of $844.9 million as of December 31, 2020 and 2019 and a combined carrying value of $2.1 million as of December 31, 2020 and 2019. The exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligations without any consideration.

21. CONVERTIBLE DEBENTURES

On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. Interest on the convertible debentures is payable semi-annually in cash, in Class B Subordinate Voting Shares (“Class B Shares”) or with the proceeds from the sale of Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Class B share, subject to an adjusted floor price of approximately $26.20 per share (that is, a maximum number of approximately 5,724,218 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $32.76 per share (that is, a minimum number of approximately 4,579,374 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Class B Shares and (ii) the then current market price of a Class B share.

The principal amount of the convertible debentures is presented separately as a financial liability and the conversion features related to the floor and ceiling prices are presented as embedded derivatives. The fair value of these embedded derivatives as of December 31, 2020 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 0.43% (1.80% in 2019), a dividend yield of 2.43% (1.35% in 2019), and an expected volatility of 22.00% (18.08% in 2019). A one dollar increase in the market price of a Class B share as of December 31, 2020 would have decreased the gain on embedded derivatives related to convertible debentures by $4.0 million, while a one dollar decrease in the market price of a Class B share would have increased the gain by $4.0 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

22. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	**Amount**	**Number**	**Amount**
Balance as of December 31, 2018	77,249,244	$ 8.6	179,807,353	$ 1,057.3
Class A Shares converted into Class B Shares	(35,410)	–	35,410	–
Shares purchased and cancelled	–	–	(3,107,356)	(18.3)
Shares issued upon exercise of stock options	–	–	680,000	8.3
Balance as of December 31, 2019	77,213,834	8.6	177,415,407	1,047.3
Class A Shares converted into Class B Shares	(174,000)	–	174,000	–
Shares purchased and cancelled	–	–	(6,457,050)	(38.1)
Balance as of December 31, 2020	**77,039,834**	**$ 8.6**	**171,132,357**	**$ 1,009.2**

On August 5, 2020, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2020, the Corporation purchased and cancelled 6,457,050 Class B Shares for a total cash consideration of $201.2 million (3,107,356 Class B Shares for a total cash consideration of $94.6 million in 2019). The excess of $163.1 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2020 (an increase of the deficit of $76.3 million in 2019).

In 2019, 680,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $8.3 million. As a result of this transaction, contributed surplus was increased by $12.7 million and stock-based compensation liability was reduced by the same amount.

On February 24, 2021, the Board of Directors of the Corporation declared a dividend of $0.275 per share on Class A Shares and Class B Shares, or approximately $68.3 million, payable on April 6, 2021, to shareholders of record at the close of business on March 12, 2021.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 26,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of Quebecor. The exercise price of each option is equal to the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. As per the provisions of the plan, options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant. Thus, since 2018, when granting options, the Board of Directors of the Corporation has determined that the options would vest equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. Holders of options have committed to obtain the consent of the Corporation before exercising their right to subscribe the shares for which they exercise their options.

The following table gives details on changes to outstanding options for the years ended December 31, 2020 and 2019:

		2020		2019
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**2,504,892**	**$ 29.21**	1,982,892	$ 21.60
Granted	**1,342,267**	**33.19**	1,403,250	31.61
Exercised	**–**	**–**	(680,000)	12.17
Cancelled	**(216,200)**	**31.09**	(201,250)	28.57
Balance at end of year	**3,630,959**	**$ 30.57**	2,504,892	$ 29.21

As of December 31, 2020 and 2019, there was no vested options.

During the year ended December 31, 2019, the Corporation issued 680,000 Class B Shares upon exercise of stock options (note 22).

As of December 31, 2020, exercise prices of all outstanding options are from $26.52 to $33.19 and the average of years to maturity is 8.6.

23. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer which could be less upon reaching the minimum shareholding threshold set out in the policy regarding the minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on Quebecor Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of Quebecor Class B Shares on the date of redemption. As of December 31, 2020, the total number of DSUs outstanding under this plan was 404,053 (357,470 as of December 31, 2019).

(b) Quebecor Media stock option plan

Under a stock option plan established by Quebecor Media, 6,180,140 Common Shares of Quebecor Media have been set aside for officers, senior employees, directors, and other key employees of Quebecor Media. Each option may be exercised within a maximum period of 10 years following the date of grant at an exercise price not lower than, as the case may be, the fair market value of the Common Shares of Quebecor Media at the date of grant, as determined by its Board of Directors (if the Common Shares of Quebecor Media are not listed on a stock exchange at the time of the grant), or the five-day weighted average market price ending on the day preceding the date of grant of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of grant. As long as the Common Shares of Quebecor Media are not listed on a recognized stock exchange, optionees may exercise their vested options during one of the following periods: from March 1 to March 30, from June 1 to June 29, from September 1 to September 29, and from December 1 to December 30.

Holders of options under the plan have the choice at the time of exercising their options of receiving an amount in cash (equal to the difference between either the five-day weighted average market price ending on the day preceding the date of exercise of the Common Shares of Quebecor Media on the stock exchange(s) where such shares are listed at the time of exercise, or the fair market value of the Common Shares, as determined by the Quebecor Media's Board of Directors, and the exercise price of their vested options) or, subject to certain stated conditions, exercise their options to purchase Common Shares of Quebecor Media at the exercise price. Except under specific circumstances, and unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(b) Quebecor Media stock option plan (continued)

The following table gives details on changes to outstanding options granted as of December 31, 2020 and 2019:

		2020		2019
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**129,200**	**$ 65.41**	318,400	$ 64.61
Exercised	**(81,250)**	**65.08**	(147,400)	62.41
Cancelled	**–**	**–**	(41,800)	69.91
Balance at end of year	**47,950**	**$ 65.96**	129,200	$ 65.41
Vested options at end of year	**47,950**	**$ 65.96**	97,550	$ 63.74

During the year ended December 31, 2020, 81,250 of the Quebecor Media's stock options were exercised for a cash consideration of $4.7 million (147,400 stock options for $7.4 million in 2019).

As of December 31, 2020, exercise prices of all outstanding options are from $51.89 to $70.56 and the average of years to maturity is 3.6.

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares") have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of TVA Group Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. Thus, since 2018, when granting options, the Human Resources and Corporate Governance Committee has determined that the options would vest equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised. Holders of options have committed to obtain the consent of TVA Group before exercising their right to subscribe the shares for which they exercise their options.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan (continued)

The following table gives details on changes to outstanding options for the years ended December 31, 2020 and 2019:

		2020		2019
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**515,000**	**$ 2.43**	340,000	$ 2.99
Granted	**310,000**	**1.40**	290,000	2.05
Cancelled	**(30,000)**	**1.65**	(115,000)	3.13
Balance at end of year	**795,000**	**$ 2.06**	515,000	$ 2.43
Vested options at end of year	**35,000**	**$ 6.85**	28,000	$ 6.85

As of December 31, 2020, exercise prices of all outstanding options are from $1.40 to $6.85 and the average of years to maturity is 8.5.

(d) Deferred share unit and performance share unit plans

Quebecor established a DSU plan and PSU plan for its employees and those of its subsidiaries based on Quebecor Class B Shares and, in the case of the DSU plan, also on TVA Group Class B Shares. TVA Group also established a DSU plan and a PSU plan for its employees based on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant’s retirement or termination of employment, as the case may be. The PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. No treasury shares will be issued for the purposes of these plans. As of December 31, 2020, 148,785 DSUs based on Quebecor Class B Shares and 204,598 DSUs based on TVA Group Class B Shares were outstanding under these plans (158,855 and 231,286, respectively, as of December 31, 2019). As of December 31, 2020, there is no PSUs outstanding (117,972 PSUs based on Quebecor Class B Shares and 131,129 PSUs based on TVA Group Class B Shares as of December 31, 2019). A cash consideration of $4.8 million was paid upon PSUs redemption in 2020 ($5.4 million in 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. STOCK-BASED COMPENSATION PLANS (continued)

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans of Quebecor, Quebecor Media and TVA Group was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans:

December 31, 2020	**Quebecor**	**Quebecor Media**	**TVA Group**
Risk-free interest rate	**0.54 %**	**0.27 %**	**0.53 %**
Distribution yield	**2.43 %**	**1.00 %**	**– %**
Expected volatility	**21.15 %**	**28.96 %**	**56.27 %**
Expected remaining life	**4.6 years**	**1.0 years**	**4.5 years**

December 31, 2019	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	1.80 %	1.79 %	1.80 %
Distribution yield	1.35 %	1.00 %	– %
Expected volatility	17.94 %	14.53 %	51.81 %
Expected remaining life	5.1 years	1.1 years	4.9 years

Except for Quebecor Media, the expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. Since the Common Shares of Quebecor Media are not publicly traded on a stock exchange, expected volatility is derived from the implied volatility of Quebecor's stock. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(f) Liability of vested options

As of December 31, 2020, the liability for all vested options was $2.9 million as calculated using the intrinsic value ($6.0 million as of December 31, 2019).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2020, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $4.9 million ($13.6 million in 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. ACCUMULATED OTHER COMPREHENSIVE LOSS ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Defined benefit plans	Total
Balance as of December 31, 2018	$ (30.3)	$ (52.4)	$ (82.7)
Other comprehensive income (loss)	70.6	(52.0)	18.6
Balance as of December 31, 2019	40.3	(104.4)	(64.1)
Other comprehensive loss	(10.7)	(59.1)	(69.8)
Balance as of December 31, 2020	**$ 29.6**	**$ (163.5)**	**$ (133.9)**

[1] No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 6 1/4-year period.

25. COMMITMENTS

The Corporation has entered into long-term commitments to purchase services, tangible and intangible assets, broadcasting rights, and to pay licences and royalties. The minimum payments for the coming years are as follows:

2021	$ 383.6
2022 to 2025	678.8
2026 and thereafter	293.0

26. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

27. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to these legal proceedings.

On August 15, 2019, the CRTC issued an order finalizing the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation's consolidated financial statements. The new proposed rates are substantially lower than the interim rates and could represent a reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and a retrospective reduction of approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. On September 28, 2020, the CRTC approved a request from a coalition of cable companies (including Videotron) to stay the implementation of the order pertaining to final rates pending its final determination on the review and vary requests. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, lease liabilities and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency and (ii) to achieve a targeted balance of fixed- and floating-rate debts. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.3235	$ 207.1	US$ 156.5

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(a) Description of derivative financial instruments (continued)

(ii) Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2020 and 2019 are as follows:

	2020		2019	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (5,786.4)**	**$ (6,216.1)**	$ (5,986.1)	$ (6,376.2)
Convertible debenture[2]	**(153.5)**	**(153.5)**	(162.0)	(162.0)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**(8.0)**	**(8.0)**	(2.1)	(2.1)
Cross-currency interest rate swaps	**605.1**	**605.1**	679.8	679.8

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $552.5 million as of December 31, 2020 ($635.5 million in 2019) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $44.6 million as of December 31, 2020 ($42.2 million in 2019).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2020, no customer balance represented a significant portion of the Corporation’s consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2020, the provision for expected credit losses represented 2.5% of the gross amount of accounts receivable and contract assets (2.5% as of December 31, 2019), while 5.0% of trade receivable were 90 days past their billing date (7.2% as of December 31, 2019).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2020 and 2019:

		2020		2019
Balance at beginning of year	**$**	**19.6**	$	20.5
Changes in expected credit losses charged to income		**17.4**		18.8
Write-off		**(16.2)**		(19.7)
Balance at end of year	**$**	**20.8**	$	19.6

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation’s risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation’s consolidated debt was approximately 4.3 years as of December 31, 2020 (5.2 years as of December 31, 2019).

The Corporation’s management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases and dividends to shareholders. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2020, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt, on convertible debentures and on lease liabilities, and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Bank indebtedness	**$ 1.7**	$ 1.7	$ –	$ –	$ –
Accounts payable and accrued charges	**853.8**	853.8	–	–	–
Long-term debt[1]	**5,786.4**	28.5	2,655.9	1,163.5	1,938.5
Convertible debentures[2]	**150.0**	–	–	150.0	–
Interest payments on long-term debt and convertible debentures[3]	**1,188.4**	246.9	471.0	251.6	218.9
Lease liabilities	**173.3**	34.3	52.9	29.8	56.3
Interest payments on lease liabilities	**48.5**	7.7	11.4	7.5	21.9
Derivative financial instruments[4]	**(538.0)**	1.6	(479.2)	(101.3)	40.9
Total	**$ 7,664.1**	**$ 1,174.5**	**$ 2,712.0**	**$ 1,501.1**	**$ 2,276.5**

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 Based on the market value at December 31, 2020 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Class B share at that date, subject to a floor price of $26.20 per share and a ceiling price of $32.76. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2020.

4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging on the principal of U.S.-dollars-denominated debt.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways, modems, mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2020, and to hedge its exposure on certain purchases of set-top boxes, gateways, modems, mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2020 is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of $0.10	$ 1.0	$ 48.7
Decrease of $0.10	(1.0)	(48.7)

A variance of $0.10 in the 2020 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $5.4 million on the value of unhedged purchases of goods and services and $3.7 million on the value of unhedged acquisitions of tangible and intangible assets in 2020.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2020, after taking into account the hedging instruments, long-term debt was comprised of 96.1% fixed-rate debt (93.9% in 2019) and 3.9% floating-rate debt (6.1% in 2019).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2020 was $2.0 million.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures (note 21), as of December 31, 2020, as per the Corporation's valuation models, is as follows:

Increase (decrease)	Income	Other comprehensive income
Increase of 100 basis points	$ (1.2)	$ (10.0)
Decrease of 100 basis points	1.2	10.0

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

28. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2020 and 2019 is as follows:

	2020	2019
Bank indebtedness	**$ 1.7**	$ 29.4
Long-term debt	**5,773.4**	5,957.5
Convertible debentures	**150.0**	150.0
Embedded derivatives related to convertible debentures	**6.5**	15.8
Lease liabilities	**173.3**	137.9
Derivative financial instruments	**(597.1)**	(677.7)
Cash and cash equivalents	**(136.7)**	(14.0)
Net liabilities	**5,371.1**	5,598.9
Equity	**$ 1,214.1**	$ 1,072.1

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercorporation transactions, and the declaration and payment of dividends or other distributions.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2020	2019
Salaries and short-term benefits	**$ 8.9**	$ 10.9
Share-based compensation	**1.6**	4.9
Other long-term benefits	**0.8**	2.5
	$ 11.3	$ 18.3

Operating transactions

The Corporation made sales to affiliated corporations in the amount of $3.7 million in 2020 ($3.8 million in 2019). These transactions were accounted for at the consideration agreed between parties.

30. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation’s pension plans are registered with a provincial or federal regulatory authority.

The Corporation’s funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation’s management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation’s rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation’s management, or the Audit and Risk Management Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation’s funding requirement.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2020 and 2019:

	Pension benefits		Postretirement benefits	
	2020	2019	**2020**	2019
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,492.7**	$ 1,294.5	**$ 62.9**	$ 71.4
Service costs	**37.4**	30.4	**1.9**	2.3
Interest costs	**47.1**	51.9	**1.9**	2.6
Plan participants' contributions	**10.5**	10.0	**–**	–
Actuarial loss (gain) arising from:				
Financial assumptions	**159.5**	168.4	**8.2**	14.1
Demographic assumptions	**–**	6.4	**–**	0.3
Participant experience	**(2.7)**	(3.3)	**–**	(3.0)
Benefits and settlements paid	**(64.4)**	(67.5)	**(1.7)**	(1.6)
Plan amendments and other	**0.7**	1.9	**(3.1)**	(23.2)
Benefit obligations at the end of the year	**$ 1,680.8**	$ 1,492.7	**$ 70.1**	$ 62.9
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,345.8**	$ 1,217.3	**$ –**	$ –
Actual return on plan assets	**122.9**	155.9	**–**	–
Employer contributions	**27.6**	32.5	**1.7**	1.6
Plan participants' contributions	**10.5**	10.0	**–**	–
Administrative fees	**(2.4)**	(2.4)	**–**	–
Benefits and settlements paid	**(64.4)**	(67.5)	**(1.7)**	(1.6)
Fair value of plan assets at the end of the year	**$ 1,440.0**	$ 1,345.8	**$ –**	$ –

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

As of December 31, 2020, the weighted average duration of defined benefit obligations was 16.1 years (15.5 years in 2019). The Corporation expects future benefit payments of $62.6 million in 2021.

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed, whereby a mix of asset classes is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2020	2019
Equity securities:		
Canadian	**15.4 %**	16.5 %
Foreign	**24.8**	25.4
Debt securities	**55.7**	57.4
Other	**4.1**	0.7
	100.0 %	100.0 %

The fair value of securities is based on quoted prices in an active market, while the fair value of other investments is not based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amounts recognized in the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized in the consolidated balance sheets is as follows:

	Pension benefits		**Postretirement benefits**	
	2020	2019	**2020**	2019
Benefit obligations	**$ (1,680.8)**	$ (1,492.7)	**$ (70.1)**	$ (62.9)
Fair value of plan assets	**1,440.0**	1,345.8	**–**	–
Plan deficit	**(240.8)**	(146.9)	**(70.1)**	(62.9)
Asset limit and minimum funding adjustment	**(12.9)**	(11.7)	**–**	–
Net amount recognized[1]	**$ (253.7)**	$ (158.6)	**$ (70.1)**	$ (62.9)

1 The net liability recognized for 2020 is $323.8 million ($221.5 million in 2019) and is included in "Other liabilities" (note 20).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2020	2019	**2020**	2019
Actuarial loss on benefit obligations	**$ (156.8)**	$ (171.5)	**$ (8.2)**	$ (11.4)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**81.1**	107.9	**–**	–
Asset limit and minimum funding adjustment	**(0.8)**	4.9	**–**	–
Re-measurement loss recorded in other comprehensive (loss) income	**$ (76.5)**	$ (58.7)	**$ (8.2)**	$ (11.4)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2020	2019	**2020**	2019
Employee costs:				
Service costs	**$ 37.4**	$ 30.4	**$ 1.9**	$ 2.3
Plan amendments, administrative fees and other	**4.4**	4.4	**(3.2)**	(23.2)
Interest on net defined benefit liability	**5.7**	4.4	**1.9**	2.6
Net benefit costs (gain)	**$ 47.5**	$ 39.2	**$ 0.6**	$ (18.3)

The expense related to defined contribution pension plans amounted to $20.1 million in 2020 ($19.6 million in 2019).

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $34.2 million in 2021, based on the most recent financial actuarial reports filed (contributions of $29.3 million were paid in 2020).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond-yield and matched-funding yield curve analysis as of the measurement date.

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2020 and 2019 and current periodic benefit costs are as follows:

	Pension and postretirement benefits	
	2020	2019
Benefit obligations		
Rates as of year-end:		
Discount rate	**2.50 %**	3.10 %
Rate of compensation increase	**3.00**	3.00
Current periodic costs		
Rates as of preceding year-end:		
Discount rate	**3.10 %**	3.90 %
Rate of compensation increase	**3.00**	3.00

The assumed average retirement age of participants used ranged from 59 to 62 years.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 7.00% at the end of 2020. These costs, as per the estimate, are expected to decrease gradually over the next seven years to 5.30% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefits obligation by $25.5 million and the postretirement benefits obligation by $1.5 million as of December 31, 2020. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

31. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data center operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron during the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments. In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions were achieved.

32. SUBSEQUENT EVENTS

On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of Senior Notes bearing interest at 3.125% and maturing on January 15, 2031, for net proceeds of $644.1 million, net of financing fees of approximately $5.9 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron’s ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter.

This is Exhibit 51 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

Consolidated financial statements of

QUEBECOR INC.

Years ended December 31, 2021 and 2020

QUEBECOR INC.
CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2021 and 2020

MANAGEMENT'S RESPONSIBILITY FOR CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements of Quebecor Inc. are the responsibility of management and have been approved by the Board of Directors of Quebecor Inc.

These consolidated financial statements have been prepared by management in conformity with International Financial Reporting Standards and include amounts that are based on best estimates and judgments.

The management of Quebecor Inc. and of its subsidiaries, in furtherance of the integrity and objectivity of the data in the consolidated financial statements, has developed and maintains internal accounting control systems and supports a program of internal audit. Management believes that these internal accounting control systems provide reasonable assurance that financial records are reliable and form a proper basis for the preparation of the consolidated financial statements, that assets are properly accounted for and safeguarded and that the preparation and presentation of other financial information are consistent with the consolidated financial statements.

The Board of Directors carries out its responsibility for the consolidated financial statements principally through its Audit and Risk Management Committee, consisting solely of outside directors. The Audit and Risk Management Committee reviews the annual consolidated financial statements and recommends their approval to the Board of Directors. The Audit and Risk Management Committee meets with Quebecor Inc.'s management, internal auditors and external auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, and formulates the appropriate recommendations to the Board of Directors. The auditor appointed by the shareholders has full access to the Audit and Risk Management Committee, with or without management being present.

These consolidated financial statements have been audited by the auditor appointed by the shareholders and its report is presented hereafter.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Quebecor Inc.

Opinion

We have audited the consolidated financial statements of Quebecor Inc. and its subsidiaries (the "Corporation"), which comprise the consolidated balance sheets as at December 31, 2021 and 2020, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Corporation as at December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Corporation in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in the audit of the consolidated financial statements of the current period. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key Audit Matter	How our audit addressed the key audit matter
Timing of revenue recognition from subscriber services in the Telecommunications segment	
As disclosed in Note 1 (e) to the consolidated financial statements, the Telecommunications segment recognizes revenue from subscriber services, such as television distribution, Internet access and wireline and mobile telephony, when the services are provided. Operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided, and the portion of revenues that is invoiced and unearned is presented as deferred revenue. The Corporation recognized $3,735.0 million of revenues for the year ended December 31, 2021 related to these services, and $309.7 million of deferred revenue as at December 31, 2021, of which a significant portion related to these services.	To test the timing of revenue recognition from subscriber services, our audit procedures included, among others, the following: • We obtained an understanding, evaluated the design, and tested the operating effectiveness of manual controls, as well as the application controls and the IT general controls with the assistance of our IT specialists, related to the timing of revenue recognition for Telecommunications subscriber services; • We reperformed management's calculation of the entire deferred revenue balance related to these subscriber services as of December 31, 2021; • We tested a sample of the relevant data used for the calculation of the deferred revenue balance related to the Telecommunications subscriber services as of December 31, 2021, by comparing the invoice date, the invoice amount, and the types of services to the invoice and the related cash receipt; • We corroborated, by agreeing to supporting documentation, the appropriateness of any manual entries posted to the deferred revenue accounts; and

INDEPENDENT AUDITOR'S REPORT (continued)

The Corporation's revenue recognition process involves several information technology ("IT") applications responsible for the initiation, processing, and recording of transactions from the Corporation's various customers, and the calculation and allocation of revenue by service in accordance with the Corporation's accounting policy. The timing of revenue recognition is considered a key audit matter due to the complexity in our audit procedures considering the high volume of subscribers, each receiving different services with varying invoicing schedules.

- We independently developed expectations of revenue per user by service type and compared it to the average revenue per user by service type.

Capitalization of labor costs to property, plant and equipment and to intangible assets in the Telecommunications segment

As disclosed in Note 3 to the consolidated financial statements, $172.0 million of labor costs were capitalized to property, plant and equipment and to intangible assets during the year ended December 31, 2021, of which a significant portion relates to the Telecommunications segment.

Given the high volume of internal projects for which many employees are working on, the capitalization of labor costs is considered to be a key audit matter in the Telecommunications segment.

To test the capitalization of labor costs to property, plant and equipment and to intangible assets in the Telecommunications segment, our audit procedures included, among others, the following:

- We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls related to the capitalization of labor costs;
- We discussed with project managers, for a sample of significant projects, the nature of the project and the nature of the costs capitalized, and analyzed variances compared to the budget for each cost category, including labor costs. We corroborated variances compared to the budget to supporting documents such as invoices or employee timesheets;
- We corroborated labor costs capitalized by comparing the number of hours worked by an employee and their charge out rate on a specific project to the approved timesheet; and
- We also performed analytical procedures by comparing the proportion of internal labor per project to prior year.

Other Information

Management is responsible for the other information. The other information comprises:

- Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

INDEPENDENT AUDITOR'S REPORT (continued)

In preparing the consolidated financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Corporation's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Corporation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Corporation to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Corporation to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

INDEPENDENT AUDITOR'S REPORT (continued)

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Lily Adam.

Normand Provost
Director and President of the Audit and Risk Management Committee

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal, Québec, Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries. The percentages of voting rights and equity in Quebecor Media and in its major subsidiaries are as follows:

	% voting	% equity
Quebecor Media Inc.	100.0 %	100.0 %
Quebecor Media Inc. interest in its major subsidiaries		
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles Inc.	100.0 %	100.0 %

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment rental and postproduction services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural event management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

These segments are managed separately since they all require specific market strategies. The accounting policies of each segment are the same as the accounting policies used for the consolidated financial statements. Segment income includes income from sales to third parties and inter-segment sales. Transactions between segments are measured at exchange amounts between the parties.

COVID-19 pandemic

The COVID-19 pandemic has had a significant impact on the economic environment in Canada and around the world. In order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures since the beginning of this health crisis, including the suspension of some business activities. Since March 2020, this health crisis has curtailed the operations of many of Quebecor's business partners and has led to a significant slowdown in some of the Corporation's segments. Among other impacts, depending on circumstances, the restrictions and preventive measures imposed by the Québec government have caused a reduction in volume at Videotron Ltd.'s ("Videotron") retail outlets; a reduction in advertising revenues, in sports events broadcast by the TVA Sports specialty channel and in film and audiovisual content activity in the Media segment; and the cancellation of most shows and events in the Sports and Entertainment segment. Due to the decrease in their revenues, most of the business units in the Media segment and Sports and Entertainment segment qualified for the Canadian Emergency Wage Subsidy, and subsidies totalling $12.2 million were recorded in 2021 as a reduction in employee costs ($49.6 million in 2020). Given the uncertainty about the future evolution of the pandemic, including any new major wave, the full impact of the health crisis cannot be determined with certainty.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (IASB).

These consolidated financial statements have been prepared on a historical cost basis, except for certain financial instruments (notes 1(j) and 1(w)), the liability related to stock-based compensation (note 1(u)) and the net defined benefit liability (note 1(v)), and they are presented in Canadian dollars (“CAN dollars”), which is the currency of the primary economic environment in which the Corporation operates (“functional currency”).

Comparative figures for the year ended December 31, 2020 have been restated to conform to the presentation adopted for the year ended December 31, 2021.

(b) Consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. Intercompany transactions and balances are eliminated on consolidation.

A subsidiary is an entity controlled by the Corporation. Control is achieved when the Corporation is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Non-controlling interests in the net assets and results of consolidated subsidiaries are identified separately from the parent corporation’s ownership interest. Non-controlling interests in the equity of a subsidiary consist of the amount of non-controlling interests calculated at the date of the original business combination and their share of changes in equity since that date. Changes in non-controlling interests in a subsidiary that do not result in a loss of control by the Corporation are accounted for as equity transactions.

(c) Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the acquired business are recognized at their fair value at the acquisition date. Results of operations of an acquired business are included in the Corporation’s consolidated financial statements from the date of the business acquisition. Business acquisition and integration costs are expensed as incurred and included as other items in the consolidated statements of income.

(d) Foreign currency translation

Foreign currency transactions are translated to the functional currency by applying the exchange rate prevailing at the date of the transaction. Translation gains and losses on monetary assets and liabilities denominated in a foreign currency are included in financial expenses, or in gain or loss on valuation and translation of financial instruments.

Investment transactions in foreign associates and the Corporation’s share in their results of operations are translated at the exchange rate prevailing at the date of the transaction. Investments in foreign associates on the consolidated balance sheets are translated at the exchange rate prevailing at the end of the reporting period and all resulting translation differences are then recorded in other comprehensive (loss) income as a (loss) gain on translation of investments in foreign associates.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party's rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as "Deferred revenue" on the consolidated balance sheets. Deferred revenue is usually recognized as revenue in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration can be comprised of an upfront fee or a number of monthly installments for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- operating revenues from subscriber services, such as television distribution, Internet access, wireline and mobile telephony, and over-the-top video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- wireline connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets on the consolidated balance sheets. Contract assets are realized over the term of the contract.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Revenue recognition (continued)

Media

The Media segment recognizes each of its main activities' revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment rental revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and sales from food concessions are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;
- revenues from the sale of advertising in the form of venue signage or sponsorships are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

(f) Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Impairment of assets (continued)

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

(g) Barter transactions

In the normal course of operations, the Corporation principally offers advertising in exchange for goods and services. Revenues thus earned and expenses incurred are accounted for on the basis of the fair value of goods and services provided.

(h) Income taxes

Current income taxes are recognized with respect to amounts expected to be paid or recovered under the tax rates and laws that have been enacted or substantively enacted at the balance sheet date.

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized. A deferred tax expense or benefit is recognized either in other comprehensive income or directly in equity to the extent that it relates to items that are recognized in other comprehensive income or directly in equity in the same or a different period.

In the course of the Corporation’s operations, there are a number of uncertain tax positions due to the complexity of certain transactions and to the fact that related tax interpretations and legislation are continually changing. When a tax position is uncertain, the Corporation recognizes an income tax benefit or reduces an income tax liability only when it is probable that the tax benefit will be realized in the future or when the income tax liability is no longer probable.

(i) Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the lease term, less incentive payments received, using the Corporation incremental borrowing rate at that date or the interest rate implicit in the lease. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interest on lease liabilities is recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments

Classification, recognition and measurement

Most financial assets and liabilities are classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value through other comprehensive income or through profit or loss, and an equity investment, which is measured at fair value through other comprehensive income. In addition, contingent consideration and future conditional adjustments arising from a business acquisition or disposal are measured at fair value at the transaction date with subsequent changes in fair value recorded in the consolidated statements of income.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign-currency-denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation has established a hedge ratio of one-for-one for all its hedging relationships as the underlying risks of its hedging derivatives are identical to the hedged item risks.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Financial instruments (continued)

Derivative financial instruments and hedge accounting (continued)

The Corporation measures and records the effectiveness of its hedging relationships as follows:

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the cash flows of the hedged item.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation's hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis on the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Financing costs

Financing costs related to long-term debt are capitalized in reduction of long-term debt and amortized using the effective interest rate method.

(l) Tax credits and government assistance

The Corporation has access to several government programs designed to support large investment projects, the roll-out of high-speed Internet services in various regions of Québec, production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Emergency Wage Subsidy program available during the COVID-19 health crisis. The Corporation also receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

(m) Cash and cash equivalents

Cash and cash equivalents include highly liquid investments purchased three months or less from maturity and are recorded at fair value. These highly liquid investments consisted mainly of Bankers' acceptances and term deposits.

(n) Trade receivables and contract assets

Trade receivables and contract assets are presented net of a provision for expected credit losses. The Corporation is using the IFRS 9 expected credit losses method to estimate that provision, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions. Amounts receivable are written off when deemed uncollectible.

(o) Inventories

Inventories are valued at the lower of cost, determined by the first-in, first-out method or the weighted-average cost method, and net realizable value. Net realizable value represents the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. When the circumstances that previously caused inventories to be written down below cost no longer exist, the amount of the write-down is reversed.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Inventories (continued)

In particular, inventories related to audiovisual content are accounted for as follows:

(i) Productions

Productions are accounted for at the lesser of cost and net realizable value. Cost includes direct employee costs, goods and services costs and general expenses allocated to each production. The production costs are charged to operating expenses when the productions are broadcast or using a method based on how future economic benefits from the productions will be generated.

(ii) Broadcast and distribution rights

Broadcast rights are essentially contractual rights allowing the limited or unlimited broadcast of televisual products or movies. Distribution rights include costs to acquire distribution rights for televisual products and movies and other operating costs incurred that generate future economic benefits. The Corporation records the rights acquired as inventory and the obligations incurred under a licence agreement as a liability when the broadcast or distribution period begins and all of the following conditions have been met: (a) the cost of the licence for each program, movie, series or right to broadcast a live event is known or can be reasonably determined; (b) the programs, movies or series have been accepted or the live event is broadcast in accordance with the conditions of the licence agreement; and (c) the programs, movies or series are available for distribution, first showing or telecast, or when the live event is broadcast.

Amounts paid for broadcast and distribution rights before all of the above conditions are met are recorded as prepaid rights.

Broadcast and distribution rights are charged to operating expenses when televisual products and movies are broadcast or distributed over the contract period, using a method based on how future economic benefits from those rights will be generated.

Estimates of future revenues used to determine the net realizable value of inventories related to audiovisual content are examined periodically by management and revised as necessary. The carrying value of the related inventories is reduced to the net realizable value, if necessary, based on this assessment.

(p) Long-term investments

Investments in companies subject to significant influence (“associates”) are accounted for using the equity method and recorded in “Other assets” on the consolidated balance sheets. Under the equity method, the share of the results of operations of an associate is recorded in the consolidated statements of income. Carrying values of investments are reduced to estimated fair values if there is objective evidence that the investment is impaired.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Property, plant and equipment

Property, plant and equipment are recorded at cost. Cost represents the acquisition costs, net of government subsidies and investment tax credits, or construction costs, including preparation, installation and testing costs. In the case of projects to construct wireline and mobile networks, the cost includes equipment, direct labour and related overhead costs. Projects under development may also be comprised of advance payments made to suppliers for equipment under construction.

Borrowing costs are also included in the cost of property, plant and equipment during the development phase. Expenditures, such as maintenance and repairs, are expensed as incurred.

Depreciation is calculated on a straight-line basis over the following estimated useful lives:

Assets	Estimated useful lives
Buildings and leasehold improvements	5 to 40 years
Machinery and equipment	3 to 20 years
Telecommunication networks	3 to 20 years

Depreciation methods, residual values, and the useful lives of significant property, plant and equipment are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

Leasehold improvements are depreciated over the shorter of the term of the lease and their estimated useful life.

A decommissioning obligation in connection with the Corporation’s mobile network is recorded at the net present value of the estimated future expenditures required to settle the estimated future obligation at the consolidated balance sheet date. Changes in estimates of the decommissioning obligation are reflected in property, plant and equipment on the consolidated balance sheets. The Corporation does not record any decommissioning obligations in connection with its wireline distribution networks. The Corporation expects to renew all of its agreements with utility companies to access their support structures in the future, making the retirement date so far into the future that the present value of the restoration costs is insignificant for those assets.

Videotron is engaged in an agreement to operate a shared LTE network in the Province of Québec and in the Ottawa area.

(r) Goodwill and intangible assets

Goodwill

Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Goodwill is allocated as at the date of a business acquisition to a CGU for purposes of impairment testing (note 1(f)). The allocation is made to the CGU or group of CGUs expected to benefit from the synergies of the business acquisition.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(r) Goodwill and intangible assets (continued)

Intangible assets

Spectrum licences are recorded at cost. Spectrum licences have an indefinite useful life and are not amortized, in view of the following facts: (i) the Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by Innovation, Science and Economic Development Canada; (ii) the Corporation has the financial and operational ability to renew these spectrum licences; (iii) currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences; and (iv) the Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Software is recorded at cost. In particular, internally generated intangible assets such as software and website development are mainly comprised of internal costs in connection with the development of assets to be used internally or to provide services to customers. These costs are capitalized when the development stage of the software application begins and costs incurred prior to that stage are recognized as expenses.

Broadcasting licences, trademarks and sport franchises also have an indefinite useful life and are not amortized. These intangible assets are recorded at cost or at fair value at the acquisition date if they are acquired through a business acquisition.

Naming rights for the Videotron Centre in Québec City are recognized at cost.

Customer relationships and other intangible assets acquired through a business acquisition are recorded at fair value at the date of acquisition.

Borrowing costs directly attributable to the acquisition, development or production of an intangible asset are also included as part of the cost of that asset during the development phase.

Intangible assets with finite useful lives are amortized over their useful lives using the straight-line method over the following periods:

Assets	**Estimated useful lives**
Software	3 to 7 years
Naming rights	25 years
Customer relationships and other	3 to 10 years

Amortization methods, residual values, and the useful lives of significant intangible assets are reviewed at least once a year. Any change is accounted for prospectively as a change in accounting estimate.

(s) Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(t) Provisions

Provisions are recognized (i) when the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and (ii) when the amount of the obligation can be reliably estimated.

Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each consolidated balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

(u) Stock-based compensation

Stock-based awards to employees that call for settlement in cash, deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant. Key assumptions are described in note 24.

(v) Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

(i) Defined contribution pension plans

Under its defined contribution pension plans, the Corporation pays fixed contributions to participating employees' pension plans and has no legal or constructive obligation to pay any further amounts. Obligations for contributions to defined contribution pension plans are recognized as employee benefits in the consolidated statements of income when the contributions become due.

(ii) Defined benefit pension plans and postretirement plans

Defined benefit pension plan costs are determined using actuarial methods and are accounted for using the projected unit credit method, which incorporates management's best estimates of future salary levels, other cost escalations, retirement ages of employees, and other actuarial factors. Defined benefit pension costs, recognized in the consolidated statements of income as employee costs, mainly include the following:

- service costs provided in exchange for employee services rendered during the period;
- prior service costs recognized at the earlier of (a) when the employee benefit plan is amended or (b) when restructuring costs are recognized; and
- curtailment or settlement gain or loss.

Interest on net defined benefit liability or asset, recognized in the consolidated statements of income as financial expenses, is determined by multiplying the net defined benefit liability or asset by the discount rate used to determine the defined benefit obligation.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(v) Pension plans and postretirement benefits (continued)

(ii) Defined benefit pension plans and postretirement plans (continued)

Re-measurements of the net defined benefit liability or asset are recognized immediately in other comprehensive income (loss) and in accumulated other comprehensive (loss) income. Re-measurements are comprised of the following:

- actuarial gains and losses arising from changes in financial and demographic actuarial assumptions used to determine the defined benefit obligation or from experience adjustments to liabilities;
- the difference between actual return on plan assets and interest income on plan assets anticipated as part of the interest on net defined benefit liability or asset calculation; and
- changes in the net benefit asset limit or in the minimum funding liability.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans.

The Corporation also offers discounts on telecommunication services and health, life and dental insurance plans to some of its retired employees. The cost of postretirement benefits is determined using an accounting methodology similar to that for defined benefit pension plans. The benefits related to these plans are funded by the Corporation as they become due.

(w) Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

(x) Use of estimates and judgments

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, and disclosure of contingent assets and liabilities. Although these estimates are based on management's best judgment and information available at the time of the assessment date, actual results could differ from those estimates.

The following significant areas represent management's most difficult, subjective or complex estimates:

(i) Recoverable amount of an asset or a CGU

When an impairment test is performed on an asset or a CGU, management estimates the recoverable amount of the asset or CGU based on its fair value less costs of disposal or its value in use. These estimates are based on valuation models requiring the use of a number of assumptions such as forecasts of future cash flows, pre-tax discount rate (WACC) and perpetual growth rate, or the use of multiples of operating performance of comparable entities. These assumptions have a significant impact on the results of impairment tests and on the impairment charge, as the case may be, recorded in the consolidated statements of income. A description of key assumptions used in the goodwill impairment tests and a sensitivity analysis of recoverable amounts are presented in note 16.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(x) Use of estimates and judgments (continued)

(ii) Costs and obligations related to pension and postretirement benefit plans

Estimates of costs and obligations related to pension and postretirement benefit obligations are based on a number of assumptions, such as the discount rate, the rate of increase in compensation, the retirement age of employees, health care costs, and other actuarial factors. Certain of these assumptions may have a significant impact on employee costs and financial expenses recorded in the consolidated statements of income, the re-measurement gain or loss on defined benefit plans recorded in the consolidated statements of comprehensive income, and the carrying value of other assets or other liabilities on the consolidated balance sheets. Key assumptions and a sensitivity analysis of the discount rate are presented in note 31.

(iii) Provisions

The recognition of provisions requires management to estimate expenditures required to settle a present obligation or to transfer it to a third party at the date of assessment. It can also require an assessment of the probable outcomes of legal proceedings or other contingencies. Management expectations on the potential effect of the possible outcomes of legal disputes on the consolidated financial statements are presented in note 28.

(iv) Contingent considerations and future conditional adjustments

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations and future conditional adjustments are based will be met in the future. The assessment of these contingent potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

The following areas represent management's most significant judgments, apart from those involving estimates:

(i) Useful life periods for the depreciation and amortization of assets with finite useful lives

For each class of assets with finite useful lives, management has to determine over which period the Corporation will consume the assets' future economic benefits. The determination of a useful life period involves judgment and has an impact on the depreciation and amortization charge recorded in the consolidated statements of income.

(ii) Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

(iii) Interpretation of laws and regulations

Interpretation of laws and regulation, including those of the Canadian Radio-television and Telecommunications Commission ("CRTC") and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions, income taxes and capital expenditures in the consolidated financial statements.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

2. REVENUES

	2021	2020
Telecommunications:		
Internet	$ **1,201.4**	$ 1,131.4
Television	**836.1**	903.6
Mobile telephony	**712.5**	658.5
Wireline telephony	**318.5**	338.4
Mobile equipment sales	**276.4**	257.2
Wireline equipment sales	**204.0**	151.7
Other	**186.1**	181.8
Media:		
Advertising	**354.0**	285.5
Subscription	**202.7**	200.3
Other	**219.3**	164.7
Sports and Entertainment	**167.0**	158.0
Inter-segments	**(123.6)**	(113.3)
	$ **4,554.4**	$ 4,317.8

3. EMPLOYEE COSTS AND PURCHASE OF GOODS AND SERVICES

The main components are as follows:

	2021	2020
Employee costs	$ **857.0**	$ 835.5
Less employee costs capitalized to property, plant and equipment and to intangible assets	**(172.0)**	(200.0)
	685.0	635.5
Purchase of goods and services[1]:		
Royalties, rights and creation costs[2]	**749.5**	651.0
Cost of products sold	**513.5**	476.0
Service contracts	**193.9**	197.3
Marketing, circulation and distribution expenses	**85.7**	80.8
Other	**353.6**	324.6
	1,896.2	1,729.7
	$ **2,581.2**	$ 2,365.2

1 Cost of inventories included in purchase of goods and services amounted to $862.3 million in 2021 ($744.4 million in 2020). Write-downs of inventories totalling $7.3 million were recognized in purchase of goods and services in 2021 ($6.9 million in 2020).

2 In 2021, the Corporation reviewed the allocation of the value of the rights attached to the various components of its contract for National Hockey League ("NHL") games to better reflect the economic benefits arising from them. In addition, the beginning of the 2020/2021 season was postponed from 2020 to 2021 and the season was also shortened. These changes had the effect of altering the timing of recognition in income of the NHL content rights. The cost of NHL rights therefore increased by $26.6 million in 2021 as compared to 2020.

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

In 2021, a charge of $25.3 million was recorded in connection with cost reduction initiatives in the Corporation's various segments ($31.6 million in 2020), while an asset impairment charge of $1.5 million was also recorded in 2021 ($8.5 million in 2020).

On April 1, 2021, Alithya Group Inc. ("Alithya"), a strategy and digital transformation leader, acquired the firm R3D Conseil inc., of which Quebecor was one of the main shareholders. As a result of this transaction, the Corporation now holds 11.9% of Alithya's share capital and 6.7% of voting rights related to the issued and outstanding shares of Alithya, and a corresponding gain on disposal of $19.6 million was recorded in the second quarter of 2021. This transaction also included purchase commitments from Quebecor for Alithya's services totalling approximately $360.0 million as part of a 10-year commercial agreement (note 26).

In addition, the Corporation also recorded a gain related to other items of $3.1 million in 2021 ($0.9 million in 2020).

7. LOSS ON DEBT REFINANCING

On June 3, 2021, Quebecor Media issued a redemption notice for its Senior Notes in aggregate principal amount of $500.0 million, bearing interest at 6.625% and due January 15, 2023, at a redemption price of 107.934% of their principal amount. Videotron also issued a redemption notice for its Senior Notes in aggregate principal amount of US$800.0 million, bearing interest at 5.000% and due July 15, 2022, at a redemption price of 104.002% of their principal amount. As a result, a net loss of $80.9 million was recorded in the consolidated statement of income in 2021, including a gain of $1.0 million previously recorded in other comprehensive income. In July 2021, the Senior Notes were redeemed and the related hedging contracts were unwound, for a total cash consideration of $1,377.9 million, including the early redemption premium.

Property, plant and equipment	**(445.0)**	(467.6)	**(22.6)**	(22.0)
Goodwill, intangible assets and other assets	**(332.8)**	(322.9)	**9.0**	20.3
Long-term debt, derivative financial instruments and exchangeable debentures	**(120.6)**	(130.9)	**(6.6)**	(0.5)
Other	**30.0**	19.2	**(11.0)**	0.3
	$ (790.4)	$ (802.7)	**$ (59.9)**	$ (2.9)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. INCOME TAXES (continued)

Changes in the net deferred income tax liability are as follows:

		2021		2020
Balance at beginning of year	**$**	**(802.7)**	$	(828.0)
Recognized in income as continuing operations		**59.9**		2.9
Recognized in other comprehensive income		**(46.7)**		28.9
Business acquisitions		**(0.9)**		(0.8)
Discontinued operations and other		**–**		(5.7)
Balance at end of year	**$**	**(790.4)**	$	(802.7)
Deferred income tax asset	**$**	**39.2**	$	45.5
Deferred income tax liability		**(829.6)**		(848.2)
	$	**(790.4)**	$	(802.7)

As of December 31, 2021, the Corporation had loss carryforwards for income tax purposes of $25.7 million available to reduce future taxable income, which will expire between 2035 and 2041. These losses have been recognized. The Corporation also had capital losses of $583.9 million that can be carried forward indefinitely and applied only against future capital gains. All capital losses have been recognized.

There are no income tax consequences attached to the payment of dividends by the Corporation to its shareholders.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	2021	2020
Income from continuing operations attributable to shareholders	**$ 578.4**	$ 574.0
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(10.6)**	(5.1)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 567.8**	$ 568.9
Net income attributable to shareholders	**$ 578.4**	$ 607.2
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(10.6)**	(5.1)
Net income attributable to shareholders, adjusted for dilution effect	**$ 567.8**	$ 602.1
Weighted average number of shares outstanding (in millions)	**243.5**	251.6
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**4.8**	4.7
Weighted average number of diluted shares outstanding (in millions)	**248.3**	256.3

During the year ended December 31, 2021, 841,610 options under the Quebecor plan and 25,000 options under the TVA Group Inc. ("TVA Group") plan were excluded from the diluted earnings per share calculation since their impact is anti-dilutive.

10. BUSINESS ACQUISITIONS

2021

- In 2021, the Corporation acquired businesses, included in the Telecommunications segment and in the Sports and Entertainment segment, for a total cash consideration of $21.2 million.
- In 2021, a post-closing adjustment of $0.2 million was received relating to a prior acquisition.

2020

- On December 31, 2020, Videotron closed the acquisition of Télédistribution Amos inc. and its network in Abitibi-Témiscamingue for a cash consideration of $32.9 million, net of cash acquired of $0.1 million. The acquired assets consist mainly of the network, intangible assets and goodwill.
- On June 17, 2020, the Sports and Entertainment segment acquired the Théâtre Capitole, a concert hall in Québec City, for a cash consideration of $10.8 million, net of an assumed working capital liability. The acquired assets consist mainly of the building and equipment.

11. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron and the Québec government, jointly with the Canadian government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron will extend its high-speed Internet network to connect approximately 37,000 additional households and the government has committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government in March 2021 was classified as restricted cash with a corresponding amount recorded as deferred subsidies on the consolidated balance sheets. In 2021, $53.8 million of these deferred subsidies were recognized as a reduction of additions to property, plant and equipment, upon the realization of the required investments.

12. ACCOUNTS RECEIVABLE

	2021	2020
Trade	**$ 614.2**	$ 459.6
Other	**130.9**	104.0
	$ 745.1	$ 563.6

[1] In 2021, Videotron acquired 294 blocks of spectrum in the 3500 MHz band across the country. More than half of the investment is concentrated in four Canadian provinces outside Québec: southern and eastern Ontario, Manitoba, Alberta and British Columbia. Videotron made an initial deposit of $166.0 million in the third quarter of 2021 for the acquisition of these spectrum licences. The final payment of $664.0 million was made on December 17, 2021.

As of December 31, 2020	$ 731.6	$ 540.6	$ 194.5	$ 1,466.7
As of December 31, 2021	**$ 1,561.6**	**$ 515.0**	**$ 267.5**	**$ 2,344.1**

The cost of internally generated intangible assets, mainly composed of software, was $902.1 million as of December 31, 2021 ($732.5 million as of December 31, 2020). For the year ended December 31, 2021, the Corporation recorded additions of internally generated intangible assets of $186.0 million ($98.6 million in 2020).

The accumulated amortization and impairment losses on internally generated intangible assets, mainly composed of software, were $485.1 million as of December 31, 2021 ($437.2 million as of December 31, 2020). For the year ended December 31, 2021, the Corporation recorded $64.2 million in amortization on its internally generated intangible assets ($52.2 million in 2020). The net carrying value of internally generated intangible assets was $417.0 million as of December 31, 2021 ($295.3 million as of December 31, 2020).

Spectrum licences are allocated to the Telecommunications CGU, broadcasting licences are allocated to the Broadcasting CGU, trademarks are allocated to the Telecommunications and Magazines CGUs, while sport franchises are allocated to the Sports and Entertainment CGU. The net carrying value of intangible assets with an indefinite useful life was $1,571.1 million as of December 31, 2021 ($741.1 million as of December 31, 2020).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. GOODWILL (continued)

The net carrying amount of goodwill as of December 31, 2021 and 2020 was allocated to the following significant CGU groups:

		2021		2020
CGU groups				
Telecommunications	**$**	**2,683.7**	$	2,679.2
Other[1]		**34.8**		34.8
Total	**$**	**2,718.5**	$	2,714.0

[1] Includes mainly the CGUs related to Film, audiovisual content and television activities, Book publishing and distribution activities, and Sports and Entertainment activities.

Recoverable amounts

CGU recoverable amounts were determined based on the higher of a value in use or a fair value less costs of disposal with respect to the impairment tests performed. The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. In particular, specific assumptions are used for each type of revenue generated by a CGU or for each nature of expenses, as well as for future capital expenditures. Such assumptions will consider, among many other factors, subscribers, readership and viewer statistics, advertising market trends, competitive landscape, evolution of product and service offerings, wireless penetration growth, proliferation of media platforms, technology evolution, broadcast programming strategy, bargaining agreements, Canadian GDP rates, and operating cost structures.

A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of (i) the time value of money, and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate. In certain circumstances, the Corporation can also estimate the fair value less cost of disposal with a market approach that consists of estimating the recoverable amount by using multiples of operating performance of comparable entities, transaction metrics and other financial information available, instead of primarily using the discounted cash flow method. The following key assumptions were used to determine recoverable amounts in the most recent impairment tests performed on the Corporation's significant CGU groups:

		2021		2020
CGU groups[1]	**Pre-tax discount rate (WACC)**	**Perpetual growth rate**	Pre-tax discount rate (WACC)	Perpetual growth rate
Telecommunications [2]	**8.5** %	**2.0 %**	8.5 %	2.0 %
Other	**11.5 to 15.5**	**0.0 to 2.0**	10.5 to 15.5	0.0 to 2.0

[1] In 2021 and 2020, the recoverable amounts of all CGUs were based on value in use, using the discounted cash flow method, except the Television CGU which was based on fair value less costs of disposal in 2021.

[2] The same recoverable amount used in the 2020 annual impairment test was used in 2021. Accordingly, pre-tax discount rate and perpetual growth rate are the same in 2021 and 2020.

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)
Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

16. GOODWILL (continued)

Recoverable amounts (continued)

No reasonable changes in the discount rate or in the perpetual growth rate used in the most recent test performed would have caused the recoverable amount of the Telecommunications CGU to equal its carrying value.

17. OTHER ASSETS

		2021		2020
Contract assets[1]	**$**	**155.6**	$	247.2
Audiovisual content		**212.0**		195.3
Contract costs[2]		**174.8**		148.2
Investments[3]		**159.3**		81.0
Equipment installments receivable		**358.6**		148.6
Other		**55.1**		97.9
		1,115.4		918.2
Less current portion of contract assets		**(129.4)**		(174.9)
Less current portion of audiovisual content (included in “Inventories”)		**(139.5)**		(138.0)
Less current portion of contract costs (included in “Other current assets”)		**(68.5)**		(59.9)
Less current portion of equipment installments receivable (included in “Accounts receivable”)		**(256.9)**		(111.6)
	$	**521.1**	$	433.8

1 Impairment loss on contract assets resulting from mobile contracts being cancelled prior to their initial term amounted to $17.1 million in 2021 ($20.5 million in 2020), net of the early termination penalty charged to the customer. In current and comparative periods, there were no significant cumulative catch-up adjustments to revenue that affected the corresponding contract asset, including adjustments arising from a change in an estimate of the transaction price or a contract modification. There were also no significant changes in the time frame for a performance obligation to be satisfied.

2 Amortization amounted to $73.3 million in 2021 ($65.9 million in 2020).

3 In 2021, the Corporation made a strategic investment a Turkish digital technology firm for a cash consideration of $48.5 million. This investment in a foreign associate is accounted for using the equity method. A loss of $16.2 million on the translation of this investment was recorded in the consolidated statements of comprehensive income in 2021.

In 2021, the Corporation also acquired an interest in Alithya in connection with the sale of its investment in R3D Conseil inc. (note 6). This equity investment is measured at fair value through other comprehensive income and accordingly, a gain on revaluation of $1.8 million was recorded in the consolidated statements of comprehensive income.

18. ACCOUNTS PAYABLE, ACCRUED CHARGES AND PROVISIONS

		2021		2020
Trade and accruals	**$**	**681.7**	$	666.8

		$ 6,467.9	$ 5,744.9

As of December 31, 2021, the carrying value of long-term debt denominated in U.S. dollars, excluding financing costs, was $3,245.9 million ($3,655.1 million as of December 31, 2020) while the net fair value of related hedging derivative instruments was in an asset position of $381.4 million ($605.1 million as of December 31, 2020).

(i) This mortgage loan bears interest at a fixed rate, payable every month, and matures in October 2022. The Corporation repays the principal amount in monthly repayments and the balance at the end of the term. The loan is secured by a first ranking hypothec on the head office building.

(ii) The debts of these subsidiaries are non-recourse to Quebecor.

(iii) Quebecor Media's bank credit facility provides for a $300.0 million secured revolving credit facility that matures in July 2022 and bears interest at Bankers' acceptance rate, London Inter-Bank Offered Rate ("LIBOR"), Canadian prime rate or U.S. prime rate, plus a premium determined by Quebecor Media's leverage ratio. This credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Quebecor Media's ability to incur additional indebtedness, pay dividends, and make other distributions. It is secured by liens on all of the movable property and assets of Quebecor Media (primarily shares of its subsidiaries), now owned or hereafter acquired. As of December 31, 2021, the credit facility was secured by assets with a carrying value of $1,255.7 million ($1,130.2 million in 2020). As of December 31, 2021 and 2020, no amount was drawn on the secured revolving credit facility.

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

19. LONG-TERM DEBT (continued)

(iv) The Senior Notes are unsecured and contain certain restrictions on the respective issuers, including limitations on their ability to incur additional indebtedness, pay dividends, or make other distributions. Some Notes are redeemable at the option of the issuer, in whole or in part, at a price based on a make-whole formula during the first three or five years of the term of the Notes and at a decreasing premium thereafter, while the remaining Notes are redeemable at a price based on a make-whole formula at any time prior to maturity. The Senior Notes issued by Videotron are guaranteed by specific subsidiaries of Videotron. The following table summarizes the terms of the outstanding Senior Notes as of December 31, 2021:

Principal amount	Annual nominal interest rate	Maturity date	Interest payable every 6 months on
Quebecor Media			
US$ 850.0	5.750 %	January 15, 2023	June and December 15
Videotron			
US$ 600.0	5.375 %	June 15, 2024	June and December 15
$ 400.0	5.625 %	June 15, 2025	April and October 15
$ 375.0	5.750 %	January 15, 2026	March and September 15
US$ 600.0	5.125 %	April 15, 2027	April and October 15
$ 800.0	4.500 %	January 15, 2030	April and October 15
$ 650.0[1]	3.125 %	January 15, 2031	January and July 15
$ 750.0[2]	3.625 %	June 15, 2028	June and December 15
US$ 500.0[3]	3.625 %	June 15, 2029	June and December 15

1 The Notes were issued in January 2021 for net proceeds of $644.0 million, net of financing costs of $6.0 million.

2 The Notes were issued in June 2021 for net proceeds of $743.2 million, net of financing costs of $6.8 million.

3 The Notes were issued in June 2021 for net proceeds of $599.6 million, net of financing costs of $5.8 million.

(v) The debts of these subsidiaries are non-recourse to Quebecor Media.

(vi) Videotron’s bank credit facility provides for a $1,500.0 million secured revolving credit facility that matures in July 2023 and bears interest at Bankers’ acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by Videotron’s leverage ratio. The bank credit facility is secured by a first ranking hypothec on the universality of all tangible and intangible assets, current and future, of Videotron and most of its wholly owned subsidiaries. As of December 31, 2021, the bank credit facility was secured by assets with a carrying value of $8,900.3 million ($8,114.0 million in 2020). The bank credit facility contains covenants such as maintaining certain financial ratios, as well as limitations on Videotron’s ability to incur additional indebtedness, pay dividends, or make other distributions. As of December 31, 2021, $285.0 million was drawn on the secured revolving credit facility (no amount was drawn as of December 31, 2020).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

19. LONG-TERM DEBT (continued)

(vii) TVA Group's bank credit facility provides for a secured revolving credit facility in the amount of $75.0 million that matures in February 2022 and bears interest at Bankers' acceptance rate, LIBOR, Canadian prime rate or U.S. prime rate, plus a premium determined by TVA Group's leverage ratio. The bank credit facility contains covenants such as maintaining certain financial ratios, limitations on TVA Group's ability to incur additional indebtedness, pay dividends, or make other distributions. The credit facility is secured by liens on all of its movable assets and an immovable hypothec on its head office building. As of December 31, 2021, $12.0 million was drawn on the revolving credit facility ($27.1 million as of December 31, 2020).

In December 2021, Investissement Québec granted TVA Group an interest-free unsecured loan for a maximum amount of $25.0 million in order to support the construction of a fourth MELS production studio. The loan contains certain restrictive covenants as well as typical representations and warranties for these loans. As of December 31, 2021, no amount was drawn on the unsecured loan.

On February 15, 2022, TVA Group amended its secured revolving credit facility to extend its term to February 2023.

On December 31, 2021, the Corporation was in compliance with all debt covenants.

Principal repayments of long-term debt over the coming years are as follows:

2022	$	56.5
2023		1,374.2
2024		758.2
2025		400.0
2026		375.0
2027 and thereafter		3,590.1

Changes in long-term debt are as follows:

		2021		2020
Balance at beginning of year	**$**	**5,773.4**	$	5,957.5
Net change under revolving facilities, net of financing costs		**269.8**		(127.0)
Issuance of long-term debt, net of financing costs		**1,986.8**		–
Repayment of long-term debt, excluding early redemption premium		**(1,486.1)**		(1.3)
Foreign currency translation		**(22.6)**		(71.4)
Amortization of financing costs		**7.9**		8.1
Change in fair value related to hedged interest rate risk		**(8.5)**		7.7
Other		**3.7**		(0.2)
Balance at end of year	**$**	**6,524.4**	$	5,773.4

20. LEASE LIABILITIES

Changes in lease liabilities are as follows:

		2021		2020
Balance at beginning of year	**$**	**173.3**	$	137.9
Lease obligations financing right-of-use assets		**51.8**		77.4
Repayments		**(41.1)**		(41.9)
Other		**(0.8)**		(0.1)
		183.2		173.3
Less current portion		**(36.1)**		(34.3)
	$	**147.1**	$	139.0

Interest rates on lease liabilities ranged from 1.9% to 9.3% as of December 31, 2021 and 2020.

Repayments of lease liabilities over the coming years are as follows:

2022	$	36.1
2023		32.6
2024		26.8
2025		17.7
2026		11.1
2027 and thereafter		58.9

21. OTHER LIABILITIES

	Note		**2021**		2020
Defined benefit plans	31	**$**	**166.1**	$	323.8
Decommissioning obligation			**59.0**		19.3
Other[1]			**68.1**		79.7
		$	**293.2**	$	422.8

[1] Including exchangeable debentures, Series 2001 and Series Abitibi that mature in 2026, having a combined principal amount outstanding of $844.9 million as of December 31, 2021 and 2020 and a combined carrying value of $2.1 million as of December 31, 2021 and 2020. The exchangeable debentures bear interest at a rate of 0.10% on the debentures' principal amount. Prior to maturity, the Corporation may, at its option, satisfy its obligations without any consideration.

22. CONVERTIBLE DEBENTURES

On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. Interest on the convertible debentures is payable semi-annually in cash, in Class B Subordinate Voting Shares ("Class B Shares") or with the proceeds from the sale of Class B Shares. At maturity, the convertible debentures will be payable in cash by the Corporation at the outstanding principal amount, plus accrued and unpaid interest, subject to redemption, conversion, purchase or previous repayment. One day prior to maturity, the Corporation may redeem the outstanding convertible debentures by issuing that number of Class B Shares obtained by dividing the outstanding principal amount by the then current market price of a Class B share, subject to an adjusted floor price of approximately $25.49 per share (that is, a maximum number of approximately 5,883,572 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $31.87 per share (that is, a minimum number of approximately 4,706,858 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price). At any time prior to the day prior to maturity, the Corporation may redeem or convert, in whole or in part, the outstanding convertible debentures, subject to the terms of the trust indenture. The convertible debentures are convertible at all times prior to the maturity date into Class B Shares by the holders, in accordance with the terms of the trust indenture. In all cases, the Corporation has the option to pay an amount in cash equal to the market value of shares that would otherwise have been issued, being the product of (i) the number of those Class B Shares and (ii) the then-current market price of a Class B share.

The principal amount of the convertible debentures is presented separately as a financial liability and the conversion features related to the floor and ceiling prices are presented as embedded derivatives. The fair value of these embedded derivatives as of December 31, 2021 was estimated using the Black-Scholes option pricing model, considering a risk-free rate of 1.20% (0.43% in 2020), a dividend yield of 3.91% (2.43% in 2020), and an expected volatility of 24.32% (22.00% in 2020). A one dollar increase in the market price of a Class B share as of December 31, 2021 would have decreased the gain on embedded derivatives related to convertible debentures by $4.1 million, while a one dollar decrease in the market price of a Class B share would have increased the gain by $4.1 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

23. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	**Amount**	**Number**	**Amount**
Balance as of December 31, 2019	77,213,834	$ 8.6	177,415,407	$ 1,047.3
Class A Shares converted into Class B Shares	(174,000)	–	174,000	–
Shares purchased and cancelled	–	–	(6,457,050)	(38.1)
Balance as of December 31, 2020	77,039,834	8.6	171,132,357	1,009.2
Class A Shares converted into Class B Shares	(55,800)	–	55,800	–
Shares purchased and cancelled	–	–	(8,914,650)	(52.6)
Balance as of December 31, 2021	**76,984,034**	**$ 8.6**	**162,273,507**	**$ 956.6**

On August 4, 2021, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2021, the Corporation purchased and cancelled 8,914,650 Class B Shares for a total cash consideration of $282.4 million (6,457,050 Class B Shares for a total cash consideration of $201.2 million in 2020). The excess of $229.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded as a reduction of retained earnings in 2021 ($163.1 million in 2020).

On February 23, 2022, the Board of Directors of the Corporation declared a dividend of $0.30 per share on Class A Shares and Class B Shares, or approximately $71.8 million, payable on April 5, 2022, to shareholders of record at the close of business on March 11, 2022.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS

(a) Quebecor plans

(i) Stock option plan

Under a stock option plan established by the Corporation, 26,000,000 Class B Shares of the Corporation have been set aside for directors, officers, senior employees, and other key employees of Quebecor. The exercise price of each option is equal to the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the granting of the option. Each option may be exercised during a period not exceeding 10 years from the date granted. As per the provisions of the plan, options usually vest as follows: 1/3 after one year, 2/3 after two years, and 100% three years after the original grant. The Board of Directors of the Corporation may, at its discretion, affix different vesting periods at the time of each grant. Thus, since 2018, when granting options, the Board of Directors of the Corporation has determined that the options would vest equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. Holders of options under the stock option plan have the choice, when they exercise their options, of acquiring the Class B Shares at the corresponding option exercise price or receiving a cash payment equivalent to the difference between the market value of the underlying shares and the exercise price of the option. Holders of options have committed to obtain the consent of the Corporation before exercising their right to subscribe the shares for which they exercise their options.

The following table gives details on changes to outstanding options for the years ended December 31, 2021 and 2020:

	2021		2020	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**3,630,959**	**$ 30.57**	2,504,892	$ 29.21
Granted	**100,000**	**31.49**	1,342,267	33.19
Exercised	**(101,326)**	**26.52**	–	–
Cancelled	**(1,250,033)**	**30.64**	(216,200)	31.09
Balance at end of year	**2,379,600**	**$ 30.74**	3,630,959	$ 30.57
Vested options at end of year	**202,260**	**$ 26.52**	–	$ –

During the year ended December 31, 2021, 101,326 of the Corporation's stock options were exercised for a cash consideration of $0.4 million (none in 2020).

As of December 31, 2021, exercise prices of all outstanding options were from $26.52 to $33.19 and the average years to maturity was 7.8.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(a) Quebecor plans (continued)

(ii) Deferred share unit plan

The Quebecor DSU plan is for the benefit of the Corporation's directors. Under this plan, each director receives a portion of his/her compensation in the form of DSUs, such portion representing at least 50% of the annual retainer, which could be less upon reaching the minimum shareholding threshold set out in the policy regarding minimum shareholding by directors. Subject to certain conditions, each director may elect to receive up to 100% of the total fees payable for services as a director in the form of units. The value of a DSU is based on the weighted average trading price of Quebecor Class B Shares on the Toronto Stock Exchange over the last five trading days immediately preceding the relevant date. DSUs will entitle the holders thereof to dividends, which will be paid in the form of additional units at the same rate as that applicable to dividends paid from time to time on Quebecor Class B Shares. Subject to certain limitations, the DSUs will be redeemed by the Corporation when the director ceases to serve as a director of the Corporation. For the purpose of redeeming units, the value of a DSU shall correspond to the fair market value of Quebecor Class B Shares on the date of redemption. As of December 31, 2021, the total number of DSUs outstanding under this plan was 446,173 (404,053 as of December 31, 2020).

(b) Quebecor Media stock option plan

During the year ended December 31, 2021, 47,950 of Quebecor Media's stock options were exercised for a cash consideration of $3.2 million (81,250 stock options for $4.7 million in 2020). As of December 31, 2021, there were no outstanding option related to the Quebecor Media stock option plan.

(c) TVA Group stock option plan

Under this stock option plan, 2,200,000 TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares") have been set aside for senior executives and directors of TVA Group and its subsidiaries. The terms and conditions of options granted are determined by TVA Group's Human Resources and Corporate Governance Committee. The subscription price of an option cannot be less than the closing price of TVA Group Class B Shares on the Toronto Stock Exchange the day before the option is granted. Unless the Human Resources and Corporate Governance Committee decides otherwise, options vest over a five-year period in accordance with one of the following vesting schedules as determined by the Human Resources and Corporate Governance Committee at the time of grant: (i) equally over five years with the first 20% vesting on the first anniversary of the date of the grant; (ii) equally over four years with the first 25% vesting on the second anniversary of the date of grant; and (iii) equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. Thus, since 2018, when granting options, the Human Resources and Corporate Governance Committee has determined that the options would vest equally over three years with the first 33 1/3% vesting on the third anniversary of the date of grant. The term of an option cannot exceed 10 years. Holders of options under the plan have the choice, at the time of exercising their options, of receiving a cash payment from TVA Group equal to the number of shares corresponding to the options exercised, multiplied by the difference between the market value of the TVA Group Class B Shares and the exercise price of the option or, subject to certain conditions, exercise their options to purchase TVA Group Class B Shares at the exercise price. The market value is defined as the average closing market price of the TVA Group Class B Shares for the last five trading days preceding the date on which the option was exercised. Holders of options have committed to obtain the consent of TVA Group before exercising their right to subscribe the shares for which they exercise their options.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(c) TVA Group stock option plan (continued)

The following table gives details on changes to outstanding options for the years ended December 31, 2021 and 2020:

	2021		2020	
	Options	**Weighted average exercise price**	Options	Weighted average exercise price
Balance at beginning of year	**795,000**	**$ 2.06**	515,000	$ 2.43
Granted	**–**	**–**	310,000	1.40
Exercised	**(39,999)**	**2.16**	–	–
Cancelled	**(385,498)**	**2.01**	(30,000)	1.65
Balance at end of year	**369,503**	**$ 2.09**	795,000	$ 2.06
Vested options at end of year	**48,832**	**$ 4.56**	35,000	$ 6.85

As of December 31, 2021, exercise prices of all outstanding options were from $1.40 to $6.85 and the average years to maturity was 7.6.

(d) Deferred share unit and performance share unit plans

The DSU is based either on Quebecor Class B Shares or on TVA Group Class B Shares. The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of December 31, 2021, 96,909 DSUs based on Quebecor Class B Shares and 128,064 DSUs based on TVA Group Class B Shares were outstanding under these plans (148,785 and 204,598, respectively, as of December 31, 2020). During the first quarter of 2020, a cash consideration of $4.8 million was paid relating to a performance share unit plan terminated in 2020.

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

24. STOCK-BASED COMPENSATION PLANS (continued)

(e) Assumptions in estimating the fair value of stock-based awards

The fair value of stock-based awards under the stock option plans was estimated using the Black-Scholes option pricing model. The following weighted-average assumptions were used to estimate the fair value of all outstanding stock options under the stock option plans:

December 31, 2021	**Quebecor**	**TVA Group**
Risk-free interest rate	**1.33 %**	**1.29 %**
Distribution yield	**3.91 %**	**– %**
Expected volatility	**22.22 %**	**52.11 %**
Expected remaining life	**3.8 years**	**3.7 years**

December 31, 2020	Quebecor	Quebecor Media	TVA Group
Risk-free interest rate	0.54 %	0.27 %	0.53 %
Distribution yield	2.43 %	1.00 %	– %
Expected volatility	21.15 %	28.96 %	56.27 %
Expected remaining life	4.6 years	1.0 year	4.5 years

The expected volatility is based on the historical volatility of the underlying share price for a period equivalent to the expected remaining life of the options. The expected remaining life of options granted represents the period of time that options granted are expected to be outstanding. The risk-free interest rate over the expected remaining life of the option is based on the Government of Canada yield curve in effect at the time of the valuation. Distribution yield is based on the current average yield.

(f) Liability for vested options

As of December 31, 2021, the liability for all vested options was \$0.3 million as calculated using the intrinsic value (\$2.9 million as of December 31, 2020).

(g) Consolidated stock-based compensation charge

For the year ended December 31, 2021, a reversal of the consolidated charge related to all stock-based compensation plans was recorded in the amount of \$3.8 million (a charge of \$4.9 million in 2020).

QUEBECOR INC.

25. ACCUMULATED OTHER COMPREHENSIVE LOSS ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Translation of investments in foreign associates	Defined benefit plans	Equity investment	Total
Balance as of December 31, 2019	$ 40.3	$ –	$ (104.4)	$ –	$ (64.1)
Other comprehensive loss	(10.7)	–	(59.1)	–	(69.8)
Balance as of December 31, 2020	29.6	–	(163.5)	–	(133.9)
Other comprehensive income (loss)	3.1	(17.6)	127.5	1.6	114.6
Balance as of December 31, 2021	**$ 32.7**	**$ (17.6)**	**$ (36.0)**	**$ 1.6**	**$ (19.3)**

[1] No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 1/2-year period.

26. COMMITMENTS

The Corporation has entered into long-term commitments to purchase services, tangible and intangible assets, and broadcasting rights, and to pay licences and royalties. The minimum payments for the coming years are as follows:

2022	$ 322.1
2023 to 2026	765.0
2027 and thereafter	386.7

27. GUARANTEES

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items on the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued on the consolidated balance sheets with respect to these indemnifications.

28. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation’s results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to these legal proceedings.

In August 2021, a competitor launched legal proceedings in Federal Court contesting the awarding of licences in the 3500 MHZ band in Western Canada to Videotron (note 14). This case is currently before the Court.

On August 15, 2019, the CRTC issued an order to finalize the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 had been invoiced to resellers and accounted for in the Corporation’s consolidated financial statements on the basis of the effective date of March 31, 2016. The new proposed rates were substantially lower than the interim rates. On May 27, 2021, the CRTC restored, in a final decision, the interim rates that had been in effect since 2016. Accordingly, no adjustments are necessary to the consolidated financial statements.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, restricted cash, trade receivables, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, lease liabilities and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, and (ii) to achieve a targeted balance of fixed- and floating-rate debt. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

(a) Description of derivative financial instruments

(i) Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.2578	$ 177.4	US$ 141.0

5.750% Senior Notes due 2023	2016 to 2023	US$	431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$	418.7	6.85%	0.9759
Videotron					
5.375% Senior Notes due 2024	2014 to 2024	US$	158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$	441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$	600.0	4.82%	1.3407
3.625% Senior Notes due 2029	2021 to 2029	US$	500.0	4.04%	1.2109

Certain cross-currency swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(b) Fair value of financial instruments

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy, which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk, impacted by the financial and economic environment prevailing at the date of the valuation, in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option-pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2021 and 2020 are as follows:

		2021		2020
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,554.0)**	**$ (6,660.4)**	$ (5,786.4)	$ (6,216.1)
Convertible debentures[2]	**(139.5)**	**(139.5)**	(153.5)	(153.5)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**0.9**	**0.9**	(8.0)	(8.0)
Cross-currency swaps	**381.4**	**381.4**	605.1	605.1

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The net fair value of derivative financial instruments designated as cash flow hedges is an asset position of $348.1 million as of December 31, 2021 ($552.5 million in 2020) and the net fair value of derivative financial instruments designated as fair value hedges is an asset position of $34.2 million as of December 31, 2021 ($44.6 million in 2020).

QUEBECOR INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(c) Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The gross carrying amounts of financial assets represent the maximum credit exposure. As of December 31, 2021, the gross carrying amount of trade receivables and contract assets, including their long-term portions, was $913.4 million ($790.2 million as of December 31, 2020).

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. The Corporation uses its customers' historical terms of payment and acceptable collection periods for each customer class, as well as changes in its customers' credit profiles, to define default to collect amounts receivable from customers, including contract assets.

As of December 31, 2021, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions. As of December 31, 2021, the provision for expected credit losses represented 2.0% of the gross amount of trade receivables and contract assets (2.6% as of December 31, 2020), while 6.9% of trade receivables were 90 days past their billing date (5.0% as of December 31, 2020).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2021 and 2020:

		2021		2020
Balance at beginning of year	**$**	**20.8**	$	19.6
Changes in expected credit losses charged to income		**17.2**		17.4
Write-off		**(19.5)**		(16.2)
Balance at end of year	**$**	**18.5**	$	20.8

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

(d) Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.1 years as of December 31, 2021 (4.3 years as of December 31, 2020).

The Corporation's management believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases and dividends to shareholders. The Corporation has access to cash flows generated by its subsidiaries through dividends (or distributions) paid by Quebecor Media.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(d) Liquidity risk management (continued)

As of December 31, 2021, material contractual obligations related to financial instruments included capital repayment and interest on long-term debt, on convertible debentures and on lease liabilities, and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. These obligations and their maturities are as follows:

	Total	Less than 1 year	1-3 years	3-5 years	5 years or more
Accounts payable and accrued charges	**$ 847.9**	$ 847.9	$ –	$ –	$ –
Long-term debt[1]	**6,554.0**	56.5	2,132.4	775.0	3,590.1
Convertible debentures[2]	**150.0**	–	150.0	–	–
Interest payments on long-term debt and convertible debentures[3]	**1,375.7**	254.1	453.3	338.5	329.8
Lease liabilities	**183.2**	36.1	59.4	28.8	58.9
Interest payments on lease liabilities	**43.9**	7.3	10.5	7.0	19.1
Derivative financial instruments[4]	**(332.8)**	1.6	(354.2)	–	19.8
Total	**$ 8,821.9**	**$ 1,203.5**	**$ 2,451.4**	**$ 1,149.3**	**$ 4,017.7**

[1] The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

[2] Based on the market value at December 31, 2021 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Class B share at that date, subject to a floor price of approximately $25.49 per share and a ceiling price of approximately $31.87. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

[3] Estimate of interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2021.

[4] Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging on the principal of U.S.-dollar-denominated debt.

(e) Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways, modems, mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2021, and to hedge its exposure on certain purchases of set-top boxes, gateways, modems, mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(e) Market risk (continued)

Foreign currency risk (continued)

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2021 is as follows:

Increase (decrease)		**Income**		**Other comprehensive income**
Increase of $0.10	**$**	**0.7**	**$**	**35.1**
Decrease of $0.10		**(0.7)**		**(35.1)**

A variance of $0.10 in the 2021 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $8.8 million on the value of unhedged purchases of goods and services and $6.6 million on the value of unhedged acquisitions of tangible and intangible assets in 2021.

A variance of 10% in the exchange rate of CAN dollar per one Turkish Lira as of December 31, 2021 would have resulted in a variance of $3.2 million of the loss on translation of investments in foreign associates in the consolidated statements of comprehensive income.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency swap agreements in order to manage cash flow risk exposure. As of December 31, 2021, after taking into account the hedging instruments, long-term debt was comprised of 91.7% fixed-rate debt (96.1% in 2020) and 8.3% floating-rate debt (3.9% in 2020).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2021 was $5.2 million.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures (note 22), as of December 31, 2021, as per the Corporation's valuation models, is as follows:

Increase (decrease)		**Income**		**Other comprehensive income**
Increase of 100 basis points	**$**	**(0.7)**	**$**	**(5.2)**
Decrease of 100 basis points		**0.7**		**5.2**

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

29. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

(f) Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2021 and 2020 is as follows:

	2021	2020
Bank indebtedness	**$ –**	$ 1.7
Long-term debt	**6,524.4**	5,773.4
Convertible debentures	**150.0**	150.0
Embedded derivatives related to convertible debentures	**(8.4)**	6.5
Lease liabilities	**183.2**	173.3
Derivative financial instruments	**(382.3)**	(597.1)
Cash and cash equivalents	**(64.7)**	(136.7)
Net liabilities	**6,402.2**	5,371.1
Equity	**$ 1,378.8**	$ 1,214.1

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, and the declaration and payment of dividends or other distributions.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

30. RELATED PARTY TRANSACTIONS

Compensation of key management personnel

Key management personnel comprises members of the Board of Directors and key senior managers of the Corporation and its main subsidiaries. Their compensation is as follows:

	2021	2020
Salaries and short-term benefits	**$ 10.0**	$ 8.9
Share-based compensation	**(0.8)**	1.6
Termination and other long-term benefits	**2.8**	0.8
	$ 12.0	$ 11.3

Operating transactions

During the year ended December 31, 2021, the Corporation incurred expenses with affiliated corporations in the amount of $13.3 million ($12.6 million in 2020), which are included in purchase of goods and services, and acquired property, plant and equipment and intangible assets from affiliated corporations in the amount of $4.6 million (none in 2020). The Corporation made sales to affiliated corporations in the amount of $7.8 million in 2021 ($3.7 million in 2020). These transactions were accounted for at the consideration agreed between parties.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS

The Corporation maintains various flat-benefit plans, final-pay plans with indexation features from zero to 2%, as well as defined contribution plans. The Corporation also provides postretirement benefits to eligible retired employees. The Corporation's pension plans are registered with a provincial or federal regulatory authority.

The Corporation's funding policy for its funded pension plans is to maintain its contribution at a level sufficient to cover benefits and to meet requirements of the applicable regulations and plan provisions that govern the funding of the plans. These provisions establish, among others, the future amortization payments when the funding ratio of the pension plans is insufficient as defined by the relevant provincial and federal laws. Payments are determined by an actuarial report performed by an independent company at least every three years or annually, according to the applicable laws and in accordance with plan provisions.

By their design, the defined benefit plans expose the Corporation to the typical risks faced by defined benefit plans, such as investment performance, changes to the discount rates used to value the obligation, longevity of plan participants, and future inflation. The administration of the plans is assured by pension committees composed of members of the plans, members of the Corporation's management and independent members or by the Corporation, in accordance with the provisions of each plan. Under the Corporation's rules of governance, the approval and oversight of the defined benefit plan policies are performed at different levels through the pension committees, the Corporation's management, or the Audit and Risk Management Committee. The risk management of pension plans is also performed under the leadership of these committees at various levels. The custody of securities and management of security transactions are assigned to trustees within a mandate given by the pension committees or the Corporation, as the case may be. Policies include those on investment objectives, risk-mitigation strategies and the mandate to hire investment fund managers and monitor their work and performance. The defined benefit pension plans are monitored on an ongoing basis to assess the benefit, funding and investment policies, financial status, and the Corporation's funding requirement.

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

The following tables show a reconciliation of the changes in the plans' benefit obligations and the fair value of plan assets for the years ended December 31, 2021 and 2020:

	Pension benefits		Postretirement benefits	
	2021	2020	**2021**	2020
Change in benefit obligations				
Benefit obligations at the beginning of the year	**$ 1,680.8**	$ 1,492.7	**$ 70.1**	$ 62.9
Service costs	**40.1**	37.4	**2.0**	1.9
Interest costs	**43.6**	47.1	**1.8**	1.9
Plan participants' contributions	**9.1**	10.5	**–**	–
Actuarial (gain) loss arising from:				
Financial assumptions	**(139.4)**	159.5	**(7.2)**	8.2
Demographic assumptions	**12.5**	–	**–**	–
Participant experience	**4.5**	(2.7)	**–**	–
Benefits and settlements paid	**(70.9)**	(64.4)	**(1.6)**	(1.7)
Plan amendments and other	**1.0**	0.7	**(3.8)**	(3.1)
Benefit obligations at the end of the year	**$ 1,581.3**	$ 1,680.8	**$ 61.3**	$ 70.1
Change in plan assets				
Fair value of plan assets at the beginning of the year	**$ 1,440.0**	$ 1,345.8	**$ –**	$ –
Actual return on plan assets	**107.7**	122.9	**–**	–
Employer contributions	**38.2**	27.6	**1.6**	1.7
Plan participants' contributions	**9.1**	10.5	**–**	–
Benefits and settlements paid	**(70.9)**	(64.4)	**(1.6)**	(1.7)
Administrative fees	**(2.1)**	(2.4)	**–**	–
Fair value of plan assets at the end of the year	**$ 1,522.0**	$ 1,440.0	**$ –**	$ –

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

As of December 31, 2021, the weighted average duration of defined benefit obligations was 15.5 years (16.1 years in 2020). The Corporation expects future benefit payments of $66.8 million in 2022.

The investment strategy for plan assets takes into account a number of factors, including the time horizon of the pension plans' obligations and the investment risk. For each of the plans, an allocation range by asset class is developed, whereby a mix of asset classes is used to optimize the risk-return profile of plan assets and to mitigate asset-liability mismatch.

Plan assets are comprised of:

	2021	2020
Equity securities:		
Canadian	**15.7 %**	15.4 %
Foreign	**25.9**	24.8
Debt securities	**53.1**	55.7
Other	**5.3**	4.1
	100.0 %	100.0 %

The fair value of securities is based on quoted prices in an active market, while the fair value of other investments is not based on quoted prices in an active market.

Where funded plans have a net defined benefit asset, the Corporation determines if potential reductions in future contributions are permitted by applicable regulations and by collective bargaining agreements. When a defined benefit asset is created, it cannot exceed the future economic benefit that the Corporation can expect to obtain from the asset. The future economic benefit represents the value of reductions in future contributions and expenses payable to the pension fund. It does not reflect gains that could be generated in the future that would allow reductions in contributions by the Corporation. When there is a minimum funding requirement, this could also limit the amounts recognized on the balance sheet. A minimum funding requirement represents the present value of amortization payments based on the most recent actuarial financing reports filed.

The reconciliation of funded status to the net amount recognized on the consolidated balance sheets is as follows:

	Pension benefits		**Postretirement benefits**	
	2021	2020	**2021**	2020
Benefit obligations	**$ (1,581.3)**	$ (1,680.8)	**$ (61.3)**	$ (70.1)
Fair value of plan assets	**1,522.0**	1,440.0	**–**	–
Plan deficit	**(59.3)**	(240.8)	**(61.3)**	(70.1)
Asset limit and minimum funding adjustment	**(24.2)**	(12.9)	**–**	–
Net amount recognized[1]	**$ (83.5)**	$ (253.7)	**$ (61.3)**	$ (70.1)

[1] The net liability recognized for 2021 is $144.8 million ($323.8 million in 2020), of which an amount of $166.1 million ($323.8 million in 2020) is included in "Other liabilities" and $21.3 million (none in 2020) is included in "Other assets".

QUEBECOR INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Years ended December 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Components of re-measurements are as follows:

	Pension benefits		Postretirement benefits	
	2021	2020	**2021**	2020
Actuarial gain (loss) on benefit obligations	**$ 122.4**	$ (156.8)	**$ 7.2**	$ (8.2)
Actual return on plan assets, less interest income anticipated in the interest on the net defined benefit liability calculation	**70.9**	81.1	**–**	–
Asset limit and minimum funding adjustment	**(11.0)**	(0.8)	**–**	–
Re-measurement gain (loss) recorded in other comprehensive income (loss)	**$ 182.3**	$ (76.5)	**$ 7.2**	$ (8.2)

Components of the net benefit costs are as follows:

	Pension benefits		Postretirement benefits	
	2021	2020	**2021**	2020
Employee costs:				
Service costs	**$ 40.1**	$ 37.4	**$ 2.0**	$ 1.9
Plan amendments, administrative fees and other	**3.1**	4.4	**–**	(3.2)
Interest on net defined benefit liability	**7.0**	5.7	**1.8**	1.9
Net benefit costs	**$ 50.2**	$ 47.5	**$ 3.8**	$ 0.6

The expense related to defined contribution pension plans amounted to $21.5 million in 2021 ($20.1 million in 2020).

The expected employer contributions to the Corporation's defined benefit pension plans and postretirement benefit plans will be $38.2 million in 2022, based on the most recent financial actuarial reports filed (contributions of $39.8 million were paid in 2021).

31. PENSION PLANS AND POSTRETIREMENT BENEFITS (continued)

Assumptions

The Corporation determines its assumption for the discount rate to be used for purposes of computing annual service and interest costs based on an index of high-quality corporate bond yield and matched-funding yield curve analysis as of the measurement date.

The actuarial assumptions used in measuring the Corporation's benefit obligations as of December 31, 2021 and 2020 and current periodic benefit costs are as follows:

	Pension and postretirement benefits	
	2021	2020
Benefit obligations		
Rates as of year-end:		
Discount rate	**3.00 %**	2.50 %
Rate of compensation increase	**3.00**	3.00
Current periodic costs		
Rates as of preceding year-end:		
Discount rate	**2.50 %**	3.10 %
Rate of compensation increase	**3.00**	3.00

The assumed average retirement age of participants used ranged from 59 to 62 years.

The assumed health care cost trend rate used in measuring the accumulated postretirement benefit obligations was 7.30% at the end of 2021. These costs, as per the estimate, are expected to decrease gradually over the next five years to 5.30% and to remain at that level thereafter.

Sensitivity analysis

An increase of 10 basis points in the discount rate would have decreased the pension benefit obligation by $22.9 million and the postretirement benefit obligation by $1.5 million as of December 31, 2021. There are limitations to this sensitivity analysis since it only considers the impacts of an increase of 10 basis points in the discount rate assumption without changing any other assumptions. No sensitivity analysis was performed on other assumptions as a similar change to those assumptions would not have a significant impact on the consolidated financial statements.

32. DISCONTINUED OPERATIONS

In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions to the sale price were achieved in connection with the 4Degrees Colocation Inc. data centre operations sold in 2019 by Videotron.

This is Exhibit 52 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. ("Quebecor" or "the Corporation") is a holding company with a 75.4% interest in Quebecor Media Inc. ("Quebecor Media"), one of Canada's largest media groups. Quebecor Media's subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment.

During the third quarter of 2014, the Corporation changed its organizational structure and its operations are now managed through the following three segments: Telecommunications, Media, and Sports and Entertainment. The reorganization consisted in (a) the creation of the new Media segment, which includes all activities of the previous News Media and Broadcasting segments, as well as the book publishing and distribution activities previously included in the Leisure and Entertainment segment, (b) the creation of the new Sports and Entertainment segment, which includes all operating, production, distribution and management activities of the previous Leisure and Entertainment segment relating to music, entertainment, sports and the future Québec City Arena ("the Arena"), and (c) the transfer of the retail businesses from the previous Leisure and Entertainment segment to the Telecommunications segment. Accordingly, prior period figures in the Corporation's segmented information have been reclassified to reflect these changes.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian media corporation engaged in cable and mobile telecommunications; newspaper publishing and distribution; Internet portals and specialized websites; broadcasting; studio, soundstage and equipment leasing, post-production, visual effects and 3D animation; retailing, publishing and distribution of books and magazines; rental and distribution of video games and game consoles; music recording, production, distribution and retailing; music streaming services; production of shows and events; video game development; out of home advertising; two Quebec Major Junior Hockey League ("QMJHL") teams and sporting and cultural events management. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a premier cable and mobile communications service provider. Quebecor Media holds leading positions in the creation, promotion and distribution of news, entertainment and Internet-related services that are designed to appeal to audiences in every demographic category. Quebecor Media is pursuing a convergence strategy to capture synergies among all its media properties.

All amounts are stated in Canadian dollars ("CAN dollars") unless otherwise indicated.

The Corporation adopted International Financial Reporting Standards ("IFRS") for the presentation of its financial statements on January 1, 2011. As explained under "Changes in Accounting Policies" below, the Corporation has adopted retrospectively a new accounting policy for the accounting of its convertible debentures. Comparative figures for prior years have been restated.

DISCONTINUED OPERATIONS

On October 6, 2014, Quebecor Media announced the sale of its English-language newspaper businesses in Canada – 175 newspapers and publications, the Canoe portal in English Canada, and 8 printing plants, including the Islington, Ontario plant – for a cash consideration of $316.0 million. The transaction will be paid in cash, subject to certain adjustments, including a $10.0 million adjustment with respect to real estate holdings disposed of by Quebecor Media after the transaction date. The transaction is subject to Competition Bureau authorization. While the sale is under review by the Bureau, Quebecor Media will continue operating the businesses in question. The operating results and cash flows related to those businesses have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On September 2, 2014, Quebecor Media closed the sale of its Nurun Inc. ("Nurun") subsidiary to the French company Publicis Groupe for a cash consideration of $125.0 million, less disposed-of cash in the amount of $18.1 million. An amount of $8.2 million was also received in connection with certain adjustments as part of the transaction. The results of operations and cash flows related to that business, as well as the $41.5 million gain on the sale, have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On June 1, 2014, Quebecor Media finalized the sale of 74 Québec weeklies to Transcontinental Interactive Inc., ("Transcontinental Interactive"), a subsidiary of Transcontinental Inc. ("Transcontinental"), for a cash consideration of $75.0 million. $4.7 million was also received in 2014 in connection with certain adjustments to transferred working capital items. The transaction has been authorized by the competent regulatory authorities, specifically the Competition Bureau. The results of operations and cash flows related to those businesses, as well as the $7.9 million gain on the sale, have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

Quebecor Media announced that it was abandoning door-to-door distribution of community newspapers and flyers in Québec and discontinuing distribution of the Le Sac Plus doorknob bag as of January 2014. The operating results and cash flows related to those businesses have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On June 1, 2013, Quebecor Media sold its specialized website *Jobboom* for a cash consideration of $52.1 million, net of disposed-of cash in the amount of $5.4 million, and on November 29, 2013, it sold its specialized website *Réseau Contact* for a cash consideration of $7.1 million, net of disposed-of cash in the amount of $0.4 million. The operating results and cash flows related to those businesses, as well as the $37.6 million gain on the sale of the two websites, were reclassified as discontinued operations in the consolidated statements of income and cash flows.

In this Management Discussion and Analysis, only continuing operating activities of Quebecor are included in the analysis of segmented operating results.

HIGHLIGHTS SINCE END OF 2013

- Quebecor's sales totalled $3.72 billion in 2014, an increase of $68.6 million (1.9%) compared with 2013.
- Since the end of 2013, Quebecor has announced major management changes at the Corporation and its subsidiaries.
  - On April 28, 2014, Pierre Dion was appointed President and Chief Executive Officer of Quebecor and Quebecor Media. On May 7, 2014, Manon Brouillette was named President and Chief Executive Officer of Videotron.
  - On June 19, 2014, at Quebecor's Annual Meeting of Shareholders, the Right Honourable Brian Mulroney was named Chairman of the Board of Quebecor and Quebecor Media, succeeding Pierre Karl Péladeau, who resigned all his positions on the Boards of Directors of Quebecor and its subsidiaries on March 9, 2014, following his decision to enter politics. On March 10, 2014, Sylvie Lalande was appointed Chairperson of the Board of TVA Group Inc. ("TVA Group").
  - On July 30, 2014, Benoît Robert was appointed President and Chief Executive Officer of Sports and Entertainment Group.
  - On July 31, 2014, Quebecor created Media Group, a new segment dedicated to entertainment and news media. Media Group includes the operations of TVA Group, Sun Media Corporation, QMI Agency, Quebecor Media Out of Home, Quebecor Media Sales, Messageries Dynamiques, Quebecor Media Printing Inc., Sogides Group Inc., CEC Publishing Inc. ("CEC Publishing") and Readbooks S.A.S. ("Readbooks"). Julie Tremblay was appointed President and Chief Executive Officer of the new segment. She also serves as President and Chief Executive Officer of TVA Group.

<u>Telecommunications</u>

- In 2014, the Telecommunications segment grew its revenues by $104.5 million (3.7%) and its adjusted operating income by $60.7 million (4.7%).
- Videotron recorded strong revenue increases at two of its services in 2014: mobile telephony ($67.0 million or 30.4%) and Internet access ($49.9 million or 6.1%).
- Net increase of 117,700 revenue-generating units[1] (2.3%) in 2014.
- Net increase of 128,500 subscriber connections for the mobile telephone service, the largest annual increase since 2011.
- On March 11, 2015, Videotron Ltd. ("Videotron") announced the acquisition of 4Degrees Colocation and its data centre, the largest in Québec City, for a cash consideration of $31.5 million, which may increase to $35.5 million if certain criteria are satisfied. The acquisition will enable Videotron to meet its business customers' growing technological and hosting needs.
- On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group, and ordered Bell ExpressVu Limited Partnership ("Bell ExpressVu"), a subsidiary of Bell, to pay compensation totalling $137.0 million for having deliberately neglected to implement an appropriate security system to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005. The judgment stated that Bell ExpressVu knew and must have foreseen that this practice would cause serious harm to its competitors, including Videotron, its main rival in Québec.
- On March 6, 2015, Quebecor Media announced that its Videotron subsidiary was the successful bidder for four 30 MHz licences in Industry Canada's auction for AWS-3 commercial mobile spectrum. Quebecor Media obtained the licences for Eastern Québec, Southern Québec, Northern Québec and Eastern Ontario / Outaouais, covering 100% of Québec's population and the Ottawa area, for a total price of $31.8 million.
- On September 10, 2014, Videotron launched its LTE mobile network ("LTE network"), which reaches nearly 90% of

[1] The sum of cable television and cable Internet access subscriptions, cable telephone lines and subscriber connections to the mobile telephony service.

Québec's population and supports speeds of up to 150 mbps, enabling Québec consumers and business people to use their mobile devices to their full potential.

- On August 27, 2014, Videotron launched the new X8 multi-room HD recorder, designed to deliver the best entertainment experience on the market. With a 2 TB storage capacity and state-of-the-art functionalities, the X8 multi-room HD recorder can record up to 8 television shows simultaneously.
- On March 28, 2014, Apple products were added to the extensive selection of mobile devices Videotron offers its customers. Subsequently, Videotron launched new illico apps for iPhone (4, 5C, 5S, 6) and iPad. The free apps, featuring customizable, intuitive user interfaces, make thousands of hours of French- and English-language programming from some 50 television channels available to subscribers to Videotron's cable television service.
- On April 3, 2014, after the final instalment was paid on the spectrum won in the auction ended February 19, 2014, Industry Canada issued seven 700 MHz licences to Videotron. The operating licences, acquired for $233.3 million, cover the entire provinces of Québec, Ontario (except Northern Ontario), Alberta and British Columbia. They make it possible to reach approximately 80% of Canada's population, more than 28 million people.

Media

- In December 2014, TVA Group closed the acquisition of substantially all of the assets of A.R. Global Vision Ltd. and its subsidiary ("Global Vision"), a Canadian provider of film- and television-related services, for a cash consideration of $116.1 million, subject to certain adjustments. Global Vision offers studio, soundstage and equipment leasing and post-production services. Its properties include the Mel's La Cité du cinéma studios in Montréal and the Melrose studio in Saint-Hubert, which are used for both local and foreign film and television productions. On December 30, 2014, TVA Group obtained Competition Bureau authorization of the transaction.
- On November 17, 2014, TVA Group reached an agreement with Transcontinental to acquire 15 magazines for a cash consideration of $55.5 million. The transaction was authorized by the Competition Bureau on March 2, 2015. Upon closing, TVA Group will become sole owner of 11 of the acquired titles: *Coup de pouce*, *Canadian Living*, *Véro Magazine*, *Décormag*, *Style at Home*, *Fleurs Plantes Jardins*, *Canadian Gardening*, *Québec Vert*, *The Hockey News*, *MaisonNeuves.com*, *Condo Maison Direct* and the *recettes.qc.ca*, *Quoi manger* and *On the table* websites. TVA Group will also hold a 51% effective interest in Les Publications Transcontinental-Hearst inc., which operates the magazines *Elle Canada* and *Elle Québec*. As well, TVA Group will hold 50% of the shares of Publications Senior inc., which publishes *Le Bel Âge* and *Good Times* magazines.
- During the September 1 to December 7, 2014 period, TVA Group and its specialty channels had a total television audience market share of 33.2% in Québec, compared with 31.6% during the previous year (source: Numeris, Fall 2014). TVA Network held its status as the market leader with a 23.9% market share, more than its main over-the-air rivals combined. Due in part to the success of TVA Sports, TVA Group's specialty channels passed the 10-million-subscriber mark in the fall of 2014.
- On October 8, 2014, TVA Sports drew an average audience of 925,000 television viewers and a 25.5% market share for the Montréal Canadiens' season opener. Since TVA Sports began carrying National Hockey League ("NHL") hockey, its subscriber base has swelled to 2.0 million. As previously reported, on July 1, 2014, TVA Sports became the NHL's official French-language broadcaster for the next 12 years. During the 2014-2015 season, TVA Sports will broadcast more than 275 NHL games, among them all Canadiens Saturday night games and all playoff games, including Canadiens games and the Stanley Cup final.
- The second season of *La Voix* achieved exceptional ratings throughout its run from January 19 to April 13, 2014. The weekly gala attracted an average audience of more than 2.6 million and an average market share of 56.9%. The creation of value-added multiplatform content around this high-quality television program illustrates Quebecor's successful convergence strategy, which benefits all its media properties.
- Since August 1, 2014, Quebecor Media has been responsible for installing, maintaining, managing and advertising on Société de transport de Laval bus shelters under a 20-year agreement. Quebecor Media made a similar agreement with the Société de transport de Montréal in 2012.

- In 2014, the Corporation performed impairment tests on its Newspapers and Broadcasting cash generating units ("CGUs"), which continue to be impacted by the shift toward digital and by challenging market conditions in the print media and television industries. Accordingly, a $199.3 million non-cash goodwill impairment charge (without any tax consequences), including $160.0 million presented under discontinued operations, and a $41.7 million non-cash impairment charge (including $20.9 million without any tax consequences) on broadcasting licences were recorded.

Sports and Entertainment

- On February 3, 2015, Quebecor Media announced a strategic partnership with Live Nation Entertainment, including an alliance with Live Nation Concerts, the global market leader in concert production, and the Ticketmaster ticketing service, which operates in Québec under the name Réseau Admission. On the same date, Quebecor Media formed a strategic partnership with Levy Restaurants for management of food service operations at the Arena.

- On November 27, 2014, Quebecor Media acquired the Remparts de Québec, a QMJHL team. The team plans to move into the Arena in September 2015.

Financing

The following financial operations were carried out in 2014 and the beginning of 2015.

- On April 9, 2014, Videotron issued US$600.0 million aggregate principal amount of 5.375% Senior Notes maturing on June 15, 2024, for net proceeds of $654.5 million, net of financing fees of $7.8 million. Strong demand enabled Videotron to upsize the offering with favorable pricing, which clearly demonstrates the strength of its business and credit profile. Videotron fully hedged the exchange risk on the new Senior Notes by means of cross-currency interest rate swaps. It also converted the fixed interest rate on a US$158.6 million tranche of its Senior Notes to a floating rate.
- Videotron used the proceeds from the April 9, 2014 issuance of Senior Notes to prepay and withdraw, on April 24, 2014, US$260 million principal amount of its outstanding 9.125% Senior Notes, issued on March 5, 2009 and maturing on April 15, 2018, to repay drawings under its revolving credit facility, to pay transaction fees and expenses, and for general corporate purposes.
- On April 25, 2014, Quebecor Media completed the redemption and early repayment of all of its outstanding 7.75% Senior Notes in the aggregate principal amount of US$380.0 million, issued on October 5, 2007 and maturing on March 15, 2016, and settled the related hedges.
- On November 3, 2014, TVA Group modified the terms and conditions of its bank credit facilities to increase the size of its revolving credit facility from $100.0 million to $150.0 million; to extend their term by two years until February 24, 2019; and to replace the existing $75.0 million term loan maturing on December 11, 2014 by a new term loan of an equivalent amount maturing on November 3, 2019. TVA Group also amended some terms and conditions to increase its financial flexibility. Accordingly, TVA Group granted a security on all of its movable assets and an immovable hypothec on its Head Office building.
- On February 4, 2015, TVA Group filed a final simplified prospectus with securities regulatory authorities in each of Canada's 10 provinces regarding a proposed Rights Offering, in which all holders of outstanding Class A common shares, voting, participating, without par value of TVA Group ("Class A Shares of TVA Group") and Class B Shares, non-voting, participating, without par value of TVA Group ("Class B Non-Voting Shares of TVA Group") received on February 18, 2015 rights to subscribe for TVA Group Class B Non-Voting Shares for aggregate gross proceeds of approximately $110.0 million (the "Rights Offering"). The final simplified prospectus and relevant documents were sent on February 23, 2015 to all holders of Class A Shares of TVA Group and Class B Non-Voting Shares of TVA Group. The closing date of the Rights Offering should be on or about March 20, 2015. Pursuant to a standby commitment agreement with TVA Group, Quebecor Media has provided a standby commitment whereby it will be required to acquire all Class B Non-Voting Shares of TVA Group not subscribed for under the Rights Offering, subject to certain conditions.

TREND INFORMATION

Competition continues to be intense in the cable and alternative multichannel broadcast distribution industry and in the mobile telephony market. The significant subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth, due to the penetration rates currently reached.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its cable and mobile networks, the launch and expansion of new or additional services to support growth in its customer base, and demands for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term in order to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure upgrade, as well as costs relating to advancements in Internet access and high definition television. In addition, the demand for wireless data services has been growing at unprecedented rates and it is projected that this demand will further increase in the future. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. The Telecommunications segment may have to acquire additional spectrum in the future, as available.

Some of Quebecor's lines of business are cyclical in nature. They are dependent on advertising and, in the Media segment in particular, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

In the Media segment, newspaper circulation, measured in terms of copies sold, has been generally declining in the industry over the past several years. Also, the traditional run of press advertising for major multimarket retailers has been declining over the past few years due to consolidation in the retail industry, combined with a shift in marketing strategy toward other media. In order to respond to such competition, the Media segment's operations continue to develop their Internet presence through branded websites, including French-language portals and specialized sites.

The broadcasting industry is undergoing a period of significant change. Television audiences are fragmenting as viewing habits shift not only toward specialty channels, but also toward content delivery platforms that allow users greater control over content and timing, such as the Internet, video-on-demand and mobile devices. Audience fragmentation has prompted many advertisers to review their strategies. The Media segment is taking steps to adjust to the profound changes occurring in the broadcasting industry so as to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want.

INTEREST IN SUBSIDIARIES

As of December 31, 2014, Quebecor held a 75.4% interest in Quebecor Media. Table 1 shows Quebecor Media's equity interest in its main subsidiaries at that date.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
December 31, 2014

	Percentage of vote	**Percentage of equity**
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	51.5
Sun Media Corporation	100.0	100.0
Quebecor Media Printing Inc.	100.0	100.0
Archambault Group Inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past three years.

On June 30, 2012, Sun Media Corporation bought a 2% interest in SUN News General Partnership ("SUN News") from TVA Group, bringing its interest to 51%.

NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted operating income, adjusted income from continuing operations, cash flows from segment operations, free cash flows from continuing operating activities of the Quebecor Media subsidiary, and average monthly revenue per user ("ARPU"), are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted Operating Income

In its analysis of operating results, the Corporation defines adjusted operating income, as reconciled to net (loss) income under IFRS, as net (loss) income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, charge for restructuring of operations, impairment of assets and other special items, charge for impairment of goodwill and intangible assets, loss on debt refinancing, income taxes, and (loss) income from discontinued operations. Adjusted operating income as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted operating income in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its segments.

Adjusted operating income is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted operating income may not be the same as similarly titled measures reported by other companies.

Table 2 below provides a reconciliation of adjusted operating income to net (loss) income as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2014 and 2013 presented in Table 2 below is drawn from the unaudited consolidated statements of income.

Table 2

Adjusted Income from Continuing Operations

The Corporation defines adjusted income from continuing operations, as reconciled to net (loss) income attributable to shareholders under IFRS, as net (loss) income attributable to shareholders before loss on valuation and translation of financial instruments, charge for restructuring of operations, impairment of assets and other special items, impairment of goodwill and intangible assets, loss on debt refinancing, net of income tax related to adjustments and net loss attributable to non-controlling interests related to adjustments, before (loss) income from discontinued operations attributable to shareholders. Adjusted income from continuing operations, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operations to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of the financial results. Adjusted income from continuing operations is more representative for the purpose of forecasting income. The Corporation's definition of adjusted income from continuing operations may not be identical to similarly titled measures reported by other companies.

Table 3 provides a reconciliation of adjusted income from continuing operations to net (loss) income attributable to shareholders used in Quebecor's consolidated financial statements.

Table 3

1 Includes impact of fluctuations in income tax applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash Flows from Segment Operations

Cash flows from segment operations represents adjusted operating income, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, the payment of dividends, and the repayment of long-term debt. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free Cash Flows from Continuing Operating Activities of the Quebecor Media Subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for license acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, the payment of dividends, and the repayment of long-term debt. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Average Monthly Revenue per User

ARPU is an industry metric that the Corporation uses to measure its monthly cable television, Internet access, cable and mobile telephony revenues per average basic cable customer. ARPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ARPU may not be the same as identically titled measurements reported by other companies. The Corporation calculates ARPU by dividing its combined cable television, Internet access, and cable and mobile telephony revenues by the average number of basic customers during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2014/2013 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $3.72 billion, a $68.6 million (1.9%) increase.

- Revenues increased in Telecommunications ($104.5 million or 3.7% of segment revenues).
- Revenues decreased in Media ($20.6 million or -2.5%) and Sports & Entertainment ($9.3 million or -13.2%).

Adjusted operating income: $1.40 billion, a $28.8 million (2.1%) increase.

- Adjusted operating income increased in Telecommunications ($60.7 million or 4.7% of segment adjusted operating income) and Head Office ($7.9 million). The increase at Head Office was mainly due to the favourable variance in the fair value of stock options.
- Adjusted operating income decreased in Media ($37.5 million or -44.6%) and Sports and Entertainment ($2.3 million).
- The change in the fair value of Quebecor Media stock options resulted in a $2.5 million unfavourable variance in the stock-based compensation charge in 2014 compared with 2013. The change in the fair value of Quebecor stock options and the impact of various transactions on the options issued under this program resulted in a $20.8 million favourable variance in the Corporation's stock-based compensation charge in 2014.

Net loss attributable to shareholders: $30.1 million ($0.24 per basic share) in 2014, compared with $288.6 million ($2.33 per basic share) in 2013, a favourable variance of $258.5 million ($2.09 per basic share).

- The favourable variance was due primarily to:
  - $289.7 million favourable variance in gains and losses on valuation and translation of financial instruments, including a $48.4 million favourable variance in convertible debentures, without any tax consequences;
  - $128.3 million favourable variance in losses from discontinued operations;
  - $37.6 million decrease in financial expenses;
  - $28.8 million increase in adjusted operating income.

  Partially offset by:

  - $45.7 million unfavourable variance in non-cash charge for impairment of goodwill and intangible assets (including $19.5 million without any tax consequences), minus related non-controlling interest;
  - $42.8 million unfavourable variance in the charge for restructuring of operations, impairment of assets and other special items (including $34.3 million without any tax consequences);
  - $36.3 million increase in the depreciation and amortization charge.

Adjusted income from continuing operations: $202.3 million ($1.64 per basic share) in 2014, compared with $177.3 million ($1.43 per basic share) in 2013, an increase of $25.0 million ($0.21 per basic share).

Depreciation and amortization charge: $667.0 million in 2014, a $36.3 million increase essentially due to the impact of capital expenditures in the Telecommunications segment, including amortization of expenditures related to the promotional strategy focused on equipment leasing, to investments in the LTE network, and to modernization and expansion of the wired and wireless networks.

Financial expenses: $350.7 million, a $37.6 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates and by lower indebtedness.

Loss on valuation and translation of financial instruments: $94.7 million in 2014 compared with $384.4 million in 2013. The $289.7 million favourable variance was mainly due to the variance in the fair value of early settlement options caused by fluctuations in valuation assumptions, including interest rates and credit premiums implicit in the adjusted prices of the underlying instruments, to the $48.4 million decrease (without any tax consequences) in the loss on embedded derivatives related to convertible debentures, and to losses on reversal of embedded derivatives recognized in 2013 in connection with debt redemption.

Charge for restructuring of operations, impairment of assets and other special items: $54.4 million in 2014, compared with $11.6 million in 2013, an unfavourable variance of $42.8 million.

- In 2014, the Telecommunications segment recorded a $3.3 million restructuring charge ($1.8 million in 2013) and a $3.4 million impairment charge on assets. The segment also recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron.
- In 2014, a $6.5 million net charge for restructuring of operations was recorded in the Media segment with respect to staff-reduction programs ($6.7 million in 2013). In connection with those initiatives, a $0.1 million loss on disposal of assets was recognized in 2014 ($0.1 million gain in 2013) and a $2.1 million impairment charge on certain assets was also recognized in 2013. In 2014, the Media segment also recognized a $3.3 million asset impairment charge on its broadcasting assets and a $2.6 million other special charge, primarily attributable to business acquisitions.
- The other segments recorded a net charge for restructuring of operations, impairment of assets and other special items of $0.9 million in 2014 ($1.1 million in 2013).

Charge for impairment of goodwill and intangible assets: $81.0 million in 2014, compared with $35.3 million in the same period of 2013, an unfavourable variance of $45.7 million.

- In the second quarter of 2014, the Corporation performed annual impairment tests on its CGUs. It concluded that the recoverable amount based on fair value less disposal costs was less than the carrying amount of its Newspapers CGU, which continues to be affected by the shift to digital and challenging market conditions in the newspaper industry. Accordingly, the Media segment recorded a $30.0 million non-cash goodwill impairment charge, without any tax consequences.
- In the third quarter of 2014, the Corporation completed its annual review of its three-year strategic plan. In view of market conditions in the television industry, the Corporation performed an impairment test on its Broadcasting CGU. The Corporation concluded that the recoverable amount, based on fair value less disposal costs, was less than the carrying amount of this CGU. Accordingly, a $41.7 million non-cash impairment charge on broadcasting licences (including $20.9 million without any tax consequences) and a $9.3 million non-cash goodwill impairment charge (including $3.9 million without any tax consequences) were recorded.
- In the third quarter of 2013, Quebecor Media performed impairment tests on the Newspapers, Books and Music CGUs. Accordingly, the following impairment charges were recorded:
    - the Media segment recognized a $14.5 million non-cash goodwill impairment charge, without any tax consequences, in its Newspapers CGU, and an $11.9 million non-cash goodwill impairment charge, without any tax consequences, in its Books CGU;
    - Quebecor Media recorded an $8.9 million non-cash goodwill impairment charges without any tax consequences in its Music CGU.

Loss on debt refinancing: $18.7 million in 2014 compared with $18.9 million in 2013.

- In accordance with a notice issued on March 26, 2014, Videotron redeemed, on April 24, 2014, US$260.0 million aggregate principal amount of its outstanding 9.125% Senior Notes issued on March 5, 2009 and maturing on April 15, 2018 at a redemption price of 103.042% of their principal amount. A $21.4 million net loss was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $1.7 million loss previously recorded in "Other comprehensive income."
- In accordance with a notice issued on March 26, 2014, Quebecor Media redeemed, on April 25, 2014, the entirety of its outstanding 7.75% Senior Notes issued on October 5, 2007 and maturing on March 15, 2016, in the aggregate principal amount of US$380.0 million, at a redemption price of 100.00% of their principal amount, and settled the related hedges. A $2.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $12.5 million gain previously recorded in "Other comprehensive income."
- On June 3, 2013, Videotron issued a notice for the redemption, on July 2, 2013, of US$380.0 million aggregate principal amount of its issued and outstanding 9.125% Senior Notes due in April 2018 at a redemption price of 104.563% of their principal amount, and settled the related hedges. As a result, a total $18.9 million loss was recorded in the consolidated statement of income in the second quarter of 2013, including a $6.5 million gain previously recorded in "Other comprehensive income."

Income tax expense: $91.3 million (effective tax rate of 29.2%) in 2014 compared with $27.8 million (effective tax rate of 36.5%) in 2013, a $63.5 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to the impact of the increase in taxable income.
- The variance in the effective tax rates was due to the impact of the tax rate mix on the various components of the gain or loss on valuation and translation of financial instruments, and losses on debt refinancing.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,777,300 homes and businesses. In addition to analog cable television and digital cable television ("illico Digital TV") services, Videotron offers Internet access, cable telephony and advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones. Videotron also includes Videotron Business Solutions, a full-service business telecommunications provider that offers telephony, high-speed data transmission, Internet access, hosting, and cable television services.

The Corporation's operations in the Telecommunications segment also include retail sales of CDs, books, DVDs, Blu-ray discs, musical instruments, games and toys, video games, gift ideas and magazines through the chain of stores operated by Archambault Group Inc. ("Archambault Group") and the *archambault.ca* e-commerce site, as well as online sales of downloadable music and books.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary ("Le SuperClub Vidéotron") and its franchise network.

2014 operating results

Revenues: $2.97 billion, a $104.5 million (3.7%) increase.

- Combined revenues from all cable television services decreased $15.5 million (-1.4%) to $1.08 billion, due primarily to the impact of the net decrease in the customer base and the decrease in video-on-demand, pay-per-view and pay TV orders, partially offset by higher revenues from the leasing of digital set-top boxes and higher per-subscriber revenues.
- Revenues from Internet access services increased $49.9 million (6.1%) to $868.3 million. The favourable variance was mainly due to increased usage, higher revenues from Internet access resellers, customer base growth, and higher per-subscriber revenues.
- Revenues from the cable telephony service increased $1.3 million (0.3%) to $475.1 million, primarily as a result of increases in per-subscriber revenues and in the number of business lines, partially offset by a decrease in long-distance revenues.
- Revenues from mobile telephony service increased $67.0 million (30.4%) to $287.7 million, essentially due to customer growth.
- Revenues of Videotron Business Solutions increased $2.1 million (3.3%) to $65.6 million.
- Revenues from customer equipment sales increased $9.1 million (24.9%) to $45.6 million, mainly because of the growth in the number of subscriber connections to the mobile service and increased sales of more powerful equipment.
- Revenues from retail sales decreased by $10.8 million (-7.2%) to $138.3 million because of decreased sales at Archambault Group stores, including lower sales of videos, CDs and books, and lower revenues at Le SuperClub Vidéotron, including lower franchise fees and store closings.
- Other revenues increased $0.9 million (10.3%) to $9.6 million.

ARPU: $125.16 in 2014 compared with $118.03 in 2013, an increase of $7.13 (6.0%).

Customer statistics

Revenue-generating units – As of December 31, 2014, the total number of revenue-generating units stood at 5,301,600, a 117,700-unit (2.3%) increase in 2014, compared with a 164,800-unit increase in 2013 (Table 4). Revenue-generating units are the sum of cable television and cable Internet access subscriptions, cable telephone lines and subscriber connections to the mobile telephony service.

Cable television – The combined customer base for all of Videotron's cable television services decreased by 42,800 (-2.3%) in 2014, compared with a decrease of 29,900 in 2013 (Table 4). As of December 31, 2014, Videotron had 1,782,300 subscribers to its cable television services. The household and business penetration rate (number of subscribers as a proportion of the total 2,777,300 homes and businesses passed by Videotron's network as of the end of December 2014, up from 2,742,500 one year earlier) was 64.2% versus 66.5% a year earlier.

- As of December 31, 2014, the number of subscribers to the illico Digital TV service stood at 1,561,700, an increase of 30,300 (2.0%) in 2014, compared with a 46,800-subscriber increase in 2013. As of December 31, 2014, illico Digital TV had a household and business penetration rate of 56.2% versus 55.8% a year earlier.
- The customer base for analog cable television services decreased by 73,100 in 2014, compared with a decrease of 76,700 in 2013, partly as a result of customer migration to illico Digital TV.

Cable Internet access – The number of subscribers to cable Internet access services stood at 1,537,500 at December 31, 2014, an increase of 31,500 (2.1%) in 2014, compared with an increase of 62,000 in 2013 (Table 4). At December 31, 2014, Videotron's cable Internet access services had a household and business penetration rate of 55.4% compared with 54.9% a year earlier.

Cable telephony service – The number of cable telephone lines stood at 1,349,000 as of December 31, 2014, an increase of 500 from the end of 2013, compared with an increase of 32,200 in 2013 (Table 4). At December 31, 2014, the cable telephony service had a household and business penetration rate of 48.6% versus 49.2% a year earlier.

Mobile telephony service – As of December 31, 2014, the number of subscriber connections to the mobile telephony service stood at 632,800, an increase of 128,500 (25.5%) in 2014, compared with an increase of 100,500 in 2013 (Table 4).

Table 4
Telecommunications segment year-end customer numbers[1] (2010-2014)
(in thousands of customers)

	2014	2013	2012	2011	2010
Cable television:					
Analog	**220.6**	293.7	370.4	460.7	592.0
Digital	**1,561.7**	1,531.4	1,484.6	1,400.8	1,219.6
	1,782.3	1,825.1	1,855.0	1,861.5	1,811.6
Cable Internet	**1,537.5**	1,506.0	1,444.0	1,359.6	1,268.1
Cable telephony[2]	**1,349.0**	1,348.5	1,316.3	1,245.9	1,145.1
Mobile telephony[2]	**632.8**	504.3	403.8	290.7	136.1
Total (revenue-generating units)	**5,301.6**	5,183.9	5,019.1	4,757.7	4,360.9

1 Customer statistics have been restated for 2014 and previous years to reflect certain adjustments to product definitions.
2 Thousands of connections.

Adjusted operating income: $1.35 billion, a $60.7 million (4.7%) increase caused primarily by:

- impact of higher revenues;
- $7.2 million favourable retroactive adjustment arising from a correction to the subscription fee calculation method.

Partially offset by:

- impact of the higher number of mobile devices sold at a loss;
- favourable impact on the 2013 results of one-time adjustments, including a provision for Canadian Radio-television and Telecommunications Commission ("CRTC") licence fees in order to align with the CRTC's billing period;
- increases in some operating expenses, including advertising, marketing and customer service expenses.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 54.3% in 2014 compared with 54.8% in 2013. The decrease was mainly due to the impact of revenue growth (as the fixed component of operating costs does not fluctuate in proportion to revenues), partially offset by the impact of the higher number of mobile devices sold at a loss and the increase in some operating expenses, including advertising and marketing expenses.

Cash flows from operations

Cash flows from segment operations: $665.5 million in 2014 compared with $722.1 million in 2013 (Table 5).

- The $56.6 million decrease reflects a $109.9 million increase in additions to property, plant and equipment and to intangible assets, due mainly to increased capital expenditures on the LTE network and a $7.4 million decrease in proceeds from disposal of assets, partially offset by the $60.7 million increase in adjusted operating income.

Media

The Media segment of Quebecor Media operates two paid-circulation daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, and a free daily, *24 heures Montréal.* According to corporate figures, the aggregate circulation of the Media segment's paid and free newspapers was approximately 2.9 million copies per week as of December 31, 2014.

The paid-circulation newspapers disseminate information in traditional print form, as well as through two urban daily news portals, *journaldemontreal.com* and *journaldequebec.com*. The Media segment also operates a number of websites, including *canoe.ca* and *canoe.tv*, as well as the e-commerce sites *micasa.ca* (real estate) and *autonet.ca* (automobiles). The Media segment's portals log 2.9 million unique visitors per month (according to corporate figures).

Also in the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network and the specialty channels LCN, TVA Sports, addik^{TV}, Argent, Prise 2, Yoopa, CASA and MOI&cie. TVA Group also holds interests in two other TVA Network affiliates and the Évasion specialty channel. TVA Group's TVA Accès division is engaged in commercial production and its TVA Films division in the distribution of films and television programs. Through its subsidiaries TVA Publications inc. and Les Publications Charron & Cie inc. ("Les Publications Charron & Cie"), TVA Group publishes more than 50 magazines in the general interest and entertainment categories. It is the largest publisher of French-language magazines in Québec.

Until February 13, 2015, the Media segment also operated the English-language news and opinion specialty channel SUN News, which discontinued its operations on that date. The Media segment's operating results presented in this report include SUN News' financial data.

TVA Group also closed the acquisition of substantially all of the assets of Global Vision in December 2014. Global Vision provides studio, soundstage and equipment leasing and post-production services to the film and television industries.

The Media segment is also engaged in the distribution of newspapers and magazines, commercial printing and outdoor advertising. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties and outside customers, as well as Quebecor Media Sales, which offers its customers integrated, diversified, complete advertising services.

Finally, the Media segment is also engaged in academic publishing through CEC Publishing, general literature through 18 publishing houses, physical and digital distribution of books through Messageries ADP inc., the exclusive distributor for approximately 200 Québec and European French-language publishers, and e-books through Readbooks.

2014 operating results

Revenues: $807.7 million in 2014, a $20.6 million (-2.5%) decrease.

- Newspaper publishing revenues decreased by $16.1 million (-5.9%).
  - Advertising revenues decreased 7.3%; circulation revenues decreased 2.5%; digital revenues increased 5.1%; combined revenues from commercial printing and other sources decreased 7.0%.
  - Revenues decreased 5.4% at the urban dailies and 6.7% at the portals.
- Broadcasting revenues decreased by $4.2 million (-1.1%), mainly because of:
  - lower advertising revenues at TVA Network;
  - $6.1 million favourable adjustment in 2013 resulting from retroactive adjustment to royalties for the retransmission of the over-the-air stations' signals to markets located outside their local service areas (“retransmission royalties”) for the years 2009 to 2012;
  - discontinuation of operations of TVA Boutiques in 2013.

  Partially offset by:
  - increased subscription revenues at the specialty services, including TVA Sports, mainly because of the addition of programming dedicated to NHL hockey, and SUN News, due to an adjustment to royalty rates;
  - increased advertising revenues at the specialty services, mainly TVA Sports.
- Magazine publishing revenues increased by $0.7 million (1.0%), mainly because of the favourable impact on revenues of the acquisition of Les Publications Charron & Cie in July 2013, partially offset by the decrease in advertising revenues on a same-store basis and the impact of the closing of some publications.
- Quebecor Media Out of Home’s revenues increased $1.6 million (20.7%), mainly because of new digital advertising revenues.
- Book distribution and publishing revenues increased by $0.8 million (0.8%), primarily as a result of increased bookstore volume.

Adjusted operating income: $46.5 million in 2014, a $37.5 million (-44.6%) decrease.

- Adjusted operating income from newspaper publishing decreased $5.0 million (-16.9%) due to:
  - impact of decrease in revenues;
  - higher employee compensation costs;
  - $2.8 million favourable impact in 2013 of adjustments to the cost of post-retirement benefits.

  Partially offset by:
  - $7.8 million favourable impact of restructuring initiatives and other reductions in operating expenses.
- Adjusted operating income from broadcasting operations decreased by $34.2 million (-82.7%), mainly as a result of:
  - higher content costs, partially as a result of increased spending on TVA Sports and adjustments to the cost of certain prior-year broadcasting rights related to indemnification clauses;
  - impact of decrease in TVA Network’s advertising revenues;
  - favourable impact of $6.1 million retroactive adjustment to retransmission royalties in 2013;
  - favourable impact on second quarter 2013 results of an adjustment to the provision for CRTC licence fees to align with the CRTC’s billing period.

  Partially offset by:
  - impact of higher subscription and advertising revenues at the specialty channels.
- Adjusted operating income from magazine publishing increased by $2.2 million (28.5%), mainly as a result of:
  - impact of acquisition of Les Publications Charron & Cie;

   o reductions in some operating costs, including printing and production costs.

   Partially offset by:

   o impact of decrease in advertising revenues on a same-store basis.

- Adjusted operating income from book distribution and publishing decreased by $0.7 million (-7.0%), due primarily to increases in some operating expenses, partly reflecting an unfavourable adjustment to government tax credits.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 94.2% in 2014 compared with 89.9% in 2013. The increase was mainly due to the impact of higher television content costs, the revenue decrease (as the fixed component of operating costs does not fluctuate in proportion to the decrease in revenues), and the favourable impact on the 2013 results of the retroactive adjustment to retransmission royalties.

Cash flows from operations

Cash flows from segment operations: $5.0 million in 2014, compared with $49.4 million in 2013 (Table 6). The $44.4 million decrease was mainly due to the $37.5 million decline in adjusted operating income.

Table 6: Media
Cash flows from operations
(in millions of CAN dollars)

		2014		2013
Adjusted operating income	**$**	**46.5**	$	84.0
Additions to property, plant and equipment		**(32.2)**		(26.2)
Additions to intangible assets		**(9.3)**		(8.8)
Proceeds from disposal of assets		**–**		0.4
Cash flows from segment operations	**$**	**5.0**	$	49.4

Sports and Entertainment

The Corporation's activities in the Sports and Entertainment segment include distribution of CDs and videos (Distribution Select); distribution of music to Internet download services (Select Digital); music recording and video production (Musicor); recording of live concerts, production of concert videos and television commercials (Les Productions Select TV inc.), and concert promotion (Musicor Spectacles).

The Sports and Entertainment segment also includes two QMJHL hockey teams, the Armada de Blainville-Boisbriand and the Remparts de Québec, as well as Event Management Gestev Inc. ("Gestev"), a Québec City sports and cultural events manager.

As well, the segment includes the activities of the Arena following ratification in 2011 of a 25-year agreement between Quebecor Media and Québec City with respect to usage and naming rights to the Arena.

2014 operating results

Revenues: $60.9 million, a $9.3 million (-13.2%) decrease compared with 2013, due primarily to:

- 16.3% decrease in music distribution revenues, primarily as a result of lower video and CD sales;
- 26.4% decrease in music production and promotion revenues due to the larger number of successful concerts and albums produced in 2013.

Partially offset by:

- Favourable revenue impact of the acquisition of Gestev on May 24, 2013, including its sporting events management, site management and marketing activities.

Adjusted operating loss: $3.4 million in 2014 compared with $1.1 million in 2013. The $2.3 million unfavourable variance was due to the impact of the revenue decrease and the startup of new performance hall management operations.

Cash flows from operations

Cash flows from segment operations: Negative $9.0 million in 2014 compared with negative $1.7 million in 2013 (Table 7). The $7.3 million unfavourable variance was due to the $4.9 million increase in additions to property, plant and equipment, partly reflecting the impact of new performance hall management operations, and the $2.3 million increase in the adjusted operating loss.

Table 7: Sports and Entertainment

2014/2013 FOURTH QUARTER COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $989.4 million, a $28.1 million (2.9%) increase.

- Revenues increased in Telecommunications ($34.2 million or 4.6% of segment revenues) and in Media ($1.7 million or 0.8%).
- Revenues decreased in Sports & Entertainment ($1.3 million or -5.3%).

Adjusted operating income: $353.1 million, a $3.3 million (-0.9%) decrease.

- Adjusted operating income decreased in Media ($22.5 million or -71.2% of segment adjusted operating income).
- Adjusted operating income increased in Telecommunications ($19.9 million or 6.1%).
- The change in the fair value of Quebecor Media stock options resulted in a $0.8 million unfavourable variance in the stock-based compensation charge in the fourth quarter of 2014 compared with the same period of 2013. The change in the fair value of Quebecor stock options resulted in a $3.7 million favourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2014.

Net loss attributable to shareholders: $59.5 million ($0.48 per basic share) in the fourth quarter of 2014, compared with net income attributable to shareholders in the amount of $0.3 million in the same period of 2013, an unfavourable variance of $59.8 million ($0.48 per basic share).

- The decrease was due primarily to:
  - $44.9 million unfavourable variance in the charge for restructuring of operations, impairment of assets and other special items (including $34.3 million without any tax consequences);
  - $23.0 million unfavourable variance in gains and losses on valuation and translation of financial instruments, including a $49.9 million unfavourable variance in convertible debentures, without any tax consequences;
  - $10.7 million increase in the depreciation and amortization charge.

  Partially offset by:
  - $9.4 million decrease in financial expenses;
  - $5.1 million favourable variance in gains and losses from discontinued operations.

Adjusted income from continuing operations: $50.3 million in the fourth quarter of 2014 ($0.41 per basic share), compared with $48.6 million ($0.39 per basic share) in the same period of 2013, an increase of $1.7 million ($0.02 per basic share).

Depreciation and amortization charge: $174.6 million, a $10.7 million increase due essentially to the same factors as those noted above in the 2014/2013 financial year comparison.

Financial expenses: $84.4 million, a $9.4 million decrease due essentially to the same factors as those noted above in the 2014/2013 financial year comparison.

Loss on valuation and translation of financial instruments: $93.2 million in the fourth quarter of 2014 compared with a $70.2 million loss in the same period of 2013. The $23.0 million unfavourable variance was mainly due to the $49.9 million increase (without any tax consequences) in the loss on embedded derivatives related to convertible debentures, partially offset by the favourable variance in the fair value of early settlement options caused by fluctuations in valuation assumptions, including interest rates and credit premiums implicit in the adjusted prices of the underlying instruments.

Charge for restructuring of operations, impairment of assets and other special items: $47.7 million in the fourth quarter of 2014, compared with $2.8 million in the same period of 2013, a $44.9 million unfavourable variance.

- In the fourth quarter of 2014, the Telecommunications segment recorded a $1.0 million restructuring charge ($1.0 million in the same period of 2013) and a $3.4 million charge for impairment of assets. The segment also recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron.

- In the fourth quarter of 2014, a $2.3 million net charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs ($1.5 million in the same period of 2013). In connection with these initiatives, a $0.1 million loss on disposal of assets was recognized in the fourth quarter of 2014 ($0.6 million in the same period of 2013) and a $0.2 million reversal of the impairment charge on certain assets was also recognized in fourth quarter of 2013. The Media segment also recognized a $3.3 million asset impairment charge on its broadcasting assets and a $2.6 million other special charge, primarily attributable to business acquisitions.
- The other segments recorded a $0.7 million net charge for restructuring of operations, impairment of assets and other special items in the fourth quarter of 2014 ($0.1 million reversal in the same period of 2013).

Income tax expense: $22.9 million in the fourth quarter of 2014 (effective tax rate of 30.3%) compared with $20.6 million in the same period of 2013 (effective tax rate of 32.3%), a $2.3 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The increase in the income tax expense was mainly due to the impact of the increase in taxable income.
- The effective tax rates were due to the impact of the tax rate mix on the various components of the loss on valuation and translation of financial instruments.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $778.2 million, a $34.2 million (4.6%) increase essentially due to the same factors as those noted above in the 2014/2013 financial year comparison.

- Combined revenues from all cable television services decreased $8.1 million (-2.9%) to $268.2 million.
- Revenues from Internet access services increased $12.3 million (5.9%) to $222.2 million.
- Revenues from cable telephony service increased $1.9 million (1.6%) to $120.6 million.
- Revenues from mobile telephony service increased $23.9 million (40.1%) to $83.5 million.
- Revenues of Videotron Business Solutions increased $1.0 million (6.3%) to $16.8 million.
- Revenues from customer equipment sales increased $5.8 million (54.2%) to $16.5 million.
- Revenues from retail sales decreased $2.8 million (-5.5%) to $48.0 million.
- Other revenues increased $0.3 million (13.6%) to $2.5 million.

ARPU: $129.36 in fourth quarter 2014, compared with $121.22 in the same period of 2013, an $8.14 (6.7%) increase.

Customer statistics

Revenue-generating units – 25,100 (0.5%) unit increase in the fourth quarter of 2014 compared with an increase of 46,700 in the same period of 2013.

Cable television – 14,000 (-0.8%) decrease in combined customer base for all of Videotron's cable television services in the fourth quarter of 2014 compared with a decrease of 5,300 in the same period of 2013.

- illico Digital TV: 12,700 (0.8%) subscriber increase in the fourth quarter of 2014 compared with an increase of 13,800 in the same period of 2013.
- Analog cable TV: 26,700 subscriber decrease in the fourth quarter of 2014 compared with a decrease of 19,100 in the same period of 2013.

Cable Internet access – 3,700 (0.2%) customer increase in the fourth quarter of 2014 compared with an increase of 19,300 in the same period of 2013.

Cable telephony – 7,000 (-0.5%) subscriber decrease in the fourth quarter of 2014 compared with an increase of 7,500 in the same period of 2013.

Mobile telephony service – 42,400 (7.2%) increase in subscriber connections in the fourth quarter of 2014 compared with an increase of 25,200 in the same period of 2013.

Adjusted operating income: $348.6 million, a $19.9 million (6.1%) increase due primarily to:

- impact of the revenue increase and the $7.2 million favourable retroactive adjustment arising from a correction to the subscription fee calculation method, partially offset by the impact of the increase in the number of mobile devices sold at a loss and the increases in some operating expenses.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Telecommunications segment's operations, expressed as a percentage of revenues, were 55.2% in the fourth quarter of 2014 compared with 55.8% in the same period of 2013. The decrease was mainly due to the impact of revenue growth (as the fixed component of operating costs does not fluctuate in proportion to revenues), partially offset by the impact of the higher number of mobile devices sold at a loss.

Media

Revenues: $227.0 million in the fourth quarter of 2014, an increase of $1.7 million (0.8%).

- Newspaper publishing revenues decreased by $5.0 million (-7.0%).
  - Advertising revenues decreased 7.9%; circulation revenues decreased 4.6%; digital revenues decreased 15.0%; combined revenues from commercial printing and other sources decreased 5.5%.
  - Revenues decreased by 5.9% at the urban dailies and by 25.9% at the portals.
- Broadcasting revenues increased by $12.0 million (11.3%), mainly because of:
  - increased subscription and advertising revenues at the specialty services, including TVA Sports, mainly because of the addition of NHL hockey broadcasts.

  Partially offset by:
  - lower advertising revenues at TVA Network.
- Magazine publishing revenues decreased by $0.7 million (-4.2%), partly because of the impact of the decrease in advertising revenues and the closure of some publications.
- Revenues of Quebecor Media Out of Home increased by $0.6 million (27.0%), primarily because of higher advertising revenues, including new digital revenues.
- Book distribution and publishing revenues increased by $2.0 million mainly due to:
  - Increased distribution revenues and increased volume in general literature and academic publishing.

Adjusted operating income: $9.1 million in the fourth quarter of 2014, a $22.5 million (-71.2%) decrease.

- Adjusted operating income from newspaper publishing decreased by $9.0 million (-63.8%), primarily as a result of:
  - impact of decrease in revenues;
  - $2.8 million favourable impact in 2013 of adjustments to the cost of post-retirement benefits;
  - increased employee compensation.
- Adjusted operating income from broadcasting operations decreased by $13.5 million (-87.4%), mainly as a result of:
  - increased content costs, partly as a result of higher expenditures at TVA Sports;
  - impact of decrease in TVA Network's revenues.

  Partially offset by:
  - impact of higher subscription and advertising revenues at the specialty channels.
- Adjusted operating income from magazine publishing decreased by $0.2 million (-10.6%), mainly because of the impact of the revenue decrease, partially offset by reductions in some operating expenses, including printing and production costs.
- The operating loss of Quebecor Media Out of Home decreased by $0.4 million as a result of the increase in revenues.
- Adjusted operating income from book distribution and publishing increased by $0.9 million, primarily as a result of the increase in revenues.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 96.0% in the fourth quarter of 2014 compared with 86.0% in the same period of 2013. The increase was mainly due to the impact of the revenue decrease (as the fixed component of operating costs does not fluctuate in proportion to the decrease in revenues), the favourable adjustment to post-retirement benefits in 2013, and higher broadcasting content costs.

Sports and Entertainment

Revenues: $23.2 million in the fourth quarter of 2014, a $1.3 million (-5.3%) decrease.

- Revenues from music production and promotion decreased by 52.4% due to the impact of the cancellation of the 2014 edition of the *Les Stars chantent Noël* concert and the larger number of successful albums released in the fourth quarter of 2013.
- 2.0% decrease in music distribution revenues, primarily as a result of lower CD sales.

Adjusted operating income: $0.6 million in the fourth quarter of 2014, a $0.2 million decrease due primarily to the impact of the revenue decrease and the startup of new performance hall management operations.

2013/2012 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $3.65 billion, a $94.2 million (2.7%) increase.

- Revenues increased in Telecommunications ($101.7 million or 3.7% of segment revenues).
- Revenues decreased in Media ($16.5 million or -2.0%) and Sports and Entertainment ($6.7 million or -8.7%).

Adjusted operating income: $1.37 billion, a $78.4 million (6.1%) increase.

- Adjusted operating income increased in Telecommunications ($74.0 million or 6.1% of segment adjusted operating income) and Media ($21.8 million or 35.0%).
- Adjusted operating income decreased in Sports and Entertainment ($3.4 million) and at Head Office ($14.0 million). The decrease at Head Office was due primarily to the unfavourable variance in the fair value of stock options.
- The change in the fair value of Quebecor Media stock options resulted in a $0.2 million favourable variance in the stock-based compensation charge in 2013 compared with 2012. The change in the fair value of Quebecor stock options resulted in an $11.9 million unfavourable variance in the Corporation's stock-based compensation charge in 2013.

Net loss attributable to shareholders: $288.6 million ($2.33 per basic share) in 2013, compared with net income attributable to shareholders of $159.1 million ($1.26 per basic share) in 2012, an unfavourable variance of $447.7 million ($3.59 per basic share).

- The unfavourable variance was due primarily to:
  - $520.7 million unfavourable variance in losses and gains on valuation and translation of financial instruments, including a $145.8 million unfavourable variance in convertible debentures, without any tax consequences;
  - $76.1 million increase in the depreciation and amortization charge;
  - $64.2 million unfavourable variance in the loss related to discontinued operations;
  - $41.2 million increase in financial expenses;
  - $22.9 million unfavourable variance in the charge for restructuring of operations, impairment of assets and other special items;
  - $12.6 million unfavourable variance in losses on debt refinancing.

  Partially offset by:
  - $78.4 million increase in adjusted operating income;
  - $7.7 million favourable variance in the charge for impairment of goodwill and intangible assets.

Adjusted income from continuing operations: $177.3 million in 2013 ($1.43 per basic share), compared with $153.2 million ($1.21 per basic share) in 2012, an increase of $24.1 million ($0.22 per basic share).

Depreciation and amortization charge: $630.7 million in 2013, a $76.1 million increase essentially due to the impact of the significant capital expenditures made since 2011 in the Telecommunications segment, including depreciation of capital expenditures related to cable Internet access services and modernization of the wired network, plus the impact of promotional strategies focused on equipment leasing.

Financial expenses: $388.3 million, a $41.2 million increase due mainly to higher indebtedness resulting from the leveraged repurchase in October 2012 of Quebecor Media shares held by CDP Capital d'Amérique Investissement inc., a subsidiary of Caisse de dépôt et placement du Québec. This factor was partially offset by the impact of lower interest rates on long-term debt as a result of debt refinancing at more advantageous rates.

Loss on valuation and translation of financial instruments: $384.4 million in 2013 compared with a $136.3 million gain in 2012. The $520.7 million unfavourable variance was mainly due to the variance in the fair value of early settlement options caused by fluctuations in valuation assumptions, including interest rates and credit premiums implicit in the adjusted prices of the underlying instruments, and the $139.4 million increase (without any tax consequences) in the loss on embedded derivatives related to convertible debentures.

The variance was also due to the reversal of the fair value of early settlement options on the Videotron Senior Notes redeemed on July 2, 2013, and the Quebecor Media Senior Notes redeemed on August 30, 2013.

Charge for restructuring of operations, impairment of assets and other special items: $11.6 million in 2013, compared with an $11.3 million reversal in 2012, a $22.9 million unfavourable variance.

- In 2013, the Telecommunications segment recorded a $1.8 million restructuring charge ($1.0 million in 2012).
- In 2013, a $6.7 million net charge for restructuring of operations was recorded in the Media segment with respect to staff-reduction programs ($0.3 million in 2012). As part of those initiatives, a $0.1 million gain on disposal of assets was recorded in 2013 ($0.1 million loss in 2012), and a $2.1 million charge for impairment of assets was also recorded in 2013.
- In 2012, the Media segment recorded a $12.9 million gain on disposal of businesses as a result of the sale by TVA Group of its interest in the specialty channels mysteryTV and The Cave.
- The other segments recorded a net charge for restructuring of operations, impairment of assets and other special items of $1.1 million in 2013 ($0.2 million in 2012).

Charge for impairment of goodwill and intangible assets: $35.3 million in 2013, compared with $43.0 million in 2012, a $7.7 million favourable variance.

- In the third quarter of 2013, Quebecor Media performed impairment tests on the Newspapers, Books and Music CGUs. Accordingly, the following impairment charges were recorded:
    - the Media segment recognized a $14.5 million non-cash goodwill impairment charge, without any tax consequences, in its Newspapers CGU, and an $11.9 million non-cash goodwill impairment charge, without any tax consequences, in its Books CGU;
    - Quebecor Media recorded an $8.9 million non-cash goodwill impairment charges without any tax consequences in its Music CGU.
- In the third quarter of 2012, Quebecor Media performed impairment tests on its Newspapers, Music and Book Publishing & Distribution CGUs, in view of the difficult market conditions in those industries. Accordingly, the Media segment recorded a $16.5 million non-cash goodwill impairment charge in its Newspaper CGU (without any tax consequences), and Quebecor Media recorded a $12.0 million non-cash goodwill impairment charge (without any tax consequences) in its Music CGU.
- As well, the magazine publishing operating costs were adversely affected by new tariffs adopted in 2012 with respect to business contributions for costs related to waste recovery services provided by Québec municipalities. Accordingly, the Corporation reviewed its business plan for the segment and determined that goodwill was no longer fully recoverable. A $14.5 million non-cash goodwill impairment charge (without any tax consequences) was therefore recorded in 2012.

Loss on debt refinancing: $18.9 million in 2013, compared with $6.3 million in 2012, a $12.6 million unfavourable variance.

- On July 2, 2013, Videotron redeemed US$380.0 million principal amount of its outstanding 9.125% Senior Notes, issued on April 15, 2008 and maturing in April 2018, and settled the related hedges. On August 30, 2013, Quebecor Media redeemed US$265.0 million principal amount of its outstanding 7.75% Senior Notes, issued in January 2006 and maturing in March 2016, and settled the related hedges. As a result, a total loss of $18.9 million was recorded in the consolidated statement of income in 2013, including a $14.5 million gain previously recorded in “Other comprehensive income.”
- In 2012, Videotron redeemed all of the 6.875% Senior Notes, issued in October 2003 and November 2004 and maturing in January 2014, in the aggregate principal amount of US$395.0 million. During the same period, Quebecor Media redeemed US$580.0 million principal amount of its 7.75% Senior Notes, issued in January 2006 and October 2007 and maturing in March 2016, and settled some of the related hedges. Finally, Quebecor Media prepaid the outstanding balance of its term loan “B” credit facility for a cash consideration of $153.9 million and settled the related hedges in January 2013. The transactions generated a total $6.3 million loss on debt refinancing.

Income tax expense: $27.8 million in 2013 (effective tax rate of 36.5%), compared with $105.4 million (effective tax rate of 19.8%) in 2012, a $77.6 million favourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The favourable variance in the income tax expense was mainly due to the decrease in taxable income for tax purposes.
- The variance in the effective tax rate was due to:
    - impact of the $34.8 million reduction in deferred income tax expense in 2012, following the Corporation's review of the recognition of deferred income tax assets in light of jurisprudence and tax developments;
    - impact of the tax rate mix on the various components of the gain or loss on valuation and translation of financial instruments and the loss on debt refinancing.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussions on trends under "Trend Information" above and on the Corporation's financial risks under "Financial Instruments and Financial Risk" below.

Operating activities

Cash flows provided by operating activities: $959.6 million in 2014 compared with $891.7 million in 2013.

- The $67.9 million favourable variance was mainly due to:
  - $77.5 million favourable net change in non-cash balances related to operations, mainly because of a favourable variance in accounts payable and accrued liabilities, and an increase in the provision for a legal dispute, partially offset by an unfavourable variance in current income taxes payable;
  - $60.7 million increase in adjusted operating income in the Telecommunications segment;
  - $34.3 million decrease in the cash portion of financial expenses.

  Partially offset by:
  - $38.9 million increase in the cash portion of the charge for restructuring of operations, impairment of assets and other special items;
  - $37.5 million decrease in adjusted operating income in the Media segment;
  - $33.8 million unfavourable variance in current income taxes.

In 2014, the favourable impact of the timing of transactions on non-cash items related to operating activities, increased profitability in the Telecommunications segment, and the refinancing of some debt at lower interest rates had a favourable impact on cash flows. However, cash flows provided by the Media segment continued to be affected by the impact of the shift to digital and challenging market conditions. Reduced tax benefits available for the deferral of income tax disbursements also had a negative impact on cash flows.

Working capital: $90.2 million at December 31, 2014, compared with $75.0 million at December 31, 2013, a $15.2 million increase. The impact of the recognition of assets held for sale under current assets (mainly reflecting the sale of the English-language newspaper businesses) was offset by the matching reduction in non-cash balances related to operating activities. Similarly, recognition of long-term debt maturing in 2015 under short-term liabilities as at December 31, 2014 was offset by recognition of debt and financial instruments maturing in 2014 under short-term liabilities as at December 31, 2013.

Investing activities

Additions to property, plant and equipment: $645.7 million in 2014 compared with $562.4 million in 2013. Spending on the LTE network in the Telecommunications segment essentially accounted for the $83.3 million increase.

Additions to intangible assets: $317.3 million in 2014, compared with $77.8 million in 2013, a $239.5 million increase. The Telecommunications segment accounted for most of the increase, mainly reflecting payments totalling $217.4 million in 2014 for the acquisition of 700 MHz spectrum licences compared with $15.9 million in 2013.

Proceeds from disposal of assets: $5.4 million in 2014 compared with $13.2 million in 2013.

- The Telecommunications segment accounted for most of the proceeds from disposal of assets recorded in 2014 and 2013.

Business acquisitions: $132.3 million in 2014 compared with $7.7 million in 2013.

- Business acquisitions in 2014 reflect, among other things, acquisition of substantially all of the assets of Global Vision in the Media segment, and of the Remparts de Québec, a QMJHL hockey team, in the Sports and Entertainment segment.
- Business acquisitions in 2013 mainly reflect acquisition of Les Publications Charron & Cie and Charron Éditeur in the Media segment and acquisition of Gestev in the Sports and Entertainment segment.

Disposal of businesses: $193.5 million in 2014 compared with $59.2 million in 2013.

- Disposals of businesses in 2014 consisted of the sale of the Nurun subsidiary to the French company Publicis Groupe for $125.0 million in cash, less disposed-of cash in the amount of $18.1 million. $8.2 million was also received in connection with certain adjustments to the transaction. Also, Quebecor Media closed the sale of the 74 Québec community weeklies to Transcontinental Interactif for a total cash consideration of $78.4 million.
- Disposal of businesses: $59.2 million in 2013 from the sale of *Jobboom* and *Réseau Contact* to Mediagrif Interactive Technologies Inc.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $250.3 million in 2014 compared with $312.5 million in 2013 (Table 8).

- The $62.2 million unfavourable variance was due to:
  - $83.3 million increase in additions to property, plant and equipment;
  - $38.0 million increase in additions to intangible assets (excluding acquisition of spectrum licences);
  - $7.8 million decrease in proceeds from disposal of assets.

  Partially offset by:
  - $66.9 million favourable variance in cash flows provided by continuing operating activities.

Financing activities

Consolidated debt (long-term debt plus bank borrowings): $206.5 million increase in 2014. $349.5 million favourable net variance in assets and liabilities related to derivative financial instruments.

- Summary of debt increases in 2014:
  - issuance by Videotron on April 9, 2014 of US$600.0 million aggregate principal amount of Senior Notes for net proceeds of $654.5 million, net of financing fees of $7.8 million. The Notes bear interest at 5.375% and mature on June 15, 2024;
  - estimated $266.9 million unfavourable impact of exchange rate fluctuations. The increase in this item is offset by a decrease in the liability (or increase in the asset) related to cross-currency swap agreements entered under “Derivative financial instruments”;
  - $11.9 million increase in debt due to changes in fair value related to hedged interest rate risk and the variance in the fair value of early settlement options.
- Summary of year-to-date debt reductions:
  - early redemption and withdrawal by Videotron on April 24, 2014 of US$260.0 million aggregate principal amount of 9.125% Senior Notes, issued on March 5, 2009 and maturing on April 15, 2018;
  - redemption and early repayment by Quebecor Media on April 25, 2014 of its outstanding 7.75% Senior Notes, issued on October 5, 2007 and maturing on March 15, 2016, in the aggregate principal amount of US$380.0 million;
  - current payments totalling $25.0 million on Quebecor Media’s and Videotron’s credit facilities;
  - $23.8 million reduction in Quebecor’s debt.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $298.1 million at December 31, 2014, compared with a net liability of $51.4 million at December 31, 2013, a $349.5 million net favourable variance due to:
  - favourable impact of exchange rate fluctuations on the value of derivative financial instruments;
  - settlement at maturity on January 15, 2014 of liabilities related to Videotron’s hedges, which had been repurposed to cover a portion of the term of 5.0% Senior Notes in the notional amount of US$543.1 million issued on March 14, 2012 and maturing in 2022;

Partially offset by:

- o unwinding of Quebecor Media's hedging contracts in an asset position in connection with the redemption and early withdrawal on April 25, 2014 of US$380.0 million aggregate principal amount of 7.75% Senior Notes;
- o unfavourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.

- On November 3, 2014, TVA Group modified the terms and conditions of its bank credit facilities to increase the size of its revolving credit facility from $100.0 million to $150.0 million; to extend their term by two years until February 24, 2019; and to replace the existing $75.0 million term loan maturing on December 11, 2014 by a new term loan of an equivalent amount maturing on November 3, 2019. TVA Group also amended some terms and conditions to increase its financial flexibility. Accordingly, TVA Group granted a security on all of its movable assets and an immovable hypothec on its Head Office building.
- On February 4, 2015, TVA Group filed a final simplified prospectus with securities regulatory authorities in each of Canada's 10 provinces regarding a proposed Rights Offering, in which all holders of Class A Shares of TVA Group and Class B Non-Voting Shares of TVA Group received on February 18, 2015 rights to subscribe for Class B Non-Voting Shares of TVA Group for aggregate gross proceeds of approximately $110.0 million (the Rights Offering). The final simplified prospectus and relevant documents were sent on February 23, 2015 to all holders of Class A Shares of TVA Group and Class B Non-Voting Shares of TVA Group. The closing date of the Rights Offering should be on or about March 20, 2015. Pursuant to a standby commitment agreement with TVA Group, Quebecor Media has provided a standby commitment whereby it will be required to acquire all Class B Non-Voting Shares of TVA Group not subscribed for under the Rights Offering, subject to certain conditions.

Financial Position

Net available liquidity: $1.27 billion at December 31, 2014 for Quebecor Media and its wholly owned subsidiaries, consisting of $390.3 million in cash and $874.7 million in available unused lines of credit.

Net available liquidity: $105.2 million for Quebecor at the corporate level, consisting of a $0.8 million bank overdraft and $106.0 million in available unused lines of credit.

Consolidated debt: $5.28 billion at December 31, 2014, a $206.5 million increase compared with December 31, 2013; $349.5 million favourable net variance in assets and liabilities related to derivative financial instruments (*see* "Financing Activities" above).

- Consolidated debt essentially consisted of Videotron's $2.93 billion debt ($2.40 billion at December 31, 2013); TVA Group's $78.2 million debt ($74.6 million at December 31, 2013); Quebecor Media's $2.20 billion debt ($2.50 billion at December 31, 2013); and Quebecor's $77.2 million debt ($101.0 million at December 31, 2013).

At December 31, 2014, minimum principal payments on long-term debt in the coming years were as follows:

Table 10
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of CAN dollars)

2015	$	230.1
2016		63.4
2017		51.8
2018		105.5
2019		56.9
2020 and thereafter		4,819.0
Total	**$**	**5,326.7**

The weighted average term of Quebecor's consolidated debt was approximately 7.2 years at December 31, 2014 (6.9 years at December 31, 2013). The debt consisted of approximately 82.6% fixed-rate debt (81.6% at December 31, 2013) and 17.4% floating-rate debt (18.4% at December 31, 2013).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, share repurchases, and dividend payments. The Corporation believes it will be able to meet future debt maturities, which are fairly staggered over the coming years.

Pursuant to their financing agreements, the Corporation and its subsidiaries are required to maintain certain financial ratios and financial covenants. The key indicators listed in these financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted operating income). At December 31, 2014, the Corporation and its subsidiaries were in compliance with all required financial ratios and restrictive covenants in their financing agreements.

Dividends Declared

- On March 10, 2015, the Board of Directors of Quebecor declared a quarterly dividend of $0.025 per share on its Class A Multiple Voting Shares ("Class A Shares") and Class B Subordinate Voting Shares ("Class B Shares"), payable on April 21, 2015 to shareholders of record at the close of business on March 27, 2015.

2500 MHz and AWS-3 spectrum auction

In January 2015, Videotron contracted new unsecured on-demand credit facilities, under which letters of credit were issued and filed with Industry Canada as pre-auction financial deposits in respect to its application to participate to the 2500 MHz and AWS-3 spectrum auctions. Under Industry Canada's published rules with respect to communications during the auction process, it is strictly forbidden for the Corporation to disclose the amount of the letters of credit, which may be withdrawn by Videotron at any time prior to the auction's commencement.

On March 6, 2015, Quebecor Media and its Videotron subsidiary announced that they had acquired four 30 MHz licences in the auction for AWS-3 commercial mobile spectrum at a total price of $31.8 million. The process will resume on April 14, 2015 with the auction for spectrum in the 2500 MHz band.

Analysis of consolidated balance sheet at December 31, 2014

Table 11
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2014 and December 31, 2013
(in millions of CAN dollars)

	December 31, 2014	December 31, 2013	Difference	Main reason for difference
Assets				
Cash and cash equivalents	**$ 395.3**	$ 476.6	$ (81.3)	Cash flows used in investing and financing activities exceeded cash flows provided by operating activities
Accounts receivable	**449.4**	566.3	(116.9)	Impact of current variances in activity and impact of recognition of net assets held for sale
Net assets held for sale[1]	**300.2**	67.9	232.3	Sale of English-language newspaper businesses, offset by sale of 74 Québec community weeklies in the Media segment
Property, plant and equipment	**3,430.4**	3,432.4	(2.0)	Additions to property, plant and equipment were offset by depreciation and reclassification of net assets held for sale
Intangible assets	**945.8**	824.8	121.0	Purchase of 700 MHz spectrum licences by Videotron, minus impairment of broadcasting licence in the Media segment
Goodwill	**2,714.6**	3,061.5	(346.9)	Impairment of goodwill in the Media segment and impact of recognition of net assets held for sale
Liabilities				
Long-term debt, including short-term portion and bank indebtedness	**5,283.5**	5,077.0	206.5	*See* "Financing activities"
Derivative financial instruments[2]	**(298.1)**	51.4	(349.5)	*See* "Financing activities"
Other liabilities	**426.8**	319.4	107.4	Increase in fair value of embedded derivatives related to convertible debentures

1 Current assets less current liabilities.

2 Current and long-term liabilities less long-term assets.

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2014, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; principal repayment and interest on convertible debentures; operating lease arrangements; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 12 below shows a summary of these contractual obligations.

Table 12
Contractual obligations of Quebecor as of December 31, 2014
(in millions of CAN dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,326.7**	$ 230.1	$ 115.2	$ 162.4	$ 4,819.0
Convertible debentures[2]	**663.7**	–	–	663.7	–
Interest payments[3]	**2,274.7**	284.7	625.8	583.7	780.5
Operating leases	**263.0**	49.6	74.5	46.5	92.4
Additions to property, plant and equipment and other commitments	**1,465.4**	274.9	361.9	199.3	629.3
Derivative financial instruments[4]	**(308.9)**	4.7	51.0	(8.2)	(356.4)
Total contractual obligations	**$ 9,684.6**	**$ 844.0**	**$ 1,228.4**	**$ 1,647.4**	**$ 5,964.8**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2014 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2014.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 12

Videotron leases sites for its LTE network under operating lease arrangements and has contracted long-term commitments to acquire equipment for a total future consideration of $184.3 million.

In 2011, Quebecor Media announced an agreement with Québec City for the construction and management of the Arena. As at December 31, 2014, the balance of these commitments stood at $111.8 million.

In 2012 and 2014, Quebecor Media signed 20-year agreements to install, maintain and advertise on bus shelters belonging to the Montréal and Laval transit commissions. As at December 31, 2014, the balance of these commitments stood at $110.0 million.

In May 2013, Videotron and Rogers Communications announced a 20-year agreement to build out and operate an LTE network in Québec and in the Ottawa area. As at December 31, 2014, the balance of these commitments stood at $193.3 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2014, the balance of these commitments stood at $901.8 million.

In November 2014, the Media segment, through TVA Group, reached an agreement to acquire 15 magazines in Canada for a cash consideration of $55.5 million. The transaction was authorized by the Competition Bureau on March 2, 2015.

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $49.2 million in 2015 (contributions of $61.5 million were paid in 2014).

Related Party Transactions

During 2014, the Corporation and its subsidiaries made purchases and incurred rent charges with affiliated corporations in the amount of $2.9 million ($3.3 million in 2013), which are included in purchase of goods and services. The Corporation and its subsidiaries made sales to affiliated corporations in the amount of $3.3 million ($3.5 million in 2013). These transactions were accounted for at the consideration agreed between the parties.

Off-Balance Sheet Arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual values of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2018. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2014, the maximum exposure with respect to these guarantees was $14.5 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One subsidiary of the Corporation, acting as a franchiser, has provided guarantees should franchisees, in their retail activities, default certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

Capital stock

In accordance with Canadian financial reporting standards, Table 13 below presents information on the Corporation's capital stock as at February 28, 2015. In addition, 1,310,000 stock options were outstanding as of February 28, 2015.

Table 13
Capital stock
(in shares and millions of CAN dollars)

	February 28, 2015	
	Issued and outstanding	Book value
Class A Shares	38,959,272	$ 8.7
Class B Shares	83,917,192	$ 318.5

On July 31, 2014, Quebecor filed its normal course issuer bid for a maximum of 500,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2014. The purchases can be made from August 13, 2014 to August 12, 2015 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All shares purchased under the bid will be cancelled.

In 2014, the Corporation purchased and cancelled 455,000 Class B Shares for a total cash consideration of $11.7 million (1,603,700 Class B Shares for a total cash consideration of $36.4 million in 2013). The excess of $10.0 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings in 2014 ($30.2 million in 2013).

On August 14, 2013, the Corporation carried out a two-for-one split of its outstanding Class A Shares and Class B Shares. Accordingly, shareholders received one additional share for each share owned on the record date. Trading on the shares on a split basis commenced at the opening of business on August 16, 2013.

Risks and Uncertainties

The Corporation operates in the telecommunications and media industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below. Unless the context otherwise requires, in this section, Quebecor Media refers to Quebecor Media and its subsidiaries.

Competition and technological development

Quebecor Media competes against incumbent local exchange carriers (or "ILECs") the primary of which holds a regional license to provide terrestrial broadcasting distribution in Montréal and several other communities in the Québec. Such primary ILEC launched its own Internet protocol television (or "IPTV") service in Montréal (including a portion of the greater Montréal area), in Québec City and in other locations in Québec and also secured licenses to launch video distribution services using video digital subscriber line (or "VDSL") technology. Quebecor Media's cable business competes against providers of direct broadcast satellite (or "DBS", which in Canada are also referred to as "DTH" for "direct-to-home" satellite providers), multichannel multipoint distribution systems (or "MDS"), and satellite master antenna television systems. The direct access to some broadcasters' websites that provide streaming in high-definition ("HD")of video-on-demand content is also available for some of the channels that Quebecor Media offers in its television programming. In addition, third-party Internet access providers could launch IP video services in Quebecor Media's footprint.

Quebecor Media also faces competition from illegal providers of cable television services and illegal access to non-Canadian DBS (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy). Competitors in the video business also include emerging content delivery platforms. Furthermore, over-the-top ("OTT") content providers, such as Netflix and Apple TV, compete for viewership.

Due to ongoing technological developments, the distinction between traditional platforms (broadcasting, Internet and telephony) is fading rapidly. For instance, the Internet is becoming an important broadcasting and distribution platform on wired and mobile devices.. In addition, mobile operators, with the development of their respective 4G and Long Term Evolution (also known as "LTE") networks, are now offering wireless and fixed wireless Internet services. In addition, VoIP telephony service also competes with Internet-based solutions.

In its Internet access business, Quebecor Media competes against other Internet service providers (or “ISPs”) offering residential and commercial Internet access services as well as WiMax and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line (“DSL”), fibre to the node and fibre to the home technologies, often offering comparable download speeds to its own. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access (“HSIA”) capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to its low and medium download speeds. The CRTC also requires cable and ILEC network providers, including Quebecor Media, to offer wholesale access to its high-speed Internet systems to third party ISP competitors for the purpose of providing retail Internet access services. These third party ISP competitors may also provide telephony and networking applications.

Quebecor Media’s cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers (or “CLECs”), mobile telephony service operators and other providers of telephony, VoIP and Internet communications, including competitors that are not facility-based and therefore have a much lower infrastructure cost. In addition, Internet protocol-based (“IP-based”) products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media’s business, prospects and results of operation.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current or developing adjunct technologies, such as Wi-Fi, WiMax, “hotspots” or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including most of the incumbent carriers as well as at least one other new entrant) have launched lower-cost mobile telephony services in order to acquire additional market share. Also, Quebecor Media may not be able to compete successfully in the future against existing or potential competitors, and increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

In relation to the Corporation’s Media segment, the media industry is experiencing rapid and significant technological changes, which have resulted in alternative means of program and content transmission. The continued growth of the Internet has presented alternative content distribution options that compete with traditional media. Furthermore, in each of its broadcasting markets, industry regulators have authorized DTH, microwave services and VDSL services and may authorize other alternative methods of transmitting television and other content with improved speed and quality. Quebecor Media may not be able to successfully compete with existing or newly developed alternative technologies, such as IPTV, or it may be required to acquire, develop or integrate new technologies. The cost of the acquisition, development or implementation of new technologies could be significant and its ability to fund such implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition or results of operations.

The continuous technological improvements to the Internet, combined with higher download speeds and cost reductions for customers, may divert a portion of its Media business’ existing television subscriber base from its video-on-demand services to new video-over-the-Internet model. While having a positive impact on the demand for its Internet services, video-over-the-Internet could adversely impact the demand for its video-on-demand services.

Finally, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television or IPTV, Internet, residential phone and mobile telephony services). As a result, should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing up to one subscriber for each of its services. This could have an adverse effect on its business, prospects, revenues, financial condition and results of operation.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world (including Canada, the United States and Europe) and has established worldwide coverage. Its inability to extend its worldwide coverage or to renew, or substitute for, these roaming agreements at their respective or better terms or on acceptable terms, may place Quebecor Media at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably.

In addition, various aspects of mobile communication operations, including the ability of mobile providers to enter into interconnection agreements with traditional landline telephone companies and the ability of mobile providers to manage data traffic on their networks, are subject to regulation by the CRTC. Regulations adopted or actions taken by the government agencies having jurisdiction over any mobile business that Quebecor Media may develop could adversely affect its mobile business and operations, including actions that could increase competition or its costs.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a code of ethics, it cannot be assured that it will continue to enjoy a good reputation, nor can it be assured that events that are beyond its control will not cause its reputation to be negatively impacted. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Limited offer of handsets

Only a limited number of devices is available for Quebecor Media's Advanced wireless services ("AWS"), which is in the 2 GHz range, a spectrum that is not broadly used for mobile telephony, and which consequently reduces the number of handsets available to its customers using AWS. Quebecor Media's LTE services offering requires devices in the high-end category, some of which LTE devices have an AWS HSPA capability. This could put pressure on Quebecor Media's acquisition costs as well as impair its ability to compete with lower-end devices. In addition, the handsets available to it are sometimes subject to an exclusivity period which varies in length when they are released to market. If manufacturers continue to offer exclusivity on future products in Canada, the number of handsets available to Quebecor Media potentially could be reduced.

Inventory obsolescence

Quebecor Media's wireless handset devices inventory generally has a relatively short product life cycles due to frequent wireless handset introductions. If it cannot effectively manage inventory levels based on product demand, this may increase the risk of inventory obsolescence.

Capital expenditures

Quebecor Media's strategy of maintaining a leadership position in the suite of products and services it offers and launching new products and services requires capital investments in its network and infrastructure to support growth in its customer base and demands for increased bandwidth capacity and other services. In this regard, Quebecor Media has in the past required substantial capital for the upgrade, expansion and maintenance of its network and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short and medium term in order to expand and maintain its systems and services, including expenditures relating to advancements in Internet access and high definition television ("HDTV"), as well as the cost of its mobile services infrastructure deployment.

The demand for wireless data services has been growing at unprecedented rates and it is projected that this demand will further accelerate, driven by the following increases: levels of broadband penetration; need for personal connectivity and networking; affordability of smartphones and Internet-only devices (e.g., high-usage data devices such as mobile Internet keys, tablets and electronic book readers); multimedia-rich services and applications; wireless competition; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum, if available and if economically reasonable, in order to address this increased demand. The ability to acquire additional spectrum (if needed) is dependent on the timing and the rules established by Industry Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, it could have a material adverse effect on its business, prospects and financial condition.

The development of Quebecor Media's LTE network requires capital expenditures to remain competitive and to comply with its obligations under the agreement with its partner governing the joint built-out of its LTE network. In addition, Quebecor Media may be required to make further capital expenditures in the future for its LTE network to remain competitive and in order to comply with its obligations. A geographical expansion of its LTE network may require Quebecor Media to incur significant costs and to make significant capital expenditures.

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to finance any portion of these capital improvement programs, new strategies and services or other capital expenditure requirements, whether through cash from operations, additional borrowings or other sources. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected. Even if Quebecor Media were able to obtain adequate funding, the period of time required to upgrade its network could have a material adverse effect on its ability to successfully compete in the future. Moreover, additional investments in its business may not translate into incremental revenues, cash flows or profitability.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and needs municipal rights of way to deploy its cable network. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the *"Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all of the major hydroelectric companies and all of the major telecommunications companies in its service territory. In the event that Quebecor Media seeks to renew or to renegotiate these agreements, it cannot guarantee that these agreements will continue to be available on favourable terms.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multi-platform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, maintaining its advanced broadband network, pursuing enhanced content development to reduce costs, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction. Quebecor Media may not be able to fully implement these strategies or realize their anticipated results without incurring significant costs or not implement them at all. In addition, its ability to successfully implement these strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes and other factors described in this section. While the centralization of certain business operations and processes has the advantage of standardizing practices, thereby reducing costs and increasing effectiveness, it also represents a risk in itself should a business solution implemented by a centralized office throughout the organization fail to produce the intended results. Quebecor Media may also be required to make capital expenditures or other investments that may affect its ability to implement its business strategies if it is unable to secure additional financing on acceptable terms or to generate sufficient funds internally to cover those requirements. Any material failure to implement its strategies could have a material adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third-parties under which it is committed to making significant operating expenditures in the future. It can provide no assurance that it will be successful in developing new activities in relation to these new engagements, including the development of new revenue sources.

Consumers' trend to abandon wire and cable services

The recent trend toward mobile substitution or "cord-cutting" (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada and the various unlimited offers launched by mobile operators. Also, there is a consumer trend, especially among younger consumers, to abandon wire and cable services which has resulted in a decline in households with a landline. Quebecor Media may not be successful in converting its existing cable telephony subscriber base to its mobile telephony services or in attracting younger customers to its services, which could have a material adverse effect on its business, its results of operation and its financial condition and which could prevent Quebecor Media from realizing the anticipated benefits of the investments made in its wire and cable technologies.

Rapid growth of traffic volumes on the Internet

Internet users are downloading an increasing amount of data each year and households are now connected to the Internet through a combination of several computers, tablets and other mobile devices, leading to simultaneous flows per home, which constitutes a departure from the past, when a majority of households were connected to the Internet through a single computer. In addition, some content on the Internet, such as videos, is now available at a higher bandwidth for which HD, as opposed to standard definition, is gradually becoming the norm. There has therefore been an increase in data consumption and an intensification of Internet traffic during peak periods, which calls for increased bandwidth capacity to address the needs of its customers.

Equipment costs are under pressure in an effort to counterbalance customers' demand for bandwidth. While Quebecor Media can relay some of this pressure on costs to its manufacturers, can adopt new technologies that allow cost reduction and implement other cost-reduction initiatives, Quebecor Media's inability to fully meet its customers' increasing need for bandwidth may result in price hikes or in reduced profitability.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources, and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, financial condition, prospects or results of operations. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has recently made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant capital expenditures and human effort. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following: the risk that management may not be able to successfully manage the development of its Sports and Entertainment business; the risk that the accommodation of the Sports and Entertainment Business may place significant demands on management, diverting attention from existing operations; the risk that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; the risk that Quebecor Media will not be able to achieve the benefits it expects from its investments in the development of its Sports and Entertainment business; the risk associated with a failure to make continued investments in its Sports and Entertainment business to respond to consumer trends and demands which could adversely affect its ability to compete in the sports and entertainment industry.

Key personnel

Quebecor and its subsidiaries' success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor and its subsidiaries' failure to recruit, train and retain such employees could have a material adverse effect on its business, financial condition and results of operations. In addition, in order to implement and manage their businesses and operating strategies effectively, Quebecor and its subsidiaries must sustain a high level of efficiency and performance and maintain content quality; they must continually enhance their operational and management systems and continue to effectively attract, train, motivate and manage their employees. If Quebecor and its subsidiaries are not successful in these efforts, it may have a material adverse effect on their business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

Advertising revenue is the primary source of revenue for the Corporation's Media business. Quebecor Media's revenues and operating results in these businesses depend on the relative strength of the economy in its principal newspaper and television markets, as well as the strength or weakness of local, regional and national economic factors. These economic factors affect the levels of retail, national and classified newspaper advertising revenue, as well as television advertising revenue. Since a significant portion of Quebecor Media's advertising revenue is derived from retail and automotive sector advertisers, weakness in these sectors and in the real estate industry has had, and may continue to have, an adverse impact on the revenues and results of operations of the Media business. Continuing or deepening softness in the Canadian or U.S. economy could further adversely affect key national advertising revenues.

Advertising revenues for the Media business are also driven by readership and circulation levels, as well as by market demographics, price, service and advertiser results. Readership and circulation levels tend to be based on the content of the newspaper, service, availability and price. A prolonged decline in readership and circulation levels in Quebecor Media's newspaper business and lack of audience acceptance of its content would have a material effect on the rate and volume of its newspaper advertising revenues (as rates reflect circulation and readership, among other factors), and could also affect its ability to institute circulation price increases for its print products, all of which could have a material adverse effect on its business, prospects, results of operations and financial condition.

The newspaper industry is experiencing structural changes, including the growing availability of free access to media, shifting readership habits, digital transferability, the advent of real-time information and secular changes in the advertising industry as well as the declining frequency of regular newspaper buying, particularly among young people, who increasingly rely on non-traditional media as a source for news. As a result, competition for advertising spend and circulation revenues comes not only from other newspapers and traditional media, but also from digital media technologies, which have introduced a wide variety of media distribution platforms (including, most significantly, the Internet and distribution over wireless devices and tablets) to readers and advertisers.

While Quebecor Media continues to pursue initiatives to offer value-added advertising solutions to its advertisers and to maintain its circulation base, such as investments in the re-design and overhaul of its newspaper websites and the publication of e–editions of a number of its newspapers, it may not be successful in retaining its historical share of advertising revenues or in transferring its audience to its new digital products. The ability of the Media's business to grow and succeed over the long-term depends on various factors, including its ability to attract advertisers and readers (including subscribers) to its online sites. Quebecor Media's new initiatives developed to generate additional revenues from its websites (such as digital platform advertising and/or the paywall revenue model) may not be accepted by users and, consequently, may negatively affect online traffic. In addition, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of these initiatives through increased circulation, advertising and digital revenues.

In broadcasting, the proliferation of television channels, progress in mobile and wireless technology, the migration of television audiences to the Internet and the viewing public's increased control over the manner, content and timing of their media consumption through personal video recording devices, have all contributed to the fragmentation of the television viewing audience and in a more challenging advertising sales environment. For example, the increased availability of personal video recording devices and video programming on the Internet, as well as the increased access to various media through mobile devices, may all have the potential to reduce the viewing of its content through traditional distribution outlets. Some of these new technologies also give consumers greater flexibility to watch programming on a time-delayed or on-demand basis, or to fast-forward or skip advertisements within its programming, which may adversely impact the advertising revenues it receives. Delayed viewing and advertisement skipping have the potential to become more common as the penetration of personal video recording devices increases and content becomes increasingly available via Internet sources. If the broadcasting market continues to fragment, Quebecor Media's audience share levels and its advertising revenues, results of operations, financial condition, business and prospects could be materially adversely affected.

Distribution of a wide range of television programming

The financial performance of its cable and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing, conveniently-scheduled television programming at reasonable rates. Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, these suppliers have become vertically integrated and are now more limited in number. The quality and amount of television programming offered by Quebecor Media affect the attractiveness of its services to customers and, accordingly, the rates Quebecor Media can charge for these services. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates, or its inability to pass-through rate increases to its customers could have a material adverse effect on its business, financial condition, results of operations and prospects.

In addition, Quebecor Media's ability to attract and retain cable customers depends, to a certain extent, on its capacity to offer quality content, high-definition programming, an appealing variety of programming choices and packages, as well as multiplatform distribution and on-demand content, at competitive prices. If the number of specialty channels being offered does not increase at the level and pace comparable to its competitors, if the content offered on such channels does not receive audience acceptance, or if it is unable to offer multiplatform availability, high-definition programming and on-demand content for capacity reasons, among others, this may have a negative impact on revenues from Quebecor Media's cable operations.

The multiplication of foreign and deregulated content providers (often global players on the Internet) puts pressure on the viability of Quebecor Media's current business model for television distribution. Substantial capital expenditures on infrastructure and in research and development may be required to remain competitive.

Costs, quality, and variety of television programming

The most significant costs in television broadcasting are programming and production costs. Increased competition in the television broadcasting industry, developments affecting producers and distributors of programming content, the vertical integration of distributors and broadcasters, changes in viewer preferences and other developments could impact both the availability and the costs of programming content, as well as the costs of production. Future increases or volatility in programming and production costs could adversely affect Quebecor's operating results. Developments in cable, satellite or other forms of distribution could also affect both the availability and the cost of programming and production and increase competition for advertising expenditures. As well, the value of royalties payable pursuant to the *Copyright Act* are frequently decided by the Copyright Board of Canada during or even after the applicable period, which can cause retroactive increases in content costs.

Cost of newsprint

Newsprint, which is the basic raw material used to publish newspapers, has historically been and may continue to be subject to significant price volatility. Changes in the price of newsprint could significantly affect the Corporation's income, and volatile or increased newsprint costs have had, and may in the future have, a material adverse effect on its results of operations.

In order to obtain more favourable pricing, Quebecor Media sources substantially all of its newsprint from a single newsprint producer (the "Newsprint Supplier"). Pursuant to the terms of its agreement with its Newsprint Supplier, Quebecor Media obtains newsprint at a discount to market prices, receives additional volume rebates if certain thresholds are met, and benefits from a ceiling on the unit cost of newsprint. On the expiry of Quebecor Media's agreement with its Newsprint Supplier, there can be no assurance that it will be able to renew this agreement or that its Newsprint Supplier will continue to supply newsprint to Quebecor Media on favourable terms, or at all, after the expiry of the agreement. If Quebecor Media is unable to continue to source newsprint from its Newsprint Supplier on favourable terms, or if Quebecor Media is unable to otherwise source sufficient newsprint on terms acceptable to the corporation, its costs could increase significantly, which could materially adversely affect the profitability of its newspaper business and its results of operations. Quebecor Media also relies on its Newsprint Supplier for deliveries of newsprint. The availability of its newsprint supply, and therefore its operations, may be adversely affected by various factors, including labour disruptions affecting its Newsprint Supplier or the cessation of operations of its Newsprint Supplier.

In addition, since newspaper operations are labour intensive and since Quebecor Media's operations are located across Canada, its newspaper business has a relatively high fixed-cost structure. During periods of economic contraction, its revenues may decrease while certain costs remain fixed, resulting in reduced earnings.

Launch of new specialty services

Quebecor Media is investing in the launch of new specialty services in its Broadcasting operations. During the period immediately following the launch of a new specialty service, subscription revenues are always relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize or may never materialize.

Loss of key customers

In general, Quebecor Media does not have long-term or exclusive service agreements with its customers. Business is based primarily on customer satisfaction with reliability, timeliness, quality and price. Quebecor Media is unable to predict if, or when, its customers will purchase its services. There can be no assurance that the revenues generated from key customers, individually or in the aggregate, will reach or exceed historical levels in any future period, or that it will be able to develop relationships with new customers.

Quebecor Media's customers periodically re-evaluate their decisions to outsource the services that it performs rather than perform them in-house. A decision by key customers to move in-house services they currently purchase from Quebecor Media could have a material adverse effect on its results of operations and financial condition. Quebecor Media cannot assure you that it will continue to maintain favorable relationships with these customers or that they will not be adversely affected by economic conditions.

Single-clustered network

Quebecor Media provides its digital television, Internet access and cable telephony services through a primary headend and its analog television services through 12 additional regional headends in a single clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its network until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers. An inability to maintain and enhance its existing information technology systems or obtain new systems to accommodate additional customer growth or to support new products and services could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth and manage operating expenses, all of which could adversely impact its financial results and position. In addition, although Quebecor Media uses industry standard networks and established information technology security and survivability/disaster recovery practices, a security breach, disaster, cyber-security threat or a violation of its Internet security could have a material adverse effect on its reputation, business, prospects, financial condition and results of operations.

Protection from piracy

In Quebecor Media's cable, Internet access and telephony business, it may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its network, analog and digital programming, and its Internet access services. It uses encryption technology to protect its cable signals from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its network, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in its revenues as well as significant remediation costs and legal claims.

Malicious and abusive Internet practices

Quebecor Media's cable data customers utilize its network to access the Internet and, as a consequence, it or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms and other destructive or disruptive software. These activities could have adverse consequences on its network and its customers, including deterioration of service, excessive call volume to call centers and damage to its customers' equipment and data or to its own. Significant incidents could lead to customer dissatisfaction and, ultimately, to loss of customers or revenues, in addition to increased costs to service its customers and protect its network. Any significant loss of cable data, customers or revenue, or a significant increase in the costs of serving those customers could adversely affect its reputation, growth, business, prospects, financial condition and results of operations.

Third-party suppliers and providers

Quebecor Media depends on third–-party suppliers and providers for certain services, hardware and equipment that are critical to its operations and network evolution. These materials and services include set-top boxes, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, software, the "backbone" telecommunications network for its Internet access and telephony services, and construction services for expansion and upgrades of its cable and mobile networks. These services and equipment are available from a limited number of suppliers and therefore Quebecor Media faces the risks of supplier disruption, including business difficulties, restructuring or supply-chain issues. If no supplier can provide Quebecor Media with the equipment or services that it requires or that comply with evolving Internet and telecommunications standards, or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services or other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out its advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees for providing their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with these content providers or find alternative sources of equivalent content, its Media operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor and its subsidiaries are involved in various legal proceedings and other claims relating to the conduct of their business. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor and its subsidiaries' reputation, results of operations, liquidity or financial position, a negative outcome in respect of any such claim or litigation could have such an adverse effect. Moreover, the cost of defending against lawsuits and diversion of management's attention could be significant.

Strikes and other labour protests

At December 31, 2014, approximately 50% of Quebecor Media's employees were represented by collective bargaining agreements. Through its subsidiaries, Quebecor Media is currently party to 77 collective bargaining agreements.

While Quebecor Media currently has no labour disputes nor do it currently anticipate any such labour dispute in the near future.

Quebecor Media can neither predict the outcome of current or future negotiations relating to labour disputes, if any, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial position, results of operations, and reputation. Even if Quebecor Media does not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefits costs is limited by the terms of its collective bargaining agreements.

Pension plan liability

The economic cycle and employee demographics could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund these pension plans will not increase in the future and therefore negatively impact its operating results and financial position. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust fund. Shortfalls may arise due to lower-than-expected returns on investments, changes in the discount rate used to assess the pension plan's obligations, and actuarial losses. This risk is mitigated by policies and procedures instituted by Quebecor Media and its pension committees to monitor investment risk and pension plan funding. It is also mitigated by the fact that some of Quebecor Media's defined benefit pension plans are no longer offered to new employees.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes and cable modems, mobile devices (handsets) and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, is payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign-exchange gains or losses. Although the Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2014, and it intends in the future to enter into such transactions for new U.S.-dollar-denominated debt, these hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations. The Corporation may in the future be required to provide cash and other collateral to secure its obligations with respect to such hedging transactions, or it may in the future be unable to enter into such transactions on favorable terms, or at all.

In addition, certain cross-currency interest rate swaps entered into by the Corporation and its subsidiaries include an option that allows each party to unwind the transaction on a specific date at the then fair value.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2014, the net aggregate fair value of its cross-currency interest rate swaps and foreign-exchange forward contracts was in a net asset position of $298.1 million on a consolidated basis.

Certain of the commodities that the Corporation consumes in its daily operations are traded on commodities exchanges or are negotiated on their respective markets in U.S. dollars and, therefore, although the Corporation pays its suppliers in CAN dollars, the prices it pays for such commodities may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge the exchange rate risk related to the prices of some of those commodities. However, fluctuations of the exchange rate for its commodities purchases that are not hedged could affect the prices the Corporation pays for such commodities and could have an adverse effect on its results of operations.

Volatility

The capital and credit markets have experienced significant volatility and disruption over the last several years, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on issuance of debt securities and increased costs under credit facilities. Disruptions in the capital and credit markets could increase Quebecor's and its subsidiaries' interest expense, thereby adversely affecting their results of operations and financial position.

Quebecor's and its subsidiaries' access to funds under their existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's and its subsidiaries' credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Longer-term volatility and disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced alternatives or failures of significant financial institutions could adversely affect Quebecor's and its subsidiaries' access to the liquidity and affordability of funding needed for their businesses in the longer term. Such disruptions could require Quebecor and its subsidiaries to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for their business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's and its subsidiaries' products and increased incidences of customer inability to pay or timely pay for the services or products that it provides. Events such as these could adversely impact Quebecor's and its subsidiaries' results of operations, cash flows, financial position and prospects.

Ethical Business Conduct

Any failure to adhere to Quebecor Media's policies, the law or ethical business practices could significantly affect its reputation and brands and could therefore negatively impact its financial performance. Quebecor Media's framework for managing ethical business conduct includes the adoption of a code of ethics which its directors and employees are required to acknowledge and agree to on a regular basis, and as part of an independent audit and security function, maintenance of a whistle-blowing hotline. There can be no assurance that these measures will be effective to prevent violations of law or ethical business practices.

Asset impairment charges

In the 2014 financial year and in the past, the Corporation has recorded asset impairment charges which, in some cases, have been material. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flow.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions for it and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues, and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel and operations.

If the Corporation determines to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue generating asset, or the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity and prospects.

Implementation of changes to the structure of its business

Quebecor Media has and it will continue to implement changes to the structure of its business due to many factors such as the necessity of a corporate restructuring, a system replacement and upgrade, a process redesign and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may lead to greater-than-expected operational challenges and costs, expenses, customer loss and business disruption for Quebecor Media, which could adversely affect its business and its ability to gain its anticipated benefits.

Competition and consolidation of the retail locations in the Telecommunications business

In the Corporation's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its competitors have pursued a strategy to sell their products through independent retailers to extend their presence on the market and some of its competitors have also acquired certain independent retailers and created new distribution networks. This may result in limiting the expansion of the Corporation retail network and may contribute to isolate the Corporation from its competitors, which could have an adverse effect on its business, prospects and results of operation.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licenses. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. There are significant restrictions on the ability of non-Canadian entities to own or control broadcasting licenses and telecommunications carriers in Canada, although the federal government recently eliminated the foreign ownership restrictions on telecommunications companies with less than 10% of total Canadian telecommunications market revenues. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licenses, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. For instance, the CRTC recently adopted a new Wireless Code which regulates numerous aspects of the provision of retail wireless services. Quebecor Media's wireless and cable operations are also subject to technical requirements, license conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by Industry Canada.

In addition, laws relating to communications, data protection, e-commerce, direct marketing and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes in the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions may impose limits on the collection and use of certain kinds of information. On December 17, 2014, an amendment to the *Telecommunications Act* and the *Radiocommunication Act* was adopted to give to the CRTC and Industry Canada the power to impose monetary sanctions for failure to comply with current regulations.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of license, the issuance of new licenses, including additional spectrum licenses to its competitors, or changes in the treatment of the tax deductibility of advertising expenditures, could have a material adverse effect on its business (including how it provides products and services), financial condition, prospects, and results of operations. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. It is difficult to predict in what form laws and regulations will be adopted or how they will be construed by the relevant courts, or the extent to which any changes might adversely affect Quebecor Media.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographical products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs which Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes in the policies or rules of application in Canada or in any of its provinces in connection with these government incentive programs, including any change in the Québec or the federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcasted and may have a material adverse effect on its financial condition and results of operations. Canadian content programming is also subject to certification by various agencies of the federal government. If programming fails to so qualify, the Corporation would not be able to use the programs to meet its Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

To ensure that the Corporation maintains minimum levels of Canadian ownership under the *Broadcasting Act* and other legislation under which it derives the benefit of tax credits and industry incentives, it has placed constraints on the issue and transfer of the shares of certain of its subsidiaries.

In addition, the Canadian and provincial governments currently provide grants and incentives to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation's Studios, Equipment and Post-Production Business, as well as content producers for its television broadcasting and production operations, finance a portion of their production budgets through Canadian governmental incentive programs, including federal and provincial tax credits. There can be no assurance that the government grants and incentive programs presently being offered to participants in the film and television production industry will continue at their present levels or at all. If such grants or incentives are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced, as a result of which the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions around the world, including by many states in the United States of America. Some producers may select locations other than Québec to take advantage of tax credit programs they may conclude to be more or as attractive as those Québec offers. Other factors such as director or star preference may also have the effect of productions being shot in a location other than Québec, may have a material adverse effect on the Corporation's business, financial condition and results of operations.

Licence renewals

Videotron's AWS licenses were issued in December 2008 for a 10-year term. At least two years before the end of this term, and any subsequent term, Videotron may apply for a renewed license for a term of up to 10 years. AWS license renewal, including whether license fees should apply for a subsequent license term, will be subject to a public consultation process initiated in the eighth year of the license.

Videotron's 700 MHz licences were issued in April 2014 for a 20-year term. At the end of this term, Videotron expects that new licenses will be issued for a subsequent term through a renewal process, unless a breach of license condition by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licenses after this term, including the terms and conditions of the new licenses and whether license fees should apply for a subsequent license term, will be determined by Industry Canada following a public consultation.

Provision of Third-party ISPs with access to cable systems

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide third-party ISPs with access to their cable systems at mandated cost-based rates. Several third-party ISPs are interconnected to the Corporation's cable network and are thereby providing retail Internet access services.

The CRTC also requires large cable carriers, such as the Corporation, to allow third party ISPs to provide telephony and networking (LAN/VPN) applications in addition to retail Internet access services. As a result of these requirements, the Corporation may experience increased competition for retail cable Internet and residential telephony customers.

In a notice of consultation issued on October 15, 2013, the CRTC initiated a comprehensive review of wholesale services and associated policies. Among the issues considered in this proceeding are whether to extend mandatory wholesale high-speed access services to include fibre-to-the-premises (FTTP) services, or alternatively whether the Commission should forbear from regulating any existing wholesale services, as well as the approaches and principles the Commission relies on to set rates for wholesale services. A public hearing on these matters took place in November and December, 2014, and a ruling is expected by April 2015. As a result of this proceeding, the Corporation may experience increased competition for retail cable Internet and telephony customers. In addition, because its third-party Internet access rates are regulated by the CRTC, the Corporation could be limited in its ability to recover its costs associated with providing this access.

Environmental laws and regulations

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have recently implemented Extended Producer Responsibility (EPR) regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products", which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain studios and vacant lots, some of which are located on a former landfill, with the presence of gas emitting waste. As a result, the operation and ownership of these studios and vacant lots carries an inherent risk of environmental and health and safety liabilities for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs and other environmental damages (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in being involved from time to time in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Concerns about alleged health risks relating to radiofrequency emissions

Some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems or possible interference with electronic medical devices, including hearing aids and pacemakers. All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied to it meet all applicable safety requirements. While there is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with, additional studies of radiofrequency emissions are ongoing and Quebecor Media cannot be sure that the results of any such future studies will not demonstrate a link between radiofrequency emissions and health problems.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or expose Quebecor Media to potential litigation. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations.

Indebtedness

Quebecor and its subsidiaries currently have a substantial amount of debt and significant interest payment requirements. As at December 31, 2014, they had $5.28 billion of consolidated long-term debt. Quebecor's and its subsidiaries' indebtedness could have significant consequences, including the following:

- increase their vulnerability to general adverse economic and industry conditions;
- require them to dedicate a substantial portion of their cash flow from operations to making interest and principal payments on their indebtedness, reducing the availability of their cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit their flexibility in planning for, or reacting to, changes in their businesses and the industries in which Quebecor and its subsidiaries operate;
- place them at a competitive disadvantage compared to competitors that have less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in their indebtedness, their ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor and its subsidiaries have significant indebtedness, as at December 31, 2014, they had approximately $1.37 billion available for additional borrowings under their existing credit facilities on a consolidated basis. If Quebecor or its subsidiaries incur additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's and its subsidiaries' debt instruments contain a number of operating and financial covenants restricting their ability to, among other things:

- incur indebtedness;
- create liens;
- pay dividends on or redeem or repurchase its stock;
- make certain types of investments;
- restrict dividends or other payments from restricted subsidiaries;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor or its subsidiaries are unable to comply with these covenants and are unable to obtain waivers from their creditors, then they would be unable to make additional borrowings under their credit facilities, their indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under their other debt, including its Senior Notes. If Quebecor's and its subsidiaries' indebtedness is accelerated, Quebecor and its subsidiaries may not be able to repay their indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor and its subsidiaries incur additional debt in the future or refinance existing debt, they may be subject to additional covenants, which may be more restrictive than those to which they are currently subject. Even if Quebecor and its subsidiaries are able to comply with all applicable covenants, the restrictions on their ability to manage their business at their sole discretion could adversely affect their business by, among other things, limiting their ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor and its subsidiaries believe would be beneficial to them.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flow of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by these entities to Quebecor. The ability of these entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject to.

The ability of its subsidiaries to generate sufficient cash flow from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as structural changes, many of which are outside of its or their control. If the cash flow and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise, are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flow to satisfy Quebecor's debt obligations, or to refinance these obligations on commercially reasonable terms, could have a material adverse effect on its business, financial condition, results of operations and prospects.

Ability to refinance

Quebecor and its subsidiaries may be required from time to time to refinance certain of their existing debt at or prior to maturity. Quebecor's and its subsidiaries' ability to obtain additional financing to repay such existing debt at maturity will depend upon a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor and its subsidiaries on favorable terms, or at all.

Provisions of the Articles that could discourage or prevent a takeover

Provisions in the Corporation's articles and bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. These provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's Directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change of control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

Pierre Karl Péladeau, directly and indirectly, owns substantially all of Quebecor's Class A Shares. The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. Therefore, approximately 73% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of directors and approval of significant corporate transactions, such as amendments to the Corporation's articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing or deterring a change of control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures and derivative financial instruments. As a result of their use of financial instruments, the Corporation and its subsidiaries are exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation and its subsidiaries use derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency; (ii) to achieve a targeted balance of fixed- and floating-rate debts; and (iii) to lock-in the value of certain derivative financial instruments through offsetting transactions. The Corporation and its subsidiaries do not intend to settle their derivative financial instruments prior to their maturity as none of these instruments are held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
December 31, 2014
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold		Notional amount bought	
Quebecor Media					
2016[1]	1.0154	US$	320.0	$	324.9
Videotron					
Less than 1 year	1.1198	$	106.3	US$	94.9
2017[2]	1.1204	US$	260.0	$	291.3

Interest rate swaps

Maturity	Notional amount		Pay/ receive	Fixed rate	Floating rate
TVA Group					
December 2017	$	44.0	Pay fixed/ Receive floating	2.03%	Bankers' acceptances 1 month

Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023[1]	2007 to 2016	US$ 320.0	7.69%	0.9977
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan “B”	2013 to 2020	US$ 345.6	Bankers’ acceptances 3 months + 2.77%	1.0346
Videotron				
6.375% Senior Notes due 2015	2005 to 2015	US$ 175.0	5.98%	1.1781
9.125% Senior Notes due 2018	2008 to 2018	US$ 75.0	9.64%	1.0215
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024[2]	2008 to 2017	US$ 260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers’ acceptances 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039

[1] The Corporation initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 7.75% Senior Notes due 2016 redeemed in 2012. These swaps are now used to set in CAN dollars all coupon payments through 2016 on US$431.3 million of notional amount under its 5.75% Senior Notes due 2023 and issued on October 11, 2012. In conjunction with the repurposing of these swaps, the Corporation has entered into US$320.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the March 15, 2016 notional exchange.

[2] Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued on April 9, 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation and its subsidiaries include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The gains on valuation and translation of financial instruments for 2014 and 2013 are summarized in Table 15.

Table 15
Loss on valuation and translation of financial instruments
(in millions of CAN dollars)

		2014		2013
Loss on embedded derivatives and derivative financial instruments for which hedge accounting is not used	**$**	**7.9**	$	173.2
Loss on embedded derivatives related to convertible debentures		**91.6**		140.0
(Gain) loss on reversal of embedded derivatives upon debt redemption		**(1.1)**		72.9
Gain on ineffective portion of cash flow hedges		**(0.5)**		(1.7)
Gain on ineffective portion of fair value hedges		**(3.2)**		–
	$	**94.7**	$	384.4

A $14.2 million gain on cash flow hedges was recorded under “Other comprehensive income” in relation to cash flow hedging relationships in 2014 (loss of $45.1 million in 2013).

Fair value of financial instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using period-end market yields or the market value of similar instruments with the same maturity.

The fair value of cash equivalents and bank indebtedness, classified as held for trading and accounted for at their fair value on the consolidated balance sheets, is determined using inputs that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation’s valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium estimated using a combination of observable and unobservable inputs in the market to the net exposure of the counterparty or the Corporation.

The fair value of early settlement options recognized as embedded derivatives and embedded derivative related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors, and underlying instruments adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2014 and 2013 are as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of CAN dollars)

	2014		2013	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1 2]	**$ (5,326.7)**	**$ (5,444.7)**	$ (5,140.7)	(5,200.0)
Convertible debentures[3]	**(711.8)**	**(711.8)**	(615.1)	(615.1)
Derivative financial instruments[4]				
Early settlement options	**8.2**	**8.2**	14.5	14.5
Foreign exchange forward contracts[5]	**4.2**	**4.2**	1.8	1.8
Interest rate swaps	**(0.5)**	**(0.5)**	–	–
Cross-currency interest rate swaps[5]	**294.4**	**294.4**	(53.2)	(53.2)

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of long-term debt excludes the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $298.6 million as of December 31, 2014 (an asset position of $18.6 million as of December 31, 2013).

5 The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2014, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2014, 8.5% of trade receivables were 90 days past their billing date (9.8% as of December 31, 2013) of which 57.3% had an allowance for doubtful accounts (46.5% as of December 31, 2013).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2014 and 2013:

	2014	2013
Balance as of beginning of year	**$ 28.4**	$ 29.6
Charged to income	**32.1**	41.3
Utilization	**(34.5)**	(42.5)
Reclassification to assets held for sale	**(4.2)**	–
Balance as of end of year	**$ 21.8**	$ 28.4

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of their use of derivative financial instruments, the Corporation and its subsidiaries are exposed to the risk of non-performance by a third party. When the Corporation and its subsidiaries enter into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation and its subsidiaries will not be able to meet their financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation and its subsidiaries manage this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 7.2 years as of December 31, 2014 (6.9 years as of December 31, 2013). (See also "Contractual Obligations" above.)

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation and its subsidiaries have entered into transactions to hedge the foreign currency risk exposure on their U.S.-dollar-denominated debt obligations outstanding as of December 31, 2014, to hedge their exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock-in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The following table summarizes the estimated sensitivity on income and on Other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar as of December 31, 2014:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of $0.10		
U.S.-dollar-denominated accounts payable	**$ (1.0)**	**$ –**
Gain on valuation and translation of financial instruments and derivative financial instruments	**2.7**	**49.5**
Decrease of $0.10		
U.S.-dollar-denominated accounts payable	**1.0**	**–**
Gain on valuation and translation of financial instruments and derivative financial instruments	**(2.7)**	**(49.5)**

Interest rate risk

Some of the Corporation's and its subsidiaries' bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation and its subsidiaries bear interest at fixed rates. The Corporation and its subsidiaries have entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2014, after taking into account the hedging instruments, long-term debt was comprised of 82.6 % fixed-rate debt (81.6% in 2013) and 17.4 % floating-rate debt (18.4% in 2013).

The estimated sensitivity on interest payments, of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2014 is $8.6 million.

The estimated sensitivity on income and Other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2014, as per the Corporation's valuation models, is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of 100 basis points	$ **0.8**	$ **(22.2)**
Decrease of 100 basis points	**(0.8)**	**22.2**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, net assets and liabilities related to derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2014 and 2013 is as follows:

Table 17
Capital structure of Quebecor
(in millions of CAN dollars)

	2014	2013
Bank indebtedness	**$ 5.2**	$ 0.5
Long-term debt	**5,278.3**	5,076.5
Liability and derivative components of convertible debentures	**232.2**	140.6
Convertible debentures	**500.0**	500.0
Derivative financial instruments	**(298.1)**	51.4
Cash and cash equivalents	**(395.3)**	(476.6)
Net liabilities	**5,322.3**	5,292.4
Equity	**$ 1,063.3**	$ 1,195.4

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

Contingencies

A number of legal proceedings against the Corporation and its subsidiaries are pending. In the opinion of the management of the Corporation and its subsidiaries, the outcome of these proceedings is not expected to have a material adverse effect on Corporation's results or on its financial position.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under "Deferred revenue" when customers are invoiced.

Revenue recognition policies for each of the Corporation's main activities are as follows:

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet, cable telephony or mobile telephony, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income. Operating revenues from cable and other services, such as Internet access, cable and mobile telephony, are recognized when services are rendered. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate. Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction of related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction of related equipment sales on activation. Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided.

Revenues from the retail activities are recognized at the time of delivery, net of provisions for estimated returns based on historical rate of returns.

Media

Advertising revenues derived from the sale of advertising airtime are recognized when the advertisement has been broadcast on television. Advertising revenues derived from newspaper and magazine publishing activities are recognized when the publication is delivered. Website advertising is recognized when advertisements are placed on websites.

Revenues derived from subscriptions to specialty television channels are recognized on a monthly basis at the time service is rendered.

Revenues from the sale or distribution of newspapers, magazines and books are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns.

Revenues derived from subscription to online publications are recognized over the period of the subscription.

Sports and Entertainment

Revenues derived from entertainment product distribution are recognized on delivery of the products, net of provisions for estimated returns based on historical rate of returns.

Revenues derived from show production and sporting and cultural event management are recognized once the event or production occurs or when the services are rendered.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. At each balance sheet date, the Corporation reviews whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs to sell and the value in use of the asset or CGU. Fair value less costs to sell represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount consisting of future cash flows derived mainly from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment losses been recognized previously.

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the asset category.

In addition, when determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU.

Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there are no significant amounts of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives on its books at this time that present a significant risk of impairment in the near future. However, since impairment charges were recorded in 2014 in the Newspaper and Broadcasting CGUs, any negative change in the future in the assumptions used for the purpose of realizing the impairment test in these CGUs could result in an additional impairment charge.

The net book value of goodwill as at December 31, 2014 was $2.71 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2014 was $60.5 million.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debt resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in “Other comprehensive income” until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated Other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of these derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

The judgment used in determining the fair value of derivative financial instrument including embedded derivatives, using valuation and pricing models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, and the value of the gain or loss on derivative financial instruments recorded in the consolidated statements of comprehensive income. Also, valuation and financial models are based on a number of assumptions including future cash flows, period-end swap rates, foreign exchange rates, credit default premium, volatility, discount factors and underlying instrument adjusted implicit interest rate and credit premium.

In addition, judgment is required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statement of income as a gain or loss on valuation and translation of financial instruments.

Determination of the fair value of the embedded derivatives is based on a number of assumptions, including contractual future cash flows, volatility and discount factors. The judgment used in determining the fair value of embedded derivatives, using valuation models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income.

Pension and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plan and postretirement benefits plan are measured at present value and assessed on the basis of a number of economic and demographic assumptions, which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "Other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan to the extent to which the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future, for the purpose of calculating the limit on the net benefit asset, is based on a number of assumptions, including future service costs and reductions in future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of these assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash or other assets at the option of the employee are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

Estimates of the fair value of stock option awards are determined by applying an option-pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, the dividend yield, the expected volatility, and the expected remaining life of the option.

The judgment and assumptions used in determining the fair value of liability-classified stock-based awards may have an effect on the compensation cost recorded in the statements of income.

Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time, and is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Allowance for doubtful accounts

The Corporation maintains an allowance for doubtful accounts to cover anticipated losses from customers who are unable to pay their debts. The allowance is reviewed periodically and is based on an analysis of specific significant accounts outstanding, the age of the receivable, customer creditworthiness, and historical collection experience.

Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. The judgments made in determining the estimated fair value and the expected useful life of each acquired asset, and the estimated fair value of each assumed liability, can significantly impact net income.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is at all times under audit by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the final outcome is difficult to predict.

Changes in Accounting Policies

On January 1, 2014, the Corporation adopted retrospectively IFRIC 21 – *Levies*, which clarifies the timing of accounting for a liability in relation with outflow of resources that is imposed by governments in accordance with legislation, based on the activity that triggers the payment. The adoption of this interpretation did not have a material impact on the consolidated financial statements.

In May 2014, the IFRS Interpretations Committee ("the Committee") published a summary of its meeting discussion on accounting for a financial instrument that is convertible into a variable number of shares subject to a cap or a floor. The Committee noted that different accounting treatments had been used by issuers in the past for this type of instrument. Although interpretation analysis of alternative treatments were expressed and provided by some market participants to the Committee, the Committee decided not to add this issue to its agenda and noted that this instrument should be accounted for as a liability in its entirety. As such, the Corporation retrospectively changed its accounting policy for the accounting of its convertible debentures to be in line with the Committee discussions. Accordingly, the Corporation's convertible debentures are now accounted for as a financial liability and the cap and floor conversion price features are now accounted for separately as embedded derivatives at fair value, with changes in fair value being recorded in income. The following tables summarize the impact of this change in accounting policy on previously reported financial information.

Consolidated statements of income and comprehensive income

		2013
Financial expenses	$	13.6
Loss on valuation and translation of financial instruments		145.5
Deferred income taxes		(4.4)
Net loss and comprehensive loss attributable to shareholders	$	(154.7)
Earnings per share attributable to shareholders		
Basic	$	(1.25)

Consolidated balance sheets

Increase (decrease)		**2014**		2013
Accounts payable and accrued charges	**$**	**(11.6)**	$	(10.7)
Convertible debentures		**500.0**		500.0
Other liabilities[1]		**40.7**		(119.2)
Deferred income tax liability		**25.9**		30.2
Equity component of convertible debentures		**(398.3)**		(398.3)
Retained earnings		**(156.7)**		(2.0)

1 Embedded derivatives related to the convertible debentures are presented with other liabilities.

Recent accounting pronouncements

The Corporation has not yet completed its assessment of the impact of the adoption of these pronouncements on its consolidated financial statements.

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk management activities undertaken by entities.

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2017, with early adoption permitted.

IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based five-step model to be applied to all contracts with customers.

Controls and Procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2014. The design of DCP therefore provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and that information required to be disclosed by the Corporation in its annual, interim and other reports, which it files or releases in accordance with securities laws, is recorded, processed, summarized and reported within the time periods specified under those laws. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the Corporation's IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by management during the financial period beginning October 1, 2014 and ending December 31, 2014.

Additional Information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary Statement Regarding Forward-Looking Statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in the forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue developing its network and related mobile services;
- general economic, financial or market conditions and variations in the businesses of Quebecor Media's local, regional or national newspaper and broadcasting advertisers;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing its network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- Quebecor Media's ability to successfully restructure its newspaper operations to optimize their efficiency in the context of the changing newspaper industry;
- disruptions to the network through which Quebecor Media provides its digital cable television, Internet access and telephony services, and its ability to protect such services from piracy;
- labour disputes or strikes;
- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets or in an increase in competition, compliance costs or capital expenditures;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and;
- interest rate fluctuations that could affect Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation’s circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation’s actual results to differ from current expectations, please refer to the Corporation’s public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the “Risks and Uncertainties” section of this Management Discussion and Analysis.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation’s expectations as of March 11, 2015, and are subject to change after that date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 53 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company with an 81.07% interest in Quebecor Media Inc., one of Canada's largest media groups. Quebecor Media's subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, "Quebecor" or "the Corporation" refer to Quebecor Inc. and its subsidiaries, and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

On September 9, 2015, Quebecor Media purchased part of the interest in its equity held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), a subsidiary of the Caisse de dépôt et placement du Québec. All the repurchased shares were cancelled. Upon completion of the transaction, the Corporation's interest in Quebecor Media increased from 75.36% to 81.07%.

During the fourth quarter of 2015, the Corporation changed its organizational structure and transferred its music distribution and production operations from the Sports and Entertainment segment to the Media segment. Accordingly, prior-period figures in the Corporation's segmented reporting have been reclassified to reflect those changes.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: cable services; Internet access; mobile and cable telecommunications; over-the-top video service; business solutions (including data hosting centres); broadcasting; soundstage and equipment leasing and post-production services for the film and television industries; newspaper publishing and distribution; Internet portals and specialized websites; book and magazine publishing and distribution; rental and distribution of video games and game consoles; music recording, production and distribution; out-of-home advertising; operation and management of a world-class entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a premier mobile communications and cable service provider. Through its Media segment, Quebecor Media holds leading positions in the creation, promotion and distribution of entertainment, news and Internet-related services designed to appeal to audiences in every demographic. Quebecor Media is pursuing a convergence strategy to capture synergies among all its media properties.

All amounts are stated in Canadian dollars ("CAN dollars") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

DISCONTINUED OPERATIONS

On September 27, 2015, Quebecor Media closed the sale of the retail business of Archambault Group Inc. ("Archambault Group"), including the 14 Archambault stores, the *archambault.ca* portal and the English-language Paragraphe Bookstore, to Groupe Renaud-Bray inc. for a cash consideration of $14.5 million, less disposed-of cash in the amount of $1.1 million, and a $3.0 million balance due. The transaction was approved by the Competition Bureau on September 4, 2015. The operating results and cash flows related to those businesses have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On April 13, 2015, Quebecor Media closed the sale, announced on October 6, 2014, of its English-language newspaper businesses in Canada – more than 170 newspapers and publications, the Canoe portal in English Canada, and 8 printing plants, including the Islington, Ontario plant – for a total cash consideration of $305.5 million, less disposed-of cash in the amount of $1.9 million. The payment consisted of the selling price of $316.0 million less $10.5 million for customary adjustments and adjustments related to real estate properties sold by Sun Media Corporation prior to closing. A $1.3 million working capital adjustment was also paid. The transaction was approved by the Competition Bureau on March 25, 2015. The operating results and cash flows related to those businesses have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On February 13, 2015, Quebecor Media announced the discontinuation of the operations of the English-language news and opinion specialty channel SUN News. The operating results and cash flows related to that business have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On September 2, 2014, Quebecor Media closed the sale of its Nurun Inc. ("Nurun") subsidiary to the French company Publicis Groupe for a cash consideration of $125.0 million, less disposed-of cash in the amount of $18.1 million. An $8.2 million amount was also received in connection with certain adjustments as part of the transaction. The results of operations and cash flows related to that business, as well as the $41.5 million gain on the sale, have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On June 1, 2014, Quebecor Media closed the sale of 74 Québec weeklies to Transcontinental Interactive Inc. ("Transcontinental Interactive"), a subsidiary of Transcontinental Inc. ("Transcontinental"), for a cash consideration of $75.0 million. A $4.0 million working capital adjustment was also received ($3.4 million in 2014 and $0.6 million in 2015). The transaction was approved by the competent regulatory authorities, specifically the Competition Bureau. The results of operations and cash flows related to those businesses, as well as the $7.9 million gain on the sale, have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

Quebecor Media announced that it was abandoning door-to-door distribution of community newspapers and flyers in Québec and discontinuing distribution of the Le Sac Plus doorknob bag as of January 2014. The operating results and cash flows related to those businesses have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

On June 1, 2013, Quebecor Media sold its specialized website *Jobboom* for a cash consideration of $52.1 million, net of disposed-of cash in the amount of $5.4 million, and on November 29, 2013, it sold its specialized website *Réseau Contact* for a cash consideration of $7.1 million, net of disposed-of cash in the amount of $0.4 million. The operating results and cash flows related to those businesses, as well as the $37.6 million gain on the sale of the two websites, have been reclassified as discontinued operations in the consolidated statements of income and cash flows.

In this Management Discussion and Analysis, only continuing operating activities of Quebecor are included in the analysis of segmented operating results.

HIGHLIGHTS SINCE END OF 2014

- Quebecor's sales totalled $3.88 billion in 2015, a $271.8 million (7.5%) increase compared with 2014.

Telecommunications

- In 2015, the Telecommunications segment grew its revenues by $169.7 million (6.0%) to break through the $3.00 billion mark. Adjusted operating income increased by $32.6 million (2.4%), despite a $21.1 million unfavourable variance in one-time items.
- Videotron recorded strong revenue increases for three of its services in 2015: mobile telephony ($116.0 million or 40.3%), Internet access ($64.6 million or 7.5%), and over-the-top video ($11.4 million or 93.4%).
- Net increase of 168,200 revenue-generating units[1] (3.1%), including increases of 135,800 subscriber connections to the mobile telephone service, the largest 12-month increase since 2011, 79,800 customers for the over-the-top video service, and 30,700 customers for the cable Internet access service.
- Videotron's average monthly revenue per user ("ARPU") increased by $10.52 (8.4%) from $125.16 in 2014 to $135.68 in 2015, including a $5.03 (11.7%) increase in revenues per user from the mobile telephony service.
- On January 7, 2016, Videotron announced the acquisition of Fibrenoire inc. ("Fibrenoire"), which provides fibre-optic connectivity services to businesses, for a cash consideration of $125.0 million, including $120.6 million paid at closing, subject to certain adjustments. Combining the capabilities of Videotron Business Solutions and Fibrenoire will help continue meeting the growing demand from business customers for fibre-optic connectivity, and will strengthen Videotron's leadership in business telecommunications services.
- On October 27, 2015, Videotron announced a multi-year $35.0 million expansion of the 4Degrees Colocation Inc. ("4Degrees Colocation") data hosting centre in Québec City, which was acquired on March 11, 2015 for a $35.5 million consideration. A $0.2 million working capital adjustment was received in June 2015. The project will add two new server rooms to the facility. On September 16, 2015, Videotron announced construction of a 4,000-m^2 data centre in Montréal to provide business customers with the colocation solutions they need for hosting and processing the increasing quantities of data. The $40.0 million investment will be spread over several years.
- On October 15, 2015, the Supreme Court of Canada refused a motion from Bell ExpressVu Limited Partnership ("Bell ExpressVu"), a subsidiary of Bell Canada, to appeal a Québec Court of Appeal judgment ordering it to pay Videotron $135.3 million and TVA Group Inc. ("TVA Group") $0.6 million, including interest, as compensation for having failed to implement an appropriate security system in a timely manner to prevent piracy of its satellite television service's signals between 1999 and 2005, harming its competitors and broadcasters. The $139.1 million gain related to this settlement was recognized in the third quarter of 2015.
- On October 2, 2015, Quebecor Content, a division of Quebecor Media, announced a strategic partnership with NBCUniversal International Studios to develop new entertainment and studio-based formats suitable for global audiences.

[1] The sum of subscriptions to the cable television, cable Internet access and over-the-top video services, plus subscriber connections to the cable and mobile telephony services.

On July 15, 2015, Quebecor Content announced a long-term, multiplatform agreement with Sony Pictures Television Canada (“Sony Canada”), one of the world’s largest producers and distributors of entertainment content. The partnership will allow Videotron to offer a vast selection of movies and television series on its over-the-top video service, and will give TVA Group’s television channels exclusive French-language broadcast rights to productions in Sony Canada’s catalogue.

- On August 27, 2015, Videotron launched Unlimited Music, a service that allows some subscribers to its LTE mobile network to stream music without restriction via the most popular platforms, such as Stingray, Rdio, Google Play, Deezer and Spotify, without using their mobile data plan.
- On August 11, 2015, Videotron released the illico 4K Ultra-HD PVR, thereby becoming the first Canadian telecommunications provider to offer customers throughout its service area an ultra-high-definition (“UHD”) set-top box. UHD is a digital video format that supports 3840 x 2160 pixel resolution, four times as many pixels as high definition (“HD”), delivering superior image quality.
- On May 12, 2015, after the closing of the Innovation, Science and Economic Development (”ISED”) Canada auction for 2500 MHz commercial mobile spectrum, Quebecor Media announced that its Videotron subsidiary was the successful bidder for 18 licences covering all of the Province of Québec, as well as the major urban centres in the rest of Canada, including Toronto, Ottawa, Calgary, Edmonton, and Vancouver. The licences make it possible to reach approximately 65% of Canada’s population, more than 21 million people. They were acquired at a total cost of $187.0 million.
- On March 6, 2015, Quebecor Media announced that its Videotron subsidiary was the successful bidder for four 30 MHz licences in ISED Canada’s auction for commercial mobile spectrum in the AWS-3 band. The licences for Eastern Québec, Southern Québec, Northern Québec and Eastern Ontario/Outaouais, covering 100% of Québec’s population plus the Ottawa area, were obtained at a total price of $31.8 million.

Media

- The Media segment’s revenues grew by $112.8 million (13.2%) and its adjusted operating income by $11.8 million (20.2%) in 2015.
- According to the fall 2015 Vividata survey, *Le Journal de Montréal*, *Le Journal de Québec* and the free daily *24 heures Montréal* remain Québec’s news leaders with more than 3.8 million readers per week across all platforms (print, mobile and Web). TVA Publications Inc. (”TVA Publications“) is now Canada’s largest magazine publisher with 10.8 million readers per week across all platforms.
- On August 26, 2015, to support the promotion of its film production and audiovisual services in Québec and on the international scene, and to modernize their brand image, TVA Group brought all its teams’ strengths and creative talents together behind a brand that already enjoys a firmly established reputation in the industry: MELS.
- During its first season as the exclusive French-language broadcaster of the National Hockey League (“NHL”) playoffs, TVA Sports became the most-watched sports channel in Québec. The audience for the 12 playoff games involving the Montréal Canadiens in the spring of 2015 averaged 1,577,000 and peaked at 2.5 million, for a 49.1% market share. Since the addition of NHL games to its schedule, TVA Sports has significantly increased its subscriber base. At the end of 2015, it stood at more than 2.0 million.
- On April 12, 2015, TVA Group reached an agreement with Transcontinental to acquire 14 magazines, including 4 magazines owned and operated in partnership, as well as 3 websites and custom publishing contracts, for a cash consideration of $55.5 million. A $0.8 million preliminary working capital adjustment was paid in the fourth quarter of 2015. The transaction was announced on November 17, 2014 and approved by the Competition Bureau on March 2, 2015.
- Season 3 of *La Voix* achieved record ratings during its run from January 18 to April 12, 2015. The weekly gala attracted an average audience of 2,787,000 (source: Numeris, French Québec, January 18 to March 29, 2015, T2+) and an average market share of 59%. The creation of value-added multiplatform content around this high-quality television program illustrates Quebecor’s successful convergence strategy, which benefits all its media properties.
- In 2015, the Corporation performed impairment tests on its cash generating units (“CGUs”) and concluded that the recoverable amounts of its Newspapers and Broadcasting CGUs were less than their carrying amount. The recoverable amounts of those CGUs were adversely affected by declining newspaper and commercial printing volumes at the Mirabel printing plant and continuing pressure on advertising revenues in the newspaper and television businesses. Accordingly, an $85.0 million non-cash goodwill impairment charge (without any tax consequences) and an $81.9 million non-cash impairment charge on other assets, relating mainly to the assets of the Mirabel printing plant, were recorded in the Newspapers CGU. A $60.1 million impairment charge on TVA Network’s broadcasting licences (including $30.1 million without any tax consequences) was recognized for the Broadcasting CGU.

Sports and Entertainment

- On December 21, 2015, Event Management Gestev Inc. (“Gestev”) and Groupe Boucher Sports announced the acquisition of the assets of Marathon de Québec inc. (”Marathon de Québec”). Under the partnership, Gestev will become the producer of major Québec City-area events for runners and walkers at all levels, starting in 2016.
- On September 29, 2015, Quebecor senior management presented the Corporation’s bid for a professional hockey franchise in Québec City to the NHL Executive Committee meeting in New York City. Quebecor had officially filed an application under the NHL expansion process on July 20, 2015.
- The Videotron Centre officially opened on September 8, 2015. The opening ceremonies, held September 12, 2015 before the season opener of the Remparts de Québec of the QMJHL, were broadcast on TVA Sports. On September 16, 2015, the rock band Metallica performed at the Videotron Centre in the first major international event at the multifunctional venue. On September 28, 2015, the Montréal Canadiens and the Pittsburgh Penguins, two NHL teams, played a preseason game at the Videotron Centre before a sell-out crowd of 18,250.
- On April 2, 2015, Quebecor Media announced an eight-year strategic partnership with AEG Facilities, the world leader in sports and entertainment venue management. The AEG Live division will support the Sports and Entertainment segment in booking events, shows and tours for the Videotron Centre.
- On February 3, 2015, Quebecor Media announced a strategic partnership with Live Nation Entertainment, including an alliance with Live Nation Concerts, the global market leader in concert production, and the Ticketmaster ticketing service, which operates in Québec under the name Réseau Admission. On the same date, Quebecor Media formed a strategic partnership with Levy Restaurants for the operation of food concessions at the Videotron Centre.

Financial transactions

- On September 15, 2015, Videotron issued $375.0 million aggregate principal amount of 5.75% Senior Notes maturing on January 15, 2026, for net proceeds of $370.1 million, net of financing fees of $4.9 million. Videotron used the proceeds to repay a portion of the amounts due under its credit facilities.
- On September 9, 2015, the Corporation’s interest in Quebecor Media increased from 75.36% to 81.07% following the repurchase by Quebecor Media of 7,268,324 Common Shares of its capital stock held by CDP Capital for an aggregate purchase price of $500.0 million, payable in cash. All of the purchased shares were cancelled. As a result, CDP Capital’s interest in Quebecor Media was reduced from 24.64% to 18.93%.
- On July 16, 2015, Videotron prepaid and withdrew the entirety of its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million, and unwound the hedges in an asset position. On the same date, Videotron prepaid and withdrew the entirety of its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million.
- On June 16, 2015, Videotron amended its $575.0 million secured revolving bank credit facility to increase it to $615.0 million and extend its term by two years to July 20, 2020. Videotron also entered into a new $350.0 million unsecured revolving credit facility expiring on July 20, 2020. The terms and conditions of the new unsecured credit facility are similar to those of Videotron’s secured revolving credit facility.
- On April 10, 2015, Videotron completed the redemption of the entirety of its 6.375% Senior Notes maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million, and unwound the hedges in an asset position.
- On March 20, 2015, TVA Group completed a rights offering whereby it received net proceeds totalling $110.0 million from the issuance of 19,434,629 Class B Shares, non-voting, participating, without par value, of TVA Group (“TVA Group Class B Non-Voting Shares”). Under the rights offering, Quebecor Media subscribed for 17,300,259 TVA Group Class B Non-Voting Shares at a total cost of $97.9 million. As a result, its total interest in TVA Group’s equity increased from 51.5% to 68.4%.

TREND INFORMATION

Competition continues to be intense in the cable and alternative multichannel broadcast distribution industry and in the mobile telephony market. The significant subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth, due to the penetration rates currently reached.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its cable and mobile networks, the launch and expansion of new or additional services to support growth in its customer base, and demands for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term in order to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of upgrading its mobile services infrastructure and costs relating to advancements in Internet access, UHD television and TV everywhere/every platform requiring IP technology. In addition, the demand for wireless data services has been growing at unprecedented rates and it is projected that this demand will further increase in the future. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. The Telecommunications segment may have to acquire additional spectrum in the future, as available.

Some of Quebecor's lines of business are cyclical in nature. They are dependent on advertising and, in the Media segment in particular, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

In the Media segment, the broadcasting industry is in a period of significant change. Television audiences are fragmenting as viewing habits shift not only toward specialty channels, but also toward content delivery platforms that allow users greater control over content and timing, such as the Internet, video on demand and mobile devices. Audience fragmentation has prompted many advertisers to review their media placement strategies. The Media segment is taking steps to adjust to the profound changes occurring in the broadcasting industry so as to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want. As well, newspaper circulation, measured by copies sold, has been declining in the entire newspaper industry for several years. Also, the traditional run of press advertising for major multimarket retailers has been declining over the past few years due to consolidation in the retail industry, combined with a shift in marketing strategies toward other media. In order to respond to such competition, the Media segment's operations continue to develop their Internet presence through branded websites, including French-language portals and specialized sites.

The Sports and Entertainment segment has recently made and continues to make significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures will be required in order to expand the Sports and Entertainment segment.

INTEREST IN SUBSIDIARIES

As of December 31, 2015, Quebecor held an 81.07% interest in Quebecor Media. On September 9, 2015, the Corporation's interest in Quebecor Media increased from 75.36% to 81.07% following the partial repurchase by Quebecor Media of CDP Capital's interest in its capital stock. Table 1 shows Quebecor Media's equity interest in its main subsidiaries at that date.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
December 31, 2015

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	68.4
MediaQMI Inc.	100.0	100.0
QMI Spectacles inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past three years, with the exception of the changes described under "Discontinued Activities" above and the following change:

On March 20, 2015, TVA Group completed a rights offering whereby it received net proceeds totalling $110.0 million from the issuance of 19,434,629 TVA Group Class B Non-Voting Shares. Under the rights offering, Quebecor Media subscribed for 17,300,259 TVA Group Class B Non-Voting Shares at a total cost of $97.9 million. As a result, its total interest in TVA Group's equity increased from 51.5% to 68.4%.

NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted operating income, adjusted income from continuing operations, cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary are not calculated in accordance with, or recognized by, IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted Operating Income

In its analysis of operating results, the Corporation defines adjusted operating income, as reconciled to net income (loss) under IFRS, as net income (loss) before depreciation and amortization, financial expenses, gain (loss) on valuation and translation of financial instruments, gain (loss) on litigation, charge for restructuring of operations and other items, impairment of goodwill and other assets, loss on debt refinancing, income taxes, and (loss) gain on discontinued operations. Adjusted operating income as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted operating income in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its segments.

Adjusted operating income is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted operating income may not be the same as similarly titled measures reported by other companies.

Table 2 below provides a reconciliation of adjusted operating income to net income (loss) as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2015 and 2014 presented in Table 2 below is drawn from the unaudited consolidated statements of income.

Table 2
Reconciliation of the adjusted operating income measure used in this report to the net income (loss) measure used in the consolidated financial statements
(in millions of CAN dollars)

	Year ended December 31		Three months ended December 31	
	2015	2014	**2015**	2014
Adjusted operating income (loss):				
Telecommunications	**$ 1,385.8**	$ 1,353.2	**$ 349.0**	$ 345.4
