The Corporation defines adjusted income from continuing operations, as reconciled to net income (loss) attributable to shareholders under IFRS, as net income (loss) attributable to shareholders before gain (loss) on valuation and translation of financial instruments, gain (loss) on litigation, charge for restructuring of operations and other items, impairment of goodwill and other assets, loss on debt refinancing, net of income tax related to adjustments and net income (loss) attributable to non-controlling interests related to adjustments, and before (loss) income from discontinued operations attributable to shareholders. Adjusted income from continuing operations, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operations to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of the financial results. Adjusted income from continuing operations is more representative for the purpose of forecasting income. The Corporation's definition of adjusted income from continuing operations may not be identical to similarly titled measures reported by other companies.

Table 3 provides a reconciliation of adjusted income from continuing operations to the net income (loss) attributable to shareholders measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2015 and 2014 presented in Table 3 below is drawn from the unaudited consolidated statements of income.

Table 3

Reconciliation of the adjusted income from continuing operations measure used in this report to the net income (loss) attributable to shareholders measure used in the consolidated financial statements

(in millions of CAN dollars)

	Year ended December 31		Three months ended December 31	
	2015	2014	**2015**	2014
Adjusted income from continuing operations	**$ 239.9**	$ 209.7	**$ 58.0**	$ 50.6
Gain (loss) on valuation and translation of financial instruments	**6.7**	(94.7)	**(87.9)**	(93.2)
Gain (loss) on litigation, charge for restructuring of operations and other items	**116.9**	(49.6)	**(8.0)**	(44.3)
Impairment of goodwill and other assets	**(230.7)**	(81.0)	**(3.7)**	–
Loss on debt refinancing	**(12.1)**	(18.7)	**–**	–
Income taxes related to adjustments[1]	**2.8**	15.5	**4.0**	1.7
Net income attributable to non-controlling interest related to adjustments	**42.1**	47.8	**3.5**	12.8
Discontinued operations	**(13.8)**	(59.1)	**(0.7)**	12.9
Net income (loss) attributable to shareholders	**$ 151.8**	$ (30.1)	**$ (34.8)**	$ (59.5)

[1] Includes impact of fluctuations in income tax applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash Flows from Segment Operations

Cash flows from segment operations represents adjusted operating income, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital by Quebecor Media, repayment of long-term debt and purchase of non-controlling interest. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free Cash Flows from Continuing Operating Activities of the Quebecor Media Subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

KEY PERFORMANCE INDICATOR

The Corporation uses ARPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly revenues from its cable television, Internet access, cable and mobile telephony and over-the-top video services, per average basic customer. ARPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ARPU may not be the same as identically titled measurements reported by other companies. The Corporation calculates ARPU by dividing its combined revenues from its cable television, Internet access, cable and mobile telephony and over-the-top video services by the average number of basic customers during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2015/2014 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $3.88 billion, a $271.8 million (7.5%) increase.

- Revenues increased in Telecommunications ($169.7 million or 6.0% of segment revenues), Media ($112.8 million or 13.2%), and Sports and Entertainment ($16.1 million).

Adjusted operating income: $1.44 billion, a $30.9 million (2.2%) increase.

- Adjusted operating income increased in Telecommunications ($32.6 million or 2.4% of segment adjusted operating income), despite a $21.1 million unfavourable variance in one-time items, and in Media ($11.8 million or 20.2%).
- Unfavourable variance in Sports and Entertainment ($8.9 million) and at Head Office ($4.6 million). The decrease at Head Office was due primarily to the unfavourable variance in the fair value of stock options.
- The change in the fair value of Quebecor Media stock options resulted in a $4.9 million favourable variance in the stock-based compensation charge in 2015 compared with 2014. The change in the fair value of Quebecor stock options and the impact of various transactions on the options issued under this program resulted in a $9.6 million unfavourable variance in the Corporation's stock-based compensation charge in 2015.

Net income attributable to shareholders: $151.8 million ($1.24 per basic share) in 2015, compared with a net loss attributable to shareholders of $30.1 million ($0.24 per basic share) in the same period of 2014, a favourable variance of $181.9 million ($1.48 per basic share).

- The favourable variance was due primarily to:
  - $166.5 million favourable variance in the gain (loss) on litigation, charge for restructuring of operations and other items, including $34.3 million without any tax consequences;
  - $101.4 million favourable variance in gains and losses on valuation and translation of financial instruments, including $102.1 million without any tax consequences;
  - $61.9 million favourable variance in the loss related to discontinued operations;
  - $30.9 million increase in adjusted operating income;
  - $15.3 million decrease in financial expenses;
  - $6.6 million favourable variance in losses on debt refinancing.

  Partially offset by:
  - $149.7 million increase in non-cash charge for impairment of goodwill and other assets, including $60.3 million without any tax consequences;
  - $32.5 million increase in the depreciation and amortization charge;
  - $22.6 million unfavourable variance in non-controlling interest.

Adjusted income from continuing operations: $239.9 million ($1.95 per basic share) in 2015, compared with $209.7 million ($1.70 per basic share) in 2014, an increase of $30.2 million ($0.25 per basic share).

Depreciation and amortization: $693.6 million in 2015, a $32.5 million increase essentially due to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in the LTE network and expenditures resulting from the promotional strategy focused on equipment leasing, partially offset by the cessation of amortization of spectrum licences in accordance with a change in the estimate of their useful life (*see* "Change in Accounting Estimates" below).

Financial expenses: $335.0 million, a $15.3 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates and by lower average indebtedness.

Gain on valuation and translation of financial instruments: $6.7 million in 2015 compared with a $94.7 million loss in 2014. The $101.4 million favourable variance was essentially due to the favourable variance (without any tax consequences) in the gain (loss) on embedded derivatives related to convertible debentures.

Gain on litigation, charge for restructuring of operations and other items: $116.9 million in 2015, compared with a $49.6 million loss in 2014, a $166.5 million favourable variance.

- On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group and ordered Bell ExpressVu to pay Videotron compensation in the amount of $135.3 million and TVA Group compensation in the amount of $0.6 million, including interest, for having neglected to implement an appropriate security system in a timely manner to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada dismissed Bell ExpressVu's motion to appeal the decision. A $139.1 million gain on litigation was recorded in the statement of income in 2015. In 2014, the Telecommunications segment recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron. Videotron has applied for leave to appeal. A $1.0 million interest expense was recorded in 2015 in connection with this ruling.
- In 2015, the Telecommunications segment recognized an $8.8 million charge for restructuring of operations ($1.8 million in 2014), mainly because of migration from analog to digital cable television service. The segment also recognized a $0.3 million charge for other items in 2015 ($3.4 million in 2014).
- A $9.8 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in 2015 ($6.5 million in 2014). The segment also recognized a $0.7 million charge for other items in 2015 ($2.7 million in 2014).
- The other segments recorded charges for restructuring of operations and other items of $1.6 million in 2015 ($0.9 million in 2014).

Charge for impairment of goodwill and other assets: $230.7 million in 2015, compared with $81.0 million in 2014, a $149.7 million unfavourable variance.

- In 2015, Quebecor Media performed impairment tests on its CGUs and concluded that the recoverable amount of its Newspapers and Broadcasting CGUs was less than their carrying amount. The recoverable amount of those CGUs was adversely affected by declining newspaper and commercial printing volumes, and by continuing pressure on advertising revenues in the newspaper and television businesses. Accordingly, an $85.0 million non-cash goodwill impairment charge (without any tax consequences) and an $81.9 million non-cash impairment charge on other assets, relating mainly to the assets of the Mirabel printing plant, were recorded in the Newspapers CGU in 2015. A $60.1 million impairment charge on TVA Network's broadcasting licences (including $30.1 million without any tax consequences) was recognized for the Broadcasting CGU in 2015. A $3.7 million impairment charge on intangible assets was also recognized in 2015 in other segments.
- In 2014, Quebecor Media performed impairment tests on its Newspapers and Broadcasting CGUs. Accordingly, a $30.0 million non-cash impairment charge (without any tax consequences) was recorded in the Newspapers CGU, as well as a $41.7 million non-cash impairment charge on broadcasting licences (including $20.9 million without any tax consequences), and a $9.3 million non-cash goodwill impairment charge (including $3.9 million without any tax consequences) in the Broadcasting CGU.

Loss on debt refinancing: $12.1 million in 2015, compared with $18.7 million in 2014, a $6.6 million favourable variance.

- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million, at a redemption price of 101.521% of their principal amount, and unwound the related hedges in an asset position. A $0.2 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption, including a $2.1 million net gain previously recorded in "Other comprehensive income."
- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million, at a redemption price of 103.563% of their principal amount. A $13.6 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption.
- In accordance with a notice issued on March 11, 2015, Videotron redeemed, on April 10, 2015, the entirety of its 6.375% Senior Notes maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million, at a redemption price of 100% of their principal amount, and unwound the hedges in an asset position. A $1.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2015 in connection with this redemption, including a $1.8 million gain previously recorded in "Other comprehensive income."

- In accordance with a notice issued on March 26, 2014, Videotron redeemed, on April 24, 2014, US$260.0 million aggregate principal amount of its outstanding 9.125% Senior Notes issued on March 5, 2009 and maturing on April 15, 2018, at a redemption price of 103.042% of their principal amount. A $21.4 million net loss was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $1.7 million loss previously recorded in "Other comprehensive income."
- In accordance with a notice issued on March 26, 2014, Quebecor Media redeemed, on April 25, 2014, the entirety of its outstanding 7.75% Senior Notes issued on October 5, 2007 and maturing on March 15, 2016, in the aggregate principal amount of US$380.0 million, at a redemption price of 100.00% of their principal amount, and settled the related hedges. A $2.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $12.5 million gain previously recorded in "Other comprehensive income."

Income tax expense: $93.1 million in 2015 (effective tax rate of 23.4%), compared with $97.2 million (effective tax rate of 29.0%) in 2014, a $4.1 million favourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The impact of the increase in taxable income was outweighed by the impact of the decrease in the effective tax rate.
- The favourable variance in the effective tax rate was mainly due to the impact of a decrease in deferred income tax liabilities in light of developments in tax audits, jurisprudence and tax legislation.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,806,000 homes and businesses. It offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones, Internet access service, analog cable television and digital cable television ("illico Digital TV") services, including video on demand, pay-per-view and pay TV, as well as cable telephony and over-the-top video. Videotron also includes Videotron Business Solutions, a full-service business telecommunications provider that offers telephony, high-speed data transmission, Internet access, hosting, and cable television services.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary ("Le SuperClub Vidéotron") and its franchise network.

<u>2015 operating results</u>

Revenues: $3.00 billion in 2015, a $169.7 million (6.0%) increase.

- Revenues from the mobile telephony service increased $116.0 million (40.3%) to $403.7 million, essentially due to the increase in the number of subscriber connections and higher net revenue per connection.
- Revenues from Internet access services increased $64.6 million (7.5%) to $920.7 million. The favourable variance was mainly due to higher per-subscriber revenues, increased usage, higher revenues from Internet access resellers, and customer base growth.
- Combined revenues from all cable television services decreased $21.0 million (-2.0%) to $1.05 billion, due primarily to the impact of the net decrease in the customer base, higher discounts and the decrease in pay TV and video-on-demand orders, partially offset by higher per-subscriber revenues and increased revenues from the leasing of digital set-top boxes.
- Revenues from the cable telephone service decreased $17.1 million (-3.6%) to $458.0 million, mainly because of higher discounts, lower long-distance revenues and the impact of the net decrease in subscribers.
- Revenues from the over-the-top video service increased $11.4 million (93.4%) to $23.6 million, mainly because of subscriber growth.
- Revenues of Videotron Business Solutions increased $3.5 million (5.3%) to $69.1 million.
- Revenues from customer equipment sales increased $12.0 million (26.3%) to $57.6 million, mainly because of the growth in the number of subscriber connections to the mobile service and increased sales of more powerful equipment.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $1.5 million (-14.2%) to $9.1 million, mainly because of the impact of store closings and lower franchise fee revenues.
- Other revenues increased $1.8 million (18.7%) to $11.4 million.

ARPU: $135.68 in 2015 compared with $125.16 in 2014, a $10.52 (8.4%) increase, including a $5.03 (11.7%) increase in revenues per user from the mobile telephony service.

Customer statistics

Revenue-generating units – As of December 31, 2015, the total number of revenue-generating units stood at 5,647,500, an increase of 168,200 (3.1%) in 2015, compared with an increase of 237,200 in 2014 (Table 4). Revenue-generating units are the sum of subscriptions to the cable television, cable Internet access and over-the-top video services, plus subscriber connections to the cable and mobile telephony services.

Mobile telephony – As of December 31, 2015, the number of subscriber connections to the mobile telephony service stood at 768,600, an increase of 135,800 (21.5%) in 2015, compared with an increase of 128,500 in 2014 (Table 4).

Cable Internet access – As of December 31, 2015, the number of subscribers to cable Internet access services stood at 1,568,200, an increase of 30,700 (2.0%) in 2015, compared with an increase of 31,500 in 2014 (Table 4). At December 31, 2015, Videotron's cable Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,806,000 homes and businesses passed by Videotron's network as of the end of December 2015, up from 2,777,300 at the end of 2014) of 55.9% compared with 55.4% a year earlier.

Cable television – The combined customer base for all Videotron cable television services decreased by 45,400 (-2.5%) in 2015, compared with a decrease of 42,800 in 2014 (Table 4). At the end of 2015, Videotron had 1,736,900 subscribers to its cable television services. The household and business penetration rate was 61.9% versus 64.2% a year earlier.

- As of December 31, 2015, the number of subscribers to the illico Digital TV service stood at 1,570,600, an increase of 17,000 (1.1%) in 2015, compared with an increase of 26,200 in 2014. As of December 31, 2015, illico Digital TV had a household and business penetration rate of 56.0% versus 55.9% a year earlier.
- The customer base for analog cable television services decreased by 62,400 (-27.3%) in 2015, compared with a decrease of 69,000 in 2014, partly as a result of customer migration from analog to digital TV.

Cable telephony – As of December 31, 2015, the number of subscribers to the cable telephony service stood at 1,316,300, a decrease of 32,700 (-2.4%) in 2015, compared with an increase of 500 in 2014 (Table 4). At December 31, 2015, the cable telephony service had a household and business penetration rate of 46.9% versus 48.6% a year earlier.

Over-the-top video – As of December 31, 2015, the number of subscribers to the over-the-top video service stood at 257,500, an increase of 79,800 (44.9%) in 2015, compared with an increase of 119,500 in 2014 (Table 4).

Table 4
Telecommunications segment year-end customer numbers (2011-2015)
(in thousands of customers)

	2015	2014	2013	2012	2011
Mobile telephony[1]	**768.6**	632.8	504.3	403.8	290.7
Cable Internet	**1,568.2**	1,537.5	1,506.0	1,444.0	1,359.6
Cable television:					
Analog[2]	**166.3**	228.7	297.7	374.1	463.9
Digital[2]	**1,570.6**	1,553.6	1,527.4	1,480.9	1,397.6

Over-the-top video[2]	**257.5**	177.7	58.2	–	–
Total (revenue-generating units)	**5,647.5**	5,479.3	5,242.1	5,019.1	4,757.7

1 In thousands of connections.
2 Customer statistics have been restated for the years 2011-2014 to reflect certain reclassifications in cable television and the addition of the over-the-top video service.

Adjusted operating income: $1.39 billion, a $32.6 million (2.4%) increase caused primarily by:

- impact of revenue increase.

Partially offset by:

- increases in some operating expenses, including professional fees, engineering, customer service, advertising, and administration;
- impact of the increased loss incurred on mobile device sales;
- higher royalty costs at the cable television service, partly reflecting the unfavourable impact of a one-time retroactive adjustment of $7.2 million recorded in 2014;
- $13.9 million unfavourable impact of recognition of other one-time items, including $10.6 million in provisions for legal disputes;
- $3.8 million increase in stock-based compensation charge.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 53.9% in 2015 compared with 52.3% in 2014. The increase was due primarily to the increase in some operating expenses, the impact of the increased loss incurred on mobile device sales, higher royalty costs at the cable television service, the impact of recognition of other one-time items, and an increase in the stock-based compensation charge.

Cash flows from operations

Cash flows from segment operations: $666.5 million in 2015 compared with $665.3 million in 2014 (Table 5).

- The $32.6 million increase in adjusted operating income was offset by a $30.3 million increase in additions to property, plant and equipment and to intangible assets, caused primarily by the impact of the promotional strategy focused on equipment leasing, spending on the construction and enlargement of data centres, and spending on the LTE network.

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network and the specialty channels LCN, TVA Sports, addik^{TV}, Argent, Prise 2, Yoopa, CASA and MOI&cie. TVA Group also holds interests in two other TVA Network affiliates and the Évasion specialty channel. As well, TVA Group is engaged in commercial production, dubbing, custom publishing and premedia services through TVA Accès inc., and in the distribution of audiovisual products through its TVA Films division.

Through its subsidiaries TVA Publications Inc. and Les Publications Charron & Cie inc., TVA Group publishes more than 50 French- and English-language magazines in various categories, including show business, television, fashion, sports, and decorating. It is the largest magazine publisher in Canada.

TVA Group also operates a number of websites. Its leading sites by traffic are *tvanouvelles.ca*, *tvasports.ca*, *canadianliving.com*, and *recettes.qc.ca*.

TVA Group owns substantially all the assets of A.R. Global Vision Ltd. – now operated by Mels Studios and Postproduction G.P. (“MELS”) – which provides soundstage and equipment leasing, post-production and visual effects services to the film and television industries.

The Media segment of Quebecor Media also operates two paid-circulation daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, and a free daily, *24 heures Montréal*. According to corporate figures, the aggregate circulation of the Media segment’s paid and free newspapers as of December 31, 2015 was approximately 2.6 million copies per week in print and 0.8 million copies in electronic formats.

The paid-circulation newspapers disseminate information in traditional print form, as well as through two urban daily news portals, j*ournaldemontreal.com* and *journaldequebec.com*. The Media segment also operates *canoe.ca,* a French-language portal that provides news and services for the general public, and the e-commerce sites *micasa.ca* (real estate) and *autonet.ca* (automobiles).

The Media segment’s portals log 6.5 million unique visitors per month in Canada (source: ComScore – December 2015).

The Media segment is engaged in the printing of newspapers, the distribution of newspapers and magazines, and in out-of-home advertising. It also operates Studios Goji inc., a talent collective that serves creators of online video content by providing personalized assistance in the development of new multiplatform business opportunities and by supporting creation. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties and to outside customers, as well as Quebecor Media Sales, which offers customers integrated, diversified, complete advertising services.

The Media segment owns CEC Publishing Inc., a publisher of school books, and Sogides Inc., which is engaged in general literature publishing through its 18 publishing houses, and in the physical and digital distribution of books through Messageries A.D.P. inc., the exclusive distributor for approximately 200 Québec and European French-language publishers.

Finally, the Media segment is engaged in the distribution of CDs and videos (Distribution Select); distribution of music to Internet download services (Select Digital); music recording and video production (Musicor); and in recording live concerts.

2015 operating results

Revenues: $964.5 million in 2015, a $112.8 million (13.2%) increase.

- Broadcasting revenues increased $48.3 million (12.7%), mainly due to:
  - o increased advertising and subscription revenues at the specialty services, mainly TVA Sports, due primarily to the addition of NHL hockey broadcasts.

  Partially offset by:
  - o lower advertising revenues at TVA Network.
- The acquisition of substantially all of the assets of MELS in December 2014 had a favourable impact, generating film production and audiovisual revenues in the amount of $60.1 million in 2015.
- Newspaper publishing revenues decreased by $37.1 million (-14.5%).
  - o Advertising revenues decreased 14.4%; circulation revenues decreased 2.8%; digital revenues increased 7.3%; combined revenues from commercial printing and other sources decreased 26.2%.
- Magazine publishing revenues increased by $43.9 million (70.1%) in 2015, mainly because of the impact of the acquisition of magazines from Transcontinental on April 12, 2015, partially offset by the decrease in same-store revenues.
- Quebecor Media Out of Home's revenues increased by $2.5 million (26.0%), mainly because of new digital advertising revenues.
- Book distribution and publishing revenues were flat.
- Music distribution and production revenues increased by $3.5 million (6.5%) mainly because of higher CD sales, due primarily to the release of singer-songwriter Adele's hit album in 2015.

Adjusted operating income: $70.2 million in 2015, an $11.8 million (20.2%) increase.

- Adjusted income from broadcasting operations increased $5.9 million (29.9%) to $25.6 million in 2015 due to:
  - o impact of higher subscription and advertising revenues at TVA Sports;
  - o lower operating expenses at TVA Network, including content costs and production expenses. The decrease in content costs also reflects the impact of adjustments made in 2014 to the cost of certain prior-year broadcasting rights related to indemnification clauses.

  Partially offset by:
  - o spending on content at TVA Sports;
  - o impact of decrease in TVA Network's advertising revenues.
- The acquisition of substantially all of the assets of MELS, which generated adjusted operating income in the amount of $14.1 million in 2015, had a favourable impact.
- Adjusted operating income from newspaper publishing decreased $9.7 million (-39.3%) due to:
  - o impact of revenue decrease.

  Partially offset by:
  - o favourable impact on adjusted operating income of reduced operating expenses, including a $6.3 million favourable impact related to restructuring initiatives.
- Adjusted operating income from magazine publishing operations decreased by $2.0 million (-20.6%), mainly as a result of:
  - o impact of decrease in same-store revenues.

  Partially offset by:
  - o impact of acquisition of magazines from Transcontinental;

  - o decreases in some operating expenses, including labour costs.

- The adjusted operating loss of Quebecor Media Out of Home decreased by $1.2 million as a result of the impact of the increase in revenues.
- Adjusted operating income from book distribution and publishing decreased by $0.3 million (-3.4%).
- Adjusted operating income from music distribution and production increased by $2.4 million, mainly because of the impact of higher revenues and lower operating expenses.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 92.7% in 2015 compared with 93.1% in 2014. The favourable impact of the acquisition of substantially all of the assets of MELS and the impact of decreased operating expenses at TVA Network and newspaper publishing were largely offset by spending on content at TVA Sports and the impact of the decrease in newspaper revenues on a same-store basis (as the fixed component of operating costs does not fluctuate in proportion to the decrease in revenues).

Cash flows from operations

Cash flows from segment operations: $24.9 million in 2015 compared with $16.9 million in 2014 (Table 6). The $8.0 million favourable variance was due primarily to the $11.8 million increase in adjusted operating income, partially offset by the $3.9 million increase in additions to property, plant and equipment.

Table 6: Media

(in millions of CAN dollars)

		2015		2014
Adjusted operating income	**$**	**70.2**	$	58.4
Additions to property, plant and equipment		**(36.0)**		(32.1)
Additions to intangible assets		**(9.3)**		(9.3)
Proceeds from disposal of assets		**–**		(0.1)
Cash flows from segment operations	**$**	**24.9**	$	16.9

Sports and Entertainment

The Sports and Entertainment segment includes the operations of the Videotron Centre following ratification in 2011 of an agreement between Quebecor Media and Québec City for usage and naming rights to the arena through 2040. The segment's activities include production and coproduction of shows presented at the Videotron Centre and rental of the arena.

The Sports and Entertainment segment also includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec, the operations of Québec City sports and cultural events manager Gestev, concert production by Musicor Spectacles, and production of concert videos and television commercials by Les Productions Select TV inc.

On July 20, 2015, Quebecor officially filed an application for a professional hockey franchise in Québec City under the NHL expansion process.

2015 operating results

Revenues: $23.2 million in 2015 compared with $7.1 million in 2014. The $16.1 million increase was mainly due to the favourable impact on revenues of the acquisition of the Remparts de Québec of the QMJHL in November 2014 and the addition of revenues from events at the Videotron Centre.

Adjusted operating loss: $11.7 million in 2015 compared with $2.8 million in 2014. The $8.9 million unfavourable variance was due primarily to the startup of Videotron Centre management operations.

Cash flows from operations

Cash flows from segment operations: Negative $58.3 million in 2015 compared with negative $8.2 million in 2014 (Table 7).

- The $50.1 million unfavourable variance was due primarily to the payment of $33.0 million to Québec City for 25-year naming rights to the new Videotron Centre, plus spending on leasehold improvements and startup of the arena, combined with an $8.9 million increase in the adjusted operating loss.

Table 7: Sports and Entertainment

2015/2014 FOURTH QUARTER COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $1.02 billion, a $67.1 million (7.0%) increase.

- Revenues increased in all segments: Telecommunications ($43.9 million or 6.0% of segment revenues), Media ($21.6 million or 8.8%), and Sports and Entertainment ($8.2 million).

Adjusted operating income: $360.8 million, a $7.7 million (2.2%) increase.

- Adjusted operating income increased in Media ($8.5 million or 61.6% of segment adjusted operating income) and in Telecommunications ($3.6 million or 1.0%), despite an $11.9 million unfavourable variance in one-time items in the latter segment.
- There were unfavourable variances in adjusted operating income in Sports and Entertainment ($2.1 million) and at Head Office ($2.3 million).
- The change in the fair value of Quebecor Media stock options resulted in a $2.5 million favourable variance in the stock-based compensation charge in the fourth quarter of 2015 compared with the same period of 2014. The change in the fair value of Quebecor stock options resulted in a $2.9 million unfavourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2015.

Net loss attributable to shareholders: $34.8 million ($0.28 per basic share) in the fourth quarter of 2015, compared with $59.5 million ($0.48 per basic share) in the same period of 2014, a favourable variance of $24.7 million ($0.20 per basic share).

- The favourable variance was due primarily to:
  - $36.3 million favourable variance in the loss on litigation, charge for restructuring of operations and other items, including $34.3 million without any tax consequences;
  - $7.7 million increase in adjusted operating income;
  - $5.3 million favourable variance in the loss on valuation and translation of financial instruments.

  Partially offset by:
  - $16.7 million unfavourable variance in losses and gains on discontinued operations;
  - $3.7 million increase in non-cash charge for impairment of goodwill and other assets;
  - $3.3 million increase in the depreciation and amortization charge;
  - $3.1 million unfavourable variance in non-controlling interest.

Adjusted income from continuing operations: $58.0 million ($0.47 per basic share) in the fourth quarter of 2015, compared with $50.6 million ($0.41 per basic share) in the same period of 2014, an increase of $7.4 million ($0.06 per basic share).

Depreciation and amortization charge: $176.5 million, a $3.3 million increase due essentially to the same factors as those noted above in the 2015/2014 financial year comparison.

Financial expenses: $85.7 million, a $1.4 million increase caused mainly by lower interest revenues on cash and cash equivalent balances, partially offset by the impact of lower interest rates on long-term debt due to debt refinancing at lower interest rates.

Loss on valuation and translation of financial instruments: $87.9 million in the fourth quarter of 2015 compared with $93.2 million in the fourth quarter of 2014. The $5.3 million favourable variance was due primarily to the decrease (without any tax consequences) in the loss on embedded derivatives related to convertible debentures.

Loss on litigation, charge for restructuring of operations and other items: $8.0 million in the fourth quarter of 2015, compared with $44.3 million in the same period of 2014, a $36.3 million favourable variance.

- In the fourth quarter of 2015, the Telecommunications segment recognized a $3.0 million charge for restructuring of operations ($0.8 million in the same period of 2014), mainly because of migration from analog to digital cable television service. The segment also recorded a $0.5 million reversal of the charge for other items in the fourth quarter of 2015 ($3.4 million expense in the fourth quarter of 2014).

- In the fourth quarter of 2014, the Telecommunications segment recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron. Videotron has applied for leave to appeal. A $1.0 million interest expense was recorded in 2015 in connection with this ruling.
- A $4.2 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in the fourth quarter of 2015 ($3.1 million in the same period of 2014). The segment also recorded a $2.8 million charge for other items in the fourth quarter of 2014.
- The other segments recorded charges for restructuring and other items in the amount of $0.3 million in the fourth quarter of 2015 ($0.1 million gain in the same period of 2014).

Charge for impairment of goodwill and other assets: $3.7 million in the fourth quarter of 2015, reflecting impairment of intangible assets in some segments.

Income tax expense: $20.6 million in the fourth quarter of 2015 (effective tax rate of 25.6%) compared with $24.2 million in the same period of 2014 (effective tax rate of 30.1%), a $3.6 million favourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The favourable variance in the income tax expense was due to the lower effective tax rate.
- The favourable variance in the effective tax rate was mainly due to the impact of a decrease in deferred income tax liabilities in light of developments in tax audits, jurisprudence and tax legislation.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $777.1 million, a $43.9 million (6.0%) increase essentially due to the same factors as those noted above in the 2015/2014 financial year comparison.

- Revenues from mobile telephony service increased $28.0 million (33.5%) to $111.5 million.
- Revenues from Internet access services increased $22.0 million (10.1%) to $239.5 million.
- Combined revenues from all cable television services decreased $4.7 million (-1.8%) to $263.5 million.
- Revenues from cable telephony service decreased $9.1 million (-7.5%) to $111.5 million.
- Revenues from the over-the-top video service increased $2.2 million (45.8%) to $7.0 million.
- Revenues of Videotron Business Solutions increased $1.3 million (7.7%) to $18.1 million.
- Revenues from customer equipment sales increased $4.0 million (24.2%) to $20.5 million.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $0.6 million (-20.0%) to $2.4 million.
- Other revenues increased $0.6 million (24.0%) to $3.1 million.

ARPU: $140.19 in fourth quarter 2015, compared with $129.36 in the same period of 2014, a $10.83 (8.4%) increase.

Customer statistics

Revenue-generating units – 41,600-unit increase (0.7%) in the fourth quarter of 2015, compared with an increase of 59,100 in the same period of 2014.

Mobile telephony – 26,100 (3.5%) increase in subscriber connections in the fourth quarter of 2015, compared with an increase of 42,400 in the same period of 2014.

Cable Internet access – 8,700-customer increase (0.6%) in the fourth quarter of 2015, compared with an increase of 3,700 in the same period of 2014.

Cable television – 9,000 (-0.5%) decrease in the combined customer base for all Videotron's cable television services in the fourth quarter of 2015, compared with a decrease of 14,000 in the same period of 2014.

- illico Digital TV: 6,000 subscriber increase (0.4%) in the fourth quarter of 2015, compared with an increase of 8,700 in the same period of 2014.
- Analog cable TV: 15,000-subscriber decrease (-8.3%) in the fourth quarter of 2015, compared with a decrease of 22,700 in the same period of 2014.

Cable telephony – 13,200-customer decrease (-1.0%) in the fourth quarter of 2015, compared with a decrease of 7,000 in the same period of 2014.

Over-the-top video – 29,000-subscriber increase (12.7%) in the fourth quarter of 2015, compared with an increase of 34,000 in the same period of 2014.

Adjusted operating income: $349.0 million, a $3.6 million (1.0%) increase due primarily to:

- impact of revenue increase.

Partially offset by:

- higher royalty costs at the cable television service, partly reflecting the unfavourable impact of a one-time retroactive adjustment of $7.2 million recorded in the same period of 2014;
- $4.6 million unfavourable impact of recognition of other one-time items;
- increases in some operating expenses, primarily professional fees, advertising, marketing, and engineering;
- higher costs for illico set-top boxes and impact of the increased loss incurred on mobile device sales.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 55.1% in the fourth quarter of 2015, compared with 52.9% in the same period of 2014. The increase was due primarily to higher royalty costs at the cable television service, the impact of recognition of other one-time items, increases in some operating expenses, the impact of higher costs for illico set-top boxes, and the increased loss incurred on mobile device sales.

Media

Revenues: $267.4 million in the fourth quarter of 2015, a $21.6 million (8.8%) increase.

- Broadcasting revenues increased $6.8 million (5.9%), mainly due to:
  - increased subscription and advertising revenues at the specialty services, including TVA Sports and LCN;
  - higher revenues from commercial production and TVA Films.

  Partially offset by:
  - decrease in TVA Network's advertising revenues.
- The acquisition of substantially all of the assets of MELS generated revenues in the amount of $11.8 million.
- Newspaper publishing revenues decreased by $15.0 million (-22.5%).
  - Advertising revenues decreased 16.0%; circulation revenues were flat; digital revenues increased 11.8%; combined revenues from commercial printing and other sources decreased 52.6%.
- Magazine publishing revenues more than doubled to $32.5 million in the fourth quarter of 2015, mainly because of the impact of the acquisition of magazines from Transcontinental.
- Quebecor Media Out of Home's revenues increased $0.8 million (27.6%), mainly because of new digital advertising revenues.
- Book distribution and publishing revenues decreased by $2.5 million (-8.3%), primarily as a result of decreased bookstore and mass market distribution volumes.
- Music distribution and production revenues increased by $4.0 million (18.7%) mainly because of higher CD sales, due primarily to the release of singer-songwriter Adele's hit album.

Adjusted operating income: $22.3 million in the fourth quarter of 2015, an $8.5 million (61.6%) increase.

- Adjusted income from broadcasting operations increased by $8.9 million to $14.0 million in the fourth quarter of 2015 due primarily to:
  - impact of increased subscription and advertising revenues at the specialty services, including TVA Sports and LCN;
  - lower operating expenses at TVA Sports and TVA Network.
- Favourable impact of the acquisition of substantially all of the assets of MELS, which generated adjusted operating income in the amount of $1.0 million in the fourth quarter of 2015.
- Adjusted operating income from newspaper publishing decreased $2.9 million (-56.9%) due to:
  - impact of revenue decrease.

  Partially offset by:
  - favourable impact on adjusted operating income of reduced operating expenses, including a $1.2 million favourable impact related to restructuring initiatives.
- Adjusted operating income from magazine publishing increased by $0.1 million (5.9%).
- The adjusted operating loss of Quebecor Media Out of Home decreased by $0.1 million.
- Adjusted operating income from book distribution and publishing decreased by $0.9 million (-60.0%) because of the impact of the decrease in revenues and lower margins.
- Adjusted operating income from music distribution and production increased by $0.8 million (50.0%), mainly because of the impact of higher revenues.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 91.7% in the fourth quarter of 2015 compared with 94.4% in the same period of 2014. The decrease was due primarily to the favourable impact of the acquisition of substantially all of the assets of MELS, higher subscription revenues at TVA Sports and LCN, and the impact of decreased operating expenses at TVA Sports and TVA Network.

Sports and Entertainment

Revenues: $10.1 million, an $8.2 million increase from the fourth quarter of 2014, mainly due to the favourable impact on revenues of the acquisition of the Remparts de Québec of the QMJHL in November 2014, and the addition of revenues from events at the Videotron Centre.

Adjusted operating loss: $3.1 million in the fourth quarter of 2015 compared with $1.0 million in the same period of 2014. The $2.1 million unfavourable variance was due primarily to the startup of Videotron Centre management operations, partially offset by the impact of the revenue increase.

2014/2013 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $3.61 billion, a $68.9 million (1.9%) increase.

- Revenues increased in Telecommunications ($111.3 million or 4.1% of segment revenues) and Sports and Entertainment ($2.1 million or 42.0%).
- Revenues decreased in Media ($34.5 million or -3.9%).

Adjusted operating income: $1.41 billion, a $29.4 million (2.1%) increase.

- Adjusted operating income increased in Telecommunications ($60.4 million or 4.7% of segment adjusted operating income) and Head Office ($8.1 million). The increase at Head Office was mainly due to the favourable variance in the fair value of stock options.
- Adjusted operating income decreased in Media ($36.8 million or -38.7%) and Sports and Entertainment ($2.3 million).
- The change in the fair value of Quebecor Media stock options resulted in a $2.4 million unfavourable variance in the stock-based compensation charge in 2014 compared with 2013. The change in the fair value of Quebecor stock options and the impact of various transactions on the options issued under this program resulted in a $20.8 million favourable variance in the Corporation's stock-based compensation charge in 2014.

Net loss attributable to shareholders: $30.1 million ($0.24 per basic share) in 2014, compared with $288.6 million ($2.33 per basic share) in 2013, a favourable variance of $258.5 million ($2.09 per basic share).

- The favourable variance was due primarily to:
  - $289.7 million favourable variance in gains and losses on valuation and translation of financial instruments, including a $48.4 million favourable variance in convertible debentures, without any tax consequences;
  - $135.0 million favourable variance in losses from discontinued operations;
  - $37.3 million decrease in financial expenses;
  - $29.4 million increase in adjusted operating income.

  Partially offset by:
  - $54.6 million unfavourable variance in non-cash charge for impairment of goodwill and other assets (including $28.4 million without any tax consequences), minus related non-controlling interest;
  - $39.1 million unfavourable variance in the loss on litigation, charge for restructuring of operations and other items (including $34.3 million without any tax consequences);
  - $37.2 million increase in the depreciation and amortization charge.

Adjusted income from continuing operations: $209.7 million ($1.70 per basic share) in 2014, compared with $185.3 million ($1.49 per basic share) in 2013, an increase of $24.4 million ($0.21 per basic share).

Depreciation and amortization charge: $661.1 million in 2014, a $37.2 million increase essentially due to the impact of capital expenditures in the Telecommunications segment, including amortization of expenditures related to the promotional strategy focused on equipment leasing, to investments in the LTE network, and to modernization and expansion of the wired and wireless networks.

Financial expenses: $350.3 million, a $37.3 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates and by lower indebtedness.

Loss on valuation and translation of financial instruments: $94.7 million in 2014 compared with $384.4 million in 2013. The $289.7 million favourable variance was mainly due to the variance in the fair value of early settlement options caused by fluctuations in valuation assumptions, including interest rates and credit premiums implicit in the adjusted prices of the underlying instruments, to the $48.4 million decrease (without any tax consequences) in the loss on embedded derivatives related to convertible debentures, and to losses on reversal of embedded derivatives recognized in 2013 in connection with debt redemption.

Loss on litigation, charge for restructuring of operations and other items: $49.6 million in 2014, compared with a $10.5 million loss in 2013, a $39.1 million unfavourable variance.

- In 2014, the Telecommunications segment recorded a $1.8 million restructuring charge ($0.7 million in 2013) and a $3.4 million asset impairment charge. The segment also recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron.
- In 2014, a $6.5 million net charge for restructuring of operations was recorded in the Media segment with respect to staff-reduction programs ($6.7 million in 2013). In 2014, the Media segment also recognized a $2.7 million special charge, primarily attributable to business acquisitions ($2.0 million in 2013).
- The other segments recorded a net charge for restructuring of operations and charges for other items of $0.9 million in 2014 ($1.1 million in 2013).

Charge for impairment of goodwill and other assets: $81.0 million in 2014, compared with $26.4 million in 2013, a $54.6 million unfavourable variance.

- In 2014, Quebecor Media performed impairment tests on its Newspapers and Broadcasting CGUs. Accordingly, a $30.0 million non-cash goodwill impairment charge (without any tax consequences) was recorded in the Newspapers CGU, as well as a $41.7 million non-cash impairment charge on broadcasting licences (including $20.9 million without any tax consequences), and a $9.3 million non-cash goodwill impairment charge (including $3.9 million without any tax consequences) in the Broadcasting CGU.
- In the third quarter of 2013, Quebecor Media performed impairment tests on the Newspapers and Books CGUs. Accordingly, the Media segment recognized a $14.5 million non-cash goodwill impairment charge (without any tax consequences) in its Newspapers CGU, and an $11.9 million non-cash goodwill impairment charge (without any tax consequences) in its Book CGU.

Loss on debt refinancing: $18.7 million in 2014 compared with $18.9 million in 2013.

- In accordance with a notice issued on March 26, 2014, Videotron redeemed, on April 24, 2014, US$260.0 million aggregate principal amount of its outstanding 9.125% Senior Notes issued on March 5, 2009 and maturing on April 15, 2018, at a redemption price of 103.042% of their principal amount. A $21.4 million net loss was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $1.7 million loss previously recorded in “Other comprehensive income.”
- In accordance with a notice issued on March 26, 2014, Quebecor Media redeemed, on April 25, 2014, the entirety of its outstanding 7.75% Senior Notes issued on October 5, 2007 and maturing on March 15, 2016, in the aggregate principal amount of US$380.0 million, at a redemption price of 100.00% of their principal amount, and settled the related hedges. A $2.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $12.5 million gain previously recorded in “Other comprehensive income.”
- On June 3, 2013, Videotron issued a notice for the redemption, on July 2, 2013, of US$380.0 million aggregate principal amount of its issued and outstanding 9.125% Senior Notes due in April 2018 at a redemption price of 104.563% of their principal amount, and settled the related hedges. As a result, a total $18.9 million loss was recorded in the consolidated statement of income in the second quarter of 2013, including a $6.5 million gain previously recorded in “Other comprehensive income.”

Income tax expense: $97.2 million (effective tax rate of 29.0%) in 2014, compared with $32.8 million (effective tax rate of 34.5%) in 2013, a $64.4 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to the impact of the increase in taxable income.
- The variance in the effective tax rates was due to the impact of the tax rate mix on the various components of the gain or loss on valuation and translation of financial instruments, and to losses on debt refinancing.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussions on trends under “Trend Information” above and on the Corporation’s financial risks under “Financial Instruments and Financial Risk” below.

Operating activities

Cash flows provided by operating activities: $1.07 billion in 2015 compared with $960.7 million in 2014.

- The $111.5 million increase was due primarily to:
  - $166.5 million favourable variance in the cash portion of the gain on litigation, charge for restructuring of operations and other items;
  - $58.5 million decrease in current income taxes;
  - $32.6 million and $11.8 million increases in adjusted operating income in the Telecommunications and Media segments respectively;
  - $13.7 million decrease in the cash portion of financial expenses.

  Partially offset by:
  - $161.3 million unfavourable change in non-cash balances related to operations, due primarily to the increase in inventory and accounts receivable in the Telecommunications segment, payment of outstanding income tax balances and a decrease in current income taxes.

Receipt of a gain on litigation, increased profitability in the Telecommunications and Media segments, and debt refinancing at lower interest rates had a favourable impact on cash flows provided by operating activities, while the payment of outstanding income tax balances and increased inventory and accounts receivable balances in the Telecommunications segment in 2015 had a negative impact.

Working capital: Negative $328.1 million at December 31, 2015, compared with positive $90.2 million at December 31, 2014. The $418.3 million unfavourable variance was mainly due to payment for the spectrum acquired at a total cost of $218.8 million and debt repayment out of working capital.

Investing activities

Additions to property, plant and equipment: $678.6 million in 2015 compared with $644.0 million in 2014. The $34.6 million increase was mainly due to the impact of the promotional strategy focused on equipment leasing, spending on the construction and expansion of data centres, and spending on the LTE network in the Telecommunications segment.

Additions to intangible assets: $360.6 million in 2015 compared with $317.3 million in 2014. The $43.3 million increase mainly reflects payment of $33.0 million to Québec City for 25-year naming rights to the new Videotron Centre in the Sports and Entertainment segment. Additions to intangible assets in 2015 included payments totalling $218.8 million for the acquisition of spectrum, compared with $217.4 million in 2014.

Proceeds from disposal of assets: $4.6 million in 2015 compared with $5.4 million in 2014.

Business acquisitions: $94.5 million in 2015 compared with $132.3 million in 2014, a $37.8 million decrease.

- In 2015, business acquisitions consisted primarily in the acquisition of 4Degrees Colocation by the Telecommunications segment, of Transcontinental magazines by the Media segment, and of the assets of Marathon de Québec by the Sports and Entertainment segment.
- Business acquisitions in 2014 reflected, among other things, acquisition of substantially all of the assets of MELS in the Media segment, and of the Remparts de Québec of the QMJHL in the Sports and Entertainment segment.

Business disposals: $316.3 million in 2015, compared with $193.5 million in 2014, a $122.8 million increase.

- Business disposals in 2015 consisted mainly of the sale of English-language newspaper businesses in Canada in the Media segment, and the sale of Archambault Group's retail operations in the Telecommunications segment.
- Business disposals in 2014 consisted mainly of the sale of the Nurun subsidiary to Publicis Groupe, and the sale of 74 Québec weeklies to Transcontinental Interactive.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $284.1 million in 2015 compared with $253.1 million in 2014 (Table 8).

- The $31.0 million favourable variance was due to:
  - o $108.3 million increase in cash flows provided by continuing operating activities.

  Partially offset by:
  - o $41.9 million increase in additions to intangible assets (excluding spectrum acquisition);
  - o $34.6 million increase in additions to property, plant and equipment.

Table 8
Cash flows from segment operations and free cash flows from continuing operating activities of Quebecor Media
(in millions of CAN dollars)

	2015	2014
Cash flows from segment operations		
Telecommunications	**$ 666.5**	$ 665.3

Financing activities

Consolidated debt (long-term debt plus bank borrowings)**:** $607.2 million increase in 2015; $655.6 million net favourable variance in assets and liabilities related to derivative financial instruments.

- Summary of debt increases in 2015:
  - estimated $602.0 million unfavourable impact of exchange rate fluctuations. The increase in this item was offset by an increase in the asset (or decrease in the liability) related to cross-currency swap agreements entered under "Derivative financial instruments";
  - issuance by Videotron on September 15, 2015 of $375.0 million aggregate principal amount of 5.75% Senior Notes maturing on January 15, 2026, for net proceeds of $370.1 million, net of financing fees of $4.9 million;
  - use by Videotron of its secured revolving credit facility in the aggregate amount of $246.7 million;
  - $33.8 million increase in the bank borrowings of Videotron and Quebecor Media.
- Summary of debt reductions in 2015:
  - early redemption and withdrawal by Videotron on July 16, 2015 of the entirety of its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million;
  - early redemption and withdrawal by Videotron on July 16, 2015 of the entirety of its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million;
  - early redemption and withdrawal by Videotron on April 10, 2015 of the entirety of its outstanding 6.375% Senior Notes issued on September 16, 2005 and maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million;
  - current payments, totalling $25.0 million, on the credit facilities and other debt of Videotron and Quebecor Media;
  - $20.9 million reduction in Quebecor's debt.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $953.7 million at December 31, 2015 compared with $298.1 million at December 31, 2014. The $655.6 million net favourable variance was due to:
  - favourable impact of exchange rate fluctuations on the value of derivative financial instruments;
  - early settlement of an offsetting foreign exchange forward contract used in conjunction with cross-currency interest rate swaps to hedge the foreign exchange risk exposure on US$441.4 million of notional amount on Videotron's

5.375% Senior Notes maturing on June 15, 2024.

Partially offset by:

- o unfavourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments;
- o unwinding of Videotron's hedging contracts in an asset position in connection with the redemption and early withdrawal on July 16, 2015 of US$75.0 million aggregate principal amount of 9.125% Senior Notes;
- o unwinding of Videotron's hedging contracts in an asset position in connection with the redemption and early withdrawal on April 10, 2015 of US$175.0 million aggregate principal amount of its 6.375% Senior Notes.

- On September 9, 2015, the Corporation's interest in Quebecor Media increased from 75.36% to 81.07% following the repurchase by Quebecor Media of 7,268,324 Common Shares of its capital stock held by CDP Capital for an aggregate purchase price of $500.0 million, payable in cash. All of the purchased shares were cancelled. As a result, CDP Capital's interest in Quebecor Media was reduced from 24.64% to 18.93%.
- On June 16, 2015, Videotron amended its $575.0 million secured revolving bank credit facility to increase it to $615.0 million and extend its term by two years to July 20, 2020. Videotron also entered into a new $350.0 million unsecured revolving credit facility expiring on July 20, 2020. The terms and conditions of the new unsecured credit facility are similar to those of Videotron's existing secured revolving credit facility.
- On March 20, 2015, TVA Group completed a rights offering whereby it received net proceeds totalling $110.0 million from the issuance of 19,434,629 TVA Group Class B Non-Voting Shares. Under the rights offering, Quebecor Media subscribed for 17,300,259 TVA Group Class B Non-Voting Shares at a total cost of $97.9 million. As a result, its total interest in TVA Group's equity increased from 51.5% to 68.4%.

Financial position

Net available liquidity: $987 million at December 31, 2015 for Quebecor Media and its wholly owned subsidiaries, consisting of $30.9 million in bank indebtedness and $1.02 billion in available unused revolving credit facilities.

Net available liquidity: $125.5 million for Quebecor at the corporate level, consisting of $0.5 million in bank indebtedness and $126.0 million in available unused revolving credit facilities.

Consolidated debt (long-term debt plus bank borrowings): $5.89 billion at December 31, 2015, a $607.2 million increase compared with December 31, 2014; $655.6 million net favourable variance in assets and liabilities related to derivative financial instruments (*see* "Financing activities" above).

- Consolidated debt essentially consisted of Videotron's $3.28 billion debt ($2.93 billion at December 31, 2014); TVA Group's $73.0 million debt ($78.2 million at December 31, 2014); Quebecor Media's $2.48 billion debt ($2.20 billion at December 31, 2014); and Quebecor's $56.3 million debt ($77.2 million at December 31, 2014).

At December 31, 2015, minimum principal payments on long-term debt in the coming years are as follows:

Table 10
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of CAN dollars)

2016	$	44.0
2017		53.9
2018		19.2
2019		56.8
2020		704.2
2021 and thereafter		5,014.4
Total	**$**	**5,892.5**

The weighted average term of Quebecor's consolidated debt was approximately 7.0 years as of December 31, 2015 (7.2 years as of December 31, 2014). At December 31, 2015, taking into account interest rate swaps, the debt consisted of approximately 82.5% fixed-rate debt (82.6% at December 31, 2014) and 17.5% floating-rate debt (17.4% at December 31, 2014).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, share repurchases, and dividend payments (or reduction of paid-up capital by Quebecor Media). The Corporation believes it will be able to meet future debt maturities, which are quite staggered over the coming years.

Pursuant to their financing agreements, the Corporation and its subsidiaries are required to maintain certain financial ratios and financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted operating income). At December 31, 2015, the Corporation and its subsidiaries were in compliance with all required financial ratios and restrictive covenants in their financing agreements.

Dividends declared

- On March 8, 2016, the Board of Directors of Quebecor declared a quarterly dividend of $0.035 per share on its Class A Multiple Voting Shares ("Class A Shares") and Class B Subordinate Voting Shares ("Class B Shares"), payable on April 19, 2016 to shareholders of record at the close of business on March 25, 2016.

2500 MHz and AWS-3 spectrum auction

On March 6, 2015, Quebecor Media and its Videotron subsidiary announced that they had acquired four AWS-3 licences in the auction for commercial mobile spectrum for a total price of $31.8 million. The licences cover Eastern Québec, Southern Québec, Northern Québec and Eastern Ontario/Outaouais. They were issued to Videotron by ISED Canada on April 21, 2015.

On May 12, 2015, Quebecor Media and its Videotron subsidiary announced the acquisition of 18 licences in four Canadian provinces in the auction for 2500 MHz commercial mobile spectrum. The licences, which cover all of the Province of Québec, as well as the major urban centres in the rest of Canada, including Toronto, Ottawa, Calgary, Edmonton, and Vancouver, were acquired for $187.0 million. They were issued to Videotron by ISED Canada on June 24, 2015.

Analysis of consolidated balance sheet at December 31, 2015

Table 11
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2015 and 2014
(in millions of CAN dollars)

	December 31, 2015	December 31, 2014	Difference	Main reason for difference
Assets				
Cash and cash equivalents	**$ 18.6**	$ 395.3	$ (376.7)	Cash flows used in investing and financing activities exceeded cash flows provided by operating activities
Accounts receivable	**494.1**	449.4	44.7	Impact of current variances in activity
Net assets held for sale[1]	**–**	300.2	(300.2)	Sale of English-language newspaper businesses
Property, plant and equipment	**3,424.9**	3,430.4	(5.5)	Impairment of assets in the Media segment and depreciation for the period, partially offset by additions to property, plant and equipment (*see* “Investing activities”) and acquisition of 4Degrees Colocation and Transcontinental magazines
Intangible assets	**1,178.0**	945.8	232.2	Purchase of 2500 MHz spectrum licences and AWS-3 licences and acquisition of 4Degrees Colocation and Transcontinental magazines, partially offset by asset impairment in the Media segment
Goodwill	**2,678.4**	2,714.6	(36.2)	Goodwill impairment in the Media segment, partially offset by impact of acquisition of 4Degrees Colocation and Transcontinental magazines
Derivative financial instruments[2]	**953.7**	298.1	655.6	*See* “Financing activities”
Liabilities				
Deferred revenues	**321.5**	283.0	38.5	Impact of current variances, business acquisitions and volume growth
Income taxes[3]	**(19.5)**	78.8	(98.3)	Payment of outstanding income tax balances
Long-term debt, including short-term portion and bank indebtedness	**5,890.7**	5,283.5	607.2	*See* “Financing activities”
Deferred income taxes[4]	**584.2**	521.0	63.2	Tax deductions for property, plant and equipment and for intangible assets in excess of book depreciation and amortization

1 Current assets less current liabilities.
2 Long-term assets less current and long-term liabilities.
3 Current liabilities less current assets.
4 Long-term liabilities less long-term assets.

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2015, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; principal repayment and interest on convertible debentures; operating lease arrangements; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 12 below shows a summary of these contractual obligations.

Table 12
Contractual obligations of Quebecor as of December 31, 2015
(in millions of CAN dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,892.5**	$ 44.0	$ 73.1	$ 761.0	$ 5,014.4
Convertible debentures[2]	**704.0**	–	704.0	–	–
Interest payments[3]	**2,076.9**	263.9	612.3	561.4	639.3
Operating leases	**253.8**	51.3	75.7	42.1	84.7
Additions to property, plant and equipment and other commitments	**1,340.0**	253.6	285.7	207.9	592.8
Derivative financial instruments[4]	**(950.9)**	(1.8)	(17.7)	(112.9)	(818.5)
Total contractual obligations	**$ 9,316.3**	**$ 611.0**	**$ 1,733.1**	**$ 1,459.5**	**$ 5,512.7**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2015 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2015.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 12

Videotron leases sites for its LTE network under operating lease arrangements and has contracted long-term commitments to acquire equipment for a total future consideration of $155.2 million.

In 2011, Quebecor Media announced an agreement with Québec City for management of the Videotron Centre. As at December 31, 2015, the balance of those commitments stood at $78.0 million.

In 2012 and 2014, Quebecor Media signed 20-year agreements to install, maintain and advertise on bus shelters belonging to the Montréal and Laval transit commissions. In 2015, a similar 10-year agreement was signed with the Lévis transit commission. As at December 31, 2015, the balance of these commitments stood at $107.0 million.

In May 2013, Videotron and Rogers Communications announced a 20-year agreement to build out and operate an LTE network in the Province of Québec and in the Ottawa area. As at December 31, 2015, the balance of those commitments stood at $260.0 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2015, the balance of those commitments stood at $817.1 million.

Pension Plan Contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $42.0 million in 2016 (contributions of $45.0 million were paid in 2015).

Related Party Transactions

During the year ended December 31, 2015, the Corporation and its subsidiaries made purchases and incurred rent charges with affiliated corporations in the amount of $3.4 million ($2.9 million in 2014), which are included in purchase of goods and services. The Corporation and its subsidiaries made sales to affiliated corporations in the amount of $3.3 million ($3.3 million in 2014). These transactions were accounted for at the consideration agreed between the parties.

Off-Balance Sheet Arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease term), and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2015, the maximum exposure with respect to these guarantees was $28.4 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation's subsidiaries has, as a franchiser, provided guarantees should franchisees, in their retail activities, default on certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

Capital Stock

In accordance with Canadian financial reporting standards, Table 13 below presents information on the Corporation's capital stock as at February 29, 2016. In addition, 1,310,000 stock options were outstanding as of February 29, 2016.

Table 13
Capital stock
(in shares and millions of CAN dollars)

	February 29, 2016		
	Issued and outstanding		Book value
Class A Shares	38,906,172	$	8.6
Class B Shares	83,556,992	$	317.0

On July 31, 2014, Quebecor filed a normal course issuer bid for a maximum of 500,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2014. The purchases could be made from August 13, 2014 to August 12, 2015 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All of the purchased shares were cancelled.

On July 29, 2015, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 500,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2015. The purchases can be made from August 13, 2015 to August 12, 2016 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange. All shares purchased under the bid will be cancelled.

In 2015, the Corporation purchased and cancelled 413,300 Class B Shares for a total cash consideration of $12.4 million (455,000 Class B Shares for a total cash consideration of $11.7 million in 2014). The $10.8 million excess of the purchase price over the carrying value of the repurchased Class B Shares was recorded in reduction of retained earnings ($10.0 million in 2014).

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Competition and technological development

In its cable business, Quebecor Media competes against incumbent local exchange carriers (or "ILECs"). The primary one in Quebecor Media's market holds a regional licence to provide terrestrial broadcasting distribution in Montréal and in several other communities in the Province of Québec. That primary ILEC is rolling out its own Internet protocol television (or "IPTV") service throughout the country and, more specifically, in Montréal (including a portion of the greater Montréal area), Québec City, and in other locations in the Province of Québec. It has also secured licences to launch video distribution services using video digital subscriber line (or "VDSL") technology. Quebecor Media's cable business competes against providers of direct broadcast satellite (or "DBS", which in Canada are also referred to as "DTH" for "direct-to-home" satellite providers), multichannel multipoint distribution systems, and satellite master antenna television systems. The direct access to some broadcasters' websites that provide streaming in HD of video-on-demand content is also available for some of the channels that Quebecor Media offers in its television programming. In addition, some third-party Internet service providers ("ISPs") have launched Internet Protocol video services ("IP video services") in territories where Quebecor Media provides services.

Quebecor Media also faces competition from illegal providers of cable television services and illegal access to non-Canadian DBS (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy). Competitors in the video business also include emerging content delivery platforms. Furthermore, over-the-top ("OTT") content providers, such as Netflix and Apple TV, as well as Canadian services such as Crave TV and shomi, compete for viewership and for a share of the monthly entertainment spending currently allocated to traditional cable television.

Unlike Quebecor Media, OTT service providers are also not subject to Canadian Radio-television and Telecommunications Commission's ("CRTC") regulations and do not have to contribute financially to the Canadian traditional television business model. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial conditions, and results of operations.

In its Internet access business, Quebecor Media competes against other ISPs offering residential and commercial Internet access services as well as WiMAX and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line ("DSL"), fibre to the node and fibre to the home technologies, often offering comparable download speeds to Quebecor Media's. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to Quebecor Media's low and medium download speeds. The CRTC also requires cable and ILEC network providers, including Quebecor Media, to offer wholesale access to their high-speed Internet systems to third-party ISP competitors for them to provide retail Internet access services. Those third-party ISP competitors may also provide telephony, IP video services and networking applications.

Quebecor Media's cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators, and other providers of telephony, voice over Internet Protocol (or "VoIP") and Internet communications, including competitors that are not facility-based and therefore have a much lower infrastructure cost. In addition, Internet protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media's business, prospects and results of operation.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current or developing adjunct technologies, such as Wi-Fi, "hotspots" or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides, or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and for many years operated lower-cost mobile telephony brands in order to acquire additional market share. In the near future, depending on new regulations, Quebecor Media could see the emergence of non-facility-based operators in the wireless space. Also, Quebecor Media may not be able to compete successfully in the future against existing or potential competitors, and increased competition could have a material adverse effect on its business, prospects, revenues, financial condition, and results of operations.

Due to ongoing technological developments, the distinction between traditional platforms (broadcasting, Internet and telephony) is fading rapidly. For instance, emerging Go Platforms such as HBO Go, allow customers to view their traditional television content directly on their mobile devices or computers via Internet connection (although authentication as a broadcasting distribution undertaking's subscriber is still required in Canada). Also, the Internet, through wired and mobile devices, is becoming an important broadcasting and distribution platform. In addition, mobile operators, with the development of their respective 4G and Long Term Evolution (also known as "LTE") networks, are now offering wireless and fixed wireless Internet services. In addition, Quebecor Media's VoIP telephony service also competes with Internet-based solutions.

Moreover, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television or IPTV, Internet, residential phone and mobile telephony services). As a result, should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing up to one subscriber for each of its services. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operation.

Fierce price competition in all Quebecor Media's businesses and across the industries in which it operates may affect Quebecor Media's ability to raise the price of its products and services in line with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operation.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world (including Canada, the United States and Europe), and has established worldwide coverage. Should it be unable to extend its worldwide coverage, or to renew or substitute for those roaming agreements at their respective or better terms or on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably.

In addition, various aspects of mobile communication operations, including the ability of mobile providers to enter into interconnection agreements with traditional landline telephone companies and to manage data traffic on their networks, are subject to regulation by the CRTC. Regulations adopted or actions taken by government agencies with jurisdiction over any mobile business that Quebecor Media may operate or develop could adversely affect its mobile business and operations, including actions that could either increase competition or its costs.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, it cannot be assured that it will continue to enjoy a good reputation, nor can it be assured that events that are beyond its control will not cause its reputation to be negatively impacted. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition, and results of operations.

Higher handset subsidies and increase in bring-your-own-device ("BYOD") customers

Quebecor Media's mobile telephony business model is based substantially on subsidizing the cost of subscriber handsets, similar to other North American wireless carriers. This model attracts customers and in exchange they commit to a term contract. Quebecor Media also commits to a minimum subsidy per unit with the supplier of certain smartphone devices. If Quebecor Media is unable to recover the costs of the subsidies over the term of the customer contract, this could negatively impact its business, financial condition and results of operations.

Also, with the CRTC's Wireless Code introduced in 2013 limiting wireless term contracts to two from three years, the number of BYOD customers with no-term contracts could increase. Such customers are under no contractual obligation to remain with Quebecor Media, which could have a material adverse effect on its churn rate and, consequently, on its business, financial condition and results of operations.

Inventory obsolescence

Quebecor Media's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

Quebecor Media's strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its network and infrastructure to support growth in its customer base and its demands for increased bandwidth capacity and other services. In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its network and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short and medium term in order to expand and maintain its systems and services, including expenditures relating to advancements in Internet access, HD, UHD television and TV everywhere/every platform requiring IP delivery technology, plus the cost of its mobile services infrastructure deployment, maintenance and enhancement.

The demand for wireless data services has been growing at unprecedented rates and it is projected that this demand will further accelerate, driven by increases in the following: levels of broadband penetration; need for personal connectivity and networking; affordability of smartphones and Internet-only devices (e.g., high-usage data devices such as mobile Internet keys, tablets and electronic book readers); multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum, if available and if economically reasonable, in order to address this increased demand. The ability to acquire additional spectrum (if needed) is dependent on the timing and the rules established by ISED Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, that could have a material adverse effect on its business, prospects and financial condition.

The development, maintenance and enhancement of Quebecor Media's LTE network requires capital expenditures to remain competitive and to comply with its obligations under the agreement with its partner governing the joint build-out of its LTE network. A geographical expansion or densification of its LTE network may require Quebecor Media to incur significant costs and make significant capital expenditures.

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to finance any portion of these capital improvement programs, new strategies and services, or other capital expenditure requirements, whether through cash from operations, additional borrowings or other sources. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected. Even if Quebecor Media were able to obtain adequate funding, the period of time required to upgrade its network could have a material adverse effect on its ability to successfully compete in the future. Moreover, additional investments in its business may not translate into incremental revenues, cash flows or profitability.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable network. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the *"Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies on its service territory. Should Quebecor Media seek to renew or renegotiate those agreements, it cannot guarantee that they will continue to be available on their respective terms, or on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, maintaining its advanced broadband network, pursuing enhanced content development to reduce costs, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its business. Quebecor Media may not be able to implement those strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement those strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, and other factors described in this section. While the centralization of certain business operations and processes has the advantage of standardizing practices, thereby reducing costs and increasing effectiveness, it also represents a risk in itself should a business solution implemented throughout the organization by a centralized office fail to produce the intended results. Quebecor Media may also be required to make capital expenditures or other investments that may affect its ability to implement its business strategies if it is unable to secure additional financing on acceptable terms or to generate sufficient funds internally to cover those requirements. Any material failure to implement its strategies could have a material adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating expenditures in the future. It can provide no assurance that it will be successful in developing new activities in relation to those engagements, including the development of new revenue sources.

Consumers' trend to abandon cable telephony and television services

The recent trend toward mobile substitution or "cord-cutting" (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada and the various unlimited offers launched by mobile operators. In addition, there is also a consumer trend to abandon and substitute wire and cable television for Internet access service in order to stream directly from broadcasters and OTT content providers. Quebecor Media may not be successful in converting its existing cable telephony subscriber base to its mobile telephony services or in attracting customers to its OTT entertainment platforms, which could have a material adverse effect on its business, results of operation and financial condition.

Rapid growth of traffic volumes on the Internet

Internet users are downloading an increasing amount of data each year and households are now connected to the Internet through a combination of several computers, tablets and other mobile devices, leading to simultaneous flows per home, which constitutes a departure from the past, when a majority of households were connected to the Internet through a single computer. In addition, some content on the Internet, such as videos, is now available at a higher bandwidth for which HD, as opposed to standard definition, has become the norm. OTT service providers have recently started streaming UHD content, which uses even more bandwidth than HD services. There has therefore been an increase in data consumption and an intensification of Internet traffic during peak periods, which calls for increased bandwidth capacity to address customer needs.

Equipment costs are under pressure in an effort to counterbalance customer demand for bandwidth. While Quebecor Media can relay some of this pressure on costs to its manufacturers, can adopt new technologies that reduce costs or implement other cost-reduction initiatives, Quebecor Media's inability to fully meet its customers' increasing need for bandwidth may result in price increases or in reduced profitability.

Significant and rapid technological changes in Media segment

In relation to the Corporation's Media segment, the media industry is experiencing rapid and significant technological changes, which have resulted in alternative means of program and content transmission. The continued growth of the Internet has presented alternative content distribution options that compete with traditional media. Furthermore, in its video distribution markets, industry regulators have authorized DTH, microwave services and VDSL services, and may authorize other alternative methods of transmitting television and other content with improved speed and quality. Quebecor Media may not be able to successfully compete with existing or newly developed alternative technologies, such as IPTV, or it may be required to acquire, develop or integrate new technologies. The cost of the acquisition, development or implementation of new technologies could be significant and its ability to fund such implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition, and results of operations.

The continuous technological improvements to the Internet, combined with higher download speeds and cost reductions for customers, may divert a portion of its Media business' existing television subscriber base from its services to new video-over-the-Internet model. While having a positive impact on the demand for its Internet services, video-over-the-Internet could adversely impact the demand for its other services.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, financial condition, prospects, or results of operations. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has recently made, and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant capital expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that management may not be able to successfully manage the development of its Sports and Entertainment business; that the development of the Sports and Entertainment business may place significant demands on management, diverting attention from existing operations; that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the development of its Sports and Entertainment business; and the risk associated with a failure to make continued investments in its Sports and Entertainment business in order to respond to consumer trends and demands, which could adversely affect its ability to compete in the sports and entertainment industry.

Implementation of changes to the structure of its business

Quebecor Media has and it will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement and upgrade, a process redesign, the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may lead to greater-than-expected operational challenges and costs, expenses, customer loss, and business disruption for Quebecor Media, which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior managers and its ability to retain skilled employees. There is intense competition for qualified managers and skilled employees, and Quebecor's failure to recruit, train and retain such employees could have a material adverse effect on its business, financial condition and results of operations. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance and maintain content quality; it must continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations, and financial condition.

Competition for advertising, circulation revenues/audience

Advertising revenue is the primary source of revenue for the Corporation's Media segment. Quebecor Media's revenues and operating results in those businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Those economic factors affect the levels of retail and national advertising revenue of the media properties of Quebecor Media. Since a significant portion of Quebecor Media's advertising revenue is derived from retail and automotive sector advertisers, weakness in those sectors and in the real estate industry has had, and may continue to have an adverse impact on the revenues and results of operations of the Media segment. Continuing or deepening softness in the Canadian or U.S. economy could further adversely affect key national advertising revenues.

Advertising revenues for the Media segment are also driven by readership and circulation levels, as well as by market demographics, price, service, and advertiser results. Readership and circulation levels tend to be based on the content of the newspaper or magazine, service, availability and price. A prolonged decline in readership and circulation levels in Quebecor Media's newspaper and magazine businesses and lack of audience acceptance of its content would have a material effect on the rate and volume of its newspaper and magazine advertising revenues (as rates reflect circulation and readership, among other factors), and could also affect its ability to institute circulation price increases for its print products, all of which could have a material adverse effect on its business, prospects, results of operations, and financial condition.

The newspaper and magazine industry is experiencing structural changes, including the growing availability of free access to media, shifting readership habits, digital transferability, the advent of real-time information and secular changes in the advertising industry, as well as the declining frequency of regular newspaper and magazine buying, particularly among young people, who increasingly rely on non-traditional media as a source for news and information. As a result, competition for advertising spend and circulation revenues comes not only from other newspapers and traditional media, but also from digital media technologies, which have introduced a wide variety of media distribution platforms (including, most significantly, the Internet and distribution over wireless devices and e-readers) for readers and advertisers.

While Quebecor Media continues to pursue initiatives to offer value-added advertising solutions to its advertisers and to maintain its circulation base, such as investments in the re-design and overhaul of its newspaper and magazine websites and the publication of e–editions of a number of its newspapers and magazines, it may not be successful in retaining its historical share of advertising revenues or in transferring its audience to its new digital products. The ability of the Media segment to grow and succeed over the long-term depends on various factors, including its ability to attract advertisers and readers (including subscribers) to its online sites. Quebecor Media's new initiatives, developed to generate additional revenues from its websites (such as digital platform advertising and/or the paywall revenue model), may not be accepted by users and consequently may negatively affect online traffic. In addition, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of those initiatives through increased circulation, advertising and digital revenues.

In broadcasting, the proliferation of television channels, progress in mobile and wireless technology, the migration of television audiences to the Internet and the viewing public's increased control over the manner, content and timing of their media consumption through personal video recording devices, have all contributed to the fragmentation of the television viewing audience and to a more challenging advertising sales environment. For example, the increased availability of personal video recording devices and video programming on the Internet, as well as the increased access to various media through mobile devices, may each have the potential to reduce the viewing of its content through traditional distribution outlets. Some of these new technologies also give consumers greater flexibility to watch programming on a time-delayed or on-demand basis, or to fast-forward or skip advertisements within its programming, which may adversely impact the advertising revenues it receives. Delayed viewing and advertisement skipping have the potential to become more common as the penetration of personal video recording devices increases and content becomes increasingly available via Internet sources. If the broadcasting market continues to fragment, Quebecor Media's audience share levels and its advertising revenues, results of operations, financial condition, business and prospects could be materially adversely affected.

Distribution of a wide range of television programming

The financial performance of its cable and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing, conveniently scheduled television programming at reasonable rates on its platforms. Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, those suppliers have become vertically integrated and are now more limited in number. The quality and amount of television programming offered by Quebecor Media affect the attractiveness of its services to customers and, accordingly, the rates Quebecor Media can charge for such services. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates, or its inability to pass-through rate increases to its customers could have a material adverse effect on its business, financial condition, results of operations, and prospects.

In addition, Quebecor Media's ability to attract and retain cable customers depends, to a certain extent, on its capacity to offer quality content, HD and UHD programming, an appealing variety of programming choices and packages, as well as multiplatform distribution and on-demand content at competitive prices. If the number of specialty channels being offered does not increase at the level and pace comparable to its competitors, if the content offered on such channels does not receive audience acceptance, or if it is unable to offer multiplatform availability, HD and UHD programming and on-demand content for capacity reasons, among others, this may have a negative impact on revenues from Quebecor Media's cable operations.

The multiplicity of foreign and deregulated content providers (often global players on the Internet) puts pressure on the viability of Quebecor Media's current business model for television distribution. Substantial capital expenditures on infrastructure and in research and development may be required to remain competitive.

Costs, quality, and variety of television programming

The most significant expenses in television broadcasting are programming and production costs. Increased competition in the television broadcasting industry, developments affecting producers and distributors of programming content, the vertical integration of distributors and broadcasters, introduction from various OTT providers of original and exclusive programming, changes in viewer preferences and other developments could impact both the availability and the costs of programming content, as well as production costs. Future increases or volatility in programming and production costs could adversely affect Quebecor's operating results. Developments in cable, satellite or other forms of distribution could also affect both the availability and cost of programming and production and increase competition for advertising expenditures. As well, the value of royalties payable pursuant to the *Copyright Act* are frequently decided by the Copyright Board of Canada during or even after the applicable period, which can cause retroactive increases in content costs.

Launch of new specialty services

Quebecor Media is investing in the launch of new specialty services in its Broadcasting operations. During the period immediately following the launch of a new specialty service, subscription revenues are always relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize, or may never materialize.

Loss of key customers

The Corporation's businesses are based primarily on customer satisfaction with reliability, timeliness, quality, and price. In general, Quebecor Media does not have long-term or exclusive service agreements with its customers. Quebecor Media is unable to predict if, or when, its customers will purchase its services. There can be no assurance that the revenues generated from key customers, individually or in the aggregate, will reach or exceed historical levels in any future period, or that it will be able to develop relationships with new customers. Quebecor Media cannot assure that it will continue to maintain favourable relationships with its customers or that they will not be adversely affected by economic conditions.

Single-clustered network

Quebecor Media provides its digital television, Internet access, cable telephony and mobile telephony services through a primary headend and its analog television services through 12 additional regional headends in a single clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its network until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation.

Cybersecurity

The ordinary course of Quebecor Media's telecommunications and data-storage businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, as well as personally identifiable information om its customers and employees, whether in its data centres, systems, infrastructure, networks, or processes. The secure processing, maintenance and transmission of this information is critical to its operations and business strategy.

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against unauthorized access to, or use of sensitive data, including data on its customers, and although ever-evolving cyberthreats require Quebecor Media to continually evaluate and adapt its data centres, systems, infrastructure, networks and processes to prevent data loss, Quebecor Media cannot assure that its data centres, systems, infrastructure, networks and processes will be adequate to safeguard against all information security access by third parties or employees or errors by third-party suppliers. If Quebecor Media is subject to a significant cyberattack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation.

Quebecor Media has not to its knowledge been subject to cyberattacks or breaches which, individually or in the aggregate, have had a material impact on its operations (including the integrity of customer data) or financial condition. However, the preventive actions Quebecor Media takes to reduce the risks associated with cyberattacks, including protection of its data centres, systems, infrastructure, networks and processes, may be insufficient to repel or mitigate the effects of a major cyberattack in the future.

Protection of personal data

Quebecor Media stores and processes increasingly large amounts of personally identifiable information on its clients, employees, and/or business partners. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data in, and hosted on its systems, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure or security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed systems, processes and security controls that are designed to protect the personally identifiable information on its clients, employees and business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breach relating to such data that Quebecor Media stores or processes. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers. An inability to maintain and enhance its existing information technology systems, or to obtain new systems to accommodate additional customer growth or support new products and services, could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, and manage operating expenses, all of which could adversely impact its financial results and position.

Malicious and abusive Internet practices

Quebecor Media's cable data, mobile data and fibre-optic connectivity business customers utilize its network to access the Internet and, as a consequence, they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms, and other destructive or disruptive software. Such activities could have adverse consequences on its network and its customers, including deterioration of service, excessive call volumes to call centres and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its network. Any significant loss of cable data, mobile data or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, financial condition, and results of operations.

Protection from piracy

In Quebecor Media's cable, Internet access, OTT and telephony business, it may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its network, analog and digital programming, and Internet access services. It uses encryption technology to protect its cable signals and OTT from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its network, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Third party suppliers and providers

Quebecor Media depends on third party suppliers and providers for certain services, hardware and equipment that are critical to its operations and network evolution. These materials and services include set-top boxes, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, software, the "backbone" telecommunications network for Internet access and telephony services, and construction services for the expansion of and upgrades to its cable and mobile networks. These services and equipment are available from a limited number of suppliers and Quebecor Media therefore faces the risks of supplier disruption, including business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment or services it requires, or that comply with evolving Internet and telecommunications standards, or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services and other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with content providers, comply with their technological requirements, or find alternative sources of equivalent content, its Media operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor's reputation, results of operations, liquidity or financial position, a negative outcome in respect of any such claim or litigation could have a said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Strikes and other labour protests

At December 31, 2015, approximately 53% of Quebecor Media's employees were represented by collective bargaining agreements. Through its subsidiaries, Quebecor Media is currently party to 31 collective bargaining agreements.

Quebecor Media is not currently subject to a labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial position, results of operations, and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefits costs is limited by the terms of its collective bargaining agreements.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund those pension plans will not increase in the future and therefore negatively impact its operating results and financial position. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes and cable modems, certain mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, is payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2015, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favorable terms, or at all, in the future.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and it reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2015, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $953.7 million on a consolidated basis.

Certain of the commodities that the Corporation consumes in its daily operations are traded on commodities exchanges or are negotiated on their respective markets in U.S. dollars and some of its suppliers source their products out of the U.S., therefore, although the Corporation pays these suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations to the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations.

Volatility

The capital and credit markets have experienced significant volatility and disruption over the last several years, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as those could adversely impact Quebecor's results of operations, cash flows, financial position and prospects.

Ethical business conduct

Any failure or perceived failure to adhere to Quebecor's policies, the law or ethical business practices could significantly affect its reputation and brands and could therefore negatively impact its financial performance. Quebecor's framework for managing ethical business conduct includes the adoption of a Code of Ethics, which its directors and employees are required to acknowledge and agree to on a regular basis, and, as part of an independent audit and security function, maintain a whistle-blowing hotline. There can be no assurance that these measures will be effective enough to prevent violations or perceived violations of law or ethical business practices.

Asset impairment charges

In the past, the Corporation has recorded, asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flow.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues, and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause a diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel, and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, or the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In the Corporation's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its competitors have pursued a strategy of selling their products through independent retailers to extend their presence on the market, while some have also acquired certain independent retailers and created new distribution networks. This could result in limiting the expansion of the Corporation's retail network and may contribute to isolating the Corporation from its competitors, which could have an adverse effect on its business, prospects and results of operation.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licences. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. There are significant restrictions on the ability of non-Canadian entities to own or control broadcasting licences and telecommunications carriers in Canada, although the federal government recently eliminated the foreign ownership restrictions on telecommunications companies with less than 10% of total Canadian telecommunications market revenues. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licences, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. For instance, the CRTC recently adopted a new Wireless Code which regulates numerous aspects of the provision of retail wireless services and a new Television Service Provider Code which regulates numerous aspects of the provisions of retail television services. Quebecor Media's wireless and cable operations are also subject to technical requirements, licence conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

In addition, laws relating to communications, data protection, e-commerce, direct marketing, and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes to the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions, may impose limits on the collection and use of certain kinds of information. On December 17, 2014, an amendment to the *Telecommunications Act* and the *Radiocommunication Act* was adopted to give the CRTC and ISED Canada the power to impose monetary sanctions for failure to comply with current regulations.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of licence, the issuance of new licences, including additional spectrum licences to its competitors, or changes to the treatment of the tax deductibility of advertising expenditures, could have a material adverse effect on its business (including how it provides products and services), financial condition, prospects, and results of operations. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. It is difficult to predict in what form laws and regulations will be adopted or how they will be construed by the relevant courts or the extent to which any changes might adversely affect Quebecor Media.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographical products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes to the policies or rules of application in Canada or in any of its provinces in connection with government incentive programs, including any change in the Québec or federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its financial condition and results of operations. Canadian content programming is also subject to certification by various federal government agencies. If programs fail to so qualify, the Corporation would not be able to use the programs to meet its Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

To ensure that the Corporation maintains minimum levels of Canadian ownership under the *Broadcasting Act* and other legislation under which it derives the benefit of tax credits and industry incentives, it has placed constraints on the issuance and transfer of shares of certain of its subsidiaries.

In addition, the Canadian and provincial governments currently provide grants and incentives to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation's Studios, Equipment and Post-Production Business, as well as content producers for its television broadcasting and production operations, finance a portion of their production budgets through Canadian governmental incentive programs, including federal and provincial tax credits. There can be no assurance that the government grants and incentive programs presently being offered to participants in the film and television production industry will continue at their present levels or at all. If such grants or incentives are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced and, as a result, the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions around the world, including by many states in the U.S. Some producers may select locations other than Québec to take advantage of tax credit programs that they conclude to be more or as attractive as those Québec offers. Other factors such as director or star preference may also have the effect of productions being shot elsewhere, which could have a material adverse effect on the Corporation's business, financial condition and results of operations.

Licence renewals

Videotron's AWS-1 licences were issued in December 2008 for a 10-year term. Beginning two years before the end of this term, and any subsequent term, Videotron may apply for renewed licences for a term of up to 10 years. AWS-1 licence renewals, including whether licence fees should apply for a subsequent licence term, will be subject to a public consultation process initiated in the eighth year of the applicable licences, meaning in 2016 in respect of Videotron's current AWS-1 licences.

Videotron's other spectrum licenses, including in the AWS-3, 700 MHz and 2500 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of these respective terms, applications may be made for new licences for a subsequent term through a renewal process, unless a breach of licence conditions by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licences, including the terms and conditions of the new licences and whether licence fees should apply for a subsequent licence term, are expected to be determined by ISED Canada following public consultations.

Provision of third-party ISPs with access to cable systems

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide third-party ISPs with access to their cable systems at mandated cost-based rates. Several third-party ISPs are interconnected to the Corporation's cable network and are thereby providing retail Internet access services.

In a decision issued on July 22, 2015, the CRTC ordered substantial changes to the framework for the provision of wholesale services to third-party ISPs. The provision of aggregated services will no longer be mandated and will be phased out in conjunction with the implementation of a new mandatory disaggregated service which will involve third-party ISPs provisioning their own regional transport services. This disaggregated service will also include, for the first time, mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. As a result of this decision, Quebecor Media may experience increased competition for retail cable Internet and telephony customers. In addition, because its third-party Internet access rates are regulated by the CRTC, the Corporation could be limited in its ability to recover its costs associated with providing this access.

Environmental laws and regulations

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have recently implemented Extended Producer Responsibility (EPR) regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products," which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain studios and vacant lots, some of which are located on a former landfill with the gas-emitting waste. As a result, the operation and ownership of these studios and vacant lots carries an inherent risk of environmental and health and safety liabilities for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs, and other environmental damages (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in being involved from time to time in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Concerns about alleged health risks relating to radiofrequency emissions

Some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment they supply meet all applicable regulatory and safety requirements. While there is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with, additional studies of radiofrequency emissions are ongoing and Quebecor Media cannot be sure that the results of any such future studies will not demonstrate a link between radiofrequency emissions and health problems.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or expose Quebecor Media to potential litigation. Any of those could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations.

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2015, it had $5.89 billion of consolidated long-term debt (long-term debt plus bank borrowings). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operate;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2015, it had approximately $1.29 billion available for additional borrowings under its existing credit facilities on a consolidated basis and under the indentures governing its outstanding

Senior Notes, which permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;
- create liens;
- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities, its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including its Senior Notes. If Quebecor's indebtedness is accelerated, Quebecor may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flow of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flow from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flow and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flow to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, financial condition, results of operations and prospects.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favorable terms, or at all.

Provisions of the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's Directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. As of December 31, 2015, approximately 73.98% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk−management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of their use of financial instruments, the Corporation and its subsidiaries are exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation and its subsidiaries use derivative financial instruments (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation and its subsidiaries do not intend to settle their derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
December 31, 2015
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold		Notional amount bought	
Quebecor Media					
2016[1]	1.0154	US$	320.0	$	324.9
Videotron					
Less than 1 year	1.3105	$	168.7	US$	128.7
2017[2]	1.3849	US$	260.0	$	360.1

1 *See* footnote 1 below "Cross-currency interest rate swaps" table.
2 *See* footnote 2 below "Cross-currency interest rate swaps" table.

Interest rate swaps

Maturity	Notional amount		Pay/ receive	Fixed rate	Floating rate
TVA Group					
2017	$	38.5	Pay fixed/ Receive floating	2.03%	Bankers' acceptances 1 month

Cross-currency interest rate swaps

Hedged item	Hedging instrument				
	Period covered	Notional amount		Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media					
5.750% Senior Notes due 2023[1]	2007 to 2016	US$	320.0	7.69%	0.9977
5.750% Senior Notes due 2023	2016 to 2023	US$	431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$	418.7	6.85%	0.9759
Term loan "B"	2013 to 2020	US$	342.1	Bankers' acceptance 3 months + 2.77%	1.0346

Cross-currency interest rate swaps (continued)

Hedged item	Hedging instrument			
	Period covered	**Notional amount**	**Annual interest rate on notional amount in CAN dollars**	**CAN dollar exchange rate on interest and capital payments per one U.S. dollar**
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024[2]	2008 to 2017	US$ 260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039

[1] Quebecor Media initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 7.75% Senior Notes due 2016 redeemed in 2012. These swaps are now used to set in CAN dollars all coupon payments through 2016 on US$431.3 million of notional amount under its 5.75% Senior Notes due 2023 and issued in 2012. In conjunction with the repurposing of these swaps, Quebecor Media has entered into US$320.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the March 15, 2016 notional exchange.

[2] Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued in 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock-in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation and its subsidiaries include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses on valuation and translation of financial instruments for 2015 and 2014 are summarized in Table 15.

Table 15
(Gain) loss on valuation and translation of financial instruments
(in millions of CAN dollars)

	2015	2014
Loss on embedded derivatives related to long term debt and derivative financial instruments for which hedge accounting is not used	**$ 6.2**	$ 7.9
(Gain) loss on embedded derivatives related to convertible debentures	**(10.5)**	91.6
Gain on reversal of embedded derivatives on debt redemption	**(0.4)**	(1.1)
Loss (gain) on the ineffective portion of cash flow hedges	**1.6**	(0.5)
Gain on the ineffective portion of fair value hedges	**(3.6)**	(3.2)
	$ (6.7)	$ 94.7

A $14.0 million gain on cash flow hedges was recorded under “Other comprehensive income” in 2015 (gain of $14.2 million in 2014).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative instruments by applying a credit default premium estimated using a combination of observable and unobservable inputs in the market to the net exposure of the counterparty or the Corporation.

The fair value of early settlement options recognized as embedded derivatives and embedded derivative related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long term debt and derivative financial instruments as of December 31, 2015 and December 31, 2014 are as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of CAN dollars)

		2015		2014
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1,2]	**$ (5 892.5)**	**$ (5 894.9)**	$ (5 326.7)	$ (5 444.7)
Convertible debentures[3]	**(706.4)**	**(706.4)**	(711.8)	(711.8)
Derivative financial instruments[4]				
Early settlement options	**1.0**	**1.0**	8.2	8.2
Foreign exchange forward contracts[5]	**9.3**	**9.3**	4.2	4.2
Interest rate swaps	**(0.8)**	**(0.8)**	(0.5)	(0.5)
Cross-currency interest rate swaps[5]	**945.2**	**945.2**	294.4	294.4

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $953.7 million as of December 31, 2015 ($298.6 million as of December 31, 2014).

5 The value of foreign exchange forward contracts entered into to lock-in the value of existing hedging positions is netted from the value of the offset financial instruments.

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2015, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2015, 10.4% of trade receivables were 90 days past their billing date (8.5% as of December 31, 2014) of which 40.4 % had an allowance for doubtful accounts (52.3% as of December 31, 2014).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2015 and 2014:

		2015		2014
Balance at beginning of year	**$**	**21.8**	$	28.4
Charged to income		**32.1**		32.1
Utilization		**(30.9)**		(34.5)
Reclassification to assets held for sale		**–**		(4.2)
Balance at end of year	**$**	**23.0**	$	21.8

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of their use of derivative financial instruments, the Corporation and its subsidiaries are exposed to the risk of non-performance by a third party. When the Corporation and its subsidiaries enter into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation and its subsidiaries will not be able to meet their financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation and its subsidiaries manage this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 7.0 years as of December 31, 2015 (7.2 years as of December 31, 2014) (*See* also "Contractual Obligations" above).

Market Risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2015 in order to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock-in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on Other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2015 is as follows:

Increase (decrease)		**Income**		**Other comprehensive income**
Increase of $0.10		**2.2**	**$**	**50.2**
Decrease of $0.10		**(2.2)**		**(50.2)**

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation and its subsidiaries bear interest at fixed rates. The Corporation and its subsidiaries have entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2015, after taking into account the hedging instruments, long-term debt was comprised of 82.5% fixed-rate debt (82.6% in 2014) and 17.5% floating-rate debt (17.4% in 2014).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2015 was $8.6 million.

The estimated sensitivity on income and on Other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2015, as per the Corporation's valuation models, is as follows:

Increase (decrease)		**Income**		**Other comprehensive income**
Increase of 100 basis points	**$**	**(3.2)**	**$**	**(50.5)**
Decrease of 100 basis points		**3.2**		**50.5**

Capital Management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivative related to convertible debentures, net assets and liabilities related to derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2015 and 2014 was as follows:

Table 17
Capital structure of Quebecor
(in millions of CAN dollars)

	2015	2014
Bank indebtedness	**$ 34.3**	$ 5.2
Long-term debt	**5 856.4**	5 278.3
Embedded derivatives related to convertible debentures	**221.7**	232.2
Convertible debentures	**500.0**	500.0
Derivative financial instruments	**(953.7)**	(298.1)
Cash and cash equivalents	**(18.6)**	(395.3)
Net liabilities	**5 640.1**	5 322.3
Equity	**$ 652.0**	$ 1 063.3

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

Contingencies

There are a number of legal proceedings against the Corporation that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on Corporation's results or on its financial position.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under "Deferred revenue" when customers are invoiced.

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony, over-the-top video, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from cable and other services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related

equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;

- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines, or is displayed on digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers, magazines, books and entertainment products are recognized on delivery, net of provisions for estimated returns based on historical rate of returns;
- Studio, soundstage and equipment leasing revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from leasing, and from ticket, food and beverage sales at the Videotron Centre are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets.

In addition, when determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU.

Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there are no significant amounts of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2015 was $2.68 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2015 was $776.7 million.

Useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changes its conclusion in the future, as it did in 2015.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in "Other comprehensive income" until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of the derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

The judgment used in determining the fair value of derivative financial instrument including embedded derivatives, using valuation and pricing models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, and the value of the gain or loss on derivative financial instruments recorded in the consolidated statements of comprehensive income. Also, valuation and financial models are based on a number of assumptions including future cash flows, period-end swap rates, foreign exchange rates, credit default premium, volatility, discount factors and underlying instrument adjusted implicit interest rate and credit premium.

In addition, judgment is required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion prices features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Determination of the fair value of the embedded derivatives is based on a number of assumptions, including contractual future cash flows, volatility and discount factors. The judgment used in determining the fair value of embedded derivatives, using valuation models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income.

Pension and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions, which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "Other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan to the extent that the Corporation can unilaterally reduce those future contributions.

In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future, for the purpose of calculating the limit on the net benefit asset, is based on a number of assumptions, including future service costs and reductions in future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of these assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash or other assets at the option of the employee are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

Estimates of the fair value of stock option awards are determined by applying an option-pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

The judgment and assumptions used in determining the fair value of liability-classified stock-based awards may have an effect on the compensation cost recorded in the statements of income.

Provisions

Provisions are recognized when (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date, or to transfer it to a third party at that time, and is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Allowance for doubtful accounts

The Corporation maintains an allowance for doubtful accounts to cover anticipated losses from customers who are unable to pay their debts. The allowance is reviewed periodically and is based on an analysis of specific significant accounts outstanding, the age of the receivable, customer creditworthiness, and historical collection experience.

Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. The judgments made in determining the estimated fair value and the expected useful life of each acquired asset, and the estimated fair value of each assumed liability, can significantly impact net income.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is at all times under audit by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the final outcome is difficult to predict.

Change in Accounting Estimates

In the second quarter of 2015, the Corporation changed its assessment of the useful life of its spectrum licences used in the operation of its Telecommunications segment. In light of recent spectrum auctions and developments in the telecommunications industry, the Corporation is now of the view that these spectrum licences have an indefinite useful life based on the following facts:

- The Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by ISED Canada;
- The Corporation has the financial and operational ability to renew these spectrum licences;
- Currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences;
- The Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Accordingly, the Corporation ceased to amortize spectrum licences used in its operations as of April 1, 2015, and no amortization expense has been recorded after this date. The straight-line amortization expense recorded relating to these licences was $13.9 million in 2015 ($55.4 million in 2014).

Recent Accounting Pronouncements

The Corporation has not yet completed its assessment of the impact of the adoption of these pronouncements on its consolidated financial statements.

(i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, Financial Instruments: Recognition and Measurement. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities

(ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles based, five-step model to be applied to all contracts with customers.

(iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted provided that the IFRS 15 has been applied or is applied at the same time as IFRS 16.

IFRS 16 sets out the new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

Controls and Procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Senior Vice-President and Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2015. The design of DCP therefore provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and that information required to be disclosed by the Corporation in its annual, interim and other reports, which it files or releases in accordance with securities laws, is recorded, processed, summarized and reported within the time periods specified under those laws. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the Corporation's IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by management during the financial period beginning October 1, 2015 and ending December 31, 2015.

Additional Information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary Statement Regarding Forward-Looking Statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;
- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing its network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its digital cable television, Internet access, telephony and over-the-top video services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;
- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;

- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the Corporation's public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the "Risks and Uncertainties" section of this Management Discussion and Analysis.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of March 9, 2016, and are subject to change after that date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 54 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company with an 81.07% interest in Quebecor Media Inc., one of Canada's largest media groups. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, "Quebecor" or "the Corporation" refer in this Management Discussion and Analysis to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: cable television; Internet access; mobile and cable telecommunications; over-the-top video service; business solutions (including data hosting centres); broadcasting; soundstage and equipment leasing and postproduction services for the film and television industries; newspaper publishing and distribution; Internet portals and specialized websites; book and magazine publishing and distribution; rental and distribution of video games and game consoles; music production and distribution; out-of-home advertising; operation and management of a world-class entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a premier cable and mobile communication service provider. Quebecor Media holds leading positions through its Media segment in the creation, promotion and distribution of entertainment and news, and in Internet-related services that are designed to appeal to audiences in every demographic category. Quebecor Media is pursuing a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

HIGHLIGHTS SINCE END OF 2015

- Quebecor's revenues totalled $4.02 billion in 2016, a $125.8 million (3.2%) increase from 2015.
- On February 16, 2017, Quebecor announced major corporate management changes. Pierre Karl Péladeau returned to the position of President and Chief Executive Officer of Quebecor and Quebecor Media, replacing Pierre Dion who was appointed Chairman of the Board of Quebecor Media and a director of Quebecor.

Telecommunications

- In 2016, the Telecommunications segment grew its revenues by $144.8 million (4.8%) and its adjusted operating income by $63.6 million (4.6%).
- In 2016, Videotron significantly increased its revenues from mobile telephony ($106.7 million or 26.4%), Internet access ($58.0 million or 6.3%), business solutions ($42.1 million or 60.9%) and the Club illico over-the-top video service ("Club illico") ($7.8 million or 33.1%).
- Videotron posted a net increase of 117,900 revenue-generating units[1] (2.1%) in 2016, including 125,300 connections to the mobile telephony service, 57,200 memberships in Club illico, and 44,600 subscriptions to the cable Internet access service.
- Videotron's average monthly revenue per user ("ARPU") was $144.86 in 2016 compared with $135.68 in 2015, a $9.18 (6.8%) increase.
- On January 12, 2017, 4Degrees Colocation Inc. ("4Degrees Colocation"), a subsidiary of Videotron, announced an agreement with Megaport (USA) Inc., a global leader in secure interconnectivity, which will allow business customers to link directly to the world's largest providers of public cloud services. Customers will enjoy fast, secure, redundant access to business applications from three leading information and communications technology providers: Microsoft Corporation (Azure, Office 365, Exchange), Amazon Web Services Inc. and Google.
- During 2016, Videotron's Unlimited Music service added Apple Music, Napster, Tidal and SoundCloud to its catalogue of music streaming apps, bringing the number of supported services to 18 at year's end. Unlimited Music allows subscribers to Videotron's mobile telephony service to stream music without restriction via various platforms without using their mobile data plan.

---

[1] The sum of subscriptions to the cable television, cable Internet access and Club illico services, plus subscriber connections to the cable and mobile telephony services.

- On November 15, 2016, Videotron began rolling out Docsis 3.1 technology on its network. Developed by the CableLabs consortium, of which Videotron is a member, Docsis 3.1 will eventually deliver download speeds of up to 10 Gbps and upload speeds of up to 1 Gbps. Videotron will therefore be able to offer better Internet access service to meet the growing speed and bandwidth needs of its customers, who are watching more high-definition ("HD") and ultra high-definition ("UHD") videos and adopting the cloud, the Internet of Things, augmented reality and virtual reality.
- On September 20, 2016, Ericsson Canada Inc., École de technologie supérieure, Quartier de l'innovation, and Videotron announced a partnership to create the first open-air smart living laboratory to test all aspects of new, fifth-generation telecommunications technologies.
- On September 13, 2016, 4Degrees Colocation officially opened its Montréal data centre. The $40 million, 4,000-square-metre facility boasts one of the largest server rooms in Québec and is purpose-designed for data hosting.
- On July 13, 2016, Videotron launched its Giga Fibre Hybrid Internet access service, which offers residential and business customers connection speeds of up to 940 Mbps. The product confirms Videotron's status as the leader in high-speed Internet, an area in which it has been a trailblazer for more than 20 years.
- On January 7, 2016, Videotron announced the acquisition of Fibrenoire inc. ("Fibrenoire"), which provides fibre-optic connectivity services to businesses, for a $125.0 million cash consideration, of which the net amount of $119.1 million was paid at closing (net of acquired cash in the amount of $1.8 million). A subsequent $0.2 million adjustment was received in the second quarter of 2016. The $5.9 million balance, including interest charges, was paid on February 7, 2017. Combining the capabilities of Videotron Business Solutions and Fibrenoire will make it possible to continue meeting the growing demand from business customers for fibre-optic connectivity and will strengthen Videotron's leadership in business telecommunications services.

Media

- According to the fall 2016 Vividata survey, *Le Journal de Montréal*, *Le Journal de Québec* and the free daily *24 heures Montréal* remain Québec's news leaders with 3.8 million readers per week across all platforms (print, mobile and Web). TVA Group Inc. ("TVA Group") is a major player in the Canadian magazine industry with 9.3 million readers per week across all platforms.
- On January 10, 2017, the Montréal Impact, a Major League Soccer ("MLS") team, and Quebecor announced an agreement making TVA Sports the exclusive French-language broadcaster of the Montréal Impact and an official MLS broadcaster for the next five years. As an official MLS broadcaster, TVA Sports will broadcast all Montréal Impact regular season and playoff games, the All-Star Game, the MLS Cup playoffs and the MLS Cup final. The agreement will enrich TVA Sports' programming with coverage of a sport that is growing fast in Québec and make it possible to disseminate that content on all of Quebecor's media platforms.
- During the period from September 5 to December 4, 2016, TVA Group and its specialty channels had a total television audience market share of 37.0% in Québec compared with 33.1% in the previous year (source: Numeris, Québec Franco, Fall 2016). TVA Network held its status as the market leader with a 25.3% market share, more than its main over-the-air rivals combined.
- Season 1 of *La Voix Junior,* which aired on TVA Network in fall 2016, reached an average audience of 2,309,600 per week (source: Numeris, Québec Franco, October 2 to November 27, 2016, T2+) for a 55% market share, topping the fall 2016 ratings in Québec. The show's popularity extended to the Web, where the candidates' performances and videotaped interviews logged a total of 7.5 million viewings across all platforms. The *lavoixjunior.ca* site attracted more than a million unique visitors in the season. It was a compelling example of the effectiveness of Quebecor Media's convergence strategy, designed to capture and maximize synergies within its portfolio of media properties.
- On November 2, 2016, the Media segment announced changes to its organizational structure aimed at balancing its cost structure and enhancing operational efficiencies. The transformation entailed a 220-position workforce reduction in the segment, including 125 positions at TVA Group, mainly managers, professionals and administrative support staff. The changes had no impact on the newsrooms or on cross-Québec news coverage. These changes will enable the Media segment to maintain its lead in news and content production and promote its flagship brands.
- On October 24, 2016, TVA Group announced the launch of the new *TVA.ca* website and the TVA mobile app, which give users free access to TVA programs in HD, live or on demand. The site and app also support a series of other functionalities: users can catch up on shows from the previous seven days, watch exclusive original content, pause and resume play on a different screen, and receive customized suggestions.

- On June 20, 2016, the Media segment announced the launch of Immersion, a new video advertising format that enables businesses and their brands to leverage existing content and reduce their advertising video production costs. The innovative technology displays full-screen, high-resolution videos that integrate seamlessly into the front end of most websites.
- On April 12, 2016, TVA Group released the Molto app, a new digital newsstand that gives users unlimited access to the full content of all its magazines on their tablets and smartphones.
- Season 4 of *La Voix* posted strong ratings. The weekly gala attracted an average audience of 2.6 million viewers (source: Numeris, Québec Franco, January 17 to April 10, 2016, T2+) and an average market share of 58%. Traffic on the *lavoix.ca* site increased considerably and the number of viewings grew by 54% to a total of 6.6 million. The show logged 1.8 million downloads on the analog and digital ("illico Digital TV") broadcasting distribution services.
- In the first quarter of 2016, Quebecor Media launched an automated real-time contextual advertising service across its digital network, in partnership with digital marketing agency Dialekta. The Media segment is the first French-language media group to offer advertisers a service of this type, which has the potential for more accurate audience targeting than anything currently available.

Sports and Entertainment

- On September 12, 2016, the Videotron Centre completed its first full year of operation. During that period, the Videotron Centre hosted 93 sporting events and concerts, as well as 30 corporate events. In all, more than 1.1 million people passed through the turnstiles. The Videotron Centre's diverse programming included prominent acts such as Metallica, Madonna, Muse, Rihanna, Justin Bieber, Pearl Jam, and Bryan Adams. In August 2016, the Videotron Centre also presented a sold-out series of five concerts by Céline Dion, which were attended by more than 66,000 people. Finally, the Remparts de Québec of the QMJHL drew more than 470,000 spectators during the 2015-2016 season, a record for a junior hockey team in Canada.
- On April 7, 2016, Gestev became the official imprint for all shows and events produced by Quebecor. The new grouping is capitalizing on the 25 years of experience that Event Management Gestev Inc. ("Gestev") has in organizing sporting and cultural events and on its powerful brand in order to establish itself as a major player in showbiz and entertainment.

Financial transactions

- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount.
- In June 2016, Quebecor amended its revolving credit facility to extend its term to July 2019, Quebecor Media amended its secured revolving credit facility to extend its term to July 2020, and Videotron amended its secured revolving credit facility and its unsecured revolving credit facility to extend their terms to July 2021. Some of the terms and conditions of the credit facilities were also amended.

TREND INFORMATION

Competition continues to be intense in the cable and alternative multichannel broadcast distribution industry and in the mobile telephony market. The significant subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth, due to the penetration rates currently reached.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its cable and mobile networks, the launch and expansion of new or additional services to support growth in its customer base and demands for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term in order to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure deployment, maintenance and enhancement, as well as costs relating to advancements in Internet access and TV everywhere, requiring IP technology and the introduction of virtual reality. In addition, the demand for wireless data services has been growing at high rates and it is projected that this demand will further increase in the future. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. The Telecommunications segment may have to acquire additional spectrum in the future, as available.

Some of Quebecor's lines of business are cyclical in nature. They are dependent on advertising and, in the Media segment in particular, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

In the Media segment, the broadcasting industry is undergoing a period of significant change. Television audiences are fragmenting as viewing habits shift not only toward specialty channels, but also toward content delivery platforms that allow users greater control over content and timing, such as the Internet, video on demand and mobile devices. Audience fragmentation has prompted many advertisers to review their strategies in media placement. The Media segment is taking steps to adjust to the profound changes occurring in the broadcasting industry to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want. Moreover, newspaper circulation, measured in terms of copies sold, has been declining in the newspaper industry over the past several years. The traditional run of press advertising for major multimarket retailers has been declining over the past few years due to consolidation in the retail industry, combined with a shift in marketing strategy toward other media. To respond to such competition, the Media segment's operations continue to develop their Internet presence through branded websites, including French-language portals and specialized websites.

The Sports and Entertainment segment has made and is continuing to make significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required in order to expand the Sports and Entertainment segment.

INTEREST IN SUBSIDIARIES

As of December 31, 2016, Quebecor held an 81.07% interest in Quebecor Media. The Corporation's interest in Quebecor Media increased from 75.36% to 81.07% on September 9, 2015 as a result of the purchase by Quebecor Media of part of the interest in its equity held by CDP Capital d'Amérique Investissement inc. ("CDP Capital"), a subsidiary of the Caisse de dépôt et placement du Québec. Table 1 shows Quebecor Media's equity interest in its main subsidiaries at that date.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
December 31, 2016

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	68.4
MediaQMI Inc.	100.0	100.0
QMI Spectacles inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past three years, with the exception of the following:

On March 20, 2015, TVA Group completed a rights offering whereby it received net proceeds totalling $110.0 million from the issuance of 19,434,629 Class B Non-Voting Shares, participating, without par value, of TVA Group ("TVA Group Class B Shares"). Under the rights offering, Quebecor Media subscribed for 17,300,259 TVA Group Class B Shares at a total cost of $97.9 million. As a result, its total interest in TVA Group's equity increased from 51.5% to 68.4%.

NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted operating income, adjusted income from continuing operating activities, cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary, are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted Operating Income

In its analysis of operating results, the Corporation defines adjusted operating income, as reconciled to net income (loss) under IFRS, as net income (loss) before depreciation and amortization, financial expenses, (loss) gain on valuation and translation of financial instruments, charge for restructuring of operations, litigation and other items, charge for impairment of goodwill and other assets, loss on debt refinancing, income taxes, and loss from discontinued operations. Adjusted operating income as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted operating income in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted operating income is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted operating income may not be the same as similarly titled measures reported by other companies.

Table 2 below provides a reconciliation of adjusted operating income to net income (loss) as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2016 and 2015 presented in Table 2 below is drawn from the unaudited consolidated statements of income.

Table 2

Loss from discontinued operations	**–**	(19.7)	**–**	(0.9)
Net income (loss)	**$ 248.8**	$ 180.1	**$ 143.4**	$ (22.5)

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income (loss) attributable to shareholders under IFRS, as net income (loss) attributable to shareholders before (loss) gain on valuation and translation of financial instruments, charge for restructuring of operations, litigation and other items, charge for impairment of goodwill and other assets, loss on debt refinancing, net of income tax related to adjustments and of net income attributable to non-controlling interest related to adjustments, and before the loss from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of the financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 3 provides a reconciliation of adjusted income from continuing operating activities to the net income (loss) attributable to shareholders measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2016 and 2015 presented in Table 3 below is drawn from the unaudited consolidated statements of income.

Table 3
Reconciliation of the adjusted income from the continuing operating activities measure used in this report to the net income (loss) attributable to shareholders measure used in the consolidated financial statements
(in millions of Canadian dollars)

	Year ended December 31		**Three months ended December 31**	
	2016	2015	**2016**	2015
Adjusted income from continuing operating activities	**$ 305.5**	$ 239.9	**$ 84.7**	$ 58.0
(Loss) gain on valuation and translation of financial instruments	**(70.3)**	6.7	**47.8**	(87.9)
Charge for restructuring of operations, litigation and other items	**(28.0)**	116.9	**(13.3)**	(8.0)
Impairment of goodwill and other assets	**(40.9)**	(230.7)	**–**	(3.7)
Loss on debt refinancing	**(7.3)**	(12.1)	**(7.3)**	–
Income taxes related to adjustments[1]	**11.5**	2.8	**7.8**	4.0
Net income attributable to non-controlling interest related to adjustments	**24.2**	42.1	**3.6**	3.5
Discontinued operations	**–**	(13.8)	**–**	(0.7)
Net income (loss) attributable to shareholders	**$ 194.7**	$ 151.8	**$ 123.3**	$ (34.8)

[1] Includes impact of fluctuations in income tax applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash flows from segment operations

Cash flows from segment operations represents adjusted operating income, less additions to property, plant and equipment and intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital by Quebecor Media, repayment of long-term debt and purchase of non-controlling interest. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. The Corporation's definition of cash flows from segment operations may not be identical to similarly titled measures reported by other companies. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

KEY PERFORMANCE INDICATOR

The Corporation uses ARPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly revenues per average basic customer from its cable television, Internet access, cable and mobile telephony services and Club illico. ARPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ARPU may not be the same as identically titled measurements reported by other companies. The Corporation calculates ARPU by dividing the combined revenues from its cable television, Internet access, cable and mobile telephony services and Club illico by the average number of basic customers during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2016/2015 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $4.02 billion, a $125.8 million (3.2%) increase.

- Revenues increased in Telecommunications ($144.8 million or 4.8% of segment revenues) and in Sports and Entertainment ($11.4 million or 49.1%).
- Revenues decreased in Media ($37.8 million or -3.9%).

Adjusted operating income: $1.49 billion, a $53.4 million (3.7%) increase.

- Adjusted operating income increased in Telecommunications ($63.6 million or 4.6% of segment adjusted operating income). There was a favourable variance in Sports and Entertainment ($4.5 million or 38.5%).
- Adjusted operating income decreased in Media ($6.9 million or -9.8%). There was an unfavourable variance at Head Office ($7.8 million), due primarily to an unfavourable variance in the stock-based compensation charge.
- The change in the fair value of Quebecor Media stock options resulted in a $5.3 million unfavourable variance in the stock-based compensation charge in 2016 compared with 2015. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in an $8.3 million unfavourable variance in the Corporation's stock-based compensation charge in 2016.

Net income attributable to shareholders: $194.7 million ($1.59 per basic share) in 2016, compared with $151.8 million ($1.24 per basic share) in 2015, an increase of $42.9 million ($0.35 per basic share).

- The favourable variance was due primarily to:
  - $189.8 million decrease in non-cash charge for impairment of goodwill and other assets, including $75.0 million without any tax consequences;
  - $53.4 million increase in adjusted operating income;
  - $40.6 million decrease in the depreciation and amortization charge;
  - $19.7 million favourable variance in the loss related to discontinued operations;
  - $7.0 million decrease in financial expenses;
  - $4.8 million favourable variance in losses on debt refinancing.

  Partially offset by:
  - $144.9 million unfavourable variance in the charge for restructuring of operations, litigation and other items;
  - $77.0 million unfavourable variance in losses and gains on valuation and translation of financial instruments, including $78.7 million without any tax consequences;
  - $24.7 million unfavourable variance in the income tax expense;
  - $25.8 million unfavourable variance in non-controlling interest.

Adjusted income from continuing operating activities: $305.5 million ($2.49 per basic share) in 2016, compared with $239.9 million ($1.95 per basic share) in 2015, an increase of $65.6 million ($0.54 per basic share).

Depreciation and amortization charge: $653.0 million, a $40.6 million decrease due primarily to the impact of the end of amortization of spectrum in the Telecommunications segment in the second quarter of 2015, in accordance with a change in the estimated useful lives of the licences, and the end of the accounting useful lives of some assets acquired as part of the acquisition of Videotron in October 2000.

Financial expenses: $328.0 million, a $7.0 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates and a favourable variance in gains and losses on foreign currency translation of short-term monetary items, partially offset by higher average indebtedness resulting primarily from the purchase in September 2015 of part of the interest in Quebecor Media held by CDP Capital for a $500.0 million consideration.

Loss on valuation and translation of financial instruments: $70.3 million in 2016 compared with a $6.7 million gain in 2015. The $77.0 million unfavourable variance was essentially due to a $78.7 million unfavourable variance, without any tax consequences, in losses and gains on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $28.0 million in 2016 compared with a $116.9 million gain in 2015, a $144.9 million unfavourable variance.

- In 2016, the Telecommunications segment recognized a charge for restructuring of operations totalling $14.3 million ($8.8 million in 2015), deriving essentially from customer migration from analog to digital services. A $10.1 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in 2016 ($9.8 million in 2015). The other segments recorded charges for restructuring of operations of $1.7 million in 2016 ($0.6 million in 2015).
- In 2016, Quebecor's segments also recorded a $0.8 million charge for other items ($2.0 million in 2015).
- On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group and ordered Bell ExpressVu Limited Partnership ("Bell ExpressVu") to pay Videotron compensation in the amount of $135.3 million and TVA Group compensation in the amount of $0.6 million, including interest, for having failed to implement an appropriate security system in a timely manner to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada denied Bell ExpressVu leave to appeal the decision. A $139.1 million gain on litigation was recorded in the statement of income in 2015.
- A $1.1 million interest expense was recorded in the Telecommunications segment in 2016 ($1.0 million in 2015) in connection with a court ruling handed down in 2014.

Charge for impairment of goodwill and other assets: $40.9 million in 2016 compared with $230.7 million in 2015, a $189.8 million favourable variance.

- In 2016, Quebecor Media performed impairment tests on its Magazines cash-generating unit ("CGU") in view of the downtrend in the industry's advertising revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $40.1 million non-cash goodwill impairment charge (without any tax consequences) was recorded in 2016. As well, a charge for impairment of intangible assets totalling $0.8 million was recorded in the Media segment in 2016.
- In 2015, Quebecor Media performed impairment tests on its CGUs and concluded that the recoverable amount of its Newspapers and Broadcasting CGUs was less than their carrying amount. The recoverable amount of those CGUs was adversely affected by declining newspaper and commercial printing volumes, and by continuing pressure on advertising revenues in the newspaper and television businesses. Accordingly, an $85.0 million non-cash goodwill impairment charge (without any tax consequences) and an $81.9 million non-cash impairment charge on other assets, relating mainly to the assets of the Mirabel printing plant, were recorded in the Newspapers CGU in 2015. A $60.1 million impairment charge on TVA Network's broadcasting licences (including $30.1 million without any tax consequences) was recognized in the Broadcasting CGU in 2015. A $3.7 million impairment charge on intangible assets was also recognized in 2015 in other segments.

Loss on debt refinancing: $7.3 million in 2016 compared with $12.1 million in 2015, a $4.8 million favourable variance.

- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.
- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million, at a redemption price of 101.521% of their principal amount, and unwound the related hedges in an asset position. A $0.2 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption, including a $2.1 million net gain previously recorded in "Other comprehensive income."
- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million, at a redemption price of 103.563% of their principal amount. A $13.6 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption.

- In accordance with a notice issued on March 11, 2015, Videotron redeemed, on April 10, 2015, the entirety of its 6.375% Senior Notes maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million, at a redemption price of 100% of their principal amount, and unwound the related hedges in an asset position. A $1.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2015 in connection with this redemption, including a $1.8 million gain previously recorded in "Other comprehensive income."

Income tax expense: $117.8 million (effective tax rate of 24.8%) in 2016 compared with $93.1 million (effective tax rate of 23.4%) in 2015, a $24.7 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to the increase in taxable income for tax purposes and one-time items that had an unfavourable impact on comparative effective tax rates.
- The unfavourable variance in effective tax rates was mainly due to the impact of a decrease in deferred income tax liabilities in the second quarter of 2015, in light of developments in tax audits, jurisprudence and tax legislation. The announced lowering of Québec tax rates in the coming years also had a favourable impact on the effective tax rate in 2016, with a corresponding reduction in deferred tax balances on the balance sheet.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,839,300 homes and businesses. It offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones; Internet access service; analog and digital cable television services, including video on demand, pay-per-view and pay TV; cable telephony; and the Club illico over-the-top video service. Videotron also includes Videotron Business Solutions, a full-service business telecommunications provider that offers telephony, high-speed data transmission, Internet access, hosting, and cable television services.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary ("Le SuperClub Vidéotron") and its franchise network.

2016 operating results

Revenues: $3.15 billion in 2016, a $144.8 million (4.8%) increase.

- Revenues from the mobile telephony service increased $106.7 million (26.4%) to $510.4 million, essentially due to the increase in the number of subscriber connections and higher net revenue per connection.
- Revenues from Internet access services increased $58.0 million (6.3%) to $978.7 million, mainly because of higher per-subscriber revenues caused by factors including a favourable product mix and increases in some rates, higher revenues from the rental of Wi-Fi routers, increased usage and customer base growth.
- Combined revenues from all cable television services decreased $29.5 million (-2.8%) to $1.02 billion, due primarily to the impact of the net decrease in the customer base, higher discounts, and a decrease in video-on-demand and pay TV orders, partially offset by increases in some rates and increased revenues from the leasing of digital set-top boxes.
- Revenues from the cable telephone service decreased $33.2 million (-7.2%) to $424.8 million, mainly because of the impact of the net decrease in subscribers, lower per-subscriber revenues, higher discounts and lower long-distance revenues.
- Revenues from Club illico increased $7.8 million (33.1%) to $31.4 million, essentially because of subscriber growth.
- Revenues of Videotron Business Solutions increased $42.1 million (60.9%) to $111.2 million, due primarily to the impact of the acquisition of Fibrenoire on January 7, 2016 and higher revenues at 4Degrees Colocation, acquired on March 11, 2015.
- Revenues from customer equipment sales decreased $4.0 million (-6.9%) to $53.6 million, mainly because of lower sales of digital set-top boxes.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $1.6 million (-17.6%) to $7.5 million, mainly because of the impact of store closings.
- Other revenues decreased $1.5 million (-13.2%) to $9.9 million.

ARPU: $144.86 in 2016 compared with $135.68 in 2015, a $9.18 (6.8%) increase.

Customer statistics

Revenue-generating units – As of December 31, 2016, the total number of revenue-generating units stood at 5,765,400, an increase of 117,900 (2.1%) in 2016 compared with an increase of 168,200 in 2015 (Table 4). Revenue-generating units are the sum of subscriptions to the cable television, cable Internet access and Club illico services, plus subscriber connections to the cable and mobile telephony services.

Mobile telephony – As of December 31, 2016, the number of subscriber connections to the mobile telephony service stood at 893,900, an increase of 125,300 (16.3%) in 2016 compared with an increase of 135,800 in 2015 (Table 4).

Cable Internet access – As of December 31, 2016, the number of subscribers to cable Internet access services stood at 1,612,800, an increase of 44,600 (2.8%) in 2016 compared with an increase of 30,700 in 2015 (Table 4). At December 31, 2016, Videotron's cable Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,839,300 homes and businesses passed by Videotron's network as of December 31, 2016, up from 2,806,000 one year earlier) of 56.8% compared with 55.9% a year earlier.

Cable television – The combined customer base for all Videotron cable television services decreased by 46,000 (-2.6%) in 2016 compared with a decrease of 45,400 in 2015 (Table 4). As of December 31, 2016, Videotron had 1,690,900 subscribers to its cable television services. The household and business penetration rate was 59.6% versus 61.9% a year earlier.

- As of December 31, 2016, the number of subscribers to the illico Digital TV service stood at 1,587,100, an increase of 16,500 (1.1%) in 2016 compared with an increase of 17,000 in 2015. As of December 31, 2016, illico Digital TV had a household and business penetration rate of 55.9% versus 56.0% a year earlier.
- The customer base for analog cable television services decreased by 62,500 (-37.6%) in 2016 compared with a decrease of 62,400 in 2015.

Cable telephony – As of December 31, 2016, the number of subscribers to the cable telephony service stood at 1,253,100, a decrease of 63,200 (-4.8%) in 2016 compared with a decrease of 32,700 in 2015 (Table 4). At December 31, 2016, the cable telephony service had a household and business penetration rate of 44.1% versus 46.9% a year earlier.

Club illico – As of December 31, 2016, the number of subscribers to Club illico stood at 314,700, an increase of 57,200 (22.2%) in 2016 compared with an increase of 79,800 in 2015 (Table 4).

Table 4
Telecommunications segment year-end customer numbers (2012-2016)
(in thousands of customers)

	2016	2015	2014	2013	2012
Mobile telephony[1]	**893.9**	768.6	632.8	504.3	403.8
Cable Internet	**1,612.8**	1,568.2	1,537.5	1,506.0	1,444.0
Cable television:

[1] In thousands of connections

Adjusted operating income: $1.45 billion, a $63.6 million (4.6%) increase caused primarily by:

- impact of the revenue increase.

Partially offset by:

- impact of the increased loss incurred on mobile device sales, partially offset by the favourable impact of “bring your own device” (“BOYD”) plans;
- increases in some operating expenses, primarily administrative expenses, customer service and selling expenses.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 54.0% in 2016 compared with 53.9% in 2015.

Cash flows from operations

Cash flows from segment operations: $660.4 million in 2016 compared with $666.5 million in 2015 (Table 5).

- The $6.1 million decrease was due primarily to a $68.7 million increase in additions to property, plant and equipment and to intangible assets, reflecting in part investment in the data centres and in expanding the capacity of the LTE network, partially offset by the $63.6 million increase in adjusted operating income.

Table 5: Telecommunications
Cash flows from operations
(in millions of Canadian dollars)

	2016	2015
Adjusted operating income	**$ 1,449.4**	$ 1,385.8
Additions to property, plant and equipment	**(666.8)**	(630.2)
Additions to intangible assets (excluding spectrum)	**(125.6)**	(93.5)
Proceeds from disposal of assets	**3.4**	4.4
Cash flows from segment operations	**$ 660.4**	$ 666.5

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network and the specialty channels LCN, TVA Sports, addik^{TV}, Prise 2, Yoopa, CASA and MOI&cie. TVA Group also holds interests in two other TVA Network affiliates and the Évasion specialty channel. As well, TVA Group is engaged in commercial production, dubbing, custom publishing and premedia services, and in the distribution of audiovisual products through its TVA Films division.

Through its subsidiaries, TVA Publications Inc. and Les Publications Charron & Cie inc., TVA Group publishes more than 50 French- and English-language magazines in various categories, including show business, television, fashion, sports, and decorating. It is the largest magazine publisher in Québec.

TVA Group also operates a number of websites. Its leading sites by traffic are *tvanouvelles.ca, tvasports.ca, canadianliving.com*, and *recettes.qc.ca.*

In addition, TVA Group owns Mels Studios and Postproduction G.P., a provider of soundstage and equipment leasing, postproduction and visual effects services to the film and television industries.

The Media segment of Quebecor Media also operates two paid-circulation daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, and a free daily, *24 heures Montréal*. According to corporate figures, the aggregate circulation of the Media segment's paid and free newspapers as of December 31, 2016 was approximately 2.6 million copies per week in print and 0.2 million copies in electronic formats.

The paid-circulation newspapers disseminate information in traditional print form, as well as through two urban daily news portals, *journaldemontreal.com* and *journaldequebec.com*. The Media segment also operates *canoe.ca*, a French-language portal that provides news and services for the general public, and the e-commerce site *autonet.ca* for car buyers.

The Media segment's portals log 6.9 million unique visitors per month in Canada (source: ComScore – December 2016).

The Media segment is also engaged in the printing of newspapers, the distribution of newspapers and magazines, and out-of-home advertising. As well, it operates Studios Goji inc., a talent collective that serves creators of online video content by providing personalized assistance in the development of new multiplatform business opportunities and by supporting creation. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties, as well as Quebecor Media Sales, which offers Media segment customers integrated, diversified, complete advertising services.

The Media segment owns the scholastic publisher CEC Publishing Inc. and Sogides Inc., which is engaged in general literature publishing through its 18 publishing houses, and in physical and digital distribution of books through Messageries ADP inc., the exclusive distributor for more than 200 Québec and European French-language publishers.

Finally, the Media segment is engaged in the distribution of CDs and videos (Distribution Select); distribution of music to Internet download services (Select Digital); music recording and video production (Musicor); and live concert recording.

2016 operating results

Revenues: $938.0 million in 2016, a $37.8 million (-3.9%) decrease.

- Broadcasting revenues increased $9.7 million (2.3%), mainly due to:
  - increased subscription revenues at the specialty channels, including TVA Sports, addik^{TV}, MOI&cie, Yoopa and Casa;
  - higher advertising revenues at the TVA Network.

  Partially offset by:
  - lower advertising revenues at TVA Sports, mainly because of the Montréal Canadiens' failure to qualify for the National Hockey League playoffs in the spring of 2016, and at LCN.
- Film production and audiovisual service revenues decreased by $5.3 million (-8.2%), mainly because of lower revenues from soundstage and equipment leasing due to fewer productions in 2016 than in 2015, partly as a result of the eleventh-hour cancellation of a major production planned for the summer of 2016, partially offset by higher revenues from postproduction and dubbing.
- Newspaper publishing revenues decreased $29.1 million (-12.6%).
  - Advertising revenues decreased 15.1%; circulation revenues increased 3.4%; digital revenues were flat; combined revenues from commercial printing and other sources decreased 21.7%.
- Magazine publishing revenues decreased by $1.3 million (-1.1%). The favourable impact on revenues of the acquisition of magazines from Transcontinental Inc. ("Transcontinental") on April 12, 2015 was outweighed by the impact of the discontinuance of some titles and the decrease in advertising and newsstand revenues.
- Revenues of Quebecor Media Out of Home increased by $3.5 million (28.9%), mainly because of higher advertising revenues, including digital revenues.
- Book distribution and publishing revenues decreased by $3.5 million (-3.3%), primarily as a result of lower volumes in mass market and bookstore distribution, partially offset by higher scholastic and general literature sales.
- Music distribution and production revenues decreased by $10.5 million (-18.3%), mainly because of lower CD sales in 2016 than in 2015, due primarily to the release of singer-songwriter Adele's hit album in 2015.

Adjusted operating income: $63.3 million in 2016, a $6.9 million (-9.8%) decrease.

- Adjusted operating income from broadcasting operations decreased $1.7 million (-7.1%) due to:
  - impact of lower advertising revenues at TVA Sports;
  - higher selling expenses, spending on new digital activities and administrative expenses.

  Partially offset by:
  - impact of higher advertising revenues at TVA Network;
  - favourable impact of higher subscription revenues at the specialty services;
  - cost savings yielded by the restructuring initiatives implemented in 2016, including the elimination of 220 positions in the Media segment announced on November 2, 2016.
- There was a $5.0 million (-35.2%) unfavourable variance in adjusted operating income from film production and audiovisual services, mainly because of the impact of lower soundstage and equipment leasing revenues.
- Adjusted operating income from newspaper publishing decreased by $4.4 million (-29.1%) due to:
  - impact of the revenue decrease;
  - higher newsprint costs.

  Partially offset by:
  - favourable impact on adjusted operating income of reduced operating expenses, including the impact of restructuring initiatives.

- Adjusted operating income from magazine publishing increased by $4.7 million (51.6%), mainly because of the impact of cost savings yielded by the restructuring plan, including lower selling, administrative and production expenses, and the inclusion of income of magazines acquired from Transcontinental on April 12, 2015, partially offset by the impact of a decrease in revenues on a same-store basis.
- There was a $2.8 million favourable variance in the adjusted operating income of Quebecor Media Out of Home due to the impact of the revenue increase.
- Adjusted operating income from book distribution and publishing increased by $1.8 million (21.4%), due primarily to reductions in some operating expenses, including selling and administrative expenses for distribution and general literature, and the impact of increased revenues in the scholastic and general literature segments.
- There was a $2.4 million unfavourable variance in adjusted operating income from music distribution and production, due primarily to the impact of the decrease in revenues.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 93.3% in 2016 compared with 92.8% in 2015. The increase was mainly due to the large fixed component of operating costs, which does not fluctuate in proportion to the decrease in revenues, partially offset by the impact of restructuring and cost-reduction initiatives.

Cash flows from operations

Cash flows from segment operations: $15.0 million in 2016 compared with $24.9 million in 2015 (Table 6). The $9.9 million unfavourable variance was mainly due to the $6.9 million decrease in adjusted operating income and a $3.1 million increase in additions to property, plant and equipment and to intangible assets.

Table 6: Media
Cash flows from operations
(in millions of Canadian dollars)

		2016		2015
Adjusted operating income	**$**	**63.3**	$	70.2
Additions to property, plant and equipment		**(38.2)**		(36.0)
Additions to intangible assets		**(10.2)**		(9.3)
Proceeds from disposal of assets		**0.1**		–
Cash flows from segment operations	**$**	**15.0**	$	24.9

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include production and coproduction of shows presented at the Videotron Centre and other venues. As well, the Sports and Entertainment segment operates Québec City sports and cultural events manager Gestev, which in 2016 became the official imprint for all shows and events produced by Quebecor Media.

The Sports and Entertainment segment also includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec, plus the production of concert videos and television commercials by Les Productions Select TV inc.

2016 operating results

Revenues: $34.6 million, a $11.4 million (49.1%) increase due primarily to:

- inclusion of revenues from events at the Videotron Centre for the full year;
- higher revenues from Gestev sporting events;
- naming rights revenues.

Adjusted operating loss: $7.2 million in 2016 compared with $11.7 million in 2015. The $4.5 million (38.5%) favourable variance was due mainly to the impact of the revenue increase and startup costs incurred in 2015, creating a favourable variance in 2016.

Cash flows from operations

Cash flows from segment operations: Negative $10.5 million in 2016 compared with negative $58.3 million in 2015 (Table 7).

- The $47.8 million favourable variance was due primarily to the $33.0 million payment to Québec City in the third quarter of 2015 for 25-year naming rights to the new Videotron Centre, plus spending on leasehold improvements and startup of the amphitheatre in 2015, combined with a $4.5 million decrease in the adjusted operating loss.

2016/2015 FOURTH QUARTER COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $1.05 billion, a $26.9 million (2.6%) increase.

- Revenues increased in Telecommunications ($28.1 million or 3.6% of segment revenues).
- Revenues decreased in Media ($4.1 million or -1.5%) and in Sports and Entertainment ($0.3 million or -3.0%).

Adjusted operating income: $389.3 million, a $28.5 million (7.9%) increase.

- Adjusted operating income increased in Telecommunications ($15.6 million or 4.5% of segment adjusted operating income) and in Media ($2.4 million or 10.8%). There were favourable variances in Sports and Entertainment ($2.1 million) and at Head Office ($8.4 million). The change at Head Office was essentially due to a favourable variance in the stock-based compensation charge.
- The change in the fair value of Quebecor Media stock options resulted in a $2.1 million unfavourable variance in the stock-based compensation charge in the fourth quarter of 2016 compared with the same period of 2015. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $7.8 million favourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2016.

Net income attributable to shareholders: $123.3 million ($1.01 per basic share) in the fourth quarter of 2016, compared with a net loss attributable to shareholders of $34.8 million ($0.28 per basic share) in the same period of 2015, a favourable variance of $158.1 million ($1.29 per basic share).

- The favourable variance was due primarily to:
  - $135.7 million favourable variance in gains and losses on valuation and translation of financial instruments, including $130.8 million without any tax consequences;
  - $28.5 million increase in adjusted operating income;
  - $9.2 million decrease in the depreciation and amortization charge;
  - $3.7 million favourable variance in non-cash charge for impairment of goodwill and other assets.

  Partially offset by:
  - $7.8 million unfavourable variance in non-controlling interest;
  - $7.3 million unfavourable variance in loss on debt refinancing;
  - $5.3 million unfavourable variance in the charge for restructuring of operations, litigation and other items.

Adjusted income from continuing operating activities: $84.7 million ($0.69 per basic share) in the fourth quarter of 2016, compared with $58.0 million ($0.47 per basic share) in the same period of 2015, an increase of $26.7 million ($0.22 per basic share).

Depreciation and amortization charge: $167.3 million in the fourth quarter of 2016, a $9.2 million decrease due primarily to the end of the accounting useful lives of some assets acquired as part of the acquisition of Videotron in October 2000.

Financial expenses: $84.4 million, a $1.3 million decrease.

Gain on valuation and translation of financial instruments: $47.8 million in the fourth quarter of 2016 compared with an $87.9 million loss in the fourth quarter of 2015. The $135.7 million favourable variance was essentially due to the $130.8 million favourable variance, without any tax consequences, in gains and losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $13.3 million in the fourth quarter of 2016 compared with $8.0 million in the same period of 2015, a $5.3 million unfavourable variance.

- In the fourth quarter of 2016, the Telecommunications segment recognized a $4.4 million charge for restructuring of operations ($3.0 million in the same period of 2015), essentially due to customer migration from analog to digital services.
- A $7.3 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in the fourth quarter of 2016 ($4.2 million in the same period of 2015).
- The other segments recorded a $1.2 million charge for restructuring of operations in the fourth quarter of 2016 ($0.4 million gain in the same period of 2015).
- In the fourth quarter of 2016, Quebecor's segments also recognized a $0.7 million gain on other items ($0.2 million charge in the fourth quarter of 2015).
- A $1.1 million interest expense was recorded in the Telecommunications segment in the fourth quarter of 2016 ($1.0 million in the fourth quarter of 2015) in connection with a court ruling handed down in 2014.

Charge for impairment of goodwill and other assets: $3.7 million in the fourth quarter of 2015, reflecting impairment of intangible assets in some segments.

Loss on debt refinancing: $7.3 million in the fourth quarter of 2016 compared with nil in the same period of 2015.

- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.

Income tax expense: $21.4 million in the fourth quarter of 2016 (effective tax rate of 18.5%) compared with $20.6 million in the same period of 2015 (effective tax rate of 25.6%), a $0.8 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The income tax impact of the increase in taxable income was offset by one-time items that had a favourable impact on comparative effective tax rates.
- The announced lowering of Québec's tax rate over the coming years had a favourable impact on the effective tax rate in the fourth quarter of 2016 due to the corresponding reduction in deferred income tax balances on the balance sheet. The decrease in deferred income tax liabilities in light of developments in tax audits, jurisprudence and tax legislation had a favourable impact on the effective tax rate in the fourth quarter of 2015.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $805.2 million, a $28.1 million (3.6%) increase essentially due to the same factors as those noted above in the 2016/2015 financial year comparison.

- Revenues from mobile telephony service increased $25.6 million (23.0%) to $137.1 million.
- Revenues from Internet access services increased $9.0 million (3.8%) to $248.5 million.
- Combined revenues from all cable television services decreased $7.3 million (-2.8%) to $256.2 million.
- Revenues from cable telephony service decreased $6.7 million (-6.0%) to $104.8 million.
- Revenues from Club illico increased $1.6 million (22.9%) to $8.6 million.
- Revenues of Videotron Business Solutions increased $12.1 million (66.9%) to $30.2 million.
- Revenues from customer equipment sales decreased $5.5 million (-26.8%) to $15.0 million.
- Revenues of Le SuperClub Vidéotron retail chain decreased $0.2 million (-8.3%) to $2.2 million.
- Other revenues decreased $0.6 million (-19.4%) to $2.5 million.

ARPU: $148.56 in the fourth quarter of 2016 compared with $140.19 in the same period of 2015, an $8.37 (6.0%) increase.

Customer statistics

Revenue-generating units – 62,300 (1.1%) unit increase in the fourth quarter of 2016 compared with an increase of 41,600 in the same period of 2015.

Mobile telephony – 26,200 (3.0%) subscriber-connection increase in the fourth quarter of 2016 compared with an increase of 26,100 in the same period of 2015.

Cable Internet access – 16,700 (1.0%) customer increase in the fourth quarter of 2016 compared with an increase of 8,700 in the same period of 2015.

Cable television – 4,800 (-0.3%) decrease in the combined customer base for all of Videotron's cable television services in the fourth quarter of 2016 compared with a decrease of 9,000 in the same period of 2015.

- Subscriptions to illico Digital TV increased by 16,300 (1.0%) in the fourth quarter of 2016 compared with an increase of 6,000 in the same period of 2015.
- Subscriptions to analog cable television services decreased by 21,100 (-16.9%) in the fourth quarter of 2016 compared with a decrease of 15,000 in the same period of 2015.

Cable telephony – 12,000 (-0.9%) subscriber decrease in the fourth quarter of 2016 compared with a decrease of 13,200 in the same period of 2015.

Club illico – 36,200 (13.0%) subscriber increase in the fourth quarter of 2016 compared with an increase of 29,000 in the same period of 2015.

Adjusted operating income: $364.6 million, a $15.6 million (4.5%) increase due primarily to:

- impact of the revenue increase.

Partially offset by:

- impact of the increased loss incurred on mobile device sales, partially offset by the favourable impact of BYOD plans.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 54.7% in the fourth quarter of 2016 compared with 55.1% in the same period of 2015.

Media

Revenues: $266.0 million in the fourth quarter of 2016, a $4.1 million (-1.5%) decrease.

- Broadcasting revenues increased $8.7 million (7.3%), mainly due to:
  - higher advertising revenues at the TVA Network;
  - increased subscription revenues at the specialty channels, including TVA Sports and Yoopa.

  Partially offset by:
  - decreased revenues from commercial production.
- Film production and audiovisual service revenues increased by $2.3 million (17.8%), mainly because of higher revenues from visual effects, postproduction, and soundstage and equipment leasing.
- Newspaper publishing revenues decreased $1.6 million (-3.0%).
  - Advertising revenues decreased 13.0%; circulation revenues increased 5.8%; digital revenues decreased 7.9%; combined revenues from commercial printing and other sources increased 15.5%.
- Magazine publishing revenues decreased by $6.8 million (-18.9%) in the fourth quarter of 2016, mainly because of decreased advertising revenues, the discontinuance of some titles and decreased custom publishing revenues.
- Revenues of Quebecor Media Out of Home increased by $1.1 million (29.7%), essentially because of higher advertising revenues, including digital revenues.
- Book distribution and publishing revenues decreased by $0.2 million (-0.7%).
- Music distribution and production revenues decreased by $8.7 million (-34.3%) mainly because of lower CD sales, due primarily to the release of singer-songwriter Adele's hit album in the fourth quarter of 2015.

Adjusted operating income: $24.7 million in the fourth quarter of 2016, a $2.4 million (10.8%) increase compared with the same period of 2015.

- Adjusted operating income from broadcasting operations increased $4.7 million (37.0%) due to:
  - impact of higher advertising revenues at TVA Network;
  - impact of increased subscription revenues at the specialty services, including TVA Sports and Yoopa;
  - cost savings yielded by restructuring initiatives.

  Partially offset by:
  - increased administrative and selling expenses and spending on new digital activities;
  - higher content costs at TVA Sports.
- Adjusted operating income from film production and audiovisual services increased by $1.3 million (118.2%), mainly because of the impact of the revenue increase.
- Adjusted operating income from newspaper publishing increased by $0.2 million (8.7%) due to:
  - favourable impact on adjusted operating income of reduced operating expenses, including the impact of restructuring initiatives.

  Partially offset by:
  - impact of the revenue decrease.
- Adjusted operating income from magazine publishing decreased by $1.0 million (-32.3%), mainly because of the impact of the decrease in revenues, partially offset by lower operating expenses, including selling and production expenses.
- There was a $1.0 million favourable variance in the adjusted operating income of Quebecor Media Out of Home, mainly because of the impact of the revenue increase.
- Adjusted operating income from book distribution and publishing decreased by $0.1 million (-16.7%).

- There was a $3.2 million unfavourable variance in adjusted operating income from music distribution and production, due primarily to the impact of decreased revenues.

Cost/revenue ratio: Employee costs, and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 90.7% in the fourth quarter of 2016 compared with 91.7% in the same period of 2015. The decrease was mainly due to the impact of restructuring and cost-reduction initiatives, partially offset by the large fixed component of costs, which does not fluctuate in proportion to the decrease in revenues.

Sports and Entertainment

Revenues: $9.8 million in the fourth quarter of 2016, a $0.3 million (-3.0%) decrease due mainly to higher revenues from concerts and events in the fourth quarter of 2015 following the startup of the Videotron Centre's operations.

Adjusted operating loss: $1.0 million in the fourth quarter of 2016 compared with $3.1 million in the same period of 2015. The $2.1 million favourable variance was due primarily to startup costs for Videotron Centre management operations recognized in the fourth quarter of 2015.

2015/2014 FINANCIAL YEAR COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $3.89 billion, a $271.0 million (7.5%) increase.

- Revenues increased in all segments: Telecommunications ($169.7 million or 6.0% of segment revenues), Media ($112.0 million or 13.0%), and Sports and Entertainment ($16.1 million).

Adjusted operating income: $1.44 billion, a $30.9 million (2.2%) increase.

- Adjusted operating income increased in Telecommunications ($32.6 million or 2.4% of segment adjusted operating income) and in Media ($11.8 million or 20.2%).
- Unfavourable variance in Sports and Entertainment ($8.9 million) and at Head Office ($4.6 million). The decrease at Head Office was due primarily to the unfavourable variance in the fair value of stock options.
- The change in the fair value of Quebecor Media stock options resulted in a $4.9 million favourable variance in the stock-based compensation charge in 2015 compared with 2014. The change in the fair value of Quebecor stock options and the impact of various transactions on the options issued under this program resulted in a $9.6 million unfavourable variance in the Corporation's stock-based compensation charge in 2015.

Net income attributable to shareholders: $151.8 million ($1.24 per basic share) in 2015, compared with a net loss attributable to shareholders of $30.1 million ($0.24 per basic share) in 2014, a favourable variance of $181.9 million ($1.48 per basic share).

- The favourable variance was due primarily to:
  - $166.5 million favourable variance in the charge for restructuring of operations, litigation and other items, including $34.3 million without any tax consequences;
  - $101.4 million favourable variance in gains and losses on valuation and translation of financial instruments, including $102.1 million without any tax consequences;
  - $61.9 million favourable variance in the loss related to discontinued operations;
  - $30.9 million increase in adjusted operating income;
  - $15.3 million decrease in financial expenses;
  - $6.6 million favourable variance in losses on debt refinancing.

  Partially offset by:

  - $149.7 million increase in non-cash charge for impairment of goodwill and other assets, including $60.3 million without any tax consequences;
  - $32.5 million increase in the depreciation and amortization charge;
  - $22.6 million unfavourable variance in non-controlling interest.

Adjusted income from continuing operating activities: $239.9 million ($1.95 per basic share) in 2015, compared with $209.7 million ($1.70 per basic share) in 2014, an increase of $30.2 million ($0.25 per basic share).

Depreciation and amortization charge: $693.6 million in 2015, a $32.5 million increase essentially due to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in the LTE network and expenditures resulting from the promotional strategy focused on equipment leasing, partially offset by the cessation of amortization of spectrum licences in accordance with a change in the estimate of their useful life (*see* "Change in accounting estimates" below).

Financial expenses: $335.0 million, a $15.3 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates and by lower average indebtedness.

Gain on valuation and translation of financial instruments: $6.7 million in 2015 compared with a $94.7 million loss in 2014. The $101.4 million favourable variance was essentially due to the favourable variance, without any tax consequences, in gains (losses) on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $116.9 million gain in 2015 compared with a $49.6 million charge in 2014, a $166.5 million favourable variance.

- On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group and ordered Bell ExpressVu to pay Videotron compensation in the amount of $135.3 million and TVA Group compensation in the amount of $0.6 million, including interest, for failing to implement an appropriate security system in a timely manner to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada denied Bell ExpressVu leave to appeal the decision. A $139.1 million gain on litigation was recorded in the statement of income in 2015. In 2014, the Telecommunications segment recorded a $34.3 million charge (without any tax consequences), including interest, following a trial judgment against Videotron. Videotron has applied for leave to appeal. A $1.0 million interest expense was recorded in 2015 in connection with this ruling.
- In 2015, the Telecommunications segment recognized an $8.8 million charge for restructuring of operations ($1.8 million in 2014), mainly because of migration from analog to digital cable television service. A $9.8 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in 2015 ($6.5 million in 2014). The other segments recorded charges for restructuring of operations of $0.6 million in 2015 ($0.7 million in 2014).
- In 2015, Quebecor's segments also recognized a $2.0 million charge for other items ($6.3 million in 2014).

Charge for impairment of goodwill and other assets: $230.7 million in 2015 compared with $81.0 million in 2014, a $149.7 million unfavourable variance.

- In 2015, Quebecor Media performed impairment tests on its CGUs and concluded that the recoverable amount of its Newspapers and Broadcasting CGUs was less than their carrying amount. The recoverable amount of those CGUs was adversely affected by declining newspaper and commercial printing volumes, and by continuing pressure on advertising revenues in the newspaper and television businesses. Accordingly, an $85.0 million non-cash goodwill impairment charge (without any tax consequences) and an $81.9 million non-cash impairment charge on other assets, relating mainly to the assets of the Mirabel printing plant, were recorded in the Newspapers CGU in 2015. A $60.1 million impairment charge on TVA Network's broadcasting licences (including $30.1 million without any tax consequences) was recognized in the Broadcasting CGU in 2015. A $3.7 million impairment charge on intangible assets was also recognized in 2015 in other segments.
- In 2014, Quebecor Media performed impairment tests on its Newspapers and Broadcasting CGUs. The recoverable amount of those CGUs was adversely affected by market disruption and weakness in the newspaper and television businesses. Accordingly, a $30.0 million non-cash impairment charge (without any tax consequences) was recorded in the Newspapers CGU, as well as a $41.7 million non-cash impairment charge on broadcasting licences (including $20.9 million without any tax consequences), and a $9.3 million non-cash goodwill impairment charge (including $3.9 million without any tax consequences) in the Broadcasting CGU.

Loss on debt refinancing: $12.1 million in 2015 compared with $18.7 million in 2014, a $6.6 million favourable variance.

- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million, at a redemption price of 101.521% of their principal amount, and unwound the related hedges in an asset position. A $0.2 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption, including a $2.1 million net gain previously recorded in "Other comprehensive income."
- In accordance with a notice issued on June 16, 2015, Videotron redeemed, on July 16, 2015, the entirety of its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million, at a redemption price of 103.563% of their principal amount. A $13.6 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption.
- In accordance with a notice issued on March 11, 2015, Videotron redeemed, on April 10, 2015, the entirety of its 6.375% Senior Notes maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million, at a redemption price of 100.00% of their principal amount, and unwound the related hedges in an asset position. A $1.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2015 in connection with this redemption, including a $1.8 million gain previously recorded in "Other comprehensive income."

- In accordance with a notice issued on March 26, 2014, Videotron redeemed, on April 24, 2014, US$260.0 million aggregate principal amount of its outstanding 9.125% Senior Notes issued on March 5, 2009 and maturing on April 15, 2018, at a redemption price of 103.042% of their principal amount. A $21.4 million net loss was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $1.7 million loss previously recorded in "Other comprehensive income."
- In accordance with a notice issued on March 26, 2014, Quebecor Media redeemed, on April 25, 2014, the entirety of its outstanding 7.75% Senior Notes issued on October 5, 2007 and maturing on March 15, 2016, in the aggregate principal amount of US$380.0 million, at a redemption price of 100.00% of their principal amount, and settled the related hedges. A $2.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2014 in connection with this redemption, including a $12.5 million gain previously recorded in "Other comprehensive income."

Income tax expense: $93.1 million (effective tax rate of 23.4%) in 2015 compared with $97.2 million (effective tax rate of 29.0%) in 2014, a $4.1 million favourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The impact of the increase in taxable income was outweighed by one-time items that had a favourable impact on comparative effective tax rates.
- The favourable variance in the effective tax rate was mainly due to the impact of a decrease in deferred income tax liabilities in light of developments in tax audits, jurisprudence and tax legislation.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under “Trend Information” above, the risk analysis in the “Risks and Uncertainties” section below, and the discussion of the Corporation’s financial risks under “Financial Instruments and Financial Risk” below.

Operating activities

Cash flows provided by continuing operating activities: $1.11 billion in 2016 compared with $1.07 billion in 2015.

- The $40.8 million increase was essentially due to:
  - $222.8 million favourable change in operating assets and liabilities, due primarily to favourable variances in the provision for current income taxes, current income tax payments, and inventory in the Telecommunications segment;
  - $63.6 million increase in adjusted operating income in the Telecommunications segment;
  - $7.0 million decrease in the cash portion of financial expenses;
  - $4.5 million decrease in the adjusted operating loss of the Sports and Entertainment segment.

  Partially offset by:
  - $144.9 million unfavourable variance in the cash portion of the charge for restructuring of operations, litigation and other items;
  - $94.8 million increase in current income taxes;
  - $7.8 million increase in adjusted operating loss at Head Office;
  - $6.9 million decrease in adjusted operating income in the Media segment.

Reduced inventory, decreased income tax payments and higher profitability in the Telecommunications segment, along with the $4.5 million reduction in the Sports and Entertainment segment’s adjusted operating loss, plus debt refinancing at lower interest rates, had a positive impact on cash flows provided by continuing operating activities in 2016, while reduced profitability in the Media segment had an unfavourable impact. Receipt of a $139.1 million gain on dispute settlement had a favourable impact on cash flows in 2015.

Working capital: Negative $429.9 million at December 31, 2016 compared with negative $328.1 million at December 31, 2015. The $101.8 million unfavourable variance was mainly due to current variances in activity.

Investing activities

Additions to property, plant and equipment: $707.8 million in 2016 compared with $678.6 million in 2015. The $29.2 million increase, primarily in the Telecommunications segment, was mainly due to investment in the data centres and in expanding the capacity of wired and wireless networks, partially offset by a decrease in additions to property, plant and equipment resulting from the impact of the promotional strategy focused on equipment leasing.

Additions to intangible assets: $139.8 million in 2016 compared with $360.6 million in 2015. The $220.8 million decrease was mainly due to:

- payments totalling $218.8 million in 2015 for the acquisition of spectrum;
- $33.0 million payment to Québec City in 2015 for 25-year naming rights to the new Videotron Centre in the Sports and Entertainment segment.

Partially offset by:

- increased spending on computer hardware and software in the Telecommunications segment in 2016.

Proceeds from disposal of assets: $4.3 million in 2016 compared with $4.6 million in 2015.

Acquisition of non-controlling interest: $500.0 million in 2015. On September 9, 2015, the Corporation's interest in Quebecor Media increased from 75.36% to 81.07% following the repurchase by Quebecor Media of 7,268,324 Common Shares of its capital stock held by CDP Capital for an aggregate purchase price of $500.0 million, payable in cash.

Business acquisitions: $119.5 million in 2016 compared with $94.5 million in 2015.

- In 2016, business acquisitions consisted primarily in the acquisition of Fibrenoire by the Telecommunications segment.
- In 2015, business acquisitions consisted primarily in the acquisition of 4Degrees Colocation by the Telecommunications segment and of Transcontinental magazines by the Media segment.

Disposal of businesses: $3.0 million in 2016 compared with $316.3 million in 2015.

- Business disposals in 2016 consisted of the balance of the selling price for the retail operations of Archambault Group Inc. ("Archambault Group").
- Business disposals in 2015 consisted mainly of the sale of English-language newspaper businesses in Canada in the Media segment, and the sale of Archambault Group's retail operations in the Telecommunications segment.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $293.9 million in 2016 compared with $284.1 million in 2015 (Table 8).

- The $9.8 million favourable variance was mainly due to:
  - $38.1 million increase in cash flows provided by continuing operating activities;
  - $33.0 million payment to Québec City in 2015 for naming rights.

  Partially offset by:
  - $29.2 million increase in additions to property, plant and equipment;
  - increased spending on computer software in the Telecommunications segment in 2016.

Cash flows provided by continuing operating activities of Quebecor	**$ 1,113.0**	$ 1,072.2

Financing activities

Consolidated debt (long-term debt plus bank indebtedness): $203.1 million decrease in 2016; $145.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments.

- Summary of debt reductions in 2016:
  - $108.5 million favourable impact of exchange rate fluctuations. The debt reduction attributable to this item was offset by a decrease in the asset (or increase in the liability) related to cross-currency swap agreements entered under "Derivative financial instruments";
  - $37.4 million reduction in Videotron's total drawings on its secured revolving credit facility;
  - $25.7 million reduction in Quebecor's debt;
  - current payments totalling $18.5 million on the term loan facilities of Videotron, TVA Group and Quebecor Media;
  - repayment of bank indebtedness by Quebecor Media and Videotron totalling $14.9 million.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $808.7 million at December 31, 2016 compared with $953.7 million at December 31, 2015. The $145.0 million net unfavourable variance was mainly due to:
  - unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments;
  - unfavourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.
- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.
- In June 2016, Quebecor amended its revolving credit facility to extend its term to July 2019, Quebecor Media amended its secured revolving credit facility to extend its term to July 2020, and Videotron amended its secured revolving credit facility and its unsecured revolving credit facility to extend their terms to July 2021. Some of the terms and conditions of the credit facilities were also amended.

Financial Position

Net available liquidity: $1.04 billion at December 31, 2016 for Quebecor Media and its wholly owned subsidiaries, consisting of $1.06 billion in available unused revolving credit facilities, less $17.4 million in bank indebtedness. (Pro forma the increase in drawings on Videotron's secured revolving credit facility in connection with the partial redemption on January 5, 2017 of Videotron's 6.875% Senior Notes ("partial redemption of January 5, 2017"), net available liquidity was $863.0 million at December 31, 2016 for Quebecor Media and its wholly owned subsidiaries, consisting of $880.4 million in available unused revolving credit facilities, less $17.4 million in bank indebtedness.)

Net available liquidity: $151.6 million as at December 31, 2016 for Quebecor at the corporate level, consisting of $1.6 million in cash and cash equivalents and $150.0 million in available unused revolving credit facilities.

Consolidated debt (long-term debt plus bank indebtedness): $5.69 billion at December 31, 2016, a $203.1 million decrease compared with December 31, 2015; $145.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments (*see* "Financing activities" above).

- Consolidated debt essentially consisted of Videotron's $3.17 billion debt ($3.28 billion at December 31, 2015); TVA Group's $69.1 million debt ($73.0 million at December 31, 2015); Quebecor Media's $2.41 billion debt ($2.48 billion at December 31, 2015); and Quebecor's $30.6 million debt ($56.3 million at December 31, 2015).

As at December 31, 2016, minimum principal payments on long-term debt in the coming years are as follows:

Table 10
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2017	$	51.8
2018		19.2
2019		56.8
2020		442.5
2021		834.5
2022 and thereafter		4,296.0
Total	**$**	**5,700.8**

Quebecor may (but are under no obligation to) from time to time seek to retire or purchase its outstanding securities including debentures in open market purchases, privately negotiated transactions or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor's consolidated debt was approximately 6.1 years as of December 31, 2016 (6.1 years pro forma the partial redemption of January 5, 2017), compared with 7.0 years at December 31, 2015. After taking into account the hedging instruments, the debt consisted of approximately 83.2% fixed-rate debt (79.6% pro forma the partial redemption of January 5, 2017), compared with 82.5% at December 31, 2015, and 16.8% floating-rate debt (20.4% pro forma the partial redemption of January 5, 2017), compared with 17.5% at December 31, 2015.

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, debt repayments, pension plan contributions, share repurchases and dividend payments (or reduction of paid-up capital by Quebecor Media). The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted operating income). At December 31, 2016, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

- On March 14, 2017, the Board of Directors of Quebecor declared a quarterly dividend of $0.045 per share on its Class A Multiple Voting Shares ("Class A Shares") and Class B Subordinate Voting Shares ("Class B Shares"), payable on April 25, 2017 to shareholders of record at the close of business on March 31, 2017.

Analysis of consolidated balance sheet at December 31, 2016

Table 11
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2016 and 2015
(in millions of Canadian dollars)

	December 31, 2016	December 31, 2015	Difference	Main reasons for difference
Assets				
Accounts receivable	**$ 525.4**	$ 494.1	$ 31.3	Impact of current variances in activity
Inventories	**183.3**	215.5	(32.2)	Impact of current variances in activity
Property, plant and equipment	**3,605.1**	3,424.9	180.2	Additions to property, plant and equipment (*see* "Investing activities" above) and impact of acquisition of Fibrenoire, less depreciation for the period
Intangible assets	**1,224.0**	1,178.0	46.0	Additions to intangible assets (*see* "Investing activities" above) and impact of acquisition of Fibrenoire, less amortization for the period
Goodwill	**2,725.4**	2,678.4	47.0	Impact of acquisition of Fibrenoire less goodwill impairment in Media segment
Derivative financial instruments[1]	**808.7**	953.7	(145.0)	*See* "Financing activities"
Liabilities				
Accounts payable and accrued charges	**705.9**	654.9	51.0	Impact of current variances in activity
Income tax[2]	**28.3**	(19.5)	47.8	Increase in current income taxes
Long-term debt, including short-term portion and bank indebtedness	**5,687.6**	5,890.7	(203.1)	*See* "Financing activities"
Other liabilities	**516.2**	448.2	68.0	Losses on embedded derivatives related to convertible debentures
Deferred income tax[3]	**544.9**	584.2	(39.3)	Net recovery of deferred income tax and tax benefits upon re-measurement of derivative financial instruments

1 Long-term assets less long-term liabilities.
2 Current liabilities less current assets.
3 Long-term liabilities less long-term assets.

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2016, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; principal repayment and interest on convertible debentures; operating lease arrangements; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 12 below shows a summary of these contractual obligations.

Table 12
Contractual obligations of Quebecor as of December 31, 2016
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,700.8**	$ 51.8	$ 76.0	$ 1,277.0	$ 4,296.0
Convertible debentures[2]	**775.5**	–	775.5	–	–
Interest payments[3]	**1,768.5**	257.3	588.6	513.3	409.3
Operating leases	**229.1**	48.7	69.0	30.8	80.6
Additions to property, plant and equipment and other commitments	**1,203.8**	197.7	259.9	217.4	528.8
Derivative financial instruments[4]	**(841.5)**	(17.9)	1.0	(98.0)	(726.6)
Total contractual obligations	**$ 8,836.2**	**$ 537.6**	**$ 1,770.0**	**$ 1,940.5**	**$ 4,588.1**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2016 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B Share at that date, subject to a floor price of $19.25 per share and a ceiling price of $24.0625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2016.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 12

Videotron leases sites for its LTE network under operating lease arrangements and has contracted long-term commitments to acquire equipment for a total future consideration of $85.1 million.

In 2011, Quebecor Media announced an agreement with Québec City for the leasing and management of the Videotron Centre. As at December 31, 2016, the balance of those commitments stood at $75.5 million.

In 2012 and 2014, Quebecor Media signed 20-year agreements to install, maintain and advertise on bus shelters belonging to the Montréal and Laval transit commissions. In 2015, a similar 10-year agreement was signed with the Lévis transit commission. As at December 31, 2016, the balance of those commitments stood at $99.1 million.

In May 2013, Videotron and Rogers Communications signed a set of service sharing and exchange agreements, including a 20-year agreement to build out and operate an LTE network in Québec and the Ottawa area. As at December 31, 2016, the balance of those commitments stood at $273.5 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2016, the balance of those commitments stood at $727.4 million.

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans are $30.5 million for 2017, based on the most recently filed actuarial report (contributions of $36.9 million were made in 2016).

Related party transactions

In 2016, the Corporation made sales to affiliated corporations in the amount of $3.0 million ($3.3 million in 2015). The Corporation made no purchases and incurred no rental expenses with related parties in 2016 ($3.4 million in 2015, included under purchases of goods and services). The sales were accounted for at the consideration agreed between the parties.

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms), and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2016, the maximum exposure with respect to these guarantees was $24.2 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation's subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default on certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

Capital stock

In accordance with Canadian financial reporting standards, Table 13 below presents information on the Corporation's capital stock as at February 15, 2017. In addition, 1,020,000 share options were outstanding as of February 15, 2017.

Table 13
Capital stock
(in shares and millions of Canadian dollars)

	February 15, 2017	
	Issued and outstanding	Book value
Class A Shares	38,789,672	$ 8.6
Class B Shares	82,810,092	$ 313.7

On July 29, 2015, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 500,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of July 29, 2015. The purchases were made between August 13, 2015 and August 12, 2016 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All the repurchased shares were cancelled.

On August 3, 2016, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 500,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 2,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of August 3, 2016. The purchases can be made from August 15, 2016 to August 14, 2017 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2016, the Corporation purchased and cancelled 609,300 Class B Shares for a total cash consideration of $22.7 million (413,300 Class B Shares for a total cash consideration of $12.4 million in 2015). The $20.4 million excess of the purchase price over the carrying value of the repurchased Class B Shares was recorded in reduction of retained earnings ($10.8 million in 2015).

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Competition and technological development

In its cable business, Quebecor Media competes against incumbent local exchange carriers (or "ILECs"). The primary one in Quebecor Media's market holds a regional licence to provide terrestrial broadcasting distribution in Montréal and in several other communities in the Province of Québec. That primary ILEC is rolling out its own Internet protocol television (or "IPTV") service throughout the country and, more specifically, in Montréal (including a portion of the greater Montréal area), Québec City, and in other locations in the Province of Québec. It has also secured licences to launch video distribution services using video digital subscriber line (or "VDSL") technology. Quebecor Media's cable business competes against providers of direct broadcast satellite (or "DBS", which in Canada are also referred to as "DTH" for "direct-to-home" satellite providers), multichannel multipoint distribution systems, and satellite master antenna television systems. The direct access to some broadcasters' websites that provide streaming in HD of video-on-demand content is also available for some of the channels that Quebecor Media offers in its television programming. In addition, some third-party Internet service providers ("ISPs") have launched Internet Protocol video services ("IP video services") in territories where Quebecor Media provides services.

Quebecor Media also faces competition from illegal providers of cable television services and illegal access to non-Canadian DBS (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy). Competitors in the video business also include emerging content delivery platforms. Furthermore, over-the-top ("OTT") content providers, such as Netflix, Apple TV and Amazon Prime Video, as well as Canadian services such as Crave TV, compete for viewership and for a share of the monthly entertainment spending currently allocated to traditional cable television and cable service video-on-demand offerings.

Unlike Quebecor Media, OTT service providers are not subject to Canadian Radio-television and Telecommunications Commission's ("CRTC") regulations and do not have to contribute financially to the Canadian traditional television business model or Internet infrastructure. Furthermore, foreign providers with no Canadian business place are not required to charge federal and provincial sales tax. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial conditions, and results of operations.

In its Internet access business, Quebecor Media competes against other ISPs offering residential and commercial Internet access services as well as WiMAX and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line (“DSL”), fibre to the node and fibre to the home technologies, often offering comparable download speeds to Quebecor Media’s. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to Quebecor Media’s low and medium download speeds. The CRTC also requires cable and ILEC network providers, including Quebecor Media, to offer wholesale access to their high-speed Internet systems to third-party ISP competitors for them to provide retail Internet access services. Those third-party ISP competitors may also provide telephony, IP video services and networking applications.

Quebecor Media’s cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators, and other providers of telephony, voice over Internet Protocol (or “VoIP”) and Internet communications, including competitors that are not facility-based and therefore have a much lower infrastructure cost. In addition, Internet protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media’s business, prospects and results of operation.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current or developing adjunct technologies, such as Wi-Fi, “hotspots” or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides, or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and have been operating for many years lower-cost mobile telephony brands in order to acquire additional market share. In the near future, depending on new regulations, Quebecor Media could see the emergence of non-facility-based operators in the wireless space. Also, Quebecor Media may not be able to compete successfully in the future against existing or potential competitors, and increased competition could have a material adverse effect on its business, prospects, revenues, financial condition, and results of operations.

Due to ongoing technological developments, the distinction between traditional platforms (broadcasting, Internet and telephony) is fading rapidly. For instance, emerging Go Platforms such as HBO Go, allow customers to view their traditional television content directly on their mobile devices or computers via Internet connection (although authentication as a broadcasting distribution undertaking’s subscriber is still required in Canada). Also, the Internet, through wired and mobile devices, is becoming an important broadcasting and distribution platform. In addition, mobile operators, with the development of their Long-Term Evolution (also known as “LTE”) networks, are now offering wireless and fixed wireless Internet services. In addition, Quebecor Media’s VoIP telephony service also competes with Internet-based solutions.

Moreover, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television or IPTV, Internet, residential and mobile telephony services). As a result, should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing up to one subscriber for each of its services. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operation.

Fierce price competition in all Quebecor Media’s businesses and across the industries in which it operates may affect Quebecor Media’s ability to raise the price of its products and services in line with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operation.

Significant and rapid technological changes in Media segment

In relation to the Corporation’s Media segment, the media industry is experiencing rapid and significant technological changes, which have resulted in alternative means of program and content transmission. The continued growth of the Internet has presented alternative content distribution options that compete with traditional media. Consumers are spending an increasing amount of time on the Internet and on mobile devices, and are increasingly viewing content on a time-delayed or on-demand basis from the Internet, on their televisions and on portable devices. These alternative technologies may increase audience fragmentation, reduce the Media segment business’s ratings, readership or circulation levels or have an adverse effect on advertising revenues from local and national advertisers. Furthermore, in Quebecor Media’s video distribution markets, industry regulators have authorized DTH, microwave services and VDSL services, and may authorize other alternative methods of transmitting television and other content with improved speed and quality.

The continuous technological improvements to the Internet, combined with higher download speeds and cost reductions for customers, may divert a portion of Quebecor Media’s Media business’ existing television subscriber base from its services to new video-over-the-Internet model. While having a positive impact on the demand for its Internet services, video-over-the-Internet could adversely impact the demand for its other services.

Quebecor Media may not be able to successfully compete with existing or newly developed alternative technologies, such as IPTV, or it may be required to acquire, develop or integrate new technologies. The cost of the acquisition, development or implementation of new technologies could be significant and its ability to fund such implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition, and results of operations.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world (including Canada, the United States and Europe), and has established worldwide coverage. Should it be unable to extend its worldwide coverage, or to renew or substitute for those roaming agreements at their respective or better terms or on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably.

In addition, if Quebecor Media is unable to renew, or substitute for, those roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, financial condition and results of operations could be adversely affected.

Moreover, since 2015 in Canada, the CRTC has decided that each of the three national wireless incumbent carriers would be obliged to provide wholesale roaming services to regional (including Videotron) and new entrant carriers at cost-based rates. A tariff proceeding is currently underway to determine these rates. The result of the wholesale roaming tariff proceeding may have an impact on Quebecor Media roaming cost structure and on the types of retail packages it is able to offer its customers in this regard.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, it cannot be assured that it will continue to enjoy a good reputation, nor can it be assured that events that are beyond its control will not cause its reputation to be negatively impacted. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition, and results of operations.

Higher handset subsidies and increase in bring-your-own-device (“BYOD”) customers

Quebecor Media’s mobile telephony business model is based substantially on subsidizing the cost of subscriber handsets, similar to other Canadian wireless carriers. This model attracts customers and in exchange they commit to a term contract. Quebecor Media also commits to a minimum subsidy per unit with the supplier of certain smartphone devices. If Quebecor Media is unable to recover the costs of the subsidies over the term of the customer contract, this could negatively impact its business, financial condition, and results of operations.

Also, with the CRTC’s Wireless Code introduced in 2013 limiting wireless term contracts to two years from three years, the number of BYOD customers with no-term contracts has increased. Such customers are under no contractual obligation to remain with Quebecor Media, which could have a material adverse effect on its churn rate and, consequently, on its business, financial condition and results of operations.

Inventory obsolescence

Quebecor Media’s various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

Quebecor Media’s strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its network and infrastructure to support growth in its customer base and its demands for increased bandwidth capacity and other services. In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its network and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short term, mid term and long term in order to expand and maintain its networks, systems and services, including expenditures relating to advancements in Internet access, HD, UHD television and TV everywhere/every platform requiring IP delivery technology, the introduction of virtual reality, as well as the cost of its mobile services infrastructure deployment, maintenance and enhancement.

The demand for wireless data services has been growing at high rates and it is projected that this demand will further accelerate, driven by increases in the following: levels of broadband penetration; need for personal connectivity and networking; affordability of smartphones and Internet-only devices (e.g., high-usage data devices such as mobile Internet keys, tablets and electronic book readers); multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum, if available and if economically reasonable, in order to address this increased demand. The ability to acquire additional spectrum (if needed) is dependent on the timing and the rules established by Innovation, Science and Economic Development ("ISED") Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

The development, maintenance and enhancement of Quebecor Media's LTE network requires capital expenditures to remain competitive and to comply with its obligations under the agreement with its partner governing the joint build-out of its LTE network. A geographical expansion or densification of its LTE network may require Quebecor Media to incur significant costs and to make significant capital expenditures.

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to finance any portion of these capital improvement programs, new strategies and services, or other capital expenditure requirements, whether through cash from operations, additional borrowings or other sources. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected. Even if Quebecor Media were able to obtain adequate funding, the period of time required to upgrade its network could have a material adverse effect on its ability to successfully compete in the future. Moreover, additional investments in its business may not translate into incremental revenues, cash flows or profitability.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable network. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the *"Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies on its service territory. Should Quebecor Media seek to renew or renegotiate those agreements, it cannot guarantee that they will continue to be available on their respective terms, or on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, maintaining its advanced broadband network, pursuing enhanced content development to reduce costs, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its business. Quebecor Media may not be able to implement those strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement those strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, and other factors described in this section. While the centralization of certain business operations and processes has the advantage of standardizing practices, thereby reducing costs and increasing effectiveness, it also represents a risk in itself should a business solution implemented throughout the organization by a centralized office fail to produce the intended results. Quebecor Media may also be required to make capital expenditures or other investments that may affect its ability to implement its business strategies if it is unable to secure additional financing on acceptable terms or to generate sufficient funds internally to cover those requirements. Any material failure to implement its strategies could have a material adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating expenditures in the future. It can provide no assurance that it will be successful in developing new activities in relation to those engagements, including the development of new revenue sources.

Consumers' trend to abandon cable telephony and television services

The recent trend toward mobile substitution or "cord-cutting" (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada and the various unlimited offers launched by mobile operators. In addition, there is also a consumer trend to abandon and substitute wire and cable television for

Internet access services in order to stream directly from broadcasters and OTT content providers. Quebecor Media may not be successful in converting its existing cable telephony subscriber base to its mobile telephony services or in attracting customers to its OTT entertainment platforms, which could have a material adverse effect on its business, results of operation and financial condition.

Rapid growth of traffic volumes on the Internet

Internet users are downloading an increasing amount of data each year and households are now connected to the Internet through a combination of several computers, tablets and other mobile devices, leading to simultaneous flows per home, which constitutes a departure from the past, when a majority of households were connected to the Internet through a single computer. In addition, some content on the Internet, such as videos, is now available at a higher bandwidth for which HD, as opposed to standard definition, has become the norm. OTT service providers have recently started streaming UHD content, which uses even more bandwidth than HD services. There has therefore been an increase in data consumption and an intensification of Internet traffic during peak periods, which calls for increased bandwidth capacity to address customer needs.

Equipment costs are under pressure in an effort to counterbalance customer demand for bandwidth. While Quebecor Media can relay some of this pressure on costs to its manufacturers, can adopt new technologies that reduce costs or implement other cost-reduction initiatives, Quebecor Media's inability to fully meet its customers' increasing need for bandwidth may result in price increases or in reduced profitability.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, financial condition, prospects, or results of operations. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has recently made, and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant capital expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that management may not be able to successfully manage the development of its Sports and Entertainment business; that the development of the Sports and Entertainment business may place significant demands on management, diverting attention from existing operations; that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the development of its Sports and Entertainment business; and the risk associated with a failure to make continued investments in its Sports and Entertainment business in order to respond to consumer trends and demands, which could adversely affect its ability to compete in the sports and entertainment industry.

Implementation of changes to the structure of its business

Quebecor Media has and will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement and upgrade, a process redesign, and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may lead to greater-than-expected operational challenges and costs, expenses, customer loss, and business disruption for Quebecor Media, which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor's failure to recruit, train and retain such employees could have a material adverse effect on its business, financial condition and results of operations. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance and maintain content quality; it must continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations, and financial condition.

Competition for advertising, circulation revenues/audience

Advertising revenue is the primary source of revenue for the Corporation's Media segment. Quebecor Media's revenues and operating results in those businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Those economic factors affect the levels of retail and national advertising revenue of the media properties of Quebecor Media. Since a significant portion of Quebecor Media's advertising revenue is derived from retail and automotive sector advertisers, weakness in those sectors and in the real estate industry has had, and may continue to have an adverse impact on the revenues and results of operations of the Media segment. Continuing or deepening softness in the Canadian or U.S. economy could further adversely affect key national advertising revenues.

Advertising revenues for the Media segment are also driven by readership and circulation levels, as well as by market demographics, price, service, and advertiser results. Readership and circulation levels tend to be based on the content of the newspaper or magazine, service, availability and price. A prolonged decline in readership and circulation levels in Quebecor Media's newspaper and magazine businesses and lack of audience acceptance of its content would have a material effect on the rate and volume of its newspaper and magazine advertising revenues (as rates reflect circulation and readership, among other factors), and could also affect its ability to institute circulation price increases for its print products, all of which could have a material adverse effect on its business, prospects, results of operations, and financial condition.

The newspaper and magazine industry is experiencing structural changes, including the growing availability of free access to media, shifting readership habits, digital transferability, the advent of real-time information and secular changes in the advertising industry, as well as the declining frequency of regular newspaper and magazine buying, particularly among young people, who increasingly rely on non-traditional media as a source for news and information. As a result, competition for advertising spend and circulation revenues comes not only from other newspapers and traditional media, but also from digital media technologies, which have introduced a wide variety of media distribution platforms (including, most significantly, the Internet and distribution over wireless devices and e-readers) for readers and advertisers.

While Quebecor Media continues to pursue initiatives to offer value-added advertising solutions to its advertisers and to maintain its circulation base, such as investments in the re-design and overhaul of its newspaper and magazine websites and the publication of e-editions of a number of its newspapers and magazines, it may not be successful in retaining its historical share of advertising revenues or in transferring its audience to its new digital products. The ability of the Media segment to grow and succeed over the long-term depends on various factors, including its ability to attract advertisers and readers (including subscribers) to its online sites. Quebecor Media's new initiatives, developed to generate additional revenues from its websites (such as digital platform advertising and/or the paywall revenue model), may not be accepted by users and consequently may negatively affect online traffic. In addition, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of those initiatives through increased circulation, advertising and digital revenues.

In broadcasting, the proliferation of television channels, progress in mobile and wireless technology, the migration of television audiences to the Internet and the viewing public's increased control over the manner, content and timing of their media consumption through personal video recording devices, have all contributed to the fragmentation of the television viewing audience and to a more challenging advertising sales environment. For example, the increased availability of personal video recording devices and video programming on the Internet, as well as the increased access to various media through mobile devices, may each have the potential to reduce the viewing of its content through traditional distribution outlets. Some of these new technologies also give consumers greater flexibility to watch programming on a time-delayed or on-demand basis, or to fast-forward or skip advertisements within its programming, which may adversely impact the advertising revenues it receives. Delayed viewing and advertisement skipping have the potential to become more common as the penetration of personal video recording devices increases and content becomes increasingly available via Internet sources. If the broadcasting market continues to fragment, Quebecor Media's audience share levels and its advertising revenues, results of operations, financial condition, business and prospects could be materially adversely affected.

Distribution of a wide range of television programming

The financial performance of its cable and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing, conveniently scheduled television programming at reasonable rates on its platforms. Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, those suppliers have become vertically integrated and are now more limited in number. The quality and amount of television programming offered by Quebecor Media affect the attractiveness of its services to customers and, accordingly, the rates Quebecor Media can charge for such services. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates, or its inability to pass-through rate increases to its customers could have a material adverse effect on its business, financial condition, results of operations, and prospects.

In addition, Quebecor Media's ability to attract and retain cable customers depends, to a certain extent, on its capacity to offer quality content, HD and UHD programming, an appealing variety of programming choices and packages, as well as multiplatform distribution and on-demand content at competitive prices. If the number of specialty channels being offered does not increase at the level and pace comparable to its competitors, if the content offered on such channels does not receive audience acceptance, or if it is unable to offer multiplatform availability, HD and UHD programming and on-demand content for capacity reasons, among others, this may have a negative impact on revenues from Quebecor Media's cable operations.

The multiplicity of foreign and deregulated content providers (often global players on the Internet) puts pressure on the viability of Quebecor Media's current business model for television distribution. Substantial capital expenditures on infrastructure and on research and development may be required to remain competitive.

Costs, quality, and variety of television programming

The most significant expenses in television broadcasting are programming and production costs. Increased competition in the television broadcasting industry, developments affecting producers and distributors of programming content, the vertical integration of distributors and broadcasters, introduction from various OTT providers of original and exclusive programming, changes in viewer preferences and other developments could impact both the availability and the costs of programming content, as well as production costs. Future increases or volatility in programming and production costs could adversely affect Quebecor's operating results. Developments in cable, satellite or other forms of distribution could also affect both the availability and the cost of programming and production and increase competition for advertising expenditures. As well, the value of royalties payable pursuant to the *Copyright Act* (Canada) are frequently decided by the Copyright Board of Canada during or even after the applicable period, which can cause retroactive increases in content costs.

Launch of new specialty services

Quebecor Media is investing in the launch of new specialty services in its Broadcasting operations. During the period immediately following the launch of a new specialty service, subscription revenues are always relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize, or may never materialize.

Loss of key customers

The Corporation's businesses are based primarily on customer satisfaction with reliability, timeliness, quality, and price. In general, Quebecor Media does not have long-term or exclusive service agreements with its customers. Quebecor Media is unable to predict if, or when, its customers will purchase its services. There can be no assurance that the revenues generated from key customers, individually or in the aggregate, will reach or exceed historical levels in any future period, or that it will be able to develop relationships with new customers. Quebecor Media cannot assure that it will continue to maintain favourable relationships with its customers or that they will not be adversely affected by economic conditions.

Single-clustered network

Quebecor Media provides its digital television, Internet access, cable telephony and mobile telephony services through a primary headend and its analog television services through 12 additional regional headends in a single clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as cyberattacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its network until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation.

Cybersecurity

The ordinary course of Quebecor Media's telecommunications and data-storage businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, as well as personally identifiable information on its customers and employees, whether in its data centres, systems, infrastructure, networks and processes, or those of its suppliers. The secure processing, maintenance and transmission of this information is critical to its operations and business strategy.

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against unauthorized access to, or use of sensitive data, including data on its customers, and to prevent data loss, and although ever-evolving cyberthreats require Quebecor Media to continually evaluate and adapt its data centres, systems, infrastructure, networks and processes, Quebecor Media cannot assure that its data centres, systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against all information security access by third parties or errors by employees or by third-party suppliers. If Quebecor Media is subject to a significant cyberattack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation.

In addition, the preventive actions Quebecor Media takes to reduce the risks associated with cyberattacks, including protection of its data centres, systems, infrastructure, networks and processes, as well as efforts to improve the overall governance over information security and the controls within its IT systems, may be insufficient to repel or mitigate the effects of a major cyberattack in the future.

Protection of personal data

Quebecor Media stores and processes increasingly large amounts of personally identifiable information on its clients, employees, and/or business partners. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data in, and hosted on its systems, or those belonging to its suppliers, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed systems, processes and security controls that are designed to protect the personally identifiable information on its clients, employees and business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breach relating to such data that Quebecor Media stores or processes or that its suppliers store or process. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers. An inability to maintain and enhance its existing information technology systems, or to obtain new systems to accommodate additional customer growth or support new products and services, could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, and manage operating expenses, all of which could adversely impact its financial results and position.

Malicious and abusive Internet practices

Quebecor Media's cable data, mobile data and fibre-optic connectivity business customers utilize its network to access the Internet and, as a consequence, Quebecor Media or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms, and other destructive or disruptive software. Such activities could have adverse consequences on its network and its customers, including deterioration of service, excessive call volumes to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its network. Any significant loss of cable data, mobile data or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, financial condition, and results of operations.

Protection from piracy

In its cable television, Internet access, OTT and telephony business, Quebecor Media may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its network, analog and digital programming, and Internet access services. It uses encryption technology to protect its cable signals and OTT from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its network, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Third-party suppliers and providers

Quebecor Media depends on third-party suppliers and providers for certain services, hardware and equipment that are critical to its operations and network evolution. These materials and services include set-top boxes, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, software, the "backbone" telecommunications network for Internet access and telephony services, and construction services for the expansion of and upgrades to its cable and mobile networks. These services and equipment are available from a limited number of suppliers and Quebecor Media therefore faces the risks of supplier disruption, including business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards, or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services and other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with content providers, comply with their technological requirements, or find alternative sources of equivalent content, its Media operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor's reputation, results of operations, liquidity or financial position, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Strikes and other labour protests

At December 31, 2016, 54% of Quebecor Media's employees were represented by collective bargaining agreements. Through its subsidiaries, Quebecor Media is currently party to 31 collective bargaining agreements.

Quebecor Media is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial position, results of operations, and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund those pension plans will not increase in the future and therefore negatively impact its operating results and financial position. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes and cable modems, certain mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2016, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favorable terms, or at all, in the future.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2016, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $808.7 million on a consolidated basis.

Some of its suppliers source their products out of the U.S., therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations to the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, changed or increased regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to conserve cash until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as those could adversely impact Quebecor's results of operations, cash flows, financial position and prospects.

Ethical business conduct

Any failure or perceived failure to adhere to Quebecor's policies, the law or ethical business practices could significantly affect its reputation and brands and could therefore negatively impact its financial performance. Quebecor's framework for managing ethical business conduct includes the adoption of a Code of Ethics, which its directors and employees are required to acknowledge and agree to on a regular basis, and, as part of an independent audit and security function, maintain a whistle-blowing hotline. There can be no assurance that these measures will be effective enough to prevent violations or perceived violations of law or ethical business practices.

Asset impairment charges

In the past, the Corporation has recorded, asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flow.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues, and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause a diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel, and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, or the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In the Quebecor Media's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its telecommunications business' competitors have pursued a strategy of selling their products through independent retailers to extend their presence on the market, while some have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of Quebecor Media's retail network and may contribute to isolating Quebecor Media from its competitors, which could have an adverse effect on its business, prospects and results of operation.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licences. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. Although the federal government eliminated the foreign ownership restrictions on telecommunications companies with less than 10% of total Canadian telecommunications market revenues, there are significant restrictions on the ability of non-Canadian entities to own or control broadcasting licences and telecommunications carriers in Canada. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licences, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. For instance, the CRTC introduced recently some form of rate regulation following its commonly referred to "Lets talk TV" public consultation on television broadcasting and distribution. Consequently, Quebecor Media must offer a reduced basic service at $25 since March 1, 2016 and offer all specialty services "à la carte", since December 1, 2016. Moreover, the CRTC adopted a Wireless Code which regulates numerous aspects of the provision of retail wireless services and, coming into effect September 1, 2017, a new Television Service Provider Code which will regulate numerous aspects of the provisions of retail television services. Quebecor Media's wireless and cable operations are also subject to technical requirements, licence conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

In addition, laws relating to communications, data protection, e-commerce, direct marketing, and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes to the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions, may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of licence, the issuance of new licences, including additional spectrum licences, to its competitors, or changes to the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), financial condition, prospects, and results of operations. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. It is difficult to predict in what form laws and regulations will be adopted or how they will be construed by the relevant courts or the extent to which any changes might adversely affect Quebecor Media.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographic products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes to the policies or rules of application in Canada or in any of its provinces in connection with government incentive programs, including any change in the Québec or federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its financial condition and results of operations. Canadian content programming is also subject to certification by various federal government agencies. If programs fail to so qualify, the Corporation would not be able to use the programs to meet its Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

To ensure that the Corporation maintains minimum levels of Canadian ownership under the *Broadcasting Act* and other legislation under which it derives the benefit of tax credits and industry incentives, it has placed constraints on the issuance and transfer of shares of certain of its subsidiaries.

In addition, the Canadian and provincial governments currently provide grants and incentives to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation's Film Production & Audiovisual Services Business, as well as content producers for its television broadcasting and production operations, finance a portion of their production budgets through Canadian government incentive programs, including federal and provincial tax credits. There can be no assurance that the government grants and incentive programs presently being offered to participants in the film and television production industry will continue at their present levels or at all. If such grants or incentives are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced and, as a result, the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions around the world, including by many states in the U.S. Some producers may select locations other than Québec to take advantage of tax credit programs that they conclude to be more or as attractive as those Québec offers. Other factors such as director or star preference may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation's business, financial condition and results of operations.

Licence renewals

Videotron's AWS-1 licences were issued in December 2008 for a 10-year term. AWS-1 licence renewal, including whether licence fees should apply for a subsequent licence term, will be the subject of a public consultation process expected to be initiated in the coming months.

Videotron's other spectrum licenses, including in the AWS-3, 700 MHz and 2500 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of those respective terms, applications may be made for new licences for a subsequent term through a renewal process, unless a breach of licence conditions by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licences, including the terms and conditions of the new licences and whether licence fees should apply for a subsequent licence term, are expected to be determined by ISED Canada following public consultations.

If, at the end of their respective term, the licences are not renewed on acceptable terms, or at all, Quebecor Media's ability to continue to offer its wireless services, or to offer new services, may be negatively impacted and, consequently, it could have a material adverse effect on its business, financial condition, prospects, and results of operations.

Provision of third-party ISPs with access to cable systems

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide third-party ISPs with access to their cable systems at mandated cost-based rates. Several third-party ISPs are interconnected to Quebecor Media's cable network and are thereby providing retail Internet access services.

In a decision issued on July 22, 2015, the CRTC ordered substantial changes to the framework for the provision of wholesale services to third-party ISPs. The provision of aggregated services will no longer be mandated and will be phased out in conjunction with the implementation of a new mandatory disaggregated service which will involve third-party ISPs provisioning their own regional transport services. This disaggregated service will also include, for the first time, mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. A tariff proceeding is under way to set the rates for this new disaggregated wholesale service. In parallel, on October 6, 2016, the CRTC ordered a significant interim reduction to the tariff rates for the existing aggregated wholesale service. A second tariff proceeding is under way to set revised final rates for the aggregated service while work moves forward on implementing the disaggregated service. As a result of these proceedings, Quebecor Media may experience increased competition for retail cable Internet and telephony customers. In addition, because its third-party Internet access rates are regulated by the CRTC, the Corporation could be limited in its ability to recover its costs associated with providing this access.

Environmental laws and regulations

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have recently implemented Extended Producer Responsibility regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products," which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain studios and vacant lots, some of which are located on a former landfill, with the presence of gas-emitting waste. As a result, the operation and ownership of these studios and vacant lots carries an inherent risk of environmental and health and safety liabilities for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs, and other environmental damages (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in being involved from time to time in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Concerns about alleged health risks relating to radiofrequency emissions

All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied meets all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations. Videotron is currently a defendant, along with all other major wireless providers in Québec, in an authorization demand for a class action on this particular concern.

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2016, it had $5.69 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2016, it had approximately $1.36 billion available for additional borrowings under its existing credit facilities on a consolidated basis ($1.18 billion pro forma the partial redemption on January 5, 2017) and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;
- create liens;

- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities, its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including its Senior Notes. If Quebecor's indebtedness is accelerated, Quebecor may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flow of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flow from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flow and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flow to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, financial condition, results of operations and prospects.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favorable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's Directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. As of December 31, 2016, approximately 74.25% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock-in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
As of December 31, 2016
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold		Notional amount bought	
Videotron					
Less than 1 year	1.3249	$	220.2	US$	166.2
2017[1]	1.3849	US$	260.0	$	360.1

[1] *See* footnote 1 below "Cross-currency interest rate swaps" table.

Interest rate swaps

Maturity	Notional amount		Pay/ receive	Fixed rate	Floating rate
TVA Group					
2017	$	33.0	Pay fixed/ Receive floating	2.03%	Bankers' acceptance 1 month

Cross-currency interest rate swaps

Hedged item	Hedging instrument				
	Period covered	Notional amount		Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media					
5.750% Senior Notes due 2023	2016 to 2023	US$	431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$	418.7	6.85%	0.9759
Term loan "B"	2013 to 2020	US$	338.6	Bankers' acceptance 3 months + 2.77%	1.0346

Cross-currency interest rate swaps (continued)

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024[1]	2008 to 2017	US$ 260.0	9.21%	1.2965
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039

1 Videotron initially entered into these cross-currency interest rate swaps to hedge the foreign currency risk exposure under its 9.125% Senior Notes due 2018 redeemed in 2014. These swaps are now used to set in CAN dollars all coupon payments through 2017 on US$441.4 million of notional amount under its 5.375% Senior Notes due 2024 and issued in 2014. In conjunction with the repurposing of these swaps, Videotron has entered into US$260.0 million offsetting foreign exchange forward contracts to lock in the value of its hedging position related to the December 15, 2017 notional exchange.

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses or gains on valuation and translation of financial instruments for 2016 and 2015 are summarized in Table 15.

Table 15
Loss (gain) on valuation and translation of financial instruments
(in millions of Canadian dollars)

	2016	2015
Loss (gain) on embedded derivatives related to convertible debentures	**$ 68.2**	$ **(10.5)**
Loss (gain) on the ineffective portion of fair value hedges	**2.0**	**(3.6)**
Loss on the ineffective portion of cash flow hedges	**0.1**	**1.6**
(Gain) loss on embedded derivatives related to long term debt	**(0.2)**	**6.2**
Loss (gain) on reversal of embedded derivatives on debt redemption	**0.2**	**(0.4)**
	$ 70.3	$ **(6.7)**

A loss on cash flow hedges of $30.9 million was recorded under “Other comprehensive income” in 2016 (gain of $14.0 million in 2015).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or of the Corporation.

The fair value of early settlement options recognized as embedded derivatives and embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long term debt, convertible debentures and derivative financial instruments as of December 31, 2016 and December 31, 2015 are as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

	December 31, 2016		December 31, 2015	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1,2]	**$ (5 700.8)**	**$ (5 866.6)**	$ (5 892.5)	$ (5 894.9)
Convertible debentures[3]	**(780.0)**	**(780.0)**	(706.4)	(706.4)
Derivative financial instruments[4]				
Early settlement options	**0.4**	**0.4**	1.0	1.0
Foreign exchange forward contracts[5]	**2.5**	**2.5**	9.3	9.3
Interest rate swaps	**(0.3)**	**(0.3)**	(0.8)	(0.8)
Cross-currency interest rate swaps[5]	**806.5**	**806.5**	945.2	945.2

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of the long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $808.7 million as of December 31, 2016 ($953.7 million as of December 31, 2015).

5 The value of foreign exchange forward contracts entered into to lock in the value of existing hedging positions is netted from the value of the offset financial instruments.

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2016, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2016, 13.0% of trade receivables were 90 days past their billing date (10.4% as of December 31, 2015) of which 32.5 % had an allowance for doubtful accounts (40.4% as of December 31, 2015).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2016 and 2015:

		2016		2015
Balance at beginning of year	**$**	**23.0**	$	21.8
Charged to income		**36.1**		32.1
Utilization		**(31.0)**		(30.9)
Balance at end of year	**$**	**28.1**	$	23.0

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 6.1 years as of December 31, 2016 (6.1 years pro forma the partial redemption on January 5, 2017), compared to 7.0 years as of December 31, 2015 (*see* also "Contractual Obligations" above).

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market-risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2016, to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures, and to lock in the value of certain derivative financial instruments through offsetting transactions. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on Other comprehensive income, before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2016 is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of $0.10	**$ 2.0**	**$ 43.0**
Decrease of $0.10	**(2.0)**	**(43.0)**

A variance of $0.10 in the 2016 average exchange rate of CAN dollar per one U.S. dollar would had resulted in a variance of $4.0 million on unhedged purchase of goods and services in 2016 and $6.5 million on unhedged acquisitions of tangible and intangible assets in 2016.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2016, after taking into account the hedging instruments, long-term debt was comprised of 83.2% fixed-rate debt (79.6% pro forma the partial redemption on January 5, 2017), compared to 82.5% as of December 31, 2015 and 16.8% floating-rate debt (20.4% pro forma the partial redemption on January 5, 2017), compared to 17.5% as of December 31, 2015.

The estimated sensitivity on interest payments, of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2016 was $8.2 million.

The estimated sensitivity on income and on Other comprehensive income, before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments as of December 31, 2016, as per the Corporation's valuation models, is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of 100 basis points	**$ (2.4)**	**$ (37.3)**
Decrease of 100 basis points	**2.4**	**37.3**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance of new debt, the repayment of existing debt using cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, derivative financial instruments, less cash and cash equivalents. The capital structure as of December 31, 2016 and 2015 was as follows:

Table 17
Capital structure of Quebecor
(in millions of Canadian dollars)

		2016		2015
Bank indebtedness	**$**	**18.9**	$	34.3
Long-term debt		**5,668.7**		5,856.4
Embedded derivatives related to convertible debentures		**290.0**		221.7
Convertible debentures		**500.0**		500.0
Derivative financial instruments		**(808.7)**		(953.7)
Cash and cash equivalents		**(22.3)**		(18.6)
Net liabilities		**5,646.6**		5,640.1
Equity	**$**	**847.2**	$	652.0

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, the declaration and payment of dividends or other distributions.

Contingencies

There are a number of legal proceedings against the Corporation and its subsidiaries that are pending. In the opinion of the management of the Corporation and its subsidiaries, the outcome of those proceedings is not expected to have a material adverse effect on Corporation's results or on its financial position.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under "Deferred revenue" when customers are invoiced.

<u>Telecommunications</u>

The Telecommunications segment provides services under arrangements with multiple deliverables, for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony and over-the-top video service, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and over-the-top video service are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related

equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;

- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines, or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers, magazines, books and entertainment products are recognized on delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment leasing revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from leasing, and from ticket (including season tickets), food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising under the form of venue signage or sponsorships, are recognized ratably over the period of the agreement;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, other intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets.

In addition, when determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU.

Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2016 was $2.73 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2016 was $781.5 million.

Useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and the future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changes its conclusion in the future, as it did in 2015.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on interest and principal payments on foreign currency denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge: (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt, and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the

interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in "Other comprehensive income" until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated Other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

The judgment used in determining the fair value of derivative financial instrument including embedded derivatives, using valuation and pricing models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, and the value of the gain or loss on derivative financial instruments recorded in the consolidated statements of comprehensive income. Also, valuation and financial models are based on a number of assumptions including future cash flows, period-end swap rates, foreign exchange rates, credit default premium, volatility, discount factors, and underlying instrument adjusted implicit interest rate and credit premium.

In addition, judgment is required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Determination of the fair value of the embedded derivatives is based on a number of assumptions, including contractual future cash flows, volatility and discount factors. The judgment used in determining the fair value of embedded derivatives, using valuation models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income.

Pension and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "Other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future, for the purpose of calculating the limit on the net benefit asset, is based on a number of assumptions, including future service costs and reductions in future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of these assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") and performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

The judgment and assumptions used in determining the fair value of the stock-based compensation liability may have an effect on the compensation cost recorded in the statements of income.

Provisions

Provisions are recognized when: (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time, and is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Allowance for doubtful accounts

The Corporation maintains an allowance for doubtful accounts to cover anticipated losses from customers who are unable to pay their debts. The allowance is reviewed periodically and is based on an analysis of specific significant accounts outstanding, the age of the receivable, customer creditworthiness, and historical collection experience.

Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. The judgments made in determining the estimated fair value and the expected useful life of each acquired asset, and the estimated fair value of each assumed liability, can significantly impact net income.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Change in accounting estimates

In the second quarter of 2015, the Corporation changed its assessment of the useful life of its spectrum licences used in the operations of its Telecommunications segment. In light of recent spectrum auctions and developments in the telecommunications industry, the Corporation is now of the view that these spectrum licences have an indefinite useful life, based on the following facts:

- The Corporation intends to renew the spectrum licences and believes that they are likely to be renewed by ISED Canada;
- The Corporation has the financial and operational ability to renew these spectrum licences;
- Currently, the competitive, legal and regulatory landscape does not limit the useful lives of the spectrum licences;
- The Corporation foresees no limit to the period during which these licences can be expected to generate cash flows in the future.

Accordingly, the Corporation ceased to amortize spectrum licences used in its operations as of April 1, 2015, and no amortization expense has been recorded after that date. The straight-line amortization expense recorded relating to these licences was $13.9 million in 2015.

Recent accounting pronouncements

i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

   IFRS 9 simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

   The Corporation does not expect its consolidated financial statements to be materially impacted by the adoption of IFRS 9.

ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

   IFRS 15 specifies how and when an entity will recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to be applied to all contracts with customers.

   The Corporation expects that the adoption of IFRS 15 will have significant impacts on its consolidated financial statements, more specifically in its Telecommunications segment, with regards to the timing in the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs to obtain a contract and of certain other costs.

Under IFRS 15, the total consideration from a contract with multiple deliverables will need to be allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile services under contracts with multiple deliverables. Among other impacts, the adoption of IFRS 15 will result in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of revenues will therefore change under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract will remain the same.

In addition, under IFRS 15, certain costs to obtain a contract will be capitalized and amortized as operating expenses over the contract term or over the period of time the customer is expected to remain a customer of the Corporation. Currently, such costs are expensed as incurred. Also, the capitalization of connection costs will no longer be limited to the related connection revenues.

iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted, provided that IFRS 15 is applied at the same time as IFRS 16.

IFRS 16 sets out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

The Corporation expects that the adoption of IFRS 16 will have significant impacts on its consolidated financial statements since all of the Corporation segments are engaged in various long-term leases on premises and equipment.

Under IFRS 16, most lease charges will be expensed as an asset amortization charge, along with a financial charge on the asset related financial liabilities. As operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the statement of income.

Controls and procedures

In accordance with Regulation 52-109 on *Certification of Disclosure in Issuers' Annual and Interim Filings*, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Senior Vice-President and Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2016, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the time frames prescribed by this legislation.

Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the Corporation's IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by management during the financial period beginning October 1, 2016 and ending December 31, 2016.

Additional Information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;

- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing its network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its digital cable television, Internet access, telephony and Club illico services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;
- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the Corporation's public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the "Risks and Uncertainties" section above.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of March 15, 2017, and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 55 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company with an 81.53% interest in Quebecor Media Inc., one of Canada's largest media groups. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, "Quebecor" or the "Corporation" in this Management Discussion and Analysis refer to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital d'Amérique Investissement inc. ("CDP Capital"), a subsidiary of the Caisse de dépôt et placement du Québec, for an aggregate purchase price of $37.7 million, payable in cash. On the same date, Quebecor Media also paid off a security held by CDP Capital for $6.2 million. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.07% to 81.53%.

On November 15, 2017, the Corporation carried out a two-for-one split of the Corporation's outstanding Class A Multiple Voting Shares ("Class A Shares") and Class B Subordinate Voting Shares ("Class B Shares"). Accordingly, holders of the Corporation's shares received an additional share for each share owned on the record date of November 15, 2017. As a result, all references to numbers of shares, per-share amounts and stock-based compensation have been restated retroactively to reflect the split.

During the fourth quarter of 2017, the Corporation changed its organizational structure and transferred its book publishing and distribution operations and music distribution and production operations from the Media segment to the Sports and Entertainment segment. Accordingly, prior-period figures in the Corporation's segmented reporting have been reclassified to reflect these changes.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: cable television; Internet access; mobile and cable telecommunications; over-the-top ("OTT") video service; business solutions (including data hosting centres); broadcasting; soundstage and equipment rental and postproduction services for the film and television industries; newspaper publishing and distribution; Internet portals and specialized websites; book and magazine publishing and distribution; rental and distribution of video games and game consoles; music production and distribution; out-of-home advertising; operation and management of a world-class entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a premier mobile and cable communication service provider. Quebecor Media holds leading positions through its Media segment and its Sports and Entertainment segment in the creation, promotion and distribution of entertainment and news, and in Internet-related services that are designed to appeal to audiences in every demographic category. Quebecor Media continues to pursue a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

HIGHLIGHTS SINCE END OF 2016

- Quebecor's revenues totalled $4.12 billion in 2017, a $105.8 million (2.6%) increase from 2016.
- In 2017, Quebecor announced corporate management changes:
  - On February 16, 2017, Pierre Karl Péladeau returned to the position of President and Chief Executive Officer of Quebecor and Quebecor Media, replacing Pierre Dion, who was appointed Chair of the Board of Quebecor Media and a director of Quebecor.
  - On October 13, 2017, Julie Tremblay resigned as President and Chief Executive Officer of TVA Group Inc. ("TVA Group") and President and Chief Executive Officer of Quebecor Media Group to take retirement. On the same date, France Lauzière was named President and Chief Executive Officer of TVA Group, while retaining her responsibilities as Chief Content Officer of Quebecor Content. Newspaper, printing, music, book publishing and out-of-home operations have since reported to Pierre Karl Péladeau.

Telecommunications

- The Telecommunications segment grew its revenues by $133.3 million (4.2%) and its adjusted operating income by $84.6 million (5.8%) in 2017.
- In 2017, Videotron significantly increased its revenues from mobile telephony ($99.4 million or 19.5%), Internet access ($52.2 million or 5.3%), business solutions ($13.4 million or 12.1%) and the Club illico OTT video service ("Club illico") ($8.3 million or 26.4%).
- Videotron's average monthly revenue per user ("ARPU") increased by $9.73 (6.7%) from $144.86 in 2016 to $154.59 in 2017.
- Net increase of 115,700 revenue-generating units[1] (2.0%) in 2017, including increases of 130,100 subscriber connections to the mobile telephony service, 46,900 subscriptions to Club illico and 53,700 customers for the cable Internet access service, the largest annual increase for Internet access since 2013.
- On November 8, 2017, Videotron added the millionth subscriber connection to its residential and business mobile telephony services. In the space of seven years, Videotron has joined the ranks of telecommunications industry leaders.
- On August 29, 2017, Videotron announced an agreement with Comcast Corporation, a multinational telecommunications, media and technology company. The strategic partnership is aimed at developing an innovative IPTV solution based on Comcast Corporation's XFINITY X1 platform in order to provide Videotron customers with a superior television experience featuring faster, more intuitive, more user-friendly navigation of a diverse selection of content, including on-demand television shows, movies and concerts, as well as Web videos and apps, and also affording an opportunity to highlight Quebecor Media's own content.
- On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHZ wireless spectrum licences outside Québec to Shaw Communications Inc. ("Shaw") for a cash consideration of $430.0 million. The sale included three 700 MHz licences covering southern Ontario and the entirety of the provinces of Alberta and British Columbia, and four 2500 MHz licences covering the major urban centres in those provinces, namely Toronto, Edmonton, Calgary and Vancouver. A $243.1 million gain was recognized on the sale of the licences, including $121.6 million without any tax consequences.
- On June 20, 2017, Videotron sold its Advanced Wireless Services ("AWS-1") spectrum licence in the Metropolitan Toronto area to Rogers Communications Canada Inc. ("Rogers") for a cash consideration of $184.2 million, pursuant to the transfer option held by Videotron since 2013. An $87.8 million gain was recognized on the sale of the licence, including $43.9 million without any tax consequences.
- On January 12, 2017, 4Degrees Colocation Inc. ("4Degrees Colocation"), a subsidiary of Videotron, announced an agreement with Megaport (USA), Inc., a global leader in secure interconnectivity, which will allow business customers to link directly to the world's largest providers of public cloud services. Customers will enjoy fast, secure, redundant access to business applications from three leading information and communications technology providers: Microsoft Corporation (Azure, Office 365, Exchange), Amazon Web Services Inc. and Google.

Media

- In 2017, the Media segment increased its adjusted operating income by $15.4 million (28.6%), mainly because of higher advertising and subscription revenues at its broadcasting business, lower labour and content costs, and the impact of higher revenues from film production and audiovisual services.
- According to the fall 2017 Vividata survey, *Le Journal de Montréal*, *Le Journal de Québec* and the free daily *24 heures Montréal* remain Québec's news leaders with more than 4.0 million readers per week across all platforms (print, mobile and Web). TVA Group remains a leading player in the Canadian magazine industry with an average of nearly 9.8 million readers across all platforms.
- In 2017, Mels Studios and Postproduction G.P. ("MELS") posted a strong increase in volume on the strength of its soundstage and equipment rental services, most recently for the latest instalment in the successful American *X-Men* action movie franchise. MELS earned numerous industry awards for sound editing and visual effects for various productions, including an Iris award in the Best Sound category in June 2017 for the film *Two Lovers and a Bear* and three Canadian Screen Awards for Achievement in Visual Effects, Achievement in Sound Editing and Achievement in Overall Sound in March 2017 for the film *Race*.

---

[1] The sum of subscriptions to the cable Internet access, cable television and Club illico services, plus subscriber connections to the mobile and cable telephony services.

- On June 14, 2017, Quebecor Content announced an agreement with Blue Ant International, a division of leading global content distributor Blue Ant Media. Under the agreement, which is a Québec first, Blue Ant International will provide 4K content for Videotron's Indigo, illico and Club illico platforms.
- In spring 2017, the TVA Sports specialty service posted the best Québec ratings for the Stanley Cup finals since 2008. Prior to 2014, the Stanley Cup playoffs were broadcast on a rival network. The audience for the finals between the Pittsburgh Penguins and the Nashville Predators averaged 962,000 and peaked at 1.22 million, for a 36.6% market share.
- On March 1, 2017, the Media segment announced a partnership agreement with Tuango Inc. ("Tuango"), Québec's largest online promotional network. Businesses can now barter their goods and services for advertising space on Quebecor's media properties instead of making a monetary payment. The Media segment can therefore sell advertising space on its television channels and digital sites, in its newspapers and magazines, and on its out-of-home networks in exchange for goods and services, from which it derives revenues by reselling them on Tuango.
- On January 10, 2017, the Montreal Impact, a Major League Soccer ("MLS") team, and Quebecor announced an agreement making TVA Sports the exclusive French-language broadcaster of Montreal Impact and an official MLS broadcaster for the next five years. TVA Sports broadcasts all Montreal Impact regular season and playoff games, the All-Star Game and the MLS Cup playoffs, including the final. The agreement enriches TVA Sports' programming with coverage of a sport that is growing fast in Québec and makes it possible to disseminate that content on all of Quebecor's media platforms.

Sports and Entertainment

- In September 2017, the Videotron Centre completed its second year of operation. During that period, the Videotron Centre hosted 82 sporting events and concerts, as well as 17 corporate events. In all, nearly 845,000 people passed through the turnstiles. In April 2017, *Billboard* magazine ranked the Videotron Centre number 4 on its list of Top Canadian Venues, based on concert receipts.
- On August 11, 2017, Martin Tremblay was named Chief Operating Officer of Quebecor Sports and Entertainment Group. He joined Quebecor in 2010 and had been Vice President, Public Affairs of Quebecor since 2012.
- On April 4, 2017, Event Management Gestev Inc. ("Gestev") announced the acquisition of Montréal-based marketing agency Wasabi atelier expérientiel inc. The transaction expanded Gestev's experiential marketing and sponsorship activation capabilities and extended its reach in the Montréal market.

Financial transactions

- On November 15, 2017, the Corporation carried out a two-for-one split of its outstanding Class A Shares and Class B Shares. Accordingly, holders of the Corporation's shares received an additional share for each share owned on the record date of November 15, 2017.
- On October 12, 2017, the Corporation increased its secured revolving credit facility from $150.0 million to $300.0 million.
- On September 29, 2017, the Corporation paid down its existing $30.1 million mortgage loan. On the same day, the Corporation contracted a new $50.0 million mortgage loan at a fixed interest rate of 3.757%, maturing in October 2022.
- On July 14, 2017, Quebecor received a notice regarding the conversion of convertible debentures in the principal amount of $50.0 million for 4,155,844 Class B Shares of Quebecor. The Corporation exercised its cash payment option and paid $95.2 million on September 6, 2017.
- On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital for an aggregate purchase price of $37.7 million, payable in cash. On the same date, Quebecor Media also paid off a security held by CDP Capital for $6.2 million. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.07% to 81.53%, while CDP Capital's interest decreased from 18.93% to 18.47%.
- On May 4, 2017, Videotron transferred all then-existing commitments under its unsecured revolving credit facility to its secured revolving credit facility, increasing its secured facility from $630.0 million to $965.0 million and terminating its unsecured facility.
- On May 1, 2017, Quebecor Media fully redeemed its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount.
- On May 1, 2017, Videotron redeemed $125.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount, in

accordance with a notice issued on March 31, 2017. The repurchase followed the redemption on January 5 2017 of an initial $175.0 million tranche of the Notes.

- On April 13, 2017, Videotron issued US$600.0 million aggregate principal amount of 5.125% Senior Notes maturing on April 15, 2027, for net proceeds of $794.5 million, net of financing fees of $9.9 million.

TREND INFORMATION

Competition continues to be intense in the cable and alternative multichannel broadcast distribution industry and in the mobile telephony market. The significant subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth, due to the penetration rates currently reached.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its cable and mobile networks, the launch and expansion of new or additional services to support growth in its customer base and demand for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term in order to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure maintenance and enhancement, as well as costs relating to advancements in Internet access and TV everywhere, including higher capacity, lower latency and higher speeds, requiring IP technology, and the introduction of new technologies such as virtual reality, the Internet of Things ("IoT"). In addition, the demand for wireless data services has been growing constantly and it is projected to continue growing in the future. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to support this traffic. The Telecommunications segment may have to acquire additional spectrum in the future, if available.

Some of Quebecor's lines of business are cyclical in nature. They are dependent on advertising and, in the newspapers and magazines businesses in particular, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

In the Media segment, the broadcasting industry is undergoing a period of significant change. Television audiences are fragmenting as viewing habits shift not only toward specialty channels, but also toward content delivery platforms that allow users greater control over content and timing, such as the Internet, video on demand and mobile devices. Audience fragmentation has prompted many advertisers to review their strategies in media placement. The Media segment is taking steps to adjust to the profound changes occurring in the broadcasting industry to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want. Moreover, newspaper circulation, measured in terms of copies sold, has been declining in the newspaper industry over the past several years. The traditional run of press advertising for major multimarket retailers has been declining due to a shift in marketing strategy toward other media and retail industry consolidation. In order to respond to such competition, the Media segment's operations continue to develop their Internet presence through branded websites, including specialized websites and portals.

The Sports and Entertainment segment has made and is continuing to make significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required in order to expand the Sports and Entertainment segment. In the books and music businesses, digital technology is disrupting buying and consuming habits, particularly with the emergence of vehicles such as music streaming and e-books, which compete with conventional formats.

INTEREST IN SUBSIDIARIES

As of December 31, 2017, Quebecor held an 81.53% interest in Quebecor Media. The Corporation's interest in Quebecor Media increased from 75.36% to 81.07% on September 9, 2015, and from 81.07% to 81.53% on July 6, 2017, as a result of purchases by Quebecor Media of part of the interest in its equity held by CDP Capital. Table 1 shows Quebecor Media's equity interest in its main subsidiaries at December 31, 2017.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
At December 31, 2017

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	68.4
MediaQMI Inc.	100.0	100.0
QMI Spectacles inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past three years, with the exception of the following:

On March 20, 2015, TVA Group completed a rights offering whereby it received net proceeds totalling $110.0 million from the issuance of 19,434,629 Class B Non-Voting Shares, participating, without par value, of TVA Group ("TVA Group Class B Shares"). Under the rights offering, Quebecor Media subscribed for 17,300,259 TVA Group Class B Shares at a total cost of $97.9 million. As a result, its total interest in TVA Group's equity increased from 51.5% to 68.4%.

NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted operating income, adjusted income from continuing operating activities, cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary, are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted operating income

In its analysis of operating results, the Corporation defines adjusted operating income, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, (loss) gain on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and other assets, loss on debt refinancing, income taxes, and income from discontinued operations. Adjusted operating income as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted operating income in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted operating income is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted operating income may not be the same as similarly titled measures reported by other companies.

Table 2 below provides a reconciliation of adjusted operating income to net income as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2017 and 2016 presented in Table 2 below is drawn from the unaudited consolidated statements of income.

Net income	**$ 503.1**	$ 248.8	**$ 86.4**	$ 143.4

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income attributable to shareholders under IFRS, as net income attributable to shareholders before (loss) gain on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and other assets, loss on debt refinancing, net of income tax related to adjustments and of net income attributable to non-controlling interest related to adjustments, and before income from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of the financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 3 provides a reconciliation of adjusted income from continuing operating activities to the net income attributable to shareholders' measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2017 and 2016 presented in Table 3 below is drawn from the unaudited consolidated statements of income.

Table 3
Reconciliation of the adjusted income from continuing operating activities measure used in this report to the net income attributable to shareholders' measure used in the consolidated financial statements
(in millions of Canadian dollars)

1 Includes impact of fluctuations in income tax applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash flows from segment operations

Cash flows from segment operations represents adjusted operating income, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital by Quebecor Media, repayment of long-term debt and purchase of non-controlling interest. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. The Corporation's definition of cash flows from segment operations may not be identical to similarly titled measures reported by other companies. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

KEY PERFORMANCE INDICATOR

The Corporation uses ARPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly revenues per average basic customer from its cable television, Internet access, cable and mobile telephony services and Club illico. ARPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ARPU may not be the same as identically titled measurements reported by other companies. The Corporation calculates ARPU by dividing the combined revenues from its cable television, Internet access, cable and mobile telephony services and Club illico by the average number of basic customers during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2017/2016 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.12 billion, a $105.8 million (2.6%) increase.

- Revenues increased in Telecommunications ($133.3 million or 4.2% of segment revenues).
- Revenues decreased in Media ($19.3 million or -2.4%) and in Sports and Entertainment ($3.7 million or -2.0%).

Adjusted operating income: $1.59 billion, a $99.3 million (6.6%) increase.

- Adjusted operating income increased in Telecommunications ($84.6 million or 5.8% of segment adjusted operating income), Media ($15.4 million or 28.6%) and Sports and Entertainment ($3.9 million).
- There was an unfavourable variance at Head Office ($4.6 million), mainly because of higher philanthropic and IT costs.
- The change in the fair value of Quebecor Media stock options resulted in a $0.9 million favourable variance in the stock-based compensation charge in 2017 compared with 2016. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $1.2 million favourable variance in the Corporation's stock-based compensation charge in 2017.

Net income attributable to shareholders: $369.7 million ($1.53 per basic share) in 2017, compared with $194.7 million ($0.80 per basic share) in 2016, an increase of $175.0 million ($0.73 per basic share).

- The favourable variance was due primarily to:
  - $330.9 million gain on the sale of spectrum licences recognized in 2017, including $165.5 million without any tax consequences;
  - $99.3 million increase in adjusted operating income;
  - $19.0 million decrease in financial expenses;
  - $14.6 million favourable variance in income from discontinued operations;
  - $10.8 million favourable variance in the charge for restructuring of operations, litigation and other items.

  Partially offset by:
  - $129.5 million unfavourable variance in the loss on valuation and translation of financial instruments, including $129.2 million without any tax consequences;
  - $79.3 million unfavourable variance in non-controlling interest;
  - $59.4 million increase in the depreciation and amortization charge;
  - $20.2 million increase in the income tax expense;
  - $8.3 million unfavourable variance in the loss on debt refinancing.

Adjusted income from continuing operating activities: $330.0 million ($1.37 per basic share) in 2017, compared with $305.5 million ($1.25 per basic share) in 2016, an increase of $24.5 million ($0.12 per basic share).

Depreciation and amortization charge: $712.4 million, a $59.4 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in wired and wireless networks and computer systems, as well as the impact of revising the depreciation period for some telecommunications network components.

Financial expenses: $309.0 million, a $19.0 million decrease caused mainly by lower average indebtedness, the impact of lower interest rates on long-term debt due to debt refinancing at lower rates, a favourable variance in gains and losses on foreign currency translation of short-term monetary items, and higher interest revenues generated by increased liquidity.

Loss on valuation and translation of financial instruments: $199.8 million in 2017 compared with $70.3 million in 2016. The $129.5 million unfavourable variance was essentially due to a $129.2 million unfavourable variance, without any tax consequences, in losses and gains on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $17.2 million in 2017, compared with $28.0 million in 2016, a $10.8 million favourable variance.

- A $17.2 million net charge was recognized in 2017 in connection with cost-reduction initiatives in the Corporation's various segments, customer migration from analog to digital service in the Telecommunications segment, and developments in legal disputes ($28.0 million in 2016).

Gain on sale of spectrum licences: $330.9 million in 2017.

- On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHZ wireless spectrum licences outside Québec to Shaw for a cash consideration of $430.0 million. A $243.1 million gain was recognized on the sale of the licences, including $121.6 million without any tax consequences.
- On June 20, 2017, Videotron sold its AWS-1 spectrum licence in the Metropolitan Toronto area to Rogers for a cash consideration of $184.2 million, pursuant to the transfer option held by Videotron since 2013. An $87.8 million gain was recognized on the sale of the licence, including $43.9 million without any tax consequences.
- It should be noted that these transactions led to recognition in the second quarter of 2017 of tax benefits in the amount of $31.8 million arising from prior year tax losses, thereby reducing the Corporation's tax expense.

Charge for impairment of goodwill and other assets: $43.8 million in 2017, compared with $40.9 million in 2016, a $2.9 million unfavourable variance.

- In 2017 and 2016, Quebecor Media performed impairment tests on its Magazines cash-generating unit ("CGU") in view of the downtrend in the industry's revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $30.0 million non-cash goodwill impairment charge, including $1.5 million without any tax consequences, was recorded in 2017 ($40.1 million without any tax consequences in 2016). As well, a charge for impairment of intangible assets totalling $12.4 million, including $3.1 million without any tax consequences, was recognized in 2017 (nil in 2016).
- In 2017, an additional $1.4 million charge for impairment of intangible assets was recognized in the Corporation's other segments ($0.8 million in 2016).

Loss on debt refinancing: $15.6 million in 2017, compared with $7.3 million in 2016, an $8.3 million unfavourable variance.

- On May 1, 2017, Videotron redeemed $125.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $5.2 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- On May 1, 2017, Quebecor Media fully redeemed its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount. A $10.4 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.

Income tax expense: $138.0 million (effective tax rate of 21.4%) in 2017 compared with $117.8 million (effective tax rate of 24.8%) in 2016, a $20.2 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to the impact of the increase in taxable income for tax purposes, partially offset by one-time items that had a favourable impact on comparative effective tax rates.
- The favourable variance in effective income tax rates was mainly due to recognition in 2017 of tax benefits arising from prior year tax losses. Meanwhile, the lowering of future tax rates in Québec had a favourable impact on the effective tax rate in 2016 due to the corresponding reduction in deferred tax balances on the balance sheet.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,873,700 homes and businesses. Videotron offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones; Internet access service; digital cable television services, including video on demand, pay-per-view and pay TV; cable telephony services; and Club illico. Videotron also includes Videotron Business, a full-service business telecommunications provider that offers mobile and cable telephony, high-speed data transmission, Internet access, hosting, and cable television services.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary ("Le SuperClub Vidéotron") and its franchise network.

2017 operating results

Revenues: $3.29 billion in 2017, a $133.3 million (4.2%) increase.

- Revenues from the mobile telephony service increased $99.4 million (19.5%) to $609.8 million, essentially due to an increase in the number of subscriber connections and higher net revenue per connection.
- Revenues from Internet access service increased $52.2 million (5.3%) to $1.03 billion, mainly as a result of higher per-subscriber revenues, reflecting, among other things, the favourable impact of the product mix and increases in some rates, and customer growth, partially offset by increased discounts and a decrease in overage charges.
- Combined revenues from all cable television services decreased $14.7 million (-1.4%) to $1.01 billion, due primarily to the impact of the net decrease in the customer base, lower per-customer revenues and higher discounts, partially offset by increased revenues from the leasing of digital set-top boxes and the impact of increases in some rates.
- Revenues from the cable telephony service decreased $27.0 million (-6.4%) to $397.8 million, mainly because of the impact of the net decrease in subscriber connections and lower long-distance revenues, partially offset by higher per-connection revenues and lower discounts.
- Revenues from Club illico increased $8.3 million (26.4%) to $39.7 million, essentially because of subscriber growth.
- Revenues of Videotron Business increased $13.4 million (12.1%) to $124.6 million, due primarily to the impact of higher revenues at 4Degrees Colocation and Fibrenoire inc. ("Fibrenoire").
- Revenues from customer equipment sales increased $2.9 million (5.4%) to $56.5 million, mainly because of an increase in the number of mobile devices sold and reduced discounts on sales of digital set-top boxes.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $1.2 million (-16.0%) to $6.3 million, mainly because of store closures.
- Other revenues were stable compared with 2016 at $10.0 million.

ARPU: $154.59 in 2017 compared with $144.86 in 2016, a $9.73 (6.7%) increase.

Customer statistics

Revenue-generating units – As of December 31, 2017, the total number of revenue-generating units stood at 5,881,100, an increase of 115,700 (2.0%) in 2017 compared with an increase of 117,900 in 2016 (Table 4). Revenue-generating units are the sum of subscriptions to the cable Internet access, cable television and Club illico services, plus subscriber connections to the mobile and cable telephony services.

Mobile telephony – As of December 31, 2017, the number of subscriber connections to the mobile telephony service stood at 1,024,000, an increase of 130,100 (14.6%) in 2017 compared with an increase of 125,300 in 2016 (Table 4).

Cable Internet access – As of December 31, 2017, the number of subscribers to cable Internet access services stood at 1,666,500, an increase of 53,700 (3.3%) in 2017, the largest annual increase since 2013, compared with an increase of 44,600 in 2016 (Table 4). At December 31, 2017, Videotron's cable Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,873,700 homes and businesses passed by Videotron's network as of December 31, 2017, up from 2,839,300 one year earlier) of 58.0% compared with 56.8% a year earlier.

Cable television – The combined customer base for all Videotron cable television services decreased by 50,400 (-3.0%) in 2017 compared with a decrease of 46,000 in 2016 (Table 4). As of December 31, 2017, Videotron had 1,640,500 subscribers to its cable television services. The household and business penetration rate was 57.1% versus 59.6% a year earlier.

- As of December 31, 2017, the number of subscribers to the illico Digital TV service stood at 1,640,500, an increase of 53,400 (3.4%) in 2017 due in part to the impact of the program to migrate all analog service customers to digital service, compared with an increase of 16,500 in 2016. As of December 31, 2017, illico Digital TV had a household and business penetration rate of 57.1% versus 55.9% a year earlier.
- As of December 31, 2017, substantially all subscribers to the analog cable television service had migrated to digital service.

Cable telephony – As of December 31, 2017, the number of subscribers to the cable telephony service stood at 1,188,500, a decrease of 64,600 (-5.2%) in 2017 compared with a decrease of 63,200 in 2016 (Table 4). At December 31, 2017, the cable telephony service had a household and business penetration rate of 41.4% versus 44.1% a year earlier.

Club illico – As of December 31, 2017, the number of subscribers to Club illico stood at 361,600, an increase of 46,900 (14.9%) in 2017 compared with an increase of 57,200 in 2016 (Table 4).

Table 4
Telecommunications segment year-end customer numbers (2013-2017)
(in thousands of customers)

	2017	2016	2015	2014	2013
Mobile telephony[1]	**1,024.0**	893.9	768.6	632.8	504.3
Cable Internet	**1,666.5**	1,612.8	1,568.2	1,537.5	1,506.0
Cable television:					
Analog	–	103.8	166.3	228.7	297.7
Digital	**1,640.5**	1,587.1	1,570.6	1,553.6	1,527.4
	1,640.5	1,690.9	1,736.9	1,782.3	1,825.1
Cable telephony[1]	**1,188.5**	1,253.1	1,316.3	1,349.0	1,348.5

[1] In thousands of connections

Adjusted operating income: $1.53 billion, an $84.6 million (5.8%) increase caused primarily by:

- impact of the revenue increase.

Partially offset by:

- increases in some operating expenses, including engineering and IT costs;
- impact of the increased loss incurred on device sales due to:
  - o impact of the increase in the number of mobile devices sold at a loss, partially offset by the favourable impact of “bring-your-own-device” (“BYOD”) plans.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 53.3% in 2017 compared with 54.0% in 2016, due mainly to the fixed component of costs, which does not fluctuate in proportion to revenue growth.

Cash flows from operations

Cash flows from segment operations: $832.9 million in 2017 compared with $660.4 million in 2016 (Table 5).

- The $172.5 million increase was due to an $85.7 million decrease in additions to property, plant and equipment and to intangible assets, reflecting in part decreased investment in 4Degrees Colocation and in the LTE network, and to the $84.6 million increase in adjusted operating income.

Table 5: Telecommunications
Cash flows from operations
(in millions of Canadian dollars)

	2017	2016
Adjusted operating income	**$ 1,534.0**	$ 1,449.4
Additions to property, plant and equipment	**(574.4)**	(666.8)
Additions to intangible assets (excluding spectrum licences)	**(132.3)**	(125.6)
Proceeds from disposal of assets (excluding spectrum licences)	**5.6**	3.4
Cash flows from segment operations	**$ 832.9**	$ 660.4

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network and the specialty channels TVA Sports, LCN, addikTV, Prise 2, Yoopa, CASA and MOI&cie. TVA Group also holds interests in two other TVA Network affiliates and the Évasion specialty channel. As well, TVA Group is engaged in commercial production, dubbing, custom publishing and premedia services, and in the distribution of audiovisual products through its TVA Films division. As well, TVA Group operates the TVA Nouvelles and TVA websites and mobile apps, which reach more than three million Internet users per month (source: ComScore, December 2017), and the *TVA.ca* site and mobile app, which provide access to live-streaming of TVA Group's channels and archived content and shows.

TVA Group also owns MELS, a provider of soundstage and equipment rental, postproduction and visual effects services to the film and television industries.

Through its subsidiaries, TVA Publications Inc. and Les Publications Charron & Cie inc., TVA Group publishes more than 50 French- and English-language magazines in various categories, including show business, television, fashion, sports, and decorating, and operates a number of websites, including *coupdepouce.com*, *canadianliving.com* and *recettes.qc.ca*. TVA Group is the largest magazine publisher in Québec. On January 26, 2018, TVA Group sold the assets associated with *The Hockey News* to Roustan Media Ltd.

Quebecor Media's Media segment also operates two paid daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, the free daily *24 heures Montréal* and the J5 app, which provides real-time access to news on mobile devices, tablets and Apple Watch. The websites of the paid dailies, *journaldemontreal.com* and *journaldequebec.com*, lead the news sites in their markets with nearly four million visitors per month (source: ComScore, December 2017). According to corporate figures, the aggregate circulation of the Media segment's paid and free newspapers as of December 31, 2017 was approximately 2.6 million copies per week in print and electronic formats.

The Media segment also operates a number of other digital brands, including *Le Sac de Chips, Pèse sur Start*, *Silo 57*, *Tabloïd*, *Canoë.ca* – a French-language news and services portal for the general public – and the automotive site *Autonet.ca*.

The Media segment's apps, websites and portals log 6.8 million unique visitors per month in Canada (source: ComScore, December 2017).

The Media segment is also engaged in the printing of newspapers, the distribution of newspapers and magazines, and out-of-home advertising. The Media segment also operates NumériQ inc.("NumériQ"), an entity that brings together Quebecor's digital strategy and content production assets. NumériQ creates digital platforms, provides content for the Corporation's various platforms, and is a talent collective serving online video creators by providing personalized assistance in the development of multiplatform business opportunities and supporting their creative endeavours.

In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties, as well as Quebecor Media Sales, which offers Media segment customers integrated, diversified and complete advertising services.

2017 operating results

Revenues: $769.9 million in 2017, a $19.3 million (-2.4%) decrease.

- Broadcasting revenues increased $11.5 million (2.7%), essentially due to:
  - higher advertising revenues at the specialty channels and TVA Network;
  - higher subscription revenues at TVA Sports.

  Partially offset by:
  - decreased revenues from commercial production.
- Film production and audiovisual service revenues increased by $7.8 million (13.2%), mainly because of higher revenues from soundstage and equipment rental due to more major productions in 2017 than in 2016, and higher revenues from dubbing and visual effects.
- Newspaper publishing revenues decreased $17.5 million (-8.7%).
  - Advertising revenues decreased 13.5%; circulation revenues decreased 8.0%; digital revenues increased 3.0%; combined revenues from commercial printing and other sources decreased 2.7%.
- Magazine publishing revenues decreased by $21.2 million (-18.3%), due primarily to:
  - lower advertising revenues;
  - lower subscription and newsstand revenues;
  - impact of the discontinuation of some titles;
  - decreased custom publishing revenues.
- Quebecor Media Out of Home's revenues were stable.

Adjusted operating income: $69.3 million in 2017, a $15.4 million (28.6%) increase.

- Adjusted operating income from broadcasting increased by $19.5 million (87.1%), essentially because of the impact of the revenue increase, combined with cost reductions resulting from restructuring initiatives and lower content costs.
- Adjusted operating income from film production and audiovisual services increased by $5.3 million (57.6%), mainly because of the impact of the revenue increase.
- Adjusted operating income from newspaper publishing decreased by $6.2 million (-57.9%) due to the impact of the revenue decrease, partially offset by the favourable impact on adjusted operating income of reduced operating expenses, resulting from, among other things, the impact of restructuring initiatives.
- Adjusted operating income from magazine publishing decreased by $3.8 million (-27.5%), mainly because of the impact of the decrease in revenues, partially offset by lower operating expenses, including printing, editorial and selling expenses, as well as cost reductions related to restructuring initiatives.
- Adjusted operating income of Quebecor Media Out of Home was stable.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 91.0% in 2017 compared with 93.2% in 2016. The decrease was mainly due to the large fixed component of operating costs, which does not fluctuate in proportion to the increase in revenues, particularly in broadcasting and in film production and audiovisual services, as well as the impact of restructuring and cost-reduction initiatives in all business units.

Cash flows from operations

Cash flows from segment operations: $37.3 million in 2017 compared with $9.3 million in 2016 (Table 6). The $28.0 million favourable variance was due primarily to the $15.4 million increase in adjusted operating income, combined with a $12.0 million decrease in additions to property, plant and equipment and to intangible assets.

Table 6: Media
Cash flows from operations
(in millions of Canadian dollars)

	2017	2016
Adjusted operating income	**$ 69.3**	$ 53.9
Additions to property, plant and equipment	**(29.4)**	(37.2)
Additions to intangible assets	**(3.3)**	(7.5)
Proceeds from disposal of assets	**0.7**	0.1
Cash flows from segment operations	**$ 37.3**	$ 9.3

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include production and coproduction of shows presented at the Videotron Centre and other venues. In addition, the Sports and Entertainment segment operates sports and cultural events manager Gestev, which is the official imprint for all shows and events produced in Québec by Quebecor Media.

The Sports and Entertainment segment also includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec.

As well, the Sports and Entertainment segment includes educational publisher CEC Publishing Inc. and Sogides Group Inc., which is engaged in general literature publishing through its 18 publishing houses, and in the physical and digital distribution of books through Messageries A.D.P. inc., the exclusive distributor for more than 210 Québec and European French-language publishers.

Lastly, the Sports and Entertainment segment is engaged in the distribution of CDs and videos (Distribution Select); the distribution of music to Internet music downloading and streaming services (Select Digital); music recording and video production (Disques Musicor); concert and event production (Musicor Spectacles); and production of concert videos and television commercials (Les Productions Select TV).

2017 operating results

Revenues: $181.3 million, a $3.7 million (-2.0%) decrease.

- Revenues from sports and concerts increased by $3.8 million (11.0%), essentially because of the successful coproduction of *Saturday Night Fever* at the Capitole de Québec and sponsorship activation revenues.
- Book distribution and publishing revenues decreased by $0.7 million (-0.7%), primarily as a result of lower revenues from general literature and lower volumes in bookstore distribution, partially offset by higher revenues from educational publishing.
- Music distribution and production revenues decreased by $6.9 million (-14.7%), primarily as a result of lower distribution revenues.

Adjusted operating income: $6.2 million in 2017, a $3.9 million (169.6%) increase.

- There was a $0.9 million (12.5%) favourable variance in the adjusted operating loss of sports and concerts, mainly because of the impact of the revenue increase, partially offset by the impact of the startup of new activities.
- Adjusted operating income from book distribution and publishing increased by $2.3 million (22.5%), due primarily to the impact of the revenue increase and higher margins in educational publishing, as well as lower operating expenses in general literature.
- There was a $0.8 million favourable variance in adjusted operating income from music distribution and production, due primarily to decreased administrative expenses, partially offset by the impact of the decrease in revenues.

Cash flows from operations

Cash flows from segment operations: $0.6 million in 2017, compared with negative $4.7 million in 2016 (Table 7). The $5.3 million favourable variance was due to the $3.9 million increase in adjusted operating income and the $1.4 million reduction in additions to property, plant and equipment and to intangible assets.

2017/2016 FOURTH QUARTER COMPARISON

Analysis of Consolidated Results of Quebecor

Revenues: $1.06 billion, an $8.8 million (0.8%) increase.

- Revenues increased in Telecommunications ($36.2 million or 4.5% of segment revenues).
- Revenues decreased in Media ($22.7 million or -10.2%) and in Sports and Entertainment ($3.8 million or -7.0%).

Adjusted operating income: $411.9 million, a $22.6 million (5.8%) increase.

- Adjusted operating income increased in Telecommunications ($24.2 million or 6.6% of segment adjusted operating income). There was a favourable variance in Sports and Entertainment ($3.6 million).
- Adjusted operating income decreased in Media ($2.6 million or -10.4%). There was an unfavourable variance at Head Office ($2.6 million).
- The change in the fair value of Quebecor Media stock options resulted in a $2.3 million favourable variance in the stock-based compensation charge in the fourth quarter of 2017 compared with the same period of 2016. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $2.7 million unfavourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2017.

Net income attributable to shareholders: $65.6 million ($0.27 per basic share) in the fourth quarter of 2017, compared with $123.3 million ($0.50 per basic share) in the same period of 2016, a decrease of $57.7 million ($0.23 per basic share).

- The decrease was mainly due to:
  - $55.9 million unfavourable variance in the loss on valuation and translation of financial instruments, including $56.8 million without any tax consequences;
  - $26.8 million increase in the depreciation and amortization charge;
  - $14.8 million increase in the income tax expense.

  Partially offset by:
  - $22.6 million increase in adjusted operating income;
  - $7.3 million favourable variance in the loss on debt refinancing;
  - $6.9 million decrease in financial expenses;
  - $3.4 million favourable variance in the charge for restructuring of operations, litigation and other items.

Adjusted income from continuing operating activities: $78.7 million ($0.33 per basic share) in the fourth quarter of 2017, compared with $84.7 million ($0.35 per basic share) in the same period of 2016, a decrease of $6.0 million ($0.02 per basic share) due in part to the impact of revising the depreciation period for some telecommunications network components.

Depreciation and amortization charge: $194.1 million in the fourth quarter of 2017, a $26.8 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in wired and wireless networks and computer systems, as well as the impact of revising the depreciation period for some telecommunications network components.

Financial expenses: $77.5 million in the fourth quarter of 2017, a $6.9 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates, higher interest revenues generated by increased liquidity, and a favourable variance in gains and losses on foreign currency translation of short-term monetary items, partially offset by the impact of higher indebtedness.

Loss on valuation and translation of financial instruments: $8.1 million in the fourth quarter of 2017 compared with a $47.8 million gain in the same period of 2016. The $55.9 million unfavourable variance was essentially due to the $56.8 million unfavourable variance, without any tax consequences, in the loss on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $9.9 million in the fourth quarter of 2017 compared with $13.3 million in the same period of 2016, a $3.4 million favourable variance.

- A $9.9 million net charge was recognized in the fourth quarter of 2017 in connection with cost-reduction initiatives in the Corporation's various segments and customer migration from analog to digital service in the Telecommunications segment ($13.3 million in the fourth quarter of 2016).

Loss on debt refinancing: $7.3 million in the fourth quarter of 2016.

- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in the fourth quarter of 2016 in connection with this redemption.

Income tax expense: $36.2 million (effective tax rate of 27.9%) in the fourth quarter of 2017, compared with $21.4 million (effective tax rate of 18.5%) in the same period of 2016, a $14.8 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to one-time items that had an unfavourable impact on comparative effective tax rates, and the impact of the increase in taxable income for tax purposes.
- The effective tax rate in the fourth quarter of 2016 reflected the lowering of future tax rates in Québec, which had a favourable impact due to the corresponding reduction in deferred tax balances on the balance sheet.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $841.4 million, a $36.2 million (4.5%) increase due primarily to the same factors as those noted above in the "2017/2016 financial year comparison."

- Revenues from mobile telephony service increased $24.7 million (18.0%) to $161.8 million.
- Revenues from Internet access service increased $14.6 million (5.9%) to $263.1 million.
- Combined revenues from all cable television services decreased $2.8 million (-1.1%) to $253.4 million.
- Revenues from cable telephony service decreased $8.0 million (-7.6%) to $96.8 million.
- Revenues from Club illico increased $2.2 million (25.6%) to $10.8 million.
- Revenues of Videotron Business increased $0.7 million (2.3%) to $30.9 million.
- Revenues from customer equipment sales increased $5.4 million (36.0%) to $20.4 million, partly reflecting the impact of higher net per-device revenues.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $0.6 million (-27.3%) to $1.6 million.
- Other revenues increased $0.1 million (4.0%) to $2.6 million.

ARPU: $159.28 in the fourth quarter of 2017, compared with $148.56 in the same period of 2016, a $10.72 (7.2%) increase.

Customer statistics

Revenue-generating units – 34,900 (0.6%) unit increase in the fourth quarter of 2017 compared with an increase of 62,300 in the same period of 2016.

Mobile telephony – 33,700 (3.4%) subscriber-connection increase in the fourth quarter of 2017 compared with an increase of 26,200 in the same period of 2016.

Cable Internet access – 12,400 (0.7%) customer increase in the fourth quarter of 2017 compared with an increase of 16,700 in the same period of 2016.

Cable television – 8,500 (-0.5%) decrease in the combined customer base for all of Videotron's cable television services in the fourth quarter of 2017 compared with a decrease of 4,800 in the same period of 2016.

  - 36,600 (2.3%) increase in the number of subscribers to the illico Digital TV service in the fourth quarter of 2017, due in part to the impact of the program to migrate all analog service customers to digital service, compared with an increase of 16,300 in the same period of 2016.

- As of December 31, 2017, substantially all subscribers to the analog cable television service had migrated to digital service.

Cable telephony – 16,900 (-1.4%) subscriber decrease in the fourth quarter of 2017 compared with a decrease of 12,000 in the same period of 2016.

Club illico – 14,200 (4.1%) subscriber increase in the fourth quarter of 2017, compared with an increase of 36,200 in the same period of 2016.

Adjusted operating income: $388.8 million, a $24.2 million (6.6%) increase due primarily to:

- impact of the revenue increase.

Partially offset by:

- increases in some operating expenses, including engineering and IT costs.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 53.8% in the fourth quarter of 2017 compared with 54.7% in the same period of 2016, due essentially to the same factors as those noted above under "2017/2016 financial year comparison."

Media

Revenues: $199.5 million in the fourth quarter of 2017, a $22.7 million (-10.2%) decrease.

- Broadcasting revenues decreased $11.2 million (-8.7%), mainly due to:
  - o lower advertising revenues at TVA Network;
  - o lower subscription revenues at the specialty channels, which were negatively affected by the Canadian Radio-television and Telecommunications Commission ("CRTC") decision on TVA Sports' royalty fees.

  Partially offset by:
  - o higher advertising revenues at the specialty channels.
- Film production and audiovisual service revenues increased by $1.5 million (9.9%), mainly because of higher revenues from soundstage and equipment rental due to a larger number of productions in the fourth quarter of 2017 than in the same period of 2016.
- Newspaper publishing revenues decreased $6.6 million (-12.5%).
  - o Advertising revenues decreased 16.2%; circulation revenues decreased 11.8%; digital revenues increased 14.3%; combined revenues from commercial printing and other sources decreased 13.4%.
- Magazine publishing revenues decreased by $4.9 million (-16.8%), due primarily to:
  - o lower subscription and newsstand revenues;
  - o lower advertising revenues;
  - o impact of the discontinuation of some titles.
- Revenues of Quebecor Media Out of Home decreased by $1.2 million (-25.0%), mainly because of lower advertising revenues.

Adjusted operating income: $22.4 million in the fourth quarter of 2017, a $2.6 million (-10.4%) decrease.

- Adjusted operating income from broadcasting decreased by $1.2 million (-6.9%) because of the impact of the revenue decrease, partially offset by lower content costs at TVA Sports and cost reductions resulting from restructuring initiatives.
- Adjusted operating income from film production and audiovisual services increased by $1.9 million (79.2%), mainly because of the impact of the revenue increase.
- Adjusted operating income from newspaper publishing decreased by $1.9 million (-76.0%) due to the impact of the revenue decrease, partially offset by the favourable impact on adjusted operating income of reduced operating expenses, resulting from, among other things, the impact of restructuring initiatives.
- Adjusted operating income from magazine publishing increased by $0.4 million (19.0%), The decrease in operating expenses, including printing, editorial and selling costs, combined with cost reductions related to restructuring initiatives, outweighed the impact of the decrease in revenues.
- There was a $1.1 million unfavourable variance in the adjusted operating income of Quebecor Media Out of Home, mainly because of the impact of the revenue decrease.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 88.8% in the fourth quarter of 2017 compared with 88.7% in the same period of 2016.

Sports and Entertainment

Revenues: $50.3 million in the fourth quarter of 2017, a $3.8 million (-7.0%) decrease.

- Revenues from sports and concerts increased by $1.7 million (17.3%) as a result of higher revenues from concerts, sponsorship activation and venue management and rental, partially offset by lower revenues from hockey.
- Book distribution and publishing revenues decreased by $2.9 million (-10.5%), primarily as a result of lower volume in bookstore and mass market distribution and lower general literature revenues.
- Music distribution and production revenues decreased by $2.6 million (-15.6%), primarily as a result of lower distribution revenues.

Adjusted operating income: $2.3 million in the fourth quarter of 2017, compared with a $1.3 million adjusted operating loss in the same period of 2016, a $3.6 million favourable variance.

- There was a $2.0 million favourable variance in the adjusted operating income of sports and concerts, mainly because of the impact of the revenue increase and lower costs for hockey.
- Adjusted operating income from book distribution and publishing was stable.
- There was a $1.6 million favourable variance in adjusted operating income from music distribution and production, due primarily to decreased administrative expenses, partially offset by the impact of the decrease in revenues.

2016/2015 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.02 billion, a $125.8 million (3.2%) increase.

- Revenues increased in Telecommunications ($144.8 million or 4.8% of segment revenues).
- Revenues decreased in Media ($23.5 million or -2.9%) and in Sports and Entertainment ($2.6 million or -1.4%).

Adjusted operating income: $1.49 billion, a $53.4 million (3.7%) increase.

- Adjusted operating income increased in Telecommunications ($63.6 million or 4.6% of segment adjusted operating income). There was a favourable variance in Sports and Entertainment ($3.9 million).
- Adjusted operating income decreased in Media ($6.2 million or -10.3%). There was an unfavourable variance at Head Office ($7.9 million), essentially due to an unfavourable variance in the stock-based compensation charge.
- The change in the fair value of Quebecor Media stock options resulted in a $5.3 million unfavourable variance in the stock-based compensation charge in 2016 compared with 2015. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in an $8.3 million unfavourable variance in the Corporation's stock-based compensation charge in 2016.

Net income attributable to shareholders: $194.7 million ($0.80 per basic share) in 2016, compared with $151.8 million ($0.62 per basic share) in 2015, an increase of $42.9 million ($0.18 per basic share).

- The favourable variance was due primarily to:
  - $189.8 million decrease in non-cash charge for impairment of goodwill and other assets, including $75.0 million without any tax consequences;
  - $53.4 million increase in adjusted operating income;
  - $40.6 million decrease in the depreciation and amortization charge;
  - $19.7 million favourable variance in the loss related to discontinued operations;
  - $7.0 million decrease in financial expenses;
  - $4.8 million favourable variance in losses on debt refinancing.

  Partially offset by:
  - $144.9 million unfavourable variance in the charge for restructuring of operations, litigation and other items;
  - $77.0 million unfavourable variance in losses and gains on valuation and translation of financial instruments, including $78.7 million without any tax consequences;
  - $24.7 million unfavourable variance in the income tax expense;
  - $25.8 million unfavourable variance in non-controlling interest.

Adjusted income from continuing operating activities: $305.5 million ($1.25 per basic share) in 2016, compared with $239.9 million ($0.98 per basic share) in 2015, an increase of $65.6 million ($0.27 per basic share).

Depreciation and amortization charge: $653.0 million, a $40.6 million decrease due primarily to the impact of the end of amortization of spectrum in the Telecommunications segment in the second quarter of 2015, in accordance with a change in the estimated useful lives of the licences, and the end of the accounting useful lives of some assets acquired as part of the acquisition of Videotron in October 2000.

Financial expenses: $328.0 million, a $7.0 million decrease caused mainly by the impact of lower interest rates on long-term debt due to debt refinancing at lower rates, and a favourable variance in gains and losses on foreign currency translation of short-term monetary items, partially offset by higher average indebtedness resulting primarily from the purchase in September 2015 of part of the interest in Quebecor Media held by CDP Capital for a $500.0 million consideration.

Loss on valuation and translation of financial instruments: $70.3 million in 2016 compared with a $6.7 million gain in 2015. The $77.0 million unfavourable variance was essentially due to a $78.7 million unfavourable variance, without any tax consequences, in losses and gains on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $28.0 million in 2016, compared with a $116.9 million gain in 2015, a $144.9 million unfavourable variance.

- In 2016, the Telecommunications segment recognized a charge for restructuring of operations totalling $14.3 million ($8.8 million in 2015), deriving essentially from customer migration from analog to digital services. A $10.1 million charge for restructuring of operations was recorded in the Media segment in connection with staff-reduction programs in 2016 ($9.8 million in 2015). The other segments recorded charges for restructuring of operations of $1.7 million in 2016 ($0.6 million in 2015).
- In 2016, Quebecor's segments also recognized a $0.8 million charge for other items ($2.0 million in 2015).
- On March 6, 2015, the Québec Court of Appeal ruled in favour of Videotron and TVA Group and ordered Bell ExpressVu Limited Partnership ("Bell ExpressVu") to pay Videotron compensation in the amount of $135.3 million and TVA Group compensation in the amount of $0.6 million, including interest, for having failed to implement an appropriate security system in a timely manner to prevent piracy of the signals broadcast by its satellite television service between 1999 and 2005, thereby harming its competitors and broadcasters. On October 15, 2015, the Supreme Court of Canada denied Bell ExpressVu leave to appeal the decision. A $139.1 million gain on litigation was recorded in the statement of income in 2015.
- A $1.1 million interest expense was recorded in the Telecommunications segment in 2016 ($1.0 million in 2015) in connection with a court ruling handed down in 2014.

Charge for impairment of goodwill and other assets: $40.9 million in 2016, compared with $230.7 million in 2015, a $189.8 million favourable variance.

- In 2016, Quebecor Media performed impairment tests on its Magazines CGU in view of the downtrend in the industry's advertising revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $40.1 million non-cash goodwill impairment charge (without any tax consequences) was recorded in 2016. As well, a charge for impairment of intangible assets totalling $0.8 million was recorded in the Media segment in 2016.
- In 2015, Quebecor Media performed impairment tests on its CGUs and concluded that the recoverable amount of its Newspapers and Broadcasting CGUs was less than their carrying amount. The recoverable amount of those CGUs was adversely affected by declining newspaper and commercial printing volumes, and by continuing pressure on advertising revenues in the newspaper and television businesses. Accordingly, an $85.0 million non-cash goodwill impairment charge (without any tax consequences) and an $81.9 million non-cash impairment charge on other assets, relating mainly to the assets of the Mirabel printing plant, were recorded in the Newspapers CGU in 2015. A $60.1 million impairment charge on TVA Network's broadcasting licences (including $30.1 million without any tax consequences) was recognized in the Broadcasting CGU in 2015. A $3.7 million impairment charge on intangible assets was also recognized in 2015 in other segments.

Loss on debt refinancing: $7.3 million in 2016 compared with $12.1 million in 2015, a $4.8 million favourable variance.

- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.
- On July 16, 2015, Videotron fully redeemed its outstanding 9.125% Senior Notes issued on April 15, 2008 and maturing on April 15, 2018, in the aggregate principal amount of US$75.0 million, at a redemption price of 101.521% of their principal amount, and unwound the related hedges in an asset position. A $0.2 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption, including a $2.1 million net gain previously recorded in "Other Comprehensive Income."
- On July 16, 2015, Videotron fully redeemed its outstanding 7.125% Senior Notes issued on January 13, 2010 and maturing on January 15, 2020, in the aggregate principal amount of $300.0 million, at a redemption price of 103.563% of their principal amount. A $13.6 million loss was recorded in the consolidated statement of income in the second quarter of 2015 in connection with this redemption.

- On April 10, 2015, Videotron fully redeemed its 6.375% Senior Notes maturing on December 15, 2015, in the aggregate principal amount of US$175.0 million, at a redemption price of 100% of their principal amount, and unwound the related hedges in an asset position. A $1.7 million net gain was recorded in the consolidated statement of income in the first quarter of 2015 in connection with this redemption, including a $1.8 million gain previously recorded in "Other Comprehensive Income."

Income tax expense: $117.8 million (effective tax rate of 24.8%) in 2016 compared with $93.1 million (effective tax rate of 23.4%) in 2015, a $24.7 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The unfavourable variance in the income tax expense was mainly due to the increase in taxable income for tax purposes and one-time items that had an unfavourable impact on comparative effective tax rates.
- The unfavourable variance in effective tax rates was mainly due to the impact of a decrease in deferred income tax liabilities in the second quarter of 2015, in light of developments in tax audits, jurisprudence and tax legislation. The announced lowering of Québec tax rates in the coming years also had a favourable impact on the effective tax rate in 2016, with a corresponding reduction in deferred tax balances on the balance sheet.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under “Trend Information” above, the risk analysis in the “Risks and Uncertainties” section below, and the discussion of the Corporation’s financial risks under “Financial Instruments and Financial Risk” below.

Operating activities

Cash flows provided by continuing operating activities: $1.17 billion in 2017 compared with $1.11 billion in 2016.

- The $58.1 million increase was primarily due to:
  - $149.4 million decrease in current income taxes, mostly because of recognition of tax benefits;
  - $84.6 million and $15.4 million increases in adjusted operating income in the Telecommunications and Media segments respectively;
  - $19.1 million decrease in the cash portion of financial expenses;
  - $10.8 million favourable variance in the cash portion of restructuring of operations, litigation and other items.

  Partially offset by:
  - $221.3 million unfavourable change in non-cash operating assets and liabilities, due primarily to unfavourable variances in income tax receivable and payable, provisions, accounts payable and accrued charges, and inventory in the Telecommunications segment.

Increased profitability in the Telecommunications and Media segments, as well as recognition of tax benefits and reduced financial expenses, had a favourable impact on cash flows provided by continuing operating activities in 2017, while decreases in provisions and in accounts payable and accrued charges, and variances in inventory in the Telecommunications segment had an unfavourable impact.

Working capital: Negative $348.0 million at December 31, 2017, compared with negative $429.9 million at December 31, 2016, an $81.9 million favourable variance. The factors that had a favourable impact on working capital were receipt of the proceeds from disposal of spectrum licences in the total amount of $614.2 million, as well as the increase in cash and cash equivalents and income tax receivable and the decrease in income tax payable and provisions from cash flows provided by continuing operating activities. The factors that had an unfavourable impact on working capital were recognition under current liabilities of a $450.0 million liability related to convertible debentures maturing in 2018 and a $442.2 million liability related to embedded derivatives related to those debentures.

Investing activities

Additions to property, plant and equipment: $605.6 million in 2017 compared with $707.8 million in 2016. The $102.2 million decrease was due to reduced investment in 4Degrees Colocation and in the LTE network.

Additions to intangible assets: $141.9 million in 2017, compared with $139.8 million in 2016, a $2.1 million increase.

Proceeds from disposal of assets: $620.7 million in 2017 compared with $4.3 million in 2016.

- In 2017, Videotron sold its AWS-1 spectrum licence in the Metropolitan Toronto area to Rogers for a cash consideration of $184.2 million, and its seven 2500 MHz and 700 MHZ wireless spectrum licences outside Québec to Shaw for a cash consideration of $430.0 million.

Business acquisitions: $5.8 million in 2017 compared with $119.5 million in 2016.

- In 2017, business acquisitions consisted mainly of payment of the $5.6 million balance payable on the acquisition of Fibrenoire by the Telecommunications segment.
- In 2016, business acquisitions consisted essentially of the acquisition of Fibrenoire by the Telecommunications segment.

Business disposals: $3.0 million in 2016, consisting of the balance of the selling price of Archambault Group Inc.’s retail operations.

Acquisition of non-controlling interest: $43.9 million in 2017.

- On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital for an aggregate purchase price of $37.7 million, payable in cash, and paid off a security held by CDP Capital for $6.2 million. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.07% to 81.53%.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $460.9 million in 2017 compared with $293.9 million in 2016 (Table 8).

- The $167.0 million favourable variance was mainly due to:
  - o $102.3 million decrease in additions to property, plant and equipment;
  - o $63.8 million increase in cash flows provided by continuing operating activities.

Financing activities

Consolidated debt (long-term debt plus bank indebtedness): $150.2 million decrease in 2017; $251.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments.

- Debt was reduced in 2017 primarily for the following reasons:
  - Redemption by Quebecor Media on May 1, 2017 of the entirety of its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount;
  - Redemption by Videotron on January 5, 2017 and May 1, 2017 of $300.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount;
  - $209.3 million reduction in Videotron’s drawings on its secured revolving credit facility;
  - $272.5 million favourable impact of exchange rate fluctuations. The consolidated debt reduction attributable to this item was offset by a decrease in the asset (or increase in the liability) related to cross-currency swap agreements entered under “Derivative financial instruments”;
  - Current payments totalling $21.1 million on the term loan facilities of Videotron, TVA Group and Quebecor Media;
  - Total $18.9 million reduction in bank indebtedness of Videotron and Quebecor Media.
- Additions to debt in 2017 essentially consisted of:
  - Issuance by Videotron on April 13, 2017 of US$600.0 million aggregate principal amount of 5.125% Senior Notes maturing on April 15, 2027 for net proceeds of $794.5 million, net of financing fees of $9.9 million;
  - $175.6 million increase in Quebecor’s drawings on its revolving bank credit facility;
  - New mortgage loan in the principal amount of $50.0 million at a fixed interest rate of 3.757%, maturing in October 2022, contracted by Quebecor on September 29, 2017. On the same day, Quebecor paid down its existing mortgage loan in the principal amount of $30.1 million.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $557.7 million at December 31, 2017 compared with $808.7 million at December 31, 2016. The $251.0 million net unfavourable variance was mainly due to:

- o unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments.

  Partially offset by:

- o favourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.

- On October 12, 2017, the Corporation increased its secured revolving credit facility from $150.0 million to $300.0 million.
- On July 14, 2017, Quebecor received a notice regarding the conversion of convertible debentures in the principal amount of $50.0 million for 4,155,844 Class B Shares of Quebecor. The Corporation exercised its cash payment option and paid $95.2 million on September 6, 2017.
- On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital for an aggregate purchase price of $37.7 million, payable in cash. On the same date, Quebecor Media also paid off a security held by CDP Capital for $6.2 million. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.07% to 81.53%, while CDP Capital's interest decreased from 18.93% to 18.47%.
- On May 4, 2017, Videotron transferred all then-existing commitments under its unsecured revolving credit facility to its secured revolving credit facility, increasing its secured facility from $630.0 million to $965.0 million and terminating its unsecured facility.

Financial position

Net available liquidity: $2.11 billion at December 31, 2017 for Quebecor Media and its wholly owned subsidiaries, consisting of $841.0 million in cash and cash equivalents and $1.27 billion in available unused revolving credit facilities.

Net available liquidity: $123.2 million as at December 31, 2017 for Quebecor at the corporate level, consisting of $0.8 million in bank indebtedness and $124.0 million in available unused revolving credit facilities.

Consolidated debt (long-term debt plus bank indebtedness): $5.54 billion at December 31, 2017, a $150.2 million decrease compared with December 31, 2016; $251.0 million net unfavourable variance in assets and liabilities related to derivative financial instruments (see "Financing activities" above).

- Consolidated debt essentially consisted of Videotron's $3.27 billion debt ($3.17 billion at December 31, 2016); TVA Group's $62.6 million debt ($69.1 million at December 31, 2016); Quebecor Media's $1.98 billion debt ($2.41 billion at December 31, 2016); and Quebecor's $225.7 million debt ($30.6 million at December 31, 2016).

As at December 31, 2017, minimum principal payments on long-term debt in the coming years are as follows:

Table 10
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2018	$	20.4

From time to time, Quebecor may (but is under no obligation to) seek to retire or purchase its outstanding securities, including debentures, in open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor's consolidated debt was approximately 5.9 years as of December 31, 2017 (6.1 years as of December 31, 2016). After taking into account hedging instruments, at December 31, 2017 the debt consisted of approximately 84.7% fixed-rate debt (83.2% at December 31, 2016) and 15.3% floating-rate debt (16.8% at December 31, 2016).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases, dividend payments to shareholders, and payment of dividends (or distributions) to non-controlling interest. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted operating income). At December 31, 2017, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

On March 13, 2018, the Board of Directors of Quebecor declared a quarterly dividend of $0.0275 per share on its Class A Shares and Class B Shares, payable on April 24, 2018 to shareholders of record as of the record date of March 30, 2018.

Board of Directors

On August 7, 2017, the Board of Directors received the resignation of Geneviève Marcon, a Director of the Corporation since 2012, a Director of Quebecor Media since 2013, and a member of the Human Resources and Corporate Governance Committee of the two corporations.

On September 28, 2017, Andrea C. Martin was named a Director of Quebecor and Quebecor Media, and a member of the Human Resources and Corporate Governance Committee of the two corporations.

Analysis of consolidated balance sheet at December 31, 2017

Table 11
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2017 and 2016
(in millions of Canadian dollars)

	Dec. 31, 2017	Dec. 31, 2016	Difference	Main reasons for difference
Assets				
Cash and cash equivalents	**$ 864.9**	$ 22.3	$ 842.6	Receipt of proceeds from the disposal of spectrum licences and cash flows provided by continuing operating activities
Accounts receivable	**543.4**	525.4	18.0	Impact of current variances in activity
Income taxes[1]	**16.0**	(28.3)	44.3	Recognition of tax benefits
Property, plant and equipment	**3,594.6**	3,605.1	(10.5)	Depreciation for the period less additions to property, plant and equipment on an accrual basis
Intangible assets	**983.1**	1,224.0	(240.9)	Sale of spectrum licences and impairment of intangible assets
Goodwill	**2,695.8**	2,725.4	(29.6)	Goodwill impairment in the Media segment
Derivative financial instruments[2]	**557.7**	808.7	(251.0)	See "Financing activities"
Liabilities				
Accounts payable and accrued charges	**738.7**	705.9	32.8	Impact of current variances in activity
Provisions	**25.4**	69.3	(43.9)	Settlement of disputes
Long-term debt, including current portion and bank indebtedness	**5,537.4**	5,687.6	(150.2)	See "Financing activities"
Convertible debentures and embedded derivatives related to convertible debentures, including current and long-term portions	**892.2**	790.0	102.2	Losses on embedded derivatives less redemption of convertible debentures
Deferred income tax[3]	**642.8**	544.9	97.9	Net deferred income tax expenses reported under income and "Other Comprehensive Income"

1 Current assets less current liabilities.
2 Long-term assets less long-term liabilities.
3 Long-term liabilities less long-term assets.

ADDITIONAL INFORMATION

At December 31, 2017, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; principal repayment and interest on convertible debentures; operating lease arrangements; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 12 below shows a summary of these contractual obligations.

Table 12
Contractual obligations of Quebecor as of December 31, 2017
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,572.1**	$ 20.4	$ 648.0	$ 1,051.6	$ 3,852.1
Convertible debentures[2]	**886.4**	886.4	–	–	–
Interest payments[3]	**1,690.7**	250.3	554.3	517.2	368.9
Operating leases	**198.6**	47.0	54.9	21.7	75.0
Additions to property, plant and equipment and other commitments	**1,371.3**	228.2	318.0	282.0	543.1
Derivative financial instruments[4]	**(552.7)**	0.6	(71.0)	(203.0)	(279.3)
Total contractual obligations	**$ 9,166.4**	**$ 1,432.9**	**$ 1,504.2**	**$ 1,669.5**	**$ 4,559.8**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 Based on the market value at December 31, 2017 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $9.625 per share and a ceiling price of $12.03125. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2017.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 12

Videotron leases sites for its LTE network under operating lease arrangements. It also has 20-year service sharing and exchange agreements with Rogers to build out and operate an LTE network in Québec and the Ottawa area, as well as an agreement with Comcast Corporation to develop an innovative IPTV solution. As at December 31, 2017, the balance of those commitments stood at $607.6 million.

In 2011, Quebecor Media announced an agreement with Québec City for the leasing and management of the Videotron Centre. As at December 31, 2017, the balance of those commitments stood at $73.0 million.

In 2012 and 2014, Quebecor Media signed 20-year agreements to install, maintain and advertise on bus shelters belonging to the Montréal and Laval transit commissions. In 2015, a similar 10-year agreement was signed with the Lévis transit commission. As at December 31, 2017, the balance of those commitments stood at $92.5 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2017, the balance of those commitments stood at $641.0 million.

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans are $38.6 million for 2018, based on the most recently filed actuarial report (contributions of $38.3 million were made in 2017).

Related party transactions

In 2017, the Corporation made sales to affiliated corporations in the amount of $2.8 million ($3.0 million in 2016).

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2017, the maximum exposure with respect to these guarantees was $20.5 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation’s subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default on certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

Capital stock

In accordance with Canadian financial reporting standards, Table 13 below presents information on the Corporation’s capital stock as at February 15, 2018. In addition, 780,000 share options were outstanding as of February 15, 2018.

Table 13
Capital stock
(in shares and millions of Canadian dollars)

	February 15, 2018	
	Issued and outstanding	**Book value**
Class A Shares	**77,335,444**	$ **8.6**
Class B Shares	**158,386,784**	$ **300.5**

On August 3, 2016, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 1,000,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of August 3, 2016. The purchases could be made from August 15, 2016 to August 14, 2017 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange (“TSX”) or other alternative trading systems. All the repurchased shares were cancelled.

On August 9, 2017, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 1,000,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares, representing approximately 2.4% of issued and outstanding Class B Shares as of August 1, 2017. The purchases can be made from August 15, 2017 to August 14, 2018 at prevailing market prices on the open market through the facilities of the TSX or other alternative trading systems. All shares purchased under the bid will be cancelled.

On December 15, 2017, the maximum number of Class B Shares that may be repurchased under the Corporation's normal course issuer bid program was increased to 8,400,000, or approximately 9.9% of the public float as at August 1, 2017.

In 2017, the Corporation purchased and cancelled 5,590,700 Class B Shares for a total cash consideration of $127.5 million (1,218,600 Class B Shares for a total cash consideration of $22.7 million in 2016). The $117.0 million excess of the purchase price over the carrying value of the repurchased Class B Shares was recorded in reduction of retained earnings ($20.4 million in 2016).

On November 9, 2017, the Corporation announced that it had entered into an automatic securities purchase plan ("the plan"), as of November 10, 2017, with a designated broker under its normal course issuer bid, whereby shares may be repurchased under the plan at times when such purchases would otherwise be prohibited pursuant to regulatory restrictions or self-imposed blackout periods.

Under the plan, before entering a self-imposed blackout period, the Corporation may, but is not required to, ask the designated broker to make purchases under the normal course issuer bid. Such purchases shall be made at the discretion of the designated broker, within parameters established by the Corporation prior to the blackout periods. Outside the blackout periods, purchases will be made at the discretion of the Corporation's management.

The plan received prior approval from the TSX. It came into effect on November 13, 2017 and terminates on the same date as the normal course issuer bid.

In 2017, 100,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $1.1 million. Following this transaction, the contributed surplus was increased by $1.2 million and the stock-based compensation liability was reduced by the same amount.

On November 15, 2017, the Corporation carried out a two-for-one split of its outstanding Class A Shares and Class B Shares. Accordingly, holders of the Corporation's shares received an additional share for each share owned on the record date of November 15, 2017.

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Competition and technological development

In its cable business, Quebecor Media competes against incumbent local exchange carriers (or "ILECs"). The primary one in Quebecor Media's market holds a regional licence to provide terrestrial broadcasting distribution in Montréal and in several other communities in the Province of Québec. That primary ILEC is rolling out its own Internet Protocol Television (or "IPTV") service throughout the country and, more specifically, in Montréal (including a portion of the greater Montréal area), Québec City, and in other locations in the Province of Québec. It has also secured licences to launch video distribution services using video digital subscriber line (or "VDSL") technology. Quebecor Media's cable business competes against providers of direct broadcast satellite (or "DBS", which in Canada are also referred to as "DTH" for "direct-to-home" satellite providers), multichannel multipoint distribution systems, and satellite master antenna television systems. The direct access to some broadcasters' websites that provide streaming in high definition ("HD") of video-on-demand content is also available for some of the channels that Quebecor Media offers in its television programming. In addition, some third-party Internet service providers ("ISPs") have launched Internet Protocol video services ("IP video services") in territories where Quebecor Media provides services.

Quebecor Media also faces competition from illegal providers of cable television services and illegal access to non-Canadian DBS (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy). Competitors in the video business also include emerging content delivery platforms. Furthermore, OTT content providers, such as Netflix, Apple TV and Amazon Prime Video, as well as Canadian services such as Crave TV, compete for viewership and for a share of the monthly entertainment spending currently allocated to traditional cable television and cable service video-on-demand offerings.

Unlike Quebecor Media, OTT service providers are not subject to CRTC regulations and do not have to contribute financially to the Canadian traditional television business model or Internet infrastructure. Furthermore, foreign providers with no Canadian business place are not required to charge federal and provincial sales tax. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial condition, and results of operations. On September 28, 2017, the Minister of Canadian Heritage and Netflix concluded an arrangement pursuant to which Netflix undertakes to invest a minimum of $500 million in original productions in Canada over the next five years. As part of this arrangement, the federal government has decided not to impose the Goods and Services Tax ("GST") on Netflix's services. Since Quebecor Media's own clients must pay GST when they buy Quebecor Media's services, this decision could place Quebecor Media at a competitive disadvantage.

In its Internet access business, Quebecor Media competes against other ISPs offering residential and commercial Internet access services as well as WiMAX and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line ("DSL"), fibre to the node and fibre to the home technologies, often offering comparable download speeds to Quebecor Media's. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to Quebecor Media's low and medium download speeds. The CRTC also requires cable and ILEC network providers, including Quebecor Media, to offer wholesale access to their high-speed Internet systems to third-party ISP competitors for them to provide retail Internet access services. Those third-party ISP competitors may also provide telephony, television services, IP video services and networking applications. Certain municipalities also plan to build and operate their own broadband networks. They plan to do so through public/private partnership arrangements, competing directly with Quebecor Media in some of its local markets.

Quebecor Media's cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators, and other providers of telephony, television services, voice over Internet Protocol (or "VoIP") and Internet communications, including competitors that are not facility-based and therefore have much lower infrastructure costs. In addition, Internet Protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operation.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current or developing adjunct technologies, such as Wi-Fi, "hotspots" or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides, or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and for many years have been operating lower-cost mobile telephony brands in order to acquire additional market share. In the near future, depending on new regulations, Quebecor Media could see the emergence of non-facility-based operators in the wireless space. Also, Quebecor Media may not be able to compete successfully in the future against existing or potential competitors, and increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

Due to ongoing technological developments, the distinction between traditional platforms (broadcasting, Internet and telephony) is fading rapidly. For instance, emerging Go Platforms such as HBO Go, allow customers to view their traditional television content directly on their mobile devices or computers via Internet connection (although authentication as a broadcasting distribution undertaking's subscriber is still required in Canada). Also, the Internet, through wireline or cable and mobile devices, is an important broadcasting and distribution platform. In addition, mobile operators, with the development of their LTE networks, offer wireless and fixed wireless Internet services. In addition, Quebecor Media's VoIP telephony service also competes with Internet-based solutions.

Moreover, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television or IPTV, Internet, residential and mobile telephony services). Should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing one subscriber for each of its services as a result of its bundling strategy. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operation.

Fierce price competition in all Quebecor Media's businesses and across the industries in which it operates may affect Quebecor Media's ability to raise the price of its products and services in line with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operation.

Significant and rapid technological changes in Media segment

In relation to the Corporation's Media segment, the media industry is experiencing rapid and significant technological changes, which have resulted in alternative means of program and content transmission. The continued growth of the Internet has presented alternative content distribution options that compete with traditional media. Consumers are spending an increasing amount of time on the Internet and on mobile devices and are increasingly viewing content on a time-delayed or on-demand basis from the Internet, on their televisions and on portable devices. These alternative technologies may increase audience fragmentation, reduce the Media segment business's ratings, readership or circulation levels, or have an adverse effect on advertising revenues from local and national advertisers. Furthermore, in Quebecor Media's video distribution markets, industry regulators have authorized DTH, microwave services and VDSL services, and may authorize other alternative methods of transmitting television and other content with improved speed and quality.

The continuous technological improvements to the Internet, combined with higher download speeds and cost reductions for customers, may divert a portion of Quebecor Media's Media segment business' existing television subscriber base from its services to new video-over-the-Internet model. While having a positive impact on the demand for its Internet services, video-over-the-Internet could adversely impact the demand for its other services.

Quebecor Media may not be able to successfully compete with existing or newly developed alternative technologies, such as 5G, Software-defined networking ("SDN") and Network function virtualization ("NFV") technologies, or it may be required to acquire, develop or integrate new technologies. The cost of the acquisition, development or implementation of new technologies could be significant and its ability to fund such implementations may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition, and results of operations.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world (including Canada, the United States and Europe), and has established worldwide coverage. Should it be unable to extend its worldwide coverage, or to renew or substitute for those roaming agreements at their respective or better terms or on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably.

In addition, if Quebecor Media is unable to renew, or substitute for, those roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, financial condition and results of operations could be adversely affected.

Moreover, as of 2015 in Canada, the CRTC decided that each of the three national wireless incumbent carriers would be obliged to provide wholesale roaming services to regional (including Videotron) and new entrant carriers at cost-based rates. A tariff proceeding is currently underway to determine these rates. The result of the wholesale roaming tariff proceeding may have an impact on Quebecor Media roaming cost structure and on the types of retail packages it is able to offer its customers in this regard.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, it cannot be assured that it will continue to enjoy a good reputation, nor can it be assured that events that are beyond its control will not cause its reputation to be negatively impacted. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Higher handset subsidies and increase in BYOD customers

Quebecor Media's mobile telephony business model is based substantially on subsidizing the cost of subscriber handsets, similar to other Canadian wireless carriers. This model attracts customers and in exchange they commit to a term contract. Quebecor Media also commits to a minimum subsidy per unit with the supplier of certain smartphone devices. If Quebecor Media is unable to recover the costs of the subsidies over the term of the customer contract, this could negatively impact its business, prospects, revenues, financial condition, and results of operations.

Also, with the introduction of the CRTC's Wireless Code in 2013 and its revision in 2017, limiting wireless term contracts to two years and eliminating device locking, the number of BYOD customers with no-term contracts has increased. Such customers are under no contractual obligation to remain with Quebecor Media, which could have a material adverse effect on its churn rate and, consequently, on its business, prospects, revenues, financial condition and results of operations.

Inventory obsolescence

Quebecor Media's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, or minimum order quantities from its suppliers, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

Quebecor Media's strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its network and infrastructure to support growth in its customer base and its demands for increased bandwidth capacity and other services. In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its network and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short term, mid term and long term in order to expand and maintain its networks, systems and services, including expenditures relating to advancements in Internet access, HD, Ultra-high definition ("UHD") television, Internet of Things, IPTV and TV everywhere/every platform requiring IP delivery technology, the introduction of virtual reality, as well as the cost of its mobile services' infrastructure deployment, maintenance and enhancement.

New technologies in the telecommunication industry are evolving faster than the historical investment cycle in the industry. The introduction of new technologies and their pace of adoption could result in requirements for additional capital investments not currently planned, as well as shorter estimated useful lives for certain of Quebecor Media's existing assets.

The demand for wireless data services has been growing at high rates and it is projected that this demand will further accelerate, driven by increases in the following: levels of broadband penetration; need for personal connectivity and networking; affordability of smartphones and Internet-only devices (e.g., high-usage data devices such as mobile Internet keys, tablets and electronic book readers); multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum, if available and if economically reasonable, in order to address this increased demand. The ability to acquire additional spectrum (if needed) is dependent on the timing and the rules established by Innovation, Science and Economic Development ("ISED") Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

The development, maintenance and enhancement of Quebecor Media's LTE network requires capital expenditures to remain competitive and to comply with its obligations under the agreement with its partner governing the joint build-out of its LTE network. A geographical expansion or densification of its LTE network may require Quebecor Media to incur significant costs and to make significant capital expenditures.

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to finance any portion of these capital improvement programs, new strategies and services, or other capital expenditure requirements, whether through cash from operations, additional borrowings or other sources. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected. Even if Quebecor Media were able to obtain adequate funding, the period of time required to upgrade its network could have a material adverse effect on its ability to successfully compete in the future. Moreover, additional investments in its business may not translate into incremental revenues, cash flows or profitability.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable network. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the "*Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies on its service territory. Should Quebecor Media seek to renew or renegotiate those agreements, it cannot guarantee that they will continue to be available on their respective terms, or on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage and which may have a material adverse effect on its business and prospects.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, maintaining its advanced broadband network, pursuing enhanced content development to reduce costs, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its businesses. Quebecor Media may not be able to implement those strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement those strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, and other factors described in this section. While the centralization of certain business operations and processes has the advantage of standardizing practices, thereby reducing costs and increasing effectiveness, it also represents a risk in itself should a business solution implemented throughout the organization by a centralized office fail to produce the intended results. Quebecor Media may also be required to make capital expenditures or other investments that may affect its ability to implement its business strategies if it is unable to secure additional financing on acceptable terms or to generate sufficient funds internally to cover those requirements. Any material failure to implement its strategies could have a material adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating expenditures in the future. It can provide no assurance that it will be successful in developing new activities in relation to those engagements, including the development of new revenue sources.

Consumers' trend to abandon cable telephony and television services

The recent trend towards mobile substitution or "cord-cutting" (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada and the various unlimited offers launched by mobile operators. In addition, there is also a consumer trend to abandon and substitute wire and cable television for Internet access services in order to stream directly from broadcasters and OTT content providers. Quebecor Media may not be successful in converting its existing cable telephony subscriber base to its mobile telephony services or in attracting customers to its OTT entertainment platforms, which could have a material adverse effect on its business, prospects, revenues, results of operations and financial condition.

Rapid growth of traffic volumes on the Internet

Internet users are downloading an increasing amount of data each year and households are connected to the Internet through a combination of several computers, tablets and other mobile devices, leading to simultaneous flows per home. In addition, some content on the Internet, such as videos, is available at a higher bandwidth for which HD, as opposed to standard definition, has become the norm. OTT service providers have recently started streaming UHD content, which uses even more bandwidth than HD services. There has therefore been an increase in data consumption and an intensification of Internet traffic during peak periods, which calls for increased bandwidth capacity to address customer needs.

Equipment costs are under pressure in an effort to counterbalance customer demand for bandwidth. While Quebecor Media can relay some of this pressure on costs to its manufacturers, can adopt new technologies that reduce costs or implement other cost-reduction initiatives, Quebecor Media's inability to fully meet its customers' increasing need for bandwidth may result in client losses, price increases or reduced profitability.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, prospects, results of operations and financial condition. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, prospects, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant capital expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that management may not be able to successfully manage the development of its Sports and Entertainment business; that the development of its Sports and Entertainment business may place significant demands on management, diverting attention from existing operations; that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the development of its Sports and Entertainment business; and the risk associated with a failure to make continued investments in its Sports and Entertainment business in order to respond to consumer trends and demands, which could adversely affect its ability to compete in the sports and entertainment industry.

Implementation of changes to the structure of its business

Quebecor Media has and will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement or upgrade, a process redesign, and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits.

The implementation process may lead to greater-than-expected operational challenges and costs, expenses, customer loss, and business disruption for Quebecor Media, which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor's failure to recruit, train and retain such employees could have a material adverse effect on its business, prospects, results of operations and financial condition. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance, maintain content quality, continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

Advertising revenue is the primary source of revenue for the Corporation's Media segment. Quebecor Media's revenues and operating results in those businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Those economic factors affect the levels of retail and national advertising revenues of the media properties of Quebecor Media. Since a significant portion of Quebecor Media's advertising revenues is derived from retail and automotive sector advertisers, weakness in those sectors and in the real estate industry has had, and may continue to have an adverse impact on the revenues and results of operations of the Media segment. Continuing or deepening softness in the Canadian or U.S. economy could further adversely affect key national advertising revenues.

Advertising revenues for the Media segment are also driven by readership and circulation levels, as well as by market demographics, price, service, and advertiser results. Readership and circulation levels tend to be based on the content of the newspaper or magazine, service, availability and price. A prolonged decline in readership and circulation levels in Quebecor Media's newspaper and magazine businesses and lack of audience acceptance of its content would have a material effect on the rate and volume of its newspaper and magazine advertising revenues (as rates reflect circulation and readership, among other factors), and could also affect its ability to institute circulation price increases for its print products, all of which could have a material adverse effect on its business, prospects, results of operations, and financial condition.

The newspaper and magazine industry is experiencing structural changes, including the growing availability of free access to content, shifting readership habits, digital transferability, the advent of real-time information and secular changes in the advertising industry, as well as the declining frequency of regular newspaper and magazine buying, particularly among young people, who increasingly rely on non-traditional media as a source for news and information. As a result, competition for advertising spend and circulation revenues comes not only from other newspapers and traditional media, but also from digital media technologies, which have introduced a wide variety of media distribution platforms (including, most significantly, the Internet and distribution over wireless devices and e-readers) for readers and advertisers.

While Quebecor Media continues to pursue initiatives to offer value-added advertising solutions to its advertisers and to slow down the decline of its circulation base, such as investments in the redesign and overhaul of its newspaper and magazine websites and the publication of e-editions of a number of its newspapers and magazines, it may not be successful in converting its advertising revenues or in transferring its audience to its new digital products. The ability of the Media segment to succeed over the long-term depends on various factors, including its ability to attract advertisers and readers (including subscribers) to its online sites. Quebecor Media's new initiatives, developed to generate additional revenues from its websites (such as digital platform advertising), may not be accepted by users and consequently may negatively affect online traffic. In addition, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of those initiatives through increased circulation, advertising and digital revenues.

In broadcasting, the proliferation of television channels, progress in mobile and wireless technology, the migration of television audiences to the Internet, including social networks, and the viewing public's increased control over the manner, content and timing of their media consumption through personal video recording devices, have all contributed to the fragmentation of the television viewing audience and to a more challenging advertising sales environment. For example, the increased availability of personal video recording devices and video programming on the Internet, as well as the increased access to various media through mobile devices, may each have the potential to reduce the viewing of its content through traditional distribution outlets. Some of these new technologies also give consumers greater flexibility to watch programming on a time-delayed or on-demand basis, or to fast-forward or skip advertisements within its programming, which may adversely impact the advertising revenues it receives. Delayed viewing and advertisement skipping have the potential to become more common as the penetration of personal video recording devices increases and content becomes increasingly available via Internet sources. If the broadcasting market continues to fragment, Quebecor Media's audience share levels and its advertising revenues, business, prospects, results of operations and financial condition could be materially adversely affected.

Distribution of a wide range of television programming

The financial performance of its cable and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing, conveniently scheduled television programming at reasonable rates on its platforms. Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, those suppliers have become vertically integrated and are now more limited in number. The quality and amount of television programming offered by Quebecor Media affect the attractiveness of its services to customers and, accordingly, the rates Quebecor Media can charge for such services. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates, or its inability to pass-through rate increases to its customers could have a material adverse effect on its business, prospects, results of operations, and financial condition.

In addition, Quebecor Media's ability to attract and retain cable customers depends, to a certain extent, on its capacity to offer quality content, HD and UHD programming, an appealing variety of programming choices and packages, as well as multiplatform distribution and on-demand content at competitive prices. If the number of specialty channels being offered does not increase at the level and pace comparable to its competitors, if the content offered on such channels does not receive audience acceptance, or if it is unable to offer multiplatform availability, HD and UHD programming and on-demand content for capacity reasons, among others, this may have a negative impact on revenues from Quebecor Media's cable operations.

The multiplicity of foreign and deregulated content providers (often global players on the Internet) puts pressure on the viability of Quebecor Media's current business model for television distribution. Substantial capital expenditures on infrastructure and on research and development may be required to remain competitive.

Costs, quality, and variety of television programming

The most significant expenses in television broadcasting are programming and production costs. Increased competition in the television broadcasting industry, developments affecting producers and distributors of programming content, the vertical integration of distributors and broadcasters, introduction from various OTT providers of original and exclusive programming, changes in viewer preferences and other developments could impact both the availability and the costs of programming content, as well as production costs. Future increases or volatility in programming and production costs could adversely affect Quebecor's operating results. Developments in cable, satellite or other forms of distribution could also affect both the availability and the cost of programming and production and increase competition for advertising expenditures. As well, the value of royalties payable pursuant to the *Copyright Act* (Canada) are frequently decided by the Copyright Board of Canada during or even after the applicable period, which can cause retroactive increases in content costs.

Launch of new specialty services

Quebecor Media is investing in the launch of new specialty services in its Broadcasting operations. During the period immediately following the launch of a new specialty service, subscription revenues are always relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize, or may never materialize.

Loss of key customers

The Corporation's businesses are based primarily on customer satisfaction with reliability, timeliness, quality, and price. In general, Quebecor Media does not have long-term or exclusive service agreements with its customers. Quebecor Media is unable to predict if, or when, its customers will purchase its services. There can be no assurance that the revenues generated from key customers, individually or in the aggregate, will reach or exceed historical levels in any future period, or that it will be able to develop relationships with new customers. Quebecor Media cannot assure that it will continue to maintain favourable relationships with its customers or that they will not be adversely affected by economic conditions.

Single-clustered network

Quebecor Media provides its digital television, Internet access, cable telephony and mobile telephony services through a primary headend and through 12 additional regional headends in a single-clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as cyberattacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its network until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation, and could have a material effect on its financial condition.

Cybersecurity

The ordinary course of Quebecor Media's telecommunications, media and data-storage businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, as well as personally identifiable information on its customers and employees, whether in its data centres, systems, infrastructure, networks and processes, or those of its suppliers. The secure processing, maintenance and transmission of this information is critical to its operations and business strategy.

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against unauthorized access to, or use of sensitive data, including data on its customers, and to prevent data loss, and although ever-evolving cyberthreats require Quebecor Media to continually evaluate and adapt its data centres, systems, infrastructure, networks and processes, Quebecor Media cannot assure that its data centres, systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against all information security access by third parties or errors by employees or by third-party suppliers. If Quebecor Media is subject to a significant cyberattack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

In addition, the preventive actions Quebecor Media takes to reduce the risks associated with cyberattacks, including protection of its data centres and information assets, as well as efforts to improve the overall governance over information security and the controls within its IT systems, may be insufficient to repel or mitigate the effects of a major cyberattack in the future.

Protection of personal data

Quebecor Media stores and processes increasingly large amounts of personally identifiable information on its clients, employees, and/or business partners. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data in, and hosted on its systems, or those belonging to its suppliers, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed systems, processes and security controls that are designed to protect the personally identifiable information on its clients, employees and business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breach relating to such data that Quebecor Media stores or processes or that its suppliers store or process. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers. An inability to maintain and enhance its existing information technology systems, or to obtain new systems to accommodate additional customer growth or support new products and services, could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, and manage operating expenses, all of which may have a material adverse effect on its business, prospects, results of operations and financial condition.

Products and services supplied to Quebecor Media by third-party suppliers may contain latent security issues, including but not limited to software security issues, that would not be apparent upon a diligent inspection. Failure to identify and remedy those issues could adversely impact its results of operations and financial condition.

Malicious and abusive Internet practices

Quebecor Media's cable data, mobile data and fibre-optic connectivity business customers utilize its network to access the Internet and, as a consequence, Quebecor Media or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms, and other destructive or disruptive software. Such activities could have adverse consequences on its network and its customers, including deterioration of service, excessive call volumes to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its network. Any significant loss of cable data, mobile data or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, results of operations, and financial condition.

Protection from piracy

In its cable television, Internet access, OTT and telephony business, Quebecor Media may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its network, digital programming, and Internet access services. It uses encryption technology to protect its cable signals and OTT from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its network, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Third-party suppliers and providers

Quebecor Media depends on third-party suppliers and providers for certain services, hardware, licenced technological platforms and equipment that are, or may become, critical to its operations and network evolution. These materials and services include set-top boxes, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, licenced technological platforms, software, the “backbone” telecommunications network for Internet access and telephony services, and construction services for the expansion of and upgrades to its cable and mobile networks. These services and equipment are available from a single or limited number of suppliers and Quebecor Media therefore faces the risks of supplier disruption, including business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards, or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services and other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with content providers, comply with their technological requirements, or find alternative sources of equivalent content, its Media operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor’s reputation, results of operations, liquidity or financial condition, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management’s attention could be significant.

Intellectual property rights

Quebecor Media relies on its intellectual property, such as patents, copyrights, trademarks and trade secrets, as well as licences and other agreements with its vendors and other third parties, to use various technologies, conduct its operations and sell its products and services. Legal challenges to its intellectual property rights, or the ones of third-party suppliers, and claims of intellectual property infringement by third parties could require that it enters into royalty or licensing agreements on unfavourable terms, incur substantial monetary liability, or be enjoined preliminarily or permanently from further use of the intellectual property in question or from the continuation of its businesses as currently conducted. Quebecor Media may need to change its business practices if any of these events occur, which may limit its ability to compete effectively and could have an adverse effect on its results of operations. In the event that it believes any such challenges or claims are without merit, they can nonetheless be time-consuming and costly to defend and divert management’s attention and resources away from its businesses. Moreover, if Quebecor Media is unable to obtain or continue to obtain licences from its vendors and other third parties on reasonable terms, its businesses could be adversely affected.

Piracy and other unauthorized uses of content are made easier, and the enforcement of Quebecor Media’s intellectual property rights more challenging, by technological advances. The steps Quebecor Media has taken to protect its intellectual property may not prevent the misappropriation of its proprietary rights. Quebecor Media may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to Quebecor Media’s. Also, Quebecor Media may not be able to discover or determine the extent of any unauthorized use of its proprietary rights. Unauthorized use of its intellectual property rights may increase the cost of protecting these rights or reduce its revenues. Quebecor Media cannot be sure that any legal actions against such infringers will be successful, even when its rights have been infringed.

Strikes and other labour protests

At December 31, 2017, 54% of Quebecor Media's employees were represented by collective bargaining agreements. Through its subsidiaries, Quebecor Media is currently party to 31 collective bargaining agreements.

Quebecor Media is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial condition, results of operations and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund those pension plans will not increase in the future and therefore negatively impact its operating results and financial condition. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes and cable modems, certain mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations and financial condition.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2017, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favourable terms, or at all, in the future or, pursuant to the terms of these hedging transactions, its counterparties thereto may owe the Corporation significant amounts of money and may be unable to honour such obligations, all of which could have an adverse effect on its results of operations and financial condition.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2017, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $557.7 million on a consolidated basis.

Some of its suppliers source their products out of the U.S.; therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations in the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations and financial condition.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, changed or increased regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to conserve cash until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as those could adversely impact Quebecor's results of operations, cash flows, financial condition and prospects.

Ethical business conduct

Any failure or perceived failure to adhere to Quebecor's policies, the law or ethical business practices could have a significant effect on its reputation and brands and could therefore negatively impact its financial performance. Quebecor's framework for managing ethical business conduct includes the adoption of a Code of Ethics, which its directors and employees are required to acknowledge and agree to on a regular basis, and, as part of an independent audit and security function, maintain a whistle-blowing hotline. There can be no assurance that these measures will be effective enough to prevent violations or perceived violations of law or ethical business practices.

Asset impairment charges

In the past, the Corporation has recorded asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flows.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause a diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel, and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, or the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In the Quebecor Media's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its telecommunications business competitors have pursued a strategy of selling their products through independent retailers to extend their presence on the market, while some have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of Quebecor Media's retail network and may contribute to isolating Quebecor Media from its competitors, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licences. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. Although the federal government eliminated the foreign ownership restrictions on telecommunications companies with less than 10% of total Canadian telecommunications market revenues, there are significant restrictions on the ability of non-Canadian entities to own or control broadcasting licences and telecommunications carriers in Canada. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licences, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. For instance, the CRTC introduced some form of rate regulation following its commonly referred to "Lets talk TV" public consultations on television broadcasting and distribution. Consequently, Quebecor Media must offer a reduced basic service at $25 since March 1, 2016 and offer all specialty services "à la carte" since December 1, 2016. Moreover, the CRTC adopted a Wireless Code which regulates numerous aspects of the provision of retail wireless services and a new Television Service Provider Code which regulates numerous aspects of the provisions of retail television services, which became effective as of September 1, 2017. Finally, the CRTC, in response to a directive received from the Governor in Council, recently initiated a proceeding to consider whether to grant access to non-facilities-based wireless service providers, including those whose customers rely primarily on non-carrier Wi-Fi networks (referred to as "Wi-Fi first service providers"), to the wholesale roaming service tariffs of the national wireless carriers. Such a change could have the effect of introducing mandatory resale into the wireless marketplace, to the detriment of facilities-based wireless competitors. Quebecor Media's wireless and cable operations are also subject to technical requirements, licence conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

In addition, laws relating to communications, data protection, e-commerce, direct marketing, and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes to the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions, may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of licence, the issuance of new licences, including additional spectrum licences, to its competitors, or changes to the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), prospects, results of operations and financial condition. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. It is difficult to predict in what form laws and regulations will be adopted or how they will be construed by the relevant courts or the extent to which any changes might adversely affect Quebecor Media.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographic products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes to the policies or rules of application in Canada or in any of its provinces in connection with government incentive programs, including any change in the Québec or federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its results of operations and financial condition. Canadian content programming is also subject to certification by various federal government agencies. If programs fail to so qualify, the Corporation would not be able to use the programs to meet its Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

To ensure that the Corporation maintains minimum levels of Canadian ownership under the *Broadcasting Act* and other legislation under which it derives the benefit of tax credits and industry incentives, it has placed constraints on the issuance and transfer of shares of certain of its subsidiaries.

In addition, the Canadian and provincial governments currently provide grants and incentives to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation's Film Production & Audiovisual Services Business, as well as content producers for its television broadcasting and production operations, finance a portion of their production budgets through Canadian government incentive programs, including federal and provincial tax credits. There can be no assurance that the government grants and incentive programs presently being offered to participants in the film and television production industry will continue at their present levels or at all. If such grants or incentives are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced and, as a result, the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions around the world, including by many states in the United States. Some producers may select locations other than Québec to take advantage of tax credit programs that they conclude to be more, or as attractive as those Québec offers. Other factors such as director or star preference may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation's business, results of operations and financial condition.

Licence renewals

Videotron's AWS-1 licences were issued in December 2008 for a 10-year term. The conditions of AWS-1 licence renewal were the subject of a public consultation process that concluded on August 14, 2017. A separate public consultation process is expected to be initiated shortly regarding the licence fees to be paid during a renewal term. Decisions from both these processes are expected prior to the expiry of its initial 10-year licences.

Videotron's other spectrum licences, including in the AWS-3, 700 MHz and 2500 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of those respective terms, applications may be made for new licences for a subsequent term through a renewal process, unless a breach of licence conditions by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licences, including the terms and conditions of the new licences and whether licence fees should apply for a subsequent licence term, are expected to be determined by ISED Canada following public consultations.

If, at the end of their respective term, the licences are not renewed on acceptable terms, or at all, Quebecor Media's ability to continue to offer its wireless services, or to offer new services, may be negatively impacted and, consequently, it could have a material adverse effect on its business, prospects, results of operations and financial condition.

Provision of third-party ISPs with access to cable systems

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide third-party ISPs with access to their cable systems at mandated cost-based rates. Several third-party ISPs are interconnected to Quebecor Media's cable network and are thereby providing retail Internet access services.

In a series of decisions since 2015, the CRTC has reemphasized the importance it accords to mandated wholesale access arrangements as a driver of competition in the retail Internet access market. Most significantly, the CRTC has ordered all of the major telephone and cable companies, including Videotron, to provide new disaggregated wholesale access services, which are to replace existing aggregated wholesale access services after a transition period. These new disaggregated services will involve third-party ISPs provisioning their own regional transport services. They will also include, for the first time, mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. A tariff proceeding is under way to set the rates for these new disaggregated wholesale services. In parallel, on October 6, 2016, the CRTC ordered a significant interim reduction to the tariff rates for the existing aggregated wholesale services. A second tariff proceeding is under way to set revised final rates for these services while work moves forward on implementing the disaggregated services. Rulings in both tariff proceedings are expected in the first half of 2018. As a result of these rulings, Quebecor Media may experience increased competition for retail cable Internet and telephony customers. In addition, because its third-party Internet access rates are regulated by the CRTC, the Corporation could be limited in its ability to recover its costs associated with providing this access.

Environmental laws and regulations

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air and water and sewer discharge, the handling and disposal of hazardous materials and waste, including electronic waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have recently implemented Extended Producer Responsibility regulations in order to encourage sustainability practices, such as the "Ecological recovery and reclamation of electronic products," which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future. Evolving public expectations with respect to the environment and increasingly stringent laws and regulations could result in increased costs of compliance, and failure to recognize and adequately respond to them could result in fines, regulatory scrutiny, or have a significant effect on Quebecor Media's reputation and brands.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditures will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain studios and vacant lots, some of which are located on a former landfill, with the presence of gas-emitting waste. As a result, the operation and ownership of these studios and vacant lots carries an inherent risk of environmental and health and safety liabilities for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs, and other environmental damages (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in being involved from time to time in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Concerns about alleged health risks relating to radiofrequency emissions

All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied meets all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations. Videotron is currently a defendant, along with all other major wireless providers in the Province of Québec, in an authorization demand for a class action on this particular concern.

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2017, it had $5.54 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2017, it had approximately $1.54 billion available for additional borrowings under its existing credit facilities on a consolidated basis and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;

- create liens;
- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities. Its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including its Senior Notes. If Quebecor's indebtedness is accelerated, it may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flows of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding, and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flows from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flows and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flows to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, prospects, results of operations and financial condition.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favourable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's directors, while

holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. As of December 31, 2017 approximately 74.84% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of Class A directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing, or deterring a change in control of Quebecor; could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency, (ii) to achieve a targeted balance of fixed- and floating-rate debts, and (iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
As of December 31, 2017
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.2936	$ 151.4	US$ 117.0

Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan “B”	2013 to 2020	US$ 335.1	Bankers’ acceptance 3 months + 2.77%	1.0346
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers’ acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses on valuation and translation of financial instruments for 2017 and 2016 are summarized in Table 15.

Table 15
Loss on valuation and translation of financial instruments
(in millions of Canadian dollars)

	2017	2016
Loss on embedded derivatives related to convertible debentures	**$ 197.4**	$ 68.2
Loss on the ineffective portion of fair value hedges	**3.0**	2.0
Loss on the ineffective portion of cash flow hedges	**–**	0.1
Gain on embedded derivatives related to long-term debt	**(0.6)**	(0.2)
Loss on reversal of embedded derivatives on debt redemption	**–**	0.2
	$ 199.8	$ 70.3

A gain on cash flow hedges of $43.7 million was recorded under "Other Comprehensive Income" in 2017 (loss of $30.9 million in 2016).

Fair value of financial instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or of the Corporation.

The fair value of early settlement options recognized as embedded derivatives and embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2017 and December 31, 2016 were as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

	December 31, 2017		December 31, 2016	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1,2]	**$ (5 572.1)**	**$ (5 883.3)**	$ (5 700.8)	$ (5 866.6)
Convertible debentures[3]	**(888.5)**	**(888.5)**	(780.0)	(780.0)
Derivative financial instruments[4]				
Early settlement options	**–**	**–**	0.4	0.4
Foreign exchange forward contracts[5]	**(4.5)**	**(4.5)**	2.5	2.5
Interest rate swaps	**–**	**–**	(0.3)	(0.3)
Cross-currency interest rate swaps[5]	**562.2**	**562.2**	806.5	806.5

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk, embedded derivatives and financing fees.

2 The fair value of long-term debt does not include the fair value of early settlement options, which is presented separately in the table.

3 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

4 The fair value of derivative financial instruments designated as hedges is an asset position of $557.7 million as of December 31, 2017 ($808.7 million as of December 31, 2016).

5 The value of foreign exchange forward contracts entered into to lock in the value of existing hedging positions is netted from the value of the offset financial instruments.

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2017, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation establishes an allowance for doubtful accounts based on the specific credit risk of its customers and historical trends. As of December 31, 2017, 11.3% of trade receivables were 90 days past their billing date (13.0% as of December 31, 2016) of which 31.1% had an allowance for doubtful accounts (32.5% as of December 31, 2016).

The following table shows changes to the allowance for doubtful accounts for the years ended December 31, 2017 and 2016:

	2017	2016
Balance at beginning of year	**$ 28.1**	$ 23.0
Charged to income	**21.6**	36.1
Utilization	**(28.6)**	(31.0)
Balance at end of year	**$ 21.1**	$ 28.1

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.9 years as of December 31, 2017 (6.1 years as of December 31, 2016) (see also "Contractual Obligations" above).

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2017, and to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on "Other Comprehensive Income," before income tax, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2017 is as follows:

Increase (decrease)	**Income**	**"Other comprehensive income"**
Increase of $0.10	**$ 1.6**	**$ 40.4**
Decrease of $0.10	**(1.6)**	**(40.4)**

A variance of $0.10 in the 2017 average exchange rate of CAN dollar per one U.S. dollar would had resulted in a variance of $3.2 million on the value of unhedged purchases of goods and services in 2017 and $5.7 million on the value of unhedged acquisitions of tangible and intangible assets in 2017.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2017, after taking into account the hedging instruments, long-term debt was comprised of 84.7% fixed-rate debt (83.2% in 2016) and 15.3% floating-rate debt (16.8% in 2016).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2017 was $7.7 million.

The estimated sensitivity on income and on "Other Comprehensive Income," before income tax, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures, as of December 31, 2017, as per the Corporation's valuation models, is as follows:

Increase (decrease)		Income		"Other comprehensive income"
Increase of 100 basis points	$	**(1.4)**	$	**(21.2)**
Decrease of 100 basis points		**1.4**		**21.2**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2017 and 2016 was as follows:

Table 17
Capital structure of Quebecor
(in millions of Canadian dollars)

		2017		2016
Bank indebtedness	**$**	**0.8**	$	18.9
Long-term debt		**5,536.6**		5,668.7
Embedded derivatives related to convertible debentures		**442.2**		290.0
Convertible debentures		**450.0**		500.0
Derivative financial instruments		**(557.7)**		(808.7)
Cash and cash equivalents		**(864.9)**		(22.3)
Net liabilities		**5,007.0**		5,646.6
Equity	**$**	**1,206.1**	$	847.2

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, inter-corporation transactions, and the declaration and payment of dividends or other distributions.

Contingencies

There are a number of legal proceedings against the Corporation and its subsidiaries that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on Corporation's results or on its financial position.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation recognizes operating revenues when the following criteria are met:

- the amount of revenue can be measured reliably;
- the receipt of economic benefits associated with the transaction is probable;
- the costs incurred or to be incurred in respect of the transaction can be measured reliably;

- the stage of completion can be measured reliably where services have been rendered; and
- significant risks and rewards of ownership, including effective control, have been transferred to the buyer where goods have been sold.

The portion of revenue that is unearned is recorded under “Deferred revenue” when customers are invoiced.

Telecommunications

The Telecommunications segment provides services under arrangements with multiple deliverables for which there are two separate accounting units: one for subscriber services (cable television, Internet access, cable or mobile telephony and OTT video service, including connection costs and rental of equipment); the other for equipment sales to subscribers. Components of multiple deliverable arrangements are separately accounted for, provided the delivered elements have stand-alone value to the customer and the fair value of any undelivered elements can be objectively and reliably determined. Arrangement consideration is allocated among the separate accounting units based on their relative fair values.

The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and OTT video service are recognized when services are provided. Promotional offers and rebates are accounted for as a reduction in the service revenue to which they relate;
- Revenues from equipment sales to subscribers and their costs are recognized in income when the equipment is delivered. Promotional offers related to equipment, with the exclusion of mobile devices, are accounted for as a reduction in related equipment sales on delivery, while promotional offers related to the sale of mobile devices are accounted for as a reduction in related equipment sales on activation;
- Operating revenues related to service contracts are recognized in income over the life of the specific contracts on a straight-line basis over the period in which the services are provided;
- Cable connection revenues are deferred and recognized as revenues over the estimated average period that subscribers are expected to remain connected to the network. The incremental and direct costs related to cable connection costs, in an amount not exceeding the revenue, are deferred and recognized as an operating expense over the same period. The excess of those costs over the related revenues is recognized immediately in income.

Media

The Media segment recognizes each of its main activities’ revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines, or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment rental revenues are recognized over the rental period;
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities’ revenues as follows:

- Revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Revenues from leasing and from ticket (including season tickets), food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising under the form of venue signage or sponsorships, are recognized ratably over the period of the agreement;
- Revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result if no impairment loss had previously been recognized.

The determination of CGUs requires judgment when determining the lowest level for which there are separately identifiable cash inflows generated by the group of assets.

In addition, when determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU.

Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2017 was $2.70 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2017 was $490.1 million.

Useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and the future expectation regarding the use of the spectrum licences. Therefore, the determination that spectrum licences have an indefinite useful life involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management changed its conclusion in the future.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging items and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of derivative financial instruments when the hedge is put in place and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on principal payments on foreign-currency-denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge: (i) foreign currency rate exposure on interest and principal payments on foreign-currency-denominated debt, and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in “Other Comprehensive Income” until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated “Other Comprehensive Income” are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, such as early settlement options on long-term-debt, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Early settlement options are accounted for separately from the debt when the corresponding option exercise price is not approximately equal to the amortized cost of the debt.

The judgment used in determining the fair value of derivative financial instrument including embedded derivatives, using valuation and pricing models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income, and the value of the gain or loss on derivative financial instruments recorded in the consolidated statements of comprehensive income. Also, valuation and financial models are based on a number of assumptions, including future cash flows, period-end swap rates, foreign exchange rates, credit default premium, volatility, discount factors, and underlying instrument adjusted implicit interest rate and credit premium.

In addition, judgment is required to determine if an option exercise price is not approximately equal to the amortized cost of the debt. This determination may have a significant impact on the amount of gains or losses on valuation and translation of financial instruments recorded in the consolidated statements of income.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Determination of the fair value of the embedded derivatives is based on a number of assumptions, including contractual future cash flows, volatility and discount factors. The judgment used in determining the fair value of embedded derivatives, using valuation models, may have a significant effect on the value of the gain or loss on valuation and translation of financial instruments recorded in the consolidated statements of income.

Pension and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "Other Comprehensive Income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future and the minimum funding liability, is based on a number of assumptions, including future service costs and future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of those assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") and performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

The judgment and assumptions used in determining the fair value of the stock-based compensation liability may have an effect on the compensation cost recorded in the statements of income.

Provisions

Provisions are recognized when: (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statement of income in the reporting period in which changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time and is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Allowance for doubtful accounts

The Corporation maintains an allowance for doubtful accounts to cover anticipated losses from customers who are unable to pay their debts. The allowance is reviewed periodically and is based on an analysis of specific significant accounts outstanding, the age of the receivable, customer creditworthiness, and historical collection experience.

Business combinations

A business combination is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed. The judgments made in determining the estimated fair value and the expected useful life of each acquired asset, and the estimated fair value of each assumed liability, can significantly impact net income.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under “Impairment of assets.”

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be subsequently reduced, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation’s future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Recent accounting pronouncements

i) IFRS 9 – *Financial Instruments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018.

   On January 1, 2018, the Corporation will adopt the new rules under IFRS 9 which simplifies the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement.* The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

   The adoption of IFRS 9 will have no material impact on the consolidated financial statements.

ii) IFRS 15 – *Revenue from Contracts with Customers* is required to be applied retrospectively for annual periods beginning on or after January 1, 2018.

   On January 1, 2018, the Corporation will adopt on a fully retrospective basis the new rules under IFRS 15 which specifies how and when an entity should recognize revenue as well as requiring such entities to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to be applied to all contracts with customers.

The adoption of IFRS 15 will have significant impacts on the consolidated financial statements, mainly in the Telecommunications segment, with regards to the timing in the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs, such as costs to obtain a contract and connection costs.

Under IFRS 15, the total consideration from a contract with multiple deliverables will be allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile devices and services under contracts with multiple deliverables and for a fixed period of time. Under IFRS 15, promotional offers related to the sale of mobile devices previously accounted for as a reduction of related equipment sales on activation, now need to be considered in the relative total consideration to be allocated to all performance obligations. Among other impacts, the adoption of IFRS 15 will result in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of these revenues will therefore change under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract will remain the same as under the previous rules. The portion of revenues that is earned without having been invoiced will be presented as contract assets in the consolidated balance sheets. All other types of revenues have not been impacted by the adoption of IFRS 15.

In addition, under IFRS 15, certain costs, mainly sales commissions, to obtain a contract will be capitalized and amortized as operating expenses over the contract term or over the period of time the customer is expected to remain a customer of the Corporation. Currently, such costs are expensed as incurred. Also, the capitalization of connection costs will no longer be limited to the related connection revenues as it is under the current rules. These capitalized costs will be included in “Other assets” as contract costs in the consolidated balance sheet.

The retroactive adoption of IFRS 15 will have the following impacts on the 2017 and 2016 consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		**2017**		2016
Revenues	**$**	**22.4**	$	52.5
Purchases of goods and services		**(12.4)**		(13.2)
Deferred income tax expense		**9.2**		17.4
Net income and comprehensive income		**25.6**		48.3
Net income and comprehensive income attributable to:				
Shareholders	**$**	**20.8**	$	39.2
Non-controlling interests		**4.8**		9.1
Earnings per share attributable to shareholders	**$**	**0.09**	$	0.16

Consolidated balance sheets

Increase (decrease)		**December 31, 2017**		December 31, 2016
Contract assets	**$**	**183.6**	$	155.8
Other assets		**92.5**		85.4
Deferred income tax liability		**73.2**		63.9
Retained earnings		**165.4**		143.7
Non-controlling interests		**37.5**		33.6

iii) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019, with early adoption permitted, provided that the IFRS 15 is applied at the same time as IFRS 16.

IFRS 16 sets out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities.

Under IFRS 16, most lease charges will be expensed as an asset amortization charge, along with a financial charge on the asset related financial liabilities. Since operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the statement of income.

The Corporation expects that the adoption of IFRS 16 will have significant impacts on its consolidated financial statements since all of the Corporation segments are engaged in various long-term leases on premises and equipment. However, the adoption impacts on the consolidated financial statements have not yet been measured.

Controls and procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Senior Vice-President and Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2017, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the time frames prescribed by this legislation. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the Corporation's IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by management during the financial period beginning October 1, 2017 and ending December 31, 2017.

Additional information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;
- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing Quebecor Media's network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its digital cable television, Internet access, telephony and Club illico services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;

- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the Corporation's public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the "Risks and Uncertainties" section above.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of March 14, 2018, and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 56 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company with an interest in Quebecor Media Inc., one of Canada's largest telecommunications and media groups. On June 22, 2018, Quebecor Media Inc. became a wholly owned subsidiary of Quebecor Inc. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, in this Management Discussion and Analysis, "Quebecor" and the "Corporation" refer to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), a subsidiary of the Caisse de dépôt et placement du Québec, for an aggregate purchase price of $37.7 million, paid in cash. On the same date, Quebecor Media also paid off a security held by CDP Capital for $6.2 million. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.07% to 81.53%.

On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital for a total aggregate purchase price of $1.54 billion, paid in cash. On June 22, 2018, Quebecor purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital in consideration of the issuance of a convertible debenture in the principal amount of $150.0 million, convertible into Class B Subordinate Voting Shares ("Class B Shares") of Quebecor. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.53% to 100.0%.

On January 1, 2018, the Corporation adopted, on a fully retroactive basis, the new rules under IFRS 15, *Revenue from Contracts with Customers*, which specify how and when an entity should recognize revenue. The adoption of IFRS 15 had significant impacts on the consolidated financial statements, mainly in the Telecommunications segment, regarding the timing of the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs. Among other impacts, the adoption of IFRS 15 resulted in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. As well, costs to obtain a contract and connection costs are now fully amortized as operating expenses over the contract term or over the period of time the customer is expected to maintain its service. A description of the new rules, and details of the retroactive adjustments to comparative data, are provided under "Changes in accounting policies" below. As well, to clarify the impact of IFRS 15 on non-IFRS measures, columns presenting the non-IFRS measures without application of IFRS 15 have been added to the tables showing the calculation and reconciliation of non-IFRS measures, as presented under "Non-IFRS financial measures."

Following adoption of IFRS 15, and to reflect changes in its activities and services, including the growth of its mobile telephony business, the Corporation reviewed the nature and definition of its key performance indicators. Accordingly, average monthly revenue per user ("ARPU") has been abandoned and replaced by a new metric, average billing per unit ("ABPU"). ABPU will be used henceforth to measure the performance of mobile activities and the performance of all activities combined. The definition of the new ABPU metric is provided under "Key performance indicators" below. The definition of a revenue-generating unit ("RGU") has also been added in the same section; the nature and calculation of the metric are unchanged.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: mobile and cable telecommunications; Internet access; cable television; over-the-top ("OTT") video service; business telecommunications solutions; broadcasting; soundstage and equipment rental; newspaper publishing and distribution; specialized websites; book and magazine publishing and distribution; rental and distribution of video games and game consoles; music production and distribution; out-of-home advertising; operation and management of a world-class entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a premier mobile and cable communication service provider. Quebecor Media also holds leading positions through its Media segment and its Sports and Entertainment segment in the creation, promotion and distribution of entertainment and news, and in related Internet services, that are designed to appeal to audiences in every demographic category. Quebecor Media continues to pursue a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. ("4Degrees Colocation") data centre operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, an estimated gain on disposal of $118.0 million will be accounted for in the first quarter of 2019, while an amount of $53.0 million from the proceeds received at the date of transaction will be deferred in connection with the estimated present value of the future conditional adjustments. The results of operations and cash flows of these businesses were reclassified as discontinued operations in the consolidated statements of income and cash flows. The amount deferred will be revaluated on a quarterly basis and any change will also be recorded in income from discontinued operations.

In this Management Discussion and Analysis, only continuing operating activities of Quebecor Media are included in the analysis of the Corporation's activities and in the analysis of its segment operating results.

HIGHLIGHTS SINCE END OF 2017

- Quebecor's revenues totalled $4.18 billion in 2018, a $55.9 million (1.4%) increase from 2017.
- On January 7, 2019, Quebecor announced the following corporate management changes:
  - Mr. Jean-François Pruneau, previously Senior Vice President and Chief Financial Officer of Quebecor and Quebecor Media, was appointed President and Chief Executive Officer of Videotron. Mr. Pruneau succeeds Ms. Manon Brouillette, who resigned as of December 31, 2018, and whose name was submitted to the Corporation's Human Resources Committee and Corporate Governance Committee at the beginning of 2019 for appointment to the Board of Directors of Quebecor. On the same day, Mr. Hughes Simard was appointed Chief Financial Officer of Quebecor and Quebecor Media.
  - Mr. Marc M. Tremblay was appointed Chief Operating Officer, Chief Legal Officer and Corporate Secretary of Quebecor and Quebecor Media. Mr. Tremblay was previously Senior Vice President, Chief Legal Officer and Public Affairs, and Corporate Secretary of Quebecor and Quebecor Media.

Telecommunications

- The Telecommunications segment grew its revenues by $94.2 million (2.9%) and its adjusted EBITDA by $119.2 million (7.7%) in 2018.
- Videotron significantly increased its revenues from mobile telephony ($64.6 million or 13.8%), Internet access ($48.4 million or 4.7%), customer equipment sales ($14.5 million or 6.6%) and the Club illico over-the-top video service ("Club illico") ($7.3 million or 18.4%) in 2018.
- Videotron's total ABPU was $49.51 in 2018, compared with $48.23 in 2017, a $1.28 (2.7%) increase. Mobile ABPU was $53.62 in 2018 compared with $53.23 in 2017, a $0.39 (0.7%) increase.
- There was a net increase of 109,200 RGUs (1.9%) in 2018, including 129,800 connections to the mobile telephony service, 38,000 subscriptions to the cable Internet access service and 59,200 memberships in Club illico.
- On November 9, 2018, Videotron announced that it had ranked as one of Canada's Top 100 Employers in a prestigious competition that recognizes employers that lead their industries in offering exceptional workplaces for their employees.
- On September 13, 2018, Videotron announced the launch of Fizz, a dynamic and competitive new brand that delivers mobile service featuring an empowering, fully digital experience and advantageous pricing. Videotron, the Corporation's flagship brand, will continue focusing on premium wireless plans and on the business segment, while Fizz will aim to increase market penetration among both digital natives and new mobile users.
- Videotron was ranked the most respected telecommunications company in Québec for the 13th consecutive year in the 2018 Léger-NATIONAL reputation survey. Videotron was also the most influential telecommunications brand in Québec on the 2018 Ipsos-*Infopresse* index.

Media

- On February 22, 2019, TVA Group Inc. ("TVA Group") reached an agreement to acquire the companies in the Incendo Media Inc. group, a Montréal-based producer and distributor of television products for international markets, for approximately $19.5 million, subject to certain adjustments. The transaction is subject to customary conditions.
- On February 13, 2019, TVA Group closed the acquisition of the companies in the Serdy Média inc. group, which owns and operates the Évasion and Zeste specialty channels, along with the companies in the Serdy Video Inc. group, for a total consideration of $24.0 million. The transaction was announced on May 1, 2018. The transaction was approved by the Canadian Radio-television and Telecommunications Commission ("CRTC") on January 14, 2019.
- On October 15, 2018, Quebecor launched QUB radio, a new online and mobile app audio platform with a live radio stream and a library of podcasts. QUB radio is an innovative audio project that positions Quebecor as a leader in digital media in Canada.
- On August 27, 2018, TVA Group acquired all the shares of Audio Zone Inc. ("Audio Zone"), a film production and audiovisual services company that provides postproduction sound services.
- On August 13, 2018, Quebecor acquired LC Media Inc. ("LC Media"), owner of *Le Guide de l'auto*, an authoritative car guide published by Quebecor's Les Éditions de l'Homme. *Le Guide de l'auto* has also made a successful shift to digital, drawing 1.5 million unique visitors monthly to its websites, *guideautoweb.com* and *carguideweb.com*. The acquisition will enable Quebecor to enrich the automotive content on all its platforms.
- According to the fall 2018 Vividata survey, *Le Journal de Montréal, Le Journal de Québec* and the free daily *24 heures* remain Québec's news leaders with nearly 4.0 million readers per week across all platforms (print, mobile and Internet). TVA Group remains a leading player in the Canadian magazine industry with 9.0 million readers per week across all platforms.
- On May 3, 2018, TVA Sports became the official French-language broadcaster of the 2020 UEFA European Football Championship (Euro 2020). TVA Sports will broadcast all 51 games of the prestigious international soccer tournament, in which Europe's 24 best national teams will compete.
- On January 22, 2018, TVA Group acquired the assets of Mobilimage inc. ("Mobilimage"), essentially consisting of mobile units and production equipment, for $2.7 million. The acquired mobile unit and production equipment rental business has been folded into the film production and audiovisual services segment's operations.

Sports and Entertainment

- In September 2018, the Videotron Centre completed its third year of operations. During that year, the Videotron Centre hosted 91 sporting events and concerts, a 8.3% increase from the previous year. In April 2018, *Billboard* magazine ranked the Videotron Centre number 5 on its list of top Canadian arenas, based on concert receipts.

Financial transactions

- On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility, extending its term to July 2022. Certain conditions were also amended.
- On November 26, 2018, Quebecor amended its secured revolving credit facility, reducing it from $300.0 million to $50.0 million and extending its term to July 2020, while Videotron amended its secured revolving credit facility, increasing it from $965.0 million to $1.50 billion and extending its term to July 2023. Certain conditions related to those credit facilities were also amended.
- On August 21, 2018, the Corporation issued a notice regarding the redemption on October 12, 2018 of all its outstanding 4.125% convertible debentures maturing on October 15, 2018, in the aggregate principal amount of $362.5 million. In accordance with the terms of the convertible debentures, the Corporation elected to exercise its right to settle the redemption of all the outstanding debentures in shares. Accordingly, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018. In February and May 2018, the Corporation also issued notices regarding the redemption on April 4 and July 24, 2018 of convertible debentures in the aggregate principal amount of $87.5 million. The redemption prices were paid upon redemption of the debentures.
- In 2018, the Corporation increased its interest in Quebecor Media from 81.53% to 100.0% through the following transactions:
    - On May 11 and June 22, 2018, Quebecor Media repurchased for cancellation a total of 16,064,215 of its Common Shares held by CDP Capital for a total aggregate purchase price of $1.54 billion, paid in cash.

   - On June 22, 2018, Quebecor purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital in consideration of the issuance of $150.0 million aggregate principal amount of convertible debentures of Quebecor. The debentures bear interest at an annual rate of 4.00% and mature in June 2024. The convertible debentures are convertible into Class B Shares of Quebecor in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares of Quebecor corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares of Quebecor corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture. The other terms and conditions of the convertible debentures are substantially consistent with the terms of the convertible debentures issued under the Corporation's trust agreement dated October 11, 2012, as amended.

- In view of the Corporation's current and prospective financial profile, the Board of Directors examined the dividend policy in the first quarter of 2018 and set a dividend target of 30% to 50% of the Corporation's annual free cash flows, to be achieved gradually by the end of a four-year period. Accordingly, the Corporation's quarterly dividend was increased by 100%.
- In 2018, the Corporation purchased and cancelled 11,390,300 Class B Shares under its normal course issuer bid for a total cash consideration of $291.7 million. The $257.6 million excess of the purchase price over the carrying value of the repurchased Class B Shares of Quebecor was recorded as a reduction in retained earnings.

TREND INFORMATION

Competition continues to be intense in the mobile and cable telephony, Internet access, cable television and OTT video markets. The significant subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth, due to the penetration rates currently reached.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its mobile and cable networks, the launch and expansion of new or additional services to support growth in its customer base and demand for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term in order to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure, maintenance and enhancement, as well as costs relating to advancements in Internet access and TV everywhere, including higher capacity, lower latency and higher speeds, requiring IP technology, and the introduction of new technologies such as virtual reality and the Internet of Things ("IoT"). In addition, the demand for wireless data services has been growing constantly and is projected to continue to grow in the future. The anticipated levels of data traffic will represent an increasing challenge to the current mobile network's ability to support this traffic. The Telecommunications segment may have to acquire additional spectrum, if available, in the future.

Some of Quebecor's lines of business are cyclical in nature. They are dependent on advertising and, particularly in the newspaper and magazine businesses, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

In the Media segment, the broadcasting industry is undergoing a period of significant change. Television audiences are fragmenting as viewing habits shift toward specialty channels and Internet-based content delivery platforms that allow users greater control over content and timing, such as the OTT video services. Audience fragmentation has prompted many advertisers to review their media placement strategies. The Media segment is taking steps to adjust to the profound changes in the broadcasting industry in order to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want. Moreover, newspaper circulation, measured in terms of copies sold, has been declining in that industry over the past several years. The traditional run of press advertising for major multimarket retailers has been declining due to a shift in marketing strategy toward other media and to retail industry consolidation. To respond to such competition, the Media segment's operations continue to develop their Internet presence through branded websites, including specialized websites.

The Sports and Entertainment segment has made significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required in order to expand the Sports and Entertainment segment. In the books and music businesses, digital technology is disrupting buying and consuming habits, particularly with the emergence of vehicles such as music streaming and e-books, which compete with conventional formats.

INTEREST IN SUBSIDIARIES

As of December 31, 2018, Quebecor held a 100% interest in Quebecor Media. The Corporation's interest in Quebecor Media increased from 81.07% to 81.53% on July 6, 2017, as a result of the repurchase by Quebecor Media of 541,899 of its Common Shares held by CDP Capital, and from 81.53% to 100% as a result of the repurchase by Quebecor Media on May 11 and June 22, 2018 of 16,064,215 of its Common Shares held by CDP Capital, and the purchase by Quebecor on June 22, 2018 of 1,564,696 shares of Quebecor Media held by CDP Capital.

Table 1 shows Quebecor Media's equity interest in its main subsidiaries at December 31, 2018.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
As of December 31, 2018

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	68.4
MediaQMI Inc.	100.0	100.0
QMI Spectacles inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past three years.

NON-IFRS FINANCIAL MEASURES

The non-IFRS financial measures that are used by the Corporation to assess its financial performance, such as adjusted EBITDA, adjusted income from continuing operating activities, cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary, are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

On a transitional basis and to clarify the impact of the retroactive adoption of IFRS 15, as described under "Changes in Accounting Policies," columns have been added to the calculation and reconciliation tables for non-IFRS financial measures, where applicable. Accordingly, those tables also show the calculation and reconciliation of non-IFRS measures in 2018 and 2017 based on the former accounting policies with respect to revenue recognition, i.e. without the adjustments required by adoption of IFRS 15.

Adjusted EBITDA (formerly "Adjusted operating income")

In its analysis of operating results, the Corporation defines EBITDA, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and intangible assets, loss on debt refinancing, income taxes, and income from discontinued operations. Adjusted EBITDA as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted EBITDA in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted EBITDA is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted EBITDA may not be the same as similarly titled measures reported by other companies.

Table 2 provides a reconciliation of adjusted EBITDA to net income as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2018 and 2017 presented in Table 2 is drawn from the unaudited consolidated statements of income.

1 Non-IFRS measures presented in these columns are calculated based on the new IFRS 15 rules adopted by the Corporation on a retroactive basis and described under "Changes in Accounting Policies."

2 Non-IFRS measures presented in these columns are calculated based on the Corporation's former accounting policies with respect to revenue recognition, i.e. without the impact of IFRS 15 adoption.

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income attributable to shareholders under IFRS, as net income attributable to shareholders before loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, gain on sale of spectrum licences, impairment of goodwill and intangible assets, loss on debt refinancing, net of income tax related to adjustments and of net income attributable to non-controlling interest related to adjustments, and before income from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 3 provides a reconciliation of adjusted income from continuing operating activities to the net income attributable to shareholders' measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2018 and 2017 presented in Table 3 is drawn from the unaudited consolidated statements of income.

1 Non-IFRS measures presented in these columns are calculated based on the new IFRS 15 rules adopted by the Corporation on a retroactive basis and described under "Changes in Accounting Policies."

2 Non-IFRS measures presented in these columns are calculated based on the Corporation's former accounting policies with respect to revenue recognition, i.e. without the impact of IFRS 15 adoption.

3 Includes impact of fluctuations in income taxes applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash flows from segment operations

Cash flows from segment operations represents adjusted EBITDA, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). The Corporation uses cash flows from segment operations as a measure of the liquidity generated by its segments. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital by Quebecor Media, repayment of long-term debt and purchase of non-controlling interest. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. The Corporation's definition of cash flows from segment operations may not be identical to similarly titled measures reported by other companies. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets (excluding proceeds from disposal of licences). Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

KEY PERFORMANCE INDICATORS

Revenue-generating unit

The Corporation uses RGU, an industry metric, as a key performance indicator. An RGU represents, as the case may be, subscriptions to the cable Internet, cable television and Club illico services, and subscriber connections to the mobile telephony and cable telephony services. RGU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of RGU may not be the same as identically titled measurements reported by other companies or published by public authorities.

Average billing per unit

The Corporation uses ABPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly average subscription billing per RGU. ABPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ABPU may not be the same as identically titled measurements reported by other companies.

Mobile ABPU is calculated by dividing the average subscription billing for mobile telephony services by the average number of mobile RGUs during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Total ABPU is calculated by dividing the combined average subscription billing for cable Internet, cable television, Club illico, mobile telephony and cable telephony services, by the total average number of RGUs from cable Internet, cable television, mobile telephony and cable telephony services during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2018/2017 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.18 billion, a $55.9 million (1.4%) increase.

- Revenues increased in Telecommunications ($94.2 million or 2.9% of segment revenues) and in Sports and Entertainment ($0.8 million or 0.4%).
- Revenues decreased in Media ($41.3 million or -5.4%).

Adjusted EBITDA: $1.73 billion, a $114.9 million (7.1%) increase.

- Adjusted EBITDA increased in Telecommunications ($119.2 million or 7.7% of segment adjusted EBITDA). There was a favourable variance at Head Office ($10.9 million), mainly due to lower compensation costs.
- There was an unfavourable variance in Media ($14.0 million or -20.2%) and in Sports and Entertainment ($1.2 million or -19.4%).
- The change in the fair value of Quebecor Media stock options resulted in a $0.5 million unfavourable variance in the stock-based compensation charge in 2018 compared with 2017. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $2.1 million favourable variance in the Corporation's stock-based compensation charge in 2018.

Net income attributable to shareholders: $401.5 million ($1.68 per basic share) in 2018, compared with $390.5 million ($1.61 per basic share) in 2017, an increase of $11.0 million ($0.07 per basic share).

- The main favourable variances were:
  - $138.5 million favourable variance in losses on valuation and translation of financial instruments, including $137.0 million without any tax consequences;
  - $114.9 million increase in adjusted EBITDA;
  - $100.5 million favourable variance in non-controlling interest;
  - $43.8 million favourable variance in impairment of goodwill and intangible assets;
  - $15.6 million favourable variance in the loss on debt refinancing.
- The main unfavourable variances were:
  - $330.9 million gain on the sale of spectrum licences recognized in 2017, including $165.5 million without any tax consequences;
  - $16.1 million increase in financial expenses;
  - $16.0 million increase in the income tax expense;
  - $14.4 million unfavourable variance in income from discontinued operations;
  - $12.6 million unfavourable variance in the charge for restructuring of operations, litigation and other items;
  - $12.3 million increase in the depreciation and amortization charge.

Adjusted income from continuing operating activities: $468.1 million ($1.96 per basic share) in 2018, compared with $347.9 million ($1.44 per basic share) in 2017, an increase of $120.2 million ($0.52 per basic share) or 34.6%.

Depreciation and amortization charge: $720.2 million, a $12.3 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in wired and wireless networks and computer systems.

Financial expenses: $323.5 million in 2018, a $16.1 million increase caused mainly by higher average indebtedness as a result of debt financing a portion of the repurchase of the Quebecor Media shares held by CDP Capital in the second quarter of 2018, partially offset by higher interest revenues generated by liquidity and a lower average interest rate on the debt.

Loss on valuation and translation of financial instruments: $61.3 million in 2018 compared with $199.8 million in 2017. The $138.5 million favourable variance was essentially due to a $137.0 million favourable variance, without any tax consequences, in losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $29.8 million in 2018, compared with $17.2 million in 2017, a $12.6 million unfavourable variance.

- A $14.9 million charge was recognized in 2018 in connection with cost-reduction initiatives in the Corporation's various segments and with disposal of assets. A $17.2 million net charge related to cost-reduction initiatives, customer migration from analog to digital service in the Telecommunications segment, and developments in legal disputes was recognized in 2017.
- A $14.9 million charge for impairment of assets was also recognized in 2018 in connection with various restructuring initiatives, primarily in the Telecommunications segment.

Gain on sale of spectrum licences: $330.9 million in 2017.

- On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHz wireless spectrum licences outside Québec to Shaw Communications Inc. ("Shaw") for a cash consideration of $430.0 million. A $243.1 million gain was recognized on the sale of the licences, including $121.6 million without any tax consequences.
- On June 20, 2017, Videotron sold its Advanced Wireless Services ("AWS-1") spectrum licence in the Toronto metropolitan area to Rogers Communications Canada Inc. ("Rogers") for a cash consideration of $184.2 million, pursuant to the transfer option held since 2013 by Videotron. An $87.8 million gain was recognized on the sale of the licence, including $43.9 million without any tax consequences.

Charge for impairment of goodwill and intangible assets: $43.8 million in 2017.

- In 2017, Quebecor Media performed impairment tests on its Magazines cash-generating unit ("CGU") in view of the downtrend in the industry's revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $30.0 million non-cash goodwill impairment charge, including $1.5 million without any tax consequences, and a charge for impairment of intangible assets totalling $12.4 million, including $3.1 million without any tax consequences, were recorded in 2017. An additional $1.4 million charge for impairment of intangible assets was also recognized in various segments of the Corporation in 2017.

Loss on debt refinancing: $15.6 million in 2017.

- On May 1, 2017, Videotron redeemed $125.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $5.2 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- On May 1, 2017, Quebecor Media fully redeemed its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount. A $10.4 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.

Income tax expense: $161.9 million (effective tax rate of 24.5%) in 2018, compared with $145.9 million (effective tax rate of 21.6%) in 2017, a $16.0 million unfavourable variance. The effective tax rates mainly reflect recognition of benefits arising from prior year tax losses in 2018 and 2017. The increase in the effective rate was mainly due to recognition of lower tax losses in 2018 than in 2017. The increase in the income tax expense was due to the increase in effective tax rates, partially offset by the impact of the decrease in taxable income for tax purposes. The effective tax rate is calculated considering only taxable and deductible items.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,907 900 homes and businesses. Videotron offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones; Internet access service; digital cable television services, including video-on-demand, pay-per-view and pay TV; cable telephony services; and Club illico. Videotron also includes Videotron Business, a full-service business telecommunications provider that offers mobile and cable telephony, high-speed data transmission, Internet access and cable television services. In September 2018, Videotron launched Fizz, a brand that delivers advantageously priced mobile service featuring an empowering, fully digital experience.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary ("Le SuperClub Vidéotron") and its franchise network.

2018 operating results

Revenues: $3.38 billion in 2018, a $94.2 million (2.9%) increase.

- Revenues from the mobile telephony service increased $64.6 million (13.8%) to $534.4 million, essentially due to an increase in the number of subscriber connections.
- Revenues from Internet access service increased $48.4 million (4.7%) to $1.08 billion, mainly as a result of higher per-subscriber revenues, reflecting, among other things, the favourable impact of the product mix and increases in some rates, as well as customer growth, partially offset by a decrease in overage charges.
- Combined revenues from all cable television services decreased $12.9 million (-1.3%) to $996.7 million, due primarily to the impact of a net decrease in the customer base, the unfavourable product mix and a decrease in video-on-demand and pay-per-view orders, partially offset by higher per-customer revenues due in part to increases in some rates, and by increased revenues from the leasing of digital set-top boxes.
- Revenues from the cable telephony service decreased $29.2 million (-7.3%) to $368.6 million, mainly because of the impact of the net decrease in subscriber connections and lower long-distance revenues, partially offset by higher per-connection revenues.
- Revenues from Club illico increased $7.3 million (18.4%) to $47.0 million, essentially because of subscriber growth.
- Revenues of Videotron Business increased $3.4 million (3.2%) to $108.2 million, due primarily to the impact of higher revenues at Fibrenoire inc. ("Fibrenoire").
- Revenues from customer equipment sales increased $14.5 million (6.6%) to $233.5 million, mainly because of higher mobile device revenues.
- Revenues of the Le SuperClub Vidéotron retail chain decreased $0.7 million (-11.1%) to $5.6 million, mainly because of store closures.
- Other revenues decreased $1.3 million (-13.0%) to $8.7 million.

ABPU: $49.51 in 2018 compared with $48.23 in 2017, a $1.28 (2.7%) increase. Mobile ABPU was $53.62 in 2018 compared with $53.23 in 2017, a $0.39 (0.7%) increase.

Customer statistics

RGUs – The total number of RGUs was 5,990,300 at December 31, 2018, an increase of 109,200 (1.9%) in 2018 compared with an increase of 115,700 in 2017 (Table 4).

Mobile telephony service – The number of subscriber connections to the mobile telephony service stood at 1,153,800 at December 31, 2018, an increase of 129,800 (12.7%) in 2018 compared with an increase of 130,100 in 2017 (Table 4).

Cable Internet access – The number of subscribers to cable Internet access services stood at 1,704,500 at December 31, 2018, an increase of 38,000 (2.3%) in 2018 compared with an increase of 53,700 in 2017 (Table 4). As of December 31, 2018, Videotron's cable Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,907,900 homes and businesses passed by Videotron's network as of December 31, 2018, up from 2,873,700 one year earlier) of 58.6% compared with 58.0% a year earlier.

Cable television – The combined customer base for all of Videotron's digital cable television services decreased by 43,200 (-2.7%) in 2018, compared with a decrease of 50,400 in 2017 (Table 4). As of December 31, 2018, Videotron had 1,597,300 subscribers to its cable television services. The household and business penetration rate was 54.9% versus 57.1% a year earlier.

Cable telephony service – The number of subscriber connections to the cable telephony service stood at 1,113,900 at December 31, 2018, a decrease of 74,600 (-6.3%) in 2018 compared with a decrease of 64,600 in 2017 (Table 4). At December 31, 2018, the cable telephony service had a household and business penetration rate of 38.3% versus 41.4% a year earlier.

Club illico – The number of subscribers to Club illico stood at 420,800 at December 31, 2018, an increase of 59,200 (16.4%) in 2018 compared with an increase of 46,900 in 2017 (Table 4).

Table 4
Telecommunications segment year-end RGUs (2014-2018)
(in thousands of customers)

	2018	2017	2016	2015	2014
Mobile telephony	**1,153.8**	1,024.0	893.9	768.6	632.8
Cable Internet	**1,704.5**	1,666.5	1,612.8	1,568.2	1,537.5
Cable television:					
Analog	**–**	–	103.8	166.3	228.7
Digital	**1,597.3**	1,640.5	1,587.1	1,570.6	1,553.6
	1,597.3	1,640.5	1,690.9	1,736.9	1,782.3
Cable telephony	**1,113.9**	1,188.5	1,253.1	1,316.3	1,349.0
Club illico	**420.8**	361.6	314.7	257.5	177.7
Total	**5,990.3**	5,881.1	5,765.4	5,647.5	5,479.3

Adjusted EBITDA: $1.68 billion, a $119.2 million (7.7%) increase due primarily to:

- Impact of the net revenue increase.
- Favourable variance related to an adjustment recorded in 2018 arising from the CRTC decision on roaming fees issued during the first quarter of 2018.
- Decreases in some operating expenses, including engineering, administrative and IT costs.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 50.4% in 2018 compared with 52.6% in 2017, mainly because of the fixed component of costs, which does not fluctuate in proportion to revenue growth, the favourable adjustment related to roaming fees recorded in 2018, and decreases in some operating expenses.

Cash flows from operations

Cash flows from segment operations: $975.8 million in 2018 compared with $860.2 million in 2017 (Table 5).

- The $115.6 million increase was due to the $119.2 million increase in adjusted EBITDA and a $54.2 million decrease in additions to property, plant and equipment because of reduced investments in wired and wireless networks, partially offset by an $57.9 million increase in additions to intangible assets, mainly reflecting spending on the Internet Protocol television ("IPTV") project and IT systems.

1 Non-IFRS measures presented in these columns are calculated based on the new IFRS 15 rules adopted by the Corporation on a retroactive basis and described under “Changes in Accounting Policies.”

2 Non-IFRS measures presented in these columns are calculated based on the Corporation’s former accounting policies with respect to revenue recognition, i.e. without the impact of IFRS 15 adoption.

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network and the specialty channels TVA Sports, LCN, addik[TV], Prise 2, Yoopa, CASA, MOI&cie, Évasion and Zeste. TVA Group also holds interests in two other TVA Network affiliates. As well, TVA Group is engaged in commercial production and in the distribution of audiovisual products through its TVA Films division. In addition to linear television, TVA Network and the specialty channels broadcast on-demand and streaming content through their multiplatform applications. The *TVA.ca* website and the TVA mobile app provide free access to TVA Network programs and some specialty channel content in high definition, live or on demand.

TVA Group also owns Mels Studios and Postproduction G.P., a provider of soundstage, equipment and mobile unit rental, postproduction, dubbing, distribution and visual effects services to the film and television industries.

Through its subsidiaries, TVA Publications Inc. and Les Publications Charron & Cie inc., TVA Group publishes more than 50 French- and English-language titles in various categories, including show business, television, fashion and decorating, and it markets digital products associated with the various magazine brands. The Media segment’s activities also include a custom publishing business, which produces custom multiplatform content marketing for its customers; the development of audience acquisition strategies; production of advertising, videos and digital content; and management of customers’ social media accounts. TVA Group is the largest magazine publisher in Québec.

The Media segment also operates two paid daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, the free daily *24 heures* and the J5 app, which provides real-time access to news on mobile devices, tablets and Apple Watch. The websites of the paid dailies, *journaldemontreal.com* and *journaldequebec.com*, lead the news sites in their markets with more than 3.7 million visitors per month (source: ComScore, December 2018). According to corporate figures, the aggregate circulation of the Media segment’s paid and free newspapers as of December 31, 2018 was approximately 2.5 million copies per week in print and electronic formats.

The Media segment also operates a number of other digital brands, including *Le sac de chips, Pèse sur Start, Silo 57* and *Tabloïd.* In addition, it includes NumériQ inc.(“NumériQ”), which brings together the digital strategy and content production assets harnessed to create digital platforms and content for the Corporation’s various platforms. Since August 2018, NumériQ has operated all the platforms of the authoritative car guide *Le Guide de l’auto*, including the *guideautoweb.com* website. In October 2018, NumériQ launched QUB radio, an online and mobile audio platform with a live radio stream and a library of podcasts.

The Media segment’s apps and websites log 6.5 million unique visitors per month in Canada (source: ComScore, December 2018).

The Media segment is also engaged in the printing of newspapers, the distribution of newspapers and magazines, and out-of-home advertising. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties, as well as Quebecor Media Sales, which offers Media segment customers integrated, diversified and complete advertising services.

2018 operating results

Revenues: $728.6 million in 2018, a $41.3 million (-5.4%) decrease.

- Broadcasting revenues decreased by $21.5 million (-4.9%), mainly because of lower advertising revenues at TVA Network and TVA Sports, as well as lower commercial production revenues, partially offset by higher subscription revenues at the specialty channels.
- Film production and audiovisual service revenues increased by $1.3 million (1.9%), mainly because of:
    - higher revenues from soundstage and equipment rental and from postproduction;
    - impact of acquisition of the assets of Mobilimage in January 2018.

  Partially offset by:
    - lower revenues from visual effects.
- Newspaper publishing revenues decreased $9.2 million (-5.0%).
    - Advertising revenues decreased 12.1%; circulation revenues decreased 1.5%; digital revenues decreased 8.8%; combined revenues from commercial printing and other sources increased 6.1%.
- Magazine publishing revenues decreased by $16.9 million (-17.9%), primarily as a result of lower advertising revenues, the sale of a publication and lower newsstand and subscription revenues.
- Revenues of Quebecor Media Out of Home increased by $1.7 million (10.9%), mainly because of higher digital and traditional advertising revenues.

Adjusted EBITDA: $55.3 million in 2018, a $14.0 million (-20.2%) decrease.

- Adjusted EBITDA from broadcasting decreased by $14.6 million (-35.1%), mainly because of the impact of the revenue decrease, partially offset by the reduction in operating expenses resulting from, among other things, the favourable impact of restructuring initiatives.
- Adjusted EBITDA from film production and audiovisual services increased by $0.4 million (2.8%), due primarily to the impact of the net revenue increase.
- Adjusted EBITDA from newspaper publishing decreased by $0.2 million (-4.4%), mainly because of the impact of the revenue decrease and spending on digital activities, partially offset by the reduction in operating expenses, resulting from, among other things, the impact of restructuring initiatives.
- Adjusted EBITDA from magazine publishing decreased by $1.8 million (-18.0%), mainly because of the impact of the revenue decrease, partially offset by cost reductions related to restructuring initiatives and decreases in some operating expenses, including subscription, labour, selling and production costs.
- The adjusted EBITDA of Quebecor Media Out of Home increased by $1.3 million mainly because of the impact of the revenue increase.
- There was a $0.9 million net favourable variance related to rebilling of common selling and digital service charges.

Cost/revenue ratio: Employee costs and purchases of goods and services for all Media segment operations, expressed as a percentage of revenues, were 92.4% in 2018 compared with 91.0% in 2017, mainly because of the large fixed component of operating costs, which does not fluctuate in proportion to the net decrease in revenues, partially offset by the impact of restructuring and cost-reduction initiatives.

Cash flows from operations

Cash flows from segment operations: $25.5 million in 2018 compared with $37.3 million in 2017 (Table 6). The $11.8 million unfavourable variance was due primarily to the $14.0 million unfavourable variance in adjusted EBITDA, partially offset by a $3.0 million favourable variance in proceeds from disposal of assets.

Table 6: Media
Cash flows from operations
(in millions of Canadian dollars)

	2018	2017
Adjusted EBITDA	**$ 55.3**	$ 69.3

Cash flows from segment operations	**$ 25.5**	$ 37.3

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include production and coproduction of shows presented at the Videotron Centre and other venues. In addition, the Sports and Entertainment segment operates sports and cultural events manager Event Management Gestev Inc., which is the official imprint for shows and events produced in Québec by Quebecor Media.

The Sports and Entertainment segment also includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec.

As well, the Sports and Entertainment segment includes educational publisher CEC Publishing Inc. and Sogides Group Inc., which is engaged in general literature publishing through its 18 publishing houses, and in the physical and digital distribution of books through Messageries A.D.P. inc., the exclusive distributor for more than 210 Québec and European French-language publishers.

Lastly, the Sports and Entertainment segment is engaged in the distribution of CDs and videos (Distribution Select); the distribution of music to Internet music downloading and streaming services (Select Digital); music recording and video production (Disques Musicor); and concert and event production (Musicor Spectacles).

2018 operating results

Revenues: $182.1 billion, a $0.8 million (0.4%) increase from 2017.

- Revenues from sports and concerts increased by $0.6 million (1.6%), mainly because of increased hockey revenues, partially offset by a decrease in revenues from sporting events.
- Book distribution and publishing revenues decreased by $1.8 million (-1.7%), primarily as a result of lower volumes in mass market distribution, combined with decreased revenues from general literature.
- Music distribution and production revenues increased by $2.0 million (5.0%), primarily as a result of higher concert production revenues.

Adjusted EBITDA: $5.0 million in 2018, a $1.2 million (-19.4%) unfavourable variance.

- There was a $0.4 million (-6.3%) unfavourable variance in negative adjusted EBITDA from sports and concerts, mainly because of higher operating expenses related to hockey and sporting events, partially offset by the impact of the revenue increase.
- Adjusted EBITDA from book distribution and publishing increased by $1.2 million (9.6%), due mainly to the impact of decreases in some operating expenses, including selling and administrative expenses, partially offset by the impact of the revenue decrease.
- There was a $1.9 million unfavourable variance in negative adjusted EBITDA from music production, due primarily to increases in some operating expenses, including the charge for bad debts and selling and administrative expenses.

Cash flows from operations

Cash flows from segment operations: Nil in 2018 compared with $0.6 million in 2017 (Table 7). The $0.6 million unfavourable variance was due to the $1.2 million decrease in adjusted EBITDA, partially offset by $0.8 million decrease in additions to intangible assets.

2018/2017 FOURTH QUARTER COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $1.09 billion, a $27.6 million (2.6%) increase.

- Revenues increased in Telecommunications ($24.4 million or 2.9% of segment revenues) and in Sports and Entertainment ($3.2 million or 6.4%).
- Revenues decreased in Media ($1.5 million or -0.8%).

Adjusted EBITDA: $450.0 million, a $32.0 million (7.7%) increase.

- Adjusted EBITDA increased in Telecommunications ($31.0 million or 7.9% of segment adjusted EBITDA) and in Media ($5.1 million or 22.8%).
- Adjusted EBITDA decreased in Sports and Entertainment ($0.4 million or -17.4%) and there was an unfavourable variance at Head Office (-$3.7 million). The change at Head Office was essentially due to higher compensation costs, including the stock-based compensation charge.
- The change in the fair value of Quebecor Media stock options resulted in a $2.3 million unfavourable variance in the stock-based compensation charge in the fourth quarter of 2018 compared with the same period of 2017. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $2.2 million unfavourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2018.

Net income attributable to shareholders: $116.8 million ($0.46 per basic share) in the fourth quarter of 2018, compared with $70.4 million ($0.29 per basic share) in the same period of 2017, a favourable variance of $46.4 million ($0.17 per basic share).

- The main favourable variances were:
  - $32.0 million increase in adjusted EBITDA;
  - $19.0 million favourable variance in non-controlling interest;
  - $10.8 million decrease in the depreciation and amortization charge.
- The main unfavourable variances were:
  - $8.2 million increase in the income tax expense;
  - $7.3 million increase in financial expenses.

Adjusted income from continuing operating activities: $132.7 million ($0.52 per basic share) in the fourth quarter of 2018, compared with $83.3 million ($0.35 per basic share) in the same period of 2017, an increase of $49.4 million ($0.17 per basic share) or 59.3%.

Depreciation and amortization charge: $182.2 million in the fourth quarter of 2018, a $10.8 million decrease due mainly to the impact of a change in the depreciation period for some telecommunications network components in the fourth quarter of 2017.

Financial expenses: $84.4 million in the fourth quarter of 2018, a $7.3 million increase caused mainly by higher average indebtedness as a result of debt financing a portion of the repurchase of Quebecor Media shares held by CDP Capital in the second quarter of 2018 and lower interest revenues generated by liquidity, partially offset by a lower average interest rate on the debt.

Loss on valuation and translation of financial instruments: $10.6 million in the fourth quarter of 2018, compared with $8.1 million in the same period of 2017, a $2.5 million unfavourable variance.

Restructuring of operations, litigation and other items: $7.7 million in the fourth quarter of 2018, compared with $9.9 million in the same period of 2017, a $2.2 million favourable variance.

- A $7.7 million net charge was recognized in the fourth quarter of 2018 in connection with cost-reduction initiatives in the Corporation's various segments.
- A $9.9 million net charge was recognized in the fourth quarter of 2017 in connection with cost-reduction initiatives in the Corporation's various segments and customer migration from analog to digital service in the Telecommunications segment.

Income tax expense: $46.4 million in the fourth quarter of 2018 (effective tax rate of 26.3%), compared with $38.2 million in the same period of 2017 (effective tax rate of 27.8%), an $8.2 million unfavourable variance caused essentially by the impact of the increase in taxable income. The effective tax rate is calculated considering only taxable and deductible items.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $866.1 million, a $24.4 million (2.9%) increase due primarily to the same factors as those noted above in the “2018/2017 financial year comparison.”

- Revenues from mobile telephony service increased $16.0 million (13.0%) to $139.5 million.
- Revenues from Internet access services increased $11.0 million (4.2%) to $274.1 million.
- Combined revenues from all cable television services decreased $4.4 million (-1.7%) to $249.0 million.
- Revenues from cable telephony service decreased $7.0 million (-7.2%) to $89.8 million.
- Revenues from Club illico increased $1.5 million (13.9%) to $12.3 million.
- Revenues of Videotron Business increased $0.6 million (2.3%) to $26.9 million.
- Revenues from customer equipment sales increased $7.2 million (11.3%) to $70.9 million.
- Revenues of Le SuperClub Vidéotron retail chain decreased $0.2 million (-12.5%) to $1.4 million.
- Other revenues decreased $0.5 million (-19.2%) to $2.1 million.

Total ABPU: $49.84 in the fourth quarter of 2018 compared with $48.90 in the same period of 2017, a $0.94 (1.9%) increase. Mobile ABPU was $53.25 in the fourth quarter of 2018 compared with $53.56 in the same period of 2017, a $0.31 $ (0.6%) decrease due in part to the popularity of bring your own device (“BYOD”) plans, multi-line plans and the impact of the launch of Fizz, the new advantageously priced, fully digital mobile brand.

Customer statistics

RGUs – 34,400 (0.6%) unit increase in the fourth quarter of 2018 compared with an increase of 34,900 in the same period of 2017.

Mobile telephony – 33,100 (3.0%) subscriber-connection increase in the fourth quarter of 2018 compared with an increase of 33,700 in the same period of 2017.

Cable Internet access – 7,000 (0.4%) customer increase in the fourth quarter of 2018 compared with an increase of 12,400 in the same period of 2017.

Cable television – 6,400 (-0.4%) decrease in the combined customer base for all of Videotron’s cable television services in the fourth quarter of 2018 compared with a decrease of 8,500 in the same period of 2017.

Cable telephony – 17,200 (-1.5%) subscriber decrease in the fourth quarter of 2018 compared with a decrease of 16,900 in the same period of 2017.

Club illico – 17,900 (4.4%) subscriber increase in the fourth quarter of 2018 compared with an increase of 14,200 in the same period of 2017.

Adjusted EBITDA: $425.9 million, a $31.0 million (7.9%) increase due primarily to:

- Impact of the net revenue increase.
- Favourable variance in some operating expenses, including taxes on the network, engineering expenses and IT expenses.

Cost/revenue ratio: Operating costs for all Telecommunications segment operations, expressed as a percentage of revenues, were 50.8% in the fourth quarter of 2018 compared with 53.1% in the same period of 2017, mainly because of the fixed component of costs, which does not fluctuate in proportion to revenue growth, and the decrease in operating expenses.

Media

Revenues: $198.0 million in the fourth quarter of 2018, a $1.5 million (-0.8%) decrease.

- Broadcasting revenues decreased by $3.7 million (-3.2%), mainly because of lower advertising revenues at TVA Network and TVA Sports, as well as lower commercial production revenues, partially offset by higher subscription revenues at the specialty channels.
- Film production and audiovisual service revenues increased by $2.3 million (13.8%), mainly because of higher revenues from soundstage and equipment rentals and from postproduction, partially offset by lower visual effects revenues.
- Newspaper publishing revenues decreased $1.3 million (-2.8%).
  - Advertising revenues decreased 9.7%; circulation revenues decreased 1.0%; digital revenues decreased 12.5%; combined revenues from commercial printing and other sources increased 11.2%.
- Magazine publishing revenues decreased by $3.4 million (-14.0%), primarily as a result of lower advertising revenues, the sale of a publication and lower newsstand revenues.
- Revenues of Quebecor Media Out of Home increased by $0.6 million (16.7%), mainly because of higher digital and traditional advertising revenues.

Adjusted EBITDA: $27.5 million in the fourth quarter of 2018, a $5.1 million (22.8%) increase.

- Adjusted EBITDA from broadcasting increased by $0.3 million (1.9%), mainly because of reductions in some operating expenses, including content costs, partially offset by the impact of the revenue decrease.
- Adjusted EBITDA from film production and audiovisual services increased by $1.1 million (25.6%), essentially because of the impact of the revenue increase.
- Adjusted EBITDA from newspaper publishing increased by $0.9 million, due primarily to the favourable impact of operating cost reductions, reflecting in part the impact of restructuring initiatives and including reductions in labour, administration and promotion costs, which outweighed the effect of the revenue decrease and the increased spending on digital activities.
- Adjusted EBITDA from magazine publishing increased by $0.6 million (24.0%), mainly because of the impact of the reduction in operating expenses, reflecting in part the impact of restructuring initiatives and lower subscription expenses, partially offset by the impact of the revenue decrease.
- There was a $0.8 million favourable variance in the adjusted EBITDA of Quebecor Media Out of Home, due primarily to the favourable impact of the revenue increase and decreases in some operating expenses, including advertising expenses.
- There was a $1.5 million favourable variance related to rebilling of common selling and digital service charges.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 86.1% in the fourth quarter of 2018 compared with 88.8% in the same period of 2017, mainly because of the impact of the reduction in operating expenses.

Sports and Entertainment

Revenues: $53.5 million in the fourth quarter of 2018, a $3.2 million (6.4%) increase.

- Revenues from sports and concerts decreased by $0.2 million (-1.7%), mainly because of lower revenues from sporting events.
- Book distribution and publishing revenues increased by $1.4 million (5.7%), primarily as a result of higher revenues from educational publishing and general literature, as well as higher distribution revenues, including bookstore distribution.
- Music distribution and production revenues increased by $2.0 million (14.2%), primarily as a result of higher concert production revenues.

Adjusted EBITDA: $1.9 million in the fourth quarter of 2018, a $0.4 million (-17.4%) decrease.

- Adjusted EBITDA from sports and concerts decreased by $0.8 million, mainly because of the impact of increases in some operating expenses, including concert costs, and the impact of the revenue decrease.
- Adjusted EBITDA from book distribution and publishing increased by $1.7 million, due primarily to the impact of the revenue increase and lower selling expenses.
- There was a $1.3 million unfavourable variance in adjusted EBITDA from music production, due primarily to increased operating expenses, including the charge for bad debts and promotion costs, partially offset by the impact of the revenue increase.

2017/2016 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.13 billion, a $68.0 million (1.7%) increase.

- Revenues increased in Telecommunications ($95.5 million or 3.0% of segment revenues).
- Revenues decreased in Media ($19.3 million or -2.4%) and in Sports and Entertainment ($3.7 million or -2.0%).

Adjusted EBITDA: $1.62 billion, a $61.6 million (4.0%) increase.

- Adjusted EBITDA increased in Telecommunications ($46.9 million or 3.1% of segment adjusted EBITDA), Media ($15.4 million or 28.6%), and Sports and Entertainment ($3.9 million).
- There was an unfavourable variance at Head Office ($4.6 million), mainly because of higher philanthropic and IT costs.
- The change in the fair value of Quebecor Media stock options resulted in a $0.9 million favourable variance in the stock-based compensation charge in 2017 compared with 2016. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $1.2 million favourable variance in the Corporation's stock-based compensation charge in 2017.

Net income attributable to shareholders: $390.5 million ($1.61 per basic share) in 2017, compared with $233.9 million ($0.96 per basic share) in 2016, an increase of $156.6 million ($0.65 per basic share).

- The favourable variance was due primarily to:
  - $330.9 million gain on the sale of spectrum licences recognized in 2017, including $165.5 million without any tax consequences;
  - $61.6 million increase in adjusted EBITDA;
  - $19.7 million decrease in financial expenses;
  - $17.2 million favourable variance in income from discontinued operations;
  - $10.8 million favourable variance in the charge for restructuring of operations, litigation and other items.

  Partially offset by:
  - $129.5 million unfavourable variance in the loss on valuation and translation of financial instruments, including $129.2 million without any tax consequences;
  - $75.0 million unfavourable variance in non-controlling interest;
  - $56.8 million increase in the depreciation and amortization charge;
  - $11.1 million increase in the income tax expense;
  - $8.3 million unfavourable variance in the loss on debt refinancing.

Adjusted income from continuing operating activities: $347.9 million ($1.44 per basic share) in 2017, compared with $343.9 million ($1.41 per basic share) in 2016, an increase of $4.0 million ($0.03 per basic share).

Depreciation and amortization charge: $707.9 million, a $56.8 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in wired and wireless networks and computer systems, as well as the impact of revising the depreciation period for some telecommunications network components.

Financial expenses: $307.4 million, a $19.7 million decrease caused mainly by lower average indebtedness, the impact of lower interest rates on long-term debt due to debt refinancing at lower rates, a favourable variance in gains and losses on foreign currency translation of short-term monetary items, and higher interest revenues generated by increased liquidity.

Loss on valuation and translation of financial instruments: $199.8 million in 2017 compared with $70.3 million in 2016. The $129.5 million unfavourable variance was essentially due to a $129.2 million unfavourable variance, without any tax consequences, in losses and gains on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $17.2 million in 2017, compared with $28.0 million in 2016, a $10.8 million favourable variance.

- A $17.2 million net charge was recognized in 2017 in connection with cost-reduction initiatives in the Corporation's various segments, customer migration from analog to digital service in the Telecommunications segment, and developments in legal disputes ($28.0 million in 2016).

Gain on sale of spectrum licences: $330.9 million in 2017.

- On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHz wireless spectrum licences outside Québec to Shaw for a cash consideration of $430.0 million. A $243.1 million gain was recognized on the sale of the licences, including $121.6 million without any tax consequences.
- On June 20, 2017, Videotron sold its AWS-1 spectrum licence in the Toronto metropolitan area to Rogers for a cash consideration of $184.2 million, pursuant to the transfer option held since 2013 by Videotron. An $87.8 million gain was recognized on the sale of the licence, including $43.9 million without any tax consequences.
- It should be noted that these transactions led to recognition in the second quarter of 2017 of tax benefits in the amount of $31.8 million arising from prior year tax losses, thereby reducing the Corporation's tax expense.

Charge for impairment of goodwill and intangible assets: $43.8 million in 2017, compared with $40.9 million in 2016, a $2.9 million unfavourable variance.

- In 2017 and 2016, Quebecor Media performed impairment tests on its Magazines CGU in view of the downtrend in industry revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $30.0 million non-cash goodwill impairment charge, including $1.5 million without any tax consequences, was recorded in 2017 ($40.1 million without any tax consequences in 2016). As well, a charge for impairment of intangible assets totalling $12.4 million, including $3.1 million without any tax consequences, was recognized in 2017 (nil in 2016).
- In 2017, an additional $1.4 million charge for impairment of intangible assets was recognized in the Corporation's other segments ($0.8 million in 2016).

Loss on debt refinancing: $15.6 million in 2017, compared with $7.3 million in 2016, an $8.3 million unfavourable variance.

- On May 1, 2017, Videotron redeemed $125.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $5.2 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- On May 1, 2017, Quebecor Media fully redeemed its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount. A $10.4 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- In accordance with a notice issued on December 2, 2016, Videotron redeemed, on January 5, 2017, $175.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $7.3 million loss was recorded in the consolidated statement of income in 2016 in connection with this redemption.

Income tax expense: $145.9 million (effective tax rate of 21.6%) in 2017, compared with $134.8 million (effective tax rate of 25.0%) in 2016, an $11.1 million unfavourable variance. The effective tax rate is calculated considering only taxable and deductible items.

- The effective tax rates and the favourable variance in those rates mainly reflect recognition in 2017 of tax benefits arising from prior year tax losses, whereas in 2016 the deferred tax balances recorded on the balance sheet were reduced in consideration of the lowering of future tax rates in Québec.
- The impact on the income tax expense of the increase in taxable income for tax purposes in 2017 was partially offset by the impact of the decrease in effective tax rates.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under “Trend Information” above, the risk analysis in the “Risks and uncertainties” section below, and the discussion of the Corporation’s financial risks under “Financial Instruments and Financial Risk” below.

Operating activities

Cash flows provided by continuing operating activities: $1.39 billion in 2018 compared with $1.16 billion in 2017.

- The $225.8 million increase was primarily due to:
  - $280.6 million favourable change in non-cash operating assets and liabilities, due primarily to favourable variances in income tax receivable and payable, provisions, and accounts payable and accrued charges;
  - $119.2 million increase in the Telecommunications segment’s adjusted EBITDA.

  Partially offset by:
  - $146.1 million increase in current income taxes in 2018 compared with 2017, mainly because of the recognition of tax benefits in 2017;
  - $16.1 million increase in the cash interest expense;
  - $14.0 million unfavourable variance in the Media segment’s adjusted EBITDA.

The Telecommunications segment’s increased profitability, the favourable variance in income tax receivable and payable, and favourable variances in provisions and in accounts payable and accrued charges in the Telecommunications segment had a favourable impact on cash flows provided by continuing operating activities in 2018 compared with 2017, while the increase in the interest expense as a result of debt financing of a portion of the repurchase of Quebecor Media shares held by CDP Capital and the decrease in the Media segment’s profitability had an unfavourable impact.

Working capital: Negative $288.4 billion at December 31, 2018 compared with negative $159.3 million at December 31, 2017. The $129.1 million unfavourable variance was due primarily to the use of cash and cash equivalents for the repurchase of Quebecor Media Common Shares held by CDP Capital in 2018, as well as the increase in net income tax payable and in accounts payable and accrued charges, partially offset by the impact of the redemption in 2018 of convertible debentures entered under current liabilities at December 31, 2017, of which $362.5 million in par value was settled in shares of the Corporation.

Investing activities

Additions to property, plant and equipment: $553.0 million in 2018 compared with $602.1 million in 2017. The $49.1 million decrease was due to lower spending on wired and wireless networks in the Telecommunications segment.

Additions to intangible assets: $197.4 million in 2018 compared with $141.9 million in 2017. The $55.5 million increase was due primarily to spending on the IPTV project and IT systems in the Telecommunications segment.

Proceeds from disposal of assets: $9.4 million in 2018, compared with $620.7 million in 2017, a $611.3 million decrease.

- In 2017, Videotron sold its AWS-1 spectrum licence in the Metropolitan Toronto area to Rogers for a cash consideration of $184.2 million, and its seven 2500 MHz and 700 MHz wireless spectrum licences outside Québec to Shaw for a cash consideration of $430.0 million.

Business acquisitions: $10.3 million in 2018 compared with $5.8 million in 2017.

- In 2018, business acquisitions consisted mainly of the acquisition of LC Media, Audio Zone and the assets of Mobilimage by the Media segment.
- In 2017, business acquisitions consisted mainly of payment of the $5.6 million balance payable on the acquisition of Fibrenoire by the Telecommunications segment.

Acquisition of non-controlling interest: $1.54 billion in 2018 compared with $43.9 million in 2017.

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital for a total aggregate purchase price of $1.54 billion, paid in cash. Available cash and drawings on Videotron's revolving credit facility were used to finance the transaction.
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital in consideration of the issuance of $150.0 million aggregate principal amount of convertible debentures of Quebecor to CDP Capital.
- On July 6, 2017, Quebecor Media repurchased for cancellation 541,899 of its Common Shares held by CDP Capital for an aggregate purchase price of $37.7 million, paid in cash, and paid off a security held by CDP Capital for $6.2 million.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $679.3 million in 2018 compared with $455.0 million in 2017 (Table 8). The $224.3 million increase was primarily due to:

- $227.8 million increase in cash flows provided by continuing operating activities;
- $49.1 million decrease in additions to property, plant and equipment.

Partially offset by:

- $55.5 million increase in additions to intangible assets.

Financing activities

Consolidated debt (long-term debt plus bank indebtedness): A $915.1 million increase in 2018. A $329.3 million net favourable variance in assets and liabilities related to derivative financial instruments.

- Additions to debt in 2018 essentially consisted of:
  - $738.5 million increase in Videotron's drawings on its revolving bank credit facility;
  - $342.0 million unfavourable impact of exchange rate fluctuations. The consolidated debt increase attributable to this item was offset by an increase in the asset (or decrease in the liability) related to cross-currency swap agreements entered under "Derivative financial instruments";
  - $24.3 million increase in the bank indebtedness of Videotron and Quebecor Media.
- Debt reductions in 2018 primarily consisted of:
  - $172.5 million decrease in Quebecor's drawings on its revolving bank credit facility and other facilities;
  - current payments totalling $19.2 million on the term loan and other facilities of Videotron, TVA Group and Quebecor Media.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $887.0 million at December 31, 2018 compared with $557.7 million at December 31, 2017. The $329.3 million net favourable variance was mainly due to:
  - favourable impact of exchange rate fluctuations on the value of derivative financial instruments.

  Partially offset by:
  - unfavourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.
- On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility, extending its term to July 2022. Certain conditions were also amended.
- On November 26, 2018, Quebecor amended its secured revolving credit facility by reducing it from $300.0 million to $50.0 million and extending its term to July 2020, while Videotron amended its secured revolving credit facility by increasing it from $965.0 million to $1.50 billion and extending its term to July 2023. Certain conditions related to those credit facilities were also amended.

- On August 21, 2018, the Corporation issued a notice regarding the redemption on October 12, 2018 of all its outstanding 4.125% convertible debentures maturing on October 15, 2018, in the aggregate principal amount of $362.5 million. In accordance with the terms of the convertible debentures, the Corporation elected to exercise its right to settle the redemption of all the outstanding debentures in shares. Accordingly, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018. In February and May 2018, the Corporation also issued notices regarding the redemption on April 4 and July 24, 2018 of convertible debentures in the aggregate principal amount of $87.5 million. The redemption prices were paid upon redemption of the debentures.
- On June 22, 2018, the Corporation issued new convertible debentures in the aggregate principal amount of $150.0 million. The debentures bear interest at an annual rate of 4.00% and mature in June 2024. The convertible debentures are convertible into Class B Shares of Quebecor in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares of Quebecor corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares of Quebecor corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture. The other terms and conditions of the convertible debentures are substantially consistent with the terms of the convertible debentures issued under the Corporation's trust agreement dated October 11, 2012, as amended.

Financial position

Net available liquidity: $1.03 billion at December 31, 2018 for Quebecor Media and its wholly owned subsidiaries, consisting of $1.05 billion in available unused revolving credit facilities less $23.6 million in bank indebtedness.

Net available liquidity: $45.0 million as at December 31, 2018 for Quebecor at the corporate level, consisting of $45.0 million in available unused revolving credit facilities.

Consolidated debt (long-term debt plus bank indebtedness): $6.45 billion at December 31, 2018, a $915.1 million increase compared with December 31, 2017; a $329.3 million net favourable variance in assets and liabilities related to derivative financial instruments (see "Financing activities" above).

- Consolidated debt essentially consisted of Videotron's $4.23 billion debt ($3.27 billion at December 31, 2017); TVA Group's $52.8 million debt ($62.6 million at December 31, 2017); Quebecor Media's $2.12 billion debt ($1.98 billion at December 31, 2017); and Quebecor's $53.2 million debt ($225.7 million at December 31, 2017).

As at December 31, 2018, minimum principal payments on long-term debt in the coming years are as follows:

Table 10
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2019	$	57.9
2020		454.4
2021		1.4
2022		1,135.5
2023		2,401.2
2024 and thereafter		2,411.3
Total	**$**	**6,461.7**

From time to time, Quebecor may (but is under no obligation to) seek to retire or purchase its outstanding securities, including debentures, in open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor's consolidated debt was approximately 5.1 years as of December 31, 2018 (5.9 years as of December 31, 2017). After taking into account hedging instruments, at December 31, 2018 the debt consisted of approximately 76.3% fixed-rate debt (84.7% at December 31, 2017) and 23.7% floating-rate debt (15.3% at December 31, 2017).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases, dividend payments to shareholders, and dividend payments (or distributions) to non-controlling interest. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted EBITDA). At December 31, 2018, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

On March 12, 2019, the Board of Directors of Quebecor declared a quarterly dividend of $0.055 per share on Class A Shares and Class B Shares, payable on April 23, 2019 to shareholders of record as of the record date of March 29, 2019.

Participation in 600 MHz spectrum auction

In December 2018, Videotron qualified as a bidder in the auction for spectrum licences in the 600 MHz band announced by Innovation, Science and Economic Development (“ISED”) Canada. The auction is scheduled to commence on March 12, 2019.

In December 2018, Videotron contracted new unsecured on-demand credit facilities under which letters of credit were issued and submitted to ISED Canada as a pre-auction deposit, with the application to bid. The submission of these letters of credit did not have the effect of reducing the Corporation’s net available liquidity. In accordance with the rules of confidentially established by ISED Canada respecting restrictions on communications during the auction process, it is strictly forbidden for the Corporation to disclose the amount of these letters of credit. Videotron may withdraw the letters of credit at any time prior to the opening of the auction.

The full licensing framework for spectrum in the 600 MHz band published by ISED Canada, including the method used to determine the amount of the pre-auction deposit, is available on the ISED Canada website at <www.ic.gc.ca/eic/site/smt-gst.nsf/eng/h_sf11331.html>

Analysis of consolidated balance sheet at December 31, 2018

Table 11
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2018 and 2017
(in millions of Canadian dollars)

	Dec. 31, 2018	Dec. 31, 2017	Difference	Main reasons for difference
Assets				
Cash and cash equivalents	**$ 21.0**	$ 864.9	$ (843.9)	Use of cash and cash equivalents for the repurchase of Quebecor Media Common Shares held by CDP Capital
Net assets held for resale[1]	**88.4**	–	88.4	Net assets of 4Degrees Colocation held for resale
Property, plant and equipment	**3,451.8**	3,594.6	(142.8)	Depreciation for the period and reclassification of net assets held for resale, less additions to property, plant and equipment on an accrual basis
Intangible assets	**1,135.3**	983.1	152.2	Investment in the IPTV project and IT systems by the Telecommunications segment on an accrual basis, less amortization for the period and the impairment charge
Derivative financial instruments[2]	**887.0**	557.7	329.3	See “Financing activities”
Liabilities				
Accounts payable and accrued charges	**832.0**	738.7	93.3	Impact of current variances in activity
Income taxes[3]	**114.4**	(16.0)	130.4	Current income taxes for the period less current disbursments
Long-term debt, including short-term portion and bank indebtedness	**6,452.5**	5,537.4	915.1	See “Financing activities”
Convertible debentures and embedded derivatives related to convertible debentures[4]	**155.2**	892.2	(737.0)	Redemption of convertible debentures in the principal amount of $450.0 million, partially offset by the issuance of debentures in the amount of $150.0 million (see “Financing activities”)

1 Current assets less current liabilities.
2 Long-term assets less long-term liabilities.
3 Current liabilities less current assets.
4 Current liabilities plus long-term liabilities.

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2018, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; principal repayment and interest on convertible debentures; operating lease arrangements; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 12 below shows a summary of these contractual obligations.

Table 12
Contractual obligations of Quebecor as of December 31, 2018
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 6,461.7**	$ 57.9	$ 455.8	$ 3,536.7	$ 2,411.3
Convertible debentures[2]	**150.0**	–	–	–	150.0
Interest payments[3]	**1,546.9**	260.8	595.7	443.4	247.0
Operating leases	**192.9**	44.5	48.3	26.4	73.7
Additions to property, plant and equipment and other commitments	**1,351.5**	247.4	370.7	277.7	455.7
Derivative financial instruments[4]	**(892.7)**	0.2	(105.1)	(618.1)	(169.7)
Total contractual obligations	**$ 8,810.3**	**$ 610.8**	**$ 1,365.4**	**$ 3,666.1**	**$ 3,168.0**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 Based on the market value at December 31, 2018 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $26.85 per share and a ceiling price of $33.5625. The Corporation may also redeem convertible debentures by issuing the corresponding number of Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2018.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 12

Videotron leases sites for its wireless network under operating lease arrangements. It also has 20-year service sharing and exchange agreements with Rogers to build out and operate an LTE network in Québec and the Ottawa area, as well as an agreement with Comcast Corporation to develop an innovative IPTV solution. As at December 31, 2018, the balance of those commitments stood at $608.9 million.

In 2011, Quebecor Media announced an agreement with Québec City for the leasing and management of the Videotron Centre. As at December 31, 2018, the balance of those commitments stood at $70.5 million.

In 2012 and 2014, Quebecor Media signed 20-year agreements to install, maintain and advertise on bus shelters belonging to the Montréal and Laval transit commissions. In 2015 and 2018, similar 10-year agreements were signed with the Lévis, Sherbrooke and Longueuil transit commissions. As at December 31, 2018, the balance of those commitments stood at $98.3 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2018, the balance of those commitments stood at $589.3 million.

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans are $33.4 million for 2019, based on the most recently filed actuarial report (contributions of $36.6 million were made in 2018).

Related party transactions

In 2018, the Corporation made sales to affiliated corporations in the amount of $2.8 million ($2.8 million in 2017).

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Operating leases

The Corporation has guaranteed a portion of the residual value of certain assets under operating leases for the benefit of the lessor. Should the Corporation terminate these leases prior to term (or at the end of the lease terms) and should the fair value of the assets be less than the guaranteed residual value, then the Corporation must, under certain conditions, compensate the lessor for a portion of the shortfall. In addition, the Corporation has provided guarantees to the lessor of certain premises leases with expiry dates through 2020. Should the lessee default under the agreement, the Corporation must, under certain conditions, compensate the lessor. As of December 31, 2018, the maximum exposure with respect to these guarantees was $19.3 million and no liability has been recorded in the consolidated balance sheet.

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheet.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these indemnifications.

Other

One of the Corporation’s subsidiaries, has, as a franchiser, provided guarantees should franchisees, in their retail activities, default on certain purchase agreements. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheet with respect to these guarantees.

Capital stock

In accordance with Canadian financial reporting standards, Table 13 below presents information on the Corporation’s capital stock as at February 15, 2019. In addition, 1,962,892 share options were outstanding as of February 15, 2019.

Table 13
Capital stock
(in shares and millions of Canadian dollars)

	February 15, 2019	
	Issued and outstanding	**Book value**
Class A Shares	**77,247,844**	**$ 8.6**
Class B Shares	**178,489,153**	**$ 1,049.5**

On August 8, 2018, the Board of Directors of Quebecor authorized the renewal of its normal course issuer bid for a maximum of 1,000,000 Class A Shares, representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 7,800,000 Class B Shares, representing approximately 5.0% of issued and outstanding Class B Shares as of August 1, 2018. The purchases can be made from August 15, 2018 to August 14, 2019 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange ("TSX") or other alternative trading systems. All repurchased shares will be cancelled.

On August 9, 2018, the Corporation announced that it had entered into an automatic securities purchase plan ("the plan"), as of August 10, 2018, with a designated broker under its normal course issuer bid, whereby shares may be repurchased under the plan at times when such purchases would otherwise be prohibited pursuant to regulatory restrictions or self-imposed blackout periods. Under the plan, before entering a self-imposed blackout period, the Corporation may, but is not required to, ask the designated broker to make purchases under the normal course issuer bid. Such purchases are made at the discretion of the designated broker, within parameters established by the Corporation prior to the blackout periods. Outside the blackout periods, purchases are made at the discretion of the Corporation's management. The plan received prior approval from the TSX. It came into effect on August 15, 2018 and terminates on the same date as the normal course issuer bid.

In 2018, the Corporation purchased and cancelled 11,390,300 Class B Shares for a total cash consideration of $291.7 million (5,590,700 Class B Shares for a total cash consideration of $127.5 million in 2017). The $257.6 million excess of the purchase price over the carrying value of the repurchased Class B Shares was recorded in reduction of retained earnings ($117.0 million in 2017).

In 2018, 100,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $1.3 million (100,000 Class B Shares for a cash consideration of $1.1 million in 2017). Following this transaction, the contributed surplus was increased by $1.2 million ($1.2 million in 2017) and the stock option plan liability was reduced by the same amount.

On August 21, 2018, the Corporation issued a notice regarding the redemption on October 12, 2018 of all its outstanding 4.125% convertible debentures maturing on October 15, 2018, in the aggregate principal amount of $362.5 million. In accordance with the terms of the convertible debentures, the Corporation elected to exercise its right to settle the redemption of all the outstanding debentures in shares. Accordingly, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018.

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Competition and technological development

In its cable business, Quebecor Media competes against incumbent local exchange carriers (or "ILECs"). The primary one in Quebecor Media's market holds a regional licence to provide terrestrial broadcasting distribution in Montréal and in several other communities in Québec. That primary ILEC has rolled out its own "IPTV service throughout the country and, more specifically, in Montréal (including a portion of the greater Montréal area), Québec City, and in other locations in Québec. It has also secured licences to launch video distribution services using video digital subscriber line (or "VDSL") technology. Quebecor Media's cable business competes against providers of direct broadcast satellite (or "DBS", which in Canada are also referred to as "DTH" for "direct-to-home" satellite providers), multichannel multipoint distribution systems, and satellite master antenna television systems. The direct access to some broadcasters' websites that provide streaming in high definition ("HD") of video-on-demand content is also available for some of the channels that Quebecor Media offers in its television programming. In addition, some third-party Internet service providers ("ISPs") have launched Internet Protocol video services ("IP video services") in territories where Quebecor Media provides services.

Quebecor Media also faces competition from illegal providers of cable television services and illegal access to non-Canadian DBS (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy). Competitors in the video business also include emerging content delivery platforms. Furthermore, OTT content providers, such as Netflix, Apple TV and Amazon Prime Video, as well as Canadian services such as Crave TV, compete for viewership and for a share of the monthly entertainment spending currently allocated to traditional cable television and cable service video-on-demand offerings.

Unlike Quebecor Media, OTT service providers are not subject to CRTC regulations and do not have to contribute financially to the Canadian traditional television business model or Internet infrastructure. Furthermore, foreign providers with no Canadian business place are not required to charge federal and provincial sales tax. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial condition, and results of operations. On September 28, 2017, the Minister of Canadian Heritage and Netflix concluded an arrangement pursuant to which Netflix undertakes to invest a minimum of $500 million in original productions in Canada over the next five years. As part of this arrangement, the federal government has decided not to impose the Goods and Services Tax ("GST") on

Netflix's services. Since Quebecor Media's own clients must pay GST when they buy Quebecor Media's services, this decision could place Quebecor Media at a competitive disadvantage.

In its Internet access business, Quebecor Media competes against other ISPs offering residential and commercial Internet access services as well as WiMAX and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line, fibre to the node and fibre to the home technologies, often offering comparable download speeds to Quebecor Media's. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to Quebecor Media's low and medium download speeds. The CRTC also requires cable and ILEC network providers, including Quebecor Media, to offer wholesale access to their high-speed Internet systems to third-party ISP competitors for them to provide retail Internet access services. Those third-party ISP competitors may also provide telephony, television services, IP video services and networking applications. Their market share is significant and growing especially in Québec and Ontario, the two regions in Canada where these third-party ISP competitors have been particularly active and aggressively pricing their services. Certain municipalities also plan to build and operate their own broadband networks. They plan to do so through public/private partnership arrangements, competing directly with Quebecor Media in some of its local markets.

Quebecor Media's cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators, and other providers of telephony, television services, voice over Internet Protocol (or "VoIP") and Internet communications, including competitors that are not facility-based and therefore have much lower infrastructure costs. In addition, Internet Protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operation.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current or developing adjunct technologies, such as Wi-Fi, "hotspots" or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides, or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and for many years have been operating lower-cost mobile telephony brands in order to acquire additional market share. In the near future, depending on new regulations, Quebecor Media could see the emergence of non-facility-based operators in the wireless space. Also, Quebecor Media may not be able to compete successfully in the future against existing or potential competitors, and increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

Due to ongoing technological developments, the distinction between traditional platforms (broadcasting, Internet and telephony) is fading rapidly. For instance, emerging Go Platforms such as HBO Go, allow customers to view their traditional television content directly on their mobile devices or computers via Internet connection (although authentication as a broadcasting distribution undertaking's subscriber is still required in Canada). Also, the Internet, through wireline or cable and mobile devices, is an important broadcasting and distribution platform. In addition, mobile operators, with the development of their LTE networks, offer wireless and fixed wireless Internet services. In addition, Quebecor Media's VoIP telephony service also competes with Internet-based solutions.

Moreover, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television, IPTV, Internet, residential and mobile telephony services). Should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing one subscriber for each of its services as a result of its bundling strategy. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operation.

Fierce price competition in all Quebecor Media's businesses and across the industries in which it operates may affect Quebecor Media's ability to raise the price of its products and services in line with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operation.

Significant and rapid technological changes

In relation to the Corporation's Media segment, the media industry is experiencing rapid and significant technological changes, which have resulted in alternative means of program and content transmission. The continued growth of the Internet has presented alternative content distribution options that compete with traditional media. Consumers are spending an increasing amount of time on the Internet and on mobile devices and are increasingly viewing content on a time-delayed or on-demand basis from the Internet, on their televisions and on portable devices. These alternative technologies may increase audience fragmentation, reduce the Media segment business ratings, readership or circulation levels, or have an adverse effect on advertising revenues from local and national advertisers. Furthermore, in Quebecor Media's video distribution markets, industry regulators have authorized DTH, microwave services and VDSL services, and may authorize other alternative methods of transmitting television and other content with improved speed and quality.

The continuous technological improvements to the Internet, combined with higher download speeds and cost reductions for customers, may divert a portion of Quebecor Media's Media segment business' existing television subscriber base from its services to new video-over-the-Internet model. While having a positive impact on the demand for its Internet services, video-over-the-Internet could adversely impact the demand for its other services.

Quebecor Media may not be able to successfully compete with existing or newly developed alternative technologies, such as advanced LTE technologies leading to and complementing fifth-generation (5G), 5G telecommunication technologies, Software-defined networking ("SDN") and Network function virtualization ("NFV") technologies, or it may be required to acquire, develop or integrate new technologies. The cost of the acquisition, development or implementation of new technologies could be significant and its ability to fund such implementations may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition, and results of operations.

5G technology is evolving rapidly and the world's first standards-based commercial launches are expected in 2019, while smartphones are generally expected to support 5G technology in late 2019 or 2020. It is expected that early 5G ecosystems will operate on three distinct spectrum bands: 3.5 GHz, millimetre wave (mmWave) spectrum (28 GHz and 37–40 GHz) and 600 MHz. Globally, 3.5 GHz spectrum is becoming the primary band for 5G mobile coverage. In Canada, 3.5 GHz was auctioned for fixed wireless access ("FWA") between 2004 and 2009; it is currently not licensed for mobile applications and is largely held by Inukshuk (a joint venture owned by Bell Canada and Rogers) in most urban markets. ISED Canada is expected to claw back a portion of Inukshuk's 3.5 GHz spectrum holdings and re-auction it for flexible use (permitting the deployment for mobile applications, such as 5G). Depending on the amount of 3.5 GHz spectrum clawed back and re-auctioned, there is a risk that Quebecor Media may end up with less 3.5 GHz spectrum and would not be able to compete equally on network speeds and 5G capacity. Meanwhile, if ISED Canada converts 3.5 GHz spectrum to mobile use before the 3.5 GHz auction concludes, current holders would have access to 5G spectrum before Quebecor Media and could gain a time to market advantage. Also, with regards to the 600 MHz spectrum auction that opens in March 2019, there is a risk that we might not be able to purchase the spectrum required to compete equally on network speeds and 5G capacity. Any such difficulty or inability to compete could have a material adverse effect on Quebecor Media's business, reputation, prospects, financial condition, and results of operations.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world (including Canada, the United States and Europe), and has established worldwide coverage. Should it be unable to extend its worldwide coverage, or to renew or substitute for those roaming agreements at their respective or better terms or on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably. In addition, if Quebecor Media is unable to renew, or substitute for, those roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, financial condition and results of operations could be adversely affected.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, it cannot be assured that it will continue to enjoy a good reputation, nor can it be assured that events that are beyond its control will not cause its reputation to be negatively impacted. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Higher handset subsidies and increase in BYOD customers

Quebecor Media's mobile telephony business model is based substantially on subsidizing the cost of subscriber handsets, similar to other Canadian wireless carriers. This model attracts customers and in exchange they commit to a term contract. Quebecor Media also commits to a minimum subsidy per unit with the supplier of certain smartphone devices. If Quebecor Media is unable to recover the costs of the subsidies over the term of the customer contract, this could negatively impact its business, prospects, revenues, financial condition, and results of operations.

Also, with the introduction of the CRTC's Wireless Code in 2013 and its revision in 2017, limiting wireless term contracts to two years and eliminating device locking, the number of BYOD customers with no-term contracts has increased. Such customers are under no contractual obligation to remain with Quebecor Media, which could have a material adverse effect on its churn rate and, consequently, on its business, prospects, revenues, financial condition and results of operations.

Inventory obsolescence

Quebecor Media's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, or minimum order quantities from its suppliers, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

Quebecor Media's strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its network and infrastructure to support growth in its customer base and its demands for increased bandwidth capacity and other services. In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its network and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short term, mid term and long term in order to maintain, expand and enhance its networks, systems and services, including expenditures relating to advancements in Internet access, HD, Ultra-high definition ("UHD") television, IoT, IPTV and TV everywhere/every platform requiring IP delivery technology, as well as the introduction of virtual reality, and home automation.

New technologies in the telecommunication industry are evolving faster than the historical investment cycle in the industry. The introduction of new technologies and their pace of adoption could result in requirements for additional capital investments not currently planned, as well as shorter estimated useful lives for certain of Quebecor Media's existing assets.

The demand for wireless data services has been growing at high rates and it is projected that this demand will further accelerate, driven by increases in the following: levels of broadband penetration; need for personal connectivity and networking; affordability of smartphones and Internet-only devices (e.g., high-usage data devices such as mobile Internet keys, tablets and electronic book readers); multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum, if available and if economically reasonable, in order to address this increased demand. The ability to acquire additional spectrum (if needed) is dependent on the timing and the rules established by ISED Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

The development, maintenance and enhancement of Quebecor Media's mobile network and any new market standards requires capital expenditures to remain competitive and to comply with its obligations under the agreement with its partner governing the joint operation of its LTE network. A geographical expansion, densification or further upgrade of its mobile network may require Quebecor Media to incur significant costs and to make significant capital expenditures.

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to finance any portion of these capital improvement programs, new strategies and services, or other capital expenditure requirements, whether through cash from operations, additional borrowings or other sources. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, or if, for any reason, the agreement with its partner governing the joint operation of its LTE network is terminated or not renewed and Quebecor Media is unable to enter into similar agreements with respect to further upgrades of its mobile network or generate sufficient funds or obtain additional financing to expand and enhance its mobile network it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected. Even if Quebecor Media were able to obtain adequate funding, the period of time required to upgrade its network could have a material adverse effect on its ability to successfully compete in the future. Moreover, additional investments in its business may not translate into incremental revenues, cash flows or profitability.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable network. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the "*Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies on its service territory. Should Quebecor Media seek to renew or renegotiate those agreements, it cannot guarantee that they will continue to be available on their respective terms, or on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage and which may have a material adverse effect on its business and prospects.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities enhancing its advanced broadband network, pursuing enhanced content development, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its businesses. Quebecor Media may not be able to implement those strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement those strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, and other factors described in this section. While the centralization of certain business operations and processes has the advantage of standardizing practices, thereby reducing costs and increasing effectiveness, it also represents a risk in itself should a business solution implemented throughout the organization by a centralized office fail to produce the intended results. Quebecor Media may also be required to make capital expenditures or other investments that may affect its ability to implement its business strategies if it is unable to secure additional financing on acceptable terms or to generate sufficient funds internally to cover those requirements. Any material failure to implement its strategies could have a material adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating expenditures in the future in order to offer new products and services to its customers. It can provide no assurance that it will be successful in developing such new products and services in relation to those engagements, including the marketing of new revenue sources.

Consumers' trend to abandon cable telephony and television services

The recent trend towards mobile substitution or "cord-cutting" (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada and the various unlimited offers launched by mobile operators. In addition, there is also a consumer trend to abandon and substitute wire and cable television for Internet access services in order to stream directly from broadcasters and OTT content providers. Quebecor Media may not be successful in converting its existing cable telephony subscriber base to its mobile telephony services or in attracting customers to its OTT entertainment platforms, which could have a material adverse effect on its business, prospects, revenues, results of operations and financial condition.

Rapid growth of traffic volumes on the Internet

Internet users are downloading an increasing amount of data each year and households are connected to the Internet through a combination of several computers, tablets and other mobile devices, leading to simultaneous flows per home. In addition, some content on the Internet, such as videos, is available at a higher bandwidth for which HD, as opposed to standard definition, has become the norm. OTT service providers have recently started streaming UHD content, which uses even more bandwidth than HD services. There has therefore been an increase in data consumption and an intensification of Internet traffic during peak periods, which calls for increased bandwidth capacity to address customer needs.

Equipment costs are under pressure in an effort to counterbalance customer demand for bandwidth. While Quebecor Media can relay some of this pressure on costs to its manufacturers, adopt new technologies that reduce costs or implement other cost-reduction initiatives, Quebecor Media's inability to fully meet its customers' increasing need for bandwidth may result in client losses, price increases or reduced profitability.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, prospects, results of operations and financial condition. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, prospects, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the same timeline as its other businesses; and, specifically with regards to the Videotron Centre, that it might not be able to maximize its profitability due to the fact that it does not have a main tenant nor operate in a major market.

Implementation of changes to the structure of its business

Quebecor Media has and will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement or upgrade, a process redesign, and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may lead to greater-than-expected operational challenges and costs, expenses, customer loss, and business disruption for Quebecor Media, which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor's failure to recruit, train and retain such employees could have a material adverse effect on its business, prospects, results of operations and financial condition. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance, maintain content quality, continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

Advertising revenue is the primary source of revenue for the Corporation's Media segment. Quebecor Media's revenues and operating results in those businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Those economic factors affect the levels of retail and national advertising revenues of the media properties of Quebecor Media. Since a significant portion of Quebecor Media's advertising revenues is derived from retail, automotive and consumer packaged goods sector advertisers, weakness in those sectors and in the real estate industry has had and may continue to have an adverse impact on the revenues and results of operations of the Media segment. Advertising consolidation, supported by an international coalition of advertising agencies, is disrupting the demand model and exerting strong downward pricing pressure on our advertising inventories. Continuing or deepening softness in the Canadian or U.S. economy could further adversely affect key national advertising revenues.

Advertising revenues for the Media segment are also driven by readership and circulation levels, as well as by market demographics, price, service, and advertiser results. Readership and circulation levels tend to be based on the content of the newspaper or magazine, service, availability and price. A prolonged decline in readership and circulation levels in Quebecor Media's newspaper and magazine businesses and lack of audience acceptance of its content would have a material effect on the rate and volume of its newspaper and magazine advertising revenues (as rates reflect circulation and readership, among other factors), and could also affect its ability to institute circulation price increases for its print products, all of which could have a material adverse effect on its business, prospects, results of operations, and financial condition.

The newspaper and magazine industry is experiencing structural changes, including the growing availability of free access to content, shifting readership habits, digital transferability, the advent of real-time information and secular changes in the advertising industry, as well as the declining frequency of regular newspaper and magazine buying, particularly among young people, who increasingly rely on non-traditional media as a source for news and information. As a result, competition for advertising spend and circulation revenues comes not only from other newspapers and traditional media, but also from digital media technologies, which have introduced a wide variety of media distribution platforms (including, most significantly, the Internet and distribution over wireless devices and e-readers) for readers and advertisers.

While Quebecor Media continues to pursue initiatives to offer value-added advertising solutions to its advertisers and to slow down the decline of its circulation base, such as investments in the redesign and overhaul of its newspaper and magazine websites and the publication of e-editions of a number of its newspapers and magazines, it may not be successful in converting its advertising revenues or in transferring its audience to its new digital products. The ability of the Media segment to succeed over the long-term depends on various factors, including its ability to attract advertisers and readers (including subscribers) to its online sites. Quebecor Media's new initiatives, developed to generate additional revenues from its websites (such as digital platform advertising), may not be accepted by users and consequently may negatively affect online traffic. In addition, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of those initiatives through increased circulation, advertising and digital revenues.

In broadcasting, the proliferation of television channels, progress in mobile and wireless technology, the migration of television audiences to the Internet, including social networks, and the viewing public's increased control over the manner, content and timing of their media consumption through personal video recording devices, have all contributed to the fragmentation of the television viewing audience and to a more challenging advertising sales environment. For example, the increased availability of personal video recording devices and video programming on the Internet, as well as the increased access to various media through mobile devices, may each have the potential to reduce the viewing of its content through traditional distribution outlets. Some of these new technologies also give consumers greater flexibility to watch programming on a time-delayed or on-demand basis, or to fast-forward or skip advertisements within its programming, which may adversely impact the advertising revenues it receives. Delayed viewing and advertisement skipping have the potential to become more common as the penetration of personal video recording devices increases and content becomes increasingly available via Internet sources. If the broadcasting market continues to fragment, Quebecor Media's audience share levels and its advertising revenues, business, prospects, results of operations and financial condition could be materially adversely affected.

Distribution of a wide range of television programming

The financial performance of its cable and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing, conveniently scheduled television programming at reasonable rates on its platforms. Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, those suppliers have become vertically integrated and are now more limited in number. The quality and amount of television programming offered by Quebecor Media affect the attractiveness of its services to customers and, accordingly, the rates Quebecor Media can charge for such services. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates, or its inability to pass-through rate increases to its customers could have a material adverse effect on its business, prospects, results of operations, and financial condition.

In addition, Quebecor Media's ability to attract and retain cable customers depends, to a certain extent, on its capacity to offer quality content, HD and UHD programming, an appealing variety of programming choices and packages, as well as multiplatform distribution and on-demand content at competitive prices. If the number of specialty channels being offered does not increase at the level and pace comparable to its competitors, if the content offered on such channels does not receive audience acceptance, or if it is unable to offer multiplatform availability, HD and UHD programming and on-demand content for capacity reasons, among others, this may have a negative impact on revenues from Quebecor Media's cable operations.

The multiplicity of foreign and deregulated content providers (often global players on the Internet) puts pressure on the viability of Quebecor Media's current business model for television distribution. Substantial capital expenditures on infrastructure and on research and development may be required to remain competitive.

Costs, quality, and variety of television programming

The most significant expenses in television broadcasting are programming and production costs. Increased competition in the television broadcasting industry, developments affecting producers and distributors of programming content, the vertical integration of distributors and broadcasters, introduction from various OTT providers of original and exclusive programming, changes in viewer preferences and other developments could impact both the availability and the costs of programming content, as well as production costs. Future increases or volatility in programming and production costs could adversely affect Quebecor's operating results. Developments in cable, satellite or other forms of distribution could also affect both the availability and the cost of programming and production and increase competition for advertising expenditures. As well, the value of royalties payable pursuant to the *Copyright Act* (Canada) are frequently decided by the Copyright Board of Canada during or even after the applicable period, which can cause retroactive increases in content costs.

Launch of new products and services

Quebecor Media is investing in the launch of new products and services. During the period immediately following the launch of a new product or service, revenues are generally relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize, or may never materialize.

Loss of key customers

The Corporation's businesses are based primarily on customer satisfaction with reliability, timeliness, quality, and price. In general, Quebecor Media does not have long-term or exclusive service agreements with its customers. Quebecor Media is unable to predict if, or when, its customers will purchase its services. There can be no assurance that the revenues generated from key customers, individually or in the aggregate, will reach or exceed historical levels in any future period, or that it will be able to develop relationships with new customers. Quebecor Media cannot assure that it will continue to maintain favourable relationships with its customers or that they will not be adversely affected by economic conditions.

Single-clustered network

Quebecor Media provides its digital television, Internet access, cable telephony and mobile telephony services through a primary headend and through 12 additional regional headends in a single-clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as cyberattacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its network until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation, and could have a material effect on its financial condition.

Cybersecurity

The ordinary course of Quebecor Media's telecommunications, media and data-storage businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, as well as personally identifiable information on its customers and employees, whether in its systems, infrastructure, networks and processes, or those of its suppliers. The secure processing, maintenance and transmission of this information is critical to its operations and business strategy.

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against signal interruption, unauthorized access to, or use of sensitive data, including data on its customers, and to prevent data loss or theft, and although ever-evolving cyberthreats require Quebecor Media to continually evaluate and adapt its systems, infrastructure, networks and processes, Quebecor Media cannot assure that its, systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against all information security access by third parties or errors by employees or by third-party suppliers. If Quebecor Media is subject to a significant cyberattack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

In addition, the preventive actions Quebecor Media takes to reduce the risks associated with cyberattacks, including protection of its information assets, as well as efforts to improve the overall governance over information security and the controls within its IT systems, may be insufficient to repel or mitigate the effects of a major cyberattack in the future.

The costs associated with a major cyberattack could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues and customers from business interruption and litigation. As part of Quebecor Media's risk mitigation, contractual risk transfer with its clients and suppliers is worded to limit its liability and Quebecor Media purchases cyber liability insurance to cover the residual liability as per standard business practices. However, Quebecor Media's contractual risk transfers do not eliminate the risk completely and the potential costs associated with these attacks could exceed the insurance coverage it maintains.

Protection of personal data

Quebecor Media stores and processes increasingly large amounts of personally identifiable information on its clients, employees, and/or business partners. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data in, and hosted on its systems, or those belonging to its suppliers, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed systems, processes and security controls that are designed to protect the personally identifiable information on its clients, employees and business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breach relating to such data that Quebecor Media stores or processes or that its suppliers store or process. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers, some of which are based in territories providing geopolitical risk. An inability to maintain and enhance its existing IT systems, or to obtain new systems to accommodate additional customer growth or support new products and services, could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, and manage operating expenses, all of which may have a material adverse effect on its business, prospects, results of operations and financial condition.

Products and services supplied to Quebecor Media by third-party suppliers may contain latent security issues, including but not limited to software security issues, that would not be apparent upon a diligent inspection. Failure to identify and remedy those issues could adversely impact its results of operations and financial condition.

Malicious and abusive Internet practices

Quebecor Media's cable data, mobile data and fibre-optic connectivity business customers utilize its network to access the Internet and, as a consequence, Quebecor Media or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms, and other destructive or disruptive software. Such activities could have adverse consequences on its network and its customers, including deterioration of service, excessive call volumes to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its network. Any significant loss of cable data, mobile data or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, results of operations, and financial condition.

Protection from piracy

In its cable television, Internet access, OTT and telephony business, Quebecor Media may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its network, digital programming, and Internet access services. It uses encryption technology to protect its cable signals and OTT from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its network, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Third-party suppliers and providers

Quebecor Media depends on third-party suppliers and providers for certain services, hardware, licenced technological platforms and equipment that are, or may become, critical to its operations and network evolution. These materials and services include set-top boxes, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, licenced technological platforms, software, the "backbone" telecommunications network for Internet access and telephony services, and construction services for the expansion of and upgrades to its cable and mobile networks. These services and equipment are available from a single or limited number of suppliers and Quebecor Media therefore faces the risks of supplier disruption, including those due to geopolitical events, business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards, or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services and other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with content providers, comply with their technological requirements, or find alternative sources of equivalent content, its Media operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor's reputation, results of operations, liquidity or financial condition, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Intellectual property rights

Quebecor Media relies on its intellectual property, such as patents, copyrights, trademarks and trade secrets, as well as licences and other agreements with its vendors and other third parties, to use various technologies, conduct its operations and sell its products and services. Legal challenges to its intellectual property rights, or the ones of third-party suppliers, and claims of intellectual property infringement by third parties could require that it enters into royalty or licensing agreements on unfavourable terms, incur substantial monetary liability, or be enjoined preliminarily or permanently from further use of the intellectual property in question or from the continuation of its businesses as currently conducted. Quebecor Media may need to change its business practices if any of these events occur, which may limit its ability to compete effectively and could have an adverse effect on its results of operations. In the event that it believes any such challenges or claims are without merit, they can nonetheless be time-consuming and costly to defend and divert management's attention and resources away from its businesses. Moreover, if Quebecor Media is unable to obtain or continue to obtain licences from its vendors and other third parties on reasonable terms, its businesses could be adversely affected.

Piracy and other unauthorized uses of content are made easier, and the enforcement of Quebecor Media's intellectual property rights more challenging, by technological advances. The steps Quebecor Media has taken to protect its intellectual property may not prevent the misappropriation of its proprietary rights. Quebecor Media may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to Quebecor Media's. Also, Quebecor Media may not be able to discover or determine the extent of any unauthorized use of its proprietary rights. Unauthorized use of its intellectual property rights may increase the cost of protecting these rights or reduce its revenues. Quebecor Media cannot be sure that any legal actions against such infringers will be successful, even when its rights have been infringed.

Strikes and other labour protests

Quebecor Media is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial condition, results of operations and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund those pension plans will not increase in the future and therefore negatively impact its operating results and financial condition. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes and cable modems, certain mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations and financial condition.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2018, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favourable terms, or at all, in the future or, pursuant to the terms of these hedging transactions, its counterparties thereto may owe the Corporation significant amounts of money and may be unable to honour such obligations, all of which could have an adverse effect on its results of operations and financial condition.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2018, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $887.0 million on a consolidated basis.

Some of its suppliers source their products out of the U.S.; therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations in the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations and financial condition.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, changed or increased regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to maintain a cash balance until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as those could adversely impact Quebecor's results of operations, cash flows, financial condition and prospects.

Ethical business conduct

Any failure or perceived failure to adhere to Quebecor's policies, the law or ethical business practices could have a significant effect on its reputation and brands and could therefore negatively impact its financial performance. Quebecor's framework for managing ethical business conduct includes the adoption of a Code of Ethics, which its directors and employees are required to acknowledge and agree to on a regular basis, and, as part of an independent audit and security function, maintain a whistle-blowing hotline. There can be no assurance that these measures will be effective enough to prevent violations or perceived violations of law or ethical business practices.

Asset impairment charges

In the past, the Corporation has recorded asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flows.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause a diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel, and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset or the terms of such dispositions may be overly restrictive to us or may result in unfavorable post-closing price adjustments if some conditions are not met, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In the Quebecor Media's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its telecommunications business competitors have pursued a strategy of selling their products through independent retailers to extend their presence on the market, while some have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of Quebecor Media's retail network and may contribute to isolating Quebecor Media from its competitors, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licences. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. Although the federal government eliminated the foreign ownership restrictions on telecommunications companies with less than 10% of total Canadian telecommunications market revenues, there are significant restrictions on the ability of non-Canadian entities to own or control broadcasting licences and telecommunications carriers in Canada. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licences, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. For instance, the CRTC introduced some form of rate regulation following its commonly referred to "Lets talk TV" public consultations on television broadcasting and distribution. Consequently, Quebecor Media must offer a reduced basic service at $25 since March 1, 2016 and offer all specialty services "à la carte" since December 1, 2016. Moreover, the CRTC adopted a Wireless Code and a Television Service Provider Code which regulate numerous aspects of the provision of retail wireless services and retail television services, and is now considering the adoption of an Internet Code to regulate numerous aspects of the provision of retail Internet services. Finally, the CRTC initiated a proceeding in February 2019 to review its regulatory framework related to the provision of wireless services. This review could result in the introduction of mandatory resale into the wireless marketplace, to the detriment of facilities-based wireless competitors. Quebecor Media's wireless and cable operations are also subject to technical requirements, licence conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

In addition, laws relating to communications, data protection, e-commerce, direct marketing, and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes to the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions, may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of licence, the issuance of new licences, including additional spectrum licences, to its competitors, or changes to the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), prospects, results of operations and financial condition. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply. Notably, in June 2018, the Government of Canada issued terms of reference for a comprehensive review of the *Broadcasting Act*, the *Telecommunications Act* and, as required, the *Radiocommunication Act*. The review is being conducted by a panel of external experts, which is expected to issue its final report and recommendations in

January 2020. It is difficult to predict in what form laws and regulations will be adopted or how they will be construed by the relevant courts or the extent to which any changes might adversely affect Quebecor Media.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographic products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes to the policies or rules of application in Canada or in any of its provinces in connection with government incentive programs, including any change in the Québec or federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its results of operations and financial condition. Canadian content programming is also subject to certification by various federal government agencies. If programs fail to so qualify, the Corporation would not be able to use the programs to meet its Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

To ensure that the Corporation maintains minimum levels of Canadian ownership under the *Broadcasting Act* and other legislation under which it derives the benefit of tax credits and industry incentives, it has placed constraints on the issuance and transfer of shares of certain of its subsidiaries.

In addition, the Canadian and provincial governments currently provide grants and incentives to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation’s Film Production & Audiovisual Services Business, as well as content producers for its television broadcasting and production operations, finance a portion of their production budgets through Canadian government incentive programs, including federal and provincial tax credits. There can be no assurance that the government grants and incentive programs presently being offered to participants in the film and television production industry will continue at their present levels or at all. If such grants or incentives are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced and, as a result, the Corporation’s results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions around the world, including by many states in the United States. Some producers may select locations other than Québec to take advantage of tax credit programs that they conclude to be more, or as attractive as those Québec offers. Other factors such as director or star preference may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation’s business, results of operations and financial condition.

Licence renewals

Videotron’s AWS-1 licences were issued in December 2008 for a 10-year term. These licences were renewed in December 2018 for a 20-year term. A public consultation process is expected to be initiated shortly regarding the licence fees to be paid during the renewal term.

Videotron’s other spectrum licences, including in the AWS-3, 700 MHz and 2500 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of those respective terms, applications may be made for new licences for a subsequent term through a renewal process, unless a breach of licence conditions by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licences, including the terms and conditions of the new licences and whether licence fees should apply for a subsequent licence term, are expected to be determined by ISED Canada following public consultations.

If, at the end of their respective term, the licences are not renewed on acceptable terms, or at all, Quebecor Media’s ability to continue to offer its wireless services, or to offer new services, may be negatively impacted and, consequently, it could have a material adverse effect on its business, prospects, results of operations and financial condition.

Provision of third-party ISPs with access to cable systems

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide third-party ISPs with access to their cable systems at mandated cost-based rates. Several third-party ISPs are interconnected to Quebecor Media’s cable network and are thereby providing retail Internet access services as well as, in some cases, retail VoIP and IP-based television distribution services.

In a series of decisions since 2015, the CRTC has reemphasized the importance it accords to mandated wholesale access arrangements as a driver of competition in the retail Internet access market. Most significantly, the CRTC has ordered all of the major telephone and cable companies, including Videotron, to provide new disaggregated wholesale access services, which are to replace existing aggregated wholesale access services after a transition period. These new disaggregated services will involve third-party ISPs provisioning their own regional transport services. They will also include, for the first time, mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. A tariff proceeding is under way to set the rates for these new disaggregated wholesale services. In parallel, on October 6, 2016, the CRTC ordered a significant interim reduction to the tariff rates for the existing aggregated wholesale services. A second tariff proceeding is under way to set revised final rates for these services while work moves forward on implementing the disaggregated services. Rulings in both tariff proceedings are expected in the first half of 2019. As a result of these rulings, Quebecor Media may experience increased competition for retail cable Internet and telephony customers. In addition, because its third-party Internet access rates are regulated by the CRTC, the Corporation could be limited in its ability to recover its costs associated with providing this access.

Environmental laws and regulations and climate change

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air and water and sewer discharge, the handling and disposal of hazardous materials and waste, including electronic waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have implemented Extended Producer Responsibility regulations in order to encourage sustainability practices, such as the "Ecological recovery and reclamation of electronic products," which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future. Evolving public expectations with respect to the environment and increasingly stringent laws and regulations could result in increased costs of compliance, and failure to recognize and adequately respond to them could result in fines, regulatory scrutiny, or have a significant effect on Quebecor Media's reputation and brands.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditures will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain studios and vacant lots, some of which are located on a former landfill, with the presence of gas-emitting waste. As a result, the operation and ownership of these studios and vacant lots carries an inherent risk of environmental and health and safety liabilities for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs, and other environmental damages (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in being involved from time to time in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Finally, climate change has the potential, through an increase in extreme weather events, to disrupt Quebecor Media's operations by damaging infrastructure and increasing stress on its telecommunications network.

Concerns about alleged health risks relating to radiofrequency emissions

All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied meets all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2018, it had $6.45 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- Increase its vulnerability to general adverse economic and industry conditions;
- Require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- Limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- Place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- Limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2018, it had approximately $1.25 billion available for additional borrowings under its existing credit facilities on a consolidated basis and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- Borrow money or sell preferred stock;
- Create liens;
- Pay dividends on or redeem or repurchase stock;
- Make certain types of investments;
- Restrict dividends or other payments;
- Enter into transactions with affiliates;
- Issue guarantees of debt; and
- Sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities. Its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including its Senior Notes. If Quebecor's indebtedness is accelerated, it may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flows of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding, and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flows from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flows and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flows to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, prospects, results of operations and financial condition.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favourable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- The multiple voting feature of Quebecor's Class A Shares; and
- The election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. As of December 31, 2018 approximately 73.45% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of Class A directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing, or deterring a change in control of Quebecor; could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency: (ii) to achieve a targeted balance of fixed- and floating-rate debts, and

(iii) to lock in the value of certain derivative financial instruments through offsetting transactions. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
As of December 31, 2018
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.3056	$ 165.6	US$ 126.8

Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Term loan “B”	2013 to 2020	US$ 331.6	Bankers' acceptance 3 months + 2.77%	1.0346
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407
US$ drawing on revolver facility	2018 to 2019	US$ 160.0	Bankers' acceptance 1 month + 0.42%	1.3417

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses on valuation and translation of financial instruments for 2018 and 2017 are summarized in Table 15.

Table 15
Loss on valuation and translation of financial instruments
(in millions of Canadian dollars)

	2018	2017
Loss on embedded derivatives related to convertible debentures	**$ 60.4**	$ 197.4
Other	**0.9**	2.4
	$ 61.3	$ 199.8

A loss on cash flow hedges of $10.1 million was recorded under “Other comprehensive income” in 2018 (gain of $43.7 million in 2017).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation’s valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or the Corporation.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument’s adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2018 and December 31, 2017 were as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

	December 31, 2018		December 31, 2017	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,461.7)**	**$ (6,444.9)**	$ (5,572.1)	$ (5,883.3)
Convertible debentures[2]	**(150.6)**	**(150.6)**	(888.5)	(888.5)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**6.7**	**6.7**	(4.5)	(4.5)
Cross-currency interest rate swaps	**880.3**	**880.3**	562.2	562.2

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $840.6 million as of December 31, 2018 ($525.7 million as of December 31, 2017) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $46.4 million as of December 31, 2018 ($32.0 million as of December 31, 2017).

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2018, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2018, the provision for expected credit losses represented 2.7% of the gross amount of accounts receivable and contract assets (2.9% as of December 31, 2017), while 11.7% of trade receivable were 90 days past their billing date (11.3% as of December 31, 2017).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2018 and 2017:

		2018		2017
Balance at beginning of year	**$**	**21.1**	$	28.1
Changes in expected credit losses charged to income		**19.6**		21.6
Write off		**(20.2)**		(28.6)
Balance at end of year	**$**	**20.5**	$	21.1

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.1 years as of December 31, 2018 (5.9 years as of December 31, 2017) (see also "Contractual obligations" above).

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, handsets and cable modems and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S--dollar-denominated debt obligations outstanding as of December 31, 2018, and to hedge its exposure on certain purchases of set-top boxes, handsets, cable modems and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on Other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2018 is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of $0.10	$	**1.3**	$	**34.8**
Decrease of $0.10		**(1.3)**		**(34.8)**

A variance of $0.10 in the 2018 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $2.4 million on the value of unhedged purchase of goods and services and $4.4 million on the value of unhedged acquisitions of tangible and intangible assets in 2018.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate; (ii) LIBOR; (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2018, after taking into account the hedging instruments, long-term debt was comprised of 76.3% fixed-rate debt (84.7% in 2017) and 23.7% floating-rate debt (15.3% in 2017).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2018 was $13.2 million.

The estimated sensitivity on income and on Other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures, as of December 31, 2018, as per the Corporation's valuation models, is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of 100 basis points	$	**(1.9)**	$	**(28.1)**
Decrease of 100 basis points		**1.9**		**28.1**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2018 and 2017 is as follows:

Table 17
Capital structure of Quebecor
(in millions of Canadian dollars)

	2018	2017
Bank indebtedness	**$ 24.3**	$ 0.8
Long-term debt	**6,428.2**	5,536.6
Embedded derivatives related to convertible debentures	**5.2**	442.2
Convertible debentures	**150.0**	450.0
Derivative financial instruments	**(887.0)**	(557.7)
Cash and cash equivalents	**(21.0)**	(864.9)
Net liabilities	**5,699.7**	5,007.0
Equity	**$ 577.9**	$ 1,409.0

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercompany transactions, and the declaration and payment of dividends or other distributions.

Contingencies

There are a number of legal proceedings against the Corporation and its subsidiaries that are pending. In the opinion of the management of the Corporation, the outcome of those proceedings is not expected to have a material adverse effect on Corporation's results or on its financial position.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- The parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- The entity can identify each party's rights regarding the goods or services to be transferred;
- The entity can identify the payment terms for the goods or services to be transferred;
- The contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- It is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as "Deferred revenues" in the consolidated balance sheets. Deferred revenues are usually recognized as revenues in the subsequent year.

<u>Telecommunications</u>

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- Operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and OTT video services are recognized when services are provided;

- Revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- Operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- Cable connection and mobile activation revenues are deferred and recognized as revenues over the period of time the customer is expected to remain a customer of the Corporation or over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- Advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- Revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- Revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Soundstage and equipment leasing revenues are recognized over the rental period; and
- Revenues derived from speciality film and television services are recognized when services are provided.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- Revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- Revenues from renting the arena and from ticket (including season tickets), food concession sales are recognized when the events take place and/or goods are sold, as the case may be;
- Revenues from the rental of suites are recognized ratably over the period of the agreement;
- Revenues from the sale of advertising in the form of venue signage or sponsorships, are recognized ratably over the period of the agreement; and
- Revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

When determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU. Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2018 was $2.68 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2018 was $485,3 million.

Useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments:

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. The Corporation also uses offsetting foreign exchange forward contracts in combination with cross-currency interest rate swaps to hedge foreign currency rate exposure on principal payments on foreign-currency-denominated debt. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge: (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt; and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.

- The Corporation has established a hedge ratio of one for one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

The Corporation measures and records the effectiveness of its hedging relationships as follows:

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation's hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies:

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in "Other comprehensive income" until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated Other comprehensive income are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Pension and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist mainly of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "Other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future and the minimum funding liability is based on a number of assumptions, including future service costs and future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of those assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

Provisions

Provisions are recognized when: (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation; and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time and it is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Contract costs

Incremental costs and direct costs, such as contract acquisition costs consisting primarily in sales commissions and the cost of connecting subscribers to the Corporation's telecommunications network, are deferred as contract costs and amortized over the expected duration of the customer's service or the term of the contract. Amortized contract costs are included in purchases of goods and services on the consolidated statements of income.

Provision for expected credit losses

The Corporation maintains a provision to cover anticipated credit losses from customers who are unable to pay their debts. The provision is reviewed periodically, considering the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions.

Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Contingent considerations

Contingent considerations arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations are based will be met in the future. The assessment of these contingent potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations recognized and any subsequent changes in fair value recorded in the consolidated statements of income.

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Changes in accounting policies

(i) IFRS 9 – *Financial Instruments*

On January 1, 2018, the Corporation adopted the new rules under IFRS 9, *Financial Instruments*, which simplify the measurement and classification of financial assets by reducing the number of measurement categories in IAS 39, *Financial Instruments: Recognition and Measurement*. The new standard also provides for a fair value option in the designation of a non-derivative financial liability and its related classification and measurement, as well as for a new hedge accounting model more closely aligned with risk-management activities undertaken by entities.

Under the new rules, most of financial assets and liabilities of the Corporation are now classified as subsequently measured at amortized cost, except for derivative financial instruments, which are measured at fair value. The Corporation is also using the IFRS 9 expected credit losses method to estimate the provision for expected credit losses on its financial assets.

The adoption of IFRS 9 had no impact on the consolidated financial statements.

(ii) IFRS 15 – *Revenue from Contracts with Customers*

On January 1, 2018, the Corporation adopted, on a fully retrospective basis, the new rules under IFRS 15, *Revenue from Contracts with Customers*, which specify how and when an entity should recognize revenue, and which also require the entity to provide users of financial statements with more informative disclosures. The standard provides a single, principles-based, five-step model to apply to each contract with a customer.

The adoption of IFRS 15 had significant impacts on the consolidated financial statements, mainly in the Telecommunications segment, with regard to the timing of the recognition of its revenues, the classification of its revenues, as well as the capitalization of costs, such as the costs to obtain a contract and connection costs.

Under IFRS 15, the total consideration from a contract with multiple deliverables is now allocated to all performance obligations in the contract, based on the stand-alone selling price of each obligation, without being limited to a non-contingent amount. The Telecommunications segment provides mobile devices and services under contracts with multiple deliverables and for a fixed period of time. Under IFRS 15, promotional offers related to the sale of mobile devices, previously accounted for as a reduction in related equipment sales on activation, are now considered in the total consideration to be allocated to all performance obligations. Among other impacts, the adoption of IFRS 15 results in an increase in the revenue from the device sale and in a decrease in the mobile service revenue recognized over the contract term. The timing of the recognition of these revenues therefore changes under IFRS 15. However, the total revenue recognized over a contract term relating to all performance obligations within the contract remains the same as under the previous rules. The portion of revenues that is earned without having been invoiced is now presented as contract assets in the consolidated balance sheets, which asset is realized during the term of the contract. The long-term portion of contract assets is included in "Other assets" in the consolidated balance sheets. All other types of revenue have not been impacted by the adoption of IFRS 15.

In addition, under IFRS 15, certain costs to obtain a contract, mainly sales commissions, are capitalized and amortized as operating expenses over the period of time the customer is expected to maintain its service or over the contract term. Previously, such costs were expensed as incurred. Also, the capitalization of connection costs is no longer limited to the related connection revenues as under the previous rules. These capitalized costs are included in “Other assets” as contract costs in the consolidated balance sheets.

The adoption of IFRS 15 had no impact on cash flows from operating, investing and financing activities.

The retroactive adoption of IFRS 15 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)	2017	2016
Revenues	$ 22.4	$ 52.5
Purchase of goods and services	(12.4)	(13.2)
Deferred income tax expense	9.2	17.4
Net income and comprehensive income	$ 25.6	$ 48.3
Net income and comprehensive income attributable to:		
Shareholders	$ 20.8	$ 39.2
Non-controlling interests	4.8	9.1
Earnings per share attributable to shareholders	$ 0.09	$ 0.16

Consolidated balance sheets

Increase (decrease)	December 31, 2017	December 31, 2016
Other assets:		
Contract assets[1]	$ 183.6	$ 155.8
Contract costs[2]	92.5	85.4
Deferred income tax liability	73.2	63.9
Retained earnings	165.4	143.7
Non-controlling interests	37.5	33.6

1 The current portion of contract assets is $132.8 million as of December 31, 2017 and $106.6 million as of December 31, 2016.

2 The current portion of contract costs is $55.9 million as of December 31, 2017 and $49.4 million as of December 31, 2016 and is presented under "Other current assets".

Recent accounting pronouncements

(i) IFRS 16 – *Leases* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019.

On January 1, 2019, the Corporation adopted, on a fully retrospective basis, the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees will be required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease will be initially measured on a present value basis.

The adoption of IFRS 16 has significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges will be expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges are currently recognized as operating expenses as they are incurred, the adoption of IFRS 16 will change the timing of the recognition of these lease charges over the term of each lease. It will also affect the classification of expenses in the consolidated statements of income.

Under IFRS 16, principal payments of the lease liability will be presented as financing activities in the consolidated statements of cash flows, whereas under the current standard, these payments are presented as operating activities.

The retroactive adoption of IFRS 16 will have the following impacts on the 2018 and 2017 consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		**2018**		2017
Purchase of goods and services	**$**	**(47.7)**	$	(45.5)
Depreciation and amortization		**36.4**		35.3
Financial expenses		**8.5**		9.9
Restructuring of operations		**(0.7)**		0.3
Deferred income tax expense		**0.9**		–
Net income and comprehensive income	**$**	**2.6**	$	–
Net income and comprehensive income attributable to:				
Shareholders	**$**	**2.1**	$	0.2
Non-controlling interests		**0.4**		(0.2)
Earnings per share attributable to shareholders	**$**	**0.01**	$	–

Consolidated balance sheets

Increase (decrease)		**December 31, 2018**		December 31, 2017
Right-of-use assets	**$**	**123.7**	$	144.6
Provisions		**(1.4)**		(1.4)
Lease liabilities[1]		**144.4**		167.9
Other liabilities		**(4.3)**		(3.4)
Deferred income tax liability		**(3.9)**		(4.9)
Deficit		**10.9**		9.1
Non-controlling interests		**(0.2)**		(4.5)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.4 million as of December 31, 2017.

(ii) IFRIC 23 - *Uncertainty over Income Tax Treatments* is required to be applied retrospectively for annual periods beginning on or after January 1, 2019.

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments. The adoption of IFRIC 23 will not have a material impact on the consolidated financial statements.

Controls and procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2018, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the timeframes prescribed by this legislation. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the Corporation's IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by the Corporation's management during the financial period beginning October 1, 2018 and ending December 31, 2018.

Additional information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;
- General economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;
- The intensity of competitive activity in the industries in which Quebecor operates;
- Fragmentation of the media landscape;
- New technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- Unanticipated higher capital spending required for developing Quebecor Media's network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- Disruptions to the network through which Quebecor Media provides its digital cable television, Internet access, mobile and cable telephony, and Club illico services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- Labour disputes or strikes;
- Changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- Changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- Interest rate fluctuations that could affect Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the Corporation's public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the "Risks and Uncertainties" section above.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of March 12, 2019, and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 57 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

MANAGEMENT DISCUSSION AND ANALYSIS

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company with an interest in Quebecor Media Inc., one of Canada's largest telecommunications and media groups. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, in this Management Discussion and Analysis, "Quebecor" and the "Corporation" refer to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital") for a total aggregate purchase price of $1.54 billion, paid in cash. On June 22, 2018, Quebecor purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital in consideration of the issuance of a convertible debenture in the principal amount of $150.0 million, convertible into Class B Subordinate Voting Shares ("Class B Shares") of Quebecor. Upon completion of these transactions, the Corporation's interest in Quebecor Media increased from 81.53% to 100.0%.

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis. The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation's segments are engaged in various long-term leases relating to premises and equipment. Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under the previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income. Principal payments of the lease liability are now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities. The impact of adoption of IFRS 16 on a fully retrospective basis is described under "Changes in Accounting Policies."

Table 3 provides a reconciliation of adjusted EBITDA to net income without restatement of comparative figures following adoption of IFRS 16, as permitted under International Financial Reporting Standards ("IFRS"). Form F1 in Canadian securities regulatory authorities' *Regulation 51-102 respecting Continuous Disclosure Obligations* stipulates that if a choice made in applying a change in accounting policies has a material effect, as is the case with IFRS 16, the Corporation may explain its choice and discuss the effect on its financial performance.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: mobile and cable telephony; Internet access; cable television; over-the-top ("OTT") video service; business telecommunications solutions; broadcasting; soundstage and equipment rental; audiovisual content production and distribution; newspaper publishing and distribution; specialized websites; book and magazine publishing and distribution; rental and distribution of video games and game consoles; music production and distribution; out-of-home advertising; operation and management of a world-class entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production, and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a leading mobile and cable communication service provider. Quebecor Media also holds leading positions through its Media segment and its Sports and Entertainment segment in the creation, promotion and distribution of entertainment and news, and in related Internet services, that are designed to appeal to audiences in every demographic category. Quebecor Media continues to pursue a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with IFRS.

DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. ("4Degrees Colocation") data centre operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron in the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments. The results of operations and cash flows of these businesses were reclassified as discontinued operations in the consolidated statements of income and cash flows.

In this Management Discussion and Analysis, only continuing operating activities of Quebecor Media are included in the analysis of the Corporation's activities and in the analysis of its segment operating results.

HIGHLIGHTS SINCE END OF 2018

- Quebecor's revenues totalled $4.29 billion in 2019, a $112.8 million (2.7%) increase from 2018.

Telecommunications

- The Telecommunications segment grew its revenues by $98.4 million (2.9%) and its adjusted EBITDA by $87.8 million (5.1%) in 2019.
- Videotron significantly increased its revenues from mobile telephony ($66.3 million or 12.4%), customer equipment sales ($36.3 million or 15.5%) and Internet access ($35.0 million or 3.2%) in 2019.
- Videotron's total average billing per unit ("ABPU") was $50.00 in 2019, compared with $49.51 in 2018, a $0.49 (1.0%) increase. Mobile ABPU was $52.56 in 2019 compared with $53.62 in 2018, a $1.06 (-2.0%) decrease due in part to the popularity of bring your own device ("BYOD") plans.
- Videotron posted a net increase of 85,900 revenue-generating units ("RGU") (1.4%) in 2019, including 176,700 subscriber connections (15.3%) to the mobile telephony service, the largest annual increase in the number of connections since the launch of the mobile network in 2010; 38,500 subscribers (9.1%) to the Club illico OTT video service ("Club illico"), and 22,800 subscribers (1.3%) to cable Internet access.
- On December 23, 2019, Videotron announced the closing of the acquisition of Télédistribution Amos inc. and its network in Abitibi-Témiscamingue. The acquisition is subject to approval from Innovation, Science and Economic Development Canada ("ISED Canada") and to customary conditions.
- On December 13, 2019, Videotron announced that Samsung Electronics Co. Ltd. has been chosen as its partner for the roll-out of LTE-A and 5G radio access technology in Québec and in the Ottawa area. In this phase, Videotron will accelerate construction of its new generation network with a target of gradual commissioning beginning in 2020.
- On August 27, 2019, Videotron launched Helix, the new technology platform that is revolutionizing entertainment and home management with voice remote, ultra-intelligent Wi-Fi, and, coming soon, support for home automation, all tailored to customer needs and preferences.
- On April 10, 2019, Videotron purchased 10 blocks of low-frequency spectrum in the 600 MHz band in ISED Canada's latest commercial mobile spectrum auction. The licences, covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario, were acquired for $255.8 million.
- Videotron earned numerous honours in 2019. It ranked first on the Top-Rated Workplace: Best in Québec list based on reviews posted on Indeed, Canada's leading jobs site. Videotron ranked as the most respected telecommunications company in Québec for the 14th consecutive year in the 2019 Léger reputation survey, and it was the most influential telecommunications brand in Québec for the 6th consecutive year on the 2019 Ipsos-*Infopresse* index. Lastly, Videotron made its appearance on Mediacorp Canada Inc.'s list of Canada's 70 greenest employers in 2019.

Media

- The Media segment grew its revenues by $9.4 million (1.3%) and its adjusted EBITDA by $14.8 million (24.7%) in 2019.
- According to the fall 2019 Vividata survey, *Le Journal de Montréal, Le Journal de Québec* and the free daily *24 heures* remain Québec's news leaders with more than 4.0 million readers per week across all platforms (print, mobile and Internet). TVA Group Inc. ("TVA Group") remains a leading player in the Canadian magazine industry with nearly 9.0 million readers across all platforms.
- On April 1, 2019, TVA Group closed the acquisition of the companies in the Incendo Media inc. ("Incendo Media") group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An amount of $0.6 million relating to certain post-closing adjustments was also received in the third quarter of 2019.
- On February 13, 2019, TVA Group closed the acquisition of the companies in the Serdy Média inc. ("Serdy Média") group, which owns and operates the Évasion and Zeste specialty channels, along with the companies in the Serdy Video Inc. ("Serdy Video") group, for a total consideration of $23.5 million, net of acquired cash of $0.5 million. Post-closing adjustments of $1.6 million were also paid in the third quarter of 2019. The transaction was announced on May 1, 2018 and received Canadian Radio-television and Telecommunications Commission ("CRTC") approval on January 14, 2019.

Sports and Entertainment

- In September 2019, the Videotron Centre completed its fourth year of operations. During that year, the Videotron Centre hosted 97 sporting events and concerts, a 6.6% increase from the previous year. In December 2019, the trade magazine *Pollstar* ranked the Videotron Centre 92nd in the world and 6th in Canada among arenas by 2019 ticket sales.

Financial transactions

- On March 11, 2020, the Board of Directors of Quebecor declared a quarterly dividend of $0.20 per share on the Corporation's Class A Multiple Voting Shares ("Class A Shares") and Class B Shares, an increase of 78% of the quarterly dividend and in line with the objective of gradually achieving a dividend target of 30% to 50% of the Corporation's annual free cash flows.
- On February 21, 2020, TVA Group amended its secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions of the facility. On February 13, 2019, TVA Group amended this secured revolving credit facility to extend its term to February 2020 and to amend certain terms and conditions of the facility.
- On October 8, 2019, Videotron issued $800.0 million aggregate principal amount of 4.50% Senior Notes maturing on January 15, 2030, for net proceeds of $790.7 million, net of financing fees of $9.3 million. Videotron used the proceeds mainly to pay down a portion of the amount due under its secured revolving credit facility.
- On July 15 2019, Quebecor Media prepaid the balance of its term loan "B" and settled the related hedging contracts for a total cash consideration of $340.9 million.
- On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility, extending its term to July 2022 and to amend certain terms and conditions of the facility.

TREND INFORMATION

Competition continues to intensify in the mobile and cable telephony, Internet access, cable television and OTT video markets. Due to ongoing technological developments, the distinction between those platforms is fading rapidly and we expect increasing competition from non-traditional businesses across the key business segments of the Corporation. Competition also comes from wholesale Internet resellers. These resellers purchase large companies' high-speed access services to offer their own services to customers. Thus, the subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its mobile and cable networks, the launch and expansion of new or additional services to support growth in its customer base and demand for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure, maintenance and enhancement, as well as costs relating to advancements in LTE-Advanced and 5G mobile technologies, network virtualisation and automation, Internet access capacity and speed, ultra-high-definition television, Internet of Things, Internet Protocol Television ("IPTV") and OTT delivery technology, as well as the introduction of virtual reality and home automation. In addition, the demand for wireless data services has been growing constantly and is projected to continue to grow in the future. The anticipated levels of data traffic will represent an increasing challenge to the current mobile network's capabilities to support this traffic and we may have to acquire additional spectrum in the future.

Some of Quebecor Media's lines of business are cyclical in nature. They are dependent on advertising and, particularly in the newspaper and magazine businesses, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

The Media industry has experienced fundamental and permanent structural changes. Generalized audience fragmentation has prompted many advertisers to review their media placement strategies and turn an important part of their advertising budgets over to international competitors operating solely in digital media. In the broadcasting industry, audiences are increasingly fragmented as viewing habits have shifted toward Internet based content delivery platforms that allow users greater control over content and timing, such as the OTT video services. The Corporation's Media segment has taken steps in order to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want.

Moreover, newspaper and magazine circulation, measured in terms of copies sold, has been declining in that industry over the past several years. The traditional run of press advertising for major multimarket retailers has been declining due to a shift in marketing strategy toward other media and to retail industry consolidation. To respond to such competition, the Media segment's operations have developed their Internet presence through branded websites, including specialized websites.

The Sports and Entertainment segment has made significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required to expand the Sports and Entertainment segment despite not operating in a major market.

In the books and music businesses, digital technology has disrupted buying and consuming habits, particularly with the emergence of vehicles such as music streaming and e-books, which compete with conventional formats.

INTEREST IN SUBSIDIARIES

As of December 31, 2019, Quebecor held a 100% interest in Quebecor Media. The Corporation's interest in Quebecor Media increased from 81.53% to 100.0% as a result of the repurchase by Quebecor Media, on May 11 and June 22, 2018, of 16,064,215 of its Common Shares held by CDP Capital, and the purchase by Quebecor on June 22, 2018 of 1,564,696 shares of Quebecor Media held by CDP Capital.

Table 1 shows Quebecor Media's equity interest in its main subsidiaries at December 31, 2019.

Table 1
Quebecor Media's interest (direct and indirect) in its main subsidiaries
As of December 31, 2019

	Percentage of vote	**Percentage of equity**
Videotron Ltd.	100.0%	100.0%
TVA Group Inc.	99.9	68.4
MediaQMI Inc.	100.0	100.0
QMI Spectacles inc.	100.0	100.0

Quebecor Media's interest in its subsidiaries has not varied significantly over the past two years.

NON-IFRS FINANCIAL MEASURES

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted EBITDA, adjusted income from continuing operating activities, cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary, are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted EBITDA

In its analysis of operating results, the Corporation defines adjusted EBITDA, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, income taxes and income from discontinued operations. Adjusted EBITDA as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted EBITDA in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted EBITDA is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from segment operations and free cash flows from continuing operating activities of the Quebecor Media subsidiary. The Corporation's definition of adjusted EBITDA may not be the same as similarly titled measures reported by other companies.

Table 2 provides a reconciliation of adjusted EBITDA to net income as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2019 and 2018 presented in Table 2 is drawn from the unaudited consolidated statements of income.

Net income	**$ 658.3**	$ 439.2	**$ 150.3**	$ 119.8

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income attributable to shareholders under IFRS, as net income attributable to shareholders before loss on valuation and translation of financial instruments, restructuring of operations, litigation and other items, net of income tax related to adjustments and net income attributable to non-controlling interest related to adjustments, and before the income from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 4 provides a reconciliation of adjusted income from continuing operating activities to the net income attributable to shareholders' measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2019 and 2018 presented in Table 4 is drawn from the unaudited consolidated statements of income.

1 Includes impact of fluctuations in income tax applicable to adjusted items, either for statutory reasons or in connection with tax transactions.

Cash flows from segment operations

Cash flows from segment operations represents adjusted EBITDA, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. Cash flows from segment operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital by Quebecor Media, repayment of long-term debt and purchase of non-controlling interest. Cash flows from segment operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from segment operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by its segments' operations. The Corporation's definition of cash flows from segment operations may not be identical to similarly titled measures reported by other companies. Tables 8 and 9 provide a reconciliation of cash flows from segment operations to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of the Quebecor Media subsidiary represents cash flows provided by its continuing operating activities calculated in accordance with IFRS, less additions to property, plant and equipment and to intangible assets (excluding disbursements for licence acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of the Quebecor Media subsidiary. Free cash flows from continuing operating activities represents Quebecor Media's available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, reduction of paid-up capital, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to other financial operating performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 9 provides a reconciliation of free cash flows from continuing operating activities of Quebecor Media to cash flows provided by continuing operating activities reported in Quebecor's consolidated financial statements.

KEY PERFORMANCE INDICATORS

Revenue-generating unit

The Corporation uses RGU, an industry metric, as a key performance indicator. An RGU represents, as the case may be, subscriptions to the cable Internet, cable television and Club illico services, and subscriber connections to the mobile telephony and cable telephony services. RGU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of RGU may not be the same as identically titled measurements reported by other companies or published by public authorities.

Average billing per unit

The Corporation uses ABPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly average subscription billing per RGU. ABPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ABPU may not be the same as identically titled measurements reported by other companies.

Mobile ABPU is calculated by dividing the average subscription billing for mobile telephony services by the average number of mobile RGUs during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Total ABPU is calculated by dividing the combined average subscription billing for cable Internet, cable television, Club illico, mobile telephony and cable telephony services by the total average number of RGUs from cable Internet, cable television, mobile telephony and cable telephony services during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

2019/2018 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.29 billion, a $112.8 million (2.7%) increase.

- Revenues increased in Telecommunications ($98.4 million or 2.9% of segment revenues), Sports and Entertainment ($10.1 million or 5.5%) and Media ($9.4 million or 1.3%).

Adjusted EBITDA: $1.88 billion, a $103.2 million (5.8%) increase. Without restatement of comparative figures following adoption of IFRS 16, adjusted EBITDA increased by $147.4 million (8.5%).

- Adjusted EBITDA increased in Telecommunications ($87.8 million or 5.1% of segment adjusted EBITDA). Without restatement of comparative figures following adoption of IFRS 16, adjusted EBITDA increased by $126.4 million (7.5%).
- Adjusted EBITDA increased in Media ($14.8 million or 24.7%).
- There was a favourable variance at Head Office ($3.8 million), mainly due to lower stock-based compensation costs.
- Adjusted EBITDA decreased in Sports and Entertainment ($3.2 million or -30.5%).
- The change in the fair value of Quebecor Media stock options resulted in a $7.4 million favourable variance in the stock-based compensation charge in 2019 compared with 2018. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $1.6 million unfavourable variance in the Corporation's stock-based compensation charge in 2019.

Net income attributable to shareholders: $652.8 million ($2.55 per basic share) in 2019, compared with $403.7 million ($1.69 per basic share) in 2018, an increase of $249.1 million ($0.86 per basic share).

- The main favourable variances were:
  - $103.2 million increase in adjusted EBITDA;
  - $93.7 million favourable variance in income from discontinued operations;
  - $54.8 million favourable variance in losses on valuation and translation of financial instruments, including $54.7 million without any tax consequences;
  - $32.6 million favourable variance in non-controlling interest.
- The unfavourable variance was mainly due to:
  - $42.9 million increase in the income tax expense.

Net income attributable to shareholders without restatement of comparative figures following adoption of IFRS 16 was $652.8 million in 2019, compared with $401.3 million in 2018, a $251.5 million increase.

Adjusted income from continuing operating activities: $581.0 million ($2.27 per basic share) in 2019, compared with $469.8 million ($1.96 per basic share) in 2018, an increase of $111.2 million ($0.31 per basic share) or 23.7%.

Depreciation and amortization charge: $750.4 million in 2019, a $2.7 million decrease.

Financial expenses: $327.5 million in 2019, a $4.5 million decrease. Reductions in financial expenses were caused mainly by lower interest on convertible debentures and a lower average interest rate on the debt. Additions to financial expenses were caused mainly by higher average indebtedness as a result of debt financing of a portion of the repurchase of the Quebecor Media shares held by CDP Capital in the second quarter of 2018, and lower interest revenues generated by liquidity.

Loss on valuation and translation of financial instruments: $6.5 million in 2019 compared with $61.3 million in 2018. The $54.8 million favourable variance was due to a $54.7 million favourable variance, without any tax consequences, in losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $28.6 million in 2019, compared with $29.1 million in 2018.

- A $9.8 million net restructuring charge was recognized in 2019 in connection with cost-reduction initiatives in the Corporation's various segments ($14.2 million in 2018). An $18.8 million charge for impairment of assets was also recognized in 2019 in connection with restructuring initiatives ($14.9 million in 2018).

Income tax expense: $205.7 million in 2019 (effective tax rate of 26.6%), compared with $162.8 million in 2018 (effective tax rate of 24.6%), a $42.9 million unfavourable variance. The increase in the effective tax rates reflects recognition of benefits arising from prior year tax losses in 2018. This increase in the tax rate, combined with the impact of the increase in taxable income for tax purposes, explains the increase in the income tax expense in 2019 compared with 2018. The effective tax rate is calculated considering only taxable and deductible items.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,950,100 homes and businesses. Videotron offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones; Internet access service; digital cable television services, including video-on-demand, pay-per-view and pay TV; cable telephony services; and Club illico. Videotron also includes Videotron Business, a full-service business telecommunications provider that offers mobile and cable telephony, high-speed data transmission, Internet access and cable television services. In August 2019, Videotron launched Helix, the new technology platform that is revolutionizing entertainment and home management with voice remote, ultra-intelligent Wi-Fi, and, coming soon, support for home automation, all tailored to customer needs and preferences.

The segment is also engaged in retail sales and rentals of DVDs, Blu-ray discs and console games through the Le SuperClub Vidéotron ltée subsidiary and its franchise network.

2019 operating results

Revenues: $3.48 billion in 2019, a $98.4 million (2.9%) increase.

- Revenues from the mobile telephony service increased $66.3 million (12.4%) to $600.7 million, essentially due to an increase in the number of subscriber connections, partially offset by a decrease in average per-subscriber revenues.
- Revenues from Internet access services increased $35.0 million (3.2%) to $1.11 billion, due mainly to higher per-subscriber revenues, reflecting among other things the impact of a favourable product mix and increases in some rates, and to an increase in the customer base, partially offset by a decrease in overage charges.
- Total revenues from cable television services decreased $22.3 million (-2.2%) to $974.4 million, due primarily to the impact of the net decrease in the customer base, partially offset by higher per-customer revenues resulting from, among other things, the impact of increases in some rates.
- Revenues from the cable telephony service decreased $27.5 million (-7.5%) to $341.1 million, mainly because of the impact of the net decrease in subscriber connections.
- Revenues from customer equipment sales increased $36.3 million (15.5%) to $269.8 million, mainly because of the impact of equipment sales related to the new Helix platform launched on August 27, 2019.
- Other revenues increased $10.6 million (6.3%) to $180.1 million, mainly reflecting revenue increases at Club illico and at Videotron Business.

ABPU: Videotron's total ABPU was $50.00 in 2019 compared with $49.51 in 2018, a $0.49 (1.0%) increase. Mobile ABPU was $52.56 in 2019 compared with $53.62 in 2018, a $1.06 (-2.0%) decrease due in part to the popularity of BYOD plans.

Customer statistics

RGUs – The total number of RGUs was 6,076,200 at December 31, 2019, an increase of 85,900 (1.4%) in 2019 compared with an increase of 109,200 in 2018 (Table 5).

Mobile telephony – The number of subscriber connections to the mobile telephony service stood at 1,330,500 at December 31, 2019, an increase of 176,700 (15.3%) in 2019 compared with an increase of 129,800 in 2018 (Table 5). The 2019 annual increase in the number of connections was the largest since the launch of the mobile network in 2010.

Cable Internet access – The number of subscribers to cable Internet access services stood at 1,727,300 at December 31, 2019, an increase of 22,800 (1.3%) in 2019 compared with an increase of 38,000 in 2018 (Table 5). As of December 31, 2019, Videotron's cable Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,950,100 homes and businesses passed by Videotron's network as of December 31, 2019, up from 2,907,900 one year earlier) of 58.6%, the same as a year earlier.

Cable television – The number of subscribers to cable television services stood at 1,531,800 at December 31, 2019, a decrease of 65,500 (-4.1%) in 2019 compared with a decrease of 43,200 in 2018 (Table 5). At December 31, 2019, the cable television service had a household and business penetration rate of 51.9% versus 54.9% a year earlier.

Cable telephony – The number of subscriber connections to the cable telephony service stood at 1,027,300 at December 31, 2019, a decrease of 86,600 (-7.8%) in 2019 compared with a decrease of 74,600 in 2018 (Table 5). At December 31, 2019, the cable telephony service had a household and business penetration rate of 34.8% versus 38.3% a year earlier.

Club illico – The number of subscribers to Club illico stood at 459,300 at December 31, 2019, an increase of 38,500 (9.1%) in 2019 compared with an increase of 59,200 in 2018 (Table 5).

Table 5
Telecommunications segment year-end RGUs (2015-2019)
(in thousands of customers)

	2019	2018	2017	2016	2015
Mobile telephony	**1,330.5**	1,153.8	1,024.0	893.9	768.6
Cable Internet	**1,727.3**	1,704.5	1,666.5	1,612.8	1,568.2
Cable television	**1,531.8**	1,597.3	1,640.5	1,690.9	1,736.9
Cable telephony	**1,027.3**	1,113.9	1,188.5	1,253.1	1,316.3
Club illico	**459.3**	420.8	361.6	314.7	257.5
Total	**6,076.2**	5,990.3	5,881.1	5,765.4	5,647.5

Adjusted EBITDA: $1.80 billion, an $87.8 million (5.1%) increase due primarily to:

- impact of the net revenue increase;
- net decrease in operating expenses, reflecting in part the impact of a one-time gain, the favourable impact of a reversal of a provision in connection with a lawsuit, as well as lower engineering expenses, partially offset by the unfavourable impact of start-up expenses for Fizz.

Partially offset by:

- retroactive favourable adjustment recorded in 2018 related to roaming fees following a CRTC decision (creating an unfavourable variance in 2019 when compared with 2018);
- higher cost of mobile telephony and cable television equipment sales, reflecting in part the impact of the cost of equipment related to the new Helix platform.

Adjusted EBITDA without restatement of comparative figures following adoption of IFRS 16 increased by $126.4 million (7.5%).

Cost/revenue ratio: Employee costs and purchase of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 48.2% in 2019, compared with 49.3% in 2018, mainly because of the decrease in operating expenses, reflecting in part the impact of a one-time gain, the favourable impact of a reversal of a provision in connection with a lawsuit, and the fixed component of costs, which does not fluctuate in proportion to revenue growth.

Cash flows from operations

Cash flows from segment operations: $1.12 billion in 2019 compared with $1.02 billion in 2018 (Table 6). The $100.6 million increase was due primarily to the $87.8 million increase in adjusted EBITDA and a $36.4 million decrease in additions to property, plant and equipment, mainly attributable to lower spending related to the leasing of digital set-top boxes, partially offset by a $22.0 million increase in additions to intangible assets, due primarily to investment in the IPTV project.

Table 6: Telecommunications
Cash flows from operations
(in millions of Canadian dollars)

		2019		2018
Adjusted EBITDA	**$**	**1,803.4**	$	1,715.6
Additions to property, plant and equipment		**(476.8)**		(513.2)
Additions to intangible assets (excluding acquisition of spectrum licences)		**(212.2)**		(190.2)
Proceeds from disposal of assets		**4.1**		5.7
Cash flows from segment operations	**$**	**1.118.5**	$	1,017.9

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network, as well as the specialty channels TVA Sports, LCN, addik^{TV}, Prise 2, Yoopa, CASA, MOI ET CIE, Évasion and Zeste. TVA Group also holds interests in two other TVA Network affiliates and is engaged in commercial production. In addition to linear television, TVA Network and the specialty channels broadcast on-demand streaming content over multiplatform applications, including the *tva.ca* website and the TVA mobile app, which provide free access to TVA Network programs and to some specialty channel content in high definition, live or on demand.

Through its subsidiaries, TVA Group owns Mels Studios and Postproduction G.P. and Mels Dubbing Inc., providers of soundstage, equipment and mobile unit rental, postproduction, dubbing and visual effects services to the film and television industries.

Since the acquisition of the companies in the Incendo Media group on April 1, 2019, TVA Group has been engaged in the production and distribution of television programs, movies and series for international markets.

TVA Group publishes more than 50 French- and English-language magazine titles in various categories, including show business, television, fashion and decorating. It also markets digital products associated with the various magazine brands and provides custom publishing services. TVA Group is the largest magazine publisher in Québec.

The Media segment also operates two paid daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, the free daily *24 heures* and the J5 app, which provides real-time access to news on mobile devices, tablets and Apple Watch. The websites of the paid dailies, *journaldemontreal.com* and *journaldequebec.com*, lead the news sites in their markets with more than 4.1 million visitors per month (source: ComScore, November 2019). According to corporate figures, the aggregate circulation of the Media segment's paid and free newspapers as of December 31, 2019 was approximately 2.3 million copies per week in print and electronic formats.

In addition, the Media segment includes NumériQ inc.("NumériQ"), which brings together digital content and strategy production assets harnessed to create digital platforms and content for the Corporation's various platforms, and it operates a number of other digital brands, including *Le Guide de l'auto, Le sac de chips, Pèse sur Start, Silo 57* and *Tabloïd.* NumériQ also owns QUB radio, an online and mobile audio platform with a live radio stream and a library of podcasts.

The Corporation's apps and websites log a combined total of more than 7.6 million unique visitors per month in Canada (source: ComScore, December 2019).

The Media segment is also engaged in printing newspapers, distributing newspapers and magazines, and out-of-home advertising. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties, as well as Quebecor Media Sales, which offers Media segment customers integrated, diversified and complete advertising services.

2019 operating results

Revenues: $738.0 million in 2019, a $9.4 million (1.3%) increase.

- Subscription revenues increased by $8.9 million (4.4%), mainly from the specialty channels, reflecting in part the impact of the acquisition of the Évasion and Zeste specialty channels on February 13, 2019, partially offset by lower magazine subscription revenues.
- Other revenues increased by $13.1 million (7.5%), mainly because of higher revenues from the production and distribution of audiovisual content following the acquisition of the companies in the Incendo Media group on April 1, 2019, combined with higher revenues from film production and audiovisual services.
- Advertising revenues decreased by $12.6 million (-3.6%), mainly because of lower advertising revenues at the newspapers and magazines, partially offset by higher advertising revenues at the specialty channels, including Évasion and Zeste.

Adjusted EBITDA: $74.8 million in 2019, a $14.8 million (24.7%) favourable variance due primarily to:

- decreases in some operating expenses, reflecting in part the impact of the budget cuts announced in the second quarter of 2019, lower content costs in the broadcasting business, lower editorial, selling, labour and administration costs in the newspaper publishing business, and lower subscription costs in the magazines business;
- the acquired businesses' contribution to adjusted EBITDA.

Partially offset by:

- impact of lower revenues, on a comparable basis;
- increased digital investments.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 89.9% in 2019 compared with 91.8% in 2018. The reduction was mainly due to the decrease in operating expenses and the contribution of business acquisitions.

Cash flows from operations

Cash flows from segment operations: $28.2 million in 2019, compared with $30.2 million in 2018 (Table 7). The $2.0 million decrease was due to the $13.1 million increase in additions to property, plant and equipment and to intangible assets, mainly attributable to spending on digital, and the $3.7 million decrease in proceeds from disposal of assets, partially offset by the $14.8 million increase in adjusted EBITDA.

Table 7: Media
Cash flows from operations
(in millions of Canadian dollars)

		2019		2018
Adjusted EBITDA	**$**	**74.8**	$	60.0
Additions to property, plant and equipment		**(21.8)**		(28.7)
Additions to intangible assets		**(24.8)**		(4.8)
Proceeds from disposal of assets		**–**		3.7
Cash flows from segment operations	**$**	**28.2**	$	30.2

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include production and coproduction of shows presented at the Videotron Centre and other venues. In addition, the Sports and Entertainment segment operates sports and cultural events manager Event Management Gestev Inc., which is the official imprint for shows and events produced in Québec by Quebecor Media.

The Sports and Entertainment segment includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec.

As well, the Sports and Entertainment segment includes educational publisher CEC Publishing Inc.; Sogides Group Inc., which is engaged in general literature publishing through its 18 publishing houses; and Messageries A.D.P. inc., which distributes print books and e-books, and which is the exclusive distributor for more than 260 Québec and European French-language publishers.

The Sports and Entertainment segment is engaged in the distribution of CDs and videos (Distribution Select); the distribution of music to Internet music downloading and streaming services (Select Digital); music recording and video production (Disques Musicor); and concert and event production (Musicor Spectacles).

2019 operating results

Revenues: $192.2 million in 2019, a $10.1 million (5.5%) increase due mainly to higher revenues from book distribution.

Adjusted EBITDA: $7.3 million in 2019, a $3.2 million (-30.5%) decrease due mainly to decreased contribution to margin from book distribution, lower revenues from educational publishing, and increased operating expenses for the Music business, partially offset by lower operating expenses for the concerts business.

Cash flows from operations

Cash flows from segment operations: $2.6 million in 2019, compared with $5.5 million in 2018 (Table 8). The $2.9 million unfavourable variance was mainly due to the $3.2 million unfavourable variance in adjusted EBITDA.

2019/2018 FOURTH QUARTER COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $1.14 billion, a $49.1 million (4.5%) increase.

- Revenues increased in Telecommunications ($42.5 million or 4.9% of segment revenues), Media ($10.0 million or 5.1%), and Sports and Entertainment ($1.2 million or 2.2%).

Adjusted EBITDA: $494.5 million, a $34.0 million (7.4%) increase. Without restatement of comparative figures following adoption of IFRS 16, adjusted EBITDA increased by $44.5 million (9.9%).

- Adjusted EBITDA increased $27.3 million (6.3%) in the Telecommunications segment. Without restatement of comparative figures following adoption of IFRS 16, the segment's adjusted EBITDA increased by $36.8 million (8.6%).
- Adjusted EBITDA increased in Media ($6.8 million or 23.9%).
- There was a favourable variance at Head Office ($0.6 million).
- Adjusted EBITDA decreased in Sports and Entertainment ($0.7 million or -21.2%).
- The change in the fair value of Quebecor Media stock options resulted in a $2.1 million favourable variance in the stock-based compensation charge in the fourth quarter of 2019 compared with the same period of 2018. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $1.8 million unfavourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2019.

Net income attributable to shareholders: $145.1 million ($0.57 per basic share) in the fourth quarter of 2019, compared with $117.5 million ($0.46 per basic share) in the same period of 2018, a favourable variance of $27.6 million ($0.11 per basic share).

- The main favourable variances were:
  - $34.0 million increase in adjusted EBITDA;
  - $5.4 million decrease in the charge for restructuring of operations, litigation and other items;
  - $5.0 million decrease in financial expenses;
  - $4.1 million decrease in the depreciation and amortization charge.
- The main unfavourable variances were:
  - $13.7 million increase in the income tax expense;
  - $4.0 million unfavourable variance in losses on valuation and translation of financial instruments, including $1.6 million without any tax consequences.

Net income attributable to shareholders without restatement of comparative figures following adoption of IFRS 16 was $145.1 million in the fourth quarter of 2019, compared with $116.9 million in the same period of 2018, a $28.2 million increase.

Adjusted income from continuing operating activities: $159.6 million ($0.63 per basic share) in the fourth quarter of 2019, compared with $132.9 million ($0.52 per basic share) in the same period of 2018, an increase of $26.7 million ($0.11 per basic share) or 20.1%.

Depreciation and amortization charge: $186.3 million in the fourth quarter of 2019, a $4.1 million decrease due primarily to decreased spending related to the leasing of digital set-top boxes.

Financial expenses: $81.4 million in 2019, a $5.0 million decrease caused mainly by lower average indebtedness and a favourable variance in gains and losses on foreign currency translation of short-term monetary items, partially offset by a higher average interest rate on the debt.

Loss on valuation and translation of financial instruments: $14.6 million in 2019 compared with $10.6 million in the same period of 2018. The $4.0 million unfavourable variance was due to a $1.6 million unfavourable variance, without any tax consequences, in gains and losses on embedded derivatives related to convertible debentures, combined with current variances in the fair value of other derivative financial instruments.

Charge for restructuring of operations, litigation and other items: $1.6 million in the fourth quarter of 2019 compared with $7.0 million in the same period of 2018, a $5.4 million favourable variance.

- A $1.6 million net charge was recognized in the fourth quarter of 2019 in connection with cost-reduction initiatives in the Corporation's various segments ($7.0 million in the fourth quarter of 2018).

Income tax expense: $60.3 million in 2019 (effective tax rate of 27.0%), compared with $46.6 million in 2018 (effective tax rate of 26.3%), a $13.7 million unfavourable variance caused essentially by the impact of the increase in taxable income. The effective tax rate is calculated considering only taxable and deductible items.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $908.6 million, a $42.5 million (4.9%) increase due essentially to the same factors as those noted above under “2019/2018 financial year comparison.”

- Revenues from the mobile telephony service increased $17.7 million (12.7%) to $157.2 million.
- Revenues from Internet access services increased $8.6 million (3.1%) to $282.7 million.
- Total revenues from cable television services decreased $9.5 million (-3.8%) to $239.5 million.
- Revenues from cable telephony service decreased $6.1 million (-6.8%) to $83.7 million.
- Revenues from customer equipment sales increased $28.7 million (40.5%) to $99.6 million.
- Other revenues increased $3.1 million (7.2%) to $45.9 million.

ABPU: Videotron’s total ABPU was $49.99 in the fourth quarter of 2019 compared with $49.84 in the same period of 2018, a $0.15 (0.3%) increase. Mobile ABPU was $51.89 in the fourth quarter of 2019, compared with $53.25 in the same period of 2018, a $1.36 (-2.6%) decrease due in part to the popularity of BYOD plans.

Customer statistics

RGUs – 21,800 (0.4%) unit increase in the fourth quarter of 2019 compared with an increase of 34,400 in the same period of 2018.

Mobile telephony – 41,800 (3,2%) subscriber-connection increase in the fourth quarter of 2019 compared with an increase of 33,100 in the same period of 2018. The 2019 fourth-quarter increase in the number of connections was the largest since 2014.

Cable Internet access – 3,000 (0.2%) subscriber increase in the fourth quarter of 2019 compared with an increase of 7,000 in the same period of 2018.

Cable television – 13,400 (-0.9%) subscriber decrease in the fourth quarter of 2019 compared with a decrease of 6,400 in the same period of 2018.

Cable telephony – 25,400 (-2.4%) subscriber-connection decrease in the fourth quarter of 2019 compared with a decrease of 17,200 in the same period of 2018.

Club illico – 15,800 (3.6%) subscriber increase in the fourth quarter of 2019 compared with an increase of 17,900 in the same period of 2018.

Adjusted EBITDA: $462.7 million, a $27.3 million (6.3%) increase due primarily to:

- impact of the net revenue increase;
- favourable impact of a reversal of a provision in connection with a lawsuit.

Partially offset by:

- net increase in operating expenses, reflecting in part the impact of a favourable retroactive adjustment to taxes on the network recorded in 2018 (creating an unfavourable variance in 2019 compared with 2018), plus the unfavourable impact of start-up expenses for Fizz, partially offset by a decrease in engineering and advertising expenses.

Adjusted EBITDA without restatement of comparative figures following adoption of IFRS 16 increased by $36.8 million (8.6%).

Cost/revenue ratio: Employee costs and purchase of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 49.1% in the fourth quarter of 2019 compared with 49.7% in the same period of 2018.

Media

Revenues: $208.0 million in the fourth quarter of 2019, a $10.0 million (5.1%) increase.

- Subscription revenues increased by $4.1 million (8.1%), mainly because of higher subscription revenues at the specialty channels, including the impact of the acquisition of Évasion and Zeste, and favourable retroactive adjustments to the subscription fees in agreements with some cable providers to reflect the fair value of the specialty channels, partially offset by lower subscription revenues at the magazines.
- Other revenues increased by $9.2 million (18.9%), due essentially to the same factors as those noted above under "2019/2018 comparison."
- Advertising revenues decreased by $3.3 million (-3.3%), mainly because of lower advertising revenues at the magazines and newspapers, partially offset by higher advertising revenues at the specialty channels, including Évasion and Zeste, and at Quebecor Media Out of Home.

Adjusted EBITDA: $35.3 million in the fourth quarter of 2019, a $6.8 million (23.9%) favourable variance due primarily to:

- impact of the net revenue increase;
- decreases in some operating expenses, reflecting in part the impact of the budget cuts announced in the second quarter of 2019, and lower labour, editorial and selling costs in the newspaper publishing business.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 83.0% in the fourth quarter of 2019 compared with 85.6% in the same period of 2018. The reduction was mainly due to the contribution of business acquisitions and the decrease in operating expenses.

Sports and Entertainment

Revenues: $54.7 million in the fourth quarter of 2019, a $1.2 million (2.2%) increase due mainly to higher revenues from book distribution, partially offset by lower revenues in the Music business.

Adjusted EBITDA: $2.6 million in the fourth quarter of 2019, a $0.7 million (-21.2%) decrease due mainly to a decreased contribution to margin from book distribution, partially offset by lower operating expenses in the Music business.

2018/2017 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of Quebecor

Revenues: $4.18 billion, a $55.9 million (1.4%) increase.

- Revenues increased in Telecommunications ($94.2 million or 2.9% of segment revenues) and in Sports and Entertainment ($0.8 million or 0.4%).
- Revenues decreased in Media ($41.3 million or -5.4%).

Adjusted EBITDA: $1.78 billion, a $116.8 million (7.0%) increase.

- Adjusted EBITDA increased in Telecommunications ($122.5 million or 7.7% of segment adjusted EBITDA).
- There was a favourable variance at Head Office ($9.2 million), mainly due to lower compensation costs.
- There was an unfavourable variance in Media ($13.8 million or -18.7%) and in Sports and Entertainment ($1.1 million or -9.5%).
- The change in the fair value of Quebecor Media stock options resulted in a $0.5 million unfavourable variance in the stock-based compensation charge in 2018 compared with 2017. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $2.1 million favourable variance in the Corporation's stock based compensation charge in 2018.

Net income attributable to shareholders: $403.7 million ($1.69 per basic share) in 2018, compared with $390.7 million ($1.61 per basic share) in 2017, an increase of $13.0 million ($0.08 per basic share).

- The main favourable variances were:
    - $138.5 million favourable variance in losses on valuation and translation of financial instruments, including $137.0 million without any tax consequences;
    - $116.8 million increase in adjusted EBITDA;
    - $99.9 million favourable variance in non-controlling interest;
    - $43.8 million favourable variance in impairment of goodwill and intangible assets;
    - $15.6 million favourable variance in the loss on debt refinancing.
- The main unfavourable variances were:
    - $330.9 million gain on the sale of spectrum licences recognized in 2017, including $165.5 million without any tax consequences;
    - $16.9 million increase in the income tax expense;
    - $14.7 million increase in financial expenses;
    - $14.4 million unfavourable variance in income from discontinued operations;
    - $13.1 million increase in the depreciation and amortization charge;
    - $11.6 million unfavourable variance in the charge for restructuring of operations, litigation and other items.

Adjusted income from continuing operating activities: $469.8 million ($1.96 per basic share) in 2018, compared with $348.2 million ($1.44 per basic share) in 2017, an increase of $121.6 million ($0.52 per basic share) or 34.9%.

Depreciation and amortization charge: $753.1 million, a $13.1 million increase due mainly to the impact of capital expenditures in the Telecommunications segment, including depreciation of investments in wired and wireless networks and computer systems.

Financial expenses: $332.0 million in 2018, a $14.7 million increase caused mainly by higher average indebtedness as a result of debt financing a portion of the repurchase of the Quebecor Media shares held by CDP Capital in the second quarter of 2018, partially offset by higher interest revenues generated by liquidity and a lower average interest rate on the debt.

Loss on valuation and translation of financial instruments: $61.3 million in 2018 compared with $199.8 million in 2017. The $138.5 million favourable variance was essentially due to a $137.0 million favourable variance, without any tax consequences, in losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations, litigation and other items: $29.1 million in 2018, compared with $17.5 million in 2017, an $11.6 million unfavourable variance.

- A $14.2 million charge was recognized in 2018 in connection with cost-reduction initiatives in the Corporation's various segments and with disposal of assets. A $17.5 million net charge related to cost-reduction initiatives, customer migration from analog to digital service in the Telecommunications segment, and developments in legal disputes was recognized in 2017.
- A $14.9 million charge for impairment of assets was also recognized in 2018 in connection with various restructuring initiatives, primarily in the Telecommunications segment.

Gain on sale of spectrum licences: $330.9 million in 2017.

- On July 24, 2017, Videotron sold its seven 2500 MHz and 700 MHZ wireless spectrum licences outside Québec to Shaw Communications Inc. for a cash consideration of $430.0 million. A $243.1 million gain was recognized on the sale of the licences, including $121.6 million without any tax consequences.
- On June 20, 2017, Videotron sold its Advanced Wireless Services ("AWS-1") spectrum licence in the Toronto metropolitan area to Rogers Communications Canada Inc. ("Rogers") for a cash consideration of $184.2 million, pursuant to the transfer option held since 2013 by Videotron. An $87.8 million gain was recognized on the sale of the licence, including $43.9 million without any tax consequences.

Charge for impairment of goodwill and intangible assets: $43.8 million in 2017.

- In 2017, Quebecor Media performed impairment tests on its Magazines cash-generating unit ("CGU") in view of the downtrend in the industry's revenues. Quebecor Media concluded that the recoverable amount of its Magazines CGU was less than its carrying amount. Accordingly, a $30.0 million non-cash goodwill impairment charge, including $1.5 million without any tax consequences, and a charge for impairment of intangible assets totalling $12.4 million, including $3.1 million without any tax consequences, were recorded in 2017. An additional $1.4 million charge for impairment of intangible assets was also recognized in various segments of the Corporation in 2017.

Loss on debt refinancing: $15.6 million in 2017.

- On May 1, 2017, Videotron redeemed $125.0 million aggregate principal amount of its outstanding 6.875% Senior Notes issued on July 5, 2011 and maturing on July 15, 2021 at a redemption price of 103.438% of their principal amount. A $5.2 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.
- On May 1, 2017, Quebecor Media fully redeemed its outstanding 7.375% Senior Notes issued on January 5, 2011 and maturing on January 15, 2021, in the aggregate principal amount of $325.0 million, at a redemption price of 102.458% of their principal amount. A $10.4 million loss was recorded in the consolidated statement of income in 2017 in connection with this redemption.

Income tax expense: $162.8 million in 2018 (effective tax rate of 24.6%), compared with $145.9 million in 2017 (effective tax rate of 21.6%), a $16.9 million unfavourable variance. The effective tax rates mainly reflect recognition of benefits arising from prior year tax losses in 2018 and 2017. The increase in the effective rate was mainly due to recognition of lower tax losses in 2018 than in 2017. The increase in the income tax expense was due to the increase in effective tax rates, partially offset by the impact of the decrease in taxable income for tax purposes. The effective tax rate is calculated considering only taxable and deductible items.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of the Corporation's sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under "Trend Information" above, the risk analysis in the "Risks and Uncertainties" section below, and the discussion of the Corporation's financial risks under "Financial Instruments and Financial Risk" below.

Operating activities

Cash flows provided by continuing operating activities: $1.21 billion in 2019 compared with $1.42 billion in 2018.

The $212.2 million decrease was mainly due to:

- $375.6 million unfavourable change in non-cash operating assets and liabilities, due primarily to an unfavourable variance in income tax payable and to a decrease in other operating liabilities, an increase in other operating assets, a decrease in accounts payable and accrued charges, and an increase in inventory in the Telecommunications segment.

Partially offset by:

- $87.8 million and $14.8 million increases in adjusted EBITDA in the Telecommunications and Media segments respectively;
- $47.0 million decrease in current income taxes;
- $5.5 million decrease in the cash portion of financial expenses;
- $4.4 million decrease in the cash portion of the charge for restructuring of operations, litigation and other items.

The unfavourable variance in income tax payable and the decrease in other operating liabilities, the increase in other operating assets, the decrease in accounts payable and accrued charges and the increase in inventory in the Telecommunications segment had an unfavourable impact on cash flows provided by continuing operating activities in 2019 compared with 2018, while increased profitability in the Telecommunications and Media segments and a decrease in the cash interest expense had a favourable impact. The evolution of Videotron's business model, including the launch of Helix, is largely responsible for the additional investment in operating assets.

Working capital: Negative $153.4 million at December 31, 2019 compared with negative $291.9 million at December 31, 2018. The $138.5 million favourable variance was due primarily to the decreases in net income tax payable and in accounts payable and accrued charges, and increases in other current assets, contract assets and inventory, partially offset by the realization of net assets held for sale.

Investing activities

Additions to property, plant and equipment: $501.6 million in 2019 compared with $549.5 million in 2018. The $47.9 million decrease was due primarily to decreased spending related to the leasing of digital set-top boxes in the Telecommunications segment.

Additions to intangible assets: $496.9 million in 2019 compared with $197.4 million in 2018. The $299.5 million increase was due primarily to the acquisition of spectrum licenses for $255.8 million and spending on the IPTV project.

Proceeds from disposal of assets: $4.2 million in 2019 compared with $9.4 million in 2018.

Business acquisitions: $35.6 million in 2019 compared with $10.3 million in 2018.

- In 2019, business acquisitions consisted of the acquisition of the companies in the Serdy Média, the companies in the Serdy Video group, and the companies in the Incendo Media group in the Media segment.
- In 2018, business acquisitions consisted mainly of the acquisition of LC Media, Audio Zone and the assets of Mobilimage by the Media segment.

Business disposals: $260.7 million in 2019, consisting of the sale of the operations of the 4Degrees Colocation data centres.

Acquisition of non-controlling interest: $1.54 billion in 2018.

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital for a total aggregate purchase price of $1.54 billion, paid in cash. Available cash and drawings on Videotron's secured revolving credit facility were used to finance the transaction.
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital in consideration of the issuance of $150.0 million aggregate principal amount of convertible debentures of Quebecor to CDP Capital.

Free cash flows from continuing operating activities of the Quebecor Media subsidiary

Free cash flows from continuing operating activities of Quebecor Media: $514.2 million in 2019 compared with $721.6 million in 2018 (Table 9). The $207.4 million decrease was mainly due to:

- $206.4 million decrease in cash flows provided by continuing operating activities;
- $43.7 million increase in additions to intangible assets.

Partially offset by:

- $47.9 million decrease in additions to property, plant and equipment.

Financing activities

Consolidated debt (long-term debt plus bank indebtedness): $465.6 million reduction in 2019; $209.3 million net unfavourable variance in assets and liabilities related to derivative financial instruments.

- Debt reductions in 2019 essentially consisted of:
  - $649.1 million decrease in Videotron's drawings on its secured revolving credit facility;
  - prepayment by Quebecor Media on July 15, 2019 of the balance of its US$350 million term loan "B" issued on August 1, 2013, bearing interest at the London Interbank Offered Rate ("LIBOR") plus 2.25%, and maturing on August 17, 2020;
  - $198.2 million favourable impact of exchange rate fluctuations. The consolidated debt reduction attributable to this item was offset by the decrease in the asset (or increase in the liability) related to cross-currency swap agreements entered under "Derivative financial instruments";
  - repayment of TVA Group's secured term loan in the amount of $52.9 million.
- Additions to debt in 2019 essentially consisted of:
  - issuance by Videotron on October 8, 2019 of $800.0 million aggregate principal amount of 4.50% Senior Notes maturing on January 15, 2030, for net proceeds of $790.7 million, net of financing fees of $9.3 million;
  - $53.9 million increase in total drawings on the secured revolving bank credit facilities of TVA Group and Quebecor Media;
  - $5.7 million increase in the bank indebtedness of Quebecor Media;
  - $5.5 million increase in Quebecor's debt.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $677.7 million at December 31, 2019 compared with $887.0 million at December 31, 2018. The $209.3 million decrease was mainly due to:
  - unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments;
  - unwinding of Quebecor Media's hedges in an asset position in connection with prepayment of its term loan "B" on July 15, 2019.

Partially offset by:

- o favourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.

- On February 21, 2020, TVA Group amended its secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions of the facility. On February 13, 2019, TVA Group amended this secured revolving credit facility to extend its term to February 2020 and to amend certain terms and conditions of the facility.
- On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility to extend the maturity date to July 2022 and to change certain terms and conditions of the facility.

Financial position

Net available liquidity: $1.68 billion at December 31, 2019 for Quebecor Media and its wholly owned subsidiaries, consisting of $1.70 billion in available unused revolving credit facilities, less $21.2 million in bank indebtedness.

Net available liquidity: $38.4 million as at December 31, 2019 for Quebecor at the corporate level, consisting of $39.0 million in available unused revolving credit facilities, less $0.6 million in bank indebtedness.

Consolidated debt (long-term debt plus bank indebtedness): $5.99 billion at December 31, 2019, a $465.6 million decrease compared with December 31, 2018; $209.3 million net unfavourable variance in assets and liabilities related to derivative financial instruments (see “Financing activities” above).

- Consolidated debt essentially consisted of Videotron’s $4.25 billion debt ($4.23 billion at December 31, 2018); TVA Group’s $44.9 million debt ($52.8 million at December 31, 2018); Quebecor Media’s $1.64 billion debt ($2.12 billion at December 31, 2018); and Quebecor’s $58.7 million debt ($53.2 million at December 31, 2018).

As at December 31, 2019, minimum principal payments on long-term debt in the coming years are as follows:

Table 11
Minimum principal payments on Quebecor’s long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2020	$	57.2
2021		1.4
2022		1,092.7
2023		1,701.0
2024		779.4
2025 and thereafter		2,354.4
Total	**$**	**5,986.1**

From time to time, Quebecor may (but is under no obligation to) seek to retire or purchase its outstanding securities, including debentures, in open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor’s consolidated debt was approximately 5.2 years as of December 31, 2019 (5.1 years as of December 31, 2018). After taking into account hedging instruments, at December 31, 2019 the debt consisted of approximately 93.9% fixed-rate debt (76.3% at December 31, 2018) and 6.1% floating-rate debt (23.7% at December 31, 2018).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases and dividend payments to shareholders. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted EBITDA). At December 31, 2019, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

On March 11, 2020, the Board of Directors of Quebecor declared a quarterly dividend of $0.20 per share on Class A Shares and Class B Shares, payable on April 21, 2020 to shareholders of record as of the record date of March 27, 2020.

600 MHz spectrum auction

On April 10, 2019, Videotron purchased 10 blocks of low-frequency spectrum in the 600 MHz band in ISED Canada’s latest commercial mobile spectrum auction. The licences, covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario, were acquired for $255.8 million.

Board of Directors

On March 11, 2020, the Board of Directors received the resignation of Manon Brouillette, a Director of the Corporation and of Quebecor Media since 2019.

On March 11, 2020, Michèle Colpron was appointed a Director of Quebecor and Quebecor Media.

Analysis of consolidated balance sheet at December 31, 2019

Table 12
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2019 and 2018
(in millions of Canadian dollars)

	Dec. 31, 2019	Dec. 31, 2018	Difference	Main reasons for difference
Assets				
Contract assets	**$ 168.3**	$ 144.4	$ 23.9	Increased mobile device sales
Inventory	**240.4**	203.1	37.3	Impact of current variances in activity and Helix launch
Income taxes[1]	**14.9**	(114.4)	129.3	Current disbursements less current income taxes for the period
Other current assets	**121.2**	101.5	19.7	Impact of current variances in activity
Net assets held for resale[1]	**–**	88.4	(88.4)	Sale of 4Degrees Colocation
Property, plant and equipment	**3,415.9**	3,467.3	(51.4)	Depreciation for the period, less additions to property, plant and equipment on an accrual basis
Intangible assets	**1,444.0**	1,135.3	308.7	Acquisition of spectrum licences and investment in the IPTV project by Videotron, less amortization for the period
Goodwill	**2,692.9**	2,678.3	14.6	Acquisition of the companies in the Incendo Media group, the Serdy Média group and the Serdy Video group
Derivative financial instruments[2]	**677.7**	887.0	(209.3)	See "Financing activities"
Other long-term assets	**240.7**	201.6	39.1	Investments in affiliated corporations, acquisition of companies in the Incendo Media group and Helix launch
Liabilities				
Accounts payable and accrued charges	**809.6**	830.8	(21.2)	Impact of current variances in activity
Long-term debt, including current portion and bank indebtedness	**5,986.9**	6,452.5	(465.6)	See "Financing activities"
Deferred income tax[3]	**828.0**	724.1	103.9	Deferred income tax expense on statement of income
Other long-term liabilities	**371.2**	268.9	102.3	Loss on remeasurement of pension plan obligations and assets; contingent consideration related to the sale of 4Degrees Colocation

1 Current assets less current liabilities
2 Long-term assets less long-term liabilities
3 Long-term liabilities less long-term assets

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2019, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; convertible debentures and lease liabilities; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 13 below shows a summary of these contractual obligations.

Table 13
Contractual obligations of Quebecor as of December 31, 2019
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,986.1**	$ 57.2	$ 1,094.1	$ 2,480.4	$ 2,354.4
Convertible debentures[2]	**150.0**	–	–	150.0	–
Interest payments[3]	**1,514.9**	253.3	616.3	314.2	331.1
Lease liabilities	**137.9**	31.3	40.7	22.3	43.6
Interest payments on lease liabilities	**44.5**	6.5	9.2	6.2	22.6
Additions to property, plant and equipment and other commitments	**1,672.3**	462.8	480.8	306.5	422.2
Derivative financial instruments[4]	**(607.8)**	1.6	(236.6)	(397.8)	25.0
Total contractual obligations	**$ 8,897.9**	**$ 812.7**	**$ 2,004.5**	**$ 2,881.8**	**$ 3,198.9**

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 Based on the market value at December 31, 2019 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of $26.85 per share and a ceiling price of $33.5625. The Corporation may also redeem convertible debentures by issuing the corresponding number of its Class B Shares.

3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2019.

4 Estimated future receipts, net of disbursements, related to foreign exchange hedging using derivative financial instruments.

Significant commitments included in Table 13

Videotron has 20-year service sharing and exchange agreements with Rogers to build out and operate an LTE network in Québec and the Ottawa area. It also has an agreement with Comcast Corporation to develop an innovative IPTV solution, as well as agreements for the roll-out of LTE-A and 5G technologies and the purchase of mobile devices. As at December 31, 2019, the balance of those commitments stood at $894.1 million.

The Quebecor Media Out of Home division has agreements with various Québec transit commissions for the installation and maintenance of bus shelters, and for advertising rights on bus shelters and buses. As at December 31, 2019, the balance of those commitments stood at $113.8 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2019, the balance of those commitments stood at $518.3 million.

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $33.6 million in 2020, based on the most recent financial actuarial reports filed (contributions of $34.6 million were paid in 2019).

Related party transactions

The Corporation made sales to affiliated corporations in the amount of $3.8 million in 2019 ($2.8 million in 2018). These transactions were accounted for at the consideration agreed between parties.

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of business, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheets with respect to these indemnifications.

Capital stock

In accordance with Canadian financial reporting standards, Table 13 presents information on the Corporation’s capital stock as at February 10, 2020. In addition, 2,454,892 share options were outstanding as of February 10, 2020.

Table 13
Capital stock
(in shares and millions of Canadian dollars)

	February 10, 2020	
	Issued and outstanding	**Book value**
Class A Shares	**77,212,934**	**$ 8.6**
Class B Shares	**176,757,207**	**$ 1,043.4**

On August 7, 2019, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

In 2019, the Corporation purchased and cancelled 3,107,356 Class B Shares for a total cash consideration of $94.6 million (11,390,300 Class B Shares for a total cash consideration of $291.7 million in 2018). The excess of $76.3 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in increase of deficit in 2019 ($257.6 million in 2018).

In 2019, 680,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $8.3 million (100,000 Class B Shares for a cash consideration of $1.3 million in 2018). As a result of this transaction, contributed surplus was increased by $12.7 million ($1.2 million in 2018) and stock-based compensation liability was reduced by the same amount.

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Increased competition from non-traditional sources

Quebecor Media faces technological substitution across all its key business segments. Due to ongoing technological developments, the distinction between broadcasting, Internet and cable and mobile telephony platforms is fading rapidly. For instance, content providers and studios are leveraging their content rights and pursuing strategies to deploy their own OTT distribution platform and reach consumers directly through the Internet. By doing so, they are less dependent on content aggregators, such as Videotron. The Internet, through cable and mobile devices, is generally an important broadcasting and distribution platform; an increasing number of Quebecor Media's customers are using mobile devices as their primary means of video entertainment, in direct competition with its cable business. In addition, mobile operators, with the development of their mobile networks, offer wireless and fixed wireless Internet services, which compete with Quebecor Media's Internet access business. Due to the converging nature of technological advances, Quebecor Media expects increasing competition from non-traditional businesses, which may affect its overall business strategy and could adversely affect its business, financial condition and results of operations.

Competition and technological development

In its cable business, Quebecor Media competes against incumbent local exchange carriers ("ILECs"). The primary ILEC competitor has rolled out its own IPTV service in the vast majority of the territory in which Quebecor Media operates. It has also secured licenses to operate video distribution services using video digital subscriber line ("VDSL") technology. In addition, some third-party Internet service providers ("ISPs") have launched Internet Protocol video services ("IP video services") in territories where Quebecor Media provides services.

The rapidly growing landscape of OTT content providers, many of which have substantial financial resources, now compete for viewership and a share of the monthly entertainment spend. Furthermore, the OTT content providers' attractive price points (which are in part due to the fact that they do not contribute financially to the Canadian traditional television business model or Internet infrastructure and are not subject to CRTC regulations) makes Quebecor Media's traditional offer less appealing for its customers and may affect its ability to retain and acquire customers. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial condition and results of operations. Also, foreign OTT content providers with no Canadian place of business are not required to charge federal and provincial sales tax (except in Alberta and Québec). Since Quebecor Media's clients, notably its Club illico subscribers, must be charged GST when they purchase Quebecor Media's services, Quebecor Media is at a competitive disadvantage.

Furthermore, Quebecor Media faces competition from illegal providers of cable television services and illegal access to non-Canadian direct broadcast satellite ("DBS") signal (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy).

In its Internet access business, Quebecor Media faces competition from several resellers who have access to the wholesale third party Internet access ("TPIA") service mandated by the CRTC. The recently CRTC mandated revised wholesale rates, if upheld by the Federal Court of Appeal, will provide TPIA providers with a cost structure that could lead to increased competition either from established TPIA providers or new entrants. These TPIA providers may also provide telephony and networking applications and have entered the IPTV market. Their market share is significant and growing, especially in Québec and Ontario, the two regions in Canada where they have been particularly active and aggressively pricing their services.

Quebecor Media also competes against other ISPs offering residential and commercial Internet access services as well as fixed wireless access and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line, fibre to the node and fibre to the home technologies, often offering comparable download speeds to Quebecor Media's. In addition, satellite operators such as Xplornet are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in rural and remote locations and claiming future download speeds comparable to Quebecor Media's low and medium download speeds. Finally, certain municipalities also plan to build and operate their own broadband networks. They plan to do so through public/private partnership arrangements, competing directly with Quebecor Media in some of its local markets.

Quebecor Media's cable telephony business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators and other providers of Voice over Internet Protocol ("VoIP") and cloud-based telephony. Some of these competitors are not facility-based and therefore have much lower infrastructure costs. In addition, Internet protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in its territory in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current adjunct technologies, such as Wi-Fi, "hotspots" or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements, or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and have been operating for many years lower-cost mobile telephony brands in order to acquire additional market share. Furthermore, the decisions to be taken by the CRTC with regards to a new regulatory framework for mobile services stand to have a significant impact on Quebecor Media's competitive environment, as Quebecor Media could see the emergence of non facility-based operators (mobile virtual network operators "MVNOs"). Quebecor Media may not be able to compete successfully in the future against existing and those potential new competitors; increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

Finally, a few of its competitors are offering special discounts to customers who subscribe to two or more of their services (cable television or IPTV, Internet access, landline and mobile telephony services). Should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing one subscriber for each of its services as a result of its bundling strategy. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operations.

Fierce price competition in all Quebecor Media's businesses and across the industries in which it operates, combined with the declining demand for certain traditional products, may affect Quebecor Media's ability to raise the price of its products and services in line with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operations.

Significant and rapid technological changes

New technologies in the telecommunication industry are evolving faster than the historical investment cycle in the industry. Their introduction and pace of adoption could result in requirements for additional capital investments not currently planned, as well as shorter estimated useful lives for certain of Quebecor Media's existing assets. Quebecor Media's strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its networks, information technology systems and infrastructure, as well as the acquisition of spectrum to support growth in its customer base and its demands for increased bandwidth capacity and other services.

Quebecor Media must continually invest in its services, networks and technologies due to the rapid evolution of technologies, or it may required to acquire, develop or integrate new technologies. Improvements in its services depend on may factors. The cost of the acquisition, development or implementation of new technologies and spectrum could be significant and Quebecor Media's ability to fund such acquisition, development or implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition and results of operations.

5G technology is evolving rapidly and Canada's first standards-based commercial launches are expected in 2020. Smartphones are generally expected to support 5G technology in 2020. It is expected that 5G ecosystems will operate on multiple frequency bands, including the 600 MHz spectrum recently acquired by Videotron. However, 3.5 GHz spectrum is becoming a primary band for 5G mobile coverage. ISED Canada is expected to auction 3.5 GHz frequencies by late 2020 or early 2021. There is a risk that Quebecor Media may not be able to purchase the 3.5 GHz spectrum required to compete equally on network speeds and 5G capacity. Any such difficulty or inability to compete could have a material adverse effect on Quebecor Media's business, reputation, prospects, financial condition, and results of operations.

In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its networks and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short-term, mid-term and long-term in order to maintain, expand and enhance its networks systems and services, including expenditures relating to advancements in LTE-Advanced/5G mobile technologies, network virtualisation and automation, Internet access, ultra-high-definition television, Internet of Things, IPTV and OTT delivery technology, as well as the introduction of virtual reality and home automation. Moreover, additional investments in Quebecor Media's business may not translate into incremental revenues, cash flows or profitability.

Ongoing access to spectrum

Wireless, video and broadband services are undergoing rapid and significant technological changes and a dramatic increase in usage – in particular, the demand for faster and seamless usage of video and data across mobile and fixed devices. It is projected that this demand will further accelerate, driven by the following increases: levels of broadband penetration; need for personal connectivity and networking; affordability of mobile devices; multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media may have to acquire additional spectrum in order to address this increased demand. The ability to acquire additional spectrum is dependent on the timing and the rules established by ISED Canada. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world and has established worldwide coverage. Should it be unable to extend its worldwide coverage, or to renew or substitute for those roaming agreements at their respective or better terms or on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably. In addition, if Quebecor Media is unable to renew, or substitute for, these roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, prospects, revenues, financial condition and results of operations could be adversely affected.

Higher handset costs and increasing BYOD customers

Quebecor Media's mobile telephony business model is based substantially on increasing monthly revenues while financing the cost of subscriber handsets over the term of their contract, similar to other Canadian wireless carriers. This model attracts customers and in exchange they commit to a term contract. However, the higher handset costs, in a price sensitive market, could negatively impact Quebecor Media's revenues, financial condition and results of operations. Furthermore, given the fact that its competitors benefit from higher purchasing volumes, they may have the ability to negotiate better prices from manufacturers of mobile devices, thus enabling them to recoup a larger share of their subscribers' monthly spending.

Furthermore, given the marginal technological advancements in mobile devices, consumers tend to conserve their mobile devices for longer periods of time, thereby increasing the number of BYOD customers. Such customers are under no contractual obligation to remain with a specific carrier. Also, new technologies now embedded in certain handset devices will, once widely adopted, allow customers to switch between carriers without the use of a carrier-provided Sim card. This could have a material adverse effect on Quebecor Media's churn rate and, consequently, on its business, prospects, revenues, financial condition and results of operations.

Inventory obsolescence

Quebecor Media's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, or minimum order quantities from its suppliers, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to implement its business strategies and finance its capital expenditure programs or other investment requirements, whether through cash from operations, additional borrowings or other sources of funding. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable and mobile networks. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the "*Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies on its service territory. Should Quebecor Media seek to renew or renegotiate these agreements, it cannot guarantee that these agreements will continue to be available on their respective terms, on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage and which may have a material adverse effect on its business and prospects.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, enhancing its advanced broadband network, pursuing enhanced content development, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its businesses. Quebecor Media may not be able to implement these strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement these strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased dependence on third party suppliers and service providers, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, and other factors described in this section. Any material failure to implement its strategies could have an adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating and capital expenditures in the future in order to offer new products and services to its customers. It can provide no assurance that it will be successful in developing such new products and services in relation to these engagements, including the marketing of new revenue sources.

Consumer trends to abandon cable telephony and traditional television services

The recent trend towards mobile substitution (when users cancel their landline telephony services and opt for mobile telephony services only) is largely the result of the increasing mobile penetration rate in Canada. In addition, there is also a consumer trend to abandon, substitute or reduce traditional television services for Internet access services in order to stream directly from broadcasters and OTT content providers. Quebecor Media may not be successful in converting its existing cable telephony and cable television subscriber base to its mobile telephony services, its Internet access services or its OTT entertainment platforms, which could have a material adverse effect on its business, prospects, revenues, results of operations and financial condition.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources, and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, prospects, results of operations and financial condition. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, prospects, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the same timeline as its other businesses; and, specifically with regards to the Videotron Centre, that it might not be able to maximize its profitability due to the fact that it does not have a main tenant nor operate in a major market, which might prevent it from attracting international talents.

Implementation of changes to the structure of its business

Quebecor Media has and will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement or upgrade, a process redesign, and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may negatively impact overall customer experience and may lead to greater-than-expected operational challenges, costs and expenses, customer losses, and business disruption for Quebecor Media, all of which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor's failure to recruit, train and retain such employees could have a material adverse effect on its business, prospects, results of operations and financial condition. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance, maintain content quality, continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

The media industry has experienced fundamental and permanent structural changes. The growth of the Internet has presented alternative content distribution options that compete with traditional media, and an increasing number of non-traditional providers are developing technologies to satisfy the demand for entertainment and information content. Furthermore, Quebecor Media's customers have an increased control over the manner, content and timing of their media consumption, including through new technologies that give consumers greater flexibility to fast forward or skip advertisements within Quebecor Media's programming. These alternative technologies and new content distribution options have increased audience fragmentation, reduced the Corporation's Media segment business' audience, readership and circulation levels and have had an adverse effect on advertising revenues from local, regional and national advertisers.

Advertising revenue is the primary source of revenue for the Corporation's Media segment. As a result of those structural changes, competition for advertising spend in traditional media comes mainly from digital media technologies, which have introduced a wide variety of media distribution platforms for consumers and advertisers. These new competitors also include digital advertising giants with greater financial resources and a controlling share of the online advertising market thus reducing demand in some segments of Quebecor Media's traditional media advertising inventories. Furthermore, the international consolidation of advertising agencies is disrupting the demand model as some of its clients now negotiate through these consolidated positions.

The continuous technological improvements to the Internet and the access to unlimited data, combined with higher download speeds, may continue to divert a portion of the Corporation's Media segment business' existing customer base from traditional media to digital media technology, which could adversely impact the demand for its services. The ability of the Corporation's Media segment to succeed over the long-term depends on various factors, including Quebecor Media's ability to attract advertisers and consumers to its online sites. In addition, even if successful, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of these digital initiatives through incremental revenues, cash flows or profitability.

As the media market continues to change and fragment, Quebecor Media expects its readership, circulation and audience to reduce and its advertising revenues, business, prospects, results of operations and financial condition could be materially adversely affected.

Finally, Quebecor Media's revenues and operating results in these businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Since a significant portion of Quebecor Media's advertising revenues is derived from retail, automotive and consumer packaged goods sector advertisers, weakness in these sectors and in the real estate industry has had and may continue to have an adverse impact on the revenues and results of operations of the Corporation's Media segment.

Distribution, production and acquisition of original programming

The financial performance of its cable, Club illico and mobile services depends in large part on Quebecor Media's ability to distribute, on its platforms, a wide range of appealing video programming and on its ability to produce and acquire original content.

In its telecommunications business, Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, these suppliers have become vertically integrated and are now more limited in number. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates or its inability to pass rate increases through to its customers could have a material adverse effect on its business, prospects, results of operations and financial condition.

Increased competition in the television industry from local and foreign deregulated OTT content providers with access to substantial financial resources may result in a competitive disadvantage from a content perspective and may have a material adverse effect on Quebecor Media's business, prospects, revenues, financial conditions and results of operations. Notably, on September 28, 2017, the Minister of Canadian Heritage and Netflix concluded an arrangement pursuant to which Netflix undertakes to invest a minimum of $500 million in original productions in Canada over the next five years, while not required to charge provincial (except in Alberta and Québec) and federal sales taxes or to contribute financially to the Canadian traditional television business model or Internet infrastructure. This arrangement may place Quebecor Media at a competitive disadvantage in the market and exert an upward pressure on content price.

Launch of new products and services

Quebecor Media is investing in the launch of new products and services. During the period immediately following the launch of a new product or service, revenues are generally relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize or may never materialize.

Single-clustered network

Quebecor Media provides its cable and IP television, Internet access, cable telephony and mobile telephony services through a primary headend and through 12 additional regional headends in a single-clustered network. Despite available emergency backup or replacement sites, a failure in Quebecor Media's primary headend, including exogenous threats, such as cyber-attacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its networks until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation, and could have a material adverse effect on its financial condition.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, there can be no assurance that these measures will be effective to prevent violations or perceived violations of the law or ethical business practices. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Protection of personal data

The ordinary course of Quebecor Media's businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, and personally identifiable information of its customers and employees, whether in its systems, infrastructure, networks and processes, or those of its suppliers. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data in and hosted on its systems, or those belonging to its suppliers, including from intentional or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed systems, processes and security controls that are designed to protect personally identifiable information of its clients, employees or business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breach relating to such data that Quebecor Media stores or processes or that its suppliers store or process. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

Cybersecurity

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against signal interruption, unauthorized access to or use of sensitive data, including data of its customers, and to prevent data loss or theft, and although ever-evolving cyber-threats require Quebecor Media to continually evaluate and adapt its systems, infrastructure, networks and processes, Quebecor Media cannot assure that its systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against all information security access by third parties or errors by employees or by third-party suppliers. Quebecor Media is also at risk from increasingly sophisticated phishing attacks, Sim swaps, fraudulent ports and other types of frauds. If Quebecor Media is subject to a significant cyber-attack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

The costs associated with a major cyber-attack could also include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues and customers from business interruption and litigation. Quebecor Media's contractual risk transfers do not eliminate the risk completely and the potential costs associated with these attacks could exceed the scope and limits of the insurance coverage it maintains.

Protection from piracy

Quebecor Media may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its networks, digital programming, and Internet access services. It uses encryption technology to protect its cable signals and OTT service from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its networks, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Malicious and abusive Internet practices

Quebecor Media's cable, mobile and fibre-optic connectivity business customers utilize its networks to access the Internet and, as a consequence, Quebecor Media or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms and other destructive or disruptive software. These activities could have adverse consequences on its networks and its customers, including deterioration of service, excessive call volume to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its networks. Any significant loss of cable, mobile or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, results of operations, and financial condition.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers, some of which are based in territories providing geopolitical risk. An inability to maintain and enhance its existing IT systems or obtain new systems to accommodate additional customer growth or to support new products and services could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, manage operating expenses and carry out operation without interruption, all of which may have a material adverse effect on its business, prospects, results of operations and financial condition.

Products and services supplied to Quebecor Media by third-party suppliers may contain latent security issues, including, but not limited to, software and hardware security issues, that would not be apparent upon a diligent inspection. Failure to identify and remedy those issues could adversely impact its results of operations and financial condition.

Third-party suppliers and providers

Quebecor Media depends on third-party suppliers and providers for certain services, hardware, licensed technological platforms and equipment that are, or may become, critical to its operations and network evolution. These materials and services include set-top boxes, gateways, mobile telephony handsets and network equipment, cable and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, licensed technological platforms, software, the "backbone" telecommunications network for Internet access and telephony services, and construction services for the expansion of and upgrades to its cable and mobile networks. These services and equipment are available from a single or limited number of suppliers and Quebecor Media therefore faces the risks of supply disruption, including due to geopolitical events, external events such as epidemics or pandemics, business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services or other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If Quebecor Media is unable to renegotiate commercially acceptable arrangements with these content providers, comply with their technological requirements or find alternative sources of equivalent content, its operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor's reputation, results of operations, liquidity or financial condition, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Intellectual property rights

Quebecor Media relies on its intellectual property, such as patents, copyrights, trademarks and trade secrets, as well as licenses and other agreements with its vendors and other third parties, to use various technologies, conduct its operations and sell its products and services. Legal challenges to its intellectual property rights, or the ones of third-party suppliers, and claims of intellectual property infringement by third parties could require that it enters into royalty or licensing agreements on unfavourable terms, incur substantial monetary liability, or be enjoined preliminarily or permanently from further use of the intellectual property in question or from the continuation of its businesses as currently conducted. Quebecor Media may need to change its business practices if any of these events occur, which may limit its ability to compete effectively and could have an adverse effect on its results of operations. In the event that it believes any such challenges or claims are without merit, they can nonetheless be time-consuming and costly to defend and divert management's attention and resources away from its businesses. Moreover, if Quebecor Media is unable to obtain or continue to obtain licenses from its vendors and other third parties on reasonable terms, its businesses could be adversely affected.

Piracy and other unauthorized uses of content are made easier, and the enforcement of Quebecor Media's intellectual property rights more challenging, by technological advances. The steps Quebecor Media has taken to protect its intellectual property may not prevent the misappropriation of its proprietary rights. Quebecor Media may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to Quebecor Media's. Also, Quebecor Media may not be able to discover or determine the extent of any unauthorized use of its proprietary rights. Unauthorized use of its intellectual property rights may increase the cost of protecting these rights or reduce its revenues. Quebecor Media cannot be sure that any legal actions against such infringers will be successful, even when its rights have been infringed.

Strikes, other labour protests and health risks affecting employees

Quebecor Media is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial condition, results of operations and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Health threats to employees resulting from epidemics and pandemics could adversely affect Quebecor Media's business, assets, financial conditions, results of operations and reputation.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund these pension plans will not increase in the future and therefore negatively impact its operating results and financial condition. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes, gateways, mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are only partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations and financial condition.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2019, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favourable terms, or at all, in the future or, pursuant to the terms of these hedging transactions, its counterparties thereto may owe the Corporation significant amounts of money and may be unable to honour such obligations, all of which could have an adverse effect on its results of operations and financial condition.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2019, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $677.7 million on a consolidated basis.

Some of its suppliers source their products out of the U.S.; therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations in the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations and financial condition.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, changed or increased regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to maintain a cash balance until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as those could adversely impact Quebecor's results of operations, cash flows, financial condition and prospects.

Asset impairment charges

In the past, the Corporation has recorded asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flows.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset or the terms of such dispositions may be overly restrictive to us or may result in unfavorable post-closing price adjustments if some conditions are not met, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In Quebecor Media's Telecommunications business, the competition to offer products in the best available retail commercial spaces is fierce. Some of its telecommunications business competitors have pursued a strategy of selling their products through independent retailers to extend their presence on the market, while some have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of Quebecor Media's retail network and places it at a competitive disadvantage, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licenses. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licenses, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. Quebecor Media's wireless and cable operations are also subject to technical requirements, license conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of license, the issuance of new licenses, including additional spectrum licenses, to its competitors, or changes to the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), prospects, results of operations and financial condition. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply.

The CRTC has launched a comprehensive review of the wireless market. The Canadian Government has requested that the CRTC consider competition, affordability, consumer interests and innovation in its decisions. This review could result in the introduction of mandatory resale in the wireless marketplace and the emergence of MVNOs in the mobile telephony industry. This material increase in competition in Quebecor Media's mobile telephony business could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

In addition, laws relating to communications, data protection, e-commerce, direct marketing and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes in the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

Provision of TPIAs with access to our cable network

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide TPIA providers with access to their networks at mandated cost-based rates. Numerous TPIA providers are interconnected to Quebecor Media's cable network and are thereby providing retail Internet access services as well as, in some cases, retail VoIP and IP-based television distribution services.

In a series of decisions since 2015, the CRTC has reemphasized the importance it gives to mandated wholesale access arrangements as a driver of competition in the retail Internet access market. Among other things, the CRTC has ordered all of the major telephone and cable companies, including Videotron, to provide new disaggregated wholesale access services, which are to replace existing aggregated wholesale access services after a transition period. These new disaggregated services will include mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. On August 15, 2019, the CRTC introduced a flat rate for wholesale Internet access independent of access speed and also ordered that new access and capacity rates be applied retroactively to March 31, 2016. Those new proposed rates are substantially lower than interim rates and could represent a retroactive reduction in earnings of approximately $22.0 million (before income taxes) in 2019 and approximately $30.0 million (before income taxes) from March 31, 2016 to December 31, 2018. A coalition of cable companies (including Videotron) has filed appeals of this decision with the Federal Court of Appeal, the federal Cabinet and the CRTC itself. If the CRTC's decision is ultimately upheld in its current form, it will significantly reduce Videotron's wholesale Internet service revenues. In addition, it will significantly change the competitive landscape and will allow Internet resellers to adopt more aggressive pricing strategies in the retail market. This could lead to a loss of Quebecor Media's subscribers, affect its ability to recover the costs of providing these services, reduce the incentives to invest in its networks and have a material adverse effect on its ability to successfully compete.

License renewals

Videotron's AWS-1 licenses were renewed in December 2018 for a 20-year term. A public consultation to determine the license fees to be paid during the renewal term has not yet been initiated.

Videotron's other spectrum licenses, including in the AWS-3, 700 MHz, 2500 MHz and 600 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of these terms, Quebecor Media expects that new licenses will be issued for subsequent terms through a renewal process, unless a breach of licence conditions by Videotron has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licenses, including the terms and conditions of the new licenses and whether license fees should apply for a subsequent license term, are expected to be determined by ISED Canada.

If, at the end of their respective term, the licenses are not renewed on acceptable terms, or at all, Quebecor Media's ability to continue to offer its wireless services, or to offer new services, may be negatively impacted and, consequently, it could have a material adverse effect on its business, prospects, results of operations and financial condition.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographic products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes in the policies or rules of application in Canada or in any of its provinces in connection with these government incentive programs, including any change in the Québec or the federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its results of operations and financial condition. Canadian content programming is also subject to certification by various agencies of the federal government. If programming fails to so qualify, the Corporation would not be able to use the programs to meet Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

In addition, the Canadian and provincial governments currently provide grants, incentives and tax credits to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of Quebecor Media's film production and audiovisual services business, content producers for its broadcasting operations, as well as its production and distribution business, finance a portion of their production budgets through these grants, incentives and tax credits. There can be no assurance that these grants, incentives and tax credits will continue at their present levels or at all, and if they are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced, as a result of which the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions. Some producers may select locations other than Québec to take advantage of other tax credit programs. Other factors, such as director or star preference, may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation's business, results of operations and financial condition.

Environmental laws and regulations and climate change

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, including electronic waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have implemented Extended Producer Responsibility regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products", which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future. Evolving public expectations with respect to the environment and increasingly stringent laws and regulations could result in increased costs of compliance, and failure to recognize and adequately respond to them could result in fines, regulatory scrutiny, or have a significant effect on Quebecor Media's reputation and brands.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

Quebecor Media owns, through one of its subsidiaries, certain properties located on a partially remediated former landfill. The operation and ownership of these properties carries an inherent risk of environmental and health and safety liabilities, including for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs and other environmental damages. Quebecor Media may, from time to time, be involved in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Finally, the effects of global climate change are increasing the severity and frequency of extreme weather-related events, and will likely result in increased operational and capital costs. Some of the more significant climate-related risks that were identified include increased operational costs to maintain Quebecor Media's network operations during extreme weather events, and increased capital costs as a result of damage to its facilities and/or equipment.

Concerns about alleged health risks relating to radiofrequency emissions

All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied to it meet all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2019, it had $5.99 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2019, it had more than $1.77 billion available for additional borrowings under its existing credit facilities on a consolidated basis, and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;
- create liens;
- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities. Its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including Quebecor Media's Senior Notes. If Quebecor's indebtedness is accelerated, it may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flows of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding, and both Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flows from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flows and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flows to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, prospects, results of operations and financial condition.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favourable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders. As of December 31, 2019 approximately 73.67% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of Class A directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing, or deterring a change in control of Quebecor; could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency; and (ii) to achieve a targeted balance of fixed- and floating-rate debts. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 14
Description of derivative financial instruments
As of December 31, 2019
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.3195	$ 139.2	US$ 105.5

Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses on valuation and translation of financial instruments for 2019 and 2018 are summarized in Table 15.

Table 15
Loss on valuation and translation of financial instruments
((in millions of Canadian dollars)

		2019		2018
Loss on embedded derivatives related to convertible debentures	**$**	**5.7**	$	60.4
Other		**0.8**		0.9
	$	**6.5**	$	61.3

A gain on cash flow hedges of $73.8 million was recorded under "other comprehensive income" in 2019 (loss of $10.1 million in 2018).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or the Corporation.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2019 and December 31, 2018 were as follows:

Table 16
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

				2019				2018
Asset (liability)		**Carrying value**		**Fair value**		Carrying value		Fair value
Long-term debt[1]	**$**	**(5,986.1)**	**$**	**(6,376.2)**	$	(6,461.7)	$	(6,444.9)
Convertible debentures[2]		**(162.0)**		**(162.0)**		(150.6)		(150.6)
Derivative financial instruments[3]								
Foreign exchange forward contracts		**(2.1)**		**(2.1)**		6.7		6.7
Cross-currency interest rate swaps		**679.8**		**679.8**		880.3		880.3

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $635.5 million as of December 31, 2019 ($840.6 million in 2018) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $42.2 million as of December 31, 2019 ($46.4 million in 2018).

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2019, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2019, the provision for expected credit losses represented 2.5% of the gross amount of accounts receivable and contract assets (2.7% as of December 31, 2018), while 7.2% of trade receivables were 90 days past their billing date (11.7% as of December 31, 2018).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2019 and 2018:

		2019		2018
Balance at beginning of year	**$**	**20.5**	$	21.1
Changes in expected credit losses charged to income		**18.8**		19.6
Write-off		**(19.7)**		(20.2)
Balance at end of year	**$**	**19.6**	$	20.5

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.2 years as of December 31, 2019 (5.1 years as of December 31, 2018) (see also "Contractual obligations" above).

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways, mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2019, and to hedge its exposure on certain purchases of set-top boxes, gateways, mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on "other comprehensive income," before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2019 is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of $0.10	$	**1.2**	$	**38.8**
Decrease of $0.10		**(1.2)**		**(38.8)**

A variance of $0.10 in the 2019 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $2.9 million on the value of unhedged purchases of goods and services and $6.6 million on the value of unhedged acquisitions of tangible and intangible assets in 2019.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. As of December 31, 2019, after taking into account the hedging instruments, long-term debt was comprised of 93.9% fixed-rate debt (76.3% in 2018) and 6.1% floating-rate debt (23.7% in 2018).

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2019 was $3.3 million.

The estimated sensitivity on income and on "other comprehensive income," before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures (note 21), as of December 31, 2019, as per the Corporation's valuation models, is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of 100 basis points	$	**(1.5)**	$	**(18.0)**
Decrease of 100 basis points		**1.5**		**18.0**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2019 and 2018 is as follows:

Table 17
Capital structure of Quebecor
(in millions of Canadian dollars)

	2019	2018
Bank indebtedness	**$ 29.4**	$ 24.3
Long-term debt	**5,957.5**	6,428.2
Convertible debentures	**150.0**	150.0
Embedded derivatives related to convertible debentures	**15.8**	5.2
Lease liabilities	**137.9**	144.4
Derivative financial instruments	**(677.7)**	(887.0)
Cash and cash equivalents	**(14.0)**	(21.0)
Net liabilities	**5,598.9**	5,844.1
Equity	**$ 1,072.1**	$ 568.5

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercompany transactions, and the declaration and payment of dividends or other distributions.

Contingencies and legal disputes

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is of the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation, establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to those provisions.

On August 15, 2019, the CRTC issued an order finalizing the rates, retroactively to March 31, 2016, by which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation consolidated financial statements. The new proposed rates are substantially lower than interim rates and could represent a retroactive reduction in earnings of approximately $22.0 million (before income taxes) in 2019 and approximately $30.0 million (before income taxes) from March 31, 2016 to December 31, 2018. On September 13, 2019, a coalition of cable companies (including Videotron) and Bell Canada filed separate appeals of the CRTC's order with the Federal Court of Appeal arguing, among other things, that the order is marked by numerous errors of law and jurisdiction resulting in wholesale rates that are unreasonably low. The cable companies and Bell Canada also filed separate requests to stay the implementation of the order pending disposition of their appeals. On November 22, 2019, the leave to appeal was granted by the Federal Court of Appeal and the interim stay of the CRTC's order granted by this court on September 27, 2019, was extended until a final ruling by the court is made. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party's rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and

- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as "Deferred revenues" in the consolidated balance sheets. Deferred revenues are usually recognized as revenues in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities' revenues as follows:

- operating revenues from subscriber services, such as cable television, Internet access, cable and mobile telephony, and OTT video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- cable connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

Media

The Media segment recognizes each of its main activities' revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines, or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment leasing revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from the distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities' revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;

- revenues from the sale of advertising in the form of venue signage or sponsorships are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

When determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU. Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives, on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2019 was $2.69 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2019 was $741.1 million.

Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments.

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge: (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt; and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation uses interest rate swaps to manage fair value exposure on certain debts resulting from changes in interest rates. These swap agreements require a periodic exchange of payments without the exchange of the notional principal amount on which the payments are based. These interest rate swaps are designated as fair value hedges when they convert the interest rate from a fixed rate to a floating rate, or as cash flow hedges when they convert the interest rate from a floating rate to a fixed rate.
- The Corporation has established a hedge ratio of one for one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

The Corporation measures and records the effectiveness of its hedging relationships as follows.

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items’ cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies.

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in “other comprehensive income” until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated "other comprehensive income" are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist mainly of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future and the minimum funding liability is based on a number of assumptions, including future service costs and future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of those assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

Provisions

Provisions are recognized when: (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation; and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time and it is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network, are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

Provision for expected credit losses

The Corporation maintains a provision to cover anticipated credit losses from customers who are unable to pay their debts. The provision is reviewed periodically, considering the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions.

Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under “Impairment of assets.”

Contingent considerations and future conditional adjustments

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model, requiring management to assess the probabilities that the conditions on which the contingent considerations or the future conditional adjustments are based will be met in the future. The assessment of these contingent and conditional potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

Interpretation of laws and regulations

Interpretation of laws and regulation, including those of the CRTC and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions and income taxes in the consolidated financial statements.

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation’s future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the term lease, less incentive payment received, using the Corporation's incremental borrowing rate at that date or interest rate implicit in the lease. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interests on lease liabilities are recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

Changes in accounting policies

(i) IFRS 16 – *Leases*

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related lease liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis.

The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation’s segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under the previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income.

Principal payments of the lease liability are now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities.

The retrospective adoption of IFRS 16 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		2018
Purchase of goods and services	$	(44.2)
Depreciation and amortization		32.9
Financial expenses		8.5
Restructuring of operations, litigation and other items		(0.7)
Deferred income tax expense		0.9
Net income and comprehensive income	$	2.6
Net income and comprehensive income attributable to:		
Shareholders	$	2.2
Non-controlling interests		0.4

Consolidated balance sheets

Increase (decrease)	December 31, 2018	December 31, 2017
Other current assets	$ (2.2)	$ (2.2)
Property, plant and equipment	15.5	15.5
Right-of-use assets	112.6	133.5
Provisions	(1.5)	(1.4)
Lease liabilities[1]	144.4	167.9
Other liabilities	(4.3)	(3.4)
Deferred income tax liability	(3.3)	(4.3)
Deficit	9.2	7.2
Non-controlling interests	(0.2)	(4.8)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.8 million as of December 31, 2017

(i) IFRIC 23 - *Uncertainty over Income Tax Treatments*

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments.

The adoption of IFRIC 23 had no impact on the consolidated financial statements.

Controls and procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2019, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the timeframes prescribed by this legislation. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by the Corporation's management during the financial period beginning October 1, 2019 and ending December 31, 2019.

Additional information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;
- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;

- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing Quebecor Media's network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its digital cable television, Internet access, mobile and cable telephony, and Club illico services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;
- interruptions resulting from equipment breakdown, network failure, the threat of natural disaster, epidemics, pandemics and political instability is some countries;
- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect a portion of Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the Corporation's public filings, available at <www.sedar.com> and <www.quebecor.com>, including, in particular, the "Risks and Uncertainties" section above.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of March 11, 2020 and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 58 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

MANAGEMENT DISCUSSION AND ANALYSIS
2020

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company that owns all of the shares of Quebecor Media Inc., one of Canada's largest telecommunications and media groups. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, in this Management Discussion and Analysis, "Quebecor" and the "Corporation" refer to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: mobile and wireline telephony; Internet access; television; the Club illico over-the-top ("OTT") video service ("Club illico"); business telecommunications solutions; broadcasting; soundstage and equipment rental; audiovisual content production and distribution; newspaper publishing and distribution; digital news and entertainment platforms; music streaming; book and magazine publishing and distribution; music production and distribution; out-of-home advertising; operation and management of a world-class arena and an entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production, and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a leading mobile and wireline communications provider. Quebecor Media also holds leading positions through its Media segment and its Sports and Entertainment segment in the creation, promotion and distribution of entertainment and news, and related Internet services, that are designed to appeal to audiences in every demographic category. Quebecor Media continues to pursue a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

The Corporation uses non-IFRS measures and key performance indicators. In 2020, the Corporation reviewed the nature and definition of some of its non-IFRS measures. As a result, "cash flows from segment operations" was abandoned and replaced by the new "cash flows from operations" metric. The Corporation also added the "consolidated net debt leverage ratio" measure. Definitions of the non-IFRS measures and key performance indicators used by the Corporation are provided in the "Non-IFRS Measures" and "Key Performance Indicators" sections. Descriptions of the changes to non-IFRS measures made by the Corporation in 2020 are also provided.

COVID-19 pandemic

The COVID-19 pandemic is having a significant impact on the economic environment in Canada and around the world. On March 13, 2020, in order to limit the spread of the virus, the Québec government imposed a number of restrictions and special preventive measures, including the suspension of business activities deemed non-essential, across Québec. The Québec government subsequently implemented a gradual reopening plan, which was followed at the end of December 2020 by new restrictions and the suspension of some business activities due to the second wave of the pandemic. This health crisis curtailed the operations of many of Quebecor's business partners and led to a significant slowdown in some of the Corporation's segments in 2020. Among other impacts, the restrictions and preventive measures imposed by the Québec government caused a significant reduction in volume at Videotron retail outlets and delays in client migration to its new Helix entertainment and home management platform; lower advertising revenues, a significant decrease in sports events broadcast by the TVA Sports specialty channel, and reduced film and audiovisual content activity in the Media segment; and the cancellation of most shows and events, and the interruption of music and book distribution activities in the Sports and Entertainment segment. Despite the constraints created by this pandemic, Quebecor has continued and will continue to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Because of the slowdown in the economy, approximately 10% of Quebecor's workforce have received benefits in 2020 under the Corporation's assistance program. During the health crisis, this program provides financial assistance to employees temporarily laid off or to employees on stand-by in addition to the Canadian wage subsidy programs. Due to significant decreases in their revenues, most of the business units in the Media segment and Sports and Entertainment segment qualified for the Emergency Wage Subsidy, and subsidies totalling $49.6 million were recorded in 2020 as a reduction in employee costs, including $29.0 million in TVA Group Inc ("TVA Group"), $7.5 million in Sports and Entertainment, $4.6 million in newspapers, $3.1 million in Quebecor Media Sales and $2.9 million in NumériQ. Given the uncertainty about the evolution of the pandemic, the full impact of the health crisis over its duration cannot be determined with certainty.

The impact of the COVID-19 health crisis on the operating results of the Corporation's business segments in 2020 is analyzed in greater detail in the "Segmented Analysis" section below. It is difficult at this stage to foresee all the consequences of this crisis until the situation returns to normal. The health crisis could have a material adverse impact on the growth of the Corporation's operating results and cash flows in the short and medium terms. As a result, the growth recorded during the quarters preceding the health crisis may not be indicative of future growth.

HIGHLIGHTS

2020 financial year

Revenues: $4.32 billion, a $24.0 million (0.6%) increase.

Adjusted EBITDA: $1.95 billion, a $73.1 million (3.9%) increase.

Net income attributable to shareholders: $607.2 million ($2.41 per basic share) in 2020, a decrease of $45.6 million ($0.14 per basic share).

Adjusted income from continuing operating activities: $594.5 million ($2.36 per basic share) in 2020, an increase of $13.5 million ($0.09 per basic share).

Cash flows from operations: $1.31 billion in 2020, a $168.3 million (14.7%) increase.

Cash flows provided by continuing operating activities: $1.43 billion in 2020, a $219.7 million (18.1%) increase.

Consolidated net debt leverage ratio: 2.68x at December 31, 2020 compared with 2.91x at December 31, 2019.

Fourth quarter 2020

Revenues: $1.15 billion, a $10.6 million (0.9%) increase.

Adjusted EBITDA: $526.8 million, a $32.3 million (6.5%) increase.

Net income attributable to shareholders: $159.8 million ($0.64 per basic share) in the fourth quarter of 2020, a favourable variance of $14.7 million ($0.07 per basic share).

Adjusted income from continuing operating activities: $165.0 million ($0.66 per basic share) in the fourth quarter of 2020, a $5.4 million increase.

Cash flows from operations: $345.2 million, an $84.7 million (32.5%) increase.

Cash flows provided by continuing operating activities: $377.0 million, a $13.9 million increase.

Telecommunications

- The Telecommunications segment grew its revenues by $142.2 million (4.1%) and its adjusted EBITDA by $61.0 million (3.4%) in 2020.
- Videotron significantly increased its revenues from customer equipment sales ($139.1 million or 51.6%), mobile telephony ($57.8 million or 9.6%), and Internet access ($17.1 million or 1.5%) in 2020.
- Videotron's total average billing per unit ("ABPU") was $49.94 in 2020, compared with $50.00 in 2019, a $0.06 (-0.1%) decrease. Mobile ABPU was $50.85 in 2020, compared with $52.56 in 2019, a $1.71 (-3.3%) decrease due in part to a decrease in overage and roaming revenues caused by the COVID-19 public health crisis and the popularity of bring your own device ("BYOD") plans.
- There was a net increase of 71,700 revenue generating units ("RGU") (1.2%) in 2020, including 150,600 connections (11.3%) to the mobile telephony service, 69,500 subscriptions (4.0%) to the Internet access service and 10,400 subscriptions (2.3%) to Club illico.

- On December 15, 2020, Videotron announced the launch of its 5G network, with service to be phased in first in the City of Montréal and then rolled out in other parts of Québec. This state-of-the-art technology offers customers faster upload and download speeds and supports the introduction of new applications.
- From March 13 through June 30, 2020, and December 20, 2020 through January 3, 2021, Videotron suspended data caps on all of its customers' residential and business Internet plans to support the implementation of effective teleworking arrangements at Québec businesses and enable customers to stay connected with loved ones during the COVID-19 pandemic. From March 13 to June 30, 2020, Videotron also cancelled roaming charges outside Canada and the Daily Traveller Pass fee.
- Videotron placed first in the Technology and Telecommunications category in the BIP Recherche-ICO awards for the most trusted organizations of the past decade, announced by the Institut de la confiance dans les organisations (ICO) on March 11, 2020. Videotron was also on the 2020 list of Montréal's Top Employers released by Mediacorp Canada Inc. on January 30, 2020.

Media

- On September 30, 2020, TVA Group announced that Mels Studios and Postproduction G.P. had obtained Dolby Atmos Home Entertainment 9.1.4 certification, a Canadian first. Dolby reserves this certification for companies that meet the highest standards in order to provide moviegoers around the world with optimal sound quality.
- According to the fall 2020 Vividata survey, *Le Journal de Montréal* and *Le Journal de Québec* remain Québec's news leaders with more than $3.7 million readers per week on all platforms (print, mobile and Internet). TVA Group remains a leading player in the Canadian magazine industry with an average of more than 8.3 million readers on all platforms.

Sports and Entertainment

- On February 10, 2021, the Sports and Entertainment segment announced the acquisition of Les Disques Audiogramme inc. The addition of the largest independent French-language record label in North America positions the segment to continue supporting talented Québec artists and disseminating and promoting Québec music.
- On June 17, 2020, the Sports and Entertainment segment announced the acquisition of the Théâtre Capitole in Québec City. The acquisition of the unique, hundred-year-old, 1,300-seat venue will enhance the Québec City entertainment scene.

Financial transactions

- On February 24, 2021, the Board of Directors of Quebecor declared a quarterly dividend of $0.275 per share on its Class A Multiple Voting Shares ("Class A Shares") and Class B Subordinate Voting Shares ("Class B Shares"). The 38% increase is in line with the Corporation's dividend target of 30% to 50% of free cash flows.
- On February 11, 2021, TVA Group amended its $75.0 million secured revolving credit facility to extend its term from February 2021 to February 2022 and amend certain terms and conditions. On February 21, 2020, TVA Group had lowered the limit on the facility from $150.0 million to $75.0 million and amended certain terms and conditions.
- On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of 3.125% Senior Notes maturing on January 15, 2031, for net proceeds of $644.1 million, net of financing fees of $5.9 million. Videotron intends to use the proceeds from this offering for general corporate purposes, including, without limitation, the repayment of a portion of its current debt.
- Quebecor's $50.0 million revolving credit facility expired on July 15, 2020 and was not renewed.

TREND INFORMATION

Competition continues to intensify in the mobile and wireline telephony, Internet access, television and OTT markets. Due to ongoing technological developments, the distinction between those platforms is fading rapidly and the Corporation expects increasing competition from non-traditional businesses across its key business segments. Competition also comes from wholesale Internet resellers. These resellers purchase large companies' high-speed access services to offer their own services to customers. Thus, the subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its mobile and wireline networks, the launch and expansion of new or additional services to support growth in its customer base and demand for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium term to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure, maintenance and enhancement, as well as costs relating to the roll-out of LTE-Advanced/5G technologies. In addition, the demand for wireless data services has been growing constantly and is projected to continue to grow. The anticipated levels of data traffic will represent an increasing challenge to the current mobile network's ability to support this traffic. The Corporation will have to acquire additional spectrum in the future to meet the growing demand.

Some of Quebecor Media's lines of business are cyclical in nature. They are dependent on advertising and, particularly in the newspaper and magazine businesses, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

The Media industry has been experiencing fundamental and permanent structural changes. Generalized audience fragmentation has prompted many advertisers to review their media placement strategies and turn a significant part of their advertising budgets over to international competitors operating solely in digital media. In the broadcasting industry, audiences are increasingly fragmented as viewing habits have shifted toward Internet-based content delivery platforms that allow users greater control over content and timing, such as the OTT video services. The Corporation's Media segment has taken steps in order to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want.

Moreover, newspaper and magazine circulation, measured in terms of copies sold, has been declining in that industry over the past several years. The traditional run of press advertising for major multimarket retailers has been declining due to a shift in marketing strategy toward other media and to retail industry consolidation. To respond to such competition, the Media segment's operations have developed their Internet presence through branded websites, including specialized websites.

The Sports and Entertainment segment has made significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required to expand the Sports and Entertainment segment despite not operating in a major market.

In the books and music businesses, digital technology has disrupted buying and consuming habits, particularly with the emergence of vehicles such as music streaming and e-books, which compete with conventional formats. The Corporation recently developed its own music streaming service, which prominently features Québec music in addition to its international catalogue.

INTEREST IN SUBSIDIARIES

As of December 31, 2020, Quebecor held all the shares of Quebecor Media.

Table 2 shows Quebecor Media's equity interest in its main subsidiaries at December 31, 2020.

Table 2
Quebecor Media's interest (direct and indirect) in its main subsidiaries
As of December 31, 2020

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles inc.	100.0 %	100.0 %

Quebecor Media's interest in its subsidiaries has not varied over the past three years.

2020/2019 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $4.32 billion, a $24.0 million (0.6%) increase.

- Revenues increased in Telecommunications ($142.2 million or 4.1% of segment revenues).
- Revenues decreased in Media ($87.5 million or -11.9% of segment revenues) and in Sports and Entertainment ($34.2 million or -17.8%).

Adjusted EBITDA: $1.95 billion, a $73.1 million (3.9%) increase.

- Adjusted EBITDA increased in Telecommunications ($61.0 million or 3.4% of segment adjusted EBITDA), Media ($7.4 million or 9.9%), and Sports and Entertainment ($1.4 million or 19.2%).
- There was a favourable variance at Head Office ($3.3 million).
- The change in the fair value of Quebecor Media stock options resulted in a $1.5 million favourable variance in the stock-based compensation charge in 2020 compared with 2019. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $7.2 million favourable variance in the Corporation’s stock-based compensation charge in 2020.

Net income attributable to shareholders: $607.2 million ($2.41 per basic share) in 2020, compared with $652.8 million ($2.55 per basic share) in 2019, a decrease of $45.6 million ($0.14 per basic share).

- The main unfavourable variances were:
    - $64.3 million decrease in income from discontinued operations;
    - $52.8 million increase in the depreciation and amortization charge;
    - $10.6 million unfavourable variance in the charge for restructuring of operations and other items.
- The main favourable variances were:
    - $73.1 million increase in adjusted EBITDA;
    - $14.5 million favourable variance in gains and losses on valuation and translation of financial instruments, including $15.0 million without any tax consequences.

Adjusted income from continuing operating activities: $594.5 million ($2.36 per basic share) in 2020, compared with $581.0 million ($2.27 per basic share) in 2019, an increase of $13.5 million ($0.09 per basic share).

Cash flows from operations: $1.31 billion in 2020, a $168.3 million (14.7%) increase due to a $67.8 million decrease in additions to property, plant and equipment, a $27.4 million decrease in additions to intangible assets, and the $73.1 million increase in adjusted EBITDA.

Cash flows provided by continuing operating activities: $1.43 billion in 2020, a $219.7 million (18.1%) increase due primarily to the favourable net change in non-cash balances related to operating activities and the increase in adjusted EBITDA, partially offset by the increase in current income taxes and the increase in the cash portion related to restructuring of operations and other items.

Depreciation and amortization charge: $803.2 million in 2020, an $52.8 million increase due mainly to the impact of investments in property, plant and equipment and in intangible assets in the Telecommunications segment, including the amortization of intangible assets related to investments in the Helix platform, and the impact of the revision of the depreciation period for some capital assets in the Telecommunications segment in consideration of technological developments, partially offset by lower spending related to the leasing of set-top boxes.

Financial expenses: $328.2 million in 2020, a $0.7 million increase. The impact of higher average interest rate on the long-term debt was offset by lower average indebtedness.

Gain on valuation and translation of financial instruments: $8.0 million in 2020 compared with a $6.5 million loss in 2019. The $14.5 million favourable variance was due to a $15.0 million favourable variance, without any tax consequences, in the gain on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $39.2 million in 2020 compared with $28.6 million in 2019, a $10.6 million increase.

- A $30.7 million net restructuring charge was recognized in 2020 in connection with cost-reduction initiatives in the Corporation's various segments ($9.8 million in 2019). An $8.5 million charge for impairment of assets was also recognized in 2020 in connection with restructuring initiatives ($18.8 million in 2019).

Income tax expense: $205.8 million in 2020 (effective tax rate of 26.4%), compared with $205.7 million in 2019 (effective tax rate of 26.6%), a $0.1 million unfavourable variance.

Segmented Analysis

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is the largest cable operator in Québec and the third-largest in Canada by customer base. Its state-of-the-art network passes 2,994,700 homes and businesses. Videotron offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones; Internet access service; digital television distribution services, including video-on-demand, pay-per-view and pay TV; wireline telephony services; and Club illico. Videotron also includes Videotron Business, a full-service business telecommunications provider that offers mobile and wireline telephony, high-speed data transmission, Internet access and television services. Videotron also offers Helix, a technology platform launched in August 2019 that is revolutionizing entertainment and home management with voice remote, ultra-intelligent Wi-Fi and support for home automation. On December 15, 2020, Videotron announced the launch of its 5G network, state-of-the-art technology that offers customers faster upload and download speeds and supports the introduction of new applications.

2020 operating results

Revenues: $3.62 billion in 2020, a $142.2 million (4.1%) increase.

- Revenues from the mobile telephony service increased $57.8 million (9.6%) to $658.5 million, due primarily to an increase in the number of subscriber connections, partially offset by a decrease in average per-subscriber revenues.
- Revenues from Internet access services increased $17.1 million (1.5%) to $1.13 billion, due mainly to an increase in the customer base, partially offset by a decrease in average per-subscriber revenues.
- Revenues from television services decreased $70.8 million (-7.3%) to $903.6 million, due primarily to the impact of the net decrease in the customer base.
- Revenues from the wireline telephony service decreased $2.7 million (-0.8%) to $338.4 million, mainly because of the impact of the net decrease in subscriber connections, largely offset by higher average per-connection revenues due in part to increases in some rates.
- Revenues from customer equipment sales increased $139.1 million (51.6%) to $408.9 million, mainly because of the impact of equipment sales related to the Helix platform launched on August 27, 2019 and higher sales of mobile devices.
- Other revenues increased $1.7 million (0.9%) to $181.8 million, mainly reflecting higher revenue at Club illico.

Total ABPU: Videotron's total ABPU was $49.94 in 2020 compared with $50.00 in 2019, a $0.06 (-0.1%) decrease. Mobile ABPU was $50.85 in 2020, compared with $52.56 in 2019, a $1.71 (-3.3%) decrease due in part to a decrease in overage and roaming revenues caused by the COVID-19 public health crisis and the popularity of BYOD plans.

Customer statistics

RGUs – The total number of RGUs was 6,147,900 at December 31, 2020, an increase of 71,700 (1.2%) in 2020 compared with an increase of 85,900 in 2019 (Table 3).

Mobile telephony – The number of subscriber connections to the mobile telephony service stood at 1,481,100 at December 31, 2020, an increase of 150,600 (11.3%) in 2020 compared with an increase of 176,700 in 2019 (Table 3).

Internet access – The number of subscribers to the Internet access service stood at 1,796,800 at December 31, 2020, an increase of 69,500 (4.0%) in 2020 compared with an increase of 22,800 in 2019 (Table 3). As of December 31, 2020, Videotron's Internet access services had a household and business penetration rate (number of subscribers as a proportion of the total 2,994,700 homes and businesses passed by Videotron's network as of December 31, 2020, up from 2,950,100 one year earlier) of 60.0% compared with 58.6% a year earlier.

Television – The number of subscribers to television services stood at 1,475,600 at December 31, 2020, a decrease of 56,200 (-3.7%) in 2020 compared with a decrease of 65,500 in 2019 (Table 3). At December 31, 2020, the television service had a household and business penetration rate of 49.3% versus 51.9% a year earlier.

Wireline telephony – The number of subscriber connections to the wireline telephony service stood at 924,700 at December 31, 2020, a decrease of 102,600 (-10.0%) in 2020 compared with a decrease of 86,600 in 2019 (Table 3). As of December 31, 2020, the wireline telephony service had a household and business penetration rate of 30.9% versus 34.8% a year earlier.

Club illico – The number of subscribers to Club illico stood at 469,700 at December 31, 2020, an increase of 10,400 (2.3%) in 2020 compared with an increase of 38,500 in 2019 (Table 3).

Table 3
Telecommunications segment year-end RGUs (2016-2020)
(in thousands of customers)

	2020	2019	2018	2017	2016
Mobile telephony	**1,481.1**	1,330.5	1,153.8	1,024.0	893.9
Internet	**1,796.8**	1,727.3	1,704.5	1,666.5	1,612.8
Television	**1,475.6**	1,531.8	1,597.3	1,640.5	1,690.9
Wireline telephony	**924.7**	1,027.3	1,113.9	1,188.5	1,253.1
Club illico	**469.7**	459.3	420.8	361.6	314.7
Total	**6,147.9**	6,076.2	5,990.3	5,881.1	5,765.4

Adjusted EBITDA: $1.86 billion, a $61.0 million (3.4%) increase due primarily to:

- impact of the net revenue increase.

Partially offset by:

- net increase in operating expenses, due mainly to cost increases related to the popularity of the Helix platform, which continues to grow, partially offset by the impact of prudent management of other costs.

The unfavourable variance in the comparative results caused by recognition of a one-time gain in 2019 was partially offset by a favourable variance due to the updating of certain provisions in 2020.

Cost/revenue ratio: Employee costs and purchases of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 48.5% in 2020 compared with 48.2% in 2019.

Cash flows from operations: $1.27 billion in 2020 compared with $1.13 billion in 2019 (Table 15). The $143.0 million (12.7%) increase was due primarily to a $57.2 million decrease in additions to property, plant and equipment, mainly attributable to lower spending related to the leasing of set-top boxes and the postponement of some investments during the COVID-19 pandemic, as well as a $24.8 million decrease in additions to intangible assets, also due to the postponement of some investments, and the $61.0 million increase in adjusted EBITDA.

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network, as well as the specialty channels TVA Sports, LCN, addik^{TV}, Prise 2, Yoopa, CASA, MOI ET CIE, Évasion and Zeste. TVA Group also holds interests in two other TVA Network affiliates. As well, TVA Group is engaged in commercial production and custom publishing. In addition to linear television, TVA Network and the specialty channels broadcast on-demand and streaming content over multiplatform applications, including the TVA+ website and mobile app, which provide free access to TVA Network programs, some specialty channel content, and original content.

Through its subsidiaries, TVA Group owns Mels Studios and Postproduction G.P. and Mels Dubbing Inc., providers of soundstage, equipment and mobile unit rental, postproduction, dubbing and visual effects services to the film and television industries.

Through the companies in the Incendo Media inc. group (“Incendo Media”), TVA Group is engaged in the production and distribution of television programs, movies and series for international markets.

TVA Group publishes more than 50 French- and English-language magazine titles in various categories, including show business, television, fashion and decorating. It also markets digital products associated with the various magazine brands. TVA Group is the largest magazine publisher in Québec.

The Media segment also operates two paid daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, the free daily *24 heures* and the J5 app, which provides real-time access to news on mobile devices and tablets. The websites of the paid dailies, *journaldemontreal.com* and *journaldequebec.com*, lead the news sites in their markets with more than 4.9 million unique visitors per month (source: ComScore Canada Multi-platform, monthly average unduplicated, January to November 2020). According to corporate figures, the aggregate circulation of the Media segment's paid and free newspapers as of December 31, 2020 was approximately 1.8 million copies per week in print and electronic formats.

In addition, the Media segment includes NumériQ inc.("NumériQ"), which brings together digital strategy and content production assets that are harnessed to create digital platforms and content for the Corporation's various platforms, and operates a number of other digital brands, including *Le Guide de l'auto, Le sac de chips, Pèse sur Start, Silo 57* and *Tabloïd*. NumériQ also owns QUB radio, an online and mobile audio platform with a live radio stream and a library of podcasts, and the QUB musique music streaming platform.

The Corporation's apps and websites log a combined total of more than 7.1 million unique visitors per month in Canada (source: ComScore Inc., November 2020).

The Media segment is also engaged in printing newspapers, distributing newspapers and magazines, and out-of-home advertising. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties, Quebecor Media Sales, which offers Media segment customers integrated, diversified and complete advertising services, and Quebecor Content, which contributes to the creation, development, acquisition and distribution of television content and formats.

2020 operating results

Revenues: $650.5 million in 2020, an $87.5 million (-11.9%) decrease.

- Advertising revenues decreased by $54.1 million (-15.9%), mainly because of lower advertising revenues at TVA Network, the newspapers, magazines, specialty channels and Quebecor Out of Home, partly reflecting the impact of COVID-19.
- Other revenues decreased $23.1 million (-12.3%), due primarily to a decrease in revenues from film and audiovisual services because of the suspension of film shoots during the COVID-19 pandemic, as well as a decrease in magazine distribution revenues.
- Subscription revenues decreased by $10.3 million (-4.9%), mainly because of lower subscription revenues at the magazines and newspapers.

Adjusted EBITDA: $82.2 million in 2020, a $7.4 million (9.9%) increase. A decrease in labour costs due to the impact of salary savings and the government measures introduced to deal with the COVID-19 pandemic, decreases in broadcast content costs, and decreases in production, distribution, editorial and selling expenses were partially offset by the impact of the net revenue decrease.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 87.4% in 2020 compared with 89.9% in 2019. The decrease was mainly due to lower labour costs and broadcast content costs, as well as decreases in production, distribution, editorial and selling expenses.

Cash flows from operations: $44.2 million in 2020 compared with $24.8 million in 2019 (Table 15). The $19.4 million (78.2%) increase was due to a $12.0 million decrease in additions to property, plant and equipment and to intangible assets, and the $7.4 million increase in adjusted EBITDA.

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include production and coproduction of shows presented at the Videotron Centre and other venues. In addition, the Sports and Entertainment segment operates sports and cultural events manager Event Management Gestev Inc., which is the official imprint for shows and events produced in Québec by Quebecor Media.

The Sports and Entertainment segment includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec.

The Sports and Entertainment segment also owns the Théâtre Capitole, a performance venue in Québec City where the segment rents out the space, exploits the advertising spaces, generates sponsorship revenues and operates the food concessions during events.

As well, the Sports and Entertainment segment includes educational publisher CEC Publishing Inc.; Sogides Group Inc., which is engaged in general literature publishing through its 18 publishing houses; and Messageries A.D.P. inc., which distributes print books and e-books, and which is the exclusive distributor for more than 260 Québec and European French-language publishers.

The Sports and Entertainment segment is engaged in the distribution of CDs and videos (Distribution Select); the distribution of music to Internet music downloading and streaming services (Select Digital); music recording and video production (Disques Musicor); and concert and event production (Musicor Spectacles).

On February 10, 2021, the Sports and Entertainment segment announced the acquisition of Les Disques Audiogramme inc., the largest independent French-language record label in North America.

2020 operating results

Revenues: $158.0 million in 2020, a $34.2 million (-17.8%) decrease due primarily to lower revenues from music, from concerts at the Videotron Centre, from hockey and from sporting events caused in large part by the COVID-19 pandemic, partially offset by higher revenues from book publishing and distribution.

Adjusted EBITDA: $8.7 million in 2020, a $1.4 million (19.2%) increase due primarily to decreases in some operating expenses, including labour costs as a result of the impact of salary savings and government measures introduced to deal with the COVID-19 pandemic, and decreases in operating and production costs, partially offset by the impact of the decline in revenues.

Cash flows from operations: $5.3 million in 2020 compared with $2.4 million in 2019 (Table 15). The $2.9 million favourable variance was due primarily to the $1.4 million increase in adjusted EBITDA and a $1.5 million decrease in additions to property, plant and equipment and to intangible assets.

2020/2019 FOURTH QUARTER COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $1.15 billion, a $10.6 million (0.9%) increase.

- Revenues increased in Telecommunications ($32.3 million or 3.6%).
- Revenues decreased in Media ($22.2 million or -10.7% of segment revenues) and in Sports and Entertainment ($5.9 million or -10.8%).

Adjusted EBITDA: $526.8 million, a $32.3 million (6.5%) increase.

- Adjusted EBITDA increased in Telecommunications ($19.0 million or 4.1% of segment adjusted EBITDA) and in Media ($10.3 million or 29.2%).
- There was a favourable variance at Head Office ($3.5 million).
- Adjusted EBITDA decreased in Sports and Entertainment ($0.5 million or -19.2%).
- The change in the fair value of Quebecor Media stock options resulted in a $1.1 million favourable variance in the stock-based compensation charge in the fourth quarter of 2020 compared with the same period of 2019. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $3.3 million favourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2020.

Net income attributable to shareholders: $159.8 million ($0.64 per basic share) in the fourth quarter of 2020, compared with $145.1 million ($0.57 per basic share) in the same period of 2019, a favourable variance of $14.7 million ($0.07 per basic share).

- The main favourable variances were:
  - $32.3 million increase in adjusted EBITDA;
  - $13.7 million favourable variance in losses on valuation and translation of financial instruments, including $12.6 million without any tax consequences.
- The main unfavourable variances were:
  - $27.2 million increase in the depreciation and amortization charge;
  - $4.5 million increase in the charge for restructuring of operations and other items.

Adjusted income from continuing operating activities: $165.0 million ($0.66 per basic share) in the fourth quarter of 2020, compared with $159.6 million ($0.63 per basic share) in the same period of 2019, a $5.4 million increase.

Cash flows from operations: $345.2 million, an $84.7 million (32.5%) increase due primarily to a $27.5 million decrease in additions to property, plant and equipment, a $24.9 million decrease in additions to intangible assets, and the $32.3 million increase in adjusted EBITDA.

Cash flows provided by continuing operating activities: $377.0 million, a $13.9 million increase due primarily to the net change in non-cash balances related to operating activities and the increase in adjusted EBITDA in the Telecommunications and Media segments, partially offset by the increase in current income taxes.

Depreciation and amortization charge: $213.5 million in the fourth quarter of 2020, an $27.2 million increase due mainly to the impact of the revision of the depreciation period for some capital assets in the Telecommunications segment in consideration of technological developments and the impact of investments in property, plant and equipment and in intangible assets in the Telecommunications segment, including amortization of intangible assets related to investments in the Helix platform, partially offset by lower spending related to the leasing of set-top boxes.

Financial expenses: $79.1 million in the fourth quarter of 2020, a $2.3 million decrease caused mainly by lower average indebtedness and a favourable variance in gains and losses on foreign currency translation of short-term monetary items, partially offset by the impact of the higher average interest rate on the long-term debt.

Loss on valuation and translation of financial instruments: $0.9 million in the fourth quarter of 2020 compared with $14.6 million in the same period of 2019. The $13.7 million favourable variance was due to a $12.6 million favourable variance, without any tax consequences, in gains and losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $6.1 million in the fourth quarter of 2020 compared with $1.6 million in the same period of 2019, a $4.5 million unfavourable variance.

- A $4.9 million charge was recognized in the fourth quarter of 2020 in connection with cost-reduction initiatives in the Corporation's various segments ($1.6 million in the fourth quarter of 2019). In the fourth quarter of 2020, a $1.2 million charge for impairment of assets was also recognized in connection with various restructuring initiatives.

Income tax expense: $58.1 million in the fourth quarter of 2020 (effective tax rate of 25.6%), compared with $60.3 million in the same period of 2019 (effective tax rate of 27.0%), a $2.2 million favourable variance caused essentially by the impact of the decrease in taxable income.

Segmented Analysis

Telecommunications

Revenues: $940.9 million, a $32.3 million (3.6%) increase due essentially to the same factors as those noted above under “2020/2019 financial year comparison.”

- Revenues from the mobile telephony service increased $13.0 million (8.3%) to $170.2 million.
- Revenues from Internet access services increased $9.6 million (3.4%) to $292.3 million.
- Revenues from television services decreased $19.5 million (-8.1%) to $220.0 million.
- Revenues from wireline telephony service decreased $0.4 million (-0.5%) to $83.3 million.
- Revenues from customer equipment sales increased $28.8 million (28.9%) to $128.4 million.
- Other revenues increased $0.8 million (1.7%) to $46.7 million.

Total ABPU: Videotron’s total ABPU was $50.21 in the fourth quarter of 2020 compared with $$49.99 in the same period of 2019, a $0.22 (0.4%) increase. Mobile ABPU was $50.52 in the fourth quarter of 2020, compared with $51.89 in the same period of 2019, a $1.37 (-2.6%) decrease due in part to a decrease in overage and roaming revenues caused by the COVID-19 public health crisis and the popularity of BYOD plans.

Customer statistics

RGUs – 43,000 (0.7%) unit increase in the fourth quarter of 2020 compared with an increase of 21,800 in the same period of 2019.

Mobile telephony – 28,500 (2.0%) subscriber-connection increase in the fourth quarter of 2020 compared with an increase of 41,800 in the same period of 2019.

Internet access – 27,000 (1.5%) subscriber increase[1] in the fourth quarter of 2020 compared with an increase of 3,000 in the same period of 2019.

Television – 6,200 (-0.4%) subscriber decrease in the fourth quarter of 2020 compared with a decrease of 13,400 in the same period of 2019.

Wireline telephony – 23,100 (-2.4%) subscriber-connection decrease[2] in the fourth quarter of 2020 compared with a decrease of 25,400 in the same period of 2019.

Club illico – 16,800 (3.7%) subscriber increase in the fourth quarter of 2020 compared with an increase of 15,800 in the same period of 2019.

Adjusted EBITDA: $481.7 million, a $19.0 million (4.1%) increase due primarily to the impact of the net revenue increase.

Cost/revenue ratio: Employee costs and purchases of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 48.8% in the fourth quarter of 2020 compared with 49.1% in the same period of 2019.

Cash flows from operations: $317.1 million in the fourth quarter of 2020 compared with $248.5 million in the same period of 2019 (Table 15). The $68.6 million increase was caused primarily by a $26.2 million decrease in additions to intangible assets due to the postponement of some investments during the COVID-19 pandemic, a $23.4 million decrease in additions to property, plant and equipment, also due to the postponement of some investments, and the $19.0 million increase in adjusted EBITDA.

---

[1] The numbers for the end of the third quarter of 2020 have been lowered by 3,800 customers (reflecting reductions in customer growth of 2,500 and 1,300 in the first and second quarters of 2020 respectively) to correct an irregularity discovered in the RGU growth compilation systems.

[2] The numbers for the end of the third quarter of 2020 have been lowered by 3,100 subscriber connections (reflecting reductions in customer growth of 2,700 and 400 in the first and second quarters of 2020 respectively) to correct an irregularity discovered in the RGU growth compilation systems.

Media

Revenues: $185.8 million in the fourth quarter of 2020, a $22.2 million (-10.7%) decrease.

- Other revenues decreased $9.6 million (-16.6%) due primarily to a decrease in revenues from production and distribution, and from film and audiovisual services, because of the suspension of film shoots due to the COVID-19 pandemic, as well as a decrease in magazine distribution revenues.
- Advertising revenues decreased by $8.5 million (-8.9%), mainly because of lower advertising revenues at the newspapers, the speciality channels and TVA Network.
- Subscription revenues decreased by $4.1 million (-7.5%), mainly because of lower subscription revenues at the specialty channels and the magazines.

Adjusted EBITDA: $45.6 million in the fourth quarter of 2020, a $10.3 million (29.2%) favourable variance due primarily to:

- lower broadcasting content costs due, among other things, to the postponement of sporting events, decreases in some operating expenses, including labour costs, because of the impact of salary savings and the government measures introduced to deal with the COVID-19 pandemic, and to lower production and distribution costs.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 75.5% in the fourth quarter of 2020 compared with 83.0% in the same period of 2019. The decrease was mainly due to the decrease in broadcast content costs.

Cash flows from operations: $30.8 million in the fourth quarter of 2020 compared with $16.9 million in the same period of 2019 (Table 15). The $13.9 million increase was mainly due to the $10.3 million increase in adjusted EBITDA and a $4.1 million decrease in additions to property, plant and equipment.

Sports and Entertainment

Revenues: $48.8 million in the fourth quarter of 2020, a $5.9 million (-10.8%) decrease due primarily to lower revenues from music, hockey, concerts at the Videotron Centre and sporting events because of the COVID-19 pandemic, partially offset by higher revenues from book distribution and publishing.

Adjusted EBITDA: $2.1 million in the fourth quarter of 2020, a $0.5 million (-19.2%) decrease due primarily to the impact of the decline in revenues, partially offset by decreases in some operating expenses, including labour costs as a result of the impact of salary savings and the government measures introduced to deal with the COVID-19 pandemic, and production costs.

Cash flows from operations: $1.2 million in the fourth quarter of 2020 compared with $1.8 million in the same period of 2019 (Table 15). The $0.6 million decrease was essentially due to the $0.5 million decrease in adjusted EBITDA.

2019/2018 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $4.29 billion, a $112.8 million (2.7%) increase.

- Revenues increased in Telecommunications ($98.4 million or 2.9% of segment revenues), Sports and Entertainment ($10.1 million or 5.5%) and Media ($9.4 million or 1.3%).

Adjusted EBITDA: $1.88 billion, a $103.2 million (5.8%) increase.

- Adjusted EBITDA increased in Telecommunications ($87.8 million or 5.1% of segment adjusted EBITDA).
- Adjusted EBITDA increased in Media ($14.8 million or 24.7%).
- There was a favourable variance at Head Office ($3.8 million), mainly due to lower stock-based compensation costs.
- Adjusted EBITDA decreased in Sports and Entertainment ($3.2 million or -30.5%).
- The change in the fair value of Quebecor Media stock options resulted in a $7.4 million favourable variance in the stock-based compensation charge in 2019 compared with 2018. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $1.6 million unfavourable variance in the Corporation’s stock-based compensation charge in 2019.

Net income attributable to shareholders: $652.8 million ($2.55 per basic share) in 2019, compared with $403.7 million ($1.69 per basic share) in 2018, an increase of $249.1 million ($0.86 per basic share).

- The main favourable variances were:
  - $103.2 million increase in adjusted EBITDA;
  - $93.7 million favourable variance in income from discontinued operations;
  - $54.8 million favourable variance in losses on valuation and translation of financial instruments, including $54.7 million without any tax consequences;
  - $32.6 million favourable variance in non-controlling interest.
- The unfavourable variance was mainly due to:
  - $42.9 million increase in the income tax expense.

Adjusted income from continuing operating activities: $581.0 million ($2.27 per basic share) in 2019, compared with $469.8 million ($1.96 per basic share) in 2018, an increase of $111.2 million ($0.31 per basic share) or 23.7%.

Cash flows from operations: $1.14 billion in 2019, a $131.8 million (13.0%) increase due to a $103.2 million increase in adjusted EBITDA and a $67.9 million decrease in additions to property, plant and equipment, partially offset by a $39.3 million increase in additions to intangible assets.

Cash flows provided by continuing operating activities: $1.21 billion in 2019, a $212.2 million (-14.9%) decrease due primarily to the unfavourable net change in non-cash balances related to operating activities, partially offset by the increase in adjusted EBITDA in the Telecommunications and Media segments and the decrease in current income taxes.

Depreciation and amortization charge: $750.4 million in 2019, a $2.7 million decrease.

Financial expenses: $327.5 million in 2019, a $4.5 million decrease. Reductions in financial expenses were caused mainly by lower interest on convertible debentures and a lower average interest rate on the debt. Additions to financial expenses were caused mainly by higher average indebtedness as a result of debt financing of a portion of the repurchase of the Quebecor Media shares held by CDP Capital d’Amérique Investissements inc., in the second quarter of 2018, and lower interest revenues generated by liquidity.

Loss on valuation and translation of financial instruments: $6.5 million in 2019 compared with $61.3 million in 2018. The $54.8 million favourable variance was due to a $54.7 million favourable variance, without any tax consequences, in losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $28.6 million in 2019, compared with $29.1 million in 2018.

- A $9.8 million net restructuring charge was recognized in 2019 in connection with cost-reduction initiatives in the Corporation's various segments ($14.2 million in 2018). An $18.8 million charge for impairment of assets was also recognized in 2019 in connection with restructuring initiatives ($14.9 million in 2018).

Income tax expense: $205.7 million in 2019 (effective tax rate of 26.6%), compared with $162.8 million in 2018 (effective tax rate of 24.6%), a $42.9 million unfavourable variance. The increase in the effective tax rates reflects the recognition of benefits arising from prior year tax losses in 2018. This increase in the tax rate, combined with the impact of the increase in taxable income for tax purposes, explains the increase in the income tax expense in 2019 compared with 2018. The effective tax rate is calculated considering only taxable and deductible items.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of the Corporation sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under “Trend Information” above, the risk analysis in the “Risks and Uncertainties” section below, and the discussion of the Corporation’s financial risks under “Financial Instruments and Financial Risk” below.

Operating activities

Cash flows provided by continuing operating activities: $1.43 billion in 2020 compared with $1.21 billion in 2019.

The $219.7 million increase was primarily due to:

- $269.3 million favourable net change in non-cash operating assets and liabilities, due primarily to favourable variances in income tax payable and accounts payable and accrued charges, partially offset by an increase in accounts receivable;
- $61.0 million increase in adjusted EBITDA in the Telecommunications segment.

Partially offset by:

- $100.8 million increase in current income taxes;
- $20.9 million increase in the cash portion of the charge for restructuring of operations and other items.

The favourable net variance in income tax payable and in other non-cash items and the increase in the Telecommunications segment’s profitability had a favourable impact on cash flows provided by continuing operating activities in 2020 compared with 2019.

Working capital: Negative $33.4 million at December 31, 2020 compared with negative $161.4 million at December 31, 2019. The $128.0 million favourable variance was due primarily to an increase in cash and cash equivalents provided by cash flows from operating activities, an increase in accounts receivable, a reduction in the short-term portion of long-term debt, a reduction in bank indebtedness, a decrease in deferred revenues and an increase in inventory, partially offset by an increase in accounts payable and accrued charges.

Investing activities

Cash flows used for additions to property, plant and equipment: $447.2 million in 2020 compared with $501.6 million in 2019. The $54.4 million reduction consists of $67.8 million due primarily to a decrease in investments related to set-top box rental and the postponement of some investments because of COVID-19, mainly in the Telecommunications segment, partially offset by a $13.4 million net unfavourable variance in current non-cash items.

Cash flows used for additions to intangible assets: $205.9 million in 2020 compared with $496.9 million in 2019. The $291.0 million reduction mainly reflects the impact of the purchase by Videotron of spectrum licences in the 600 MHz band for $255.8 million in 2019 and the postponement of some investments because of COVID-19, mainly in the Telecommunications segment, and a $7.8 million net favourable variance in current non-cash items.

Proceeds from disposal of assets: $4.4 million in 2020 compared with $4.2 million in 2019.

Business acquisitions: $47.1 million in 2020 compared with $35.6 million in 2019.

- Business acquisitions in 2020 consisted essentially of the acquisition of Télédistribution Amos inc. and its network in Abitibi-Témiscamingue in the Telecommunications segment, and of the Théâtre Capitole, a Québec City performance venue, in the Sports and Entertainment segment.
- In 2019, business acquisitions consisted of the acquisition of the companies in the Serdy Média inc., Serdy Video Inc. and Incendo Media groups in the Media segment.

Business disposals: $0.2 million in 2020 compared with $260.7 million in 2019.

- In 2019, business disposals consisted in the sale of the operations of the 4Degrees Colocation Inc. data centres (“4Degrees Colocation”).

Free cash flows from continuing operating activities

Free cash flows from continuing operating activities: $782.8 million in 2020 compared with $473.3 million in 2019 (Table 16).

The $309.5 million increase was due primarily to:

- $219.7 million increase in cash flows provided by continuing operating activities;
- $54.4 million decrease in cash flows used for additions to property, plant and equipment;
- $35.2 million decrease in cash flows used for additions to intangible assets.

Financing activities

Consolidated debt (long-term debt plus bank indebtedness)**:** $211.8 million reduction in 2020. $80.6 million net unfavourable variance in assets and liabilities related to derivative financial instruments.

- Debt reductions in 2020 essentially consisted of:
  - $116.1 million net reduction in drawings on the secured revolving credit facility of Videotron, TVA Group and Quebecor Media;
  - $71.4 million favourable impact of exchange rate fluctuations. The consolidated debt reduction attributable to this item was offset by the decrease in the asset (or increase in the liability) related to cross-currency swap agreements entered under “Derivative financial instruments”;
  - $28.8 million decrease in the bank indebtedness of Quebecor Media and Videotron;
  - $12.8 million decrease in Quebecor’s debt.
- Additions to debt in 2020 essentially consisted of:
  - $7.7 million increase in debt attributable to changes in fair value related to hedged interest risk.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $597.1 million at December 31, 2020 compared with $677.7 million at December 31, 2019. The $80.6 million net unfavourable variance was mainly due to the unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments.
- On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of 3.125% Senior Notes maturing on January 15, 2031, for net proceeds of $644.1 million, net of financing fees of $5.9 million. Videotron intends to use the proceeds from this offering for general corporate purposes, including, without limitation, the repayment of a portion of its current debt.
- Quebecor’s $50.0 million revolving credit facility expired on July 15, 2020 and was not renewed.
- On February 11, 2021, TVA Group amended its $75.0 million secured revolving credit facility to extend its term from February 2021 to February 2022 and amend certain terms and conditions. On February 21, 2020, TVA Group had lowered the limit on the facility from $150.0 million to $75.0 million and amended certain terms and conditions.

Financial Position

Net available liquidity: $2.58 billion at December 31, 2020 for Quebecor and its wholly owned subsidiaries, pro forma the issuance by Videotron of Senior Notes in the aggregate principal amount of $650.0 million on January 22, 2021, consisting of available unused revolving credit facilities in the amount of $1.80 billion, and cash and cash equivalents of $781.5 million.

Consolidated debt (long-term debt plus bank indebtedness)**:** $5.78 billion at December 31, 2020, a $211.8 million decrease compared with December 31, 2019; $80.6 million net unfavourable variance in assets and liabilities related to derivative financial instruments (see “Financing activities” above).

- Consolidated debt essentially consisted of Videotron’s $4.11 billion debt ($4.25 billion at December 31, 2019); TVA Group’s $28.8 million debt ($44.9 million at December 31, 2019); Quebecor Media’s $1.59 billion debt ($1.64 billion at December 31, 2019); and Quebecor’s $45.9 million debt ($58.7 million at December 31, 2019).

Consolidated net debt leverage ratio: 2.68x at December 31, 2020 compared with 2.91x at December 31, 2019. The decrease was due primarily to net reductions in drawings on the revolving credit facilities and bank indebtedness, as the case may be, by Videotron, TVA Group, Quebecor Media and Quebecor, using free cash flows from continuing operating activities, and the increase in the trailing 12-month adjusted EBITDA.

As at December 31, 2020, minimum principal payments on long-term debt in the coming years are as follows:

Table 4
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2021	$	28.5
2022		1,062.5
2023		1,593.4
2024		763.5
2025		400.0
2026 and thereafter		1,938.5
Total	**$**	**5,786.4**

From time to time, Quebecor may (but is under no obligation to) seek to retire or purchase its outstanding securities, including debentures, in open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor's consolidated debt was approximately 4.3 years as of December 31, 2020 (4.9 years pro forma the issuance by Videotron of Senior Notes in the aggregate principal amount of $650.0 million on January 22, 2021) compared with 5.2 years as of December 31, 2019. After taking into account hedging instruments, debt consisted of approximately 96.1% fixed-rate debt (96.6% pro forma the issuance of the Senior Notes on January 22, 2021), compared with 93.9% as at December 31, 2019, and 3.9% floating-rate debt (3.4% pro forma the issuance of the Senior Notes on January 22, 2021), compared with 6.1% as at December 31, 2019.

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt repayments, pension plan contributions, share repurchases, and dividend payments to shareholders. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. The key indicators listed in those financing agreements include debt service coverage ratio and debt ratio (long-term debt over adjusted EBITDA). At December 31, 2020, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

On February 24, 2021, the Board of Directors of Quebecor declared a quarterly dividend of $0.275 per share on its Class A Shares and Class B Shares, payable on April 6, 2021 to shareholders of record as of the record date of March 12, 2021.

Convertible debentures

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on November 4, 2020 on Quebecor Class B Shares triggered an adjustment to the floor price and ceiling price then in effect. Accordingly, effective November 19, 2020, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $26.20 per share (that is, a maximum number of approximately 5,724,218 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $32.76 per share (that is, a minimum number of approximately 4,579,374 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

Analysis of consolidated balance sheet at December 31, 2020

Table 5
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2020 and 2019
(in millions of Canadian dollars)

	Dec. 31, 2020	Dec. 31, 2019	Difference	Main reasons for difference
Assets				
Cash and cash equivalents	**$ 136.7**	$ 14.0	$ 122.7	Impact of current variances in activity
Accounts receivable	**600.6**	548.0	52.6	Impact of current variances in activity
Property, plant and equipment	**3,189.2**	3,415.9	(226.7)	Depreciation for the period less additions to property, plant and equipment
Intangible assets	**1,466.7**	1,444.0	22.7	Additions to intangible assets less amortization for the period
Goodwill	**2,714.0**	2,692.9	21.1	Acquisition of Télédistribution Amos and its network by the Telecommunications segment
Derivative financial instruments[1]	**597.1**	677.7	(80.6)	See “Financing Activities”
Other assets	**396.8**	248.7	148.1	Impact of current variances in operating and investing activities
Liabilities				
Accounts payable and accrued charges	**872.2**	809.6	62.6	Impact of current variances in activity
Long-term debt, including short-term portion and bank indebtedness	**5,775.1**	5,986.9	(211.8)	See “Financing Activities”
Deferred income taxes[2]	**802.7**	828.0	(25.3)	Impact of variances in activity on consolidated statement of income and consolidated statement of comprehensive income
Other liabilities	**422.8**	371.2	51.6	Loss on remeasurement of defined benefit plans, partially offset by an adjustment on the contingent consideration related to the sale of 4Degrees Colocation

1 Long-term assets less long-term liabilities.
2 Long-term liabilities less long-term assets.

ADDITIONAL INFORMATION

Contractual Obligations

At December 31, 2020, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; convertible debentures and lease liabilities; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 6 below shows a summary of these contractual obligations.

Table 6
Contractual obligations of Quebecor as of December 31, 2020
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 5,786.4**	$ 28.5	$ 2,655.9	$ 1,163.5	$ 1,938.5
Convertible debentures[2]	**150.0**	–	–	150.0	–
Interest payments[3]	**1,188.4**	246.9	471.0	251.6	218.9
Lease liabilities	**173.3**	34.3	52.9	29.8	56.3
Interest payments on lease liabilities	**48.5**	7.7	11.4	7.5	21.9
Additions to property, plant and equipment and other commitments	**1,355.4**	383.6	403.7	275.1	293.0
Derivative financial instruments[4]	**(538.0)**	1.6	(479.2)	(101.3)	40.9
Total contractual obligations	**$ 8,164.0**	**$ 702.6**	**$ 3,115.7**	**$ 1,776.2**	**$ 2,569.5**

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.
2 Based on the market value at December 31, 2020 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of approximately $26.20 per share and a ceiling price of approximately $32.76. The Corporation may also redeem convertible debentures by issuing the corresponding number of its Class B Shares.
3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2020.
4 Estimated future receipts, net of future disbursements, on derivative financial instruments related to foreign exchange hedging on the principal of U.S -dollars-denominated debt.

Significant commitments included in Table 6

Videotron has 20-year service sharing and exchange agreements with Rogers Communications Inc. to build out and operate an LTE network in Québec and the Ottawa area. It also has an agreement with Comcast Corporation to develop an innovative Internet Protocol Television (“IPTV”) delivery solution, as well as agreements for the roll-out of LTE-A and 5G technologies and the purchase of mobile devices. As at December 31, 2020, the balance of those commitments stood at $646.6 million.

The Quebecor Out of Home division has agreements with various Québec transit commissions for the installation and maintenance of bus shelters, and for advertising rights on bus shelters and buses. As at December 31, 2020, the balance of those commitments stood at $105.1 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2020, the balance of those commitments stood at $483.5 million.

Table 7 presents lease liabilities by segment at December 31, 2020 and December 31, 2019:

Table 7
Lease liabilities by segment
(in millions of Canadian dollars)

	Dec. 30, 2020	Dec. 31, 2019
Telecommunications	**$ 142.3**	$ 114.2
Media	**13.4**	13.5
Sports and Entertainment	**44.1**	40.8
Head Office	**(26.5)**	(30.6)
Total	**$ 173.3**	$ 137.9

Pension plan contributions

The expected employer contributions to the Corporation's defined benefit pension plans and post-retirement benefit plans will be $34.2 million in 2021, based on the most recent financial actuarial reports filed (contributions of $29.3 million were paid in 2020).

Related party transactions

The Corporation made sales to affiliated corporations in the amount of $3.7 million in 2020 ($3.8 million in 2019). These transactions were accounted for at the consideration agreed between parties.

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items in the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of business, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued in the consolidated balance sheets with respect to these indemnifications.

Capital stock

In accordance with Canadian financial reporting standards, Table 8 presents information on the Corporation's capital stock as at February 4, 2021. In addition, 3,630,959 share options were outstanding as of February 4, 2021.

Table 8
Capital stock
(in shares and millions of Canadian dollars)

	February 4, 2021		
	Issued and outstanding		**Book value**
Class A Shares	**77,039,034**	**$**	**8.6**
Class B Shares	**169,983,857**	**$**	**1,002.4**

On August 5, 2020, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On August 7, 2020, the Corporation announced that it had entered into an automatic securities purchase plan ("the plan") with a designated broker whereby shares may be repurchased under the plan at times when such purchases would otherwise be prohibited pursuant to regulatory restrictions or self-imposed blackout periods. The plan received prior approval from the Toronto Stock Exchange. It came into effect on August 15, 2020 and terminates on the same date as the normal course issuer bid.

Under the plan, before entering a self-imposed blackout period, the Corporation may, but is not required to, ask the designated broker to make purchases under the normal course issuer bid. Such purchases shall be made at the discretion of the designated broker, within parameters established by the Corporation prior to the blackout periods. Outside the blackout periods, purchases will be made at the discretion of the Corporation's management.

In 2020, the Corporation purchased and cancelled 6,457,050 Class B Shares for a total cash consideration of $201.2 million (3,107,356 Class B Shares for a total cash consideration of $94.6 million in the same period of 2019). The excess of $163.1 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings (an increase of the deficit of $76.3 million in 2019).

In 2019, 680,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $8.3 million. Following this transaction, the contributed surplus was increased by $12.7 million and the stock option plan liability was reduced by the same amount.

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Increased competition from non-traditional sources

Quebecor Media faces technological substitution across all its key business segments. Due to ongoing technological developments, the distinction between broadcasting, Internet and wireline and mobile telephony platforms is fading rapidly. For instance, content producers and providers are leveraging their content rights and pursuing strategies to deploy their own OTT distribution platforms in order to reach consumers directly via the Internet. By doing so, content producers and providers are less dependent on content aggregators, such as Videotron. The Internet, including through mobile devices, provides an important broadcasting and distribution service. More specifically, an increasing number of Quebecor Media's customers are using mobile devices as their primary means of video entertainment; therefore, in direct competition with its television and Internet access services. In addition, mobile operators, through the development of their mobile networks, offer wireless and fixed wireless Internet services, which compete with Quebecor Media's Internet access service. Due to the converging nature of technological advances, Quebecor Media expects increasing competition from non-traditional businesses, which may affect its overall business strategy and could adversely affect its business, financial condition and results of operations.

Competition and technological development

In its television business, Quebecor Media competes against incumbent local exchange carriers ("ILECs") and third-party Internet access ("TPIA") providers. These competitors have rolled out their own IPTV service in the vast majority of the territory in which Quebecor Media operates.

The rapidly growing landscape of OTT content providers, many of which having substantial financial resources, now compete directly for viewership and a share of the monthly entertainment spend. Furthermore, the OTT content providers' attractive price points (which are in part due to the fact that they do not contribute financially to the Canadian traditional television business model or Internet infrastructure and are not subject to Canadian Radio-television and Telecommunications Commission ("CRTC") regulations) may make Quebecor Media's traditional offer less appealing for its customers and may affect its ability to retain and acquire customers. Consequently, this could place Quebecor Media at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial condition and results of operations. Also, foreign OTT content providers with no Canadian place of business are not required to charge federal and provincial sales tax (except in Saskatchewan and Québec). Given that Quebecor Media's clients, notably its Club illico subscribers, must be charged GST when they purchase Quebecor Media's services, Quebecor Media is at a competitive disadvantage.

Furthermore, Quebecor Media faces competition from illegal providers of television services and illegal access to non-Canadian direct broadcast satellite ("DBS") signal (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy).

In its Internet access business, Quebecor Media faces competition from several resellers who have access to the wholesale TPIA service mandated by the CRTC. The recently revised wholesale rates, if upheld by the CRTC following a pending review and vary application, will provide TPIA providers with a cost structure that could lead to increased competition either from established TPIA providers or new entrants. These TPIA providers may also provide telephony and networking applications and have entered the IPTV market. Their market share is significant and growing, especially in Québec and Ontario, the two regions in Canada where they have been particularly active and aggressively pricing their services.

Quebecor Media also competes against other Internet service providers ("ISPs") offering residential and commercial Internet access services as well as fixed wireless access and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line, fibre to the node and fibre to the home technologies, in certain cases offering download speeds comparable, or superior to Quebecor Media's. In addition, satellite operators such as Xplornet, Telesat and Starlink are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in low population density and remote locations and claiming future download speeds comparable to Quebecor Media's low and medium download speeds. Finally, certain municipalities also plan to build and operate their own broadband networks. They plan to do so through public/private partnership arrangements, competing directly with Quebecor Media in some of its local markets.

Quebecor Media's wireline business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators and other providers of Voice over Internet Protocol ("VoIP") and cloud-based telephony. Some of these competitors are not facility-based and therefore have much lower infrastructure costs. In addition, Internet protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations.

In its mobile telephony business, Quebecor Media competes against a mix of market participants, some of them active in its territory in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current adjunct technologies, such as Wi-Fi, “hotspots” or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those Quebecor Media provides or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and have been operating for many years lower-cost mobile telephony brands in order to acquire additional market share. Furthermore, the decisions to be taken by the CRTC with regards to a new regulatory framework for mobile services stand to have a significant impact on Quebecor Media’s competitive environment, as Quebecor Media could see the emergence of non facility-based operators (mobile virtual network operators “MVNOs”) with mandated access to the networks of facility-based operators. Quebecor Media may not be able to compete successfully in the future against existing and such potential new competitors; increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

Finally, many of its competitors are offering special bundling discounts to customers who subscribe to two or more of their services (television, Internet access, wireline and mobile telephony services). Should Quebecor Media fail to keep its existing customers and lose them to such competitors, it may end up losing a subscriber for multiple services as a result of its bundling strategy. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operations.

Fierce price competition in all Quebecor Media’s businesses and across the industries in which it operates, combined with the declining demand for certain traditional products, may affect Quebecor Media’s ability to raise the price of its products and services commensurately with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operations.

Capital to address significant and rapid technological changes

New technologies in the telecommunication industry are evolving faster than the historical investment cycle in the industry. Their introduction and pace of adoption could result in requirements for additional capital investments not currently planned, as well as shorter estimated useful lives for certain of Quebecor Media’s existing assets. Quebecor Media’s strategy of maintaining a leadership position in the suite of products and services it offers and of launching new products and services requires capital investments in its networks, information technology systems and infrastructure, as well as the acquisition of spectrum to support growth in its customer base and its demands for increased bandwidth capacity and other services.

Quebecor Media must continually invest in its services, networks and technologies due to the rapid evolution of technologies, or it may be required to acquire, develop or integrate new technologies. Improvements in its services depend on many factors. The cost of the acquisition, development or implementation of new technologies and spectrum could be significant and Quebecor Media’s ability to fund such acquisition, development or implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition and results of operations.

5G technology is evolving rapidly. Canada’s first standards-based commercial launches were announced in 2020 and 5G coverage will expand over the upcoming years. The 5G ecosystem operates on multiple frequency bands, including the 600 MHz spectrum acquired in 2019 by Videotron. However, 3.5 GHz spectrum is becoming a primary band for 5G mobile coverage. ISED Canada is scheduled to hold an auction of 3.5 GHz frequencies beginning in June 2021. There is a risk that Quebecor Media may not be able to purchase the 3.5 GHz spectrum required to compete equally on network speeds and 5G capacity. Any such difficulty or inability to compete could have a material adverse effect on Quebecor Media’s business, reputation, prospects, financial condition, and results of operations.

In the past, Quebecor Media has required substantial capital for the upgrade, expansion and maintenance of its networks and the launch and deployment of new or additional services. Quebecor Media expects that additional capital expenditures will continue to be required in the short-term, mid-term and long-term in order to maintain, expand and enhance its networks systems and services, including expenditures relating to the deployment of LTE-Advanced/5G mobile technologies. Moreover, additional investments in Quebecor Media’s business may not translate into incremental revenues, cash flows or profitability.

Epidemics, pandemics and other public health emergencies

The COVID-19 pandemic has had a significant impact on the economic environment in Canada and around the world. The overall impact on Quebecor Media’s business and activities is still uncertain and cannot be evaluated with precision despite recent developments relating to vaccines, considering future developments such as the spread of the virus, the expected date of termination of the crisis, the risks associated with potential future waves of the virus, its impact on consumer spending, labour shortages due to the virus, the continuing disruption in the supply chain and the effectiveness or the strictness of the actions taken by the federal and

Québec governments to manage the pandemic. Public and private sector regulations, policies and other measures aimed at reducing the spread of the COVID-19 pandemic include the suspension of business activities deemed non-essential when needed, restrictions on the movement of personnel, the promotion of physical and social distancing, lockdown orders, border closures, travel bans, self-imposed quarantine periods, self-isolation, and the adoption of work-from-home and online education by companies, schools and institutions.

Potential adverse impacts of the COVID-19 pandemic include, but are not limited to: (i) a reduction in demand for Quebecor Media's products or services, or an increase in delinquent or unpaid bills, due to job losses and associated financial hardship; (ii) a decline in revenues as a result of services provided at no cost to customers; (iii) a decline in access fees for speciality television services and exclusive on-demand content due to the postponement or cancellation of sporting events; (iv) the temporary suspension of most of Quebecor Media's content production activities, a reduction in the availability of external content, and therefore a reduction in its ability to provide the content and programming that its customers expect; (v) a downgrade or cancellation of customer services; (vi) issues delivering Quebecor Media's products and services; (vii) lost revenues due to the significant economic challenges that small and medium-sized business customers are facing; (viii) lower advertising revenues and reduced film and audiovisual content activity in the Media segment; (ix) delays or cancellations of shows and events, and interruption of music and book distribution activities in the Sports and Entertainment segment; (x) uncertainty associated with the costs and availability of resources required to provide appropriate levels of service to customers; (xi) additional capital expenditures, and uncertainty associated with costs, delays and the availability of resources required to maintain, upgrade or expand Videotron's network in order to accommodate increased network usage, and to expand its self-install and self-serve programs in order to attract new customers; (xii) unexpected increase of user data demand and increased pressure on Videotron's network capacity, which could negatively affect its network's performance, availability, speed, consistency and its ability to provide services; (xiii) the ability of certain suppliers and vendors to provide products and services to Quebecor Media; (xiv) the impact of legislation, regulations and other government interventions in response to the COVID-19 pandemic; (xv) the negative impact on global credit and capital markets; and (xvi) the ability to access capital markets at a reasonable cost or at all. Any of these risks and uncertainties could have a material adverse impact on Quebecor Media's business, prospects, results of operations and financial condition.

The outbreak of the COVID-19 pandemic has resulted in significant economic interventions by the federal, provincial, and municipal governments throughout Canada, which include, notably, grants, wage subsidies, incentives, increased assistance programs and loans, as well as temporary relief measures put in place by regulatory agencies to support certain economic activities, industries or major employers. There can be no assurance that these economic mitigation measures will continue at their present levels or at all, thereby resulting in Quebecor Media's operations and financial condition being adversely affected.

Ongoing access to spectrum

Wireless, video and broadband services are undergoing rapid and significant technological changes and a dramatic increase in usage – in particular, from the demand for faster and seamless usage of video and data across mobile and fixed devices. It is projected that this demand will further accelerate, driven by the following increases: levels of broadband penetration; need for personal connectivity and networking; teleworking; affordability of mobile devices; multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. Quebecor Media will have to acquire additional spectrum in order to address this increased demand. The ability to acquire additional spectrum at a reasonable price or at all is dependent on competition level as well as the spectrum auction timing and rules. In previous auctions, ISED Canada has used, and Quebecor Media has benefited from, certain measures to support competition, which notably included set-asides and spectrum aggregation limits ensuring that a minimum amount of spectrum was effectively reserved for eligible facilities-based telecommunication service providers that were not national incumbent wireless carriers. There can be no assurance that these pro-competition measures will be used again by ISED Canada in future auctions, or that Quebecor Media will be or remain eligible to benefit from such measures. If Quebecor Media is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

Roaming agreements

Quebecor Media has entered into roaming agreements with multiple carriers around the world and has thereby established worldwide coverage for its customers. Should it be unable to extend its worldwide coverage, or to renew or substitute for these roaming agreements on acceptable terms, Quebecor Media may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably. In addition, if Quebecor Media is unable to renew, or substitute for, these roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, prospects, revenues, financial condition and results of operations could be adversely affected.

Increasing proportion of customers with no fixed-term contracts

Given rising costs of mobile devices and marginal technological advancements in mobile devices, consumers tend to keep their mobile devices for longer periods of time, thereby increasing the proportion of wireless customers without fixed term contracts. Such customers are under no contractual obligation to remain with a specific carrier for a fixed term. Moreover, Quebecor Media customers who bring their own device receive wireless services without entering into fixed term contracts. In addition, new technologies now embedded in a growing number of mobile devices, including the eSIM or embedded-SIM, will, once widely adopted, allow customers to switch between carriers without the use of a carrier-provided SIM card. This could have a material adverse effect on Quebecor Media's churn rate and, consequently, on its business, prospects, revenues, financial condition and results of operations.

Inventory obsolescence

Quebecor Media's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, or minimum order quantities from its suppliers, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations.

Capital expenditures

There can be no assurance that Quebecor Media will be able to generate or otherwise obtain the funds to implement its business strategies and finance its capital expenditure programs or other investment requirements, whether through cash from operations, additional borrowings or other sources of funding. If Quebecor Media is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected.

Access to support structures

Quebecor Media requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable and mobile networks. Where access to the structures of telephone utilities cannot be secured, Quebecor Media may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the "*Telecommunications Act*"). Quebecor Media has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies in its service territory. Should Quebecor Media seek to renew or to renegotiate these agreements, it cannot guarantee that these agreements will continue to be available on their respective terms, on acceptable terms, or at all, which may place Quebecor Media at a competitive disadvantage and which may have a material adverse effect on its business and prospects.

Successful implementation of business and operating strategies

Quebecor Media's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, enhancing its advanced broadband network, developing high quality and premium content, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its business. Quebecor Media may not be able to implement these strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement these strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased dependence on third-party suppliers and service providers, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, any restrictive measures put in place in order to contain an outbreak of a contagious disease or other adverse public health development, and other factors described in this section. Any material failure to implement its strategies could have an adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, Quebecor Media has entered into certain agreements with third parties under which it is committed to making significant operating and capital expenditures in the future in order to offer new products and services to its customers. It can provide no assurance that it will be successful in developing such new products and services in relation to these engagements, including the marketing of new revenue sources.

Consumer trends to abandon traditional telephony and television services

The recent trend towards mobile substitution (when users cancel their wireline telephony services and opt exclusively for mobile telephony services) is largely the result of the increasing mobile penetration rate in Canada. In addition, there is also a consumer trend to abandon, substitute or reduce traditional television services for Internet access services allowing customers to stream directly from broadcasters and OTT content providers. Consequently, Quebecor Media may not be successful in converting its existing wireline telephony and television subscriber base to its mobile telephony services, its Internet access services or its OTT entertainment platforms, which could have a material adverse effect on its business, prospects, revenues, results of operations and financial condition.

Rapid growth

Quebecor Media has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses in which it participates, under appropriate conditions. Quebecor Media can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, Quebecor Media's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, prospects, results of operations and financial condition. Furthermore, if Quebecor Media is not successful in managing its growth, or if Quebecor Media is required to incur significant or unforeseen costs, its business, prospects, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

Quebecor Media has made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that Quebecor Media will not be able to achieve the benefits it expects from its investments in the same timeline as its other businesses; and, specifically with regards to the Videotron Centre, that it might not be able to maximize its profitability due to the fact that it does not have a main tenant nor operate in a major market, which makes it harder to attract international talents.

Implementation of changes to the structure of its business

Quebecor Media has and will continue to implement changes to the structure of its business due to many factors, such as the necessity of a corporate restructuring, a system replacement or upgrade, a process redesign, and the integration of business acquisitions or existing business units. These changes must be managed carefully to ensure that Quebecor Media captures the intended benefits. The implementation process may negatively impact overall customer experience and may lead to greater-than-expected operational challenges, costs and expenses, customer losses, and business disruption for Quebecor Media, all of which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

Quebecor's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and Quebecor's failure to recruit, train, deploy and retain such employees could have a material adverse effect on its business, prospects, results of operations and financial condition. In addition, in order to implement and manage its businesses and operating strategies effectively, Quebecor must sustain a high level of efficiency and performance, maintain content quality, continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If Quebecor is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

The media industry has experienced fundamental and permanent structural changes. The growth of the Internet has presented alternative content distribution options that compete with traditional media, and an increasing number of non-traditional providers are developing technologies to satisfy the demand for entertainment and information content. Furthermore, Quebecor Media's customers have an increased control over the manner, content and timing of their media consumption, including through new technologies that give consumers greater flexibility to fast forward or skip advertisements within Quebecor Media's programming. These alternative technologies and new content distribution options have increased audience fragmentation, reduced the Corporation's Media segment business' audience, readership and circulation levels and have had an adverse effect on advertising revenues from local, regional and national advertisers.

Advertising revenue is the primary source of revenue for the Corporation's Media segment. As a result of those structural changes, competition for advertising spend in traditional media comes mainly from digital media technologies, which have introduced a wide variety of media distribution platforms for consumers and advertisers. These new competitors also include digital advertising giants with greater financial resources and a controlling share of the online advertising market thus reducing demand in some segments of Quebecor Media's traditional media advertising inventories. In addition, foreign digital advertising giants currently operate in Canada without being subject to its fiscal environment, therefore increasing Quebecor Media's disadvantage. Furthermore, the international consolidation of advertising agencies is disrupting the demand model as some of its clients now negotiate through these consolidated positions, therefore putting additional pressure on market prices.

The continuous technological improvements to the Internet and the access to unlimited data, combined with higher download speeds, may continue to divert a portion of the Corporation's Media segment business' existing customer base from traditional media to digital media technology, which could adversely impact the demand for its services. The ability of the Corporation's Media segment to succeed over the long-term depends on various factors, including Quebecor Media's ability to attract advertisers and consumers to its own digital platforms. In addition, even if successful, Quebecor Media can provide no assurance that it will be able to recover the costs associated with the implementation of these digital initiatives through incremental revenues, cash flows or profitability.

As the media market continues to change and fragment, Quebecor Media expects its readership, circulation and audience to reduce and its advertising revenues, business, prospects, results of operations and financial condition could be materially adversely affected.

Finally, Quebecor Media's revenues and operating results in these businesses depend on the relative strength of the economy in Quebecor Media's principal markets, as well as the strength or weakness of local, regional and national economic factors. Since a significant portion of Quebecor Media's advertising revenues is derived from retail, automotive and consumer packaged goods sector advertisers, weakness in these sectors has had and may continue to have an adverse impact on the revenues and results of operations of the Corporation's Media segment.

Distribution, production and acquisition of original programming

The financial performance of its television, Club illico and mobile services depends in large part on Quebecor Media's ability to distribute a wide range of appealing video programming on its platforms and on its ability to produce and acquire original content on an ongoing basis.

In its telecommunications business, Quebecor Media obtains television programming rights from suppliers pursuant to programming contracts. In recent years, these suppliers have become vertically integrated and are now more limited in number. Quebecor Media may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, Quebecor Media's inability to obtain programming at reasonable rates or its inability to pass rate increases through to its customers could have a material adverse effect on its business, prospects, results of operations and financial condition.

Increased competition in the television industry from local and foreign OTT content providers with access to substantial financial resources may result in a competitive disadvantage from a content perspective and may have a material adverse effect on Quebecor Media's business, prospects, revenues, financial conditions and results of operations. Notably, on September 28, 2017, the Minister of Canadian Heritage and Netflix concluded an arrangement pursuant to which Netflix undertakes to invest a minimum of $500 million in original productions in Canada over the next five years, while not required to charge provincial (except in Saskatchewan and Québec) and federal sales taxes or to contribute financially to the Canadian traditional television business model or Internet infrastructure. This arrangement may exert upward pressure on content price.

Furthermore, on November 3, 2020, the federal government introduced Bill C-10 which proposes to amend the *Broadcasting Act* (Canada) (the "*Broadcasting Act*") in order to include foreign OTT content providers in Canada's regulatory framework. Similarly to Netflix's arrangement, such bill would force them to promote Canadian cultural products and make material expenditures in order to support local cultural production. If adopted, this bill could put an even greater pressure on the price of content.

Launch of new products and services

Quebecor Media is investing in the launch of new products and services. During the period immediately following the launch of a new product or service, revenues are generally relatively modest, while initial operating expenses may prove more substantial. Furthermore, although Quebecor Media believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize or may never materialize.

Single-clustered network

Quebecor Media provides its television, Internet access, wireline telephony and mobile telephony services through a primary headend and a series of local headends in a single-clustered network. Despite available emergency backup or replacement sites, automatic failover systems, and disaster recovery measures, a failure in Quebecor Media's primary headend, including exogenous threats, such as cyber-attacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its networks until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation, and could have a material adverse effect on its financial condition.

Reputation

Quebecor Media has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While Quebecor Media has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, there can be no assurance that these measures will be effective to prevent violations or perceived violations of the law or ethical business practices. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Protection of personal data

The ordinary course of Quebecor Media's businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, and personally identifiable information of its customers and employees, whether in its systems, infrastructure, networks and processes, or those of its suppliers. Quebecor Media faces risks inherent in protecting the security of such personal data. In particular, Quebecor Media faces a number of challenges in protecting the data contained and hosted on its systems, or those belonging to its suppliers, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although Quebecor Media has developed and maintains systems, processes and security controls that are designed to protect personally identifiable information of its clients, employees or business partners, Quebecor Media may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breaches relating to such data that Quebecor Media stores or processes or that its suppliers store or process. As a result, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

On June 12, 2020, Québec's Minister of Justice introduced Bill 64, *An Act to modernize legislative provisions as regards the protection of personal information*. The purpose of this bill is to modify the obligations of public bodies and private sector enterprises by modernizing the framework applicable to the protection of personal information. On November 17, 2020, Canada's Minister of Innovation, Science and Industry introduced Bill C-11, the *Digital Charter Implementation Act*, *2020*, which will create new and enhanced obligations for private-sector organizations. If passed, these bills are expected to impose new obligations on Quebecor Media and add important deterrent powers to the authorities in charge of their application. Federal and provincial legislation in the area of privacy and personal information is constantly evolving and is expected to undergo significant changes in the coming years. Quebecor Media does not expect compliance with this legislation to threaten its business, but it may incur significant costs to update its security systems, processes and controls, which could have a material adverse effect on its financial condition.

Cybersecurity

Although Quebecor Media has implemented and regularly reviews and updates processes and procedures to protect against customers and business service interruption, unauthorized access to or use of sensitive data, including data of its customers, and to prevent data loss or theft, and although ever-evolving cyber-threats require Quebecor Media to continually evaluate and adapt its systems, infrastructure, networks and processes, Quebecor Media cannot assure that its systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against unauthorized access by third parties or errors by employees or by third-party suppliers. Quebecor Media is also at risk from increasingly sophisticated phishing attacks, SIM swaps, fraudulent ports and other types of frauds. If Quebecor Media is subject to a significant cyber-attack or breach, unauthorized access, errors of third-party suppliers or other security breaches, Quebecor Media may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and Quebecor Media may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

The costs associated with a major cyber-attack could also include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues and customers from business interruption and litigation. Quebecor Media's contractual risk transfers do not eliminate the risk completely and the potential costs associated with these attacks could exceed the scope and limits of the insurance coverage it maintains.

Protection from piracy

Quebecor Media may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its networks, digital programming, and Internet access services. It uses encryption technology to protect its television signals and OTT service from unauthorized access and to control programming access based on subscription packages. It may not be able to develop or acquire adequate technology to prevent unauthorized access to its networks, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Malicious and abusive Internet practices

Quebecor Media's cable, mobile and fibre-optic connectivity business customers utilize its networks to access the Internet and, as a consequence, Quebecor Media or they may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms and other destructive or disruptive software. These activities could have adverse consequences on its networks and its customers, including deterioration of service, excessive call volume to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its networks. Any significant loss of cable, mobile or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, results of operations, and financial condition.

Dependence on information technology systems

The day-to-day operation of Quebecor Media's business is highly dependent on information technology systems, including those of certain third-party suppliers, some of which are based in territories with potential geopolitical risk. Furthermore, its business relies on the use of numerous distinct information technology systems, billing systems, sales channels, databases as well as different rate plans, promotions and product offerings, which make its operations increasingly complex and may unfavourably impact its response time to market trends and the risk of billing or service errors. An inability to maintain and enhance its existing IT systems or obtain new systems to accommodate additional customer growth or to support new products and services could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, manage operating expenses and carry out operations without interruption; all of which may have a material adverse effect on its business, prospects, results of operations and financial condition.

Quebecor Media has entered into strategic relationships with service providers to ensure that the technology it adopts and invests in is the best in class in its industry. An inability to maintain these relationships or difficulties implementing its technology roadmap could result in higher capital requirements, prolonged development timelines and substandard performance of its products and services.

Products and services supplied to Quebecor Media by third-party suppliers may contain latent security issues, including, but not limited to, software and hardware security issues, that would not be apparent upon a diligent inspection. Failure to identify and remedy those issues may result in significant customer dissatisfaction, loss of revenues, and could adversely impact its results of operations and financial condition.

Third-party suppliers and providers

Quebecor Media depends on third-party suppliers and providers for certain services, hardware, licensed technological platforms and equipment that are, or may become, critical to its operations and network evolution. These materials and services include end-user terminals such as set-top boxes, gateways, Wi-Fi routers, mobile telephony handsets, network equipment such as wireline and telephony modems, servers and routers, fibre-optic cable, telephony switches, inter-city links, support structures, licensed technological platforms, external cloud-based services and network functions, services and operational software, the "backbone" telecommunications network for its Internet access, telephony services and mobile services, and construction services for the expansion of and upgrades to its wireline and wireless networks. These services, platforms and equipment are available from a single or limited number of suppliers and Quebecor Media therefore faces the risks of supply disruption, including due to geopolitical events, external events such as climate change related impacts, epidemics, pandemics or other public health issues, business difficulties, restructuring, or supply-chain issues. If no supplier can provide Quebecor Media with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards or that are compatible with its other equipment and software, its business, financial condition and results of operations could be materially adversely affected. In addition, if Quebecor Media is unable to obtain critical equipment, software, services or other items on a timely basis and at an acceptable cost, its ability to offer its products and services and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

Moreover, as there is a limited number of manufacturers of mobile devices and customer premises equipment ("CPE"), there is a risk that Quebecor Media will not be able to maintain agreements for their existing supply on commercially reasonable terms. The rising mobile device and CPE costs, in a price-sensitive market, could negatively impact Quebecor Media's revenues, financial condition and results of operations, as it may not be able to pass on to customers a corresponding increase in the price of its products. Furthermore, some of Quebecor Media's competitors benefit from higher purchasing volumes which provide them the ability to negotiate better prices from manufacturers.

In addition, Quebecor Media obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If

Quebecor Media is unable to renegotiate commercially acceptable arrangements with these content providers, comply with their technological requirements or find alternative sources of equivalent content, its operations may be adversely affected.

Litigation and other claims

In the normal course of business, Quebecor is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on Quebecor's reputation, results of operations, liquidity or financial condition, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Intellectual property rights

Quebecor Media relies on its intellectual property, such as copyrights, trademarks and trade secrets, as well as licenses and other agreements with its vendors and other third parties, to use various technologies, conduct its operations and sell its products and services. Legal challenges to its intellectual property rights, or the ones of third-party suppliers, and claims of intellectual property infringement by third parties could require that it enters into royalty or licensing agreements on unfavourable terms, incur substantial monetary liability, or be enjoined preliminarily or permanently from further use of the intellectual property in question or from the continuation of its businesses as currently conducted. Quebecor Media may need to change its business practices if any of these events occur, which may limit its ability to compete effectively and could have an adverse effect on its results of operations. In the event that it believes any such challenges or claims are without merit, they can nonetheless be time-consuming and costly to defend and divert management's attention and resources away from its businesses. Moreover, if Quebecor Media is unable to obtain or continue to obtain licenses from its vendors and other third parties on reasonable terms, its businesses could be adversely affected.

Piracy and other unauthorized uses of content are made easier, and the enforcement of Quebecor Media's intellectual property rights is made more challenging, by technological advances. The steps Quebecor Media has taken to protect its intellectual property may not prevent the misappropriation of its proprietary rights. Quebecor Media may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to Quebecor Media's. Also, Quebecor Media may not be able to discover or determine the extent of any unauthorized use of its proprietary rights. Unauthorized use of its intellectual property rights may increase the cost of protecting these rights or reduce its revenues. Quebecor Media cannot be sure that any legal actions against such infringers will be successful, even when its rights have been infringed.

Strikes, other labour protests and health risks affecting employees

Quebecor Media is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that Quebecor Media will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial condition, results of operations and reputation. Even should Quebecor Media not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Health threats to employees resulting from epidemics, pandemics or other public health issues could adversely affect Quebecor Media's business, assets, financial conditions, results of operations and reputation.

The COVID-19 pandemic has accelerated Quebecor Media's adoption of a remote work policy establishing guidelines for its employees when working from home. Remote work arrangements of its employees and those of certain of its suppliers could introduce additional operating risks including, but not limited to, confidentiality risks, privacy risks, information security risks, health and safety risks and impair Quebecor Media's ability to manage its business. This situation could also result in an increase in the number of legal proceedings and other claims related to the pursuit of its activities outside of its usual premises.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of Quebecor Media's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund these pension plans will not increase in the future and therefore negatively impact its operating results and financial condition. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes, gateways, mobile devices and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are only partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations and financial condition.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2020, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favourable terms, or at all, in the future or, pursuant to the terms of these hedging transactions, its counterparties thereto may owe the Corporation significant amounts of money and may be unable to honour such obligations, all of which could have an adverse effect on its results of operations and financial condition.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2020, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $597.1 million on a consolidated basis.

Some of its suppliers source their products out of the U.S.; therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations in the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations and financial condition.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Some of Quebecor's debt has a variable rate of interest linked to various interest rate benchmarks, such as the London Inter-Bank Offered Rate ("LIBOR") or the Canadian Dollar Offered Rate ("CDOR"). It is expected that interest rates benchmarks such as LIBOR and CDOR will be reformed or will be discontinued and replaced with alternative interest rate benchmark rates which meet new regulatory and market requirements. The consequence of this development cannot be entirely predicted but could include an increase in the cost of its variable rate indebtedness.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, pandemics, epidemics and other public health issues, ongoing changes in regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to maintain a cash balance until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products, a declining level of retail and commercial activity and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as these could adversely impact Quebecor's results of operations, cash flows, financial condition and prospects.

Asset impairment charges

In the past, the Corporation has recorded asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flows.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset or the terms of such dispositions may be overly restrictive to us or may result in unfavorable post-closing price adjustments if some conditions are not met, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In Quebecor Media's Telecommunications business, the competition to offer products in the best available commercial retail spaces is fierce. Some of its telecommunications business competitors have pursued a strategy of selling their products through independent retailers, in major retail chains and convenience stores, via telemarketing campaigns and via home delivery to extend their presence on the market and some of its competitors have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of Quebecor Media's retail network and places it at a competitive disadvantage, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Rising adoption of web-based and application-based channels

To better meet the changing habits and expectations of consumers and businesses, Quebecor Media's telecommunications business' competitors are rapidly developing digital platforms, which allow them to sell and distribute their products on web-based or application-based channels and to shift customer interaction to digital platforms driving more self-help, self-install and self-service. If Quebecor Media does not succeed in implementing and pursuing its own digital strategy and fails to evolve its customer experience in line with customers' demands, this could place Quebecor Media at a competitive disadvantage, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Government acts and regulations risks

Quebecor Media's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licenses. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. Quebecor Media's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licenses, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. Quebecor Media's wireless and wireline operations are also subject to technical requirements, license conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

Changes to the laws, regulations and policies governing Quebecor Media's operations, the introduction of new laws, regulations, policies or terms of license, the issuance of new licenses, including additional spectrum licenses, to its competitors, or changes in the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), prospects, results of operations and financial condition. In addition, Quebecor Media may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply.

The CRTC has launched a comprehensive review of the wireless market. The Canadian Government has requested that the CRTC consider competition, affordability, consumer interests and innovation in its decisions. This review could result in the introduction of mandatory resale in the wireless marketplace and the emergence of MVNOs in the mobile telephony industry. This material increase in competition in Quebecor Media’s mobile telephony business could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

In addition, laws relating to communications, data protection, e-commerce, direct marketing and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes in the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

TPIAs access to our cable network

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide TPIA providers with access to their networks at mandated cost-based rates. Numerous TPIA providers are interconnected to Quebecor Media’s cable network and are thereby providing retail Internet access services as well as, in some cases, retail VoIP and IP-based television distribution services.

In a series of decisions since 2015, the CRTC has reemphasized the importance it gives to mandated wholesale access arrangements as a driver of competition in the retail Internet access market. Among other things, the CRTC has ordered all of the major telephone and cable companies, including Videotron, to provide new disaggregated wholesale access services, which are to replace existing aggregated wholesale access services after a transition period. These new disaggregated services will include mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. On August 15, 2019, the CRTC introduced a flat rate for wholesale Internet access independent of access speed and also ordered that new access and capacity rates be applied retroactively to March 31, 2016. Those new proposed rates are substantially lower than interim rates and could represent a reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and a retrospective reduction of approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. A coalition of cable companies (including Videotron) has filed an application with the CRTC to review and vary its rating decision. The implementation of the new rates has been suspended while this application is considered. If the CRTC’s decision is ultimately upheld in its current form, it will significantly reduce Videotron’s wholesale Internet service revenues. In addition, it will significantly change the competitive landscape and will allow Internet resellers to adopt more aggressive pricing strategies in the retail market. This could lead to a loss of Quebecor Media’s subscribers, affect its ability to recover the costs of providing these services, reduce the incentives to invest in its networks and have a material adverse effect on its ability to successfully compete.

License renewals

Videotron’s AWS-1 licenses were renewed in December 2018 for a 20-year term. A public consultation to determine the license fees to be paid during the renewal term has not yet been initiated.

Videotron’s other spectrum licenses, including in the AWS-3, 700 MHz, 2500 MHz and 600 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of these terms, Quebecor Media expects that new licenses will be issued for subsequent terms through a renewal process, unless a breach of licence conditions has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licenses, including the terms and conditions of the new licenses and whether license fees should apply for a subsequent license term, are expected to be determined by ISED Canada.

If, at the end of their respective term, the licenses are not renewed on acceptable terms, or at all, Quebecor Media’s ability to continue to offer its wireless services, or to offer new services, may be negatively impacted and, consequently, it could have a material adverse effect on its business, prospects, results of operations and financial condition.

Government programs

Quebecor Media takes advantage of several government programs designed to support production and distribution of televisual and cinematographic products and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that Quebecor Media may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes in the policies or rules of application in Canada or in any of its provinces in connection with these government incentive programs, including any change in the Québec or the federal programs providing for refundable tax credits, could increase the cost of acquiring and producing Canadian programs which are required to be broadcast and which could have a material adverse effect on its results of operations and financial condition. Canadian content programming is also subject to certification by various agencies of the federal government. If programming fails to so qualify, the Corporation would not be able to use the programs to meet Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

In addition, the Canadian and provincial governments currently provide grants, incentives and tax credits to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of Quebecor Media's film production and audiovisual services business, content producers for its broadcasting operations, as well as its production and distribution business, finance a portion of their production budgets through these grants, incentives and tax credits. There can be no assurance that these grants, incentives and tax credits will continue at their present levels or at all, and if they are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced, as a result of which the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions. Some producers may select locations other than Québec to take advantage of other tax credit programs. Other factors, such as director or star preference, may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation's business, results of operations and financial condition.

Environmental laws and regulations and climate change

Quebecor Media is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, including electronic waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern Quebecor Media's operations. Failure to comply with present or future laws or regulations could result in substantial liability for Quebecor Media.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have implemented Extended Producer Responsibility regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products", which sets certain recovery targets and which may require Quebecor Media to monitor and adjust its practices in the future. Evolving public expectations with respect to the environment and increasingly stringent laws and regulations could result in increased costs of compliance, and failure to recognize and adequately respond to them could result in fines, regulatory scrutiny, or have a significant effect on Quebecor Media's reputation and brands.

Quebecor Media's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. Quebecor Media cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to Quebecor Media, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

Quebecor Media owns, through its subsidiaries, certain properties located on partially remediated former landfills. The operation and ownership of these properties carry inherent risks of environmental and health and safety liabilities, including for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs and other environmental damages. Quebecor Media may, from time to time, be involved in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Finally, the effects of global climate change are increasing the severity and frequency of extreme weather-related events and will likely result in increased operational and capital costs. Some of the more significant climate-related risks that were identified include increased operational costs to maintain Quebecor Media's network operations during extreme weather events, and increased capital costs as a result of damage to its facilities and/or equipment.

Concerns about alleged health risks relating to radiofrequency emissions

All Quebecor Media's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied to it meet all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on Quebecor Media's business, prospects, revenues, financial condition and results of operations.

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2020, it had $5.78 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 2020, it had more than $1.85 billion available for additional borrowings under its existing credit facilities on a consolidated basis, and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;
- create liens;
- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments by some subsidiaries;
- enter into transactions with affiliates;
- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities. Its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including Senior Notes. If Quebecor's indebtedness is accelerated, it may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect the Corporation's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flows of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding, and Quebecor Media, Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flows from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flows and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flows to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, prospects, results of operations and financial condition.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor's ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favourable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders, with the exception of matters where the holders of shares of a single class are entitled to vote separately. As of December 31, 2020 approximately 74.30% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of Class A directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing, or deterring a change in control of Quebecor; could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, accounts receivable, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, lease liabilities and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency; and (ii) to achieve a targeted balance of fixed- and floating-rate debts. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 9
Description of derivative financial instruments
As of December 31, 2020
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.3235	$ 207.1	US$ 156.5

Cross-currency interest rate swaps

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Videotron				
5.000% Senior Notes due 2022	2014 to 2022	US$ 543.1	6.01%	0.9983
5.000% Senior Notes due 2022	2012 to 2022	US$ 256.9	5.81%	1.0016
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407

Certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The losses on valuation and translation of financial instruments for 2020 and 2019 are summarized in Table 10.

Table 10
Loss on valuation and translation of financial instruments
((in millions of Canadian dollars)

		2020		2019
Loss on embedded derivatives related to convertible debentures	**$**	**(9.3)**	$	5.7
Other		**1.3**		0.8
	$	**(8.0)**	$	6.5

A loss on cash flow hedges of $17.1 million was recorded under "other comprehensive income" in 2020 (gain of $73.8 million in 2019).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or the Corporation.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's adjusted implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2020 and December 31, 2019 were as follows:

Table 11
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

				2020				2019
Asset (liability)		**Carrying value**		**Fair value**		Carrying value		Fair value
Long-term debt[1]	**$**	**(5,786.4)**	**$**	**(6,216.1)**	$	(5,986.1)	$	(6,376.2)
Convertible debentures[2]		**(153.5)**		**(153.5)**		(162.0)		(162.0)
Derivative financial instruments[3]								
Foreign exchange forward contracts		**(8.0)**		**(8.0)**		(2.1)		(2.1)
Cross-currency interest rate swaps		**605.1**		**605.1**		679.8		679.8

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The fair value of derivative financial instruments designated as cash flow hedges is an asset position of $552.5 million as of December 31, 2020 ($635.5 million in 2019) and the fair value of derivative financial instruments designated as fair value hedges is an asset position of $44.6 million as of December 31, 2020 ($42.2 million in 2019).

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The carrying amounts of financial assets represent the maximum credit exposure.

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. As of December 31, 2020, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2020, the provision for expected credit losses represented 2.5% of the gross amount of accounts receivable and contract assets (2.5% as of December 31, 2019), while 5.0% of trade receivables were 90 days past their billing date (7.2% as of December 31, 2019).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2020 and 2019:

		2020		2019
Balance at beginning of year	**$**	**19.6**	$	20.5
Changes in expected credit losses charged to income		**17.4**		18.8
Write-off		**(16.2)**		(19.7)
Balance at end of year	**$**	**20.8**	$	19.6

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of Quebecor's consolidated debt was approximately 4.3 years as of December 31, 2020 (4.9 years pro forma the issuance by Videotron of Senior Notes in the aggregate principal amount of $650.0 million on January 22, 2021) compared with 5.2 years as of December 31, 2019.

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways, modems, mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2020, and to hedge its exposure on certain purchases of set-top boxes, gateways, modems, mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on "other comprehensive income," before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2020 is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of $0.10	$	**1.0**	$	**48.7**
Decrease of $0.10		**(1.0)**		**(48.7)**

A variance of $0.10 in the 2020 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $5.4 million on the value of unhedged purchases of goods and services and $3.7 million on the value of unhedged acquisitions of tangible and intangible assets in 2020.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency interest rate swap agreements in order to manage cash flow risk exposure. After taking into account hedging instruments, debt consisted of approximately 96.1% fixed-rate debt (96.6% pro forma the issuance by Videotron of Senior Notes in the aggregate principal amount of $650.0 million on January 22, 2021), compared with 93.9% as at December 31, 2019, and 3.9% floating-rate debt (3.4% pro forma the issuance of the Senior Notes on January 22, 2021), compared with 6.1% as at December 31, 2019.

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2020 was $2.0 million.

The estimated sensitivity on income and on "other comprehensive income," before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures, as of December 31, 2020, as per the Corporation's valuation models, is as follows:

Increase (decrease)		Income		Other comprehensive income
Increase of 100 basis points	$	**(1.2)**	$	**(10.0)**
Decrease of 100 basis points		**1.2**		**10.0**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2020 and 2019 is as follows:

Table 12
Capital structure of Quebecor
(in millions of Canadian dollars)

	2020	2019
Bank indebtedness	**$ 1.7**	$ 29.4
Long-term debt	**5,773.4**	5,957.5
Convertible debentures	**150.0**	150.0
Embedded derivatives related to convertible debentures	**6.5**	15.8
Lease liabilities	**173.3**	137.9
Derivative financial instruments	**(597.1)**	(677.7)
Cash and cash equivalents	**(136.7)**	(14.0)
Net liabilities	**5,371.1**	5,598.9
Equity	**$ 1,214.1**	$ 1,072.1

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercompany transactions, and the declaration and payment of dividends or other distributions.

Contingencies and legal disputes

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation’s results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to these legal proceedings.

On August 15, 2019, the CRTC issued an order finalizing the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation’s consolidated financial statements. The new proposed rates are substantially lower than the interim rates and could represent a reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and a retrospective reduction of approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. On September 28, 2020, the CRTC approved a request from a coalition of cable companies (including Videotron) to stay the implementation of the order pertaining to final rates pending its final determination on the review and vary requests. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party's rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as “Deferred revenue” in the consolidated balance sheets. Deferred revenue is usually recognized as revenue in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration is generally comprised of an upfront fee for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.
The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- operating revenues from subscriber services, such as television distribution, Internet access, wireline and mobile telephony, and OTT video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- wireline connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

Media

The Media segment recognizes each of its main activities’ revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines, or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment leasing revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from the distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities’ revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and food and beverage sales are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;

- revenues from the sale of advertising in the form of venue signage or sponsorships are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in CGUs, which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts consider each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond this three-year period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate has been determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

When determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU. Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives, on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2020 was $2.71 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2020 was $741.1 million.

Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments.

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency interest rate swaps to hedge: (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt; and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency interest rate swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency interest rate swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation has established a hedge ratio of one for one for all its hedging relationships as underlying risks of its hedging derivatives are identical to the hedged item risks.

The Corporation measures and records the effectiveness of its hedging relationships as follows.

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates the hedged items’ cash flows.
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies.

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in “other comprehensive income” until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated "other comprehensive income" are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis in the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist mainly of equities and corporate and government fixed-income securities.

Re-measurements of the net defined benefit liability or asset are recognized immediately in "other comprehensive income."

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future and the minimum funding liability is based on a number of assumptions, including future service costs and future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of those assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Stock-based compensation

Stock-based awards to employees that call for settlement in cash, as deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock option awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

Provisions

Provisions are recognized when: (i) the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation; and when (ii) the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time and it is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network, are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

Provision for expected credit losses

The Corporation maintains a provision to cover anticipated credit losses from customers who are unable to pay their debts. The provision is reviewed periodically, considering the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions.

Business acquisition

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the business acquired are recognized at their fair value at the acquisition date. Goodwill initially arising from a business acquisition is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Contingent considerations and future conditional adjustments

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model, requiring management to assess the probabilities that the conditions on which the contingent considerations or the future conditional adjustments are based will be met in the future. The assessment of these contingent and conditional potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

Interpretation of laws and regulations

Interpretation of laws and regulation, including those of the CRTC and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions, income taxes and capital expenditures in the consolidated financial statements.

Tax credits and government assistance

The Corporation has access to several government programs designed to support large investment projects, production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, most of the business units in the Media segment and the Sports and Entertainment segment have qualified for the Emergency Wage Subsidy program available during the health crisis related to the COVID-19. The Corporation also receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the term lease, less incentive payment received, using the Corporation's incremental borrowing rate at that date or interest rate implicit in the lease. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interests on lease liabilities are recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

Non-IFRS Financial Measures

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted EBITDA, adjusted income from continuing operating activities, cash flows from operations, free cash flows from continuing operating activities and consolidated net debt leverage ratio are not calculated in accordance with, or recognized by IFRS. The Corporation's method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

In 2020, the Corporation reviewed the nature and definition of its non-IFRS measures. As a result, "cash flows from segment operations" was abandoned and replaced by the new "cash flows from operations" metric. This metric is now used to measure the cash flows generated by the operations of all the business segments, on a consolidated basis, in addition to the cash flows from operations generated by each segment. Furthermore, calculation of this metric will henceforth be based on additions to property, plant and equipment and to intangible assets rather than cash flows used for additions to property, plant and equipment and to intangible assets. As well, the new metric is calculated without taking into account proceeds on disposals. The Corporation also added the "consolidated net debt leverage ratio" measure. The consolidated net debt leverage ratio represents consolidated net debt excluding convertible debentures divided by the trailing 12-month adjusted EBITDA. Consolidated net debt excluding convertible debentures represents total long-term debt plus bank indebtedness, lease liabilities, the current portion of lease liabilities and liabilities related to derivative financial instruments, less assets related to derivative financial instruments and cash and cash equivalents. The consolidated net debt leverage ratio serves to evaluate the Corporation's financial leverage and is used by management and the Board of Directors in decisions on the Corporation's capital structure, including its financing strategy, and in managing debt maturity risks.

Adjusted EBITDA

In its analysis of operating results, the Corporation defines adjusted EBITDA, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, gain (loss) on valuation and translation of financial instruments, restructuring of operations and other items, income taxes and income (loss) from discontinued operations. Adjusted EBITDA as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted EBITDA in order to assess the performance of its investment in Quebecor Media. The Corporation's management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation's operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted EBITDA is also relevant because it is a significant component of the Corporation's annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation's segments. The Corporation also uses other measures that do reflect such costs, such as cash flows from operations and free cash flows from continuing operating activities. The Corporation's definition of adjusted EBITDA may not be the same as similarly titled measures reported by other companies.

Table 13 provides a reconciliation of adjusted EBITDA to net income as disclosed in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2020 and 2019 presented in Table 13 below is drawn from the Corporation's unaudited quarterly consolidated financial statements.

Net income	**$ 617.4**	$ 658.3	$ 441.8	**$ 168.5**	$ 150.3

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income attributable to shareholders under IFRS, as net income attributable to shareholders before gain (loss) on valuation and translation of financial instruments, restructuring of operations and other items, net of income tax related to adjustments and net income attributable to non-controlling interest related to adjustments, and before income (loss) from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 14 provides a reconciliation of adjusted income from continuing operating activities to the net income attributable to shareholders' measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2020 and 2019 presented in Table 14 below is drawn from the Corporation's unaudited quarterly consolidated financial statements.

Cash flows from operations and free cash flows from continuing operating activities

Cash flows from operations

Cash flows from operations represents adjusted EBITDA, less additions to property, plant and equipment and to intangible assets (excluding licence acquisitions and renewals). Cash flows from operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, repayment of long-term debt and share repurchases. Cash flows from operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. Cash flows from operations is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the operations of all of its segments. The Corporation's definition of cash flows from operations may not be identical to similarly titled measures reported by other companies.

Free cash flows from continuing operating activities

Free cash flows from continuing operating activities represents cash flows provided by continuing operating activities calculated in accordance with IFRS, less cash flows used for additions to property, plant and equipment and to intangible assets (excluding expenditures related to licence acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the Corporation's operations. Free cash flows from continuing operating activities represents available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, repayment of long-term debt and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Tables 15 and 16 provide a reconciliation of cash flows from operations and free cash flows from continuing operating activities to cash flows provided by continuing operating activities reported in the consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2020 and 2019 presented in Tables 15 and 16 is drawn from the Corporation's unaudited quarterly consolidated financial statements.

Consolidated net debt leverage ratio

The consolidated net debt leverage ratio represents consolidated net debt, excluding convertible debentures, divided by the trailing 12-month adjusted EBITDA. Consolidated net debt, excluding convertible debentures, represents total long-term debt plus bank indebtedness, lease liabilities, the current portion of lease liabilities and liabilities related to derivative financial instruments, less assets related to derivative financial instruments and cash and cash equivalents. The consolidated net debt leverage ratio serves to evaluate the Corporation's financial leverage and is used by management and the Board of Directors in decisions on the Corporation's capital structure, including its financing strategy, and in managing debt maturity risks. The consolidated net debt leverage ratio excludes convertible debentures because, subject to certain conditions, those debentures can be repurchased at the Corporation's discretion by issuing Quebecor Class B Shares. Consolidated net debt leverage ratio is not a measure established in accordance with IFRS. It is not intended to be used as an alternative to IFRS measures or the balance sheet to evaluate financial position. The Corporation's definition of consolidated net debt leverage ratio may not be identical to similarly titled measures reported by other companies.

Table 17 provides the calculation of consolidated net debt leverage ratio and the reconciliation to balance sheet items reported in Quebecor's consolidated financial statements.

Table 17

1 Excluding changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

KEY PERFORMANCE INDICATORS

Revenue-generating unit

The Corporation uses RGU, an industry metric, as a key performance indicator. An RGU represents, as the case may be, subscriptions to the Internet access, television and Club illico services, and subscriber connections to the mobile and wireline telephony services. RGU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of RGU may not be the same as identically titled measurements reported by other companies or published by public authorities.

Average billing per unit

The Corporation uses ABPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly average subscription billing per RGU. ABPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ABPU may not be the same as identically titled measurements reported by other companies.

Mobile ABPU is calculated by dividing the average subscription billing for mobile telephony services by the average number of mobile RGUs during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Total ABPU is calculated by dividing the combined average subscription billing for Internet access, television, Club illico, mobile and wireline telephony services by the total average number of RGUs from Internet access, television, mobile and wireline telephony services during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Controls and procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2020, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the timeframes prescribed by this legislation. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation's financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by the Corporation's management during the financial period beginning October 1, 2020 and ending December 31, 2020.

Additional information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request, and on the Web at <www.sedar.com>.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation's actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms "plans," "expects," "may," "anticipates," "intends," "estimates," "projects," "seeks," "believes," or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media's ability to continue successfully developing its network and the facilities that support its mobile services;
- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media's newspapers, television outlets and other media properties;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media's product suites;
- unanticipated higher capital spending required for developing Quebecor Media's network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor's business;
- Quebecor's ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its digital television, Internet access, mobile and wireline telephony and Club illico services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;
- service interruptions resulting from equipment breakdown, network failure, the threat of natural disaster, epidemics, pandemics and other public health crises, including the COVID-19 pandemic, and political instability in some countries;
- impact of emergency measures implemented by various levels of government;
- changes in Quebecor Media's ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media's licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media's ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor's substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect a portion of Quebecor's interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation's circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation's actual results to differ from current expectations, please refer to the "Trend Information," "Risks and Uncertainties" and "Financial Instruments and Financial Risk" sections above, and the Corporation's other public filings, available at <www.sedar.com> and <www.quebecor.com>.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of February 24, 2021, and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

This is Exhibit 59 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR

MANAGEMENT DISCUSSION AND ANALYSIS 2021

TABLE OF CONTENTS

CORPORATE PROFILE

Quebecor Inc. is a holding company that owns all of the shares of Quebecor Media Inc., one of Canada's largest telecommunications and media groups. Quebecor Media Inc.'s subsidiaries operate in the following business segments: Telecommunications, Media, and Sports and Entertainment. Unless the context otherwise requires, in this Management Discussion and Analysis, "Quebecor" and the "Corporation" refer to Quebecor Inc. and its subsidiaries, and "Quebecor Media" refers to Quebecor Media Inc. and its subsidiaries.

Through its Quebecor Media subsidiary, Quebecor is a leading Canadian telecommunications and media company engaged in the following lines of business: mobile and wireline telecommunications; Internet access; television; over-the-top ("OTT") video business telecommunications solutions; broadcasting; soundstage and equipment rental; audiovisual content production and distribution; newspaper publishing and distribution; digital news and entertainment platforms; music streaming; book and magazine publishing and distribution; music production and distribution; out-of-home advertising; operation and management of a world-class arena and an entertainment venue; ownership and management of Quebec Major Junior Hockey League ("QMJHL") teams; concert production, and management and promotion of sporting and cultural events. Through its Videotron Ltd. ("Videotron") subsidiary, Quebecor Media is a leading mobile and wireline communications provider. Quebecor Media also holds leading positions through its Media segment and its Sports and Entertainment segment in the creation, promotion and distribution of entertainment and news, and related Internet services, that are designed to appeal to audiences in every demographic category. Quebecor Media continues to pursue a convergence strategy to capture synergies within its portfolio of properties and to leverage the value of its content across multiple distribution platforms.

All amounts are stated in Canadian dollars ("CAN") unless otherwise indicated.

The Corporation's financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

The Corporation uses non-standardized IFRS financial measures such as adjusted EBITDA, adjusted income from continuing operating activities, adjusted cash flows from operations (formerly "cash flows from operations"), free cash flows from continuing operating activities and consolidated net debt leverage ratio, as well as key performance indicators such as revenue-generating unit ("RGU") and average billing per unit ("ABPU"). Definitions of the non-IFRS measures and key performance indicators used by the Corporation are provided in the "Non-IFRS Measures" and "Key Performance Indicators" sections below.

COVID-19 pandemic

The COVID 19 pandemic has had a significant impact on the economic environment in Canada and around the world. In order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures since the beginning of this health crisis, including the suspension of some business activities. Since March 2020, this health crisis has curtailed the operations of many of Quebecor's business partners and has led to a significant slowdown in some of the Corporation's segments. Among other impacts, depending on circumstances, the restrictions and preventive measures imposed by the Québec government have caused a reduction in volume at Videotron's retail outlets; a reduction in advertising revenues, in sports events broadcast by the TVA Sports specialty channel and in film and audiovisual content activity in the Media segment; and the cancellation of most shows and events in the Sports and Entertainment segment. Due to the decrease in their revenues, most of the business units in the Media segment and Sports and Entertainment segment qualified for the Canadian Emergency Wage Subsidy, and subsidies totalling $12.2 million were recorded in 2021 as a reduction in employee costs ($49.6 million in 2020).

The impact of the COVID-19 health crisis on the operating results of the Corporation's business segments in 2021 is analyzed in greater detail in the "Segmented Analysis" section below. It is difficult at this stage to foresee all the consequences of this crisis, including the potential effects of another major wave. The public health crisis could have a material adverse impact on the growth of the Corporation's operating results and cash flows in the short and medium terms. As a result, the growth recorded during the quarters preceding the health crisis may not be indicative of future growth.

HIGHLIGHTS

2021 financial year

Revenues: $4.55 billion, a $236.6 million (5.5%) increase.

Adjusted EBITDA[1]: $1.97 billion, a $20.6 million (1.1%) increase, despite the $12.6 million unfavourable impact of recognition of a one-time item in the Telecommunications segment in 2020.

Net income attributable to shareholders: $578.4 million ($2.38 per basic share) in 2021, a decrease of $28.8 million ($0.03 per basic share).

Adjusted income from continuing operating activities[1]: $621.9 million ($2.55 per basic share) in 2021, an increase of $27.4 million ($0.19 per basic share).

Adjusted cash flows from operations[1]: $1.38 billion in 2021, a $69.7 million (5.3%) increase.

Cash flows provided by continuing operating activities: $1.18 billion in 2021, a $248.9 million (-17.4%) decrease.

Fourth quarter 2021

Revenues: $1.18 billion, a $37.1 million (3.2%) increase.

Adjusted EBITDA: $498.8 million, a $28.0 million (-5.3%) decrease.

Net income attributable to shareholders: $160.5 million ($0.67 per basic share) in the fourth quarter of 2021, an favourable variance of $0.7 million ($0.03 per basic share).

Adjusted income from continuing operating activities: $157.6 million ($0.66 per basic share) in the fourth quarter of 2021, a decrease of $7.4 million.

Adjusted cash flows from operations: $370.6 million, a $25.4 million (7.4%) increase.

Cash flows provided by continuing operating activities: $323.1 million, a $53.9 million (-14.3%) decrease.

Telecommunications

- The Telecommunications segment grew its revenues by $112.4 million (3.1%) and its adjusted EBITDA by $11.3 million (0.6%) in 2021.
- Videotron increased its revenues from mobile services and equipment ($73.2 million or 8.0%), Internet access ($70.0 million or 6.2%) and wireline equipment ($52.3 million or 34.5%) in 2021.
- Net increase of 41,700 revenue-generating units (“RGUs”) (0.7%) in 2021, including 120,800 connections (8.2%) to the mobile telephony service and 44,000 subscriptions (2.4%) to the Internet access service.

[1] See “Non-IFRS Financial Measures” below.

- On September 9, 2021, Videotron and TVA Sports announced a partnership with the Lions de Trois-Rivières, the new ECHL hockey team. The new Trois-Rivières arena is named the “Colisée Vidéotron” and TVA Sports is the exclusive official broadcaster of the Lions’ home games as they begin their first season.
- On August 17, 2021, Videotron launched Vrai, a new Québec subscription platform that will meet the strong demand for unscripted lifestyle, documentary and entertainment content. In its first year, Vrai offered thousands of hours of all-French, on-demand content, including more than a hundred new original Québec productions.
- On July 29, 2021, Quebecor announced an investment of nearly $830.0 million in the acquisition by Videotron of 294 blocks of spectrum in the 3500 MHz band across the country. More than half of the investment is concentrated in four Canadian provinces outside Québec: Ontario, Manitoba, Alberta and British Columbia.
- On June 4, 2021, Jean-François Pruneau resigned as President and Chief Executive Officer of Videotron to pursue personal investment projects. Pierre Karl Péladeau, President and Chief Executive Officer of Quebecor, took over as President of Videotron.
- On May 12, 2021, Videotron announced the roll-out of its 5G network in Québec City, following the successful launch in Montréal in December 2020. With its increased speed, expanded connectivity and minimal latency, 5G will open up a world of possibilities for Québec City customers.
- On April 15, 2021, the Canadian Radio-television and Telecommunications Commission (“CRTC”) announced that some telecommunications providers may be given access to the wireless networks of Canada’s major carriers in order to offer Canadians greater choice and more options at affordable prices. As a result, regional carriers that invest in network infrastructure and spectrum will be able to offer competitive services as mobile virtual network operators in regions where competition is limited.
- On April 1, 2021, Videotron announced the acquisition of Cablovision Warwick Inc. (“Cablovision Warwick”) and its network, which has been serving the municipalities of Warwick, Kingsey Falls and Saint-Félix-de-Kingsey in the Centre-du-Québec region for more than four decades. Cablovision Warwick’s customers will therefore have access to Videotron’s network and its line of products and services.
- On March 22, 2021, Videotron entered into agreements with the Québec government and the government of Canada jointly aimed at achieving government targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron is expanding its high-speed Internet network to connect approximately 37,000 more households and the governments have undertaken to provide financial assistance in the amount of approximately $258.0 million, which will be used in its entirety for the extension of Videotron’s network. In accordance with the terms and conditions of the agreements, a $216.2 million advance was received from the government at program commencement and recorded as restricted cash, with a corresponding amount as a deferred subsidy, on the Corporation’s consolidated balance sheet. In 2021, $53.8 million of these deferred subsidies were recognized as a reduction of additions to property, plant and equipment, upon the realization of the required investments.

Media

- The Media segment grew its revenues by $125.5 million (19.3%) and its adjusted EBITDA by $1.2 million (1.5%) in 2021.
- On September 15, 2021, Quebecor unveiled the new QUB digital platform, which brings together all of its news and entertainment content in one place. Available on the Internet and via a mobile app, QUB is differentiated by its vast quantity of multi-source, multi-format content, including text, music, video and audio, available live or on demand on a single platform to support discoverability.
- On July 16, 2021, TVA Group Inc. (“TVA Group”) announced that the studios of Canadian film and television industry leader MELS will be enlarged with the construction of MELS 4, with the support of Investissement Québec and the City of Montréal. The project will strengthen MELS’ position on the market for foreign blockbusters and series.
- On April 14, 2021, France Lauzière took time off from her professional duties for family reasons. On October 29, 2021, Ms. Lauzière resigned from her position as President and Chief Executive Officer of TVA Group and Chief Content Officer of Quebecor Content, for the same reasons. After joining the Corporation in 2001, she was instrumental in strengthening TVA’s dominant position as Québec’s television leader. Ms. Lauzière remains available to work with the company on strategic projects and to contribute her expertise in content. Pierre Karl Péladeau, President and Chief Executive Officer of Quebecor, continues to serve as Acting President of TVA Group and Quebecor Content.

Sports and Entertainment

- The Sports and Entertainment segment grew its revenues by $9.0 million (5.7%) and its adjusted EBITDA by $11.7 million in 2021.
- On October 6, 2021, Event Management Gestev Inc., an entity in the Sports and Entertainment segment, became the new manager of the Cabaret du Casino de Montréal. It is now operating the acoustically superior multipurpose venue and presenting unique programming for thousands of guests.
- On February 1, 2021, the Sports and Entertainment segment acquired Les Disques Audiogramme inc. (“Disques Audiogramme”), the largest independent French-language record label in North America, which also includes Éditorial Avenue, Canada’s largest French-language music publisher, in order to continue supporting talented Québec artists and promoting the dissemination of Québec music.

Investing and financing operations

- On February 23, 2022, the Board of Directors of Quebecor declared a quarterly dividend of $0.30 per share on its Class A Multiple Voting Shares (“Class A Shares”) and Class B Subordinate Voting Shares (“Class B Shares”), a 9% increase.
- On February 15, 2022, TVA Group amended its $75.0 million secured revolving credit facility to extend its term from February 2022 to February 2023 and amend certain terms and conditions.
- In December 2021, Investissement Québec granted TVA Group an interest free unsecured loan for a maximum amount of $25.0 million in order to support the construction of MELS’ fourth production studio. The loan contains certain restrictive covenants as well as typical representations and warranties. As of December 31, 2021, no amount was drawn on the unsecured loan.
- On July 6, 2021, Videotron completed the early redemption of the entirety of its 5.000% Senior Notes due July 15, 2022, in aggregate principal amount of US$800.0 million, at a redemption price of 104.002% of their principal amount, in accordance with a notice issued on June 3, 2021. The related hedges in an asset position were also unwound.
- On July 5, 2021, Quebecor Media completed the early redemption of the entirety of its 6.625% Senior Notes due January 15, 2023, in aggregate principal amount of $500.0 million, at a redemption price of 107.934% of their principal amount, in accordance with a notice issued on June 3, 2021.
- On June 17, 2021, Videotron issued $750.0 million aggregate principal amount of 3.625% Senior Notes due June 15, 2028, for net proceeds of $743.2 million, net of financing costs of $6.8 million. Videotron also issued US$500.0 million aggregate principal amount of 3.625% Senior Notes due June 15, 2029, for net proceeds of $599.6 million, net of financing costs of $5.8 million.
- On April 1, 2021, Alithya Group Inc (“Alithya”), a strategy and digital transformation leader, acquired the firm R3D Conseil inc, (“R3D Conseil”) of which Quebecor was one of the main shareholders. As part of this transaction, Quebecor obtained 11.9% of Alithya’s share capital and 6.7% of voting rights related to Alithya’s issued and outstanding shares. The corresponding $19.6 million gain on disposal was accounted for in the second quarter of 2021. This transaction also includes purchase commitments from Quebecor for Alithya’s services totalling approximately $360.0 million as part of a 10-year commercial agreement.
- On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of 3.125% Senior Notes maturing on January 15, 2031, for net proceeds of $644.0 million, net of financing costs of $6.0 million.

TREND INFORMATION

Competition continues to intensify in the mobile and wireline telephony, Internet access, television and OTT markets. Due to ongoing technological developments, the distinction between those platforms is fading rapidly and the Corporation expects increasing competition from non-traditional businesses across its key business segments. There is also competition from wholesale Internet resellers, which purchase high-speed access services from large companies in order to offer customers their own services. Thus, the subscriber growth recorded in the Telecommunications sector in past years is not necessarily representative of future growth.

Moreover, the Telecommunications segment has in the past required substantial capital for the upgrade, expansion and maintenance of its mobile and wireline networks and the launch and expansion of new or additional services to support growth in its customer base and demand for increased bandwidth capacity and other services. The Corporation expects that additional capital expenditures will be required in the short and medium terms to expand and maintain the Telecommunications segment's systems and services, including expenditures relating to the cost of its mobile services infrastructure, maintenance and enhancement, as well as costs relating to the roll-out of LTE-Advanced/5G technologies. In addition, the demand for wireless data services has been growing constantly and is projected to continue to grow. The anticipated levels of data traffic will represent an increasing challenge to the current mobile network's ability to support this traffic. The Corporation will have to acquire additional spectrum in the future to meet the growing demand.

Some of Quebecor Media's lines of business are cyclical in nature. They are dependent on advertising and, particularly in the newspaper and magazine businesses, on circulation sales. Operating results are therefore sensitive to prevailing economic conditions.

The Media industry has been experiencing fundamental and permanent structural changes. Generalized audience fragmentation has prompted many advertisers to review their media placement strategies and to turn a significant part of their advertising budgets over to international competitors operating solely in digital media. In the broadcasting industry, audiences are increasingly fragmented as viewing habits have shifted toward Internet-based content delivery platforms that allow users greater control over content and timing, such as OTT video services. The Corporation's Media segment has taken steps in order to maintain its leadership position and offer audiences and advertisers alike the best available content, when they want it and on the media platform they want.

Moreover, newspaper and magazine circulation as measured by copies sold has been declining over the past several years in the industry. The traditional run of press advertising for major multimarket retailers has been declining due to a shift in marketing strategy toward other media and to retail industry consolidation. To respond to such competition, the Media segment's operations have developed their Internet presence through branded websites, including specialized websites.

The Sports and Entertainment segment has made significant investments in its efforts to develop the business. The Corporation expects that additional capital expenditures and other investments will be required in order to expand the Sports and Entertainment segment.

In the books and music businesses, digital technology has disrupted buying and consuming habits, particularly with the emergence of vehicles such as music streaming and ebooks, which compete with conventional formats. The Corporation recently developed its own music streaming service, which prominently features Québec music in addition to its international catalogue.

INTEREST IN SUBSIDIARIES

As of December 31, 2021, Quebecor held all the shares of Quebecor Media.

Table 2 shows Quebecor Media's equity interest in its main subsidiaries at December 31, 2021.

Table 2
Quebecor Media's interest (direct and indirect) in its main subsidiaries
As of December 31, 2021

	Percentage of vote	Percentage of equity
Videotron Ltd.	100.0 %	100.0 %
TVA Group Inc.	99.9 %	68.4 %
MediaQMI Inc.	100.0 %	100.0 %
QMI Spectacles inc.	100.0 %	100.0 %

Quebecor Media's interest in its subsidiaries has not varied over the past three years.

2021/2020 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $4.55 billion, a $236.6 million (5.5%) increase.

- Revenues increased in Telecommunications ($112.4 million or 3.1% of segment revenues), Media ($125.5 million or 19.3%), and Sports and Entertainment ($9.0 million or 5.7%).

Adjusted EBITDA: $1.97 billion, a $20.6 million (1.1%) increase.

- Adjusted EBITDA increased in Sports and Entertainment ($11.7 million or 134.5% of segment adjusted EBITDA), Telecommunications ($11.3 million or 0.6%), despite the $12.6 million unfavourable impact of recognition of a one-time item in 2020, and Media ($1.2 million or 1.5%).
- The change in the fair value of Quebecor and Quebecor Media stock options and the value of Quebecor stock-price-based share units resulted in an $8.7 million favourable variance in the Corporation's stock-based compensation charge in 2021 compared with 2020.

Net income attributable to shareholders: $578.4 million ($2.38 per basic share) in 2021, compared with $607.2 million ($2.41 per basic share) in 2020, a decrease of $28.8 million ($0.03 per basic share).

- The main unfavourable variances were:
  - $80.9 million unfavourable variance related to debt refinancing;
  - $33.2 million decrease in income from discontinued operations;
  - $5.2 million increase in financial expenses.
- The main favourable variances were:
  - $35.1 million favourable variance in restructuring of operations and other items;
  - $20.6 million increase in adjusted EBITDA;
  - $19.4 million decrease in the depreciation and amortization charge;
  - $8.8 million decrease in the income tax expense;
  - $6.4 million favourable variance related to gains on valuation and translation of financial instruments, including $5.6 million without any tax consequences.

Adjusted income from continuing operating activities: $621.9 million ($2.55 per basic share) in 2021, compared with $594.5 million ($2.36 per basic share) in 2020, an increase of $27.4 million ($0.19 per basic share).

Adjusted cash flows from operations: $1.38 billion, a $69.7 million (5.3%) increase due to the $49.1 million decrease in additions to property, plant and equipment and to intangible assets, and the $20.6 million increase in adjusted EBITDA.

Cash flows provided by continuing operating activities: $1.18 billion, a $248.9 million decrease due primarily to the unfavourable net change in non-cash balances related to operating activities and the increase in current income taxes.

Depreciation and amortization charge: $783.8 million in 2021, a $19.4 million decrease due mainly to the impact of decreased investment in property, plant and equipment and intangible assets in the Telecommunications segment, including lower spending related to the leasing of set-top boxes.

Financial expenses: $333.4 million in 2021, a $5.2 million increase due primarily to higher average indebtedness, partially offset by the impact of the lower average interest rate on long-term debt.

Gain on valuation and translation of financial instruments: $14.4 million in 2021, a $6.4 million favourable variance due to a favourable variance, without any tax consequences, in gains on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $4.1 million in 2021, a $35.1 million favourable variance.

- A $25.3 million charge was recognized in 2021 in connection with cost-reduction measures in the Corporation's various segments ($31.6 million in 2020). In addition, a $3.1 million gain on other items was recognized in 2021 ($0.9 million in 2020). A $1.5 million charge for impairment of assets was recognized in connection with various restructuring initiatives in 2021 ($8.5 million in 2020).
- On April 1, 2021, Alithya acquired R3D Conseil, of which Quebecor was one of the main shareholders. The corresponding $19.6 million gain on disposal was recognized in 2021.

Loss on debt refinancing: $80.9 million in 2021.

On June 3, 2021, Quebecor Media issued a redemption notice for its Senior Notes in aggregate principal amount of $500.0 million, bearing interest at 6.625% and due January 15, 2023, at a redemption price of 107.934% of their principal amount. Videotron also issued a redemption notice for its Senior Notes in aggregate principal amount of US$800.0 million, bearing interest at 5.000% and due July 15, 2022, at a redemption price of 104.002% of their principal amount. As a result, an $80.9 million net loss was recorded in the consolidated statement of income in 2021.

Income tax expense: $197.0 million in 2021 (effective tax rate of 26.5%), compared with $205.8 million in 2020 (effective tax rate of 26.4%), an $8.8 million favourable variance caused mainly by the impact of the decrease in taxable income. The effective tax rate is calculated considering only taxable and deductible items.

SEGMENTED ANALYSIS

Telecommunications

In Quebecor Media's Telecommunications segment, Videotron is a leading cable operator in Canada and the largest in Québec by wireline RGU. Videotron offers advanced mobile telephony services, including high-speed Internet access, mobile television and many other functionalities supported by smartphones. Videotron also offers Internet access services; digital television distribution services, including video-on-demand, pay-per-view and pay TV; wireline telephony services; and an OTT service. As well, Videotron includes Videotron Business, a full-service business telecommunications provider that offers mobile and wireline telephony, high-speed data transmission, Internet access and television services. Videotron also offers Helix, a technology platform that has revolutionized entertainment and home management with features including voice remote, ultra-intelligent Wi-Fi and support for home automation, all tailored to customer needs and preferences.

2021 operating results

Revenues: $3.74 billion in 2021, a $112.4 million (3.1%) increase.

- Revenues from mobile telephony services increased $54.0 million (8.2%) to $712.5 million, due primarily to an increase in the number of subscriber connections.
- Revenues from Internet access services increased $70.0 million (6.2%) to $1.20 billion, due mainly to an increase in average per-subscriber revenues and subscriber base growth.
- Revenues from television services decreased $67.5 million (-7.5%) to $836.1 million, mainly because of a decrease in average per-subscriber revenues and a decrease in the subscriber base.
- Revenues from wireline telephony services decreased $19.9 million (-5.9%) to $318.5 million, mainly because of the impact of the net decrease in subscriber connections, partially offset by higher average per-connection revenues.
- Revenues from mobile equipment sales to customers increased $19.2 million (7.5%) to $276.4 million, mainly because of price increases, partially offset by a decrease in the number of mobile devices sold.
- Revenues from wireline equipment sales to customers increased $52.3 million (34.5%) to $204.0 million, mainly because of higher volume and prices for equipment sales related to the Helix platform.
- Other revenues increased $4.3 million (2.4%) to $186.1 million.

ABPU: Videotron's total ABPU was $50.33 in 2021 compared with $49.94 in 2020, a $0.39 (0.8%) increase. Mobile ABPU was $49.73 in 2021, compared with $50.85 in 2020, a $1.12 (-2.2%) decrease due in part to the popularity of bring-your-own-device ("BYOD") plans.

Customer statistics

RGUs – The total number of RGUs was 6,189,600 at December 31, 2021, an increase of 41,700 (0.7%) in 2021 compared with an increase of 71,700 in 2020 (Table 3).

Mobile telephony – The number of subscriber connections to the mobile telephony service stood at 1,601,900 at December 31, 2021, an increase of 120,800 (8.2%) in 2021 compared with an increase of 150,600 in 2020 (Table 3).

Internet access – The number of subscribers to the Internet access service stood at 1,840,800 at December 31, 2021, an increase of 44,000 (2.4%) in 2021 compared with an increase of 69,500 in 2020 (Table 3).

Television – The number of subscribers to television services stood at 1,418,600 at December 31, 2021, a decrease of 57,000 (-3.9%) in 2021 compared with a decrease of 56,200 in 2020 (Table 3).

Wireline telephony – The number of subscriber connections to the wireline telephony service stood at 824,900 at December 31, 2021, a decrease of 99,800 (-10.8%) in 2021 compared with a decrease of 102,600 in 2020 (Table 3).

OTT video – The number of subscribers to the OTT video service stood at 503,400 at December 31, 2021, an increase of 33,700 (7.2%) in 2021 compared with an increase of 10,400 in 2020 (Table 3).

Table 3
Telecommunications segment year-end RGUs (2017-2021)
(in thousands of customers)

	2021	2020	2019	2018	2017
Mobile telephony	**1,601.9**	1,481.1	1,330.5	1,153.8	1,024.0
Internet	**1,840.8**	1,796.8	1,727.3	1,704.5	1,666.5
Television	**1,418.6**	1,475.6	1,531.8	1,597.3	1,640.5
Wireline telephony	**824.9**	924.7	1,027.3	1,113.9	1,188.5
OTT video	**503.4**	469.7	459.3	420.8	361.6
Total	**6,189.6**	6,147.9	6,076.2	5,990.3	5,881.1

Adjusted EBITDA: $1.88 billion, a $11.3 million (0.6%) increase due primarily to:

- impact of the net revenue increase, net of the cost of equipment sold.

Partially offset by:

- increases in some operating expenses, including engineering, advertising, IT and administrative expenses;
- $12.6 million unfavourable variance related to recognition of a one-time item in 2020.

Cost/revenue ratio: Employee costs and purchases of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 49.8% in 2021 compared with 48.5% in 2020. The increase was due primarily to the impact of recognition of a one-time item in 2020 and increases in some operating expenses.

Adjusted cash flows from operations: $1.34 billion in 2021 compared with $1.27 billion in 2020 (Table 14). The $70.3 million (5.5%) increase was due to a $48.4 million decrease in additions to intangible assets, including decreased investment in IT systems, an $11.3 million increase in Adjusted EBITDA and a $10.6 million decrease in additions to property, plant and equipment.

Media

In the Media segment, TVA Group operates the largest French-language private television network in North America. TVA Group is the sole owner of 6 of the 10 television stations in the TVA Network, as well as the specialty channels TVA Sports, LCN, addik^{TV}, Prise 2, Yoopa, CASA, MOI ET CIE, Évasion and Zeste. TVA Group also holds interests in two other TVA Network affiliates. As well, TVA Group is engaged in commercial production and custom publishing through its Communications Qolab inc. (“Communications Qolab”) subsidiary. In addition to linear television, TVA Network and the specialty channels broadcast on-demand and streaming content over multiplatform applications, including the TVA+ website and mobile app, which provide free access to TVA Network programs, some specialty channel content, and original content.

Through its subsidiaries, TVA Group owns MELS Studios and Postproduction G.P. and MELS Dubbing Inc., providers of soundstage, equipment and mobile unit rental, postproduction, dubbing and visual effects services to the film and television industries.

Through the companies in the Incendo Media inc. group, TVA Group is engaged in the production and distribution of television programs, movies and series for international markets.

TVA Group publishes more than 50 magazine titles in various categories, including show business, television, fashion and decorating. It also markets digital products associated with the various magazine brands.

The Media segment also operates two paid daily newspapers, *Le Journal de Montréal* and *Le Journal de Québec*, seven days a week. The websites of the paid dailies, journaldemontreal.com and journaldequebec.com, which provide real-time access to the news on mobiles and tablets, lead the news sites in their markets with more than 4.6 million unique visitors per month (source: ComScore Inc., monthly average unduplicated, January to December 2021). According to corporate figures, the aggregate circulation of the paid newspapers as of December 31, 2021 was approximately 1.4 million copies per week in print and electronic formats.

In addition, the Media segment includes NumériQ inc.(“NumériQ”), which brings together digital strategy and content production assets that are harnessed to create digital platforms and content for the Corporation’s various platforms, and operates a number of other digital brands, including *Le Guide de l’auto, Le sac de chips, Pèse sur Start, Silo 57* and *24heures.ca*. NumériQ owns the QUB platform, which offers all the news entertainment content of Quebecor's brands in one place. NumériQ also owns QUB radio, an online and mobile audio platform with a live radio stream and a library of podcasts, and the QUB musique music streaming platform.

The Corporation's apps and websites log a combined total of more than 6.8 million unique visitors per month in Canada (source: ComScore Inc., November 2021).

The Media segment is also engaged in printing newspapers, distributing newspapers and magazines, and out-of-home advertising. In addition, the segment includes QMI Agency, a news agency that provides content to all Quebecor Media properties; Quebecor Media Expertise, which offers Media segment customers integrated, diversified and complete advertising services; Quebecor Content, which contributes to the creation, development, acquisition and distribution of television content and formats; and Elmire Inc., a digital marketing agency.

2021 operating results

Revenues: $776.0 million in 2021, a $125.5 million (19.3%) increase.

- Advertising revenues increased by $68.5 million (24.0%), mainly because of higher advertising revenues at TVA Network and the specialty channels.
- Other revenues increased by $54.6 million (33.2%), mainly because of higher revenues from film production and audiovisual services, increased volume at Communications Qolab, and higher revenues from TVA Network and from production and distribution services.
- Subscription revenues increased by $2.4 million (1.2%).

Adjusted EBITDA: $83.4 million in 2021, a $1.2 million (1.5%) increase due primarily to:

- impact of the revenue increase.

Partially offset by:

- higher broadcast content costs, mainly because of the resumption of play in the National Hockey League ("NHL") in 2021 and the recovery in television activity in general;
- higher labour costs, essentially as a result of increased volume and the impact of the ending of the segment's eligibility for the government measures introduced to deal with the COVID-19 pandemic.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 89.3% in 2021 compared with 87.4% in 2020. The increase was mainly due to a net increase in broadcast content costs and higher labour costs.

Adjusted cash flows from operations: $38.5 million in 2021 compared with $44.2 million in 2020 (Table 14). The $5.7 million decrease was mainly due to a $6.9 million increase in additions to property, plant and equipment and to intangible assets.

Sports and Entertainment

The Sports and Entertainment segment includes management and operation of the Videotron Centre under an agreement between Quebecor Media and Québec City for usage and naming rights to the arena that was ratified in 2011 and runs through 2040. The segment leases the arena, exploits advertising space, generates sponsorship revenues and operates the food concessions at events. The segment's activities also include the production and coproduction of shows presented at the Videotron Centre and other venues. In addition, the Sports and Entertainment segment operates sports and cultural events manager Event Management Gestev Inc., which is the official imprint for shows and events produced in Québec by Quebecor Media.

The Sports and Entertainment segment includes the activities of the QMJHL hockey teams Armada de Blainville-Boisbriand and Remparts de Québec.

The Sports and Entertainment segment also owns the Théâtre Capitole, a performance venue in Québec City, where the segment rents out the space, exploits the advertising spaces, generates sponsorship revenues and may act as copromoter of some events.

Since the fall of 2021, the segment has also managed the Casino de Montréal's performance space under a renewable annual contract. It is the presenter of shows at the venue.

As well, the Sports and Entertainment segment includes educational publisher CEC Publishing Inc.; Sogides Group Inc., which is engaged in general literature publishing through its 18 publishing houses; and Messageries A.D.P. inc., which distributes print books and ebooks, and which is the exclusive distributor for more than 260 Québec and European French-language publishers.

The Sports and Entertainment segment is engaged in music recording and video production (Disques Musicor and MP3) and concert and event production (Musicor Spectacles). In 2021, Musique Select discontinued its distribution and sub-distribution activities for both physical media and digital content.

Also in 2021, the Sports and Entertainment segment acquired Disques Audiogramme, the largest independent French-language record label in North America.

2021 operating results

Revenues: $167.0 million in 2021, a $9.0 million (5.7%) increase due primarily to higher revenues from book distribution and publishing, including educational publishing, and from hockey activities, partially offset by a decrease in revenues from music, mainly because of the discontinuation of physical distribution operations and lower concert revenues.

Adjusted EBITDA: $20.4 million in 2021, an $11.7 million increase due primarily to the impact of the revenue increase.

Adjusted cash flows from operations: $16.1 million in 2021 compared with $5.3 million in 2020 (Table 14). The $10.8 million increase was due primarily to the $11.7 million increase in adjusted EBITDA.

2021/2020 FOURTH QUARTER COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $1.18 billion, a $37.1 million (3.2%) increase.

- Revenues increased in Telecommunications ($12.2 million or 1.3% of segment revenues), Media ($26.6 million or 14.3%), and Sports and Entertainment ($4.4 million or 9.0%).

Adjusted EBITDA: $498.8 million, a $28.0 million (-5.3%) decrease.

- Adjusted EBITDA decreased in Telecommunications ($15.2 million or -3.2% of segment adjusted EBITDA) and in Media ($16.8 million or -36.8%).
- Adjusted EBITDA increased in Sports and Entertainment ($2.1 million).
- The change in the fair value of Quebecor and Quebecor Media stock options and in the value of Quebecor stock-price-based share units resulted in a $5.6 million favourable variance in the Corporation's stock-based compensation charge in the fourth quarter of 2021 compared with the same period of 2020.

Net income attributable to shareholders: $160.5 million ($0.67 per basic share) in the fourth quarter of 2021, compared with $159.8 million ($0.64 per basic share) in the same period of 2020, a favourable variance of $0.7 million ($0.03 per basic share).

- The main favourable variances were:
  - $15.9 million decrease in the depreciation and amortization charge;
  - $8.1 million favourable variance in gains and losses on valuation and translation of financial instruments, including $7.4 million without any tax consequences;
  - $4.7 million favourable variance in non-controlling interest;
- The unfavourable variance was mainly due to:
  - $28.0 million decrease in adjusted EBITDA.

Adjusted income from continuing operating activities: $157.6 million ($0.66 per basic share) in the fourth quarter of 2021, compared with $165.0 million ($0.66 per basic share) in the same period of 2020, a decrease of $7.4 million.

Adjusted cash flows from operations: $370.6 million, a $25.4 million (7.4%) increase due primarily to a $27.1 million decrease in additions to property, plant and equipment and a $26.3 million decrease in additions to intangible assets, partially offset by the $28.0 million decrease in adjusted EBITDA.

Cash flows from continuing operating activities: $323.1 million, a $53.9 million decrease due primarily to the increase in current income taxes and the decrease in adjusted EBITDA, partially offset by the favourable net change in non-cash balances related to operating activities.

Depreciation and amortization charge: $197.6 million in the fourth quarter of 2021, a $15.9 million decrease due mainly to the impact of investments in property, plant and equipment and in intangible assets in the Telecommunications segment, including lower spending related to the leasing of set-top boxes.

Financial expenses: $79.5 million in the fourth quarter of 2021, a $0.4 million increase caused by higher average indebtedness and an unfavourable variance in losses and gains on foreign currency translation of short-term monetary items. Reductions in financial expenses were mainly due to the impact of lower average interest rates on long-term debt.

Gain on valuation and translation of financial instruments: $7.2 million in the fourth quarter of 2021 compared with a $0.9 million loss in the same period of 2020. The $8.1 million favourable variance was due to a $7.4 million favourable variance, without any tax consequences, in gains and losses on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $7.8 million in the fourth quarter of 2021, a $1.7 million unfavourable variance.

- A $7.5 million charge was recognized in the fourth quarter of 2021 in connection with cost-reduction initiatives in the Corporation's various segments ($5.4 million in the fourth quarter of 2020). In addition, a $0.4 million gain on other items was recognized in 2021 ($0.5 million in 2020). In the fourth quarter of 2021, a $0.7 million charge for impairment of assets was also recognized in connection with various restructuring initiatives ($1.2 million in the fourth quarter of 2020).

Income tax expense: $56.6 million in the fourth quarter of 2021 (effective tax rate of 26.5%), compared with $58.1 million in the same period of 2020 (effective tax rate of 25.6%), a $1.5 million favourable variance caused essentially by the impact of the decrease in taxable income.

SEGMENTED ANALYSIS

Telecommunications

Revenues: $953.1 million, a $12.2 million (1.3%) increase due essentially to the same factors as those noted above under "2021/2020 financial year comparison."

- Revenues from the mobile telephony service increased $15.2 million (8.9%) to $185.4 million.
- Revenues from Internet access services increased $9.3 million (3.2%) to $301.6 million.
- Revenues from television services decreased $16.2 million (-7.4%) to $203.8 million.
- Revenues from the wireline telephony service decreased $5.6 million (-6.7%) to $77.7 million.
- Revenues from mobile equipment sales to customers increased $3.5 million (4.5%) to $80.9 million.
- Revenues from wireline equipment sales to customers increased $4.8 million (9.4%) to $55.8 million.
- Other revenues increased $1.2 million (2.6%) to $47.9 million.

ABPU: Videotron's total ABPU was $49.94 in the fourth quarter of 2021, compared with $50.21 in the same period of 2020, a $0.27 (-0.5%) decrease. Mobile ABPU was $48.57 in the fourth quarter of 2021, compared with $50.52 in the same period of 2020, a $1.95 (-3.9%) decrease due in part to the popularity of BYOD plans.

Customer statistics

RGUs – 43,000 (0.7%) unit increase in the fourth quarter of 2021 compared with an increase of 43,000 in the same period of 2020.

Mobile telephony – 30,600 (1.9%) subscriber-connection increase in the fourth quarter of 2021 compared with an increase of 28,500 in the same period of 2020.

Internet access – 8,100 (0.4%) subscriber increase in the fourth quarter of 2021 compared with an increase of 27,000 in the same period of 2020.

Television – 9,400 (-0.7%) subscriber decrease in the fourth quarter of 2021 compared with a decrease of 6,200 in the same period of 2020.

Wireline telephony – 22,500 (-2.7%) subscriber-connection decrease in the fourth quarter of 2021 compared with a decrease of 23,100 in the same period of 2020.

OTT video – 36,200 (7.7%) subscriber increase in the fourth quarter of 2021 compared with an increase of 16,800 in the same period of 2020.

Adjusted EBITDA: $466.5 million, a $15.2 million (-3.2%) decrease due primarily to:

- increases in some operating expenses, including IT, administrative, engineering and advertising costs;
- impact of increases in the cost of equipment sold.

Cost/revenue ratio: Employee costs and purchases of goods and services for all Telecommunications segment operations, expressed as a percentage of revenues, were 51.1% in the fourth quarter of 2021 compared with 48.8% in the same period of 2020. The increase was mainly due to increases in some operating expenses and in the cost of equipment sold.

Adjusted cash flows from operations: $358.3 million in the fourth quarter of 2021 compared with $317.1 million in the same period of 2020 (Table 14). The $41.2 million increase was caused by a $28.9 million decrease in additions to property, plant and equipment due to a general slowdown in investment following a review of the strategic priorities, and a $27.5 million decrease in additions to intangible assets, also due to the strategic priorities review, partially offset by the $15.2 million decrease in adjusted EBITDA.

Media

Revenues: $212.4 million in the fourth quarter of 2021, a $26.6 million (14.3%) increase.

- Advertising revenues increased by $16.9 million (19.5%), mainly because of higher advertising revenues at TVA Network and the specialty channels.
- Other revenues increased by $9.7 million (20.0%), mainly because of increased volume at Communications Qolab and higher revenues from production and distribution services.

Adjusted EBITDA: $28.8 million in the fourth quarter of 2021, a $16.8 million (-36.8%) decrease due primarily to:

- higher broadcast content costs, mainly because of the resumption of play in the NHL in the fourth quarter of 2021 and the recovery in television activity in general;

Partially offset by:

- impact of the revenue increase.

Cost/revenue ratio: Employee costs and purchases of goods and services for the Media segment's operations, expressed as a percentage of revenues, were 86.4% in the fourth quarter of 2021 compared with 75.5% in the same period of 2020. The increase was mainly due to an increase in broadcast content costs.

Adjusted cash flows from operations: $11.5 million in the fourth quarter of 2021 compared with $30.8 million in the same period of 2020 (Table 14). The $19.3 million decrease was mainly due to the $16.8 million decrease in adjusted EBITDA and a $2.5 million increase in additions to property, plant and equipment and to intangible assets.

Sports and Entertainment

Revenues: $53.2 million in the fourth quarter of 2021, a $4.4 million (9.0%) increase due primarily to higher revenues from hockey, music, and book distribution and publishing, partially offset by lower revenues from concerts and sporting events.

Adjusted EBITDA: $4.2 million in the fourth quarter of 2021, a $2.1 million increase due primarily to the impact of the increase in revenues.

Adjusted cash flows from operations: $2.5 million in the fourth quarter of 2021 compared with $1.2 million in the same period of 2020 (Table 14). The $1.3 million increase was due to the $2.1 million increase in adjusted EBITDA, partially offset by a $0.8 million increase in additions to property, plant and equipment and to intangible assets.

2020/2019 FINANCIAL YEAR COMPARISON

Analysis of consolidated results of operations and cash flows of Quebecor

Revenues: $4.32 billion, a $24.0 million (0.6%) increase.

- Revenues increased in Telecommunications ($142.2 million or 4.1% of segment revenues).
- Revenues decreased in Media ($87.5 million or -11.9% of segment revenues) and in Sports and Entertainment ($34.2 million or -17.8%).

Adjusted EBITDA: $1.95 billion, a $73.1 million (3.9%) increase.

- Adjusted EBITDA increased in Telecommunications ($61.0 million or 3.4% of segment adjusted EBITDA), Media ($7.4 million or 9.9%), and Sports and Entertainment ($1.4 million or 19.2%).
- There was a favourable variance at Head Office ($3.3 million).
- The change in the fair value of Quebecor Media stock options resulted in a $1.5 million favourable variance in the stock-based compensation charge in 2020 compared with 2019. The change in the fair value of Quebecor stock options and in the value of Quebecor stock-price-based share units resulted in a $7.2 million favourable variance in the Corporation's stock-based compensation charge in 2020.

Net income attributable to shareholders: $607.2 million ($2.41 per basic share) in 2020, compared with $652.8 million ($2.55 per basic share) in 2019, a decrease of $45.6 million ($0.14 per basic share).

- The main unfavourable variances were:
  - $64.3 million decrease in income from discontinued operations;
  - $52.8 million increase in the depreciation and amortization charge;
  - $10.6 million unfavourable variance in the charge for restructuring of operations and other items.
- The main favourable variances were:
  - $73.1 million increase in adjusted EBITDA;
  - $14.5 million favourable variance in gains and losses on valuation and translation of financial instruments, including $15.0 million without any tax consequences.

Adjusted income from continuing operating activities: $594.5 million ($2.36 per basic share) in 2020, compared with $581.0 million ($2.27 per basic share) in 2019, an increase of $13.5 million ($0.09 per basic share).

Adjusted cash flows from operations: $1.31 billion in 2020, a $168.3 million (14.7%) increase due to a $67.8 million decrease in additions to property, plant and equipment, a $27.4 million decrease in additions to intangible assets, and the $73.1 million increase in adjusted EBITDA.

Cash flows provided by continuing operating activities: $1.43 billion in 2020, a $219.7 million (18.1%) increase due primarily to the favourable net change in non-cash balances related to operating activities and the increase in adjusted EBITDA, partially offset by the increase in current income taxes and the increase in the cash portion related to restructuring of operations and other items.

Depreciation and amortization charge: $803.2 million in 2020, an $52.8 million increase due mainly to the impact of investments in property, plant and equipment and in intangible assets in the Telecommunications segment, including the amortization of intangible assets related to investments in the Helix platform, and the impact of the revision of the depreciation period for some capital assets in the Telecommunications segment in consideration of technological developments, partially offset by lower spending related to the leasing of set-top boxes.

Financial expenses: $328.2 million in 2020, a $0.7 million increase. The impact of higher average interest on the long-term debt was offset by lower average indebtedness.

Gain on valuation and translation of financial instruments: $8.0 million in 2020 compared with a $6.5 million loss in 2019. The $14.5 million favourable variance was due to a $15.0 million favourable variance, without any tax consequences, in the gain on embedded derivatives related to convertible debentures.

Charge for restructuring of operations and other items: $39.2 million in 2020 compared with $28.6 million in 2019, a $10.6 million increase.

- A $30.7 million net restructuring charge was recognized in 2020 in connection with cost-reduction initiatives in the Corporation's various segments ($9.8 million in 2019). An $8.5 million charge for impairment of assets was also recognized in 2020 in connection with restructuring initiatives ($18.8 million in 2019).

Income tax expense: $205.8 million in 2020 (effective tax rate of 26.4%), compared with $205.7 million in 2019 (effective tax rate of 26.6%), a $0.1 million unfavourable variance.

CASH FLOWS AND FINANCIAL POSITION

This section provides an analysis of the Corporation's sources and uses of cash flows, as well as a financial position analysis as of the balance sheet date. This section should be read in conjunction with the discussion of trends under "Trend Information" above, the risk analysis in the "Risks and Uncertainties" section below, and the discussion of the Corporation's financial risks under "Financial Instruments and Financial Risk Management" below.

Operating activities

Cash flows provided by continuing operating activities: $1.18 billion in 2021 compared with $1.43 billion in 2020.

The $248.9 million decrease was mainly due to:

- $227.1 million unfavourable net change in non-cash balances related to operating activities, due primarily to unfavourable variances in accounts receivable, income tax payable, accounts payable and accrued charges, prepaid expenses and inventory, partially offset by the favourable variance in contract assets and deferred revenues;
- $48.2 million increase in current income taxes;
- $5.4 million increase in the cash portion of financial expenses.

Partially offset by:

- $20.6 million increase in adjusted EBITDA;
- $9.6 million favourable variance in the cash portion of restructuring of operations and other items.

The unfavourable net change in non-cash items related to operating activities and the increase in current income taxes had an unfavourable impact on cash flows provided by continuing operating activities in 2021 compared with 2020, while the increase in profitability had a favourable impact.

Working capital: $50.4 million at December 31, 2021 compared with negative $70.4 million at December 31, 2020. The $120.8 million favourable variance was due primarily to an increase in accounts receivable and inventory, partially offset by a decrease in cash and cash equivalents and in contract assets.

Investing activities

Cash flows used for additions to property, plant and equipment: $429.3 million in 2021 compared with $447.2 million in 2020. The $17.9 million decrease mainly reflects a $13.5 million favourable net change in current non-cash items.

Cash flows used for additions to intangible assets: $1.02 billion in 2021 compared with $205.9 million in 2020. The $812.8 million increase mainly reflects Videotron's acquisition of spectrum licences in the 3500 MHz band for a total of $830.0 million.

Proceeds from disposal of assets: $7.7 million in 2021 compared with $4.4 million in 2020.

Net business acquisitions: $21.0 million in 2021 compared with $47.1 million in 2020. The $26.1 million decrease reflects, in part, the acquisition of Télédistribution Amos inc. in 2020 in the Telecommunications segment.

Business disposals: $0.2 million in 2020.

Free cash flows from continuing operating activities[1]

Free cash flows from continuing operating activities: $572.3 million in 2021 compared with $782.8 million in 2020 (Table 15).

The $210.5 million decrease was mainly due to:

- $248.9 million decrease in cash flows provided by continuing operating activities;

Partially offset by:

- $17.9 million decrease in cash flows used for additions to property, plant and equipment;
- $17.2 million decrease in cash flows used for additions to intangible assets, excluding the spectrum licences.

Financing activities

Consolidated debt (long-term debt plus bank indebtedness): $749.3 million increase in 2021; $214.8 million reduction in net assets related to derivative financial instruments.

- Additions to debt in 2021 essentially consisted of:
  - issuance on January 22, 2021 by Videotron of $650.0 million aggregate principal amount of 3.125% Senior Notes maturing on January 15, 2031 for net proceeds of $644.0 million, net of financing costs of $6.0 million;
  - issuance on June 17, 2021 by Videotron of $750.0 million aggregate principal amount of 3.625% Senior Notes maturing on June 15, 2028, for net proceeds of $743.2 million, net of financing costs of $6.8 million. Videotron also issued US$500.0 million aggregate principal amount of 3.625% Senior Notes maturing on June 15, 2029, for net proceeds of $599.6 million, net of financing costs of $5.8 million;
  - $285.0 million increase in Videotron's drawings on its secured revolving credit facility.
- Debt reductions in 2021 essentially consisted of:
  - early redemption by Videotron on July 6, 2021 of the entirety of its 5.000% Senior Notes due July 15, 2022, in aggregate principal amount of US$800.0 million, at a redemption price of 104.002% of their principal amount, in accordance with a notice issued on June 3, 2021;
  - early redemption by Quebecor Media on July 5, 2021 of the entirety of its 6.625% Senior Notes due January 15, 2023, in aggregate principal amount of $500.0 million, at a redemption price of 107.934% of their principal amount, in accordance with a notice issued on June 3, 2021;
  - $22.6 million favourable impact of exchange rate fluctuations. The consolidated debt reduction attributable to this item was offset by the decrease in the asset (or increase in the liability) related to derivative financial instruments;
  - $15.1 million decrease in TVA Group's drawings on its secured revolving credit facility.
- Assets and liabilities related to derivative financial instruments totalled a net asset of $597.1 million at December 31, 2020 compared with $382.3 million at December 31, 2021. The $214.8 million decrease was mainly due to:
  - unwinding of Videotron's hedges in an asset position in connection with the early redemption on July 6, 2021 of its 5.000% Senior Notes in aggregate principal amount of US$800.0 million;
  - unfavourable impact of exchange rate fluctuations on the value of derivative financial instruments;
  - unfavourable impact of interest rate trends in Canada, compared with the United States, on the fair value of derivative financial instruments.
- On February 15, 2022, TVA Group amended its $75.0 million secured revolving credit facility to extend its term from February 2022 to February 2023 and amend certain terms and conditions.

[1] See "Non-IFRS Financial Measures" below.

- In December 2021, Investissement Québec granted TVA Group an interest free unsecured loan for a maximum amount of $25.0 million in order to support the construction of MELS' fourth production studio. The loan contains certain restrictive covenants as well as typical representations and warranties. As of December 31, 2021, no amount was drawn on the unsecured loan.

Financial Position

Net available liquidity: $1.57 billion at December 31, 2021 for Quebecor and its wholly owned subsidiaries, consisting of $1.51 billion in available unused revolving credit facilities and $56.5 million in cash and cash equivalents.

Consolidated debt (long-term debt plus bank indebtedness): $6.52 billion at December 31, 2021, a $749.3 million increase compared with December 31, 2020; $214.8 million reduction in net assets related to derivative financial instruments (see "Financing activities" above).

- Consolidated debt essentially consisted of Videotron's $5.38 billion debt ($4.11 billion at December 31, 2020); TVA Group's $12.0 million debt ($28.8 million at December 31, 2020); Quebecor Media's $1.09 billion debt ($1.59 billion at December 31, 2020); and Quebecor's $44.5 million debt ($45.9 million at December 31, 2020).

As at December 31, 2021, minimum principal payments on long-term debt in the coming years are as follows:

Table 4
Minimum principal payments on Quebecor's long-term debt
12 months ending December 31
(in millions of Canadian dollars)

2022	$	56.5
2023		1,374.2
2024		758.2
2025		400.0
2026		375.0
2027 and thereafter		3,590.1
Total	**$**	**6,554.0**

From time to time, Quebecor may (but is under no obligation to) seek to retire or purchase its outstanding securities, including debentures, in open market purchases, privately negotiated transactions, or otherwise. Such repurchases, if any, will depend on its liquidity position and requirements, prevailing market conditions, contractual restrictions and other factors. The amounts involved may be material.

The weighted average term of Quebecor's consolidated debt was approximately 5.1 years as of December 31, 2021, compared with 4.3 years as of December 31, 2020). After taking into account hedging instruments, the debt consisted of approximately 91.7% fixed-rate debt (96.1% at December 31, 2020) and 8.3% floating-rate debt (3.9% at December 31, 2020).

Management of the Corporation believes that cash flows and available sources of financing should be sufficient to cover committed cash requirements for capital investments, working capital, interest payments, income tax payments, debt and lease repayments, pension plan contributions, share repurchases, and dividend payments to shareholders. The Corporation believes it will be able to meet future debt maturities, which are staggered over the coming years.

Pursuant to its financing agreements, the Corporation is required to maintain certain financial ratios and comply with certain financial covenants. At December 31, 2021, the Corporation was in compliance with all required financial ratios and restrictive covenants in its financing agreements.

Dividends declared

On February 23, 2022, the Board of Directors of Quebecor declared a quarterly dividend of $0.30 per share on its Class A Multiple Voting Shares (“Class A Shares”) and Class B Subordinate Voting Shares (“Class B Shares”), payable on April 5, 2022 to shareholders of record at the close of business on March 11, 2022.

Convertible debentures

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on November 3, 2021 on Quebecor Class B Shares triggered an adjustment to the floor price and ceiling price then in effect. Accordingly, effective November 18, 2021, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $25.49 per share (that is, a maximum number of approximately 5,883,572 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $31.87 per share (that is, a minimum number of approximately 4,706,858 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

Board of directors

After a period of reflection in recent months, Mr. Normand Provost announced that he was leaving his position as director after 17 years on the board of directors of Quebecor Media and 8 years on the board of the Corporation. Over the years, Mr. Provost has notably acted as a member of the Executive Committee of Quebecor Media and as Chairman of the Audit and Risk Management Committee of the Corporation, Quebecor Media and Videotron.

Analysis of consolidated balance sheet at December 31, 2021

Table 5
Consolidated balance sheet of Quebecor
Analysis of main variances between December 31, 2021 and 2020
(in millions of Canadian dollars)

	Dec. 31, 2021[1]	Dec. 31, 2020	Difference	Main reasons for difference
Assets				
Cash and cash equivalents	**$ 64.7**	$ 136.7	$ (72.0)	Cash flows used in investing activities
Accounts receivable	**745.1**	563.6	181.5	Impact of current variances in activities, including increased financing of equipment sales, and current portion of government credits receivable for major capital projects
Contract assets	**129.4**	174.9	(45.5)	Increased financing of equipment sales
Inventories	**282.6**	250.7	31.9	Impact of current variances in activity
Property, plant and equipment	**3,058.7**	3,189.2	(130.5)	Depreciation for the period less additions to property, plant and equipment
Intangible assets	**2,344.1**	1,466.7	877.4	Acquisition of spectrum in the 3500 MHz band, additions to intangible assets and business acquisitions, less amortization for the period
Derivative financial instruments[2]	**382.3**	597.1	(214.8)	See “Financing activities”
Other assets	**521.1**	433.8	87.3	Impact of current variances in operating activities, including the impact of increased financing of equipment sales, and the impact of investing activities
Liabilities				
Income taxes[3]	**40.1**	65.1	(25.0)	Current disbursements less current income taxes for the period
Long-term debt, including short-term portion and bank indebtedness	**6,524.4**	5,775.1	749.3	See “Financing activities”
Other liabilities	**293.2**	422.8	(129.6)	Gain on remeasurement of defined benefit plans less upward adjustment of liabilities related to dismantling of assets

1 The “restricted cash” and “deferred subsidies” line items are combined for purposes of the analysis.
2 Long-term assets less long-term liabilities.
3 Current liabilities less current assets.

ADDITIONAL INFORMATION

Contractual obligations

At December 31, 2021, material contractual obligations of operating activities included: capital repayment and interest on long-term debt; convertible debentures and lease liabilities; capital asset purchases and other commitments; and obligations related to derivative financial instruments, less estimated future receipts on derivative financial instruments. Table 6 below shows a summary of these contractual obligations.

Table 6
Contractual obligations of Quebecor as of December 31, 2021
(in millions of Canadian dollars)

	Total	Under 1 year	1-3 years	3-5 years	5 years or more
Long-term debt[1]	**$ 6,554.0**	$ 56.5	$ 2,132.4	$ 775.0	$ 3,590.1
Convertible debentures[2]	**150.0**	–	150.0	–	–
Interest payments[3]	**1,375.7**	254.1	453.3	338.5	329.8
Lease liabilities	**183.2**	36.1	59.4	28.8	58.9
Interest payments on lease liabilities	**43.9**	7.3	10.5	7.0	19.1
Additions to property, plant and equipment and other commitments	**1,473.8**	322.1	449.9	315.1	386.7
Derivative financial instruments[4]	**(332.8)**	1.6	(354.2)	–	19.8
Total contractual obligations	**$ 9,447.8**	**$ 677.7**	**$ 2,901.3**	**$ 1,464.4**	**$ 4,404.4**

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.
2 Based on the market value at December 31, 2021 of a number of shares obtained by dividing the outstanding principal amount by the market price of a Quebecor Class B share at that date, subject to a floor price of approximately $25.49 per share and a ceiling price of approximately $31.87. The Corporation may also redeem convertible debentures by issuing the corresponding number of its Class B Shares.
3 Estimated interest payable on long-term debt and convertible debentures, based on interest rates, hedging of interest rates and hedging of foreign exchange rates as of December 31, 2021.
4 Estimated future receipts, net of future disbursements, related to foreign exchange hedging on the principal of U.S.-dollar-denominated debt using derivative financial instruments.

Significant commitments included in Table 6

Videotron has 20-year service sharing and exchange agreements with Rogers Communications Inc. to build out and operate an LTE network in Québec and the Ottawa area. It also has an agreement with Comcast Corporation to develop an innovative Internet Protocol Television ("IPTV") delivery solution, as well as agreements for the roll-out of LTE-A and 5G technologies and the purchase of mobile devices. As at December 31, 2021, the balance of those commitments stood at $425.2 million.

The Quebecor Out of Home division has agreements with various Québec transit commissions for the installation and maintenance of bus shelters, and for advertising rights on bus shelters and buses. As at December 31, 2021, the balance of those commitments stood at $96.3 million.

In the normal course of business, the Media segment, through TVA Group, contracts commitments regarding broadcast rights for television programs, sporting events and films, as well as distribution rights for audiovisual content. As at December 31, 2021, the balance of those commitments stood at $459.4 million.

Pension plan contributions

The expected employer contributions to the Corporation’s defined benefit pension plans and post-retirement benefit plans will be $38.2 million in 2022, based on the most recent financial actuarial reports filed (contributions of $39.8 million were paid in 2021).

Related party transactions

During the year ended December 31, 2021, the Corporation incurred expenses to affiliated corporations in the amount of $13.3 million ($12.6 million in 2020), which included the purchase of goods and services, and acquired property, plant and equipment and intangible assets from affiliated corporations in the amount of $4.6 million (nil in 2020). The Corporation also made sales to affiliated corporations in the amount of $7.8 million in 2021 ($3.7 million in 2020). These transactions were accounted for at the consideration agreed between parties.

Off-balance sheet arrangements

Guarantees

In the normal course of business, the Corporation enters into numerous agreements containing guarantees, including the following:

Business and asset disposals

In the sale of all or part of a business or an asset, in addition to possible indemnification relating to failure to perform covenants and breach of representations or warranties, the Corporation may agree to indemnify against claims related to the past conduct of the business. Typically, the term and amount of such indemnification will be limited by the agreement. The nature of these indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay to guaranteed parties. The Corporation has not accrued any amount in respect of these items on the consolidated balance sheets.

Outsourcing companies and suppliers

In the normal course of its operations, the Corporation enters into contractual agreements with outsourcing companies and suppliers. In some cases, the Corporation agrees to provide indemnifications in the event of legal procedures initiated against them. In other cases, the Corporation provides indemnification to counterparties for damages resulting from the outsourcing companies and suppliers. The nature of the indemnification agreements prevents the Corporation from estimating the maximum potential liability it could be required to pay. No amount has been accrued on the consolidated balance sheets with respect to these indemnifications.

Capital stock

In accordance with Canadian financial reporting standards, Table 7 presents information on the Corporation's capital stock as at February 3, 2022. In addition, 2,319,600 share options were outstanding as of February 3, 2022.

Table 7
Capital stock
(in shares and millions of Canadian dollars)

	February 3, 2022		
	Issued and outstanding		**Book value**
Class A Shares	**76,984,034**	**$**	**8.6**
Class B Shares	**162,273,507**	**$**	**956.6**

On August 4, 2021, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On August 6, 2021, the Corporation entered into an automatic securities purchase plan ("the plan") with a designated broker whereby shares may be repurchased under the plan at times when such purchases would otherwise be prohibited pursuant to regulatory restrictions or self-imposed blackout periods. The plan received prior approval from the Toronto Stock Exchange. It came into effect on August 15, 2021 and will terminate on the same date as the normal course issuer bid.

Under the plan, before entering a self-imposed blackout period, the Corporation may, but is not required to, ask the designated broker to make purchases under the normal course issuer bid. Such purchases shall be made at the discretion of the designated broker, within parameters established by the Corporation prior to the blackout periods. Outside the blackout periods, purchases will be made at the discretion of the Corporation's management.

In 2021, the Corporation purchased and cancelled 8,914,650 Class B Shares for a total cash consideration of $282.4 million (6,457,050 Class B Shares for a total cash consideration of $201.2 million in 2020). The excess of $229.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded as a reduction of retained earnings ($163.1 million in 2020).

Risks and Uncertainties

The Corporation operates in the telecommunications, media, and sports and entertainment industries, which entails a variety of risk factors and uncertainties. The Corporation's operating environment and financial results may be materially affected by the risks and uncertainties discussed below.

Increased competition from non-traditional sources

The Corporation faces technological substitution across all its key business segments. Due to ongoing technological developments, the distinction between broadcasting, Internet and wireline and mobile telephony platforms is fading rapidly. For instance, content producers and providers are leveraging their content rights and pursuing strategies to deploy their own OTT distribution platforms in order to reach consumers directly via the Internet. By doing so, content producers and providers are less dependent on content aggregators, such as Videotron. The Internet, including through mobile devices, provides an important broadcasting and distribution service. More specifically, an increasing number of the Corporation's customers are using mobile devices as their primary means of video entertainment; therefore, in direct competition with its television and wireline Internet access services. In addition, mobile operators, through the development of their mobile networks, offer wireless and fixed wireless Internet services, which compete with the Corporation's wireline Internet access service. Due to the converging nature of technological advances, the Corporation expects increasing competition from non-traditional businesses, which may affect its overall business strategy and could adversely affect its business, financial condition and results of operations.

Competition and technological development

In its television business, the Corporation competes against incumbent local exchange carriers ("ILECs") and third-party Internet access ("TPIA") providers. These competitors have rolled out their own IPTV service in the vast majority of the territory in which the Corporation operates.

The rapidly growing landscape of OTT content providers, many of which having substantial financial resources, now compete directly for viewership and a share of the monthly entertainment spend. Furthermore, the OTT content providers' attractive price points (which are in part due to the fact that they do not contribute financially to the Canadian traditional television business model or Internet infrastructure and are not subject to Canadian Radio-television and Telecommunications Commission ("CRTC") regulations) may make the Corporation's traditional offer less appealing for its customers and may affect its ability to retain and acquire customers. Consequently, this could place the Corporation at a competitive disadvantage, lead to increased operational costs and have an adverse effect on its business, prospects, revenues, financial condition and results of operations.

Furthermore, the Corporation faces competition from illegal providers of television services and illegal access to non-Canadian direct broadcast satellite ("DBS") signal (also called grey market piracy), as well as from signal theft of DBS that enables customers to access programming services from U.S. and Canadian DBS without paying any fees (also called black market piracy).

In its Internet access business, the Corporation faces competition from several resellers who have access to the wholesale TPIA service mandated by the CRTC. These TPIA providers may also provide telephony and networking applications and have entered the IPTV market. Their market share is significant and growing, especially in Québec and Ontario, the two regions in Canada where they have been particularly active and aggressively pricing their services.

On May 27, 2021, the CRTC issued a decision to TPIA providers adopting the interim wholesale rates set on October 6, 2016 as final rates, with certain modifications, including the removal of the supplementary markup of 10% for incumbent local exchange carriers. From May 28, 2021 to August 25, 2021, several TPIA providers petitioned the Governor in Council to, among other things, restore the lower rates set in the 2019 Order as final. On June 28, 2021, one of these TPIA providers also filed a motion with the Federal Court of Appeal seeking leave to appeal the May 27, 2021 decision. A coalition comprised of the five largest cable carriers, including Videotron, filed comments in relation to these petitions on September 22, 2021 and November 1, 2021. The same coalition will defend the CRTC decision at the Federal Court of Appeal.

The Corporation also competes against other ISPs offering residential and commercial Internet access services as well as fixed wireless access and open Wi-Fi networks in some cities. The main competitors are the ILECs that offer Internet access through digital subscriber line, fibre to the node and fibre to the home technologies, in certain cases offering download speeds comparable, or superior to the Corporation's. In addition, satellite operators such as Xplornet, Telesat and Starlink are increasing their existing high-speed Internet access capabilities with the launch of high-throughput satellites, targeting households in low population density and remote locations and claiming future download speeds comparable to the Corporation's low and medium download speeds. Finally, certain municipalities also plan to build and operate their own broadband networks. They plan to do so through public/private partnership arrangements, competing directly with the Corporation in some of its local markets.

The Corporation's wireline business has numerous competitors, including ILECs, competitive local exchange carriers, mobile telephony service operators and other providers of Voice over Internet Protocol ("VoIP") and cloud-based telephony. Some of these competitors are not facility-based and therefore have much lower infrastructure costs. In addition, Internet protocol-based products and services are generally subject to downward pricing pressure, lower margins and technological evolution, all of which could have an adverse effect on the Corporation's business, prospects, revenues, financial condition and results of operations.

In its mobile telephony business, the Corporation competes against a mix of market participants, some of them active in its territory in some or all of the products it offers, with others offering only mobile telephony services. In addition, users of mobile voice and data systems may find their communication needs satisfied by other current adjunct technologies, such as Wi-Fi, "hotspots" or trunk radio systems, which have the technical capability to handle mobile data communication and mobile telephone calls. There can be no assurance that current or future competitors will not provide network capacity and/or services comparable or superior to those the Corporation provides or may in the future provide, or at lower prices, or adapt more quickly to evolving industry trends or changing market requirements or introduce competing services. For instance, some providers of mobile telephony services (including incumbent carriers) have deployed and have been operating for many years lower-cost mobile telephony brands in order to acquire additional market share. Furthermore, CRTC's recent decision ordering the national incumbent wireless carriers to provide mobile virtual network operator ("MVNO") access services to regional wireless carriers for a period of seven years stands to have significant impact on the Corporation's competitive environment, as the Corporation could see the emergence of new MVNO competitors. the Corporation may not be able to compete successfully in the future against existing and such potential new competitors; increased competition could have a material adverse effect on its business, prospects, revenues, financial condition and results of operations.

Finally, many of its competitors are offering special bundling discounts to customers who subscribe to two or more of their services (television, Internet access, wireline and mobile telephony services). Should the Corporation fail to keep its existing customers and lose them to such competitors, it may end up losing a subscriber for multiple services as a result of its bundling strategy. This could have an adverse effect on its business, prospects, revenues, financial condition, and results of operations.

Fierce price competition in all the Corporation's businesses and across the industries in which it operates, combined with the declining demand for certain traditional products, may affect the Corporation's ability to raise the price of its products and services commensurately with increases in its operating costs, as it has done in the past. This could have an adverse effect on its business, revenues, financial condition, and results of operations.

Capital to address significant and rapid technological changes

New technologies in the telecommunication industry, including 5G technology, are evolving faster than the historical industry investment cycle. Their introduction and pace of adoption could result in requirements for additional immediate capital investments not currently planned, as well as shorter estimated useful lives for certain of the Corporation's existing assets. The Corporation's strategy of maintaining a competitive position in the suite of products and services it offers and of launching new products and services requires capital investments in its networks, information technology systems and infrastructure, as well as the acquisition of spectrum to support growth in its customer base and its demands for increased bandwidth capacity and other services.

The Corporation must continually invest in its services, networks and technologies due to the rapid evolution of technologies, or it may be required to acquire, develop or integrate new technologies. Improvements in its services depend on many factors. The cost of the acquisition, development or implementation of new technologies and spectrum could be significant and the Corporation's ability to fund such acquisition, development or implementation may be limited, which could have a material adverse effect on its ability to successfully compete in the future. Any such difficulty or inability to compete could have a material adverse effect on its business, reputation, prospects, financial condition and results of operations.

In the past, the Corporation has required substantial capital for the upgrade, expansion and maintenance of its networks and the launch and deployment of new or additional services. The Corporation expects that additional capital expenditures will continue to be required in the short-term, mid-term and long-term in order to maintain, expand geographically and enhance its networks systems and services, including expenditures relating to the deployment of LTE-Advanced/5G mobile technologies. Moreover, additional investments in the Corporation's business may not translate into incremental revenues, cash flows or profitability.

Epidemics, pandemics and other public health emergencies

The COVID-19 pandemic has had a significant impact on the economic environment in Canada and around the world. The overall impact on the Corporation's business and activities is still uncertain and cannot be evaluated with precision despite recent developments relating to vaccines, considering future developments such as the spread of the virus, the expected date of termination of the crisis, the risks associated with potential future waves of the virus, its impact on consumer spending, labour shortages due to the virus, the continuing disruption in the supply chain and the effectiveness or the strictness of the actions taken by the federal and Québec governments to manage the pandemic. Public and private sector regulations, policies and other measures aimed at reducing the spread of the COVID-19 pandemic include the suspension of business activities deemed non-essential when needed, restrictions on the movement of personnel, the promotion of physical and social distancing, lockdown orders, border closures, travel bans, self-imposed quarantine periods, self-isolation, and the adoption of work-from-home and online education by companies, schools and institutions.

Potential adverse impacts of the COVID-19 pandemic include, but are not limited to: (i) a reduction in demand for the Corporation's products or services, or an increase in delinquent or unpaid bills, due to job losses and associated financial hardship; (ii) a decline in revenues as a result of services provided at no cost to customers; (iii) a decline in access fees for speciality television services and exclusive on-demand content due to the postponement or cancellation of sporting events; (iv) the temporary suspension of the Corporation's content production activities, a reduction in the availability of external content, and therefore a reduction in the Corporation's ability to provide the content and programming that its customers expect; (v) a downgrade or cancellation of customer services; (vi) issues delivering the Corporation's products and services; (vii) lost revenues due to the significant economic challenges that small and medium-sized business customers are facing; (viii) lower advertising revenues and reduced film and audiovisual content activity in the Media segment; (ix) delays or cancellations of shows and events, and interruption of music and book distribution activities in the Sports and Entertainment segment; (x) uncertainty associated with the costs and availability of resources required to provide appropriate levels of service to customers; (xi) additional capital expenditures, and uncertainty associated with costs, delays and the availability of resources required to maintain, upgrade or expand Videotron's network in order to accommodate increased network usage, and to expand its self-install and self-serve programs in order to attract new customers; (xii) unexpected increase of user data demand and increased pressure on Videotron's network capacity, which could negatively affect its network's performance, availability, speed, consistency and its ability to provide services; (xiii) the ability of certain suppliers and vendors to provide products and services to the Corporation; (xiv) the impact of legislation, regulations and other government interventions in response to the COVID-19 pandemic; (xv) the negative impact on global credit and capital markets; and (xvi) the ability to access capital markets at a reasonable cost or at all. Any of these risks and uncertainties could have a material adverse impact on the Corporation's business, prospects, results of operations and financial condition.

The outbreak of the COVID-19 pandemic has resulted in significant economic interventions by the federal, provincial, and municipal governments throughout Canada, which include, notably, grants, wage subsidies, incentives, increased assistance programs and loans, as well as temporary relief measures put in place by regulatory agencies to support certain economic activities, industries or major employers. There can be no assurance that these economic mitigation measures will continue at their present levels or at all.

Ongoing access to spectrum

Wireless, video and broadband services are undergoing rapid and significant technological changes and a dramatic increase in usage – in particular, from the demand for faster and seamless usage of video and data across mobile and fixed devices. It is projected that this demand will continue to accelerate, driven by the following increases: levels of broadband penetration; need for personal connectivity and networking; teleworking; affordability of mobile devices; multimedia-rich services and applications; and unlimited data plans. The anticipated levels of data traffic will represent a growing challenge to the current mobile network's ability to serve this traffic. The Corporation will have to acquire additional spectrum in order to address this increased demand. The ability to acquire additional spectrum at a reasonable price or at all is dependent on competition level as well as the spectrum auction timing and rules. In previous auctions, ISED Canada has used, and the Corporation has benefited from, certain measures to support competition, which notably included set-asides and spectrum aggregation limits ensuring that a minimum amount of spectrum was effectively reserved for eligible facilities-based telecommunication service providers that were not national incumbent wireless carriers. There can be no assurance that these pro-competition measures will be used again by ISED Canada in future auctions, or that the Corporation will be or remain eligible to benefit from such measures. If the Corporation is not successful in acquiring additional spectrum it may need on reasonable terms, or not at all, that could have a material adverse effect on its business, prospects and financial condition.

Roaming agreements

The Corporation has entered into roaming agreements with multiple carriers around the world and has thereby established worldwide coverage for its customers. Should it be unable to extend its worldwide coverage, or to renew or substitute for these roaming agreements on acceptable terms, the Corporation may be placed at a competitive disadvantage, which could adversely affect its ability to operate its mobile business successfully and profitably. In addition, if the Corporation is unable to renew, or substitute for, these roaming agreements on a timely basis and at an acceptable cost, its cost structure could materially increase, and, consequently, its business, prospects, revenues, financial condition and results of operations could be adversely affected.

Increasing proportion of customers with no fixed-term contracts

Given rising costs of mobile devices and marginal technological advancements in mobile devices, consumers tend to keep their mobile devices for longer periods of time, thereby increasing the proportion of wireless customers without fixed term contracts. Such customers are under no contractual obligation to remain with a specific carrier for a fixed term. Moreover, the Corporation customers who bring their own device receive wireless services without entering into fixed term contracts. In addition, new technologies now embedded in a growing number of mobile devices, including the eSIM or embedded-SIM, will, once widely adopted, allow customers to switch between carriers without the use of a carrier-provided SIM card. This could have a material adverse effect on the Corporation's churn rate and, consequently, on its business, prospects, revenues, financial condition and results of operations.

Inventory obsolescence

The Corporation's various products in inventory generally have a relatively short lifecycle due to frequent technological changes. If it cannot effectively manage inventory levels based on product demand, or minimum order quantities from its suppliers, this could increase the risk of inventory obsolescence and could have an adverse effect on its business, financial condition and results of operations. Moreover, equipment provisioning delay has amplified with the worldwide electronic components shortage induced by the COVID-19 pandemic, which may lead to an increase in inventory and add significance to this risk.

Capital expenditures

There can be no assurance that the Corporation will be able to generate or otherwise obtain the funds to implement its business strategies and finance its capital expenditure programs or other investment requirements, whether through cash from operations, additional borrowings or other sources of funding. If the Corporation is unable to generate sufficient funds or obtain additional financing on acceptable terms, it may be unable to implement its business strategies or proceed with the capital expenditures and investments required to maintain its leadership position, and its business, financial condition, results of operations, reputation, and prospects could be materially adversely affected.

Access to support structures

The Corporation requires access to the support structures of hydroelectric and telephone utilities and it needs municipal rights of way to deploy its cable and mobile networks. Where access to the structures of telephone utilities cannot be secured, the Corporation may apply to the CRTC to obtain a right of access under the *Telecommunications Act* (Canada) (the "*Telecommunications Act*"). The Corporation has entered into comprehensive support structure access agreements with all the major hydroelectric companies and all the major telecommunications companies in its service territory. Should the Corporation seek to renew or to renegotiate these agreements, it cannot guarantee that these agreements will continue to be available on their respective terms, on acceptable terms, or at all, which may place the Corporation at a competitive disadvantage and which may have a material adverse effect on its business and prospects.

Successful implementation of business and operating strategies

The Corporation's business strategies are based on leveraging an integrated platform of media assets. Its strategies include offering multiplatform advertising solutions, generating and distributing content across a spectrum of media properties and assets, launching and deploying additional value-added products and services, pursuing cross-promotional opportunities, enhancing its advanced wireline and wireless networks, expanding our network service offering in the rest of Canada, developing high quality and premium content, further integrating the operations of its subsidiaries, leveraging geographic clustering, and maximizing customer satisfaction across its business. The Corporation may not be able to implement these strategies successfully or realize their anticipated results fully or at all, and their implementation may be more costly or challenging than initially planned. In addition, its ability to successfully implement these strategies could be adversely affected by a number of factors beyond its control, including operating difficulties, increased dependence on third-party suppliers and service providers, increased ongoing operating costs, regulatory developments, general or local economic conditions, increased competition, technological changes, any restrictive measures put in place in order to contain an outbreak of a contagious disease or other adverse public health development, and other factors described in this section. Any material failure to implement its strategies could have an adverse effect on its reputation, business, financial condition, prospects, and results of operations, as well as on its ability to meet its obligations, including its ability to service its indebtedness.

As part of its strategy, in recent years, the Corporation has entered into certain agreements with third parties under which it is committed to making significant operating and capital expenditures in the future in order to offer new products and services to its customers. It can provide no assurance that it will be successful in developing such new products and services in relation to these engagements, including the marketing of new revenue sources.

In July 2021, the Corporation announced an investment of nearly $830.0 million in the acquisition by Videotron of 294 blocks of spectrum in the 3.5 GHz band. In an effort to implement its operation expansion strategy, more than half of the investment was concentrated in southern and eastern Ontario, Manitoba, Alberta and British Columbia. All spectrum was awarded to Videotron on

December 17, 2021, following final payment. In addition, a competitor contested the award of spectrum in Manitoba, Alberta and British Columbia in Federal Court, alleging that Videotron did not qualify for the auction in those regions. No decision on the merits has been made yet. The Corporation can provide no assurance that the award of spectrum in these three provinces will not be overturned by the Court and that it will be successful in implementing its operation expansion strategy in the rest of Canada.

Consumer trends to abandon traditional telephony and television services

The recent trend towards mobile substitution (when users cancel their wireline telephony services and opt exclusively for mobile telephony services) is largely the result of the increasing mobile penetration rate in Canada. In addition, there is also a consumer trend to abandon, substitute or reduce traditional television services for Internet access services allowing customers to stream directly from broadcasters and OTT content providers. Consequently, the Corporation may not be successful in converting its existing wireline telephony and television subscriber base to its mobile telephony services, its Internet access services or its OTT entertainment platforms, which could have a material adverse effect on its business, prospects, revenues, results of operations and financial condition.

Rapid growth

The Corporation has experienced substantial growth in its business and has significantly expanded its operations over the years. It has sought in the past, and may, in the future, seek to further expand the types of businesses and geographic areas in which it operates, under appropriate conditions. The Corporation can provide no assurance that it will be successful in either developing or fulfilling the objectives of any such business expansion.

In addition, the Corporation's expansion may require it to incur significant costs or divert significant resources and may limit its ability to pursue other strategic and business initiatives, which could have an adverse effect on its business, prospects, results of operations and financial condition. Furthermore, if the Corporation is not successful in managing its growth, or if the Corporation is required to incur significant or unforeseen costs, its business, prospects, results of operations and financial condition could be adversely affected.

Success in the development of its Sports and Entertainment business

The Corporation has made and is continuing to make significant investments in an effort to develop its Sports and Entertainment business. Some of these investments require significant expenditures and management attention. The success of such investments involves numerous risks that could adversely affect its growth and profitability, including the following risks: that investments may require substantial financial resources that otherwise could be used in the development of its other businesses; that the Corporation will not be able to achieve the benefits it expects from its investments in the same timeline as its other businesses; and, specifically with regards to the Videotron Centre, that it might not be able to maximize its profitability due to the fact that it does not have a main tenant nor operate in a major market, which makes it harder to attract international talents.

Implementation of changes to the structure of its business

The Corporation has and will continue to implement changes to the structure of its business due to many factors, such as a system replacement or upgrade, a process redesign, the necessity of a corporate restructuring and the integration of business acquisitions or existing business units. These changes must be managed carefully in order to ensure that the Corporation captures the intended benefits. The implementation process may negatively impact overall customer experience and may lead to greater-than-expected operational challenges, employee turnover, operating costs and expenses, customer losses, and business disruption for the Corporation, all of which could adversely affect its business and its ability to gain the anticipated benefits.

Key personnel

The Corporation's success depends to a large extent on the continued services of its senior management and its ability to retain skilled employees. There is intense competition for qualified management and skilled employees, and the Corporation's failure to recruit, train and retain such employees could have a material adverse effect on its business, prospects, results of operations and financial condition. In addition, in order to implement and manage its businesses and operating strategies effectively, the Corporation must sustain a high level of efficiency and performance, maintain content quality, continually enhance its operational and management systems, and continue to effectively attract, train, motivate and manage its employees. If the Corporation is not successful in these efforts, it may have a material adverse effect on its business, prospects, results of operations and financial condition.

Competition for advertising, circulation revenues/audience

The media industry has experienced fundamental and permanent structural changes. The growth of the Internet has presented alternative content distribution options that compete with traditional media, and an increasing number of non-traditional providers are developing technologies to satisfy the demand for entertainment and information content. Furthermore, the Corporation's customers have an increased control over the manner, content and timing of their media consumption, including through new technologies that give consumers greater flexibility to fast forward or skip advertisements within the Corporation's programming. These alternative technologies and new content distribution options have increased audience fragmentation, reduced the Corporation's Media segment business' audience, readership and circulation levels and have had an adverse effect on advertising revenues from local, regional and national advertisers.

Advertising revenue is the primary source of revenue for the Corporation's Media segment. As a result of those structural changes, competition for advertising spend in traditional media comes mainly from digital media technologies, which have introduced a wide variety of media distribution platforms for consumers and advertisers. These new competitors also include digital advertising giants with greater financial resources and a controlling share of the online advertising market thus reducing demand in some segments of The Corporation's traditional media advertising inventories. In addition, foreign digital advertising giants currently operate in Canada without being subject to its fiscal environment, therefore increasing the Corporation's competitive disadvantage. Furthermore, the international consolidation of advertising agencies is disrupting the demand model as some of its clients now negotiate through these consolidated positions, therefore putting additional pressure on market prices.

The continuous technological improvements to the Internet and the access to unlimited data, combined with higher download speeds, may continue to divert a portion of the Corporation's Media segment business' existing customer base from traditional media to digital media technology, which could adversely impact the demand for its services. The ability of the Corporation's Media segment to succeed over the long-term depends on various factors, including the Corporation's ability to attract advertisers and consumers to its own digital platforms. In addition, even if successful, the Corporation can provide no assurance that it will be able to recover the costs associated with the implementation of these digital initiatives through incremental revenues, cash flows or profitability.

As the media market continues to change and fragment, the Corporation expects its readership, circulation and audience to reduce and its advertising revenues, business, prospects, results of operations and financial condition could be materially adversely affected.

Finally, the Corporation's revenues and operating results in these businesses depend on the relative strength of the economy in the Corporation's principal markets, as well as the strength or weakness of local, regional and national economic factors. Since a significant portion of the Corporation's advertising revenues is derived from retail, automotive and consumer packaged goods sector advertisers, weakness in these sectors has had and may continue to have an adverse impact on the revenues and results of operations of the Corporation's Media segment.

Distribution, production and acquisition of original programming

The financial performance of its television, Club illico, Vrai, video on demand and mobile services depends in large part on the Corporation's ability to distribute a wide range of appealing video programming on its platforms and on its ability to produce and acquire original content on an ongoing basis.

In its telecommunications business, the Corporation obtains television programming rights from suppliers pursuant to programming contracts. In recent years, these suppliers have become vertically integrated and are now more limited in number. The Corporation may be unable to maintain key programming contracts at commercially reasonable rates for television programming. Loss of programming contracts, the Corporation's inability to obtain programming at reasonable rates or its inability to pass rate increases through to its customers could have a material adverse effect on its business, prospects, results of operations and financial condition.

Increased competition in the television, OTT and video on demand industry from local and foreign OTT content providers with access to substantial financial resources may result in a competitive disadvantage from a content perspective and may have a material adverse effect on the Corporation's business, prospects, revenues, financial conditions and results of operations. Notably, on September 28, 2017, the Minister of Canadian Heritage and Netflix concluded an arrangement pursuant to which Netflix undertakes to invest a minimum of $500 million in original productions in Canada over the next five years. This arrangement may exert upward pressure on content price.

Furthermore, on February 2, 2022, the federal government introduced Bill C-11 which proposes to amend the Broadcasting Act (Canada) (the "Broadcasting Act") in order to include foreign OTT content providers in Canada's regulatory framework. Similarly to Netflix's arrangement, such bill would force these providers to promote Canadian cultural products and make material expenditures in order to support local cultural production. If adopted, this bill could increase competition and put greater pressure on the price of Canadian content.

Launch of new products and services

The Corporation is investing in the launch of new products and services. During the period preceding or immediately following the launch of a new product or service, revenues are generally relatively modest, while initial operating expenses may prove more substantial. Furthermore, although the Corporation believes in the potential associated with this strategy, there is a possibility that the anticipated profitability could take several years to materialize or may never materialize.

Single-clustered network

The Corporation provides its television, Internet access, wireline telephony and mobile telephony services through a primary headend and a series of local headends in a single-clustered network. Despite available emergency backup or replacement sites, automatic failover systems, and disaster recovery measures, a failure in the Corporation's primary headend, including exogenous threats, such as cyber-attacks, natural disasters, sabotage or terrorism, or dependence on certain external infrastructure providers (such as electric utilities), could prevent it from delivering some of its products and services throughout its networks until the failure has been resolved, which may result in significant customer dissatisfaction, loss of revenues and potential civil litigation, and could have a material adverse effect on its financial condition.

Reputation

The Corporation has generally enjoyed a good reputation among the public. Its ability to maintain its existing customer relationships and to attract new customers depends to a large extent on its reputation. While the Corporation has put in place certain mechanisms to mitigate the risk that its reputation may be tarnished, including good governance practices and a Code of Ethics, there can be no assurance that these measures will be effective to prevent violations or perceived violations of the law or ethical business practices. The loss or tarnishing of its reputation could have a material adverse effect on its business, prospects, financial condition and results of operations.

Protection of personal data

The ordinary course of the Corporation's businesses involves the receipt, collection, storage and transmission of sensitive data, including its proprietary business information and that of its customers, and personally identifiable information of its customers and employees, whether in its systems, infrastructure, networks and processes, or those of its suppliers. The Corporation faces risks inherent in protecting the security of such personal data. In particular, the Corporation faces a number of challenges in protecting the data contained and hosted on its systems, or those belonging to its suppliers, including from advertent or inadvertent actions or inactions by its employees, as well as in relation to compliance with applicable laws, rules and regulations relating to the collection, use, disclosure and security of personal information, including any requests from regulatory and government authorities relating to such data. Although the Corporation has developed and maintains systems, processes and security controls that are designed to protect personally identifiable information of its clients, employees or business partners, the Corporation may be unable to prevent the improper disclosure, loss, misappropriation of, unauthorized access to, or other security breaches relating to such data that the Corporation stores or processes or that its suppliers store or process. As a result, the Corporation may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and the Corporation may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

On September 22, 2021, Québec's National Assembly adopted Bill 64, *An Act to modernize legislative provisions as regards the protection of personal information* which will come into force on September 22, 2023, except for certain provisions which will come into force in 2022. The bill modifies the obligations of public bodies and private sector enterprises by modernizing framework applicable to the protection of personal information and imposes new obligations on the Corporation. Bill 64 adds important deterrent powers to the authorities in charge of their application. Federal and provincial legislation in the area of privacy and personal information is constantly evolving and is expected to undergo significant changes in the coming years. The Corporation does not expect compliance with this legislation to threaten its business, but it may incur significant costs to update its security systems, processes and controls, which could have a material adverse effect on its financial condition.

Cybersecurity

Although the Corporation has implemented and regularly reviews and updates processes and procedures to protect against customers and business service interruption, unauthorized access to or use of sensitive data, including data of its customers, and to prevent data loss or theft, and although ever-evolving cyber-threats require the Corporation to continually evaluate and adapt its systems, infrastructure, networks and processes, the Corporation cannot assure that its systems, infrastructure, networks and processes, as well as those of its suppliers, will be adequate to safeguard against unauthorized access by third parties or errors by employees or by third-party suppliers. The Corporation is also at risk from increasingly sophisticated phishing attacks, SIM swaps, fraudulent ports and other types of frauds. If the Corporation is subject to a significant cyber-attack or breach, unauthorized access, errors of third-party suppliers or other security breaches, the Corporation may incur significant costs, be subject to investigations, sanctions and litigation, including under laws that protect the privacy of personal information, and the Corporation may suffer damage to its business, competitive position and reputation, which could have a material adverse effect on its financial condition.

The costs associated with a major cyber-attack could also include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues and customers from business interruption and litigation. The Corporation's contractual risk transfers do not eliminate the risk completely and the potential costs associated with these attacks could exceed the scope and limits of the insurance coverage it maintains.

Protection from piracy

The Corporation may not be able to protect its services and data from piracy. It may be unable to prevent electronic attacks to gain unauthorized access to its networks, digital programming, and Internet access services. It uses encryption technology to protect its television signals and OTT service from unauthorized access and to control programming access based on subscription packages. It may not be able to deploy adequate technology to prevent unauthorized access to its networks, programming and data, which may have an adverse effect on its customer base and lead to a possible decline in revenues, as well as to significant remediation costs and legal claims.

Malicious and abusive Internet practices

The Corporation's customers utilize its cable, mobile and fibre-optic connectivity business networks to access the Internet and, as a consequence, the Corporation or its customers may become a victim of common malicious and abusive Internet activities, such as unsolicited mass advertising (or spam) and dissemination of viruses, worms and other destructive or disruptive software. These activities could have adverse consequences on its networks and its customers, including deterioration of service, excessive call volume to call centres, and damage to its customers' or its own equipment and data. Significant incidents could lead to customer dissatisfaction and, ultimately, to a loss of customers or revenues, in addition to increased costs to service customers and protect its networks. Any significant loss of cable, mobile or fibre-optic connectivity business customers, or a significant increase in the costs of serving those customers, could adversely affect its reputation, business, prospects, results of operations, and financial condition.

Dependence on information technology systems

The day-to-day operation of the Corporation's business is highly dependent on information technology systems, including those of certain third-party suppliers, some of which are based in territories with potential geopolitical risk. Furthermore, its business relies on the use of numerous distinct information technology systems, billing systems, sales channels, databases as well as different rate plans, promotions and product offerings, which make its operations increasingly complex and may unfavourably impact its response time to market trends and the risk of billing or service errors. An inability to maintain and enhance its existing IT systems or obtain new systems to accommodate additional customer growth or to support new products and services could have an adverse impact on its ability to acquire new subscribers, retain existing customers, produce accurate and timely billing, generate revenue growth, manage operating expenses and carry out operations without interruption; all of which may have a material adverse effect on its business, prospects, results of operations and financial condition.

The Corporation has entered into strategic relationships with service providers to ensure that the technology it adopts and invests in is the best in class in its industry. An inability to maintain these relationships or difficulties implementing its technology roadmap could result in higher capital requirements, prolonged development timelines and substandard performance of its products and services.

Products and services supplied to the Corporation by third-party suppliers may contain latent security issues, including, but not limited to, software and hardware security issues, that would not be apparent upon a diligent inspection. Failure to identify and remedy those issues may result in significant customer dissatisfaction, loss of revenues, and could adversely impact its results of operations and financial condition.

Third-party suppliers and providers

The Corporation depends on third-party suppliers and providers for certain services, hardware, licensed technological platforms and equipment that are, or may become, critical to its operations and network evolution. These materials and services include end-user terminals such as set-top boxes, gateways, Wi-Fi routers, mobile telephony handsets, network equipment such as wireline and telephony modems, servers and routers, fibre-optic cable and equipments, telephony switches, inter-city links, support structures, licensed technological platforms, external cloud-based services and network functions, services and operational software, the "backbone" telecommunications network for its Internet access, telephony services and mobile services, and construction services for the expansion of and upgrades to its wireline and wireless networks. These services, platforms and equipment are each available from a single or limited number of suppliers and the Corporation therefore faces the risks of supply disruption, including due to geopolitical events, external events such as climate change related impacts, epidemics, pandemics or other public health issues, business difficulties, restructuring, or supply-chain issues. If no supplier can provide the Corporation with the equipment and services it requires, or that comply with evolving Internet and telecommunications standards or that are compatible with its other equipment and software interfaces, its business, financial condition and results of operations could be materially adversely affected. In addition, if the Corporation is unable to obtain critical equipment, software, services or other items on a timely basis and at an acceptable cost, its ability to offer its products and services at competitive pricing and roll out advanced services may be delayed, and its business, financial condition and results of operations could be materially adversely affected.

Moreover, as there is a limited number of manufacturers of mobile devices and customer premises equipment ("CPE"), there is a risk that the Corporation will not be able to maintain agreements for their existing supply on commercially reasonable terms. The rising mobile device and CPE costs as well as the potential delays in delivery mobile devices and CPE, in a price-sensitive market, could negatively impact the Corporation's revenues, financial condition and results of operations, as it may not be able to pass on to customers a corresponding increase in the price of its products. Furthermore, some of the Corporation's competitors benefit from higher purchasing volumes which provide them the ability to negotiate better prices and faster deliveries from manufacturers.

In addition, the Corporation obtains proprietary content critical to its operations through licensing arrangements with content providers. Some providers may seek to increase fees or impose technological requirements to protect their proprietary content. If the Corporation is unable to renegotiate commercially acceptable arrangements with these content providers, comply with their technological requirements or find alternative sources of equivalent content, its business, financial condition and results of operations could be materially adversely affected.

Litigation and other claims

In the normal course of business, the Corporation is involved in various legal proceedings and other claims relating to the conduct of its business, including class actions. Although, in the opinion of management, the outcome of current pending claims and other litigation is not expected to have a material adverse effect on the Corporation's reputation, results of operations, liquidity or financial condition, a negative outcome in respect of any such claim or litigation could have the said adverse effect. Moreover, the cost of defending against lawsuits and the diversion of management's attention could be significant.

Intellectual property rights

The Corporation relies on its intellectual property, such as copyrights, trademarks and trade secrets, as well as licenses and other agreements with its vendors and other third parties, to use various technologies, conduct its operations and sell its products and services. Legal challenges to its intellectual property rights, or the ones of third-party suppliers, and claims of intellectual property infringement by third parties could require that it enters into royalty or licensing agreements on unfavourable terms, incur substantial monetary liability, or be enjoined preliminarily or permanently from further use of the intellectual property in question or from the continuation of its businesses as currently conducted. The Corporation may need to change its business practices if any of these events occur, which may limit its ability to compete effectively and could have an adverse effect on its results of operations. In the event that it believes any such challenges or claims are without merit, they can nonetheless be time-consuming and costly to defend and divert management's attention and resources away from its businesses. Moreover, if the Corporation is unable to obtain or continue to obtain licenses from its vendors and other third parties on reasonable terms, its businesses could be adversely affected.

Piracy and other unauthorized uses of content are made easier, and the enforcement of the Corporation's intellectual property rights is made more challenging, by technological advances. The steps the Corporation has taken to protect its intellectual property may not prevent the misappropriation of its proprietary rights. The Corporation may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to the Corporation's. Also, the Corporation may not be able to discover or determine the extent of any unauthorized use of its proprietary rights. Unauthorized use of its intellectual property rights may increase the cost of protecting these rights or reduce its revenues. The Corporation cannot be sure that any legal actions against such infringers will be successful, even when its rights have been infringed.

Strikes, other labour protests and health risks affecting employees

The Corporation is not currently subject to any labour dispute. Nevertheless, it can neither predict the outcome of current or future negotiations relating to labour disputes, union representation or renewal of collective bargaining agreements, nor guarantee that the Corporation will not experience future work stoppages, strikes or other forms of labour protests pending the outcome of any current or future negotiations. If its unionized workers engage in a strike or any other form of work stoppage, it could experience a significant disruption to its operations, damage to its property and/or interruption to its services, which could adversely affect its business, assets, financial condition, results of operations and reputation. Even should the Corporation not experience strikes or other forms of labour protests, the outcome of labour negotiations could adversely affect its business and results of operations. Such could be the case if current or future labour negotiations or contracts were to further restrict its ability to maximize the efficiency of its operations. In addition, its ability to make short-term adjustments to control compensation and benefit costs is limited by the terms of its collective bargaining agreements.

Health threats to employees resulting from epidemics, pandemics or other health issues could adversely affect the Corporation's business, assets, financial conditions, results of operations and reputation.

The COVID-19 pandemic has accelerated the Corporation's adoption of a remote work policy establishing guidelines for its employees when working from home. Remote work arrangements of its employees and those of certain of its suppliers could introduce additional operating risks including, but not limited to, confidentiality risks, privacy risks, information security risks, health and safety risks and impair the Corporation's ability to manage its business. This situation could also result in an increase in the number of legal proceedings and other claims related to the pursuit of its activities outside of its usual premises.

Pension plan liability

The economic cycles, employee demographics and changes in regulations could have a negative impact on the funding of the Corporation's defined benefit pension plans and related expenditures. There is no guarantee that the expenditures and contributions required to fund these pension plans will not increase in the future and therefore negatively impact its operating results and financial condition. Risks related to the funding of defined benefit plans may materialize if total obligations with respect to a pension plan exceed the total value of its trust assets. Shortfalls may arise due to lower-than-expected returns on investments, changes in the assumptions used to assess the pension plan's obligations, and actuarial losses.

Exchange rate fluctuations

Most of the Corporation's revenues and expenses are denominated in CAN dollars. However, certain expenditures, such as the purchase of set-top boxes, gateways, modems, mobile devices, the payment of royalties to certain business providers or service providers, and certain capital expenditures, including certain costs related to the development and maintenance of its mobile network, are paid in U.S. dollars. Those costs are only partially hedged, so a significant increase in the U.S. dollar could have an adverse effect on its results of operations and financial condition.

Also, a substantial portion of its debt is denominated in U.S. dollars, and interest, principal and premium, if any, are payable in U.S. dollars. For the purposes of financial reporting, any change in the value of the CAN dollar against the U.S. dollar during a given financial reporting period would result in a foreign exchange gain or loss on the translation of any unhedged U.S.-dollar-denominated debt into CAN dollars. Consequently, reported earnings and debt could fluctuate materially as a result of foreign exchange gains or losses. The Corporation has entered into transactions to hedge the exchange rate risk with respect to its U.S.-dollar-denominated debt outstanding at December 31, 2021, and it intends to enter into such transactions for new U.S.-dollar-denominated debt in the future. These hedging transactions could, in certain circumstances, prove economically ineffective and may not be successful in protecting it against exchange rate fluctuations, or it may be required to provide cash and other collateral in the future in order to secure its obligations with respect to such hedging transactions, or it may be unable to enter into such transactions on favourable terms, or at all, in the future or, pursuant to the terms of these hedging transactions, its counterparties thereto may owe the Corporation significant amounts of money and may be unable to honour such obligations, all of which could have an adverse effect on its results of operations and financial condition.

In addition, certain cross-currency interest rate swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The Corporation holds interests in certain foreign companies. A significant adverse change in the value of the currencies of these foreign companies, the Turkish Lira and the Euro, could have an adverse impact on the results of operations and the financial condition of the Corporation.

The fair value of the derivative financial instruments that the Corporation is party to is estimated using period-end market rates and reflects the amount it would receive or pay if the instruments were terminated and settled at those dates, as adjusted for counterparties' non-performance risk. At December 31, 2021, the net aggregate fair value of its cross-currency interest rate swaps and foreign exchange forward contracts was in a net asset position of $382.3 million on a consolidated basis. These swaps have been set up with major Canadian and US banks.

Some of the Corporation's suppliers source their products out of the U.S.; therefore, although the Corporation pays those suppliers in CAN dollars, the prices it pays for such commodities or products may be affected by fluctuations in the exchange rate. The Corporation may in the future enter into transactions to hedge its exposure to the exchange rate risk related to the prices of some of those commodities or products. However, fluctuations in the exchange rate for purchases that are not hedged could affect the prices the Corporation pays for such purchases and could have an adverse effect on its results of operations and financial condition.

Volatility

The capital and credit markets have experienced significant volatility and disruption in the past, resulting in periods of upward pressure on the cost of new debt capital and severe restrictions in credit availability for many companies. In such periods, the disruptions and volatility in the capital and credit markets have also resulted in higher interest rates or greater credit spreads on the issuance of debt securities and increased costs under credit facilities. Disruptions and volatility in the capital and credit markets could increase Quebecor's interest expense, thereby adversely affecting its results of operations and financial position.

Quebecor's access to funds under its existing credit facilities is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity, or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under Quebecor's credit facilities are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

Some of Quebecor's debt has a variable rate of interest linked to various interest rate benchmarks, such as the London Inter-Bank Offered Rate ("LIBOR") or the Canadian Dollar Offered Rate ("CDOR"). It is expected that interest rates benchmarks such as LIBOR and CDOR will be reformed or will be discontinued and replaced with alternative interest rate benchmark rates which meet new regulatory and market requirements. The consequence of this development cannot be entirely predicted but could include an increase in the cost of its variable rate indebtedness.

Extended periods of volatility and disruptions in the capital and credit markets as a result of uncertainty, pandemics, epidemics and other public health issues, ongoing changes or increases in regulation of financial institutions, reduced financing alternatives or failures of significant financial institutions, could adversely affect Quebecor's access to the liquidity and affordability of funding needed for its businesses in the longer term. Such disruptions could require Quebecor to take measures to maintain a cash balance until markets stabilize or until alternative credit arrangements or other funding for its business needs can be arranged. Market disruptions and broader economic challenges may lead to lower demand for certain of Quebecor's products, a declining level of retail and commercial activity and increased incidences of customer inability to pay or to timely pay for the services or products it provides. Events such as these could adversely impact Quebecor's results of operations, cash flows, financial condition and prospects.

Asset impairment charges

In the past, the Corporation has recorded asset impairment charges which have been material in some cases. Subject to the realization of various factors, including, but not limited to, weak economic or market conditions, the Corporation may be required to record in the future, in accordance with IFRS accounting valuation principles, additional non-cash impairment charges if the carrying value of an asset in its financial statements is in excess of its recoverable value. Any such asset impairment charge could be material and may adversely affect its future reported results of operations and equity, although such charges would not affect its cash flows.

Acquisitions, dispositions, business combinations, or joint ventures

From time to time, the Corporation engages in discussions and activities with respect to possible acquisitions, dispositions, business combinations, or joint ventures intended to complement or expand its business, some of which may be significant transactions and involve significant risks and uncertainties. The Corporation may not realize the anticipated benefit from any of the transactions it pursues and may have difficulty incorporating or integrating any acquired business. Regardless of whether it consummates any such transaction, the negotiation of a potential transaction (including associated litigation), as well as the integration of any acquired business, could require the Corporation to incur significant costs and cause diversion of management's time and resources and disrupt its business operations. The Corporation could face several challenges in the consolidation and integration of information technology, accounting systems, personnel and operations.

If the Corporation decides to sell individual properties or other assets or businesses, it will benefit from the net proceeds realized from such sales. However, its revenues may suffer in the long term due to the disposition of a revenue-generating asset, the timing of such dispositions may be poor, causing it to fail to realize the full value of the disposed asset or the terms of such dispositions may be overly restrictive to us or may result in unfavorable post-closing price adjustments if some conditions are not met, all of which may diminish its ability to repay its indebtedness at maturity.

Any of the foregoing could have a material adverse effect on its business, financial condition, operating results, liquidity, and prospects.

Competition and consolidation of retail locations in the Telecommunications business

In the Corporation's Telecommunications business, the competition to offer products in the best available commercial retail spaces is fierce. Some of its telecommunications business competitors have pursued a strategy of selling their products through independent retailers, in major retail chains and convenience stores, via telemarketing campaigns and via home delivery to extend their presence on the market and some of its competitors have also acquired certain independent retailers and created new distribution networks. This could result in limiting the customer reach of the Corporation's retail network and places it at a competitive disadvantage, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Rising adoption of web-based and application-based channels

To better meet the changing habits and expectations of consumers and businesses, the Corporation's telecommunications business' competitors are rapidly developing digital platforms, which allow them to sell and distribute their products on web-based or application-based channels and to shift customer interaction to digital platforms driving more self-help, self-install and self-service. If the Corporation does not succeed in implementing and pursuing its own digital strategy and fails to evolve its customer experience in line with customers' demands, this could place the Corporation at a competitive disadvantage, which could have an adverse effect on its business, prospects, results of operations and financial condition.

Government acts and regulations risks

The Corporation's operations are subject to extensive government regulation and policy-making in Canada. Laws and regulations govern the issuance, amendment, renewal, transfer, suspension, revocation and ownership of broadcast programming and distribution licenses. With respect to distribution, regulations govern, among other things, the distribution of Canadian and non-Canadian programming services and the maximum fees to be charged to the public in certain circumstances. The Corporation's broadcasting distribution and telecommunications operations (including Internet access service) are regulated respectively by the *Broadcasting Act* and the *Telecommunications Act* and regulations thereunder. The CRTC, which administers the *Broadcasting Act* and the *Telecommunications Act*, has the power to grant, amend, suspend, revoke and renew broadcasting licenses, approve certain changes in corporate ownership and control, and make regulations and policies in accordance with the *Broadcasting Act* and the *Telecommunications Act*, subject to certain directions from the federal cabinet. The Corporation's wireless and wireline operations are also subject to technical requirements, license conditions and performance standards under the *Radiocommunication Act* (Canada) (the "*Radiocommunication Act*"), which is administered by ISED Canada.

Changes to the laws, regulations and policies governing the Corporation's operations, the introduction of new laws, regulations, policies or terms of license, the issuance of new licenses, including additional spectrum licenses, to its competitors, or changes in the treatment of the tax deductibility of advertising expenditures, could have an impact on customer buying practices and/or a material adverse effect on its business (including how it provides products and services), prospects, results of operations and financial condition. In addition, the Corporation may incur increased costs in order to comply with existing and newly adopted laws and regulations or penalties for any failure to comply.

The CRTC launched a comprehensive review of the wireless market. The Canadian Government had requested that the CRTC consider competition, affordability, consumer interests and innovation in its decisions. In a recent decision, the CRTC ordered the national incumbent wireless carriers to provide MVNO access services to regional wireless carriers for a period of seven years. This decision stands to have significant impact on the Corporation's competitive environment, as the Corporation could see the emergence of new MVNO competitors. The Corporation may not be able to compete successfully in future against existing and such potential competitors. This material increase in competition in the Corporation's mobile telephony business could have a material adverse effect on its business, prospects, revenues, financial condition, and results of operations.

In addition, laws relating to communications, data protection, e-commerce, direct marketing and digital advertising and the use of public records have become more prevalent in recent years. Existing and proposed legislation and regulations, including changes in the manner in which such legislation and regulations are interpreted by courts in Canada, the United States and other jurisdictions may impose limits on the collection and use of certain kinds of information. Furthermore, the CRTC and ISED Canada have the power to impose monetary sanctions for failure to comply with current regulations.

TPIAs access to our cable network

The largest cable operators in Canada, including Videotron, have been required by the CRTC to provide TPIA providers with access to their networks at mandated cost-based rates. Numerous TPIA providers are interconnected to the Corporation's cable network and are thereby providing retail Internet access services as well as, in some cases, retail VoIP and IP-based television distribution services.

Since 2015, the CRTC has reemphasized in a series of decisions the importance it gives to mandated wholesale access arrangements as a driver of competition in the retail Internet access market. Among other things, the CRTC has ordered all of the major telephone and cable companies, including Videotron, to provide new disaggregated wholesale access services, which are to replace existing aggregated wholesale access services after a transition period. These new disaggregated services will include mandated access to high-speed services provided over fibre-access facilities, including the fibre-access facilities of the large incumbent telephone companies. Implementation of these new wholesale services could permit Internet resellers to enhance their service offerings in the retail market, thereby affecting the Corporation's competitive position as well its ability to recover the cost of providing underlying network services.

License renewals

Videotron's AWS-1 licenses were renewed in December 2018 for a 20-year term. Videotron's other spectrum licenses, including in the AWS-3, 700 MHz, 2500 MHz, 600 MHz and 3500 MHz bands, are issued for 20-year terms from their respective dates of issuance. At the end of these terms, the Corporation expects that new licenses will be issued for subsequent terms through a renewal process, unless a breach of licence conditions has occurred, a fundamental reallocation of spectrum to a new service is required, or in the event that an overriding policy need arises. The process for issuing or renewing licenses, including the terms and conditions of the new licenses and whether license fees should apply for a subsequent license term, are expected to be determined by ISED Canada.

If, at the end of their respective term, the licenses are not renewed on acceptable terms, or at all, the Corporation's ability to continue to offer its wireless services, or to offer new services, may be negatively impacted, or its cost structure could materially increase, and, consequently, it could have a material adverse effect on its business, prospects, results of operations and financial condition.

Government programs

The Corporation benefits from several government programs developed to support major investment projects, the deployment of high-speed Internet services in various regions of Québec, the production and distribution of televisual and cinematographic products, and magazine publishing in Canada, including federal and provincial refundable tax credits. There can be no assurance that the local cultural incentive programs that the Corporation may access in Canada will continue to be available in the future or will not be reduced, amended or eliminated. Any future reductions or other changes in the policies or rules of application in Canada or in any of its provinces in connection with these government incentive programs, including any change in the Québec or the federal programs providing for refundable tax credits, could, among other things, increase the cost of acquiring Canadian content or investment projects affected by these programs and influence the programming of content broadcast or the Corporation's decision to initiate certain investment projects, including incur capital expenditures for the extension of its wireline and mobile networks, which could have a material adverse effect on its results of operations and financial condition. Canadian content programming is also subject to certification by various agencies of the federal government. If programming fails to so qualify, the Corporation would not be able to use the programs to meet Canadian content programming obligations and might not qualify for certain Canadian tax credits and government incentives.

In addition, the Canadian and provincial governments currently provide grants, incentives and tax credits to attract foreign producers and support domestic film and television production. Many of the major studios and other key customers of the Corporation's film production and audiovisual services business, content producers for its broadcasting operations, as well as its production and distribution business, finance a portion of their production budgets through these grants, incentives and tax credits. There can be no assurance that these grants, incentives and tax credits will continue at their present levels or at all, and if they are reduced or discontinued, the level of activity in the motion picture and television industries may be reduced, as a result of which the Corporation's results of operations and financial condition might be adversely affected.

The successful tax credit model of Québec and other provinces in Canada has been copied by other jurisdictions. Some producers may select locations other than Québec to take advantage of other tax credit programs. Other factors, such as director or star preference, may also have the effect of productions being shot in a location other than Québec and may therefore have a material adverse effect on the Corporation's business, results of operations and financial condition.

Environmental laws and regulations and climate change

The Corporation is subject to a variety of environmental laws and regulations. Some of its facilities are subject to federal, provincial, state and municipal laws and regulations concerning, for example, emissions to the air, water and sewer discharge, the handling and disposal of hazardous materials and waste, including electronic waste, recycling, soil remediation of contaminated sites, or otherwise relating to the protection of the environment. In addition, laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances in the workplace, also govern the Corporation's operations. Failure to comply with present or future laws or regulations could result in substantial liability for the Corporation.

Environmental laws and regulations and their interpretation have changed rapidly in recent years and may continue to do so in the future. For instance, most Canadian provinces have implemented Extended Producer Responsibility regulations in order to encourage sustainability practices such as the "Ecological recovery and reclamation of electronic products", which sets certain recovery targets and which may require the Corporation to monitor and adjust its practices in the future. Evolving public expectations with respect to the environment and increasingly stringent laws and regulations could result in increased costs of compliance, and failure to recognize and adequately respond to them could result in fines, regulatory scrutiny, or have a significant effect on the Corporation's reputation and brands.

The Corporation's properties, as well as areas surrounding those properties, particularly those in areas of long-term industrial use, may have had historic uses, or may have current uses, in the case of surrounding properties, which may affect its properties and require further study or remedial measures. The Corporation cannot provide assurance that all environmental liabilities have been determined, that any prior owner of its properties did not create a material environmental condition not known to the Corporation, that a material environmental condition does not otherwise exist on any of its properties, or that expenditure will not be required to deal with known or unknown contamination.

The Corporation owns, through its subsidiaries, certain properties located on partially remediated former landfills. The operation and ownership of these properties carry inherent risks of environmental and health and safety liabilities, including for personal injuries, property damage, release of hazardous materials, remediation and clean-up costs and other environmental damages. The Corporation may, from time to time, be involved in administrative and judicial proceedings relating to such matters, which could have a material adverse effect on its business, financial condition and results of operations.

Finally, the effects of global climate change are increasing the severity and frequency of extreme weather-related events and will potentially result in increased operational and capital costs. Some of the more significant climate-related risks that were identified include potential increased operational costs to maintain the Corporation's network operations during extreme weather events, and potential increased capital costs as a result of damage to its facilities and/or equipment, and disruption of operations. The effects of global climate change may in turn also affect the Corporation's team members' ability to manage the Corporation, and affect the communities in which it operates, which could have a material adverse effect on its business, financial condition, and results of operations.

Concerns about alleged health risks relating to radiofrequency emissions

All the Corporation's cell sites comply with applicable laws and it relies on its suppliers to ensure that the network equipment and customer equipment supplied to it meet all applicable regulatory and safety requirements. Nevertheless, some studies have alleged links between radiofrequency emissions from certain wireless devices and cell sites and various health problems, or possible interference with electronic medical devices, including hearing aids and pacemakers. There is no definitive evidence of harmful effects from exposure to radiofrequency emissions when the limits imposed by applicable laws and regulations are complied with. Additional studies of radiofrequency emissions are ongoing and there is no certainty as to the results of any such future studies.

The current concerns over radiofrequency emissions or perceived health risks of exposure to radiofrequency emissions could lead to additional governmental regulation, diminished use of wireless services, including Videotron's, or product liability lawsuits that might arise or have arisen. Any of these could have a material adverse effect on the Corporation's business, prospects, revenues, financial condition and results of operations.

Indebtedness

Quebecor currently has a substantial amount of debt and significant interest payment requirements. As at December 31, 2021, it had $6.52 billion of consolidated long-term debt (long-term debt plus bank indebtedness). Quebecor's indebtedness could have significant consequences, including the following:

- increase its vulnerability to general adverse economic and industry conditions;
- require it to dedicate a substantial portion of its cash flow from operations to making interest and principal payments on its indebtedness, reducing the availability of its cash flow to fund capital expenditures, working capital and other general corporate purposes;
- limit its flexibility in planning for, or reacting to, changes in its businesses and the industries in which Quebecor operates;
- place it at a competitive disadvantage compared to competitors with less debt or greater financial resources; and
- limit, along with the financial and other restrictive covenants in its indebtedness, its ability to, among other things, borrow additional funds on commercially reasonable terms, if at all.

Although Quebecor has significant indebtedness, as at December 31, 20201, it had more than $1.58 billion available for additional borrowings under its existing credit facilities on a consolidated basis, and the indentures governing its outstanding Senior Notes would permit it to incur substantial additional indebtedness in the future. If Quebecor incurs additional debt, the risks it now faces as a result of its leverage could intensify.

Restrictive covenants

Quebecor's debt instruments contain a number of operating and financial covenants, which may vary depending on their respective governing terms, restricting its ability to, among other things:

- borrow money or sell preferred stock;
- create liens;
- pay dividends on or redeem or repurchase stock;
- make certain types of investments;
- restrict dividends or other payments by some subsidiaries;
- enter into transactions with affiliates;

- issue guarantees of debt; and
- sell assets or merge with other companies.

If Quebecor is unable to comply with these covenants and is unable to obtain waivers from its creditors, then it would be unable to make additional borrowings under its credit facilities. Its indebtedness under these agreements would be in default and that could, if not cured or waived, result in an acceleration of such indebtedness and cause cross-defaults under its other debt, including Senior Notes. If Quebecor's indebtedness is accelerated, it may not be able to repay its indebtedness or borrow sufficient funds to refinance it, and any such prepayment or refinancing could adversely affect Quebecor's financial condition. In addition, if Quebecor incurs additional debt in the future or refinances existing debt, it may be subject to additional covenants, which may be more restrictive than those to which it is currently subject. Even if Quebecor is able to comply with all applicable covenants, the restrictions on its ability to manage its business at its sole discretion could adversely affect its business by, among other things, limiting its ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that Quebecor believes would be beneficial.

Holding corporation

Quebecor is a holding corporation and a substantial portion of its assets is the capital stock of its subsidiaries. As a holding corporation, Quebecor conducts substantially all of its business through its subsidiaries, which generate substantially all of its revenues. Consequently, Quebecor's cash flow and ability to service its debt obligations are dependent on the cash flows of its existing and future subsidiaries and the distribution of this cash flow to Quebecor, or on loans, advances or other payments made by those entities to Quebecor. The ability of those entities to pay dividends or make loans, advances or payments to Quebecor will depend on their operating results and will be subject to applicable laws and contractual restrictions contained in the instruments governing their debt. Quebecor Media and Videotron have several series of debt securities outstanding, and the Quebecor Media, Videotron and TVA Group have credit facilities that limit their ability to distribute cash. In addition, if its existing or future subsidiaries incur additional debt in the future or refinance existing debt, Quebecor may be subject to additional contractual restrictions contained in the instruments governing that debt, which may be more restrictive than those to which it is currently subject.

The ability of its subsidiaries to generate sufficient cash flows from operations to allow Quebecor to make scheduled payments on its debt obligations will depend on their future financial performance, which will be affected by a range of economic, competitive and business factors as well as by structural changes, many of which are outside its or their control. If the cash flows and earnings of Quebecor's operating subsidiaries and the amount that they are able to distribute to Quebecor as dividends or otherwise are not sufficient for Quebecor, it may not be able to satisfy its debt obligations. If it is unable to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. It can provide no assurance that any such alternative refinancing would be possible; that any assets could be sold, or, if sold, the timing of the sales and the amount of proceeds realized from those sales; that additional financing could be obtained on acceptable terms, if at all; or that additional financing would be permitted under the terms of its various debt instruments then in effect. Inability to generate sufficient cash flows to satisfy Quebecor's debt obligations, or to refinance those obligations on commercially reasonable terms, could have a material adverse effect on its business, prospects, results of operations and financial condition.

Ability to refinance

Quebecor may be required from time to time to refinance some of its existing debt at or prior to maturity. Quebecor and its subsidiaries' ability to obtain additional financing to repay such existing debt at maturity will depend on a number of factors, including prevailing market conditions, credit availability and operating performance. There can be no assurance that any such financing will be available to Quebecor on favourable terms, or at all.

Provisions in the Articles that could discourage or prevent a takeover

Provisions in the Corporation's Articles and Bylaws could make it more difficult for a third party to acquire it, even if doing so would be beneficial in the opinion of the holders of Quebecor's Class B Shares. Those provisions principally include:

- the multiple voting feature of Quebecor's Class A Shares; and
- the election structure of the Board of Directors, whereby holders of Class A Shares elect 75% of the Corporation's directors, while holders of Class B Shares elect 25%.

The existence of these provisions could have the effect of delaying, preventing or deterring a change in control of Quebecor, could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Interests of holders of Quebecor's Class A Shares that may conflict with the interests of other shareholders

The Class B Shares have one vote per share, while the Class A Shares have 10 votes per share on all matters to be voted on by shareholders, with the exception of matters where the holders of shares of a single class are entitled to vote separately. As of December 31, 2021 approximately 74.3% of the combined voting power of all outstanding shares is controlled by a majority shareholder, and the exercise of the voting rights attached to those shares makes it possible to decide or significantly influence all issues submitted to a shareholder vote, including the election of Class A directors and approval of significant corporate transactions, such as amendments to the Corporation's Articles, mergers, amalgamations, or the sale of all or substantially all of its assets.

The holders of the Class A Shares may also have interests that differ from those of the other shareholders and may vote in a way with which other shareholders disagree and which may be adverse to their interests. This concentration of voting power may have the effect of delaying, preventing, or deterring a change in control of Quebecor; could deprive its shareholders of an opportunity to receive a premium for their Class B Shares as part of a sale of Quebecor, and might ultimately affect the market price of its shares.

Financial Instruments and Financial Risk Management

The Corporation's financial risk-management policies have been established in order to identify and analyze the risks faced by the Corporation, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk-management policies are reviewed regularly to reflect changes in market conditions and in the Corporation's activities.

The Corporation uses a number of financial instruments, mainly cash and cash equivalents, restricted cash, trade receivables, contract assets, long-term investments, bank indebtedness, trade payables, accrued liabilities, long-term debt, convertible debentures, lease liabilities and derivative financial instruments. As a result of its use of financial instruments, the Corporation is exposed to credit risk, liquidity risk and market risks relating to foreign exchange fluctuations and interest rate fluctuations.

In order to manage its foreign exchange and interest rate risks, the Corporation uses derivative financial instruments: (i) to set in CAN dollars future payments on debts denominated in U.S. dollars (interest and principal) and certain purchases of inventories and other capital expenditures denominated in a foreign currency; and (ii) to achieve a targeted balance of fixed- and floating rate debt. The Corporation does not intend to settle its derivative financial instruments prior to their maturity as none of these instruments is held or issued for speculative purposes.

Table 8
Description of derivative financial instruments at December 31, 2021
(in millions of dollars)

Foreign exchange forward contracts

Maturity	CAN dollar average exchange rate per one U.S. dollar	Notional amount sold	Notional amount bought
Videotron			
Less than 1 year	1.2578	$ 177.4	US$ 141.0

Hedged item	Hedging instrument			
	Period covered	Notional amount	Annual interest rate on notional amount in CAN dollars	CAN dollar exchange rate on interest and capital payments per one U.S. dollar
Quebecor Media				
5.750% Senior Notes due 2023	2016 to 2023	US$ 431.3	7.27%	0.9792
5.750% Senior Notes due 2023	2012 to 2023	US$ 418.7	6.85%	0.9759
Videotron				
5.375% Senior Notes due 2024	2014 to 2024	US$ 158.6	Bankers' acceptance 3 months + 2.67%	1.1034
5.375% Senior Notes due 2024	2017 to 2024	US$ 441.4	5.62%	1.1039
5.125% Senior Notes due 2027	2017 to 2027	US$ 600.0	4.82%	1.3407
3.625% Senior Notes due 2029	2021 to 2029	US$ 500.0	4.04%	1.2109

Cross-currency swaps

Certain cross-currency swaps entered into by the Corporation include an option that allows each party to unwind the transaction on a specific date at the then settlement amount.

The gains on valuation and translation of financial instruments for 2021 and 2020 are summarized in Table 10.

Table 9
Gain on valuation and translation of financial instruments
(in millions of Canadian dollars)

	2021	2020
Gain on embedded derivatives related to convertible debentures	**$ (14.9)**	$ (9.3)
Other	**0.5**	1.3
	$ (14.4)	$ (8.0)

A $0.4 million gain on cash flow hedges was recorded under other comprehensive income in 2021 ($17.1 million loss in 2020).

Fair Value of Financial Instruments

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates. An adjustment is also included to reflect non-performance risk, impacted by the financial and economic environment prevailing at the date of the valuation, in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market, to the net exposure of the counterparty or the Corporation.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using market inputs, including volatility, discount factors and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of December 31, 2021 and December 31, 2020 were as follows:

Table 10
Fair value of long-term debt, convertible debentures and derivative financial instruments
(in millions of Canadian dollars)

		2021		2020
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,554.0)**	**$ (6,660.4)**	$ (5,786.4)	$ (6,216.1)
Convertible debentures[2]	**(139.5)**	**(139.5)**	(153.5)	(153.5)
Derivative financial instruments[3]				
Foreign exchange forward contracts	**0.9**	**0.9**	(8.0)	(8.0)
Cross-currency swaps	**381.4**	**381.4**	605.1	605.1

1 The carrying value of long-term debt excludes the fair value of long-term debt related to hedged interest rate risk and financing costs.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

3 The net fair value of derivative financial instruments designated as cash flow hedges is an asset position of $348.1 million as of December 31, 2021 ($552.5 million at December 31, 2020) and the net fair value of derivative financial instruments designated as fair value hedges is an asset position of $34.2 million as of December 31, 2021 ($44.6 million at December 31, 2020).

Due to the judgment used in applying a wide range of acceptable techniques and estimates in calculating fair value amounts, fair values are not necessarily comparable among financial institutions or other market participants and may not be realized in an actual sale or on the immediate settlement of the instrument.

Credit risk management

Credit risk is the risk of financial loss to the Corporation if a customer or counterparty to a financial asset fails to meet its contractual obligations and arises principally from amounts receivable from customers, including contract assets.

The gross carrying amounts of financial assets represent the maximum credit exposure. As of December 31, 2021, the gross carrying amount of trade receivables and contract assets, including their long-term portions, was $913.4 million ($790.2 million as of December 31, 2020).

In the normal course of business, the Corporation continuously monitors the financial condition of its customers and reviews the credit history of each new customer. The Corporation uses its customers' historical terms of payment and acceptable collection periods for each customer class, as well as changes in its customers' credit profiles, to define default to collect amounts receivable from customers, including contract assets.

As of December 31, 2021, no customer balance represented a significant portion of the Corporation's consolidated trade receivables. The Corporation is using the expected credit losses method to estimate its provision for credit losses, which considers the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions As of December 31, 2021, the provision for expected credit losses represented 2.0% of the gross amount of trade receivables and contract assets (2.6% as of December 31, 2020), while 6.9% of trade receivables were 90 days past their billing date (5.0% as of December 31, 2020).

The following table shows changes to the provision for expected credit losses for the years ended December 31, 2021 and 2020:

	2021	2020
Balance at beginning of year	**$ 20.8**	$ 19.6
Changes in expected credit losses charged to income	**17.2**	17.4
Write-off	**(19.5)**	(16.2)
Balance at end of year	**$ 18.5**	$ 20.8

The Corporation believes that its product lines and the diversity of its customer base are instrumental in reducing its credit risk, as well as the impact of fluctuations in product-line demand. The Corporation does not believe that it is exposed to an unusual level of customer credit risk.

As a result of its use of derivative financial instruments, the Corporation is exposed to the risk of non-performance by a third party. When the Corporation enters into derivative contracts, the counterparties (either foreign or Canadian) must have credit ratings at least in accordance with the Corporation's risk-management policy and are subject to concentration limits. These credit ratings and concentration limits are monitored on an ongoing basis, but at least quarterly.

Liquidity risk management

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due or the risk that those financial obligations will have to be met at excessive cost. The Corporation manages this exposure through staggered debt maturities. The weighted average term of the Corporation's consolidated debt was approximately 5.1 years as of December 31, 2021, compared with 4.3 years at December 31, 2020.

Market risk

Market risk is the risk that changes in market prices due to foreign exchange rates, interest rates and/or equity prices will affect the value of the Corporation's financial instruments. The objective of market risk management is to mitigate and control exposures within acceptable parameters while optimizing the return on risk.

Foreign currency risk

Most of the Corporation's consolidated revenues and expenses, other than interest expense on U.S.-dollar-denominated debt, purchases of set-top boxes, gateways, modems, mobile devices and certain capital expenditures, are received or denominated in CAN dollars. A significant portion of the interest, principal and premium, if any, payable on its debt is payable in U.S. dollars. The Corporation has entered into transactions to hedge the foreign currency risk exposure on its U.S.-dollar-denominated debt obligations outstanding as of December 31, 2021, and to hedge its exposure on certain purchases of set-top boxes, gateways, modems, mobile devices and capital expenditures. Accordingly, the Corporation's sensitivity to variations in foreign exchange rates is economically limited.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a variance of $0.10 in the year-end exchange rate of a CAN dollar per one U.S. dollar used to calculate the fair value of financial instruments as of December 31, 2021 is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of $0.10	**$ 0.7**	**$ 35.1**
Decrease of $0.10	**(0.7)**	**(35.1)**

A variance of $0.10 in the 2021 average exchange rate of CAN dollar per one U.S. dollar would have resulted in a variance of $8.8 million on the value of unhedged purchases of goods and services and $6.6 million on the value of unhedged acquisitions of tangible and intangible assets in 2021.

A variance of 10% in the exchange rate of CAN dollar per one Turkish Lira as of December 31, 2021 would have resulted in a variance of $3.2 million of the loss on translation of investments in foreign associates in the consolidated statements of comprehensive income.

Interest rate risk

Some of the Corporation's bank credit facilities bear interest at floating rates based on the following reference rates: (i) Bankers' acceptance rate, (ii) LIBOR, (iii) Canadian prime rate, and (iv) U.S. prime rate. The Senior Notes issued by the Corporation bear interest at fixed rates. The Corporation has entered into cross-currency swap agreements in order to manage cash flow risk exposure. After taking into account hedging instruments, the debt consisted of approximately 91.7% fixed-rate debt, compared with 96.1% at December 31, 2020, and 8.3% floating-rate debt, compared with 3.9% at December 31, 2020.

The estimated sensitivity on interest payments of a 100 basis-point variance in the year-end Canadian Bankers' acceptance rate as of December 31, 2021 was $5.2 million.

The estimated sensitivity on income and on other comprehensive income, before income taxes, of a 100 basis-point variance in the discount rate used to calculate the fair value of financial instruments, other than convertible debentures and embedded derivatives related to convertible debentures, as of December 31, 2021, as per the Corporation's valuation models, is as follows:

Increase (decrease)	**Income**	**Other comprehensive income**
Increase of 100 basis points	**$ (0.7)**	**$ (5.2)**
Decrease of 100 basis points	**0.7**	**5.2**

Capital management

The Corporation's primary objective in managing capital is to maintain an optimal capital base in order to support the capital requirements of its various businesses, including growth opportunities.

In managing its capital structure, the Corporation takes into account the asset characteristics of its subsidiaries and planned requirements for funds, leveraging their individual borrowing capacities in the most efficient manner to achieve the lowest cost of financing. Management of the capital structure involves the issuance and repayment of debt and convertible debentures, the issuance and repurchase of shares, the use of cash flows generated by operations, and the level of distributions to shareholders. The Corporation has not significantly changed its strategy regarding the management of its capital structure since the last financial year.

The Corporation's capital structure is composed of equity, bank indebtedness, long-term debt, convertible debentures, embedded derivatives related to convertible debentures, lease liabilities, derivative financial instruments and cash and cash equivalents. The capital structure as of December 31, 2021 and 2020 is as follows:

Table 11
Capital structure of Quebecor
(in millions of Canadian dollars)

		2021		2020
Bank indebtedness	**$**	**–**	$	1.7
Long-term debt		**6,524.4**		5,773.4
Convertible debentures		**150.0**		150.0
Embedded derivatives related to convertible debentures		**(8.4)**		6.5
Lease liabilities		**183.2**		173.3
Derivative financial instruments		**(382.3)**		(597.1)
Cash and cash equivalents		**(64.7)**		(136.7)
Net liabilities		**6,402.2**		5,371.1
Equity	**$**	**1,378.8**	$	1,214.1

The Corporation is not subject to any externally imposed capital requirements other than certain restrictions under the terms of its borrowing agreements, which relate, among other things, to permitted investments, intercompany transactions, and the declaration and payment of dividends or other distributions.

Contingencies and legal disputes

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation’s results or on its financial position.

There are also a number of other legal proceedings against the Corporation that are pending. Generally, management of the Corporation establishes provisions for claims or actions considering the facts of each case. The Corporation cannot determine when and if any payment will be made related to these legal proceedings.

In August 2021, a competitor launched legal proceedings in Federal Court contesting the awarding of licences in the 3500 MHZ band in Western Canada to Videotron. This case is currently before the Court.

On August 15, 2019, the CRTC issued an order to finalize the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 had been invoiced to resellers and accounted for in the Corporation’s consolidated financial statements on the basis of the effective date of March 31, 2016. The new proposed rates were substantially lower than the interim rates. On May 27, 2021, the CRTC restored, in a final decision, the interim rates that had been in effect since 2016. Accordingly, no adjustments are necessary to the consolidated financial statements.

Critical Accounting Policies and Estimates

Revenue recognition

The Corporation accounts for a contract with a customer only when all of the following criteria are met:

- the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- the entity can identify each party’s rights regarding the goods or services to be transferred;
- the entity can identify the payment terms for the goods or services to be transferred;
- the contract has commercial substance (i.e. the risk, timing or amount of the entity’s future cash flows is expected to change as a result of the contract); and
- it is probable that the entity will collect the consideration to which it is entitled in exchange for the goods or services to be transferred to the customer.

The portion of revenues that is invoiced and unearned is presented as “Deferred revenue” in the consolidated balance sheets. Deferred revenue is usually recognized as revenue in the subsequent year.

Telecommunications

The Telecommunications segment provides services under multiple deliverable arrangements, mainly for mobile contracts in which the sale of mobile devices is bundled with telecommunication services over the contract term. The total consideration from a contract with multiple deliverables is allocated to all performance obligations in the contract based on the stand-alone selling price of each obligation. The total consideration can be comprised of an upfront fee or a number of monthly installments for the equipment sale and a monthly fee for the telecommunication service. Each performance obligation of multiple deliverable arrangements is then separately accounted for based on its allocated consideration amount.

The Corporation does not adjust the amount of consideration allocated to the equipment sale for the effects of a financing component since this component is not significant.

The Telecommunications segment recognizes each of its main activities’ revenues as follows:

- operating revenues from subscriber services, such as television distribution, Internet access, wireline and mobile telephony, and OTT video services are recognized when services are provided;
- revenues from equipment sales to subscribers are recognized when the equipment is delivered;
- operating revenues related to service contracts are recognized in income on a straight-line basis over the period in which the services are provided; and
- wireline connection and mobile activation revenues are deferred and recognized respectively as revenues over the period of time the customer is expected to remain a customer of the Corporation and over the contract term.

When a mobile device and a service are bundled under a single mobile contract, the term of the contract is generally 24 months.

The portion of mobile revenues earned without being invoiced is presented as contract assets in the consolidated balance sheets. Contract assets are realized over the term of the contract.

Media

The Media segment recognizes each of its main activities’ revenues as follows:

- advertising revenues are recognized when the advertising is aired on television, is featured in newspapers or magazines or is displayed on the digital properties or on transit shelters;
- revenues from subscriptions to specialty television channels or to online publications are recognized on a monthly basis at the time service is provided or over the period of the subscription;
- revenues from the sale or distribution of newspapers and magazines are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- soundstage and equipment rental revenues are recognized over the rental period;
- revenues derived from speciality film and television services are recognized when services are provided; and
- revenues from distribution of audiovisual content are recognized when the content has been delivered and accepted in accordance with the conditions of the licence or distribution agreement.

Sports and Entertainment

The Sports and Entertainment segment recognizes each of its main activities’ revenues as follows:

- revenues from the sale or distribution of books and entertainment products are recognized upon delivery, net of provisions for estimated returns based on historical rate of returns;
- revenues from venue rental, ticket sales (including season tickets) and sales from food concessions are recognized when the events take place and/or goods are sold, as the case may be;
- revenues from the rental of suites are recognized ratably over the period of the agreement;
- revenues from the sale of advertising in the form of venue signage or sponsorships are recognized ratably over the period of the agreement; and
- revenues derived from sporting and cultural event management are recognized when services are provided.

Impairment of assets

For the purposes of assessing impairment, assets are grouped in cash-generating units ("CGUs"), which represent the lowest levels for which there are separately identifiable cash inflows generated by those assets. The Corporation reviews, at each balance sheet date, whether events or circumstances have occurred to indicate that the carrying amounts of its long-lived assets with finite useful lives may be less than their recoverable amounts. Goodwill, intangible assets having an indefinite useful life, and intangible assets not yet available for use are tested for impairment each financial year, as well as whenever there is an indication that the carrying amount of the asset, or the CGU to which an asset has been allocated, exceeds its recoverable amount. The recoverable amount is the higher of the fair value less costs of disposal and the value in use of the asset or the CGU. Fair value less costs of disposal represents the amount an entity could obtain at the valuation date from the asset's disposal in an arm's length transaction between knowledgeable, willing parties, after deducting the costs of disposal. The value in use represents the present value of the future cash flows expected to be derived from the asset or the CGU.

The Corporation uses the discounted cash flow method to estimate the recoverable amount, consisting of future cash flows derived primarily from the most recent budget and three-year strategic plan approved by the Corporation's management and presented to the Board of Directors. These forecasts considered each CGU's past operating performance and market share as well as economic trends, along with specific and market industry trends and corporate strategies. A perpetual growth rate is used for cash flows beyond the three-year strategic plan period. The discount rate used by the Corporation is a pre-tax rate derived from the weighted average cost of capital pertaining to each CGU, which reflects the current market assessment of: (i) the time value of money; and (ii) the risk specific to the assets for which the future cash flow estimates have not been risk-adjusted. The perpetual growth rate was determined with regard to the specific markets in which the CGUs participate.

An impairment loss is recognized in the amount by which the carrying amount of an asset or a CGU exceeds its recoverable amount. When the recoverable amount of a CGU to which goodwill has been allocated is lower than the CGU's carrying amount, the related goodwill is first impaired. Any excess amount of impairment is recognized and attributed to assets in the CGU, prorated to the carrying amount of each asset in the CGU.

An impairment loss recognized in prior periods for long-lived assets with finite useful lives and intangible assets having an indefinite useful life, other than goodwill, can be reversed through the consolidated statement of income to the extent that the resulting carrying value does not exceed the carrying value that would have been the result had no impairment loss been recognized previously.

When determining the recoverable amount of an asset or CGU, assessment of the information available at the valuation date is based on management's judgment and may involve estimates and assumptions. Furthermore, the discounted cash flow method used in determining the recoverable amount of an asset or CGU relies on the use of estimates such as the amount and timing of cash flows, expected variations in the amount or timing of those cash flows, the time value of money as represented by the risk-free rate, and the risk premium associated with the asset or CGU.

Therefore, the judgment used in determining the recoverable amount of an asset or CGU may affect the amount of the impairment loss to be recorded to an asset or CGU, as well as the potential reversal of the impairment charge in the future.

Based on the data and assumptions used in its last impairment test, the Corporation believes that there is no significant amount of long-lived assets with finite useful lives, or goodwill and intangible assets with indefinite useful lives, on its books at this time that present a significant risk of impairment in the near future.

The net book value of goodwill as at December 31, 2021 was $2.72 billion, and the net book value of intangible assets with indefinite useful lives as at December 31, 2021 was $1.57 billion.

Indefinite useful life of spectrum licences

Management has concluded that spectrum licences have an indefinite useful life. This conclusion was based on an analysis of factors, such as the Corporation's financial ability to renew the spectrum licences, the competitive, legal and regulatory landscape, and future expectations regarding the use of the spectrum licences. The determination that spectrum licences have an indefinite useful life therefore involves judgment, which could have an impact on the amortization charge recorded in the consolidated statements of income if management were to change its conclusion in the future.

Derivative financial instruments and hedge accounting

The Corporation uses various derivative financial instruments to manage its exposure to fluctuations in foreign currency exchange rates and interest rates. The Corporation does not hold or use any derivative financial instruments for speculative purposes. Under hedge accounting, the Corporation documents all hedging relationships between hedging instruments and hedged items, as well as its strategy for using hedges and its risk-management objective. It also designates its derivative financial instruments as either fair value hedges or cash flow hedges when they qualify for hedge accounting. The Corporation assesses the effectiveness of its hedging relationships at initiation and on an ongoing basis.

The Corporation generally enters into the following types of derivative financial instruments.

- The Corporation uses foreign exchange forward contracts to hedge foreign currency rate exposure on anticipated equipment or inventory purchases in a foreign currency. These foreign exchange forward contracts are designated as cash flow hedges.
- The Corporation uses cross-currency swaps to hedge (i) foreign currency rate exposure on interest and principal payments on foreign currency denominated debt and/or (ii) fair value exposure on certain debt resulting from changes in interest rates. The cross-currency swaps that set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting an interest rate from a floating rate to a floating rate or from a fixed rate to a fixed rate, are designated as cash flow hedges. The cross-currency swaps are designated as fair value hedges when they set all future interest and principal payments on U.S.-dollar-denominated debt in fixed CAN dollars, in addition to converting the interest rate from a fixed rate to a floating rate.
- The Corporation has established a hedge ratio of one for one for all its hedging relationships as the underlying risks of its hedging derivatives are identical to the hedged item risks.

The Corporation measures and records the effectiveness of its hedging relationships as follows.

- For cash flow hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of a hypothetical derivative that simulates cash flows of the hedged items .
- For fair value hedges, the hedge effectiveness is tested and measured by comparing changes in the fair value of the hedging derivative with the changes in the fair value of the hedged item attributable to the hedged risk.
- Most of the Corporation’s hedging relationships are not generating material ineffectiveness. The ineffectiveness, if any, is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Under hedge accounting, the Corporation applies the following accounting policies.

- For derivative financial instruments designated as fair value hedges, changes in the fair value of the hedging derivative recorded in income are substantially offset by changes in the fair value of the hedged item to the extent that the hedging relationship is effective. When a fair value hedge is discontinued, the carrying value of the hedged item is no longer adjusted and the cumulative fair value adjustments to the carrying value of the hedged item are amortized to income over the remaining term of the original hedging relationship.
- For derivative financial instruments designated as cash flow hedges, the effective portion of a hedge is reported in other comprehensive income until it is recognized in income during the same period in which the hedged item affects income, while the ineffective portion is immediately recognized in income. When a cash flow hedge is discontinued, the amounts previously recognized in accumulated “other comprehensive income” are reclassified to income when the variability in the cash flows of the hedged item affects income.

Any change in the fair value of derivative financial instruments recorded in income is included in gain or loss on valuation and translation of financial instruments. Interest expense on hedged long-term debt is reported at the hedged interest and foreign currency rates.

Derivative financial instruments that do not qualify for hedge accounting, including derivatives that are embedded in financial or non-financial contracts that are not closely related to the host contracts, are reported on a fair value basis on the consolidated balance sheets. Any change in the fair value of these derivative financial instruments is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Convertible debentures

The convertible debentures are accounted for as a financial liability and the cap and floor conversion price features are accounted for separately as embedded derivatives. The embedded derivatives are measured at fair value and any subsequent change in the fair value is recorded in the consolidated statements of income as a gain or loss on valuation and translation of financial instruments.

Pension plans and postretirement benefits

The Corporation offers defined contribution pension plans and defined benefit pension plans to some of its employees.

Quebecor Media's defined benefit obligations with respect to defined benefit pension plans and postretirement benefits are measured at present value and assessed on the basis of a number of economic and demographic assumptions which are established with the assistance of Quebecor Media's actuaries. Key assumptions relate to the discount rate, the rate of increase in compensation, retirement age of employees, healthcare costs, and other actuarial factors. Defined benefit pension plan assets are measured at fair value and consist mainly of equities and corporate and government fixed-income securities.

Remeasurements of the net defined benefit liability or asset are recognized immediately in other comprehensive income.

Recognition of a net benefit asset is limited under certain circumstances to the amount recoverable, which is primarily based on the present value of future contributions to the plan, to the extent that the Corporation can unilaterally reduce those future contributions. In addition, an adjustment to the net benefit asset or the net benefit liability can be recorded to reflect a minimum funding liability in a certain number of the Corporation's pension plans. The assessment of the amount recoverable in the future and the minimum funding liability is based on a number of assumptions, including future service costs and future plan contributions.

The Corporation considers all the assumptions used to be reasonable in view of the information available at this time. However, variances from certain of those assumptions may have a significant impact on the costs and obligations of pension plans and postretirement benefits in future periods.

Share-based compensation

Stock-based awards to employees that call for settlement in cash, deferred share units ("DSUs") or performance share units ("PSUs"), or that call for settlement in cash at the option of the employee, as stock options awards, are accounted for at fair value and classified as a liability. The compensation cost is recognized in expenses over the vesting period. Changes in the fair value of stock-based awards between the grant date and the measurement date result in a change in the liability and compensation cost.

The fair value of DSUs and PSUs is based on the underlying share price at the date of valuation. The fair value of stock option awards is determined by applying an option pricing model, taking into account the terms and conditions of the grant and assumptions such as the risk-free interest rate, distribution yield, expected volatility, and the expected remaining life of the option.

Provisions

Provisions are recognized (i) when the Corporation has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and (ii) when the amount of the obligation can be reliably estimated. Restructuring costs, comprised primarily of termination benefits, are recognized when a detailed plan for the restructuring exists and a valid expectation has been raised in those affected that the plan will be carried out.

Provisions are reviewed at each consolidated balance sheet date and changes in estimates are reflected in the consolidated statements of income in the reporting period in which the changes occur.

The amount recognized as a provision is the best estimate of the expenditures required to settle the present obligation at the balance sheet date or to transfer it to a third party at that time and it is adjusted for the effect of time value when material. The amount recognized for onerous contracts is the lower of the cost necessary to fulfill the obligations, net of expected economic benefits deriving from the contracts, and any indemnity or penalty arising from failure to fulfill those obligations.

No amounts are recognized for obligations that are possible but not probable or for those for which an amount cannot be reasonably estimated.

Contract costs

Incremental and direct costs, such as costs to obtain a contract, mainly sales commissions, or the cost of connecting a subscriber to the Corporation's telecommunication network, are included in contract costs and amortized over the period of time the customer is expected to maintain its service or over the contract term. The amortization of contract costs is included in purchase of goods and services in the consolidated statements of income.

Provision for expected credit losses

The Corporation maintains a provision to cover anticipated credit losses from customers who are unable to pay their debts. The provision is reviewed periodically, considering the specific credit risk of its customers, the expected lifetime of its financial assets, historical trends and economic conditions.

Business acquisitions

A business acquisition is accounted for by the acquisition method. The cost of an acquisition is measured at the fair value of the consideration given in exchange for control of the business acquired at the acquisition date. This consideration can be comprised of cash, assets transferred, financial instruments issued, or future contingent payments. The identifiable assets and liabilities of the acquired business are recognized at their fair value at the acquisition date. Goodwill is measured and recognized as the excess of the fair value of the consideration paid over the fair value of the recognized identifiable assets acquired and liabilities assumed.

Determining the fair value of certain acquired assets, assumed liabilities and future contingent considerations requires judgment and involves complete and absolute reliance on estimates and assumptions. The Corporation primarily uses the discounted future cash flows approach to estimate the value of acquired intangible assets.

The estimates and assumptions used in the allocation of the purchase price at the date of acquisition may also have an impact on the amount of an impairment charge to be recognized, if any, after the date of acquisition, as discussed above under "Impairment of assets."

Contingent considerations and future conditional adjustments

Contingent considerations and future conditional adjustments arising from business acquisition or disposal are measured and accounted for at their fair value. The fair value is estimated based on a present value model requiring management to assess the probabilities that the conditions on which the contingent considerations and future conditional adjustments are based will be met in the future. The assessment of these contingent and conditional potential outcomes requires judgment from management and could have an impact on the initial amount of contingent considerations or future conditional adjustments recognized and on any subsequent changes in fair value recorded in the consolidated statements of income.

Interpretation of laws and regulations

Interpretation of laws and regulations, including those of the CRTC and tax regulations, requires judgment from management and could have an impact on revenue recognition, provisions, income taxes and capital expenditures in the consolidated financial statements.

Tax credits and government assistance

The Corporation has access to several government programs designed to support large investment projects, the roll-out of high-speed Internet services in various regions of Québec, production and distribution of televisual products and movies, as well as music products, magazine and book publishing in Canada. In addition, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Emergency Wage Subsidy program available during the health crisis. The Corporation also receives tax credits mainly related to its research and development activities, publishing activities and digital activities. Government financial assistance is accounted for as revenue or as a reduction in related costs, whether capitalized and amortized or expensed, in the year the costs are incurred and when management has reasonable assurance that the conditions of the government programs are being met.

Income taxes

Deferred income taxes are accounted for using the liability method. Under this method, deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the carrying amounts of existing assets and liabilities in the consolidated financial statements and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the substantive enactment date. A deferred tax asset is recognized initially when it is probable that future taxable income will be sufficient to use the related tax benefits and may be reduced subsequently, if necessary, to an amount that is more likely than not to be realized.

The assessment of deferred income taxes is judgmental in nature and is dependent on assumptions and estimates as to the availability and character of future taxable income. The ultimate amount of deferred income tax assets realized could be slightly different from that recorded, since it is influenced by the Corporation's future operating results.

The Corporation is under audit at all times by various tax authorities in each of the jurisdictions in which it operates. A number of years may elapse before a particular matter for which management has established a reserve is audited and resolved. The number of years between each tax audit varies depending on the tax jurisdiction. Management believes that its estimates are reasonable and reflect the probable outcome of known tax contingencies, although the outcome is difficult to predict.

Leases

The Corporation recognizes, for most of its leases, a right-of-use asset and a lease liability at the commencement of a lease. The right-of-use asset and the lease liability are initially measured at the present value of lease payments over the lease term, less incentive payments received, using the Corporation incremental borrowing rate or the interest rate implicit in the lease at that date. The term of the lease is comprised of the initial lease term and any additional period for which it is reasonably certain that the Corporation will exercise its extension option.

Right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset.

Interest on lease liabilities is recorded in the consolidated statements of income as financial expenses and principal payments on the lease liability are presented as part of financing activities in the consolidated statements of cash flows.

Non-IFRS financial measures

The financial measures not standardized under IFRS that are used by the Corporation to assess its financial performance, such as adjusted EBITDA, adjusted income from continuing operating activities, adjusted cash flows from operations, free cash flows from continuing operating activities and consolidated net debt leverage ratio, are not calculated in accordance with, or recognized by IFRS. The Corporation’s method of calculating these non-IFRS financial measures may differ from the methods used by other companies and, as a result, the non-IFRS financial measures presented in this document may not be comparable to other similarly titled measures disclosed by other companies.

Adjusted EBITDA

In its analysis of operating results, the Corporation defines adjusted EBITDA, as reconciled to net income under IFRS, as net income before depreciation and amortization, financial expenses, gain (loss) on valuation and translation of financial instruments, restructuring of operations and other items, loss on debt refinancing, income tax, and income (loss) from discontinued operations. Adjusted EBITDA as defined above is not a measure of results that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted EBITDA in order to assess the performance of its investment in Quebecor Media. The Corporation’s management and Board of Directors use this measure in evaluating its consolidated results as well as the results of the Corporation’s operating segments. This measure eliminates the significant level of impairment and depreciation/amortization of tangible and intangible assets and is unaffected by the capital structure or investment activities of the Corporation and its business segments.

Adjusted EBITDA is also relevant because it is a component of the Corporation’s annual incentive compensation programs. A limitation of this measure, however, is that it does not reflect the periodic costs of tangible and intangible assets used in generating revenues in the Corporation’s segments. The Corporation also uses other measures that do reflect such costs, such as adjusted cash flows from operations and free cash flows from continuing operating activities. The Corporation’s definition of adjusted EBITDA may not be the same as similarly titled measures reported by other companies.

Table 12 provides a reconciliation of adjusted EBITDA to net income as disclosed in Quebecor’s consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2021 and 2020 presented in Table 12 below is drawn from the Corporation’s unaudited quarterly consolidated financial statements.

Adjusted income from continuing operating activities

The Corporation defines adjusted income from continuing operating activities, as reconciled to net income attributable to shareholders under IFRS, as net income attributable to shareholders before gain (loss) on valuation and translation of financial instruments, restructuring of operations and other items, and loss on debt refinancing, net of income tax related to adjustments and net income attributable to non-controlling interest related to adjustments, and before income (loss) from discontinued operations attributable to shareholders. Adjusted income from continuing operating activities, as defined above, is not a measure of results that is consistent with IFRS. It should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Corporation uses adjusted income from continuing operating activities to analyze trends in the performance of its businesses. The above-listed items are excluded from the calculation of this measure because they impair the comparability of financial results. Adjusted income from continuing operating activities is more representative for forecasting income. The Corporation's definition of adjusted income from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Table 13 provides a reconciliation of adjusted income from continuing operating activities to the net income attributable to shareholders' measure used in Quebecor's consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2021 and 2020 presented in Table 13 below is drawn from the Corporation's unaudited quarterly consolidated financial statements.

Adjusted cash flows from operations and free cash flows from continuing operating activities

Adjusted cash flows from operations

Adjusted cash flows from operations represents adjusted EBITDA, less additions to property, plant and equipment and to intangible assets (excluding licence acquisitions and renewals). Adjusted cash flows from operations represents funds available for interest and income tax payments, expenditures related to restructuring programs, business acquisitions, licence acquisitions and renewals, payment of dividends, repayment of long-term debt and lease liabilities, and share repurchases. Adjusted cash flows from operations is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. Adjusted cash flows from operations is used by the Corporation's management and Board of Directors to evaluate the cash flows generated by the operations of all of its segments, on a consolidated basis, in addition to the operating cash flows generated by each segment. Cash flows from operations are also relevant because they are a component of the Corporation's annual incentive compensation programs. The Corporation's definition of adjusted cash flows from operations may not be identical to similarly titled measures reported by other companies.

Free cash flows from continuing operating activities

Free cash flows from continuing operating activities represents cash flows provided by continuing operating activities calculated in accordance with IFRS, less cash flows used for additions to property, plant and equipment and to intangible assets (excluding expenditures related to licence acquisitions and renewals), plus proceeds from disposal of assets. Free cash flows from continuing operating activities is used by the Corporation's management and Board of Directors to evaluate cash flows generated by the Corporation's operations. Free cash flows from continuing operating activities represents available funds for business acquisitions, licence acquisitions and renewals, payment of dividends, repayment of long-term debt and lease liabilities, and share repurchases. Free cash flows from continuing operating activities is not a measure of liquidity that is consistent with IFRS. It is not intended to be regarded as an alternative to IFRS financial performance measures or to the statement of cash flows as a measure of liquidity. The Corporation's definition of free cash flows from continuing operating activities may not be identical to similarly titled measures reported by other companies.

Tables 14 and 15 provide a reconciliation of adjusted cash flows from operations and free cash flows from continuing operating activities to cash flows provided by continuing operating activities reported in the consolidated financial statements. The consolidated financial information for the three-month periods ended December 31, 2021 and 2020 presented in tables 14 and 15 is drawn from the Corporation's unaudited quarterly consolidated financial statements.

Consolidated net debt leverage ratio

The consolidated net debt leverage ratio represents consolidated net debt, excluding convertible debentures, divided by the trailing 12-month adjusted EBITDA. Consolidated net debt, excluding convertible debentures, represents total long-term debt plus bank indebtedness, lease liabilities, the current portion of lease liabilities and liabilities related to derivative financial instruments, less assets related to derivative financial instruments and cash and cash equivalents. The consolidated net debt leverage ratio serves to evaluate the Corporation’s financial leverage and is used by management and the Board of Directors in its decisions on the Corporation’s capital structure, including its financing strategy, and in managing debt maturity risks. The consolidated net debt leverage ratio excludes convertible debentures because, subject to certain conditions, those debentures can be repurchased at the Corporation’s discretion by issuing Quebecor Class B Shares. Consolidated net debt leverage ratio is not a measure established in accordance with IFRS. It is not intended to be used as an alternative to IFRS measures or the balance sheet to evaluate its financial position. The Corporation’s definition of consolidated net debt leverage ratio may not be identical to similarly titled measures reported by other companies.

Table 16 provides the calculation of consolidated net debt leverage ratio and the reconciliation to balance sheet items reported in Quebecor's consolidated financial statements.

Table 16
Consolidated net debt leverage ratio
(in millions of Canadian dollars)

	Dec. 31, 2021	Dec. 31, 2020	Dec. 31, 2019

1 Excluding changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

Key performance indicators

Revenue-generating unit

The Corporation uses RGU, an industry metric, as a key performance indicator. An RGU represents, as the case may be, subscriptions to the Internet access, television and OTT video services, and subscriber connections to the mobile and wireline telephony services. RGU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of RGU may not be the same as identically titled measurements reported by other companies or published by public authorities.

Average billing per unit

The Corporation uses ABPU, an industry metric, as a key performance indicator. This indicator is used to measure monthly average subscription billing per RGU. ABPU is not a measurement that is consistent with IFRS and the Corporation's definition and calculation of ABPU may not be the same as identically titled measurements reported by other companies.

Mobile ABPU is calculated by dividing the average subscription billing for mobile telephony services by the average number of mobile RGUs during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Total ABPU is calculated by dividing the combined average subscription billing for Internet access, television, OTT video, mobile and wireline telephony services by the total average number of RGUs from Internet access, television, mobile and wireline telephony services during the applicable period, and then dividing the resulting amount by the number of months in the applicable period.

Controls and procedures

In accordance with Regulation 52-109 on Certification of Disclosure in Issuers' Annual and Interim Filings, the effectiveness of the Corporation's disclosure controls and procedures ("DCP") and "Internal control over financial reporting" ("ICFR") has been evaluated. Based on this evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that DCP and ICFR were effective as of the end of the financial year ended December 31, 2021, and that the DCP design provides reasonable assurance that material information relating to the Corporation, including its consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which the annual filings are being prepared, and the information that the Corporation must present in its annual documents, its interim documents or in other documents it files or submits under securities regulations is recorded, processed, condensed and presented within the timeframes prescribed by this legislation. Moreover, the design of ICFR provides reasonable assurance of the reliability of the Corporation’s financial reporting and of the preparation of its financial statements, for the purpose of financial reporting, in accordance with the IFRS.

Finally, no change to ICFR that has had or is liable to have a material effect was identified by the Corporation’s management during the financial period beginning October 1, 2021 and ending December 31, 2021.

Additional information

The Corporation is a reporting issuer subject to the securities laws of all Canadian provinces and is therefore required to file financial statements, a proxy circular and an annual information form with the various securities commissions. Copies of those documents are available free of charge from the Corporation on request at www.quebecor.com and on the SEDAR website at www.sedar.com.

Cautionary statement regarding forward-looking statements

The statements in this report that are not historical facts are forward-looking statements and are subject to significant known and unknown risks, uncertainties and assumptions that could cause the Corporation’s actual results for future periods to differ materially from those set forth in forward-looking statements. Forward-looking statements may be identified by the use of the conditional or by forward-looking terminology such as the terms “plans,” “expects,” “may,” “anticipates,” “intends,” “estimates,” “projects,” “seeks,” “believes,” or similar terms, variations of such terms or the negative of such terms. Some important factors that could cause actual results to differ materially from those expressed in these forward-looking statements include, but are not limited to:

- Quebecor Media’s ability to continue successfully developing its network and the facilities that support its mobile services;
- general economic, financial or market conditions and variations in the businesses of local, regional and national advertisers in Quebecor Media’s newspapers, television outlets and other media properties;
- the intensity of competitive activity in the industries in which Quebecor operates;
- fragmentation of the media landscape;
- new technologies that might change consumer behaviour with respect to Quebecor Media’s product suites;
- unanticipated higher capital spending required for developing Quebecor Media’s network or to address the continued development of competitive alternative technologies, or the inability to obtain additional capital to continue the development of Quebecor’s business;
- Quebecor’s ability to implement its business and operating strategies successfully and to manage its growth and expansion;
- disruptions to the network through which Quebecor Media provides its television, Internet access, mobile and wireline telephony and OTT video services, and its ability to protect such services against piracy, unauthorized access and other security breaches;
- labour disputes or strikes;
- service interruptions resulting from equipment breakdown, network failure, the threat of natural disasters, epidemics, pandemics and other public-health crisis, including the COVID-19 pandemic, and political instability in some countries;
- impact of emergency measures implemented by various levels of government;
- changes in Quebecor Media’s ability to obtain services and equipment critical to its operations;
- changes in laws and regulations, or in their interpretations, which could result, among other things, in the loss (or reduction in value) of Quebecor Media’s licences or markets, or in an increase in competition, compliance costs or capital expenditures;
- Quebecor Media’s ability to successfully develop its Sports and Entertainment segment and other expanding lines of business in its other segments;
- Quebecor’s substantial indebtedness, the tightening of credit markets, and the restrictions on its business imposed by the terms of its debt; and
- interest rate fluctuations that could affect a portion of Quebecor’s interest payment requirements on long-term debt.

The forward-looking statements in this document are made to provide investors and the public with a better understanding of the Corporation’s circumstances and are based on assumptions it believes to be reasonable as of the day on which they are made. Investors and others are cautioned that the foregoing list of factors that may affect future results is not exhaustive and that undue reliance should not be placed on any forward-looking statements. For more information on the risks, uncertainties and assumptions that could cause the Corporation’s actual results to differ from current expectations, please refer to the “Trend Information,” Risks and Uncertainties" and "Financial Instruments and Financial Risk Management" sections above, and the Corporation's other public filings, available at www.sedar.com and www.quebecor.com.

The forward-looking statements in this Management Discussion and Analysis reflect the Corporation's expectations as of February 23, 2022, and are subject to change after this date. The Corporation expressly disclaims any obligation or intention to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and six-month periods ended June 30, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media") since June 22, 2018. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, including changes in local, regional and national economic conditions, particularly as they may affect advertising expenditures. Accordingly, the results of operations for interim periods should not necessarily be considered indicative of full-year results due to the seasonality of certain operations.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2018 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on August 7, 2019.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and six-month periods ended June 30, 2019.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

2. CHANGES IN ACCOUNTING POLICIES

(i) IFRS 16 – *Leases*

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis.

The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income.

Principal payments of the lease liability are now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities.

The retrospective adoption of IFRS 16 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)	Three months ended June 30, 2018	Six months ended June 30, 2018
Purchase of goods and services	$ (11.7)	$ (22.8)
Depreciation and amortization	8.3	16.4
Financial expenses	2.2	4.5
Deferred income tax expense	0.3	0.5
Net income and comprehensive income	$ 0.9	$ 1.4
Net income and comprehensive income attributable to:		
Shareholders	$ 0.7	$ 1.1
Non-controlling interests	0.2	0.3
Earnings per share attributable to shareholders	$ –	$ –

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

2. CHANGES IN ACCOUNTING POLICIES (continued)

(i) IFRS 16 – *Leases* (continued)

Consolidated balance sheets

Increase (decrease)	December 31, 2018	December 31, 2017
Other current assets	$ (2.2)	$ (2.2)
Property, plant and equipment	15.5	15.5
Right-of-use assets	112.6	133.5
Provisions	(1.5)	(1.4)
Lease liabilities[1]	144.4	167.9
Other liabilities	(4.3)	(3.4)
Deferred income tax liability	(3.3)	(4.3)
Deficit	9.2	7.2
Non-controlling interests	(0.2)	(4.8)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.8 million as of December 31, 2017.

(ii) IFRIC 23 – *Uncertainty over Income Tax Treatments*

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments.

The adoption of IFRIC 23 had no impact on the consolidated financial statements.

(Gain) loss on embedded derivatives related to convertible debentures	**$ (16.4)**	$ 76.3	**$ (2.8)**	$ 104.5
Other	**–**	(0.7)	**0.7**	0.7
	$ (16.4)	$ 75.6	**$ (2.1)**	$ 105.2

7. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and six-month periods ended June 30, 2019, net charges of $2.0 million and $7.0 million were recorded relating mainly to various cost reduction initiatives across the Corporation ($2.0 million and $8.5 million in 2018). Impairment charges of $15.3 million and $18.8 million were also recorded as a result of restructuring initiatives during these same periods (none in 2018).

8. SPECTRUM LICENCES

On April 10, 2019, Videotron Ltd. ("Videotron") acquired ten 600 MHz spectrum licences covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $255.8 million.

9. NON-CONTROLLING INTERESTS ACQUISITIONS

During the second quarter of 2018, the Corporation increased its interest in Quebecor Media from 81.5% to 100.0% as a result of the following transactions:

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), for a total aggregate purchase price of $1.54 billion, paid in cash. Cash on hand and drawings under the Videotron secured revolving credit facility were used to finance this transaction;
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital, in consideration of the issuance by the Corporation to CDP Capital of $150.0 million aggregate principal amount of convertible debentures (note 11).

The purchase of CDP Capital's minority interest in Quebecor Media was accounted for as an equity transaction. The excess of $1,221.6 million of the purchase price over the carrying value of non-controlling interests of $468.4 million acquired was recorded as a $1,202.4 million decrease of retained earnings and as a $19.2 million increase of accumulated other comprehensive loss.

10. BUSINESS ACQUISITIONS

On February 13, 2019, TVA Group Inc. ("TVA Group") acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An estimated amount of $1.9 million relating to certain post-closing adjustments is payable as of June 30, 2019. The purchase price allocation was accounted for on a preliminary basis and will be finalized by the end of the year. The acquired assets consist mainly of intangible assets and goodwill.

On April 1, 2019, TVA Group acquired the Incendo Media inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An estimated amount of $0.9 million relating to certain post-closing adjustment is receivable as of June 30, 2019. The purchase price is also subject to adjustments relating to the achievement of future conditions. The purchase price allocation was accounted for on a preliminary basis and will be finalized by the end of the year. The acquired assets consist mainly of intangible assets and goodwill.

11. CONVERTIBLE DEBENTURES

During the six-month period ended June 30, 2018, the Corporation sent notices of redemption of convertible debentures for a total aggregate principal amount of $87.5 million. Redemption prices were paid upon redemption of these debentures.

On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of new convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. The convertible debentures are convertible into Quebecor Class B Subordinate Voting Shares ("Class B Shares") in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. LONG TERM DEBT

Components of long-term debt are as follows:

	June 30, 2019	December 31, 2018
Long-term debt	**$ 6,304.9**	$ 6,461.7
Change in fair value related to hedged interest rate risk	**9.7**	2.5
Financing fees, net of amortization	**(32.7)**	(36.0)
	6,281.9	6,428.2
Less current portion	**(72.0)**	(57.9)
	$ 6,209.9	$ 6,370.3

On February 13, 2019, TVA Group amended its $150.0 million secured revolving credit facility to extend the maturity date to February 2020 and to change certain conditions and terms of the facility.

On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility to extend the maturity date to July 2022 and to change certain conditions and terms of the facility.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

13. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended June 30		Six months ended June 30	
	2019	2018	**2019**	2018
		(restated, note 2)		(restated, note 2)
Income from continuing operations attributable to shareholders	**$ 140.2**	$ 41.0	**$ 231.7**	$ 97.6
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(15.5)**	0.7	**(0.9)**	0.5
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 124.7**	$ 41.7	**$ 230.8**	$ 98.1
Net income attributable to shareholders	**$ 140.2**	$ 42.0	**$ 329.2**	$ 99.1
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(15.5)**	0.7	**(0.9)**	0.5
Net income attributable to shareholders, adjusted for dilution effect	**$ 124.7**	$ 42.7	**$ 328.3**	$ 99.6
Weighted average number of shares outstanding (in millions)	**255.9**	233.5	**255.9**	234.7
Potentially dilutive effect of stock options and of convertible debentures of the Corporation (in millions)	**6.2**	5.9	**6.2**	5.9
Weighted average number of diluted shares outstanding (in millions)	**262.1**	239.4	**262.1**	240.6

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

14. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		**Class B Shares**	
	Number	Amount	Number	Amount
Balance as of December 31, 2018	77,249,244	$ 8.6	179,807,353	$ 1,057.3
Class A Shares converted into Class B Shares	(2,500)	–	2,500	–
Shares purchased and cancelled	–	–	(1,319,600)	(7.8)
Shares issued upon exercise of stock options	–	–	180,000	2.7
Balance as of June 30, 2019	**77,246,744**	**$ 8.6**	**178,670,253**	**$ 1,052.2**

On August 8, 2018, the Corporation filed normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 7,800,000 Class B Shares representing approximately 5% of issued and outstanding Class B Shares as of August 1, 2018. The purchases can be made from August 15, 2018 to August 14, 2019 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On August 7, 2019, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the six-month period ended June 30, 2019, the Corporation purchased and cancelled 1,319,600 Class B Shares for a total cash consideration of $39.5 million (4,909,900 Class B Shares for a total cash consideration of $118.0 million in 2018). The excess of $31.7 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in increase of the deficit ($108.6 million decrease of retained earnings in 2018).

During the six-month period ended June 30, 2019, 180,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $2.7 million (100,000 Class B shares for a cash consideration of $1.3 million in 2018). As a result of this transaction, contributed surplus was increased by $3.0 million ($1.2 million in 2018) and stock-based compensation liability was reduced by the same amount.

On August 7, 2019, the Board of Directors of the Corporation declared a dividend of $0.1125 per share on Class A Shares and Class B Shares, or approximately $28.8 million, payable on September 17, 2019, to shareholders of record at the close of business on August 23, 2019.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the six-month period ended June 30, 2019:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2018	1,982,892	$ 21.60
Granted	1,403,250	31.61
Exercised	(180,000)	15.12
Cancelled	(70,000)	26.52
As of June 30, 2019	**3,136,142**	**$ 26.34**
Vested options as of June 30, 2019	**500,000**	**$ 11.11**
Quebecor Media		
As of December 31, 2018	318,400	$ 64.61
Exercised	(108,450)	61.60
Cancelled	(38,200)	69.85
As of June 30, 2019	**171,750**	**$ 65,35**
Vested options as of June 30, 2019	**124,250**	**$ 63.92**
TVA Group		
As of December 31, 2018	340,000	$ 2.99
Granted	290,000	2.05
Cancelled	(45,000)	4.77
As of June 30, 2019	**585,000**	**$ 2.39**
Vested options as of June 30, 2019	**28,000**	**$ 6.85**

During the three-month period ended June 30, 2018, 100,000 Class B Shares of the Corporation were issued upon exercise of stock options of Quebecor. During the three-month period ended June 30, 2019, 41,500 stock options of Quebecor Media were exercised for a cash consideration of $2.1 million (64,477 stock options for $2.2 million in 2018). During the six-month period ended June 30, 2019, 180,000 Class B Shares of the Corporation were issued upon exercise of stock options (note 14) (100,000 Class B Shares in 2018) and 108,450 stock options of Quebecor Media were exercised for a cash consideration of $5.5 million (102,977 stock options for $3.3 million in 2018).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. STOCK-BASED COMPENSATION PLANS (continued)

Deferred share unit and performance share unit plans

The deferred share unit ("DSU") and performance share unit ("PSU") plans are based either on Quebecor Class B Shares and on TVA Group Inc. Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of June 30, 2019, 162,126 DSUs based on Quebecor Class B Shares, 240,450 DSUs based on TVA Group Class B Shares, 117,866 PSUs based on Quebecor Class B Shares and 135,935 PSUs based on TVA Group Class B Shares were outstanding under these plans. During the first quarter of 2019, a cash consideration of $5.4 million was paid upon PSUs redemption.

Stock-based compensation expense

For the three-month period ended June 30, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $0.2 million ($6.9 million in 2018). For the six-month period ended June 30, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $6.7 million ($11.1 million in 2018).

16. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2017	$ (11.7)	$ (39.0)	$ (50.7)
Other comprehensive loss	(34.7)	–	(34.7)
Non-controlling interest acquisition (note 9)	(10.4)	(8.8)	(19.2)
Balance as of June 30, 2018	(56.8)	(47.8)	(104.6)
Other comprehensive income (loss)	26.1	(4.2)	21.9
Balance as of December 31, 2018	(30.7)	(52.0)	(82.7)
Other comprehensive income	32.0	–	32.0
Balance as of June 30, 2019	**$ 1.3**	**$ (52.0)**	**$ (50.7)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 3/4-year period.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of June 30, 2019 and December 31, 2018 are as follows:

	June 30, 2019		December 31, 2018	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,304.9)**	**$ (6,614.7)**	$ (6,461.7)	$ (6,444.9)
Convertible debentures[2]	**(153.3)**	**(153.3)**	(150.6)	(150.6)
Derivative financial instruments				
Foreign exchange forward contracts	**(2.1)**	**(2.1)**	6.7	6.7
Cross-currency interest rate swaps	**747.2**	**747.2**	880.3	880.3

[1] The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

[2] The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

18. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data centers operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron in the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments.

19. CONTINGENCIES

In the context of commercial disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of these proceedings, management of the Corporation is in the opinion that the outcome should not have a material adverse effect on the Corporation's results or on its financial position.

20. SUBSEQUENT EVENT

On July 15, 2019, Quebecor Media prepaid the balance outstanding under its term loan “B” credit facility and settled the corresponding hedging contracts for a total cash consideration of $340.9 million.

This is Exhibit 61 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month periods ended March 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media") since June 22, 2018. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the distribution of movies, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, including changes in local, regional and national economic conditions, particularly as they may affect advertising expenditures. Accordingly, the results of operations for interim periods should not necessarily be considered indicative of full-year results due to the seasonality of certain operations.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2018 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on May 8, 2019.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month period ended March 31, 2019.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

2. CHANGES IN ACCOUNTING POLICIES

(i) IFRS 16 – *Leases*

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis.

The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income.

Principal payments of the lease liability are also now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities.

The retroactive adoption of IFRS 16 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)		Three months ended March 31, 2018
Purchase of goods and services	$	(11.1)
Depreciation and amortization		8.1
Financial expenses		2.3

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.8 million as of December 31, 2017.

(ii) IFRIC 23 – *Uncertainty over Income Tax Treatments*

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments.

The adoption of IFRIC 23 had no impact on the consolidated financial statements.

Loss on embedded derivatives related to convertible debentures	**$ 13.6**	$ 28.2
Other	**0.7**	1.4
	$ 14.3	$ 29.6

7. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the first quarter of 2019, a net charge of $5.0 million was recorded relating mainly to various cost reduction initiatives across the Corporation ($6.5 million in 2018). An impairment charge of $3.5 million was also recorded as a result of restructuring initiatives (none in 2018).

8. BUSINESS ACQUISITIONS

On February 13, 2019, TVA Group inc. ("TVA Group") acquired the companies in the Serdy Média Inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An estimated amount of $1.9 million relating to certain post-closing adjustments is also payable as of March 31, 2019. The purchase price allocation was accounted for on a preliminary basis and will be finalized by the end of the year. The acquired assets consist mainly of productions in progress, intangible assets and goodwill.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

9. LONG TERM DEBT

Components of long-term debt are as follows:

	March 31, 2019	December 31, 2018
Long-term debt	**$ 6,181.1**	$ 6,461.7
Change in fair value related to hedged interest rate risk	**5.1**	2.5
Financing fees, net of amortization	**(34.7)**	(36.0)
	6,151.5	6,428.2
Less current portion	**(68.5)**	(57.9)
	$ 6,083.0	$ 6,370.3

On February 13, 2019, TVA Group amended its $150.0 million secured revolving credit facility to extend the maturity date to February 2020 and to change certain conditions and terms of the facility.

On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility to extend the maturity date to July 2022 and to change certain conditions and terms of the facility.

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended March 31	
	2019	2018
		(restated, note 2)
Income from continuing operations attributable to shareholders	**$ 91.5**	$ 56.6
Impact of assumed conversion of stock options of subsidiaries	**(0.1)**	(0.2)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 91.4**	$ 56.4
Net income attributable to shareholders	**$ 189.0**	$ 57.1
Impact of assumed conversion of stock options of subsidiaries	**(0.2)**	(0.2)
Net income attributable to shareholders, adjusted for dilution effect	**$ 188.8**	$ 56.9
Weighted average number of shares outstanding (in millions)	**256.0**	235.9
Potentially dilutive effect of stock options of the Corporation (in millions)	**0.5**	0.4
Weighted average number of diluted shares outstanding (in millions)	**256.5**	236.3

11. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares (“Class A Shares”) with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares (“Class B Shares”) on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2018	77,249,244	$ 8.6	179,807,353	$ 1,057.3
Class A Shares converted into Class B Shares	(2,300)	–	2,300	–
Shares purchased and cancelled	–	–	(1,319,600)	(7.8)
Shares issued upon exercise of stock options	–	–	180,000	2.7
Balance as of March 31, 2019	**77,246,944**	**$ 8.6**	**178,670,053**	**$ 1,052.2**

On August 8, 2018, the Corporation filed normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 7,800,000 Class B Shares representing approximately 5% of issued and outstanding Class B Shares as of August 1, 2018. The purchases can be made from August 15, 2018 to August 14, 2019 at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the three-month period ended March 31, 2019, the Corporation purchased and cancelled 1,319,600 Class B Shares for a total cash consideration of $39.5 million (4,125,800 Class B Shares for a total cash consideration of $98.7 million in 2018). The excess of $31.7 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in increase of the deficit (a $90.8 million decrease of retained earnings in 2018).

During the three-month period ended March 31, 2019, 180,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $2.7 million. As a result of this transaction, contributed surplus was increased by $3.0 million and stock-based compensation liability was reduced by the same amount.

On May 8, 2019, the Board of Directors of the Corporation declared a dividend of $0.1125 per share on Class A Shares and Class B Shares, or approximately $28.8 million, payable on June 18, 2019, to shareholders of record at the close of business on May 24, 2019.

QUEBECOR INC.

12. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the three-month period ended March 31, 2019:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2018	1,982,892	$ 21.60
Exercised	(180,000)	15.12
Cancelled	(70,000)	26.52
As of March 31, 2019	**1,732,892**	**$ 22.08**
Vested options as of March 31, 2019	**500,000**	**$ 11.11**
Quebecor Media		
As of December 31, 2018	318,400	$ 64.61
Exercised	(66,950)	61.69
Cancelled	(36,600)	69.82
As of March 31, 2019	**214,850**	**$ 64.64**
Vested options as of March 31, 2019	**140,400**	**$ 63.27**
TVA Group		
As of December 31, 2018	340,000	$ 2.99
Cancelled	(45,000)	4.77
As of March 31, 2019	**295,000**	**$ 2.72**
Vested options as of March 31, 2019	**28,000**	**$ 6.85**

During the three-month period ended March 31, 2019, 180,000 Class B Shares of the Corporation were issued upon exercise of stock options of Quebecor (note 11) (none in 2018) and 66,950 stock options of Quebecor Media were exercised for a cash consideration of $3.3 million (38,500 stock options were exercised for $1.1 million in 2018).

Deferred share unit and performance share unit plans

The deferred share unit (“DSU”) and performance share unit (“PSU”) plans are based either on Quebecor Class B Shares and on TVA Group Inc. Class B Non-Voting Shares (“TVA Group Class B Shares”). The DSUs vest over six years and will be redeemed for cash only upon the participant’s retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of March 31, 2019, 166,364 DSUs based on Quebecor Class B Shares, 243,353 DSUs based on TVA Group Class B Shares, 117,298 PSUs based on Quebecor Class B Shares and 135,935 PSUs based on TVA Group Class B Shares were outstanding under these plans. During the first quarter of 2019, a cash consideration of $5.4 million was paid for the PSUs redeemed.

QUEBECOR INC.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

12. STOCK-BASED COMPENSATION PLANS (continued)

Stock-based compensation expense

For the three-month period ended March 31, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of 6.5 million ($4.2 million in 2018).

13. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2017	$ (11.7)	$ (39.0)	$ (50.7)
Other comprehensive loss	(32.0)	–	(32.0)
Balance as of March 31, 2018	(43.7)	(39.0)	(82.7)
Other comprehensive income (loss)	23.4	(4.2)	19.2
Non-controlling interests acquisition	(10.4)	(8.8)	(19.2)
Balance as of December 31, 2018	(30.7)	(52.0)	(82.7)
Other comprehensive loss	(12.8)	–	(12.8)
Balance as of March 31, 2019	**$ (43.5)**	**$ (52.0)**	**$ (95.5)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 8-year period.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair value measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

14. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of March 31, 2019 and December 31, 2018 are as follows:

	March 31, 2019		December 31, 2018	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,181.1)**	**$ (6,388.0)**	$ (6,461.7)	$ (6,444.9)
Convertible debentures[2]	**(164.5)**	**(164.5)**	(150.6)	(150.6)
Derivative financial instruments				
Foreign exchange forward contracts	**1.4**	**1.4**	6.7	6.7
Cross-currency interest rate swaps	**771.6**	**771.6**	880.3	880.3

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

15. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron Ltd. ("Videotron") sold its 4Degrees Colocation Inc. data centers operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment is also payable by Videotron as of March 31, 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments. The amount deferred is revaluated on a quarterly basis and any change is recorded in income from discontinued operations.

16. CONTINGENCIES

In the context of commercial disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of these proceedings, management of the Corporation is in the opinion that the outcome should not have a material adverse effect on the Corporation's results or on its financial position.

17. SUBSEQUENT EVENTS

On April 1, 2019, TVA Group acquired the Incendo Media Inc. group, a Montreal-based producer and distributor of television programs for international markets, for a cash consideration of $12.0 million and a balance payable of $7.5 million. The purchase price is also subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of production rights, intangible assets and goodwill.

On April 10, 2019, Videotron acquired ten 600 MHz spectrum licences covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $256.0 million.

This is Exhibit 62 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and nine-month periods ended September 30, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. (“Quebecor Media”) since June 22, 2018. Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service and video rental stores. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people’s viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, including changes in local, regional and national economic conditions, particularly as they may affect advertising expenditures. Accordingly, the results of operations for interim periods should not necessarily be considered indicative of full-year results due to the seasonality of certain operations.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation’s 2018 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on November 6, 2019.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and nine-month periods ended September 30, 2019.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

2. CHANGES IN ACCOUNTING POLICIES

(i) IFRS 16 – *Leases*

On January 1, 2019, the Corporation adopted on a fully retrospective basis the new rules under IFRS 16 which set out new principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract. The standard provides lessees with a single accounting model for all leases, with certain exemptions. In particular, lessees are required to report most leases on their balance sheets by recognizing right-of-use assets and related financial liabilities. Assets and liabilities arising from a lease are initially measured on a present value basis.

The adoption of IFRS 16 had significant impacts on the consolidated financial statements since all of the Corporation segments are engaged in various long-term leases relating to premises and equipment.

Under IFRS 16, most lease charges are now expensed as a depreciation of the right-of-use asset, along with an interest on the related lease liability. Since operating lease charges were recognized as operating expenses as they were incurred under previous standard, the adoption of IFRS 16 has changed the timing of the recognition of these lease charges over the term of each lease. It has also affected the classification of expenses in the consolidated statements of income.

Principal payments of the lease liability are now presented as financing activities in the consolidated statements of cash flows, whereas under the previous standard these payments were presented as operating activities.

The retrospective adoption of IFRS 16 had the following impacts on the comparative consolidated financial figures:

Consolidated statements of income and comprehensive income

Increase (decrease)	Three months ended September 30, 2018	Nine months ended September 30, 2018
Purchase of goods and services	$ (10.9)	$ (33.7)

Increase (decrease)	December 31, 2018	December 31, 2017
Other current assets	$ (2.2)	$ (2.2)
Property, plant and equipment	15.5	15.5
Right-of-use assets	112.6	133.5
Provisions	(1.5)	(1.4)
Lease liabilities[1]	144.4	167.9
Other liabilities	(4.3)	(3.4)
Deferred income tax liability	(3.3)	(4.3)
Deficit	9.2	7.2
Non-controlling interests	(0.2)	(4.8)

[1] The current portion of lease liabilities is $36.0 million as of December 31, 2018 and $39.8 million as of December 31, 2017.

(ii) IFRIC 23 – *Uncertainty over Income Tax Treatments*

IFRIC 23 provides guidance on how to value uncertain income tax positions based on the probability of whether or not the relevant tax authorities will accept the Corporation's tax treatments.

The adoption of IFRIC 23 had no impact on the consolidated financial statements.

7. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and nine-month periods ended September 30, 2019, net charges of $1.2 million and $8.2 million were recorded relating mainly to various cost reduction initiatives across the Corporation (a net gain of $1.3 million and a net charge of $7.2 million in 2018). An impairment charge on assets of $18.8 million was also recorded as a result of restructuring initiatives during the nine-month period ended September 30, 2019 ($14.9 million during the three-month and nine-month periods ended September 30, 2018).

8. SPECTRUM LICENCES

On April 10, 2019, Videotron Ltd. (“Videotron”) acquired 10 spectrum licences in the 600 MHz band covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $255.8 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

9. NON-CONTROLLING INTERESTS ACQUISITIONS

During the second quarter of 2018, the Corporation increased its interest in Quebecor Media from 81.5% to 100.0% as a result of the following transactions:

- On May 11 and June 22, 2018, Quebecor Media repurchased a total of 16,064,215 of its Common Shares held by CDP Capital d'Amérique Investissements inc. ("CDP Capital"), for a total aggregate purchase price of $1.54 billion, paid in cash. Cash on hand and drawings under the Videotron secured revolving credit facility were used to finance this transaction.
- On June 22, 2018, the Corporation purchased 1,564,696 Common Shares of Quebecor Media held by CDP Capital, in consideration of the issuance by the Corporation to CDP Capital of $150.0 million aggregate principal amount of convertible debentures (note 11).

The purchase of CDP Capital's minority interest in Quebecor Media was accounted for as an equity transaction. The excess of $1,221.6 million of the purchase price over the carrying value of non-controlling interests of $468.4 million acquired was recorded as a $1,202.4 million decrease of retained earnings and as a $19.2 million increase of accumulated other comprehensive loss.

10. BUSINESS ACQUISITIONS

On February 13, 2019, TVA Group Inc. ("TVA Group") acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consist mainly of intangible assets and goodwill.

On April 1, 2019, TVA Group acquired the Incendo Media inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An amount of $0.6 million relating to certain post-closing adjustment was also received during the third quarter of 2019. The purchase price is subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of intangible assets and goodwill.

11. CONVERTIBLE DEBENTURES

In February and May 2018, the Corporation issued notices of redemption of convertible debentures for a total aggregate principal amount of $87.5 million. Redemption prices were paid upon redemption of these debentures.

On June 22, 2018, the Corporation issued $150.0 million aggregate principal amount of new convertible debentures, bearing interest at an annual rate of 4.00% and maturing in June 2024. The convertible debentures are convertible into Quebecor Class B Subordinate Voting Shares ("Class B Shares") in accordance with the terms of the trust indenture, subject to a floor price of $26.85 per share (that is, a maximum number of approximately 5,586,592 Class B Shares corresponding to a ratio of $150.0 million to the floor price) and a ceiling price of $33.5625 per share (that is, a minimum number of approximately 4,469,274 Class B Shares corresponding to a ratio of $150.0 million to the ceiling price), subject to adjustments in accordance with the terms of the trust indenture.

On August 21, 2018, the Corporation issued a notice of redemption on October 12, 2018, of all its remaining outstanding 4.125% convertible debentures due October 15, 2018, for a total aggregate principal amount of $362.5 million. Pursuant to the terms of the convertible debentures, the Corporation elected to exercise its share redemption payment right with respect to the entire outstanding debentures. Consequently, Quebecor issued and delivered 30,129,869 Class B Shares to the holders on October 12, 2018.

12. LONG TERM DEBT

Components of long-term debt are as follows:

	September 30, 2019	December 31, 2018
Long-term debt	**$ 6,169.2**	$ 6,461.7
Change in fair value related to hedged interest rate risk	**11.6**	2.5
Financing fees, net of amortization	**(30.6)**	(36.0)
	6,150.2	6,428.2
Less current portion	**(60.1)**	(57.9)
	$ 6,090.1	$ 6,370.3

On February 13, 2019, TVA Group amended its $150.0 million secured revolving credit facility to extend the maturity date to February 2020 and to change certain conditions and terms of the facility.

On February 15, 2019, Quebecor Media amended its $300.0 million secured revolving credit facility to extend the maturity date to July 2022 and to change certain conditions and terms of the facility.

On July 15, 2019, Quebecor Media prepaid the balance outstanding under its term loan “B” credit facility and the related hedging contracts were unwound for a total cash consideration of $340.9 million.

13. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended September 30		Nine months ended September 30	
	2019	2018	**2019**	2018
		(restated, note 2)		(restated, note 2)
Income from continuing operations attributable to shareholders	**$ 178.5**	$ 186.2	**$ 410.2**	$ 283.8
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(3.3)**	(51.3)	**1.0**	(1.8)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 175.2**	$ 134.9	**$ 411.2**	$ 282.0
Net income attributable to shareholders	**$ 178.5**	$ 187.1	**$ 507.7**	$ 286.2
Impact of assumed conversion of stock options of subsidiaries and of convertible debentures of the Corporation	**(3.3)**	(51.3)	**1.0**	(1.8)
Net income attributable to shareholders, adjusted for dilution effect	**$ 175.2**	$ 135.8	**$ 508.7**	$ 284.4
Weighted average number of shares outstanding (in millions)	**255.6**	232.8	**255.8**	234.1
Potentially dilutive effect of stock options and of convertible debentures of the Corporation (in millions)	**6.1**	36.0	**6.1**	5.9
Weighted average number of diluted shares outstanding (in millions)	**261.7**	268.8	**261.9**	240.0

14. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2018	77,249,244	$ 8.6	179,807,353	$ 1,057.3
Class A Shares converted into Class B Shares	(18,600)	–	18,600	–
Shares purchased and cancelled	–	–	(2,672,056)	(15.7)
Shares issued upon exercise of stock options	–	–	180,000	2.7
Balance as of September 30, 2019	**77,230,644**	**$ 8.6**	**177,333,897**	**$ 1,044.3**

On August 7, 2019, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the nine-month period ended September 30, 2019, the Corporation purchased and cancelled 2,672,056 Class B Shares for a total cash consideration of $80.5 million (7,535,300 Class B Shares for a total cash consideration of $186.3 million in 2018). The excess of $64.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in increase of the deficit ($171.9 million in 2018).

During the nine-month period ended September 30, 2019, 180,000 Class B Shares were issued upon exercise of stock options for a cash consideration of $2.7 million (100,000 Class B shares for a cash consideration of $1.3 million in 2018). As a result of this transaction, contributed surplus was increased by $3.0 million ($1.2 million in 2018) and stock-based compensation liability was reduced by the same amount.

On November 6, 2019, the Board of Directors of the Corporation declared a dividend of $0.1125 per share on Class A Shares and Class B Shares, or approximately $28.6 million, payable on December 17, 2019, to shareholders of record at the close of business on November 22, 2019.

15. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the nine-month period ended September 30, 2019:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2018	1,982,892	$ 21.60
Granted	1,403,250	31.61
Exercised	(180,000)	15.12
Cancelled	(96,500)	27.39
As of September 30, 2019	**3,109,642**	**$ 26.32**
Vested options as of September 30, 2019	**500,000**	**$ 11.11**
Quebecor Media		
As of December 31, 2018	318,400	$ 64.61
Exercised	(147,400)	62.41
Cancelled	(39,000)	69.87
As of September 30, 2019	**132,000**	**$ 65.52**
Vested options as of September 30, 2019	**97,550**	**$ 63.74**
TVA Group		
As of December 31, 2018	340,000	$ 2.99
Granted	290,000	2.05
Cancelled	(65,000)	3.93
As of September 30, 2019	**565,000**	**$ 2.40**
Vested options as of September 30, 2019	**28,000**	**$ 6.85**

During the three-month period ended September 30, 2019, 38,950 stock options of Quebecor Media were exercised for a cash consideration of $1.9 million (54,300 stock options for $2.2 million in 2018). During the nine-month period ended September 30, 2019, 180,000 Class B Shares of the Corporation were issued upon exercise of stock options (note 14) (100,000 Class B Shares in 2018) and 147,400 stock options of Quebecor Media were exercised for a cash consideration of $7.4 million (157,277 stock options for $5.6 million in 2018).

15. STOCK-BASED COMPENSATION PLANS (continued)

Deferred share unit and performance share unit plans

The deferred share unit ("DSU") and performance share unit ("PSU") plans are based either on Quebecor Class B Shares and on TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of September 30, 2019, 159,757 DSUs based on Quebecor Class B Shares, 238,565 DSUs based on TVA Group Class B Shares, 118,279 PSUs based on Quebecor Class B Shares and 135,935 PSUs based on TVA Group Class B Shares were outstanding under these plans. During the first quarter of 2019, a cash consideration of $5.4 million was paid upon PSUs redemption.

Stock-based compensation expense

For the three-month period ended September 30, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $1.2 million ($2.3 million in 2018). For the nine-month period ended September 30, 2019, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $7.9 million ($13.4 million in 2018).

16. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2017	$ (11.7)	$ (39.0)	$ (50.7)
Other comprehensive loss	(32.1)	–	(32.1)
Non-controlling interest acquisition (note 9)	(10.4)	(8.8)	(19.2)
Balance as of September 30, 2018	(54.2)	(47.8)	(102.0)
Other comprehensive income (loss)	23.5	(4.2)	19.3
Balance as of December 31, 2018	(30.7)	(52.0)	(82.7)
Other comprehensive income	66.5	–	66.5
Balance as of September 30, 2019	**$ 35.8**	**$ (52.0)**	**$ (16.2)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 1/2-year period.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2019 and 2018
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of September 30, 2019 and December 31, 2018 are as follows:

	September 30, 2019		December 31, 2018	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,169.2)**	**$ (6,536.5)**	$ (6,461.7)	$ (6,444.9)
Convertible debentures[2]	**(149.2)**	**(149.2)**	(150.6)	(150.6)
Derivative financial instruments				
Foreign exchange forward contracts	**(0.3)**	**(0.3)**	6.7	6.7
Cross-currency interest rate swaps	**746.3**	**746.3**	880.3	880.3

1 The carrying value of long-term debt excludes adjustments to record changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the initial capital investment and the value of the cap and floor conversion price features, recognized as embedded derivatives.

18. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data centers operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron in the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments.

19. CONTINGENCIES

In the context of commercial disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of these proceedings, management of the Corporation is in the opinion that the outcome should not have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission (“CRTC”) issued an order finalizing the rates, retroactively to March 31, 2016, by which the large cable and telephone companies provide aggregated wholesale access to their high-speed internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation consolidated financial statements. The new proposed rates are substantially lower than interim rates and could represent a reduction in earnings of approximately $22.0 million (before income taxes) in 2019 and approximately $30.0 million (before income taxes) from March 31, 2016 to December 31, 2018. On September 13, 2019, a coalition of cable companies (including Videotron) and Bell Canada filed separate appeals of the CRTC’s order with the Federal Court of Appeal arguing, among other things, that the order is marked by numerous errors of law and jurisdiction resulting in wholesale rates that are unreasonably low. The cable companies and Bell Canada also filed separate requests to stay the implementation of the order pending disposition of their appeals. On September 27, 2019, the Federal Court of Appeal granted an interim stay of the CRTC’s order. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

20. SUBSEQUENT EVENT

On October 8, 2019, Videotron issued $800.0 million aggregate principal amount of Senior Notes bearing interest at 4.50% and maturing on January 15, 2030, for net proceeds of $790.7 million, net of financing fees of approximately $9.3 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron’s ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter.

This is Exhibit 63 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and six-month periods ended June 30, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

COVID-19 pandemic

The COVID-19 pandemic is having a significant impact on the economic environment in Canada and around the world. On March 13, 2020, in order to limit the spread of the virus, the Québec government imposed a number of restrictions and special preventive measures, including the suspension of business activities deemed non-essential. Since then, the Québec government has gradually announced the stages of its reopening plan, which extend over a period of several months. This crisis curtailed the operations of many of Quebecor's business partners and has led to a significant slowdown in some of Quebecor's segments in the first semester of 2020. Among other impacts, the COVID-19 virus and the measures to prevent its spread have led to a significant reduction in volume at Videotron Ltd ("Videotron")'s retail outlets and delays in client migration to its new Helix entertainment and home management platform; lower advertising revenues, a significant decrease of sports events broadcast by the TVA Sports channel, and reduced film and audiovisual content activity in the Media segment; and delays or cancellations of shows and events, and interruption of music and book distribution activities in the Sports and Entertainment segment. However, Quebecor has continued and will continue to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and of its employees. Because of the slowdown in the economy, approximately 10% of Quebecor's workforce received benefits under the Corporation's assistance program because they are on stand-by. During the health crisis, this program provides financial assistance in addition to the Canada Emergency Wage Subsidy or Canada Emergency Response Benefit programs. Most of the business units in the Media segment and Sports and Entertainment segment qualified for the Emergency Wage Subsidy, and provisions for subsidies receivable were recorded in the second quarter of 2020 as a reduction in employee costs. Given the uncertainty about the evolution of the pandemic, the full impact of the crisis cannot be determined with certainty at this stage.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2019 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on August 5, 2020.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and six-month periods ended June 30, 2020.

	$ 528.1	$ 601.9	**$ 1,146.9**	$ 1,208.5

[1] During the second quarter of 2020, the Corporation remeasured its audiovisual content asset, given the current pandemic and its impacts on the Media segment's operations. As a result of this remeasurement, the Media segment recorded a $28.1 million charge for audiovisual content for the three-month and six-month periods ended June 30, 2020. Despite this charge, audiovisual content rights and costs of the Media segment for these periods decreased by $12.6 million and $12.1 million by comparison with the respective three-month and six-month periods ended June 30, 2019. The management of the Corporation will remeasure its audiovisual content asset in the coming quarters as the situation develops.

4. FINANCIAL EXPENSES

	Three months ended June 30		Six months ended June 30	
	2020	2019	**2020**	2019
Interest on long-term debt and on debentures	**$ 76.2**	$ 77.1	**$ 153.4**	$ 154.6

Other	**1.1**	0.4	**0.8**	0.1
	$ 81.6	$ 82.8	**$ 169.0**	$ 164.9

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

5. GAIN ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	Three months ended June 30		Six months ended June 30	
	2020	2019	**2020**	2019
Gain on embedded derivatives related to convertible debentures	**$ (4.7)**	$ (16.4)	**$ (27.2)**	$ (2.8)
Other	**0.5**	–	**(0.3)**	0.7
	$ (4.2)	$ (16.4)	**$ (27.5)**	$ (2.1)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and six-month periods ended June 30, 2020, charges of $10.3 million and $14.2 million were recorded in connection with cost reduction initiatives in the Corporation's various segments.

During the respective three-month and six-month periods ended June 30, 2019, charges of $2.0 million and $7.0 million were recorded relating to cost reduction initiatives and impairment of assets charges of $15.3 million and $18.8 million were also recorded.

7. BUSINESS ACQUISITIONS

On June 17, 2020, the Sports and Entertainment segment acquired the Théâtre Capitole, a concert hall in Québec, for a cash consideration of $10.8 million, net of an assumed working capital liability. The acquired assets consist mainly of the building and equipment.

On February 13, 2019, TVA Group Inc. ("TVA Group") acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consisted mainly of intangible assets and goodwill.

On April 1, 2019, TVA Group acquired the Incendo Media Inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An amount of $0.6 million relating to certain post-closing adjustment was also received during the third quarter of 2019. The purchase price is subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of intangible assets and goodwill.

8. SPECTRUM LICENCES

On April 10, 2019, Videotron acquired ten 600 MHz spectrum licences covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $255.8 million.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

9. LONG-TERM DEBT

Components of long-term debt are as follows:

	June 30, 2020	December 31, 2019
Long-term debt	**$ 6,019.1**	$ 5,986.1
Change in fair value related to hedged interest rate risk	**20.5**	9.1
Financing fees, net of amortization	**(33.7)**	(37.7)
	6,005.9	5,957.5
Less current portion	**(5.4)**	(57.2)
	$ 6,000.5	$ 5,900.3

As of June 30, 2020, the carrying value of long-term debt denominated in U.S. dollars, excluding financing fees, was $3,899.1 million ($3,718.8 million as of December 31, 2019) while the net fair value of related hedging derivative instruments were in an asset position of $902.1 million ($679.8 million as of December 31, 2019).

On July 15, 2020, the revolving credit facility of Quebecor in an amount of $50.0 million expired and was not renewed.

On February 21, 2020, TVA Group amended its secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions.

10. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on March 11, 2020 on Quebecor Class B Subordinate Voting Shares (“Class B Shares”) triggered an adjustment to the floor price and ceiling price then in effect. Effective on March 26, 2020, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $26.57 per share (that is, a maximum number of approximately 5,644,430 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $33.22 per share (that is, a minimum number of approximately 4,515,544 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended June 30		Six months ended June 30	
	2020	2019	**2020**	2019
Income from continuing operations attributable to shareholders	**$ 142.4**	$ 140.2	**$ 272.7**	$ 231.7
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(3.6)**	(15.5)	**(25.1)**	(0.9)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 138.8**	$ 124.7	**$ 247.6**	$ 230.8
Net income attributable to shareholders	**$ 174.9**	$ 140.2	**$ 306.5**	$ 329.2
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(3.6)**	(15.5)	**(25.1)**	(0.9)
Net income attributable to shareholders, adjusted for dilution effect	**$ 171.3**	$ 124.7	**$ 281.4**	$ 328.3
Weighted average number of shares outstanding (in millions)	**252.8**	255.9	**253.4**	255.9
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**5.8**	6.2	**5.8**	6.2
Weighted average number of diluted shares outstanding (in millions)	**258.6**	262.1	**259.2**	262.1

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2019	77,213,834	$ 8.6	177,415,407	$ 1,047.3
Class A Shares converted into Class B Shares	(2,600)	–	2,600	–
Shares purchased and cancelled	–	–	(3,143,300)	(18.6)
Balance as of June 30, 2020	**77,211,234**	**$ 8.6**	**174,274,707**	**$ 1,028.7**

On August 7, 2019, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On May 27, 2020, the Corporation received approval from the Toronto Stock Exchange to amend its normal course issuer bid in order to increase the maximum number of Class B Shares that may be repurchased to 6,000,000 Class B Shares, representing approximately 3.4% of issued and outstanding Class B Shares as of August 1, 2019. No other terms of the normal course issuer bid were amended.

On August 5, 2020, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the six-month period ended June 30, 2020, the Corporation purchased and cancelled 3,143,300 Class B Shares for a total cash consideration of $95.6 million (1,319,600 Class B Shares for a total cash consideration of $39.5 million in 2019). The excess of $77.0 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings (an increase of the deficit of $31.7 million in 2019).

During the six-month period ended June 30, 2019, the Corporation issued 180,000 Class B Shares upon exercise of stock options for a cash consideration of $2.7 million. As a result of this transaction, contributed surplus was increased by $3.0 million and stock-based compensation liability was reduced by the same amount.

On August 5, 2020, the Board of Directors of the Corporation declared a dividend of $0.20 per share on Class A Shares and Class B Shares, or approximately $50.3 million, payable on September 15, 2020, to shareholders of record at the close of business on August 21, 2020.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the six-month period ended June 30, 2020:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2019	2,504,892	$ 29.21
Cancelled	(70,000)	30.58
As of June 30, 2020	**2,434,892**	**$ 29.17**
Vested options as of June 30, 2020	**–**	**$ –**
Quebecor Media		
As of December 31, 2019	129,200	$ 65.41
Exercised	(72,500)	64.42
As of June 30, 2020	**56,700**	**$ 66.67**
Vested options as of June 30, 2020	**56,700**	**$ 66.67**
TVA Group		
As of December 31, 2019	515,000	$ 2.43
Cancelled	(10,000)	2.16
As of June 30, 2020	**505,000**	**$ 2.43**
Vested options as of June 30, 2020	**35,000**	**$ 6.85**

During the three-month period ended June 30, 2020, 16,000 stock options of Quebecor Media were exercised for a cash consideration of $0.9 million (41,500 stock options for $2.1 million in 2019). During the six-month period ended June 30, 2020, 72,500 stock options of Quebecor Media were exercised for a cash consideration of $4.3 million (108,450 stock options for $5.5 million in 2019). During the six-month period ended June 30, 2019,180,000 Class B Shares of the Corporation were issued upon exercise of stock options of Quebecor (Note 12).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS (continued)

Deferred share unit and performance share unit plans

The deferred share unit ("DSU") and performance share unit ("PSU") plans are based either on Quebecor Class B Shares and on TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of June 30, 2020, 147,088 DSUs based on Quebecor Class B Shares and 204,598 DSUs based on TVA Group Class B Shares were outstanding under these plans. As of June 30, 2020, there is no PSUs outstanding. During the first quarter of 2020, a cash consideration of $4.8 million was paid upon PSUs redemption ($5.4 million in 2019).

Stock-based compensation expense

For the three-month period ended June 30, 2020, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $0.3 million ($0.2 million in 2019). For the six-month period ended June 30, 2020, a reversal of the consolidated charge related to all stock-based compensation plans was recorded in the amount of $1.6 million (a charge of $6.7 million in 2019).

14. ACCUMULATED OTHER COMPREHENSIVE LOSS

		Cash flow hedges[1]		Defined benefit plans[2]		Total
Balance as of December 31, 2018	$	(30.3)	$	(52.4)	$	(82.7)
Other comprehensive income		32.0		–		32.0
Balance as of June 30, 2019		1.7		(52.4)		(50.7)
Other comprehensive income (loss)		38.6		(52.0)		(13.4)
Balance as of December 31, 2019		40.3		(104.4)		(64.1)
Other comprehensive income (loss)		35.3		(42.5)		(7.2)
Balance as of June 30, 2020	**$**	**75.6**	**$**	**(146.9)**	**$**	**(71.3)**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 6 3/4-year period.

2 The re-measurement loss in the consolidated statement of comprehensive income for the six-month period ended June 30, 2020 is mainly due to a decrease of the discount rate since December 31, 2019.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of June 30, 2020 and December 31, 2019 are as follows:

	June 30, 2020		December 31, 2019	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,019.1)**	**$ (6,259.8)**	$ (5,986.1)	$ (6,376.2)
Convertible debentures[2]	**(135.3)**	**(135.3)**	(162.0)	(162.0)
Derivative financial instruments				
Foreign exchange forward contracts	**0.8**	**0.8**	(2.1)	(2.1)
Cross-currency interest rate swaps	**902.1**	**902.1**	679.8	679.8

[1] The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

[2] The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

16. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order finalizing the rates, retroactively to March 31, 2016, by which the large cable and telephone companies provide aggregated wholesale access to their high-speed internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation consolidated financial statements. The new proposed rates are substantially lower than interim rates and could represent a retrospective reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. On September 13, 2019, a coalition of cable companies (including Videotron) and Bell Canada filed separate appeals of the CRTC's order with the Federal Court of Appeal arguing, among other things, that the order is marked by numerous errors of law and jurisdiction resulting in wholesale rates that are unreasonably low. The cable companies and Bell Canada also filed separate requests to stay the implementation of the order pending disposition of their appeals. On November 22, 2019, the leave to appeal was granted by the Federal Court of Appeal and the interim stay of the CRTC's order granted by this court on September 27, 2019, was extended until a final ruling by the Federal Court of Appeal is made. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

17. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data center operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron during the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments. In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions were achieved.

This is Exhibit 64 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month periods ended March 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, cable and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

COVID-19 pandemic

The COVID-19 pandemic is having a significant impact on the economic environment in Canada and around the world. Since March 2020, in order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures, including the suspension of business activities deemed non-essential. These measures have curtailed the operations of many of Quebecor's business partners and have led to a significant slowdown in some of Quebecor's segments. Among other impacts, the COVID-19 virus and the measures to prevent its spread have led to a significant reduction in volume at Videotron Ltd ("Videotron")'s retail outlets and delays in client migration to its new Helix entertainment and home management platform; lower advertising revenues, a significant decrease of sports events broadcast by the TVA Sports channel, and reduced film and audiovisual content activity in the Media segment; and delays or cancellations of shows and events, and interruption of music and book distribution activities in the Sports and Entertainment segment. Quebecor is however continuing to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and of its employees. Because of the measures put in place by the Québec government to limit the spread of the virus, approximately 10% of Quebecor's workforce are now receiving benefits under the Corporation's supplemental assistance program because they are on stand-by. The program provides additional financial assistance to top up the Canada Emergency Wage Subsidy or Canada Emergency Response Benefit, as the case may be, and minimize the impact of this situation. Given the uncertainty about the ultimate extent and duration of the pandemic, the full impact of the crisis cannot be determined with certainty at this stage.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2019 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on May 13, 2020.

Comparative figures for the previous period have been restated to conform to the presentation adopted for the three-month period ended March 31, 2020.

4. FINANCIAL EXPENSES

	Three months ended March 31	
	2020	2019
Interest on long-term debt and on debentures	**$ 77.2**	$ 77.5
Amortization of financing costs and long-term debt discount	**2.0**	2.0
Interest on lease liabilities	**2.0**	1.9
Interest on net defined benefit liability	**1.9**	1.8
Loss (gain) on foreign currency translation on short-term monetary items	**4.6**	(0.8)
Other	**(0.3)**	(0.3)
	$ 87.4	$ 82.1

5. (GAIN) LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	Three months ended March 31	
	2020	2019
(Gain) loss on embedded derivatives related to convertible debentures	**$ (22.5)**	$ 13.6
Other	**(0.8)**	0.7
	$ (23.3)	$ 14.3

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the first quarter of 2020, a net charge of $3.9 million was recorded for non-recurring costs across the organization relating to the COVID-19 crisis and restructuring initiatives (a net charge of $5.0 million in 2019 related to cost reduction initiatives).

During the first quarter of 2019, impairment charge of assets of $3.5 million was recorded as a result of restructuring initiatives.

7. BUSINESS ACQUISITIONS

On February 13, 2019, TVA Group Inc. (“TVA Group”) acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consisted mainly of intangible assets and goodwill.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

8. LONG TERM DEBT

Components of long-term debt are as follows:

	March 31, 2020	December 31, 2019
Long-term debt	**$ 6,224.4**	$ 5,986.1
Change in fair value related to hedged interest rate risk	**20.3**	9.1
Financing fees, net of amortization	**(35.8)**	(37.7)
	6,208.9	5,957.5
Less current portion	**(45.5)**	(57.2)
	$ 6,163.4	$ 5,900.3

On February 21, 2020, TVA Group amended its secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions.

9. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on March 11, 2020 on Quebecor Class B Shares triggered an adjustment to the floor price and ceiling price then in effect. Effective on March 26, 2020, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $26.57 per share (that is, a maximum number of approximately 5,644,430 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $33.22 per share (that is, a minimum number of approximately 4,515,544 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended March 31	
	2020	2019
Income from continuing operations attributable to shareholders	**$ 130.3**	$ 91.5
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(21.9)**	(0.1)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 108.4**	$ 91.4
Net income attributable to shareholders	**$ 131.6**	$ 189.0
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(21.9)**	(0.2)
Net income attributable to shareholders, adjusted for dilution effect	**$ 109.7**	$ 188.8
Weighted average number of shares outstanding (in millions)	**254.0**	256.0
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**5.9**	0.5
Weighted average number of diluted shares outstanding (in millions)	**259.9**	256.5

QUEBECOR INC.

11. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares ("Class B Shares") on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2019	77,213,834	$ 8.6	177,415,407	$ 1,047.3
Class A Shares converted into Class B Shares	(1,300)	–	1,300	–
Shares purchased and cancelled	–	–	(1,059,100)	(6.3)
Balance as of March 31, 2020	**77,212,534**	**$ 8.6**	**176,357,607**	**$ 1,041.0**

On August 7, 2019, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 4,000,000 Class B Shares representing approximately 2.2% of issued and outstanding Class B Shares as of August 1, 2019. The purchases can be made from August 15, 2019 to August 14, 2020, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the three-month period ended March 31, 2020, the Corporation purchased and cancelled 1,059,100 Class B Shares for a total cash consideration of $34.1 million (1,319,600 Class B Shares for a total cash consideration of $39.5 million in 2019). The excess of $27.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings (an increase of the deficit of $31.7 million in 2019).

During the three-month period ended March 31, 2019, the Corporation issued 180,000 Class B Shares upon exercised of stock option for a cash consideration of $2.7 million. As a result of this transaction, contributed surplus was increased by $3.0 million and stock-based compensation liability was reduced by the same amount.

On May 13, 2020, the Board of Directors of the Corporation declared a dividend of $0.20 per share on Class A Shares and Class B Shares, or approximately $50.7 million, payable on June 23, 2020, to shareholders of record at the close of business on May 29, 2020.

Quebecor Media		
As of December 31, 2019	129,200	$ 65.41
Exercised	(56,500)	63,18
As of March 31, 2020	**72,700**	**$ 67,14**
Vested options as of March 31, 2020	**72,700**	**$ 67,14**
TVA Group		
As of December 31, 2019 and March 31, 2020	**515,000**	**$ 2.43**
Vested options as of March 31, 2020	**35,000**	**$ 6.85**

During the three-month period ended March 31, 2020, 56,500 stock options of Quebecor Media were exercised for a cash consideration of $3.4 million (66,950 stock options for $3.3 million in 2019). During the three-month period ended March 31, 2019, 180,000 Class B Shares of the Corporation were issued upon exercise of stock options of Quebecor (Note 11).

Deferred share unit and performance share unit plans

The deferred share unit ("DSU") and performance share unit ("PSU") plans are based either on Quebecor Class B Shares and on TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of March 31, 2020, 149,456 DSUs based on Quebecor Class B Shares and 225,290 DSUs based on TVA Group Class B Shares were outstanding under these plans. As of March 31, 2020, there is no outstanding PSUs. During the first quarter of 2020, a cash consideration of $4.8 million was paid upon PSUs redemption ($5.4 million in 2019).

Stock-based compensation expense

For the three-month period ended March 31, 2020, a reversal of the consolidated charge related to all stock-based compensation plans was recorded in the amount of $1.9 million (a charge of $6.5 million in 2019).

13. ACCUMULATED OTHER COMPREHENSIVE LOSS

	Cash flow hedges	Defined benefit plans	Total
Balance as of December 31, 2018	$ (30.7)	$ (52.0)	$ (82.7)
Other comprehensive loss	(12.8)	–	(12.8)
Balance as of March 31, 2019	(43.5)	(52.0)	(95.5)
Other comprehensive income (loss)	83.4	(52.0)	31.4
Balance as of December 31, 2019	39.9	(104.0)	(64.1)
Other comprehensive income	47.9	–	47.9
Balance as of March 31, 2020	**$ 87.8**	**$ (104.0)**	**$ (16.2)**

No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7-year period.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

14. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of March 31, 2020 and December 31, 2019 are as follows:

	March 31, 2020		December 31, 2019	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,224.4)**	**$ (6,135.6)**	$ (5,986.1)	$ (6,376.2)
Convertible debentures[2]	**(139.8)**	**(139.8)**	(162.0)	(162.0)
Derivative financial instruments				
Foreign exchange forward contracts	**7.5**	**7.5**	(2.1)	(2.1)
Cross-currency interest rate swaps	**1,036.4**	**1,036.4**	679.8	679.8

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

15. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order finalizing the rates, retroactively to March 31, 2016, by which the large cable and telephone companies provide aggregated wholesale access to their high-speed internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation consolidated financial statements. The new proposed rates are substantially lower than interim rates and could represent a retrospective reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. On September 13, 2019, a coalition of cable companies (including Videotron) and Bell Canada filed separate appeals of the CRTC's order with the Federal Court of Appeal arguing, among other things, that the order is marked by numerous errors of law and jurisdiction resulting in wholesale rates that are unreasonably low. The cable companies and Bell Canada also filed separate requests to stay the implementation of the order pending disposition of their appeals. On November 22, 2019, the leave to appeal was granted by the Federal Court of Appeal and the interim stay of the CRTC's order granted by this court on September 27, 2019, was extended until a final ruling by the Federal Court of Appeal is made. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

16. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data center operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron during the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments.

This is Exhibit 65 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and nine-month periods ended September 30, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. (“Quebecor” or the “Corporation”) is incorporated under the laws of Québec. The Corporation’s head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. (“Quebecor Media”). Unless the context otherwise requires, Quebecor or the Corporation refer to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers television distribution, Internet access, business solutions, wireline and mobile telephony and over-the-top video services in Canada and is engaged in the rental of movies and televisual products through its video-on-demand service. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of Internet portals and specialized Web sites, the publishing and distribution of magazines, the production and distribution of audiovisual content and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

<u>COVID-19 pandemic</u>

The COVID-19 pandemic is having a significant impact on the economic environment in Canada and around the world. On March 13, 2020, in order to limit the spread of the virus, the Québec government imposed a number of restrictions and special preventive measures, including the suspension of business activities deemed non-essential across Québec. Since then, the Québec government has gradually implemented a reopening plan, which was followed at the end of September by a second set of restrictions due to the second wave of the pandemic. This new plan includes regional restrictions according to the alert level of each region and remains subject to change as the pandemic evolves. This health crisis curtailed the operations of many of Quebecor’s business partners and led to a significant slowdown in some of Quebecor’s segments in the first nine months of 2020. Among other impacts, the first wave of measures to prevent the spread of the COVID-19 virus has led to a significant reduction in volume at Videotron Ltd.’s (“Videotron”) retail outlets and delays in client migration to its new Helix entertainment and home management platform; lower advertising revenues, a significant decrease in sports events broadcast by the TVA Sports channel, and reduced film and audiovisual content activity in the Media segment; and cancellations of shows and events, and interruption of music and book distribution activities in the Sports and Entertainment segment. Activity has since partly resumed at some of Quebecor’s affected business units by the health crisis, particularly those involved in retail sales and distribution, sports broadcasting and film and audiovisual content production. However, the business slowdown continues and the recovery remains very fragile, particularly with the pandemic entering its second wave. Quebecor has continued and will continue to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Because of the slowdown in the economy, approximately 10% of Quebecor’s workforce has received benefits under the Corporation’s assistance program while on stand-by. During the health crisis, this program provides financial assistance in addition to the Canada Emergency Wage Subsidy or Canada Emergency Response Benefit programs. Most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Emergency Wage Subsidy, and provisions for subsidies were recorded in 2020 as a reduction in employee costs, including $25.6 million in TVA Group Inc. (“TVA Group”). Given the uncertainty about the evolution of the pandemic, the full impact of the crisis over its duration cannot be determined with certainty.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2019 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on November 4, 2020.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and nine-month periods ended September 30, 2020.

Loss (gain) on embedded derivatives related to convertible debentures	**$ 17.8**	$ (4.2)	**$ (9.4)**	$ (7.0)
Other	**0.8**	(1.8)	**0.5**	(1.1)
	$ 18.6	$ (6.0)	**$ (8.9)**	$ (8.1)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and nine-month periods ended September 30, 2020, charges of $11.6 million and $25.8 million were recorded in connection with cost reduction initiatives in the Corporation's various segments ($1.2 million and $8.2 million in 2019).

Impairment charges on assets of $7.3 million were also recorded as a result of restructuring initiatives during the three-month and nine-month periods ended September 30, 2020 ($18.8 million in the nine-month period of 2019).

7. BUSINESS ACQUISITIONS

On June 17, 2020, the Sports and Entertainment segment acquired the Théâtre Capitole, a concert hall in Québec, for a cash consideration of $10.8 million, net of an assumed working capital liability. The acquired assets consist mainly of the building and equipment.

On February 13, 2019, TVA Group acquired the companies in the Serdy Média inc. and Serdy Video Inc. groups, including the Évasion and Zeste specialty channels, for a total cash consideration of $23.5 million, net of cash acquired of $0.5 million. An amount of $1.6 million relating to certain post-closing adjustments was also paid during the third quarter of 2019. The acquired assets consisted mainly of intangible assets and goodwill.

On April 1, 2019, TVA Group acquired the Incendo Media Inc. group, a Montréal-based producer and distributor of television programs for international markets, for a cash consideration of $11.1 million (net of cash acquired of $0.9 million) and a balance payable at fair value of $6.8 million. An amount of $0.6 million relating to certain post-closing adjustment was also received during the third quarter of 2019. The purchase price is subject to adjustments relating to the achievement of future conditions. The acquired assets consist mainly of intangible assets and goodwill.

8. SPECTRUM LICENCES

On April 10, 2019, Videotron acquired ten 600 MHz spectrum licences covering Eastern, Southern and Northern Québec, as well as Outaouais and Eastern Ontario regions for a total price of $255.8 million.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2020 and 2019
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

9. LONG-TERM DEBT

Components of long-term debt are as follows:

	September 30, 2020	December 31, 2019
Total long-term debt	**$ 5,952.1**	$ 5,986.1
Change in fair value related to hedged interest rate risk	**19.0**	9.1
Financing fees, net of amortization	**(31.7)**	(37.7)
	5,939.4	5,957.5
Less current portion	**(30.6)**	(57.2)
	$ 5,908.8	$ 5,900.3

As of September 30, 2020, the carrying value of long-term debt denominated in U.S. dollars, excluding financing fees, was $3,820.6 million ($3,718.8 million as of December 31, 2019) while the net fair value of related hedging derivative instruments was in an asset position of $800.2 million ($679.8 million as of December 31, 2019).

On July 15, 2020, the revolving credit facility of Quebecor in an amount of $50.0 million expired and was not renewed.

On February 21, 2020, TVA Group amended its secured revolving credit facility to extend its term from February 2020 to February 2021, to reduce the amount available for borrowing from $150.0 million to $75.0 million and to amend certain terms and conditions.

10. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on March 11, 2020 on Quebecor Class B Subordinate Voting Shares (“Class B Shares”) triggered an adjustment to the floor price and ceiling price then in effect. Effective on March 26, 2020, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $26.57 per share (that is, a maximum number of approximately 5,644,430 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $33.22 per share (that is, a minimum number of approximately 4,515,544 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on the number of shares outstanding and on net income attributable to shareholders.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended September 30		Nine months ended September 30	
	2020	2019	**2020**	2019
Income from continuing operations attributable to shareholders	**$ 140.9**	$ 178.5	**$ 413.6**	$ 410.2
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(0.1)**	(3.3)	**(6.3)**	1.0
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 140.8**	$ 175.2	**$ 407.3**	$ 411.2
Net income attributable to shareholders	**$ 140.9**	$ 178.5	**$ 447.4**	$ 507.7
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(0.1)**	(3.3)	**(6.3)**	1.0
Net income attributable to shareholders, adjusted for dilution effect	**$ 140.8**	$ 175.2	**$ 441.1**	$ 508.7
Weighted average number of shares outstanding (in millions)	**250.5**	255.6	**252.4**	255.8
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**0.2**	6.1	**5.8**	6.1
Weighted average number of diluted shares outstanding (in millions)	**250.7**	261.7	**258.2**	261.9

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2019	77,213,834	$ 8.6	177,415,407	$ 1,047.3
Class A Shares converted into Class B Shares	(102,100)	–	102,100	–
Shares purchased and cancelled	–	–	(4,695,800)	(27.7)
Balance as of September 30, 2020	**77,111,734**	**$ 8.6**	**172,821,707**	**$ 1,019.6**

On August 5, 2020, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the nine-month period ended September 30, 2020, the Corporation purchased and cancelled 4,695,800 Class B Shares for a total cash consideration of $143.4 million (2,672,056 Class B Shares for a total cash consideration of $80.5 million in 2019). The excess of $115.7 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings (an increase of the deficit of $64.8 million in 2019).

During the nine-month period ended September 30, 2019, the Corporation issued 180,000 Class B Shares upon exercise of stock options for a cash consideration of $2.7 million. As a result of this transaction, contributed surplus was increased by $3.0 million and stock-based compensation liability was reduced by the same amount.

On November 4, 2020, the Board of Directors of the Corporation declared a dividend of $0.20 per share on Class A Shares and Class B Shares, or approximately $50.0 million, payable on December 15, 2020, to shareholders of record at the close of business on November 20, 2020.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the nine-month period ended September 30, 2020:

	Outstanding options		
	Number		Weighted average exercise price
Quebecor			
As of December 31, 2019	2,504,892	$	29.21
Granted	1,342,267		33.19
Cancelled	(101,200)		30.33
As of September 30, 2020	**3,745,959**	**$**	**30.61**
Vested options as of September 30, 2020	**–**	**$**	**–**
Quebecor Media			
As of December 31, 2019	129,200	$	65.41
Exercised	(77,500)		64.82
As of September 30, 2020	**51,700**	**$**	**66.30**
Vested options as of September 30, 2020	**51,700**	**$**	**66.30**
TVA Group			
As of December 31, 2019	515,000	$	2.43
Granted	310,000		1.40
Cancelled	(10,000)		2.16
As of September 30, 2020	**815,000**	**$**	**2.04**
Vested options as of September 30, 2020	**35,000**	**$**	**6.85**

During the three-month period ended September 30, 2020, 5,000 stock options of Quebecor Media were exercised for a cash consideration of $0.2 million (38,950 stock options for $1.9 million in 2019). During the nine-month period ended September 30, 2020, 77,500 stock options of Quebecor Media were exercised for a cash consideration of $4.5 million (147,400 stock options for $7.4 million in 2019). During the nine-month period ended September 30, 2019, 180,000 Class B Shares of the Corporation were issued upon exercise of stock options of Quebecor (Note 12).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS (continued)

Deferred share unit and performance share unit plans

The deferred share unit (“DSU”) and performance share unit (“PSU”) plans are based either on Quebecor Class B Shares and on TVA Group Class B Non-Voting Shares (“TVA Group Class B Shares”). The DSUs vest over six years and will be redeemed for cash only upon the participant’s retirement or termination of employment, as the case may be, and the PSUs vest over three years and will be redeemed for cash at the end of this period subject to the achievement of financial targets. DSUs and PSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of September 30, 2020, 147,917 DSUs based on Quebecor Class B Shares and 204,598 DSUs based on TVA Group Class B Shares were outstanding under these plans. As of September 30, 2020, there is no PSUs outstanding. During the first quarter of 2020, a cash consideration of $4.8 million was paid upon PSUs redemption ($5.4 million in 2019).

Stock-based compensation expense

For the three-month period ended September 30, 2020, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $5.2 million ($1.2 million in 2019). For the nine-month period ended September 30, 2020, a consolidated charge related to all stock-based compensation plans was recorded in the amount of $3.6 million ($7.9 million in 2019).

14. ACCUMULATED OTHER COMPREHENSIVE LOSS

		Cash flow hedges[1]		Defined benefit plans[2]		Total
Balance as of December 31, 2018	$	(30.3)	$	(52.4)	$	(82.7)
Other comprehensive income		66.5		–		66.5
Balance as of September 30, 2019		36.2		(52.4)		(16.2)
Other comprehensive income (loss)		4.1		(52.0)		(47.9)
Balance as of December 31, 2019		40.3		(104.4)		(64.1)
Other comprehensive income (loss)		16.4		(59.7)		(43.3)
Balance as of September 30, 2020	**$**	**56.7**	**$**	**(164.1)**	**$**	**(107.4)**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 6 1/2-year period.

2 The re-measurement loss in the consolidated statement of comprehensive income for the nine-month period ended September 30, 2020 is mainly due to a decrease of the discount rate since December 31, 2019.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instruments and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of September 30, 2020 and December 31, 2019 are as follows:

	September 30, 2020		December 31, 2019	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (5,952.1)**	**$ (6,328.1)**	$ (5,986.1)	$ (6,376.2)
Convertible debentures[2]	**(153.2)**	**(153.2)**	(162.0)	(162.0)
Derivative financial instruments				
Foreign exchange forward contracts	**(1.6)**	**(1.6)**	(2.1)	(2.1)
Cross-currency interest rate swaps	**800.2**	**800.2**	679.8	679.8

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

16. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order finalizing the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation's consolidated financial statements. The new proposed rates are substantially lower than the interim rates and could represent a reduction in earnings of approximately $30.0 million (before income taxes) for the year 2020 and a retrospective reduction of approximately $52.0 million (before income taxes) from March 31, 2016 to December 31, 2019. On September 28, 2020, the CRTC approved a request from a coalition of cable companies (including Videotron) to stay the implementation of the order pertaining to final rates pending its final determination on the review and vary requests. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

17. DISCONTINUED OPERATIONS

On January 24, 2019, Videotron sold its 4Degrees Colocation Inc. data center operations for an amount of $261.6 million, which was fully paid in cash at the date of transaction. An amount of $0.9 million relating to a working capital adjustment was also paid by Videotron during the second quarter of 2019. The determination of the final proceeds from the sale is however subject to certain adjustments based on the realization of future conditions over a period of up to 10 years. Accordingly, a gain on disposal of $97.2 million, net of income taxes of $18.5 million, was accounted for in the first quarter of 2019, while an amount of $53.1 million from the proceeds received at the date of transaction was deferred in connection with the estimated present value of the future conditional adjustments. In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions were achieved.

This is Exhibit 66 to the affidavit of Kenneth Mathieu,
affirmed remotely by Jonathan Bitran stated as being
located in the city of Toronto in the province of Ontario, on
the 20th day of October, 2022, in accordance with
O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and six-month periods ended June 30, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

<u>COVID-19 pandemic</u>

The COVID-19 pandemic has had a significant impact on the economic environment in Canada and around the world. In order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures since the beginning of this health crisis, including the suspension of some business activities. In May 2021, the Québec government gradually announced the stages of its reopening plan, which extend over a period of several months. Since March 2020, this health crisis has curtailed the operations of many of Quebecor's business partners and led to a significant slowdown in some of the Corporation's segments. Among other impacts, the restrictions and preventive measures imposed by the Québec government caused a reduction in volume at Videotron Ltd.'s ("Videotron") retail outlets; a reduction in advertising revenues, a decrease in sports events broadcast by the TVA Sports specialty channel in 2020 and a reduction in film and audiovisual content activity in the Media segment; and the cancellation of most shows and events in the Sports and Entertainment segment. Despite the constraints created by this pandemic, Quebecor has provided essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Due to the decrease in their revenues, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Canadian Emergency Wage Subsidy and subsidies totalling $3.7 million and $9.3 million were recorded in the respective three-month and six-month periods ended June 30, 2021, as a reduction in employee costs ($29.5 million in the three-month and six-month periods ended June 30, 2020). Given the uncertainty about the future evolution of the pandemic, including a possible new wave, the full impact of the health crisis cannot be determined with certainty.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2020 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on August 4, 2021.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and six-month periods ended June 30, 2021.

	$ 629.8	$ 528.1	**$ 1,268.2**	$ 1,146.9

[1] During the first quarter of 2021, the Corporation reviewed the allocation of the value of the rights attached to the various components of its contract for the National Hockey League ("NHL") games to better reflect the economic benefits arising from them. In addition, the beginning of the 2020/2021 season was postponed from 2020 to 2021 and the season was also shortened. These changes had the effect of altering the timing of recognition in income of the NHL content rights. As well, during the second quarter of 2020, the Corporation remeasured its audiovisual content asset mainly related to the NHL rights, given the pandemic and its impacts on the Media segment's operations. The cost of NHL rights therefore has increased by $8.2 million in the second quarter of 2021 as compared to 2020 and it has increased by $24.8 million for the six-month period ended June 30, 2021, as compared to 2020.

4. FINANCIAL EXPENSES

	Three months ended June 30		Six months ended June 30	
	2021	2020	**2021**	2020
Interest on long-term debt and on debentures	**$ 83.1**	$ 76.2	**$ 162.7**	$ 153.4

5. GAIN ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	Three months ended June 30		Six months ended June 30	
	2021	2020	**2021**	2020
Gain on embedded derivatives related to convertible debentures	**$ (7.5)**	$ (4.7)	**$ (1.8)**	$ (27.2)
Other	**0.5**	0.5	**0.6**	(0.3)
	$ (7.0)	$ (4.2)	**$ (1.2)**	$ (27.5)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and six-month periods ended June 30, 2021, charges of $2.2 million and $5.4 million were recorded in connection with cost reduction initiatives in the Corporation's various segments ($10.6 million and $14.4 million in 2020), while an impairment charge on assets of $0.8 million was also recorded in the six-month period ended June 30, 2021 (none in 2020).

On April 1, 2021, Alithya Group Inc. ("Alithya"), a strategy and digital transformation leader, acquired the firm R3D Conseil inc., of which Quebecor was one of the main shareholders. As a result of this transaction, the Corporation now holds 11.9% of Alithya's share capital and 6.7% of voting rights related to the issued and outstanding shares of Alithya, and a corresponding gain on disposal of $19.6 million was recorded in the second quarter of 2021. This transaction also included purchase commitments from Quebecor for Alithya's services totalling approximately $360.0 million as part of a 10-year commercial agreement.

In addition, during the respective three-month and six-month periods ended June 30, 2021, the Corporation also recorded gains related to other items of $3.2 million and $2.7 million ($0.3 million and $0.2 million in 2020).

7. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron and the Québec government, jointly with the Canadian Government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron will extend its high-speed Internet network to connect approximately 37,000 additional households and the government has committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government in March 2021 was classified as restricted cash with a corresponding amount recorded as deferred subsidies in the consolidated balance sheet. During the respective three-month and six-month periods ended June 30, 2021, $4.4 million and $9.9 million of these deferred subsidies were recognized in reduction of the additions to property, plant and equipment, upon the realization of the required investments.

8. LONG-TERM DEBT

Components of long-term debt are as follows:

	June 30, 2021	December 31, 2020
Total long-term debt	**$ 7,714.5**	$ 5,786.4
Change in fair value related to hedged interest rate risk	**12.4**	16.8
Financing costs, net of amortization	**(41.3)**	(29.8)
	7,685.6	5,773.4
Less current portion	**(1,543.2)**	(28.5)
	$ 6,142.4	$ 5,744.9

On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of Senior Notes bearing interest at 3.125% and maturing on January 15, 2031, for net proceeds of $644.0 million, net of financing costs of $6.0 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron's ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter.

On June 3, 2021, Quebecor Media issued a redemption notice for its Senior Notes in aggregate principal amount of $500.0 million, bearing interest at 6.625% and due January 15, 2023, at a redemption price of 107.934% of their principal amount. Videotron also issued a redemption notice for its Senior Notes in aggregate principal amount of US$800.0 million, bearing interest at 5.000% and due July 15, 2022, at a redemption price of 104.002% of their principal amount. As a result, a net loss of $80.9 million was recorded in the consolidated statement of income in the second quarter of 2021, including a gain of $1.0 million previously recorded in other comprehensive income. In July 2021, the Senior Notes were redeemed and the related hedging contracts were unwound, for a total cash consideration of $1,377.9 million.

On June 17, 2021, Videotron issued $750.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2028, for net proceeds of $743.2 million, net of financing costs of $6.8 million. Videotron also issued US$500.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2029, for net proceeds of $599.6 million, net of financing costs of $5.8 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron's ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first three years of the term of the Notes and at a decreasing premium thereafter. Videotron has fully hedged the foreign currency risk associated with the new Senior Notes denominated in U.S. dollars by using cross-currency swaps.

As of June 30, 2021, the carrying value of long-term debt denominated in U.S. dollars, excluding financing costs, was $4,156.8 million ($3,655.1 million as of December 31, 2020) while the net fair value of related hedging derivative instruments was in an asset position of $494.1 million ($605.1 million as of December 31, 2020).

9. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on May 12, 2021, on Quebecor Class B Subordinate Voting Shares ("Class B Shares") triggered an adjustment to the floor price and ceiling price then in effect. Effective on May 27, 2021, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $25.86 per share (that is, a maximum number of approximately 5,801,117 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $32.32 per share (that is, a minimum number of approximately 4,640,894 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended June 30		Six months ended June 30	
	2021	2020	**2021**	2020
Income from continuing operations attributable to shareholders	**$ 123.5**	$ 142.4	**$ 244.8**	$ 272.7
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(6.4)**	(3.6)	**0.3**	(25.1)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 117.1**	$ 138.8	**$ 245.1**	$ 247.6
Net income attributable to shareholders	**$ 123.5**	$ 174.9	**$ 244.8**	$ 306.5
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(6.4)**	(3.6)	**0.3**	(25.1)
Net income attributable to shareholders, adjusted for dilution effect	**$ 117.1**	$ 171.3	**$ 245.1**	$ 281.4
Weighted average number of shares outstanding (in millions)	**245.0**	252.8	**245.8**	253.4
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**4.9**	5.8	**4.9**	5.8
Weighted average number of diluted shares outstanding (in millions)	**249.9**	258.6	**250.7**	259.2

11. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares (“Class A Shares”) with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2020	77,039,834	$ 8.6	171,132,357	$ 1,009.2
Class A Shares converted into Class B Shares	(55,800)	–	55,800	–
Shares purchased and cancelled	–	–	(4,073,200)	(24.0)
Balance as of June 30, 2021	**76,984,034**	**$ 8.6**	**167,114,957**	**$ 985.2**

On August 5, 2020, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On May 19, 2021, the Corporation received approval from the Toronto Stock Exchange to amend its normal course issuer bid in order to increase the maximum number of Class B Shares that may be repurchased to 7,500,000 Class B Shares, representing approximately 4.3% of issued and outstanding Class B Shares as of July 31, 2020. No other terms of the normal course issuer bid have been amended.

On August 4, 2021, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the six-month period ended June 30, 2021, the Corporation purchased and cancelled 4,073,200 Class B Shares for a total cash consideration of $131.5 million (3,143,300 Class B Shares for a total cash consideration of $95.6 million in 2020). The excess of $107.5 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings ($77.0 million in 2020).

On August 4, 2021, the Board of Directors of the Corporation declared a dividend of $0.275 per share on Class A Shares and Class B Shares, or approximately $67.1 million, payable on September 14, 2021, to shareholders of record at the close of business on August 20, 2021.

12. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the six-month period ended June 30, 2021:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2020	3,630,959	$ 30.57
Cancelled	(208,216)	29.72
As of June 30, 2021	**3,422,743**	**$ 30.62**
Vested options as of June 30, 2021	**–**	**$ –**
Quebecor Media		
As of December 31, 2020	47,950	$ 65.96
Exercised	(15,300)	63.23
As of June 30, 2021	**32,650**	**$ 67.24**
Vested options as of June 30, 2021	**32,650**	**$ 67.24**
TVA Group Inc.		
As of December 31, 2020	795,000	$ 2.06
Cancelled	(105,497)	2.43
As of June 30, 2021	**689,503**	**$ 2.00**
Vested options as of June 30, 2021	**25,000**	**$ 6.85**

During the three-month period ended June 30, 2021, 5,000 stock options of Quebecor Media were exercised for a cash consideration of $0.3 million (16,000 stock options for $0.9 million in 2020). During the six-month period ended June 30, 2021, 15,300 stock options of Quebecor Media were exercised for a cash consideration of $1.0 million (72,500 stock options for $4.3 million in 2020).

Deferred share unit and performance share unit plans

The deferred share unit (“DSU”) is based either on Quebecor Class B Shares and on TVA Group Inc. Class B Non-Voting Shares (“TVA Group Class B Shares”). The DSUs vest over six years and will be redeemed for cash only upon the participant’s retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of June 30, 2021, 142,141 DSUs based on Quebecor Class B Shares and 165,282 DSUs based on TVA Group Class B Shares were outstanding under these plans (148,785 and 204,598, respectively, as of December 31, 2020). During the first quarter of 2020, a cash consideration of $4.8 million was paid relating to a performance share unit plan terminated in 2020.

QUEBECOR INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

12. STOCK-BASED COMPENSATION PLANS (continued)

Stock-based compensation expense

For the three-month period ended June 30, 2021, a reversal of the charge related to all stock-based compensation plans was recorded in the amount of $1.9 million (a charge of $0.3 million in 2020). For the six-month period ended June 30, 2021, a charge related to all stock-based compensation plans was recorded in the amount of $1.7 million (a reversal of the charge of $1.6 million in 2020).

13. ACCUMULATED OTHER COMPREHENSIVE LOSS ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Defined benefit plans[2]	Total
Balance as of December 31, 2019	$ 40.3	$ (104.4)	$ (64.1)
Other comprehensive income (loss)	35.3	(42.5)	(7.2)
Balance as of June 30, 2020	75.6	(146.9)	(71.3)
Other comprehensive loss	(46.0)	(16.6)	(62.6)
Balance as of December 31, 2020	29.6	(163.5)	(133.9)
Other comprehensive income	0.2	119.7	119.9
Balance as of June 30, 2021	**$ 29.8**	**$ (43.8)**	**$ (14.0)**

[1] No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 8 year period.

[2] The re-measurement gain in the consolidated statement of comprehensive income for the six-month period ended June 30, 2021 is mainly due to an increase in the discount rate since December 31, 2020.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

14. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of June 30, 2021 and December 31, 2020 are as follows:

	June 30, 2021		December 31, 2020	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (7,714.5)**	**$ (8,029.4)**	$ (5,786.4)	$ (6,216.1)
Convertible debentures[2]	**(152.1)**	**(152.1)**	(153.5)	(153.5)
Derivative financial instruments				
Foreign exchange forward contracts	**(4.8)**	**(4.8)**	(8.0)	(8.0)
Cross-currency swaps	**494.1**	**494.1**	605.1	605.1

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

15. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order to finalize the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 had been invoiced to resellers and accounted for in the Corporation's consolidated financial statements on the basis of the effective date of March 31, 2016. The new proposed rates were substantially lower than the interim rates. On May 27, 2021, the CRTC restored, in a final decision, the interim rates that had been in effect since 2016. Accordingly, no adjustments are necessary to the consolidated financial statements.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

16. DISCONTINUED OPERATIONS

In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions to the sale price were achieved in connection to the 4Degrees Colocation Inc. data center operations sold in 2019 by Videotron.

17. SUBSEQUENT EVENT

On July 29, 2021, Quebecor announced an investment of nearly $830.0 million in the acquisition by Videotron of 294 blocks of spectrum in the 3500 MHz band across the country. More than half of the investment is concentrated in four Canadian provinces outside Québec: southern and eastern Ontario, Manitoba, Alberta and British Columbia.

This is Exhibit 67 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month periods ended March 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

COVID-19 pandemic

The COVID-19 pandemic continues to have a significant impact on the economic environment in Canada and around the world. In order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures since the beginning of this health crisis, including the suspension of some business activities. Since March 2020, this health crisis curtailed the operations of many of Quebecor's business partners and led to a significant slowdown in some of the Corporation's segments. Among other impacts, the restrictions and preventive measures imposed by the Québec government caused a reduction in volume at Videotron Ltd.'s ("Videotron") retail outlets; a reduction in advertising revenues, a decrease in sports events broadcast by the TVA Sports specialty channel in 2020 and a reduction in film and audiovisual content activity in the Media segment in 2020; and the cancellation of most shows and events in the Sports and Entertainment segment. Despite the constraints created by this pandemic, Quebecor has continued and will continue to provide essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Due to the decrease in their revenues, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Canadian Emergency Wage Subsidy and subsidies totalling $5.6 million were recorded in the first quarter of 2021 as a reduction in employee costs (no amount in the first quarter of 2020). Given the uncertainty about the evolution of the pandemic, the full impact until the end of the health crisis cannot be determined with certainty.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2020 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on May 12, 2021.

Comparative figures for the previous period have been restated to conform to the presentation adopted for the three-month period ended March 31, 2021.

2. REVENUES

	Three months ended March 31	
	2021	2020

Advertising	**76.1**	77.8
Subscription	**49.4**	51.8
Other	**49.3**	45.2
Sports and Entertainment	**31.2**	34.8
Inter-segments	**(28.9)**	(28.8)
	$ 1,091.1	$ 1,055.5

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

3. EMPLOYEE COSTS AND PURCHASE OF GOODS AND SERVICES

	Three months ended March 31	
	2021	2020
Employee costs	**$ 224.3**	$ 229.9
Less employee costs capitalized to property, plant and equipment and intangible assets	**(47.9)**	(51.9)
	176.4	178.0
Purchase of goods and services:		
Royalties, rights and creation costs[1]	**182.8**	168.5
Cost of products sold	**115.9**	97.1
Service contracts	**54.9**	46.4
Marketing, circulation and distribution expenses	**18.7**	21.1
Other	**89.7**	107.7
	462.0	440.8
	$ 638.4	$ 618.8

[1] During the first quarter of 2021, the Corporation reviewed the allocation of the value of the rights attached to the various components of its contract for the National Hockey League ("NHL") games to better reflect the economic benefits arising from them. In addition, the beginning of the 2020/2021 season was postponed from 2020 to 2021 and the season was also shortened. These changes had the effect of altering the timing of recognition in income of the NHL content rights. The cost of NHL rights therefore increased by $16.7 million in the first quarter of 2021.

4. FINANCIAL EXPENSES

	Three months ended March 31	
	2021	2020
Interest on long-term debt and on debentures	**$ 79.6**	$ 77.2
Amortization of financing costs	**2.2**	2.0
Interest on lease liabilities	**2.2**	2.0
Interest on net defined benefit liability	**2.2**	1.9
(Gain) loss on foreign currency translation on short-term monetary items	**(1.2)**	4.6
Other	**(1.9)**	(0.3)
	$ 83.1	$ 87.4

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

5. LOSS (GAIN) ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	Three months ended March 31	
	2021	2020
Loss (gain) on embedded derivatives related to convertible debentures	**$ 5.7**	$ (22.5)
Other	**0.1**	(0.8)
	$ 5.8	$ (23.3)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the first quarter of 2021, a charge of $3.7 million was recorded in connection with cost reduction initiatives in the Corporation's various segments ($3.9 million in 2020).

During the first quarter of 2021, an impairment charge on assets of $0.8 million was also recorded as a result of restructuring initiatives (none in 2020).

7. BUSINESS ACQUISITIONS

On February 1, 2021, the Sports and Entertainment segment acquired Les Disques Audiogramme inc., a record label, for a cash consideration of $14.5 million. The acquired assets consist mainly of intangible assets.

During the first quarter of 2021, a post-closing adjustment of $0.6 million was paid relating to the acquisition of the Incendo Media inc. group by TVA Group Inc. ("TVA Group") on April 1, 2019.

8. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron and the Québec government, jointly with the Canadian Government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron will extend its high-speed Internet network to connect approximately 37,000 additional households and the government has committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government was classified as restricted cash with a corresponding amount recorded as deferred subsidies in the consolidated balance sheet as of March 31, 2021. A portion of $5.5 million of these deferred subsidies was recognized in reduction of the additions to property, plant and equipment in the first quarter of 2021 upon the realization of the required investments.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month periods ended March 31, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

9. LONG-TERM DEBT

Components of long-term debt are as follows:

	March 31, 2021	December 31, 2020
Total long-term debt	**$ 6,376.1**	$ 5,786.4
Change in fair value related to hedged interest rate risk	**13.5**	16.8
Financing fees, net of amortization	**(33.5)**	(29.8)
	6,356.1	5,773.4
Less current portion	**(25.4)**	(28.5)
	$ 6,330.7	$ 5,744.9

On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of Senior Notes bearing interest at 3.125% and maturing on January 15, 2031, for net proceeds of $644.0 million, net of financing fees of $6.0 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron's ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter.

In March 2021, Videotron contracted new unsecured on-demand credit facilities under which letters of credit were issued and submitted to Innovation, Science and Economic Development Canada ("ISED Canada") as a pre-auction deposit, in respect to its application to participate to the 3500 MHz spectrum auction. In accordance with the rules of confidentially established by ISED Canada respecting restrictions on communications during the auction process, it is strictly forbidden for the Corporation to disclose the amount of these letters of credit. Videotron may withdraw the letters of credit at any time prior to the opening of the auction.

As of March 31, 2021, the carrying value of long-term debt denominated in U.S. dollars, excluding financing fees, was $3,595.0 million ($3,655.1 million as of December 31, 2020) while the net fair value of related hedging derivative instruments was in an asset position of $540.7 million ($605.1 million as of December 31, 2020).

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended March 31	
	2021	2020
Income from continuing operations attributable to shareholders	**$ 121.3**	$ 130.3
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**–**	(21.9)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 121.3**	$ 108.4
Net income attributable to shareholders	**$ 121.3**	$ 131.6
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**–**	(21.9)
Net income attributable to shareholders, adjusted for dilution effect	**$ 121.3**	$ 109.7
Weighted average number of shares outstanding (in millions)	**246.7**	254.0
Potentially dilutive effect of convertible debentures of the Corporation and of stock options of the Corporation (in millions)	**0.2**	5.9
Weighted average number of diluted shares outstanding (in millions)	**246.9**	259.9

For the three-month period ended March 31, 2021, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation since their impact is anti-dilutive.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

11. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares ("Class B Shares") on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		**Class B Shares**	
	Number	Amount	Number	Amount
Balance as of December 31, 2020	77,039,834	$ 8.6	171,132,357	$ 1,009.2
Class A Shares converted into Class B Shares	(55,200)	–	55,200	–
Shares purchased and cancelled	–	–	(2,649,300)	(15.6)
Balance as of March 31, 2021	**76,984,634**	**$ 8.6**	**168,538,257**	**$ 993.6**

On August 5, 2020, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.5% of issued and outstanding Class B Shares as of July 31, 2020. The purchases can be made from August 15, 2020 to August 14, 2021, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the three-month period ended March 31, 2021, the Corporation purchased and cancelled 2,649,300 Class B Shares for a total cash consideration of $84.4 million (1,059,100 Class B Shares for a total cash consideration of $34.1 million in 2020). The excess of $68.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings ($27.8 million in 2020).

On May 12, 2021, the Board of Directors of the Corporation declared a dividend of $0.275 per share on Class A Shares and Class B Shares, or approximately $67.5 million, payable on June 22, 2021, to shareholders of record at the close of business on May 28, 2021.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participates, for the three-month period ended March 31, 2021:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2020	3,630,959	$ 30.57
Cancelled	(22,593)	30.19
As of March 31, 2021	**3,608,366**	**$ 30.57**
Vested options as of March 31, 2021	**–**	**$ –**
Quebecor Media		
As of December 31, 2020	47,950	$ 65.96
Exercised	(10,300)	63.10
As of March 31, 2021	**37,650**	**$ 66.75**
Vested options as of March 31, 2021	**37,650**	**$ 66.75**
TVA Group		
As of December 31, 2020	795,000	$ 2.06
Cancelled	(25,497)	1.87
As of March 31, 2021	**769,503**	**$ 2.06**
Vested options as of March 31, 2021	**35,000**	**$ 6.85**

During the three-month period ended March 31, 2021, 10,300 stock options of Quebecor Media were exercised for a cash consideration of $0.7 million (56,500 stock options for $3.4 million in 2020).

Deferred share unit and performance share unit plans

The deferred share unit ("DSU") is based either on Quebecor Class B Shares and on TVA Group Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of March 31, 2021, 143,677 DSUs based on Quebecor Class B Shares and 179,784 DSUs based on TVA Group Class B Shares were outstanding under these plans (148,785 and 204,598, respectively, as of December 31, 2020). During the first quarter of 2020, a cash consideration of $4.8 million was paid relating to a performance share unit plan terminated in 2020.

Stock-based compensation expense

For the three-month period ended March 31, 2021, a charge related to all stock-based compensation plans was recorded in the amount of $3.6 million (a reversal of the charge of $1.9 million in 2020).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. ACCUMULATED OTHER COMPREHENSIVE LOSS ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Defined benefit plans[2]	Total
Balance as of December 31, 2019	$ 40.3	$ (104.4)	$ (64.1)
Other comprehensive income	47.9	–	47.9
Balance as of March 31, 2020	88.2	(104.4)	(16.2)
Other comprehensive loss	(58.6)	(59.1)	(117.7)
Balance as of December 31, 2020	29.6	(163.5)	(133.9)
Other comprehensive (loss) income	(0.7)	123.3	122.6
Balance as of March 31, 2021	**$ 28.9**	**$ (40.2)**	**$ (11.3)**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 6 year period.

2 The re-measurement gain in the consolidated statement of comprehensive income for the three-month period ended March 31, 2021 is mainly due to an increase in the discount rate since December 31, 2020.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

14. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of March 31, 2021 and December 31, 2020 are as follows:

	March 31, 2021		December 31, 2020	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,376.1)**	**$ (6,724.9)**	$ (5,786.4)	$ (6,216.1)
Convertible debentures[2]	**(159.4)**	**(159.4)**	(153.5)	(153.5)
Derivative financial instruments				
Foreign exchange forward contracts	**(6.4)**	**(6.4)**	(8.0)	(8.0)
Cross-currency interest rate swaps	**540.7**	**540.7**	605.1	605.1

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing fees.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

15. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order finalizing the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 have been invoiced to resellers and accounted for in the Corporation's consolidated financial statements. The new proposed rates are substantially lower than the interim rates and could represent a reduction in earnings of approximately $40.0 million (before income taxes) for the year 2021 and a retrospective reduction of approximately $82.0 million (before income taxes) from March 31, 2016 to December 31, 2020. On September 28, 2020, the CRTC approved a request from a coalition of cable companies (including Videotron) to stay the implementation of the order pertaining to final rates pending its final determination on the review and vary requests. Accordingly, at this stage of these proceedings, the Corporation still estimates that the interim rates are the appropriate basis to account for its wholesale Internet access revenues.

16. SUBSEQUENT EVENTS

On April 1, 2021, Alithya Group inc. ("Alithya"), a strategy and digital transformation leader, acquired the firm R3D Conseil inc., of which Quebecor was one of the main shareholders. As part of this transaction, Quebecor obtained 11.9% of Alithya's share capital and 6.7% of voting rights related to the issued and outstanding Alithya's shares. The corresponding gain on disposal of approximately $19.0 million will be accounted for in the second quarter of 2021. This transaction also includes purchase commitments from Quebecor for Alithya's services totalling approximately $360.0 million as part of a 10-year commercial agreement.

This is Exhibit 68 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

See accompanying notes to condensed consolidated financial statements.

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal (Québec), Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment leasing and post-production services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural events management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

COVID-19 pandemic

The COVID-19 pandemic has had a significant impact on the economic environment in Canada and around the world. In order to limit the spread of the virus, the Québec government has imposed a number of restrictions and special preventive measures since the beginning of this health crisis, including the suspension of some business activities. The Québec government has gradually implemented a new reopening plan since May 2021 and has imposed the use of a vaccination passport starting September 1, 2021, required to be admitted to certain locations or to participate in certain non-essential activities. Since March 2020, this health crisis has curtailed the operations of many of Quebecor's business partners and has led to a significant slowdown in some of the Corporation's segments. Among other impacts, the restrictions and preventive measures imposed by the Québec government caused a reduction in volume at Videotron Ltd.'s ("Videotron") retail outlets; a reduction in advertising revenues, a decrease in sports events broadcast by the TVA Sports specialty channel in 2020 and a reduction in film and audiovisual content activity in the Media segment; and the cancellation of most shows and events in the Sports and Entertainment segment. Despite the constraints created by this pandemic, Quebecor has provided essential telecommunications and news services during this health crisis, while safeguarding the health and safety of the public and its employees. Due to the decrease in their revenues, most of the business units in the Media segment and Sports and Entertainment segment have qualified for the Canadian Emergency Wage Subsidy and subsidies totalling $9.4 million were recorded in the nine-month period ended September 30, 2021, as a reduction in employee costs ($14.4 million and $43.9 million in the respective three-month and nine-month periods ended September 30, 2020). Given the uncertainty about the future evolution of the pandemic, including any new major wave, the full impact of the health crisis cannot be determined with certainty.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2020 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on November 3, 2021.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and nine-month periods ended September 30, 2021.

Other	**87.5**	65.4	**255.0**	252.0
	455.8	441.8	**1,378.1**	1,274.0
	$ 627.9	$ 598.3	**$ 1,896.1**	$ 1,745.2

1 In 2021, the Corporation reviewed the allocation of the value of the rights attached to the various components of its contract for the National Hockey League ("NHL") games to better reflect the economic benefits arising from them. In addition, the beginning of the 2020/2021 season was postponed from 2020 to 2021 and the season was also shortened. These changes had the effect of altering the timing of recognition in income of the NHL content rights. The cost of NHL rights therefore has increased by $13.3 million for the nine-month period ended September 30, 2021 as compared to 2020.

4. FINANCIAL EXPENSES

	Three months ended September 30		Nine months ended September 30	
	2021	2020	**2021**	2020
Interest on long-term debt and on debentures	**$ 75.2**	$ 75.9	**$ 237.9**	$ 229.3

Other	**(0.2)**	–	**(2.5)**	0.8
	$ 83.8	$ 80.1	**$ 253.9**	$ 249.1

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

5. (GAIN) LOSS ON VALUATION AND TRANSLATION OF FINANCIAL INSTRUMENTS

	Three months ended September 30		Nine months ended September 30	
	2021	2020	**2021**	2020
(Gain) loss on embedded derivatives related to convertible debentures	**$ (5.8)**	$ 17.8	**$ (7.6)**	$ (9.4)
Other	**(0.2)**	0.8	**0.4**	0.5
	$ (6.0)	$ 18.6	**$ (7.2)**	$ (8.9)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and nine-month periods ended September 30, 2021, charges of $12.4 million and $17.8 million were recorded in connection with cost reduction initiatives in the Corporation's various segments ($11.8 million and $26.2 million in 2020), while an impairment charge on assets of $0.8 million was also recorded in the nine-month period ended September 30, 2021 ($7.3 million in the three-month and nine-month periods ended September 30, 2020).

On April 1, 2021, Alithya Group Inc. ("Alithya"), a strategy and digital transformation leader, acquired the firm R3D Conseil inc., of which Quebecor was one of the main shareholders. As a result of this transaction, the Corporation now holds 11.9% of Alithya's share capital and 6.7% of voting rights related to the issued and outstanding shares of Alithya, and a corresponding gain on disposal of $19.6 million was recorded in the second quarter of 2021. This transaction also included purchase commitments from Quebecor for Alithya's services totalling approximately $360.0 million as part of a 10-year commercial agreement.

In addition, during the nine-month period ended September 30, 2021, the Corporation also recorded a gain related to other items of $2.7 million ($0.2 million and $0.4 million in the respective three-month and nine-month periods ended September 30, 2020).

7. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron and the Québec government, jointly with the Canadian Government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron will extend its high-speed Internet network to connect approximately 37,000 additional households and the government has committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government in March 2021 was classified as restricted cash with a corresponding amount recorded as deferred subsidies in the consolidated balance sheet. During the respective three-month and nine-month periods ended September 30, 2021, $4.0 million and $13.9 million of these deferred subsidies were recognized in reduction of the additions to property, plant and equipment, upon the realization of the required investments.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

8. SPECTRUM LICENCES

On July 29, 2021, Quebecor announced an investment of nearly $830.0 million in the acquisition by Videotron of 294 blocks of spectrum in the 3500 MHz band across the country. More than half of the investment is concentrated in four Canadian provinces outside Québec: southern and eastern Ontario, Manitoba, Alberta and British Columbia. Videotron made an initial deposit of $166.0 million in the third quarter of 2021 for the acquisition of these spectrum licences. Innovation, Science and Economic Development Canada (“ISED”) had initially set October 4, 2021 as the date for payment of the balance. However, delivery of the licenses has been postponed to give ISED time to conduct technical consultations with respect to the 3500 MHz band. ISED has not yet determined the date on which the spectrum licences will be issued and delivered as well as the date the final payment of $664.0 million will become due.

In late August 2021, two competitors launched legal proceedings in Federal Court contesting the awarding of licences in the 3500 MHZ band in Western Canada to Videotron. These cases are currently before the Court. On October 22, 2021, the Federal Court dismissed an application for an interlocutory injunction filed by a competitor to halt the granting of spectrum licences in Western Canada.

9. LONG-TERM DEBT

Components of long-term debt are as follows:

	September 30, 2021	December 31, 2020
Total long-term debt	**$ 6,284.7**	$ 5,786.4
Change in fair value related to hedged interest rate risk	**11.7**	16.8
Financing costs, net of amortization	**(39.6)**	(29.8)
	6,256.8	5,773.4
Less current portion	**(35.3)**	(28.5)
	$ 6,221.5	$ 5,744.9

On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of Senior Notes bearing interest at 3.125% and maturing on January 15, 2031, for net proceeds of $644.0 million, net of financing costs of $6.0 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron’s ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first five years of the term of the Notes and at a decreasing premium thereafter.

On June 3, 2021, Quebecor Media issued a redemption notice for its Senior Notes in aggregate principal amount of $500.0 million, bearing interest at 6.625% and due January 15, 2023, at a redemption price of 107.934% of their principal amount. Videotron also issued a redemption notice for its Senior Notes in aggregate principal amount of US$800.0 million, bearing interest at 5.000% and due July 15, 2022, at a redemption price of 104.002% of their principal amount. As a result, a net loss of $80.9 million was recorded in the consolidated statement of income in the second quarter of 2021, including a gain of $1.0 million previously recorded in other comprehensive income. In July 2021, the Senior Notes were redeemed and the related hedging contracts were unwound, for a total cash consideration of $1,377.9 million, including the early redemption premium.

9. LONG-TERM DEBT (continued)

On June 17, 2021, Videotron issued $750.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2028, for net proceeds of $743.2 million, net of financing costs of $6.8 million. Videotron also issued US$500.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2029, for net proceeds of $599.6 million, net of financing costs of $5.8 million. The Senior Notes are unsecured and contain certain restrictions, including limitations on Videotron's ability to incur additional indebtedness, pay dividends and make other distributions. The Notes are guaranteed by specific subsidiaries of Videotron and are redeemable at the option of Videotron, in whole or in part, at a price based on a make-whole formula during the first three years of the term of the Notes and at a decreasing premium thereafter. Videotron has fully hedged the foreign currency risk associated with the new Senior Notes denominated in U.S. dollars by using cross-currency swaps.

As of September 30, 2021, the carrying value of long-term debt denominated in U.S. dollars, excluding financing costs, was $3,242.7 million ($3,655.1 million as of December 31, 2020) while the net fair value of related hedging derivative instruments was in an asset position of $388.4 million ($605.1 million as of December 31, 2020).

10. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on May 12, 2021, on Quebecor Class B Subordinate Voting Shares ("Class B Shares") triggered an adjustment to the floor price and ceiling price then in effect. Effective on May 27, 2021, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $25.86 per share (that is, a maximum number of approximately 5,801,117 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $32.32 per share (that is, a minimum number of approximately 4,640,894 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and nine-month periods ended September 30, 2021 and 2020
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

11. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended September 30		Nine months ended September 30	
	2021	2020	**2021**	2020
Income from continuing operations attributable to shareholders	**$ 173.1**	$ 140.9	**$ 417.9**	$ 413.6
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(4.7)**	(0.1)	**(4.3)**	(6.3)
Income from continuing operations attributable to shareholders, adjusted for dilution effect	**$ 168.4**	$ 140.8	**$ 413.6**	$ 407.3
Net income attributable to shareholders	**$ 173.1**	$ 140.9	**$ 417.9**	$ 447.4
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**(4.7)**	(0.1)	**(4.3)**	(6.3)
Net income attributable to shareholders, adjusted for dilution effect	**$ 168.4**	$ 140.8	**$ 413.6**	$ 441.1
Weighted average number of shares outstanding (in millions)	**242.7**	250.5	**244.8**	252.4

12. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares (“Class A Shares”) with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2020	77,039,834	$ 8.6	171,132,357	$ 1,009.2
Class A Shares converted into Class B Shares	(55,800)	–	55,800	–
Shares purchased and cancelled	–	–	(7,064,650)	(41.7)
Balance as of September 30, 2021	**76,984,034**	**$ 8.6**	**164,123,507**	**$ 967.5**

On August 4, 2021, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the nine-month period ended September 30, 2021, the Corporation purchased and cancelled 7,064,650 Class B Shares for a total cash consideration of $225.9 million (4,695,800 Class B Shares for a total cash consideration of $143.4 million in 2020). The excess of $184.2 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings ($115.7 million in 2020).

On November 3, 2021, the Board of Directors of the Corporation declared a dividend of $0.275 per share on Class A Shares and Class B Shares, or approximately $66.3 million, payable on December 14, 2021, to shareholders of record at the close of business on November 19, 2021.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participate, for the nine-month period ended September 30, 2021:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2020	3,630,959	$ 30.57
Granted	100,000	31.49
Cancelled	(675,316)	30.44
As of September 30, 2021	**3,055,643**	**$ 30.63**
Vested options as of September 30, 2021	**–**	**$ –**
Quebecor Media		
As of December 31, 2020	47,950	$ 65.96
Exercised	(47,950)	65.96
As of September 30, 2021	**–**	**$ –**
TVA Group Inc.		
As of December 31, 2020	795,000	$ 2.06
Cancelled	(105,497)	2.43
As of September 30, 2021	**689,503**	**$ 2.00**
Vested options as of September 30, 2021	**25,000**	**$ 6.85**

During the three-month period ended September 30, 2021, 32,650 stock options of Quebecor Media were exercised for a cash consideration of $2.2 million (5,000 stock options for $0.2 million in 2020). During the nine-month period ended September 30, 2021, 47,950 stock options of Quebecor Media were exercised for a cash consideration of $3.2 million (77,500 stock options for $4.5 million in 2020).

Deferred share unit and performance share unit plans

The deferred share unit (“DSU”) is based either on Quebecor Class B Shares or on TVA Group Inc. Class B Non-Voting Shares (“TVA Group Class B Shares”). The DSUs vest over six years and will be redeemed for cash only upon the participant’s retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of September 30, 2021, 133,984 DSUs based on Quebecor Class B Shares and 163,839 DSUs based on TVA Group Class B Shares were outstanding under these plans (148,785 and 204,598, respectively, as of December 31, 2020). During the first quarter of 2020, a cash consideration of $4.8 million was paid relating to a performance share unit plan terminated in 2020.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

13. STOCK-BASED COMPENSATION PLANS (continued)

Stock-based compensation expense

For the three-month period ended September 30, 2021, a reversal of the charge related to all stock-based compensation plans was recorded in the amount of $1.2 million (a charge of $5.2 million in 2020). For the nine-month period ended September 30, 2021, a charge related to all stock-based compensation plans was recorded in the amount of $0.5 million ($3.6 million in 2020).

14. ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Defined benefit plans[2]	Equity investment	Total
Balance as of December 31, 2019	$ 40.3	$ (104.4)	$ –	$ (64.1)
Other comprehensive income (loss)	16.4	(59.7)	–	(43.3)
Balance as of September 30, 2020	56.7	(164.1)	–	(107.4)
Other comprehensive (loss) income	(27.1)	0.6	–	(26.5)
Balance as of December 31, 2020	29.6	(163.5)	–	(133.9)
Other comprehensive income	12.1	138.0	2.1	152.2
Balance as of September 30, 2021	**$ 41.7**	**$ (25.5)**	**$ 2.1**	**$ 18.3**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 3/4-year period.

2 The re-measurement gain in the consolidated statement of comprehensive income for the nine-month period ended September 30, 2021 is mainly due to an increase in the discount rate since December 31, 2020.

15. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

15. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The fair value of derivative financial instruments recognized in the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk impacted by the financial and economic environment prevailing at the date of the valuation in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of September 30, 2021 and December 31, 2020 are as follows:

	September 30, 2021		December 31, 2020	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,284.7)**	**$ (6,492.9)**	$ (5,786.4)	$ (6,216.1)
Convertible debentures[2]	**(146.6)**	**(146.6)**	(153.5)	(153.5)
Derivative financial instruments				
Foreign exchange forward contracts	**1.2**	**1.2**	(8.0)	(8.0)
Cross-currency swaps	**388.4**	**388.4**	605.1	605.1

[1] The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

[2] The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

16. CONTINGENCIES

In the context of disputes between the Corporation and a competitor, legal proceedings have been initiated by the Corporation and against the Corporation. At this stage of proceedings, management of the Corporation is in the opinion that the outcome is not expected to have a material adverse effect on the Corporation's results or on its financial position.

On August 15, 2019, the Canadian Radio-television and Telecommunications Commission ("CRTC") issued an order to finalize the rates, retroactively to March 31, 2016, at which the large cable and telephone companies provide aggregated wholesale access to their high-speed Internet networks. The interim rates in effect since 2016 had been invoiced to resellers and accounted for in the Corporation's consolidated financial statements on the basis of the effective date of March 31, 2016. The new proposed rates were substantially lower than the interim rates. On May 27, 2021, the CRTC restored, in a final decision, the interim rates that had been in effect since 2016. Accordingly, no adjustments are necessary to the consolidated financial statements.

17. DISCONTINUED OPERATIONS

In the second quarter of 2020, a gain of $30.8 million, net of income taxes of $4.7 million, was recorded as certain adjusting conditions to the sale price were achieved in connection to the 4Degrees Colocation Inc. data center operations sold in 2019 by Videotron.

This is Exhibit 69 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month and six-month periods ended June 30, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal, Québec, Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment rental and postproduction services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural event management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, as they may affect advertising expenditures of corporations. Accordingly, the results of operations for interim periods of the Media segment should not necessarily be considered indicative of full-year results due to the seasonality of certain of its operations.

Since March 2020, the COVID-19 pandemic has had an impact on some of the Corporation's quarterly results, more particularly in the Media and the Sports and Entertainment segments. Given the uncertainty around the future evolution of the pandemic, including any new major waves, all future impacts of the health crisis on the results of operations cannot be determined with certainty.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (IASB), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2021 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on August 3, 2022.

Comparative figures for previous periods have been restated to conform to the presentation adopted for the three-month and six-month periods ended June 30, 2022.

In particular, as of the second quarter of 2022, restricted cash is presented with cash and cash equivalents on the consolidated statements of cash flows, in line with the IFRS Interpretations Committee's agenda decision finalized in the second quarter of 2022 that clarifies the presentation of cash subject to contractual restrictions agreed with a third party (see note 7). Prior period information has been restated to reflect the new presentation. Accordingly, deferred subsidies used to finance additions to property, plant and equipment related to the roll-out of high-speed Internet services in various regions of Québec are now presented under investing activities, which has the effect of increasing cash used in investing activities by $46.1 million and $77.8 million for the three-month and six-month periods ended June 30, 2022 respectively ($4.4 million increase and $206.3 million decrease for the three-month and six-month periods ended June 30, 2021).

Other	**0.2**	0.5	**0.3**	0.6
	$ 2.1	$ (7.0)	**$ 9.4**	$ (1.2)

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the respective three-month and six-month periods ended June 30, 2022, charges of $1.2 million and $1.9 million were recorded in connection with cost reduction initiatives in the Corporation's various segments ($2.2 million and $5.0 million in 2021), while an impairment charge on assets of $0.8 million was also recorded in the six-month period ended June 30, 2021.

On April 1, 2021, Alithya Group Inc. ("Alithya"), a strategy and digital transformation leader, acquired the firm R3D Conseil inc., of which Quebecor was one of the main shareholders. As a result of this transaction, the Corporation now holds 11.9% of Alithya's share capital and 6.7% of voting rights related to the issued and outstanding shares of Alithya, and a corresponding gain on disposal of $19.6 million was recorded in the second quarter of 2021.

In addition, during the respective three-month and six-month periods ended June 30, 2022, the Corporation also recorded charges related to other items of $2.3 million and $2.5 million (gains of $3.2 million and $2.3 million in 2021).

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

7. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron Ltd. ("Videotron") and the Québec government, jointly with the Canadian government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, the government is committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's high-speed Internet network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government in March 2021 was recorded as deferred subsidies on the consolidated balance sheets (balance of $84.6 million as of June 30, 2022). When the required investments as per the program are realized, corresponding subsidies are recognized as a reduction of additions to property, plant and equipment.

8. LONG-TERM DEBT

Components of long-term debt are as follows:

	June 30, 2022	December 31, 2021
Total long-term debt	**$ 6,603.4**	$ 6,554.0
Change in fair value related to hedged interest rate risk	**(1.8)**	8.3
Financing costs, net of amortization	**(37.2)**	(37.9)
	6,564.4	6,524.4
Less current portion	**(1,171.4)**	(56.5)
	$ 5,393.0	$ 6,467.9

As of June 30, 2022, the carrying value of long-term debt denominated in U.S. dollars, excluding financing costs, was $3,382.8 million ($3,245.9 million as of December 31, 2021) while the net fair value of related hedging derivative instruments was in an asset position of $404.0 million ($381.4 million as of December 31, 2021).

2022

On February 15, 2022, TVA Group Inc. ("TVA Group") amended its $75.0 million secured revolving credit facility to extend its term to February 2023 and amended certain of its terms and conditions.

On May 20, 2022, Videotron amended its $1,500.0 million secured revolving credit facility to extend its term to July 2026 and Quebecor Media amended its $300.0 million secured revolving credit facility to extend its term to July 2025. Certain terms and conditions of these credit facilities were also amended.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

8. LONG-TERM DEBT (continued)

2021

On January 22, 2021, Videotron issued $650.0 million aggregate principal amount of Senior Notes bearing interest at 3.125% and maturing on January 15, 2031, for net proceeds of $644.0 million, net of financing costs of $6.0 million.

On June 3, 2021, Quebecor Media issued a redemption notice for its Senior Notes in aggregate principal amount of $500.0 million, bearing interest at 6.625% and due January 15, 2023, at a redemption price of 107.934% of their principal amount. Videotron also issued a redemption notice for its Senior Notes in aggregate principal amount of US$800.0 million, bearing interest at 5.000% and due July 15, 2022, at a redemption price of 104.002% of their principal amount. As a result, a net loss of $80.9 million was recorded in the consolidated statement of income in the second quarter of 2021, including a gain of $1.0 million previously recorded in other comprehensive income. In July 2021, the Senior Notes were redeemed and the related hedging contracts were unwound, for a total cash consideration of $1,377.9 million.

On June 17, 2021, Videotron issued $750.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2028, for net proceeds of $743.2 million, net of financing costs of $6.8 million. Videotron also issued US$500.0 million aggregate principal amount of Senior Notes bearing interest at 3.625% and maturing on June 15, 2029, for net proceeds of $599.6 million, net of financing costs of $5.8 million. Videotron has fully hedged the foreign currency risk associated with the new Senior Notes denominated in U.S. dollars by using cross-currency swaps.

9. CONVERTIBLE DEBENTURES

In accordance with the terms of the trust indenture governing the convertible debentures, the quarterly dividend declared on May 11, 2022, on Quebecor Class B Subordinate Voting Shares (“Class B Shares”) triggered an adjustment to the floor price and ceiling price then in effect. Effective on May 26, 2022, the conversion features of the convertible debentures are subject to an adjusted floor price of approximately $25.07 per share (that is, a maximum number of approximately 5,984,010 Class B Shares corresponding to a ratio of $150.0 million to the adjusted floor price) and an adjusted ceiling price of approximately $31.33 per share (that is, a minimum number of approximately 4,787,208 Class B Shares corresponding to a ratio of $150.0 million to the adjusted ceiling price).

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

10. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share attributable to shareholders:

	Three months ended June 30		Six months ended June 30	
	2022	2021	**2022**	2021
Net income attributable to shareholders	**$ 157.4**	$ 123.5	**$ 278.8**	$ 244.8
Impact of assumed conversion of convertible debentures of the Corporation and of stock options of subsidiaries	**–**	(6.4)	**–**	0.3
Net income attributable to shareholders, adjusted for dilution effect	**$ 157.4**	$ 117.1	**$ 278.8**	$ 245.1
Weighted average number of shares outstanding (in millions)	**236.7**	245.0	**237.9**	245.8
Potentially dilutive effect of convertible debentures and of stock options of the Corporation (in millions)	**0.1**	4.9	**0.1**	4.9
Weighted average number of diluted shares outstanding (in millions)	**236.8**	249.9	**238.0**	250.7

For the three-month and six-month periods ended June 30, 2022, the diluted earnings per share calculation does not take into consideration the potential dilutive effect of convertible debentures of the Corporation since their impact is anti-dilutive.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

11. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Shares on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		Class B Shares	
	Number	Amount	Number	Amount
Balance as of December 31, 2021	76,984,034	$ 8.6	162,273,507	$ 956.6
Shares purchased and cancelled	–	–	(4,202,951)	(24.8)
Balance as of June 30, 2022	**76,984,034**	**$ 8.6**	**158,070,556**	**$ 931.8**

Repurchase of shares

On August 4, 2021, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On April 27, 2022, the Corporation received approval from the Toronto Stock Exchange to amend its normal course issuer bid in order to increase the maximum number of Class B Shares that may be repurchased to 10,000,000 Class B Shares, representing approximately 6.8% of the Class B Shares public float as of July 30, 2021. No other terms of the normal course issuer bid have been amended.

On August 3, 2022, the Corporation authorized a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.8% of issued and outstanding Class B Shares as of July 29, 2022. The purchases can be made from August 15, 2022 to August 14, 2023, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

During the six-month period ended June 30, 2022, the Corporation purchased and cancelled 4,202,951 Class B Shares for a total cash consideration of $123.1 million (4,073,200 Class B Shares for a total cash consideration of $131.5 million in 2021). The excess of $98.3 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings ($107.5 million in 2021).

Dividends

On August 3, 2022, the Board of Directors of the Corporation declared a dividend of $0.30 per share on Class A Shares and Class B Shares, or approximately $70.5 million, payable on September 13, 2022, to shareholders of record at the close of business on August 19, 2022.

(tabular amounts in millions of Canadian dollars, except for per share data and option data)

12. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participate, for the six-month period ended June 30, 2022:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2021	2,379,600	$ 30.74
Exercised	(19,999)	26.52
Cancelled	(137,785)	31.04
As of June 30, 2022	**2,221,816**	**$ 30.76**
Vested options as of June 30, 2022	**429,526**	**$ 29.44**
TVA Group		
As of December 31, 2021 and June 30, 2022	**369,503**	**$ 2.09**
Vested options as of June 30, 2022	**82,664**	**$ 3.53**

During the three-month period ended June 30, 2021, 5,000 stock options of Quebecor Media were exercised for a cash consideration of $0.3 million. During the six-month period ended June 30, 2021, 15,300 stock options of Quebecor Media were exercised for a cash consideration of $1.0 million.

Deferred share unit plan

The deferred share unit ("DSU") is based either on Quebecor Class B Shares or on TVA Group Inc. Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of June 30, 2022, 92,930 DSUs based on Quebecor Class B Shares and 127,464 DSUs based on TVA Group Class B Shares were outstanding under these plans (96,909 and 128,064 respectively as of December 31, 2021)

Stock-based compensation expense

For the three-month period ended June 30, 2022, a reversal of the charge of $0.1 million was recorded related to all stock-based compensation plans (a reversal of the charge of $1.9 million in 2021). For the six-month period ended June 30, 2022, a charge of $2.1 million was recorded related to all stock-based compensation plans ($1.7 million in 2021).

(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

13. ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Translation of investments in foreign associates	Defined benefit plans[2]	Equity investment	Total
Balance as of December 31, 2020	$ 29.6	$ –	$ (163.5)	$ –	$ (133.9)
Other comprehensive income	0.2	–	119.7	–	119.9
Balance as of June 30, 2021	29.8	–	(43.8)	–	(14.0)
Other comprehensive income (loss)	2.9	(17.6)	7.8	1.6	(5.3)
Balance as of December 31, 2021	32.7	(17.6)	(36.0)	1.6	(19.3)
Other comprehensive (loss) income	(12.0)	(5.0)	152.7	(1.1)	134.6
Balance as of June 30, 2022	**$ 20.7**	**$ (22.6)**	**$ 116.7**	**$ 0.5**	**$ 115.3**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7-year period.

2 Re-measurement gains in the consolidated statement of comprehensive income for the three-month and six-month periods ended June 30, 2022 are mainly due to an increase in the discount rate since December 31, 2021, net of a decrease of the fair value of defined pension plan assets.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy, which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk, impacted by the financial and economic environment prevailing at the date of the valuation, in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option-pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

For the three-month and six-month periods ended June 30, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

14. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of June 30, 2022 and December 31, 2021 are as follows:

	June 30, 2022		December 31, 2021	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,603.4)**	**$ (5,977.7)**	$ (6,554.0)	$ (6,660.4)
Convertible debentures[2]	**(149.0)**	**(149.0)**	(139.5)	(139.5)
Derivative financial instruments				
Foreign exchange forward contracts	**2.6**	**2.6**	0.9	0.9
Cross-currency swaps	**403.4**	**403.4**	381.4	381.4

[1] The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

[2] The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

15. COMMITMENTS

On June 17, 2022, Videotron entered into an agreement with Rogers Communications Inc. (“Rogers”) and Shaw Communications Inc. (“Shaw”) to acquire Freedom Mobile Inc. (“Freedom Mobile”) for $2.85 billion on a cash-free and debt-free basis. The agreement, which is conditional on regulatory approval, provides for the acquisition of the Freedom Mobile brand’s entire wireless and Internet customer base, as well as its owned infrastructure, spectrum and retail outlets. It also includes a long-term undertaking by Shaw and Rogers to provide Videotron with transport services (including backhaul and backbone) and roaming services. This agreement will support the expansion of the Corporation’s telecommunications services in Ontario and Western Canada. The transaction is conditional, among other things, on clearance under the Competition Act and the approval of Innovation, Science and Economic Development Canada and would close substantially concurrently with closing of the acquisition of Shaw by Rogers. Videotron has secured the committed debt financing required for this transaction.

This is Exhibit 70 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three-month periods ended March 31, 2022 and 2021
(tabular amounts in millions of Canadian dollars, except for per share data and option data)
(unaudited)

Quebecor Inc. ("Quebecor" or the "Corporation") is incorporated under the laws of Québec. The Corporation's head office and registered office is located at 612 rue Saint-Jacques, Montréal, Québec, Canada. Quebecor is a holding corporation with a 100% interest in Quebecor Media Inc. ("Quebecor Media"). Unless the context otherwise requires, Quebecor or the Corporation refers to Quebecor Inc. and its subsidiaries and Quebecor Media refers to Quebecor Media Inc. and its subsidiaries.

The Corporation operates, through its subsidiaries, in the following industry segments: Telecommunications, Media, and Sports and Entertainment. The Telecommunications segment offers Internet access, television distribution, mobile and wireline telephony, business solutions and over-the-top video services in Canada. The operations of the Media segment in Québec include the operation of an over-the-air television network and specialty television services, the operation of soundstage and equipment rental and postproduction services for the film and television industries, the printing, publishing and distribution of daily newspapers, the operation of news and entertainment digital platforms and a music streaming service, the publishing and distribution of magazines, the production and distribution of audiovisual content, and the operation of an out-of-home advertising business. The activities of the Sports and Entertainment segment in Québec encompass the operation and management of the Videotron Centre in Québec City, show production, sporting and cultural event management, the publishing and distribution of books, the distribution and production of music, and the operation of two Quebec Major Junior Hockey League teams.

The Media segment experiences significant seasonality due, among other factors, to seasonal advertising patterns and influences on people's viewing, reading and listening habits. Because the Media segment depends on the sale of advertising for a significant portion of its revenue, operating results are also sensitive to prevailing economic conditions, as they may affect advertising expenditures of corporations. Accordingly, the results of operations for interim periods of the Media segment should not necessarily be considered indicative of full-year results due to the seasonality of certain of its operations.

Since March 2020, the COVID-19 pandemic has had an impact on some of the Corporation's quarterly results, more particularly in the Media and the Sports and Entertainment segments. Given the uncertainty around the future evolution of the pandemic, including any new major waves, all future impacts of the health crisis on the results of operations cannot be determined with certainty.

1. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (IASB), except that they do not include all disclosures required under IFRS for annual consolidated financial statements. In particular, these consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, and, accordingly, they are condensed consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the Corporation's 2021 annual consolidated financial statements, which contain a description of the accounting policies used in the preparation of these condensed consolidated financial statements.

These condensed consolidated financial statements were approved for issue by the Board of Directors of Quebecor on May 11, 2022.

Comparative figures for the previous period have been restated to conform to the presentation adopted for the three-month period ended March 31, 2022.

	$ 7.3	$ 5.8

6. RESTRUCTURING OF OPERATIONS AND OTHER ITEMS

During the first quarter of 2022, a charge of $0.9 million was recorded in connection mainly with cost reduction initiatives in the Corporation's various segments ($3.2 million in 2021). During the first quarter of 2021, an asset impairment charge of $0.8 million and a loss related to other items of $0.5 million were also recorded.

7. RESTRICTED CASH AND DEFERRED SUBSIDIES

On March 22, 2021, Videotron and the Québec government, jointly with the Canadian government, signed agreements to support the achievement of the government's targets for the roll-out of high-speed Internet services in various regions of Québec. Under these agreements, Videotron will extend its high-speed Internet network to connect approximately 37,000 additional households and the government has committed to provide financial assistance in the amount of approximately $258.0 million, which will be fully invested in Videotron's network extension. In accordance with the terms of the agreements, an amount of $216.2 million received in advance from the government in March 2021 was classified as restricted cash (balance of $130.7 million as of March 31, 2022) with a corresponding amount recorded as deferred subsidies on the consolidated balance sheets. During the first quarter of 2022, $31.7 million of these deferred subsidies were recognized as a reduction of additions to property, plant and equipment upon the realization of the required investments ($5.5 million in the comparative quarter of 2021).

8. LONG-TERM DEBT

Components of long-term debt are as follows:

	March 31, 2022	December 31, 2021
Total long-term debt	**$ 6,376.4**	$ 6,554.0
Change in fair value related to hedged interest rate risk	**0.9**	8.3
Financing costs, net of amortization	**(36.1)**	(37.9)
	6,341.2	6,524.4
Less current portion	**(1,139.7)**	(56.5)
	$ 5,201.5	$ 6,467.9

As of March 31, 2022, the carrying value of long-term debt denominated in U.S. dollars, excluding financing costs, was $3,187.3 million ($3,245.9 million as of December 31, 2021) while the net fair value of related hedging derivative instruments was in an asset position of $307.4 million ($381.4 million as of December 31, 2021).

9. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic earnings per share are calculated by dividing net income attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted earnings per share are calculated by taking into account the potentially dilutive effect of stock options of the Corporation on the number of shares outstanding, the potentially dilutive effect of stock options of the Corporation's subsidiaries on net income attributable to shareholders, and the potentially dilutive effect of conversion of convertible debentures issued by the Corporation on net income attributable to shareholders and on the number of shares outstanding.

During the three-month periods ended March 31, 2022 and 2021, there was no adjustment for a dilution effect on the net income attributable to shareholders.

The following table sets the impact of dilution on the weighted average number of shares outstanding:

	Three months ended March 31	
	2022	2021
Weighted average number of shares outstanding (in millions)	**239.2**	246.7
Potentially dilutive effect of stock options of the Corporation (in millions)	**–**	0.2
Weighted average number of diluted shares outstanding (in millions)	**239.2**	246.9

10. CAPITAL STOCK

(a) Authorized capital stock

An unlimited number of Class A Multiple Voting Shares ("Class A Shares") with voting rights of 10 votes per share convertible at any time into Class B Subordinate Voting Shares ("Class B Shares") on a one-for-one basis.

An unlimited number of Class B Shares convertible into Class A Shares on a one-for-one basis, only if a takeover bid for Class A Shares is made to holders of Class A Shares without being made concurrently and under the same terms to holders of Class B Shares, for the sole purpose of allowing the holders of Class B Shares to accept the offer and subject to certain other stated conditions provided in the articles, including the acceptance of the offer by the majority holder.

Holders of Class B Shares are entitled to elect 25% of the Board of Directors of Quebecor. Holders of Class A Shares may elect the other members of the Board of Directors.

(b) Issued and outstanding capital stock

	Class A Shares		**Class B Shares**	
	Number	Amount	Number	Amount
Balance as of December 31, 2021	76,984,034	$ 8.6	162,273,507	$ 956.6
Shares purchased and cancelled	–	–	(890,051)	(5.2)
Balance as of March 31, 2022	**76,984,034**	**$ 8.6**	**161,383,456**	**$ 951.4**

On August 4, 2021, the Corporation filed a normal course issuer bid for a maximum of 1,000,000 Class A Shares representing approximately 1.3% of issued and outstanding Class A Shares, and for a maximum of 6,000,000 Class B Shares representing approximately 3.6% of issued and outstanding Class B Shares as of July 30, 2021. The purchases can be made from August 15, 2021 to August 14, 2022, at prevailing market prices on the open market through the facilities of the Toronto Stock Exchange or other alternative trading systems. All shares purchased under the bid will be cancelled.

On April 27, 2022, the Corporation received approval from the Toronto Stock Exchange to amend its normal course issuer bid in order to increase the maximum number of Class B Shares that may be repurchased to 10,000,000 Class B Shares, representing approximately 6.8% of the Class B Shares public float as of July 30, 2021. No other terms of the normal course issuer bid have been amended.

During the three-month period ended March 31, 2022, the Corporation purchased and cancelled 890,051 Class B Shares for a total cash consideration of $26.0 million (2,649,300 Class B Shares for a total cash consideration of $84.4 million in 2021). The excess of $20.8 million of the purchase price over the carrying value of Class B Shares repurchased was recorded in reduction of retained earnings ($68.8 million in 2021).

On May 11, 2022, the Board of Directors of the Corporation declared a dividend of $0.30 per share on Class A Shares and Class B Shares, or approximately $71.5 million, payable on June 21, 2022, to shareholders of record at the close of business on May 27, 2022.

QUEBECOR INC.

11. STOCK-BASED COMPENSATION PLANS

Stock option plans

The following table provides details of changes to outstanding options in the principal stock-based compensation plans in which management of the Corporation and its subsidiaries participate, for the three-month period ended March 31, 2022:

	Outstanding options	
	Number	Weighted average exercise price
Quebecor		
As of December 31, 2021	2,379,600	$ 30.74
Exercised	(6,666)	26.52
Cancelled	(114,451)	31.09
As of March 31, 2022	**2,258,483**	**$ 30.74**
Vested options as of March 31, 2022	**195,594**	**$ 26.52**
TVA Group Inc.		
As of December 31, 2021 and March 31, 2022	**369,503**	**$ 2.09**
Vested options as of March 31, 2022	**48,832**	**$ 4.56**

During the three-month period ended March 31, 2021, 10,300 stock options of Quebecor Media were exercised for a cash consideration of $0.7 million.

Deferred share unit plan

The deferred share unit ("DSU") is based either on Quebecor Class B Shares or on TVA Group Inc. Class B Non-Voting Shares ("TVA Group Class B Shares"). The DSUs vest over six years and will be redeemed for cash only upon the participant's retirement or termination of employment, as the case may be. DSUs entitle the holders to receive additional units when dividends are paid on Quebecor Class B Shares or TVA Group Class B Shares. As of March 31, 2022 and December 31, 2021, 96,909 DSUs based on Quebecor Class B Shares and 128,064 DSUs based on TVA Group Class B Shares were outstanding under these plans.

Stock-based compensation expense

For the three-month period ended March 31, 2022, a charge of $2.2 million was recorded related to stock-based compensation plans ($3.6 million in 2021).

QUEBECOR INC.

12. ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME ATTRIBUTABLE TO SHAREHOLDERS

	Cash flow hedges[1]	Translation of investments in foreign associates	Defined benefit plans[2]	Equity investment	Total
Balance as of December 31, 2020	$ 29.6	$ –	$ (163.5)	$ –	$ (133.9)
Other comprehensive (loss) income	(0.7)	–	123.3	–	122.6
Balance as of March 31, 2021	28.9	–	(40.2)	–	(11.3)
Other comprehensive income (loss)	3.8	(17.6)	4.2	1.6	(8.0)
Balance as of December 31, 2021	32.7	(17.6)	(36.0)	1.6	(19.3)
Other comprehensive (loss) income	(14.5)	(4.3)	76.0	(0.2)	57.0
Balance as of March 31, 2022	**$ 18.2**	**$ (21.9)**	**$ 40.0**	**$ 1.4**	**$ 37.7**

1 No significant amount is expected to be reclassified in income over the next 12 months in connection with derivatives designated as cash flow hedges. The balance is expected to reverse over a 7 1/4-year period.

2 The re-measurement gain in the consolidated statement of comprehensive income for the three-month period ended March 31, 2022 is mainly due to an increase in the discount rate since December 31, 2021.

13. FAIR VALUE OF FINANCIAL INSTRUMENTS

In accordance with IFRS 13, *Fair Value Measurement*, the Corporation considers the following fair value hierarchy, which reflects the significance of the inputs used in measuring its financial instruments:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs that are not based on observable market data (unobservable inputs).

The fair value of long-term debt and convertible debentures is estimated based on quoted market prices when available or on valuation models using Level 1 and Level 2 inputs. When the Corporation uses valuation models, the fair value is estimated using discounted cash flows using year-end market yields or the market value of similar instruments with the same maturity.

The fair value of derivative financial instruments recognized on the consolidated balance sheets is estimated as per the Corporation's valuation models. These models project future cash flows and discount the future amounts to a present value using the contractual terms of the derivative financial instrument and factors observable in external market data, such as period-end swap rates and foreign exchange rates (Level 2 inputs). An adjustment is also included to reflect non-performance risk, impacted by the financial and economic environment prevailing at the date of the valuation, in the recognized measure of the fair value of the derivative financial instruments by applying a credit default premium, estimated using a combination of observable and unobservable inputs in the market (Level 3 inputs), to the net exposure of the counterparty or the Corporation. Derivative financial instruments are classified as Level 2.

The fair value of embedded derivatives related to convertible debentures is determined by option-pricing models using Level 2 market inputs, including volatility, discount factors, and the underlying instrument's implicit interest rate and credit premium.

QUEBECOR INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

13. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

The carrying value and fair value of long-term debt, convertible debentures and derivative financial instruments as of March 31, 2022 and December 31, 2021 are as follows:

	March 31, 2022		December 31, 2021	
Asset (liability)	**Carrying value**	**Fair value**	Carrying value	Fair value
Long-term debt[1]	**$ (6,376.4)**	**$ (6,198.5)**	$ (6,554.0)	$ (6,660.4)
Convertible debentures[2]	**(146.9)**	**(146.9)**	(139.5)	(139.5)
Derivative financial instruments				
Foreign exchange forward contracts	**(2.0)**	**(2.0)**	0.9	0.9
Cross-currency swaps	**307.4**	**307.4**	381.4	381.4

1 The carrying value of long-term debt excludes changes in the fair value of long-term debt related to hedged interest rate risk and financing costs.

2 The carrying value and fair value of convertible debentures consist of the principal amount and the value of the conversion features related to the floor and ceiling prices, recognized as embedded derivatives.

O.Reg431/20, Administering Oath or Declaration Remotely.

BARCLAYS

Equity Research
5 April 2016

Shaw Communications Inc.

Story improves over time

Wind strengthens SJR's long-term growth prospects: We are reinstating our rating of SJR at Equal Weight with a $26 price target following the completion of the Corus and Shaw Media transactions. We believe the sale of Media to Corus and the acquisition of Wind Mobile makes strong strategic sense and strengthens SJR's long-term growth prospects. In the near term, however, years of investments are required to drive growth at Wind, which on top of an already long list of investment priorities (i.e., ViaWest, Docsis 3.1, IPTV) will constrain SJR's ability to resume dividend growth for the foreseeable future with FCF payout now in excess of 100%. As such, we prefer to wait until: 1) we gain greater visibility to Wind's ability to accelerate its growth momentum; and 2) see a clearer path for SJR to return to dividend growth, before turning more positive on the name.

Years of significant investments required to turn Wind into a strong growth story: While Wind has already invested over $1.5bn under previous owners, we believe SJR must still commit significant capital over the coming years in order for Wind to achieve the same level of growth that QBR is enjoying in Quebec. By comparison, QBR, which has roughly 1/2 the population coverage as Wind, has invested $1.9bn in its wireless business alone (excluding $349m invested in spectrum outside Quebec). On top of the $250m management has designated for upgrading the network to LTE, SJR must also: 1) acquire low-band spectrum to improve coverage (i.e., buy 700MHz from Videotron and participate in 600MHz auction in 2018); 2) increase its retail distribution; and 3) build the Wind brand. It is also important to note that the previous owners of Wind focused their investment disproportionately in Ontario, which is a market that is less relevant to SJR's strategy. As such, SJR has acquired a much more nascent network in Western Canada than Wind may appear at the consolidated level, requiring substantial catch-up investment ahead versus the Ontario footprint. Meanwhile, a strengthened Mobilicity operating on RCI's HSPA network now appears to be positioned to regain some market share from Wind. However, relative to QBR, Wind does benefit significantly from its exposure to much higher ARPU markets in Western Canada. Nonetheless, we are cautious in assuming that Wind will quickly turn into the wireless growth story that QBR has become.

Monetizing Wind's ON business would help ease FCF pressures: SJR has a few options to help alleviate its capital allocation concerns. 1) We believe there is potential for a win-win arrangement between SJR and CCA on wireless where SJR could potentially monetize Wind's ON business (e.g. offer CCA low wholesale rates in return for partially funding of Wind's capex). 2) Sell its share holdings in Corus (~$800m) once restrictions are removed (1/3 coming off restriction every 12, 18 and 24 months). 3) Sale of ViaWest given it has few synergies with SJR's core cable business. 4) Sale of real estate assets.

Investment Thesis

We believe the sale of Shaw Media to Corus and the acquisition of Wind Mobile makes strong strategic sense and strengthens Shaw's long-term growth prospects. While the Media business is facing structural pressures (i.e., change in video consumption habits), Wind's growth profile is not only stronger (~40% revenue growth in 2015) but will also strengthen Shaw's core cable business over time (i.e., quad-play bundling). However, years of investments are required to drive continued growth at Wind, which on top of an already long list of investment priorities (i.e., ViaWest, Docsis 3.1, IPTV) will constrain Shaw's ability to resume dividend growth for the foreseeable future with FCF payout in excess of 100%. As such, we are reinstating our rating of Shaw at Equal Weight with a $26 price target. We prefer to wait until: 1) we gain greater visibility to Wind's ability to accelerate its growth momentum; and 2) see a clearer path for Shaw to return to dividend growth, before recommending the stock.

Our $26 price target is based on 7.5x our consumer EBITDA, 8.0x our Business network EBITDA, 11.0x our ViaWest EBITDA, and 7.0x our Wind Mobile EBITDA, using our F2017 estimates.

Thoughts Heading into F'Q2 results

SJR will release F'Q2 results on April 14, 2016, and the conference call will take place at 3:30pm ET (dial-in: 1-800-319-4610).

We estimate FQ'2 revenue of $1,157m (vs. consensus $1,160m), EBITDA of $512m (vs. consensus $514m), and EPS of $0.34 (vs. consensus $0.35). We note that our and consensus estimates exclude the Media business. Here are our thoughts heading into the quarter.

Years of significant investments required to turn Wind into a strong growth story

While Wind has already invested over $1,500m (in spectrum, capex and operating losses) under previous owners, we believe Shaw must still commit significant capital over the coming years in order for Wind to achieve the same level of growth that Videotron is enjoying in Quebec. By comparison, Videotron, which has roughly 1/2 the population coverage as Wind, has invested $1,874m in its Quebec-based wireless business alone (excluding $349m invested in spectrum outside Quebec). In addition to the $250m management has designated for upgrading the network to LTE, Shaw must also: 1) acquire low-band spectrum to improve coverage (i.e., buy 700MHz from Videotron and participate in 600MHz auction in 2018); 2) increase its retail distribution (because the buying process for wireless is very different vs. cable); and 3) build the Wind brand through marketing (we believe it will take a few years yet for the wireless service to improve enough to deserve the Shaw brand).

It is also important to note that the previous owners of Wind focused their investment disproportionately in Ontario (75% subs and 73% of its retail distribution are in Ontario), which is a market that is less relevant to Shaw's strategy. As such, Shaw has acquired a much more nascent wireless business in Western Canada than Wind may appear at the consolidated level, requiring a lot of catch-up investment ahead versus the Ontario footprint. Meanwhile, a strengthened Mobilicity operating on Rogers' HSPA network now appears to be positioned to regain some market share from Wind. However, relative to Videotron, Wind does benefit significantly from its exposure to much higher ARPU markets in Western Canada. Nonetheless, we are cautious in assuming that Wind will quickly turn into the growth story that Videotron has become.

Options to optimize capital allocation

With FCF under pressure over the next few years, we believe Shaw has a number of levers it can pull to address capital allocation concerns. We believe there is potential for a win-win arrangement between Shaw and Cogeco on wireless. With the Ontario clearly a less important market for Shaw, we believe Shaw could look to partner with Cogeco to jointly-run Wind's Ontario business (splitting the investment bill), offering Cogeco access to the Wind network at low commercial rates in return for partially funding Wind's capex. Such an arrangement would help Shaw lighten its Wind investment burden and enable Cogeco to offer wireless services which complement its fixedline footprint.

Shaw could also look to monetize its real estate holdings (net book value of land and buildings is $418m) as well as its holdings in Corus (~$800m) over time. While Shaw sees upside in its ownership of Corus shares and is restricted from selling for 12 months (with 1/3 coming off restriction at 12, 18, and 24 months post-closing), we expect the company would consider opportunistically selling shares to address capital needs (e.g., 600 Mhz spectrum auction). When the time is right, we believe the sale of ViaWest could also be on the table given it has few synergies with Shaw's core distribution business[1].

Cable faces expanding fibre competition

While we've seen some reduction in the length of promotional offers (6 months from 12 months), the competitive environment remains intense and is unlikely to ease as Telus continues to invest close to 30% of its fixed line revenue to expand its fibre footprint from tier 2 markets in to core markets. For example, Telus has outlined plans to cover the cities of Vancouver and Edmonton with fibre over the next 5-6 years. On top of competition, we believe Shaw could face some ARPU pressures from the introduction of the skinny basic on March 1, and a la carte in December. For Q2 we estimate flat cable revenue growth of 2.2% and EBITDA growth of 1.8% with cable TV net adds of -24k, DTH net adds of -8k, internet net adds of +5k, telephony net adds of -14k.

Price (04-Apr-2016)	**CAD 25.01**
Price Target	**CAD 26.00**

Why Equal Weight? The sale of Media and the acquisition of Wind Mobile makes strong strategic sense and strengthens SJR's long-term growth prospects. In the near term however, years of investments are required to drive growth at Wind, which on top of an already long list of investment priorities will constrain SJR's ability to grow the dividend for the foreseeable future.

Upside case — **CAD 28.00**

The Shaw family is increasingly considering a sale of the company, while the pressures on the cable business begin to moderate as Telus' penetration matures. Our upside case is based on an 8.0x multiple on our 2017 upside EBITDA.

Downside case — **CAD 22.00**

The competitive environment intensifies once again as Telus tries to drive greater TV and Internet penetration, pressuring Shaw's cable business. Our downside case is based on 7.0x our 2017 downside EBITDA.

Valuation Methodology and Risks

Canadian Telecommunications, Media, and Technology

Shaw Communications Inc. (SJR/B CN / SJR-B.TO)

Valuation Methodology: Our price target is based on 7.5x our Consumer EBITDA, 8.0x our Business Network EBITDA, 11x our ViaWest EBITDA, and 7.0x our Wind Mobile EBITDA, using our F`2017 estimates, and converted using a spot FX rate of 1.30 USD/CAD.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Upside risk: A maturing competitive environment reduces pricing and subscriber pressure on Shaw's Cable business, while regulatory action against the wireless industry further improves the economics for wireless new entrants.

Downside risk: Shaw's Cable business faces intensified competition from Telus' fibre footprint expansion.

Shaw Communications Inc. (SJR)

Valuation Methodology: Our price target is based on 7.5x our Consumer EBITDA, 8.0x our Business Network EBITDA, 11x our ViaWest EBITDA, and 7.0x our Wind Mobile EBITDA, using our F`2017 estimates.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Upside risk: A maturing competitive environment reduces pricing and subscriber pressure on Shaw's Cable business, while regulatory action against the wireless industry further improves the economics for wireless new entrants.

Risk Disclosure(s)

Master limited partnerships (MLPs) are pass-through entities structured as publicly listed partnerships. For tax purposes, distributions to MLP unit holders may be treated as a return of principal. Investors should consult their own tax advisors before investing in MLP units.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

Canadian Telecommunications, Media, and Technology		
BCE Inc. (BCE)	BCE Inc. (BCE.TO)	CGI Group Inc. (GIB)
CGI Group Inc. (GIB-A.TO)	Cogeco Communications Inc. (CCA.TO)	Cogeco Inc. (CGO.TO)
Constellation Software Inc. (CSU.TO)	Corus Entertainment Inc. (CJR-B.TO)	Descartes Systems Group (DSG.TO)
Descartes Systems Group (DSGX)	Manitoba Telecom Services Inc. (MBT.TO)	Open Text Corp. (OTC.TO)

Rogers Communications Inc. (RCI-B.TO)	Shaw Communications Inc. (SJR)	Shaw Communications Inc. (SJR-B.TO)
Telus Corp. (T.TO)	Telus Corp. (TU)	

Distribution of Ratings:

Barclays Equity Research has 1873 companies under coverage.

41% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 61% of companies with this rating are investment banking clients of the Firm.

IMPORTANT DISCLOSURES CONTINUED

40% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 51% of companies with this rating are investment banking clients of the Firm.

15% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 43% of companies with this rating are investment banking clients of the Firm.

Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

Top Picks:

Barclays Equity Research's "Top Picks" represent the single best alpha-generating investment idea within each industry (as defined by the relevant "industry coverage universe"), taken from among the Overweight-rated stocks within that industry. Barclays Equity Research publishes "Top Picks" reports every quarter and analysts may also publish intra-quarter changes to their Top Picks, as necessary. While analysts may highlight other Overweight-rated stocks in their published research in addition to their Top Pick, there can only be one "Top Pick" for each industry. To view the current list of Top Picks, go to the Top Picks page on Barclays Live (https://live.barcap.com/go/keyword/TopPicks).

To see a list of companies that comprise a particular industry coverage universe, please go to http://publicresearch.barclays.com.

Sector: Telecommunications & Wireless

July 15, 2016

Shaw Communications Inc.

Competitive Position Should Strengthen Following a Transition Year in F2017

Our view: Q3/16 results were largely in line with our expectations. We view F2017 as a transition year of heavy investments in both wireless and wireline, both of which should strengthen Shaw's competitive position in F2018 and beyond.

Key points:

- **Look for a more timely entry point.** We believe the company's entry into wireless and divestiture of Shaw Media has significantly improved the quality of the revenue mix and added a major boost to revenue and EBITDA growth. Despite our more positive longer-term view and a reasonable valuation (FTM EV/EBITDA of 7.7x versus 7.8x for large cap peers), we would look for a more timely entry point pending: (i) greater visibility around wireless capex, including spectrum; (ii) renewed dividend growth post LTE spend; and (iii) easing Alberta and competitive headwinds.
- **Focus shifts to F2018 capex profile with updated F2016/F2017 guidance.** Management expects F2016 EBITDA growth to be "flat to low-single digit" on a consolidated basis given the new asset mix. Updated F2016 capex guidance of $1.2B compared to our previous estimate of $1.1B with the uptick reflecting incremental wireline capex to support new offerings in what remains a competitively intense environment. F2017 capex guidance is $1.3B, which is slightly higher than our previous $1.2B estimate and assumes the completion of the LTE upgrade and full X1 deployment and DOCSIS 3.1/1 Gbps rollout across the footprint. Given this extensive technology roadmap in F2017, management indicated that capex in F2018 should decline YoY. Our forecast factors in annual capex of $1.3B for the F2018E-F2020E period implying a decrease in capex intensity from 26% in F2017E to 22% by F2020E.
- **Still early days for wireless.** Wireless revenue and EBITDA in Q3/16 was $132MM and $29MM, respectively, versus our estimates of $132MM and $20MM with EBITDA margins of 22.0% exceeding our estimate of 15.0%. Other key metrics: (i) net additions were +23k, slightly below our estimate of +33k; (ii) wireless ARPU of $36.30 was up +3.6% YoY and was largely in line with our $36.87 estimate; and (iii) postpaid subscribers represent 64% of the base. Management sees “moderate growth” in wireless until the LTE upgrade is completed by the end of F2017, and continues to target ARPU on gross additions in the $40s.
- **Some wireline RGU improvement should emerge in F2017.** Excluding the non-recurring -5k impact from Fort McMurray and a -2k reclassification, Consumer wireline RGUs of -40k were in line with our -37k estimate. Looking into F2017, we expect the wireline RGU trajectory to gradually improve driven by: (i) full X1 deployment and DOCSIS 3.1/1Gbps rollout; (ii) a stabilization of economic headwinds in Alberta; and (iii) new promotional offerings; offset by (iv) rising substitution; and (v) FTTH expansion.

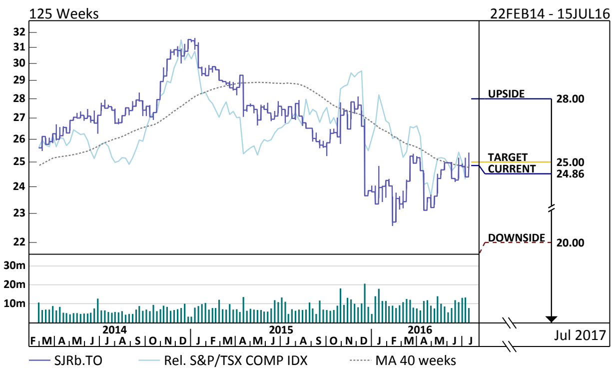
RBC Capital Markets

Target/Upside/Downside Scenarios

Exhibit 1: Shaw Communications Inc.



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Target price/base case

Our one-year price target of $25.00 and Sector Perform rating for Shaw is based on the average of three approaches: (1) applying a 14.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/ EBITDA multiples of 6.5x, 8.0x, 9.0x and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest and wireless, respectively; and (3) discounted FCF through F2020E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment.

Upside scenario

Our upside scenario translates to a $28 value. This scenario assumes slightly greater RGU growth, more robust cable ARPU growth, better than expected wireless ARPU and subscriber growth, and a faster re-acceleration in Business Network Services and ViaWest revenue growth.

Downside scenario

Our downside scenario translates to a $20 value. This scenario assumes greater deterioration in the RGU base combined with modest cable ARPU growth, a prolonged wireless drag on FCF and no re-acceleration in Business Network Services and ViaWest revenue growth.

Investment summary

Strategically, we believe the company's entry into wireless and divestiture of Shaw Media has significantly improved the quality of the revenue mix and added a major boost to the revenue and EBITDA growth profile of the stock. Despite our more positive long-term view and now a more attractive entry point (FTM EV/EBITDA of 7.7x versus an average of 7.8x for large cap peers), we would look for a more timely entry point pending: (i) greater visibility around wireless capex requirements, including spectrum outlays (we assume some form of 600 MHz set aside for smaller wireless operators); (ii) renewed dividend growth post LTE spend; and (iii) easing Alberta and competitive headwinds.

Potential catalysts for the stock:

- Easing of IPTV market share gains resulting in fewer cable subscriber losses
- Better than expected X1 traction
- An eventual easing of wireless capex intensity
- Incremental WiFi, Internet, and business market monetization longer-term

Potential risks for the stock:

- Greater than expected wireless capex and/or the inability to execute on wireless
- Greater-than-expected market share gains from the rollout of TELUS Optik TV and Internet
- The inability to realize additional annual cost savings to maintain cable margins
- Greater-than-expected telephony and television substitution
- The emergence of irrational pricing in the residential telephony, television, and/or Internet markets

Drew McReynolds, CFA, CA (416) 842-3805; drew.mcreynolds@rbccm.com

What Is New / What Has Changed

- **Focus shifts to F2018 capex profile following updated F2016 guidance and the provision of F2017 capex guidance.** Management expects F2016 EBITDA growth to be "flat to low-single digit" on a consolidated basis given the new asset mix (i.e., including wireless for two quarters and excluding Shaw Media), which compares to our forecast of +4.4%. Updated F2016 capex guidance of $1.2B compared to our previous estimate of $1.1B with the uptick reflecting incremental wireline capex (network investments and CPE) to support new offerings in what remains a competitively intense environment. F2017 capex guidance is $1.3B, which is slightly higher than our previous $1.2B estimate. F2017 capex guidance assumes the completion of the LTE upgrade in the existing wireless footprint, full X1 deployment and full DOCSIS 3.1/1 Gbps rollout across the footprint. Given this extensive technology roadmap in F2017 (and particularly the completion of the LTE upgrade), management indicated that capex in F2018 should decline YoY. Our forecast factors in annual capex of $1.3B for the F2018E-F2020E period implying a decrease in capex intensity from 26% in F2017E to 22% by F2020E.

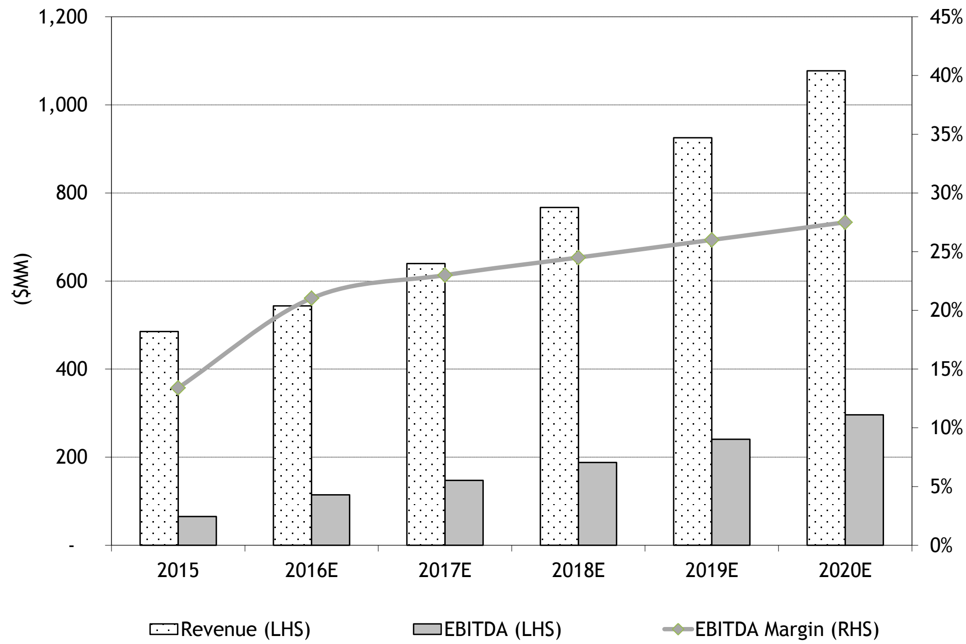
- **Still early days for wireless; Differences in wireless accounting will make financial comparisons to the national incumbents difficult.** Wireless revenue and EBITDA in Q3/16 was $132MM and $29MM, respectively, versus our estimates of $132MM and $20MM with EBITDA margins of 22.0% exceeding our estimate of 15.0%. In terms of other key wireless metrics disclosed: (i) net additions (postpaid and prepaid) were +23k, slightly below our estimate of +33k; (ii) wireless ARPU of $36.30 (calculated on service revenue only) was up +3.6% YoY and was largely in line with our $36.87 estimate; and (iii) postpaid subscribers represent 64% of the wireless subscriber base. Management sees “moderate growth” in wireless until the LTE upgrade is completed by the end of F2017, and continues to target ARPU on gross additions in the $40s.

  Importantly to note, Shaw’s accounting policy for handset subsidies differs from the national incumbents. Shaw records the full cost of the handset in wireless revenue with the handset subsidy recorded as a receivable on the balance sheet to be amortized/netted against wireless revenue over the life of the contract. This accounting policy stands in contrast to BCE, Rogers and TELUS, which record the full cost of the handset in equipment costs and the amount received by the customer in equipment revenue, with the difference in-period being the handset subsidy. Shaw’s rationale for adopting this accounting policy is three-fold: (i) continuity with WIND’s existing accounting policy; (ii) WIND effectively has two contracts – one for service and one for the handset – the structure of which supports the current accounting policy; and (iii) the current accounting policy is more in line with the pending changes in revenue recognition that are forthcoming under IFRS.

  As a result, as Shaw’s gross additions/handset activity ramp-up, wireless revenue growth will reflect the higher volume of higher-priced handsets (boosting revenue growth) while handset subsidies will not become an immediate drag on EBITDA – both of which should translate to higher EBITDA margins versus what would otherwise be reported under the accounting policy of the national incumbents. From a cash flow perspective, management indicated that wireless “cash EBITDA” in Q3/16 would have been approximately $3MM lower versus the $29MM in wireless EBITDA reported. Management also emphasized that while balancing wireless growth and profitability is an objective, optimizing wireless EBITDA margins in the near-term is not a priority. When the company completes the LTE upgrade and launches the Shaw wireless brand, we would expect EBITDA margins to be temporarily impacted.

  Exhibit 2 provides a summary of our wireless financial forecast.

Exhibit 2: Factoring in steady wireless revenue and EBITDA growth and margin expansion



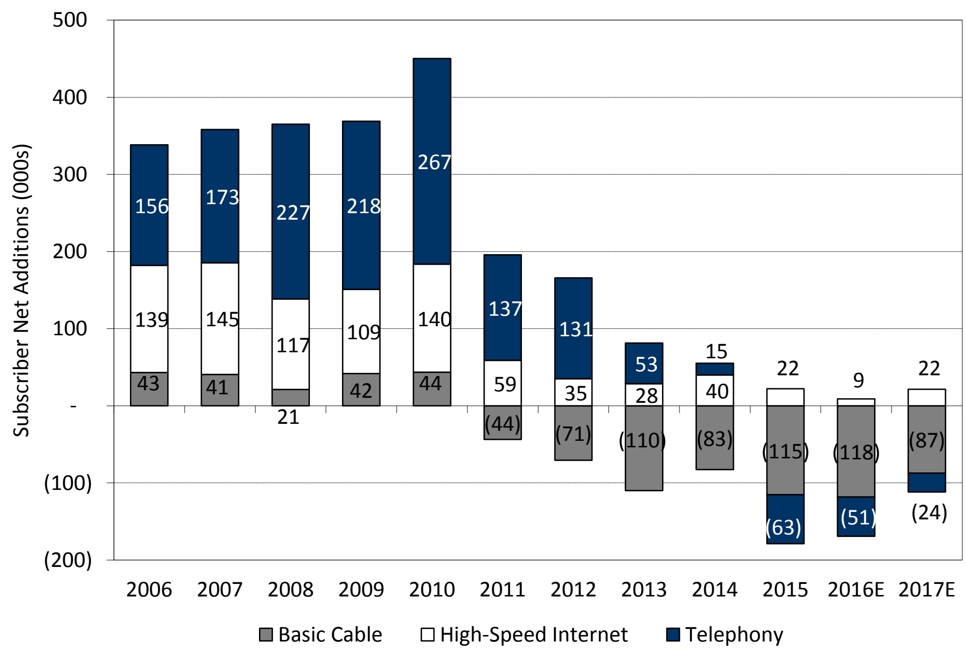
Sources: Company reports, RBC Capital Markets estimates

- **Wireline RGU growth still facing several headwinds but some improvement should emerge in F2017.** Consumer RGUs of -47k were below our -37k estimate and compare to -46k in Q3/15. Excluding the non-recurring -5k impact from Fort McMurray and -2k that was reclassified from Consumer to Business, RGUs were closer to -40k. While satellite net additions of +4k were better than our -5k estimate, Internet net additions of -9k were well below our +8k estimate and +5k in Q3/15. Management attributed the shortfall mainly to the growing seasonality of single-play university students but also acknowledged an intense competitive environment.

  Looking into F2017, we expect the wireline RGU trajectory to gradually improve driven by: (i) full X1 deployment and DOCSIS 3.1/1Gbps rollout across the entire footprint by the end of F2017; (ii) a potential stabilization, if not easing, of economic headwinds in Alberta; and (iii) new promotional offerings, such as the recent launch of “WideOpen Internet 150” (i.e., 150 Mbps download and 15 Mbps upload under a 12-month promotion for $49.90/month); offset by (iv) rising telephony and television substitution; and (v) FTTH expansion. Excluding the -2k that was reclassified from Consumer to Business, Business RGUs of +2k were largely in line with our +3k estimate and compared to +5k in Q3/15.

  Exhibit 3 shows the trend in subscriber growth for both Consumer and Business Network Services.

Exhibit 3: An improvement in wireline RGUs should emerge in F2017



Note: Subscriber figures include both Consumer and Business

Sources: Company reports, RBC Capital Markets estimates

- **Other notables.** (i) X1-related costs in F2016 are expected to be approximately $75MM comprising 2/3 capex and 1/3 opex, and are expected to remain stable in F2017 but shifting to 1/3 capex and 2/3 opex; (ii) Q3/16 revenues, EBITDA and EBITDA margins for Business Network Services and Business Infrastructure Services (ViaWest) were in line with our expectations; (iii) a $51MM write-down was taken on Shaw's joint venture investment in shomi, taking the book value of the investment to nil; (iv) Shaw's definition of FCF includes the Corus shares issued under the DRIP on the view that Shaw could sell these shares for cash; and (v) management remains committed to an eventual resumption in dividend growth and an investment grade balance sheet, and currently has no plans for any major asset divestitures (i.e., ViaWest, wireless assets in Ontario, Corus shares).

Q3/16 Results Largely In Line with Expectations

Revenues and EBITDA of $1,283MM (+13.0% YoY) and $555MM (+5.3% YoY), respectively, compare to our estimates of $1,291MM and $550MM. Adjusting for a -$3MM temporary negative revenue hit related to Fort McMurray, we view these results as largely in line with our expectations. Consolidated EBITDA margins were 43.3% (-317bps YoY due to the inclusion of wireless) versus our estimate of 42.6%. Please see Exhibit 4 for a detailed summary of Q3/16 results versus our expectations.

Exhibit 4: Summary of Q3/16 Results versus Our Expectations

RBC Capital Markets

No Change to our $25 Price Target

We have made adjustments to our forecast mainly to reflect: (i) lower near-term wireless net addition assumptions, offset by higher wireless margins; and (ii) updated capex guidance, which resulted in an approximate $100MM increase in our F2016E and F2017E capex estimates. Our F2016E and F2017E EBITDA estimates increase from $2,116MM and $2,254MM, respectively, to $2,126MM and $2,291MM. Following our estimate revisions, our $25 price target and Sector Perform rating remain unchanged. Exhibit 5 provides a summary of changes to our forecast. Exhibit 6 shows the calculation of our price target. Exhibit 7 shows how Shaw's valuation has historically compared to the average for the peer group. Exhibit 8 provides a summary of comparable valuations. Exhibit 9 provides a summary of key operating and financial metrics for our Canadian telecom coverage. Exhibits 10–13 provide summaries of our financial forecasts and operating metrics for Shaw.

[1]Quebecor Media proportionately consolidated
[2]Estimates are Thomson One consensus. Verizon pro forma consolidation of Verizon Wireless ownership
[3]EV/EBITDA calculated using adjusted EBITDA, which includes pension expense, recurring restructuring costs and capitalized subsidies and excludes non-recurring items
[4]EPS defined as normalized earnings per share after preferred dividends
[5]Free cash flow defined as cash from operations before working capital - capex - preferred dividends

RBCCM acted as a financial advisor to BCE Inc. on a transaction involving Manitoba Telecom Services Inc. that was announced on May 2, 2016. For more details, please refer to Required Conflicts Disclosures.

Notes (i) Effective 2015, Manitoba Telecom wireline revenue growth and EBITDA margins are consistent with new disclosure. Prior to 2015, numbers are for MTS. Manitoba Telecom capex intensity includes wireless; (ii) Cogeco data for Canadian Cable Services only; (iii) Shaw wireline capex comprises Consumer & Business Network Services; (iv) Segmented capex intensity excludes spectrum and is calculated as a percentage of total segmented revenue; and (v) BCE 2014 figures restated to include Bell Aliant in Bell segmented results and operating metrics.

Sources: Company reports, RBC Capital Markets estimates

Valuation

Our one-year price target of $25.00 and Sector Perform rating for Shaw is based on the average of three approaches: (1) applying a 14.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 6.5x, 8.0x, 9.0x and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest and wireless, respectively; and (3) discounted FCF through F2020E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment. Our price target supports a Sector Perform rating.

Price target impediments

Impediments to the shares reaching our one-year price target and rating are: 1) greater than expected wireless capex and/or the inability to execute on wireless; 2) greater-than-expected market share gains from the rollout of TELUS Optik TV and TELUS Optik Internet across the Shaw cable footprint; 3) the inability to realize additional annual cost savings to maintain cable margins; 4) greater-than-expected telephony and television substitution; and 5) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets

Company description

Shaw Communications is one of Canada's largest telecom operators with approximately 1.9 million cable subscribers, 2.0 million Internet subscribers and 1.4 million telephony subscribers in Western Canada, and approximately 850k satellite subscribers. In September 2014, Shaw acquired Denver-based data services provider ViaWest. In December 2015, Shaw announced the proposed acquisition of WIND.

Required disclosures

Non-U.S. analyst disclosure

Drew McReynolds and Jeffrey Lau (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access conflict of interest and other disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1. These disclosures are also available by sending a written request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7 or an email to rbcinsight@rbccm.com.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings
RBC Capital Markets, Equity Research
As of 30-Jun-2016

			Investment Banking Serv./Past 12 Mos.

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on

how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

Sector: Telecommunications & Wireless

January 9, 2017

Shaw Communications Inc.

Upgrading to Outperform

Our view: We are upgrading Shaw from Sector Perform to Outperform and increasing our price target from $26 to $29. For more detail, please see our 2017 outlook and Q4/16 preview report published this morning.

Key points:

- **Upside versus downside trade-off looks compelling in an intensifying competitive environment.** In a maturing Canadian telecom industry, we see the potential for sustained high-single digit NAV growth driven by wireless, as well as improved wireline performance in F2017 and F2018 with X1 and 1 Gbps Internet deployments. This renewed Shaw growth story will not be without its challenges, including execution, managing heavy wireless capex requirements and facing a very strong wireline competitor in TELUS in Western Canada. Nevertheless, in our view, the potential upside in a wireless/wireline bull case scenario (i.e., wireless and X1 traction, a 600 MHz set-aside) handily outweighs the downside in a bear case scenario (i.e., minimal traction, no 600 MHz set-aside) and looks compelling relative to large-cap peers. Furthermore, assuming a reasonable degree of execution on wireless and X1 deployment in F2017 and F2018, we see little risk to the stock's long-standing premium valuation (FTM EV/EBITDA of 8.2x versus the group average of 7.3x). Lastly, other industry developments that could turn out in Shaw's relative favour include: (i) a stronger and/or earlier than expected recovery in Alberta; (ii) Manitoba wireless assets and/or a "path to entry" into the Manitoba wireless market at a reasonable cost that could result from BCE's proposed acquisition of Manitoba Telecom (alternatively, a higher takeout premium in the stock could emerge should government wireless concentration policy be relaxed); (iii) a more negative than expected regulatory outcome around wireless and wireline wholesale access rates; and (iv) higher than expected proceeds on a potential sale of ViaWest should ViaWest become a source of funds.
- **Increasing price target from $26 to $29.** We have made changes to our forecast mainly to reflect: (i) lower basic cable subscriber losses and higher ARPU growth within Consumer; (ii) higher Internet net additions; and (iii) updated FX assumptions. Following our estimate revisions, a rolling forward the basis of our valuation and an increase in our target multiples (i.e., target EV/EBITDA multiple on Consumer from 6.5x to 7.0x, Business Network Services from 8.0x to 8.5x and our target P/E multiple from 15.0x to 16.0x), our price target increases from $26 to $29. The increase in our target multiples better aligns Shaw with large-cap peers, and in addition reflects: (i) our higher growth expectations due to wireless and X1; and (ii) an improving relative risk profile given Shaw's strengthening competitive position in what is an increasingly competitive intense and maturing Canadian telecom market.
- **For more detail, please see our 2017 outlook and Q4 preview report published this morning.**

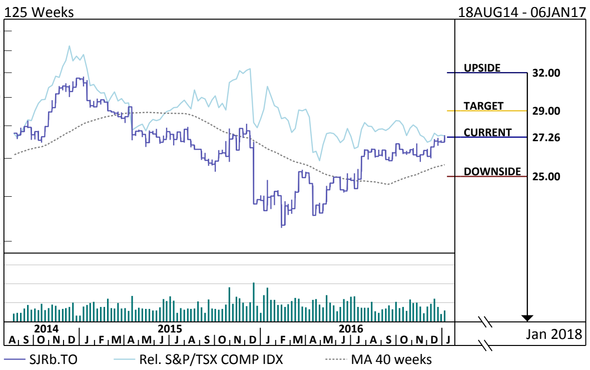
Target/Upside/Downside Scenarios

Exhibit 1: Shaw Communications Inc.



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Target price/base case

Our one-year price target of $29.00 and Outperform rating for Shaw is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.0x, 8.5x, 9.0x and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment.

Upside scenario

Our upside scenario translates to a $32 value. This scenario assumes greater RGU growth, more robust cable ARPU growth, better than expected wireless ARPU and subscriber growth, and a faster re-acceleration in Business Network Services and ViaWest revenue growth.

Downside scenario

Our downside scenario translates to a $25 value. This scenario assumes continued deterioration in the RGU base combined with modest cable ARPU growth, a prolonged wireless drag on FCF and minimal re-acceleration in Business Network Services and ViaWest revenue growth.

Investment summary

In a maturing Canadian telecom industry, we see the potential for sustained high-single digit NAV growth driven by wireless, as well as improved wireline performance in F2017 and F2018 with X1 and 1 Gbps Internet deployments. This renewed Shaw growth story will not be without its challenges, including execution, managing heavy wireless capex requirements and facing a very strong wireline competitor in TELUS in Western Canada. Nevertheless, in our view, the potential upside in a wireless/wireline bull case scenario (i.e., wireless and X1 traction, a 600 MHz set-aside) handily outweighs the downside in a bear case scenario (i.e., minimal traction, no 600 MHz set-aside) and looks compelling relative to large-cap peers. Furthermore, assuming a reasonable degree of execution on wireless and X1 deployment in F2017 and F2018, we see little risk to the stock's long-standing premium valuation (FTM EV/EBITDA of 8.2x versus the group average of 7.3x). Lastly, other industry developments that could turn out in Shaw's relative favour include: (i) a stronger and/or earlier than expected recovery in Alberta; (ii) Manitoba wireless assets and/or a "path to entry" into the Manitoba wireless market at a reasonable cost that could result from BCE's proposed acquisition of Manitoba Telecom (alternatively, a higher takeout premium in the stock could emerge should government wireless concentration policy be relaxed); (iii) a more negative than expected regulatory outcome around wireless and wireline wholesale access rates; and (iv) higher than expected proceeds on a potential sale of ViaWest should ViaWest become a source of funds.

Potential catalysts for the stock:

- Easing of IPTV market share gains resulting in fewer cable subscriber losses
- Better than expected X1 traction
- An eventual easing of wireless capex intensity and steady wireless growth
- Launch of a Shaw branded wireless brand and/or increased premium handset availability
- Incremental WiFi, Internet, and business market monetization longer-term

Potential risks for the stock:

- Greater than expected wireless capex and/or the inability to execute on wireless
- Greater-than-expected market share gains from the rollout of TELUS Optik TV and Internet
- The inability to realize additional annual cost savings to maintain cable margins
- Greater-than-expected telephony and television substitution
- The emergence of irrational pricing in the residential telephony, television, and/or Internet markets

Valuation

Our one-year price target of $29.00 and Outperform rating for Shaw is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.0x, 8.5x, 9.0x and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment. The total return to our price target supports an Outperform rating.

Risks to rating and price target

Impediments to the shares reaching our one-year price target and rating are: 1) greater than expected wireless capex and/or the inability to execute on wireless; 2) greater-than-expected market share gains from the rollout of TELUS Optik TV and TELUS Optik Internet across the Shaw cable footprint; 3) the inability to realize additional annual cost savings to maintain cable margins; 4) greater-than-expected telephony and television substitution; and 5) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets

Company description

Shaw Communications is one of Canada's largest telecom operators with approximately 1.9 million cable subscribers, 2.0 million Internet subscribers and 1.4 million telephony subscribers in Western Canada, and approximately 850k satellite subscribers. In September 2014, Shaw acquired Denver-based data services provider ViaWest. In December 2015, Shaw announced the acquisition of WIND marking its entrance into wireless.

Required disclosures

Non-U.S. analyst disclosure

Drew McReynolds and Jeffrey Lau (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Shaw Communications Inc. in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Shaw Communications Inc..

RBC Dominion Securities Inc. makes a market in the securities of Shaw Communications Inc..

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Shaw Communications Inc..

RBC Capital Markets has provided Shaw Communications Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Shaw Communications Inc. with non-securities services in the past 12 months.

The class B shares of Shaw Communications Inc. are non voting shares.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

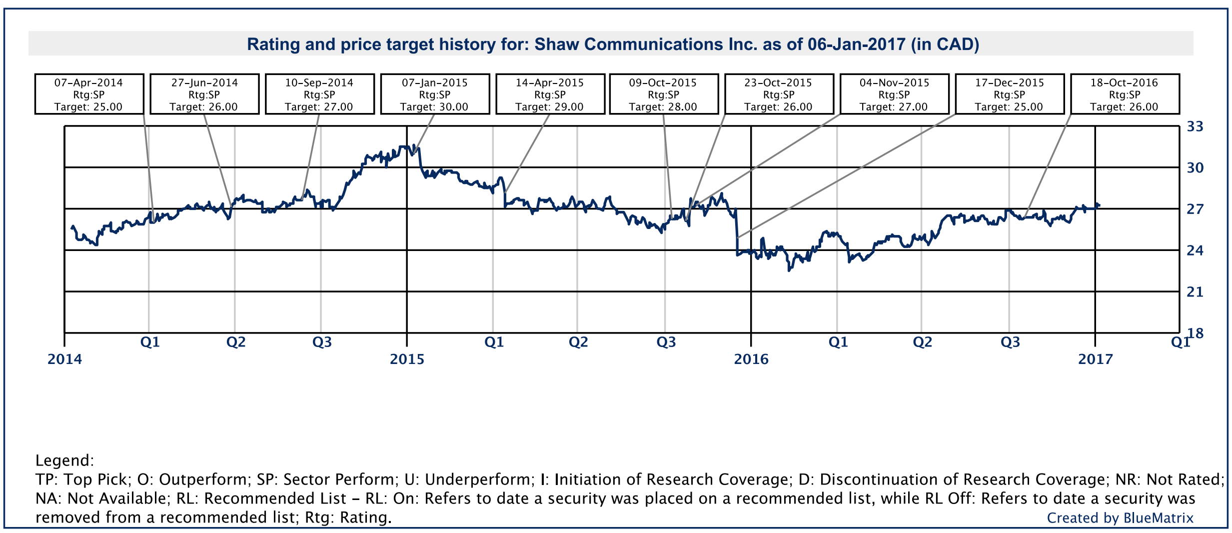
RBC Capital Markets

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2016

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY [Top Pick & Outperform]	834	52.32	279	33.45
HOLD [Sector Perform]	657	41.22	132	20.09
SELL [Underperform]	103	6.46	9	8.74



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: ADR (RL 10), and former lists called the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Midcap 111 (RL 9), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at https://www.rbcinsight.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Shaw Communications Inc.

Valuation

Our one-year price target of $29.00 and Outperform rating for Shaw is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.0x, 8.5x, 9.0x and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment. The total return to our price target supports an Outperform rating.

Risks to rating and price target

Impediments to the shares reaching our one-year price target and rating are: 1) greater than expected wireless capex and/or the inability to execute on wireless; 2) greater-than-expected market share gains from the rollout of TELUS Optik TV and TELUS Optik Internet across the Shaw cable footprint; 3) the inability to realize additional annual cost savings to maintain cable margins; 4) greater-than-expected telephony and television substitution; and 5) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

Sector: Telecommunications & Wireless

June 14, 2017

Shaw Communications Inc.

More Wireless Pieces Come Together

Our view: While the sale of ViaWest and spectrum investments are only modestly NAV accretive, we view the transactions as another significant strategic step forward and one that further improves the relative risk profile of the stock.

Key points:

- **No change to investment thesis.** In a maturing and competitively intense Canadian telecom industry, we see potential for superior NAV growth driven by wireless as well as improved wireline performance with X1 and 1 Gbps Internet deployments, and increased business market penetration. We continue to believe that the potential upside should Shaw gain wireless/wireline traction outweighs the downside, with the trade-off looking compelling relative to large-cap peers.
- **Key transaction details.** Shaw announced the sale of ViaWest to Peak 10 for $2.3B in cash (16.2x our F2017E EBITDA estimate), or estimated net proceeds of $2.2B, with the transaction expected to close by the end of F2017E. Shaw also announced the acquisition of Quebecor's unused 700 MHz and 2500 MHz spectrum for $430MM (expecting a summer close), with an incremental $350MM to be spent to deploy the spectrum mainly in F2018E.
- **Raising price target from $30 to $31.** Incorporating the transactions into our forecast, we increase our price target from $30 to $31. Key financial takeaways: (i) gross proceeds of $2.3B for ViaWest were well ahead of the $1.5B value in our NAV and the $1.3B purchase price, the financial impact of which is largely offset by spectrum costs and higher wireless capex; (ii) we forecast net debt/EBITDA (including 50% of preferred shares) of 1.9x in F2018E and 1.6x in F2019E; (iii) we forecast FCF of $425MM in F2018E (versus F2017 FCF guidance of >$400MM), factoring in higher wireless capex; and (iv) a payout ratio (% of FCF) below 80% pre-DRIP in F2019E.
- **A significant strategic step forward.** The sale of ViaWest is consistent with Shaw's focus on wireless. We view the spectrum acquisition as a significant strategic step forward, reflecting what was lingering uncertainty around the timing and ultimate cost of acquiring low band spectrum. In our view, the deployment of this spectrum through F2018E represents a major piece to Shaw's wireless puzzle and sets the stage for a more compelling wireless offering (i.e., quality of service, handset availability). The timing and value of the transaction suggest to us that the government is supportive of regional wireless players and is consistent with a likely 600 MHz set-aside.
- **Near-term impact on incumbents should be minimal.** Consistent with our RBC Telecom Scenario Report, until Shaw completes its wireless puzzle, we believe its impact on the wireless incumbents should be minimal. Beginning in earnest in 2018, however, we do expect Shaw to take a larger share of the growth within the industry, resulting in a potential step-down in growth for the incumbents.

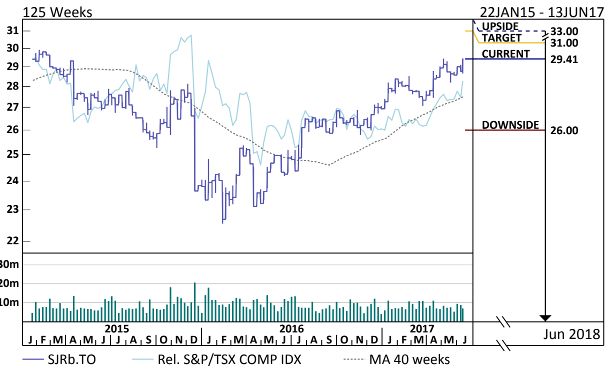
Target/Upside/Downside Scenarios

Exhibit 1: Shaw Communications Inc.



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Target price/base case

Our one-year price target of $31.00 is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.5x, 8.5x, 9.0x, and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest, and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with peers and consistent the company's growth and risk profile and a low interest rate environment.

Upside scenario

Our upside scenario translates to a $33 value. This scenario assumes greater RGU growth, more robust cable ARPU growth, better than expected wireless ARPU and subscriber growth, and a faster re-acceleration in Business Network Services revenue growth.

Downside scenario

Our downside scenario translates to a $26 value. This scenario assumes continued deterioration in the RGU base combined with modest cable ARPU growth, a prolonged wireless drag on FCF and minimal re-acceleration in Business Network Services revenue growth.

Investment summary

In a maturing and competitively intense Canadian telecom industry, we see potential for superior NAV growth driven by wireless as well as improved wireline performance with X1 and 1 Gbps Internet deployments, and increased business market penetration. This renewed Shaw growth story will not be without its challenges, including execution, managing heavy wireless capex requirements, and facing a very strong wireline competitor in TELUS in Western Canada. Nevertheless, we continue to believe that the potential upside should Shaw gain wireless/wireline traction outweighs the downside, with the trade-off looking compelling relative to large-cap peers.

Potential catalysts for the stock

- Easing of IPTV market share gains resulting in fewer cable subscriber losses
- Better than expected X1 traction
- An eventual easing of wireless capex intensity and steady wireless growth
- Launch of a Shaw branded wireless brand and/or increased premium handset availability
- Incremental WiFi, Internet, and business market monetization longer-term

Potential risks for the stock

- Greater than expected wireless capex and/or the inability to execute on wireless
- Greater-than-expected market share gains from the rollout of TELUS Optik TV and Internet
- The inability to realize additional annual cost savings to maintain cable margins
- Greater-than-expected telephony and television substitution
- The emergence of irrational pricing in the residential telephony, television, and/or Internet markets

[1]Quebecor Media proportionately consolidated
[2]Estimates are Thomson One consensus. Verizon pro forma consolidation of Verizon Wireless ownership
[3]EV/EBITDA calculated using adjusted EBITDA, which includes pension expense, recurring restructuring costs and capitalized subsidies and excludes non-recurring items
[4]EPS defined as normalized earnings per share after preferred dividends
[5]Free cash flow defined as cash from operations before working capital - capex - preferred dividends

Notes (i) Effective 2015, Manitoba Telecom wireline revenue growth and EBITDA margins are consistent with new disclosure. Prior to 2015, numbers are for MTS. Manitoba Telecom capex intensity includes wireless; (ii) Cogeco data for Canadian Cable Services only; (iii) Shaw wireline capex comprises Consumer & Business Network Services; (iv) Segmented capex intensity excludes spectrum and is calculated as a percentage of total segmented revenue; (v) BCE 2014 figures restated to include Bell Aliant in Bell segmented results and operating metrics; (vi) BCE 2017E and 2018E include Manitoba Telecom.

Source: Company reports, RBC Capital Markets estimates

Valuation

Our one-year price target of $31.00 is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.5x, 8.5x, 9.0x, and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest, and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment. The total implied return to our price target supports an Outperform rating.

Risks to rating and price target

Risks to our rating and price target include: 1) greater than expected wireless capex and/or the inability to execute on wireless; 2) greater-than-expected market share gains from the rollout of TELUS Optik TV and TELUS Optik Internet across the Shaw cable footprint; 3) the inability to realize additional annual cost savings to maintain cable margins; 4) greater-than-expected telephony and television substitution; and 5) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets.

Company description

Shaw Communications is one of Canada's largest telecom operators with approximately 1.7 million cable subscribers, 1.8 million Internet subscribers and 0.9 million telephony subscribers in Western Canada, and approximately 800k satellite subscribers.

RBC Capital Markets

Required disclosures

Non-U.S. analyst disclosure

Drew McReynolds and Jeffrey Lau (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. RBC Capital Markets, LLC makes a market in the securities of Shaw Communications Inc..

RBC Dominion Securities Inc. makes a market in the securities of Shaw Communications Inc..

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Shaw Communications Inc..

RBC Capital Markets has provided Shaw Communications Inc. with non-securities services in the past 12 months.

The class B shares of Shaw Communications Inc. are non voting shares.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Mar-2017

Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Shaw Communications Inc.

Valuation

Our one-year price target of $31.00 is based on the average of three approaches: (1) applying a 16.0x multiple to our blended two-year forward adjusted EPS estimates; (2) applying target EV/EBITDA multiples of 7.5x, 8.5x, 9.0x, and 7.5x to our EBITDA estimates for Consumer, Business Network Services, ViaWest, and wireless, respectively; and (3) discounted FCF through F2023E factoring in a WACC of 8.0% and terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low interest rate environment. The total implied return to our price target supports an Outperform rating.

Risks to rating and price target

Risks to our rating and price target include: 1) greater than expected wireless capex and/or the inability to execute on wireless; 2) greater-than-expected market share gains from the rollout of TELUS Optik TV and TELUS Optik Internet across the Shaw cable footprint; 3) the inability to realize additional annual cost savings to maintain cable margins; 4) greater-than-expected telephony and television substitution; and 5) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets.

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Shaw Communications

SJR.B-TSX SJR-NYSE	Rating	Price: Oct-26	Target	Total Rtn
	Market Perform	$27.51	$30.00	13%

No Capex Stepdown in Sight

Bottom Line: Q4 results reflect a continuation of recent trends, with subscriber growth trumping margins. With a current broadband speed advantage over the breadth of its plant, the rollout of Comcast's X1 video platform (BlueSky), and a strong balance sheet, Shaw has a clear go-to-market strategy in wireline after years of inconsistency. We believe adding a wireless product will improve the long-term growth profile of the company, but heavy network investments are expected to continue for the foreseeable future. Our target price of $30 is based on ~8.5x F2019E EBITDA, net of equipment subsidies.

Key Points

Q4 Results. Q4/F17 financial results were below expectations on margins, reflecting elevated promotional and marketing activity. Wireline and wireless subscriber metrics were relatively in line.

Outlook. F2018 guidance was in line with expectations. Shaw expects F2018 EBITDA to grow 5% to ~$2.1 billion (same as consensus), capex of ~$1.38 billion (consensus $1.34 billion) and reported FCF of ~$375 million (consensus $358 million). The company expects most of the EBITDA growth to be back-end loaded. Management indicated that capex is expected to remain elevated through F2019E (expectations were for a 13% decline to ~$1.16 billion).

Corporate Development. In July, Shaw closed the acquisition of Quebecor's 700MHz and 2.5GHz spectrum in Ontario, B.C., and Alberta for $430 million. In August, Shaw completed the sale of ViaWest valued at $2.3 billion (~$900 million in net proceeds). In September (post Q4), the company completed the sale of Shaw Tracking for ~US$20 million.

Forecasts. We forecast low to mid-single-digit EBITDA growth through F2019E.

2018E	$0.25	$0.27	$0.29	$0.25

Our Thesis

With X1 deployed, Shaw has a clear go-to-market strategy in wireline after years of inconsistency. We believe adding a wireless product to its business mix will improve the long term growth profile of the company. However, we expect an investment period will be required over the medium term, which will mitigate free cash flow.

Scenarios

Valuation

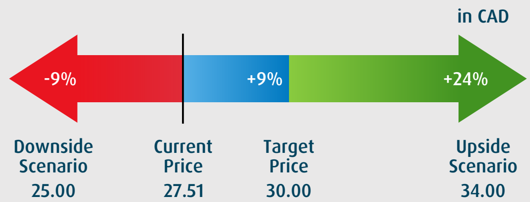
Our target price reflects ~8.5x our F2019E Adjusted EBITDA estimate, net of equipment subsidies.

Upside Scenario $34.00

Assumes accelerated pace of progress in key operating metrics and EBITDA/FCF growth.

Downside Scenario $25.00

Assumes wireless capex overruns and, in turn, pressure on free cash flow and dividend growth.



Key Catalysts

Accelerated pace of progress in wireline growth and operating metrics from X1 deployment; accelerated wireless growth (Freedom Mobile); spectrum/network sharing agreement; and/or a Shaw-branded wireless service signalling a high-quality network.

Company Description

Shaw operates Canada's second-largest cable company, predominantly in Western Canada. It owns Shaw Direct, a national DTH satellite service and it recently acquired Freedom Mobile (formerly WIND), a wireless provider in Ontario, B.C., and Alberta. Shaw is controlled by the Shaw family, with ~80% of the Class A voting shares.

SJR.B-TSX Research

Industry Research

Company Models

Investment Thesis

We rate Shaw Communications (SJR.B-TSX) shares Market Perform. With a current broadband speed advantage over the breadth of its plant, the rollout of Comcast's X1 video platform (BlueSky), and a strong balance sheet, Shaw has a clear go-to-market strategy in wireline after years of inconsistency. We believe adding a wireless product to its business mix will improve the long-term growth profile of the company. However, we expect an investment period will be required over the medium term, which will mitigate free cash flow and potentially dividend growth.

Q4/F17 and F2018 Guidance Highlights

Q4/F17 financial results below expectations on margins. Consolidated revenue increased 3% to $1,244 million (consensus $1,247 million) and adjusted EBITDA decreased 7% to $479 million (consensus $502 million). Continuing ops EPS were $0.30 (same as consensus) and $0.29 last year. All in, reported FCF from continuing ops (including Corus DRIP) was -$2 million versus $33 million last year.

F2018 guidance in line but F2019 capex outlook worse than consensus. For F2018, Shaw expects adjusted EBITDA to grow 5% to ~$2.1 billion (same as consensus), capex of ~$1.38 billion (consensus $1.34 billion), and reported FCF of ~$375 million (consensus $358 million). **Management expects most of the EBITDA growth to be *back-end loaded*.** For F2019, management indicated that capex is expected to be similar to F2018 (consensus expectations were for a 13% decline to ~$1.16 billion). Starting in Q1/F18, the company will combine the Consumer and Business Network Services segments into a Wireline segment.

Consumer segment financial results below expectations. Revenue was flat at $937 million and adjusted EBITDA down 11% to $374 million, reflecting elevated promotional and marketing activity. Consumer subscriber results were in line, with gains in Internet (+22k) and cable (+8k) partly offset by losses in voice (-5k) and DTH (-3k).

Business Network Services segment in line. Revenue increased 7% to $141 million and adjusted EBITDA was up 7% to $72 million. Business subscriber results were mixed, with losses in cable (-2k) and Internet (-2k) offset by a gains in voice (+8k) and DTH (+0.5k).

Wireless financial results in line. Revenue grew 16% to $172 million and adjusted EBITDA increased 14% to $33 million. Operating metrics were mixed, with postpaid net additions of +29k (+41k total; consensus +33k) and ARPU up 1% to $37.66.

ViaWest sale and 700MHz/2.5GHz spectrum acquisition completed. In July 2017, Shaw closed the acquisition of Quebecor's 700MHz and 2.5GHz spectrum in Ontario, B.C., and Alberta for $430 million. In August, Shaw completed the sale of ViaWest to Peak 10 (a GI Partners portfolio company) in a transaction valued at ~$2.3 billion (~$900 million in net proceeds). In September (post Q4), the company completed the sale of Shaw Tracking.

Segment Highlights

Consumer

- Revenue was flat at $937 million, reflecting annual price increases (August 2017) offset by the impact of lower phone and satellite Video RGUs, elevated promotional activity, and video product mix.
- Adjusted EBITDA decreased 11% to $374 million (margins compressed 465bps to 39.9%), reflecting higher promotional discounts and programming costs, which fully offset the impact of the August 2017 rate increases and incremental RGUs. We expect these promotional and marketing costs to remain high in the near term.
- Combined Consumer and Business segment capex was up 20% to $319 million (30% capex intensity vs. 25% last year), reflecting higher equipment costs (BlueSky TV and Internet Wi-Fi modems), spending on network capacity upgrades, DOCSIS 3.1, and satellite digital network upgrade.
- Subscriber results were in line, with gains in Internet (+22k) and cable (+8k) partly offset by losses in voice (-5k) and DTH (-3k). Total RGUs increased by +22k vs. -37k last year, reflecting the launch of BlueSky TV to Shaw's entire cable footprint, the launch of WideOpen Internet 150 (150Mbps down, 15Mbps up, 1TB monthly data cap) for $49.90/month for the first year and $84.90/month for the second year under a two-year contract ($67.40/month blended rate), and lower churn from bundling and value plan offerings.
- Management expects the positive momentum in video subscriber net additions to continue; however, management cautioned that not all future quarters will show positive net adds in video. Q4/F17 marks the second quarter of positive video additions since Q4/F10.
- Shaw has completed the rollout of DOCSIS 3.1 to the majority of its footprint as at F2017. All remaining systems are expected to be running DOCSIS 3.1 ready infrastructure by the end of F2018
- Management expects to roll out the all-IP version of Comcast's X1 platform by the end of calendar 2018.
- We believe Shaw now has a very clear technology roadmap in place, and for the first time in years, a clear and consistent go-to-market strategy for its consumer wireline services.

Outlook

We expect modest growth and margin recovery through F2019E. We expect improving wireline subscriber trends with modest quarter-to-quarter volatility based on competitive promotional activity.

Business Network Services

- Revenue increased 7% to $141 million and adjusted EBITDA was up 7% to $72 million (margins expanded 31bps to 51.1%). Revenue for the core business, excluding satellite services, grew 9%.

- Business subscriber results were mixed, with losses in cable (-2k) and Internet (-2k) offset by a gains in voice (+8k) and DTH (+0.5k).
- Starting in Q1/F18, for financial reporting purposes, Business Network Services financial results will be combined with the 'Consumer' segment results into one division called 'Wireline'. Subscriber metrics will continue to be shown separately.

Outlook

We are modelling mid-single-digit EBITDA growth through F2019E.

Wireless (Freedom Mobile)

- Revenue increased 16% to $172 million and adjusted EBITDA increased 14% to $33 million, reflecting higher subscribers and ARPU.
- Operating metrics were mixed, with postpaid net additions of +29k (+41k total; consensus +33k) and ARPU up 1% to $37.66. Management noted that new subscriber loading is at ARPU levels >$50 due to the recent launch of Freedom's new "Big Gig" data plans.
- Management indicated it expects to spend ~$350 million over the next two years to deploy the 700MHz and 2.5GHz spectrum it acquired from Quebecor within the current operating footprint.
- Management noted that the capex outlook through F2019 does not include any network coverage expansion outside the existing footprint in BC and Alberta.
- Management stated that Freedom has entered into an agreement with Apple to carry the iPhone. Official launch timing details to be disclosed in the future.
- The company announced that it will re-farm some of its AWS-1 spectrum (all 20MHz currently used for its 3G network) for its LTE network (currently deployed on AWS-3 spectrum). By implication, Freedom's LTE network will support the older iPhone models and other LTE handsets.
- The company plans to launch VoLTE (Voice over LTE) by the end of F2018, which will further reduce usage and need for its 3G network.
- On October 19, Freedom launched new "Big Gig" data plans. For more a comparison of these new plans versus the incumbents, please see the Appendix.
- Management clarified its step-by-step approach and key priorities in wireless over the next few years that has included: (1) building an LTE-A data-only network; (2) launching differentiated offerings (i.e., the Big Gig data plans); (3) creating a handset ecosystem with the iPhone, Samsung, and Google Pixel 2; (4) opening up the LTE network to a wide variety of handsets through the AWS-1 spectrum re-farming; (5) deploying the newly acquired 700MHz and 2.5GHz spectrum; (6) launching VoLTE to support voice; and (7) 600MHz spectrum.

Outlook

We are modeling double-digit EBITDA growth through F2019E but we expect wireless will remain in an investment phase over the medium term. We expect quarter-to-quarter volatility in the results due to the relatively smaller base.

Corporate & Balance Sheet

- Net debt (including preferred shares) at quarter-end was ~$4.1 billion with net debt/LTM EBITDA at ~2.0x.
- Shaw announced the nomination of Mike Sievert to its board of directors beginning in January 2018 (AGM). Mike Sievert is currently T-Mobile USA Chief Operating Officer and previously Head of Marketing. It is worth noting that WIND Mobile, prior to being acquired by Shaw, had T-Mobile USA executives on its board (including David Carey).
- As a reminder, Shaw Communications holds a ~39% equity interest in Corus or 80.6 million shares. Lock-up periods for these CJR.B shares began to expire in April 2017 (one-third in April 2017, one-third in October 2017, and the remaining one-third in April 2018). On September 1, 2017, Shaw began to take cash dividends on its position. Shaw participated in the DRIP program from April 1, 2016 (i.e., closing date of Shaw Media acquisition) to August 31, 2017. Annual cash dividends from Corus to SJR.B is $92 million. Management previously stated that is has no intention of selling the Corus shares over the *near term*. The current market value of the Corus shares owned by the company is ~$990 million (which we mark-to-market in our EV calculation).

Forecasts

We forecast low to mid-single-digit EBITDA growth through F2019E reflecting modest gains in Consumer and continued growth in Wireless. We expect elevated dividend payout ratios through this period supported by a solid balance sheet.

Shaw Communications Summary Model (in $mms)	2014	2015	2016	2017	2018E	2019E

Conclusion and Investment Recommendation

Q4 results reflect a continuation of recent trends, with subscriber growth trumping margins. With a current broadband speed advantage over the breadth of its plant, the rollout of Comcast's X1 video platform (BlueSky), and a strong balance sheet, Shaw has a clear go-to-market strategy in wireline after years of inconsistency. We believe adding a wireless product to its business mix will improve the long-term growth profile of the company but heavy network investments are expected to continue for the foreseeable future. Our target price of $30 is based on ~8.5x F2019E EBITDA, net of equipment subsidies.

Appendix

For illustrative purposes, the chart below simplifies wireless plans for Freedom vs. the incumbents and their flanker brands.

In short, we would note that making direct pricing comparisons between Freedom and the incumbents does not take into account obvious material differences in network quality, coverage, handset availability, retail distribution, brand equity, and other factors.

BOYD Plans (ON/AB/BC)	**Rogers**	**Bell**	**TELUS**	**Fido**	**Virgin**	**Koodo**	**Chatr**	**Public Mobile**	**Freedom**
1GB	$80	$80	$80	$65	$65	$65			
2GB	$85	$85	$85				$40	$45	
3GB								$55	
4GB	$100	$100	$100	$85	$85	$85	$45		**$50**
5GB								$60	
6GB	$110	$110	$110				$50		**$60**
9GB									**$75**
10GB	$145	$125	$130	$115	$115	$115			
15GB		$155	$155						**$100**
20GB	$180		$175						
40GB	$290		$275						
80GB	$400		$405						
Overage	$0.07/MB	$0.07/MB	$0.05/MB to 1000MB, $0.10/MB thereafter	$0.07/MB	Varies by plan	$0.07/MB	No overage, speeds throttled	No overage, data cut off	No overage, speeds throttled

Notes:

- All plan pricing above includes unlimited Canada wide calling + texting.
- Chatr pricing is for 3G Data Plans; 1GB plan includes bonus of 1GB/month, 2GB and 4GB plan include bonus of 2GB/month.
- Public Mobile pricing based on current promotions; 3GB plan based on length of 90-days; 4G LTE plans only.
- Freedom Mobile pricing on a 24-month plan, 4GB includes 1GB Bonus, 6GB includes 4GB Bonus, 9GB includes 3GB Bonus, and 15GB includes 5GB Bonus. The bonus data offer is available for a limited time and is subject to change or cancellation without notice

IMPORTANT DISCLOSURES

Analyst's Certification

I, Tim Casey, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Company Specific Disclosures

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months from Shaw Communications.

Disclosure 6C: Shaw Communications is a client (or was a client) of BMO Nesbitt Burns Inc., BMO Capital Markets Corp., BMO Capital Markets Limited or an affiliate within the past 12 months: C) Non-Securities Related Services.

Disclosure 8A: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of Shaw Communications.

Disclosure 8C: BMO Capital Markets or an affiliate has a financial interest in 0.5% or more in the issued share capital of Shaw Communications.

Disclosure 8E: BMO Capital Markets trades or may trade as principal in the debt securities of Shaw Communications.

Methodology and Risks to Target Price/Valuation for Shaw Communications (SJR.B-TSX)

Methodology: Our target price reflects ~8.5x our F2019E Adjusted EBITDA estimate, net of equipment subsidies.

Risks: Key risks include (1) increased competition resulting in higher customer churn or pricing pressures, (2) unfavourable regulatory changes, (3) greater technology substitution, and (4) economic slowdown in its operating footprints

CHANGE IN RATING - UPGRADE

Shaw Communications

June 5, 2018
Consumer Discretionary

Stock Rating: **OUTPERFORMER**

Upgrading To Outperformer - Giving Shaw's Wireless Opportunity Its Due

Our Conclusion

As of June 5, we are upgrading Shaw to Outperformer from Neutral. Our price target increases to $30 from $28, implying an expected total return of ~20% in the next 12-18 months. We now expect Shaw shares to outperform its sector peers over the next 12-18 months, and argue for the shares to be bought at current levels.

Implications

With this report, we have reassessed our Shaw thesis, specifically focusing on its material wireless opportunity, and the benefits from bold cost-cutting efforts already underway in the core business.

Valuations in the Canadian cable/telecom space have greatly converged in the past year towards the ~8x forward EBITDA level, reflecting stable competitive markets and operating execution. Our forecasts for the space remain solid; however, our return expectations are somewhat muted for the group.

We now argue, however, that Shaw shares should trade at a premium to our cable/telco coverage names over the next few years. As execution on its wireless opportunity develops further, and these positive growth drivers combine with bold and prudent cost cutting on the wired base, we argue that a premium for its shares should develop over the next 12-18 months, as reflected in our $30 price target.

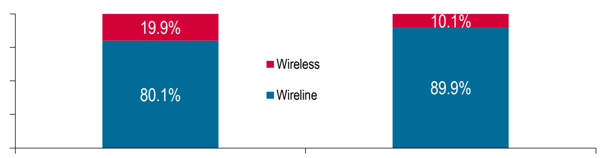
Company Profile

Shaw is a diversified communications company whose core business is providing broadband cable television, high-speed internet, digital telephony, telecommunication services, satellite direct-to-home TV and wireless.

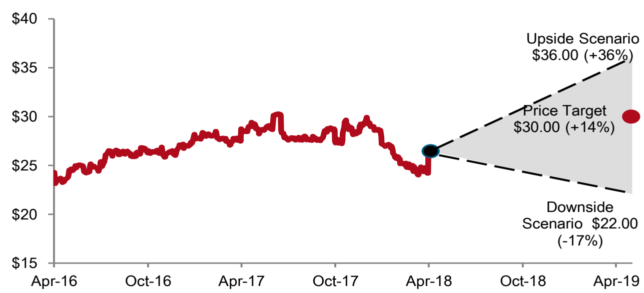
Investment Thesis

Shaw's foray into wirless provides the company with a material runway for growth into the future. Indeed, we now believe that Shaw should be able to double its wireless subscirber base over the next decade, simply be commanding a 15% market share in its wired territories and a 10% share in Ontario (we dub this the 15/10 thesis), which would add to wireless vauations in a material way. While we do not forecast the wireline segment to be a growth story per se, cost cutting efforts at the segment should still lead to positive EBITDA/FCF expectations for the forseeable future. All told, we believe Shaw is positioned to deliver near industry leading consoidated growth looking out over the next 3-to-5 years.

Revenues & EBITDA by Segment (2019E)



Price Performance And Scenario Analysis



Price Target (Base Case) : $30.00

Our base case price target equates to blended multiple of about 8.75x EV/EBITDA. This implies a premium valuation for Shaw relative to peers, which we see as fair given Shaw's material growth opportunity in wireless. Our base case is based on 2019E where we are modelling a ~3% uptick in revenue y/y (mostly on the back of gains in Wireless, both through better loading and ARPU) but a more pronounced ~6% growth in EBITDA as Shaw starts to reap the benefits of its massive cost-cutting initiative.

Upside Scenario: $36.00

Our upside scenario yields a value of $36/share. This is more so a blue-sky scenario that contemplates wireless assets being sold/spun out around 10x EBITDA, and the stub also sold for the same 10x level.

Downside Scenario: $22.00

Our downside scenario yields a value of $22. In this scenario wireless growth would fail to live up to expectations, and this is coupled with further maturity in wireline with margins also taking a step-back as cost-cutting efforts fail to bear fruit. At $22, Shaw would trade at ~7.0x EBITDA, or about 0.5x discount to peers.

Revisiting The Wireless Opportunity At Shaw – Upgrading To Outperformer And $30 Price Target

We have revisited our thesis on Shaw, giving specific attention to its wireless opportunity, both in subscriber execution and in valuation terms. We have also stressed our assumptions for core wireline assets (broadband, video and voice), reflecting the current realities of the sector and Shaw management's bold response.

We conclude that our thesis of late has been under-appreciating the wireless opportunity at Shaw (Freedom), not so much in near-term execution potential, but in ultimate size/scope, and on the implications for valuation. With respect to Shaw's core assets (broadband/video/satellite/voice), we have only tweaked our estimates. However, we do update our overall thoughts on these assets as well.

The end result of our analysis sees us upgrade our rating on Shaw to Outperformer from Neutral. Our price target goes to $30 from $28, suggesting a total return of ~20% in the next 12-18 months, which would put Shaw shares in a leadership position versus the other names in the sector for return opportunity.

We Have Under-appreciated Shaw Wireless Since Its Acquisition

We Were (And Remain) Concerned Over "Naked" Cablecos

A big part of our sector analysis over the past five years has focused on the role of traditional cable/telecom in a gigabit society. At the crux of this analysis was 5G opportunities (both mobile and fixed) and the implications for the last mile. While video remains a core component of the customer bundle, our analysis was squarely on broadband, and the ability to reach residential customers with a minimum of gigabit throughput, and with enough efficiency to argue for more and greater uses/applications to fill this pipe.

The bedrock of broadband network reach in the sector will continue to be a wired last mile, even with 5G advancements arguing for some mobile potential. That said, we remain particularly focused on the fixed 5G trials being undertaken by Verizon and AT&T in a number of U.S. markets, and the disruption potential that this technology could still bring.

From our analysis, we continue to suggest that even though a wired last mile is likely to dominate for quite some time, the disruptive potential of 5G to that conclusion argues for a more defensive stance. As such, our base thesis remains that we are not positive on the strategic prospects for a cableco that lacks a material wireless network within its asset mix. The end-around risks are too great, as is the reduced flexibility in a world where the technology reaching the customer is increasingly blurred and the customer agnostic.

Even With This View, We Were Surprised By Shaw's Wind Purchase, And Did Not Give It Due Credit

Notwithstanding our naked cableco thesis, we had drifted into a mindset that the opportunity for owning a compelling wireless platform had passed for Shaw, given the huge advantage the Big 3 had in network reach, quality and subscriber base. When Shaw acquired Wind in December 2015, we were surprised by the move, and in turn, underappreciated the asset and its potential to address our naked cableco concerns at Shaw. Our forecasts at the time suggested a modest level of subscriber potential, weaker network reach and throughput potential, high capex concerns, and limited valuation potential above the $1.6 billion that Shaw paid for the asset (though we did acknowledge at the time that it was a great price).

While our forecast/tone over the past two years has edged higher, we were simply keeping pace with the market and not reflecting the positives that were being created. It is this bias that we attempted to test in this update on the Shaw story.

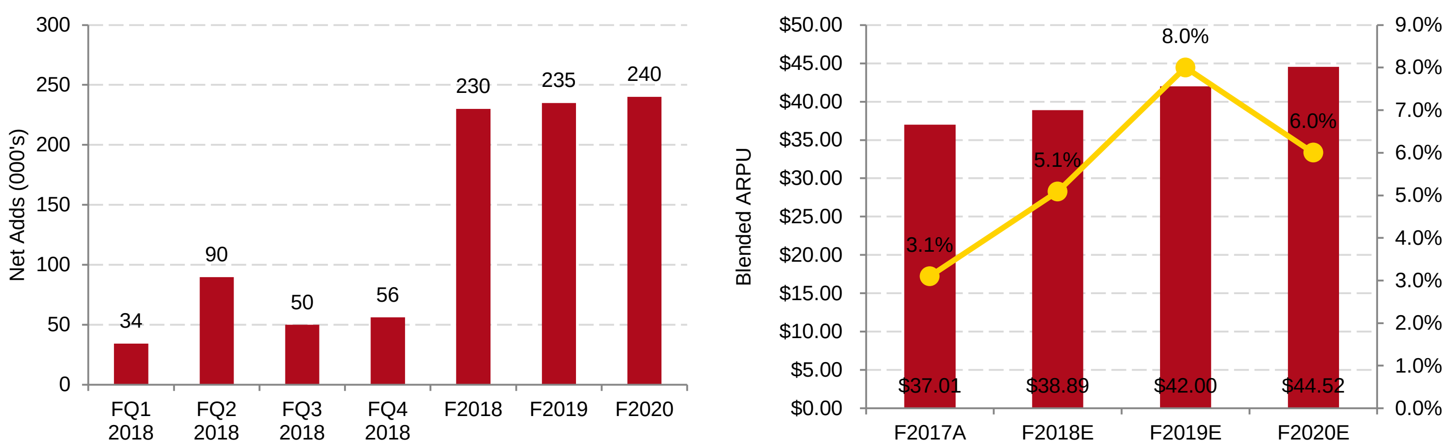
In Summary: A Fresh Look At The Wireless Opportunity Suggests We Have Been Too Myopic In Our Thesis The Past Two Years

We See Materially More Wireless Opportunity At Shaw Versus Our Prior Thesis

Shaw's Near-term Momentum Is Clearly Positive

The near-term strength of the Shaw asset is not a secret at this point. After major investments in network (which continue), and bringing in strong and experienced Wireless leadership in Wireless President Paul McAleese, Shaw rolled into the 2017 Christmas season with great confidence. Given an empty highway of a network, and a huge handset upgrade with the addition of Apple (which we did not think would come this soon), the company rolled out an aggressive "Big Gig" plan to its markets (10 GB for $50/$60) and immediately saw subscriber momentum shift fast. Even with an immediate competitive response from The Big 3, Shaw's Freedom Wireless racked up a massive quarter, adding over 93.5k in postpaid subs, multiples above Street expectations. Freedom's offers continue to resonate in the market, even with continued competitive responses from some of the Big 3, resulting in net add forecasts over the next few quarters (and beyond) in the +40K-50k range (Exhibit 1A). These are excellent subscriber loading totals and estimates. Add in continued growth in ARPU (Exhibit 1B), and the prospect for revenue growth is compelling. EBITDA growth will also begin to benefit as operating leverage takes hold.

Exhibit 1. Freedom Wireless Subscriber Net Adds And ARPU Forecast

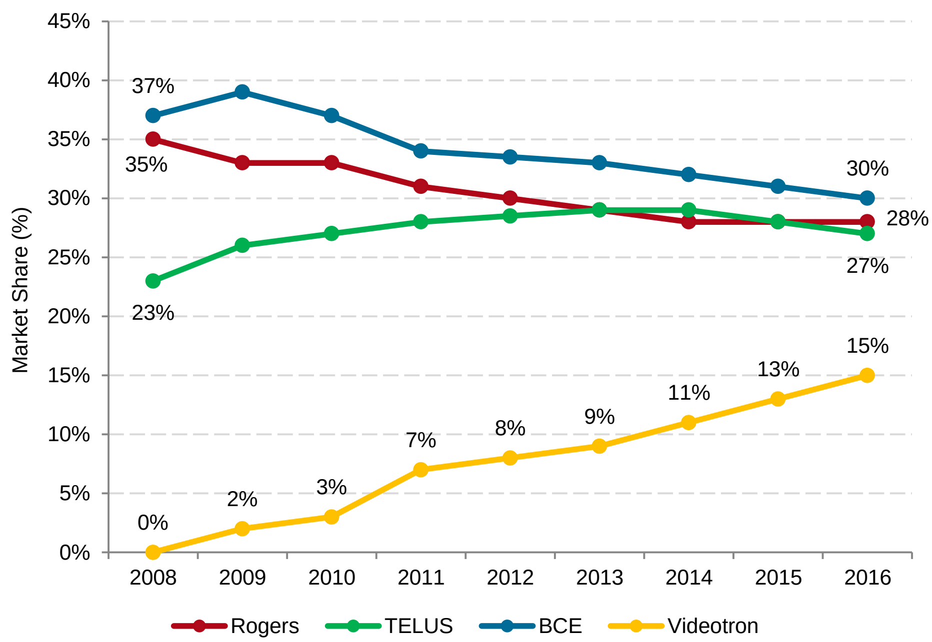


Source: Company reports and CIBC World Markets Inc.

This Is Without Any Bundling Efforts By Shaw

The near-term momentum established by Freedom is material, but consider that the company has yet to touch on one of its larger opportunities: Bundling with its core business, especially broadband. Quebecor's Videotron is a great example of what can eventually come from rolling out a competitive wireless product, with a full range of handsets, AND with incentives for existing wired customers. Videotron has reached a market share of wireless in Quebec of ~16% and growing, with commensurate growth in EBITDA. Granted it was aided in the past few years by a network sharing agreement with Rogers in the province, but the trend line certainly highlights the success of the strategy (Exhibit 2).

Exhibit 2. Quebec Wireless Market Share Evolution



Source: CRTC Communications Monitoring Reports, company reports and CIBC World Markets Inc.

At the moment, Shaw does not appear to have plans to fully bundle its wireless/broadband offerings; however, that is a clear medium-term path and certainly expected by the market eventually. We believe that this augers well for continued wireless subscriber loading at Freedom beyond the NT momentum we spoke of.

What Is Freedom's Ultimate "Natural" Market Share? The 15/10 Opportunity Seems Quite Doable, And Positive

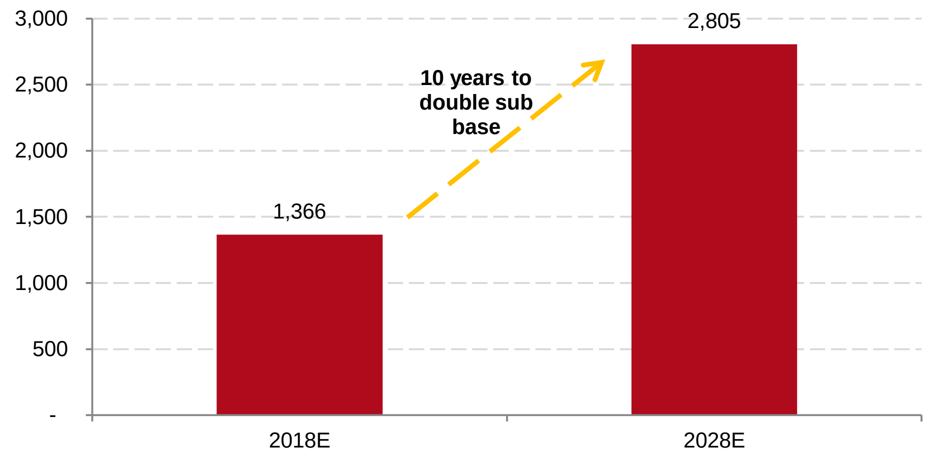
Any analysis of Freedom's potential ultimately comes back to one of "natural" market share, as in where a legitimate 4th national player can ultimately achieve relative to peers, without disrupting competitive equilibrium. The obvious long-term answer is 25% (in a four player analysis), but given the huge base at the Big 3, and their impressive networks and distribution platforms (from which Freedom is essentially blocked out), that math is not reasonable, especially over a 10-year time horizon, which is our modelling time-line for market share moves. In addition, Freedom's network is never going to be as broad as the Big 3, as it makes no sense to overbuild in less populated areas at this point. As such, that 25% hurdle is not a reasonable expectation.

Our thesis instead is focused on what we call the 15/10 opportunity. This would argue that Freedom has a longer-term (10 years) opportunity to get to a 15% wireless market share in provinces where Shaw's wireline assets exist (in line with what Videotron has established over a similar time horizon in its home market, albeit starting from zero). In addition to this 15% "home" share, we also suggest the potential for a 10% share in other non-Shaw markets, which essentially means Ontario for now. Again, not an unreasonable market share number.

This 15/10 thesis would suggest a national market share number of around 9%, based on current subscriber numbers. Obviously, the market is still growing, therefore this 15/10 analysis is not static, but it does give us a target to focus on in our models. The resulting subscriber number in 10 years would be roughly 2.8

million subscribers, versus our 2018E of just under 1.4 million. So a little more than a doubling from current levels. Again, this does not seem unreasonable over that time frame.

Exhibit 3. Freedom Long-Term Wireless Subscriber Projection



Source: Company reports and CIBC World Markets Inc.

While 15/10 Seems To Make Sense, In Reality It Will Be More Like 25/10, Given Shaw's Actual Footprint And Freedom's Target Market

Keep in mind that if we are correct about a 15/10 hypothesis, the reality would in fact be more like a 20/10 situation, if not 25/20, given the fact that Freedom will not be "everywhere." The 15% share we look for in Shaw provinces does not actually reflect that Shaw's wired assets (for bundling) and Freedom's primary focus (populated areas) are in urban and suburban areas within these provinces. If we looked ahead to what Freedom's market share could be in actual Shaw territory and not just the whole province, the number would be more like 20%, if not higher.

So let's stick with our 15/10 thesis, which will also be easy enough to track to assess execution, as opposed to market share in Shaw wired service areas (or only urban/suburban markets in Ontario), for which reliable data remains difficult to obtain.

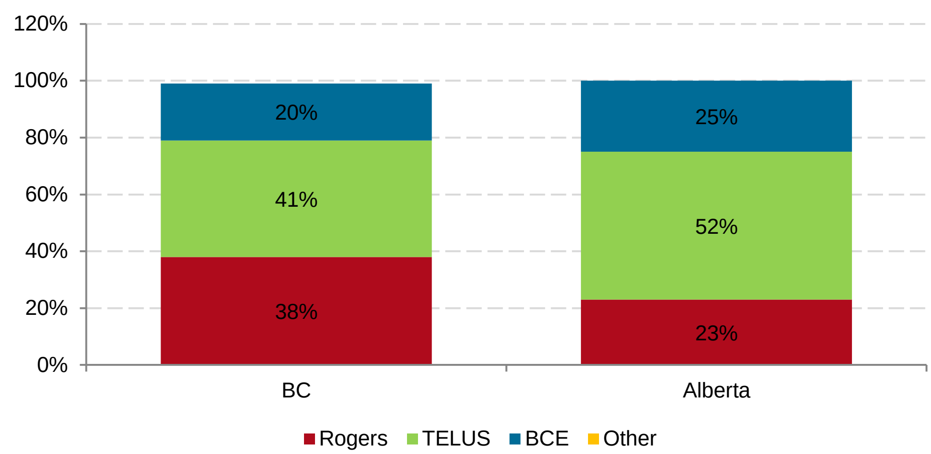
How Might Competitors Pressure These Forecasts?

Our assumptions on competitor response to this potential subscriber growth at Shaw/Freedom are rarely straight forward. Notwithstanding the aggressive matching response seen by, at first Rogers, then BCE and TELUS, in the December/January period, we continue to believe that such aggressive competitive response is transient in nature. We expect to see defensive behavior by all the players, led by Rogers (given they likely have the most to lose), but we do not expect to see a scorched earth pricing strategy similar to what we saw from Rogers in 2008, in response to the original 4th player threat by Wind. Shaw is not going anywhere, and is well capitalized and well run. It does not make sense for the Big 3 to cannibalize the market aggressively in response to Shaw, except for those times where equilibrium has been wildly overshot, as was the case in December. Given this view, we therefore believe that a 15/10 target for Shaw/Freedom would also flow through to gains in ARPU (especially given the low base from which Freedom is building up ARPU, and given that most new Freedom subscribers are taking up higher-value plans like Big Gig at $50/month), adding to revenue potential, and obviously EBITDA.

Another consideration for wireless competition is the in-market response from TELUS once we see some bundling efforts with broadband by Shaw. The plain vanilla conclusion is that such bundling activity will solicit a direct competitive response from TELUS, given its own existing bundling heft in the exact same territory as Shaw. We don't believe it is that straightforward of an analysis. At the margin, yes, the two bundled offers will be competing head-to-head for Western households. However, we continue to see TELUS and Shaw as rational players in this market (they have both seen the ugly outcomes from irrational behavior in the past). In fact, we see Shaw's bundled efforts as focused on its existing wired customer platforms (as opposed to aggressively attracting a TELUS bundled sub). Today, it would be somewhat rare to see a Shaw wired broadband customer with a TELUS wireless subscription. TELUS' bundling efforts over the years would, for the most part, have already enticed that customer to go all TELUS for wired and wireless services. More likely is the scenario where a Shaw wired customer uses either Rogers or Bell for their wireless services. Given this view, the eventual move to more aggressively bundle Freedom with Shaw will more likely draw from the considerable wireless-only share that Rogers and (to a smaller degree) Bell have in Alberta and British Columbia (Exhibit 4).

Therefore, it is not a given that a massive TELUS response to Shaw/Freedom eventual bundling is guaranteed to be problematic. Rogers and BCE could fight on wireless price in those markets, but that also doesn't make sense against a bundled offer from Shaw and TELUS; Quebec has taught us that lesson already.

Exhibit 4. Alberta And British Columbia Wireless Market Share (YE 2016)

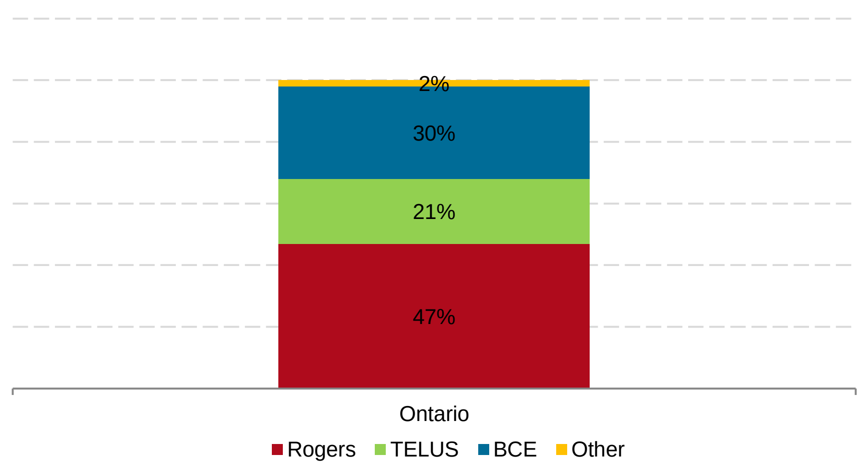


Source: CRTC Communications Monitoring Report, company reports and CIBC World Markets Inc.

What about in Ontario? Will Freedom be able to get to 10% share in Ontario without bundling help, and without seeing a material competitive response from the Big 3, and in particular Rogers and BCE who dominate the market (Exhibit 5)? For us, the opportunity for Freedom in this market is more focused on breaking the bundles that are geared for shared wireless data "family" plans. Freedom's continued focus on Big Gig is already putting some pressure on these family plans, especially ones where overages come into play. Rather than cut price on their shared data plans, the Big 3 have focused on adding data to buckets (or more often, offering "reasonable" top ups to buckets before the billing cycle concludes). This behavior by the Big 3 does allow some room for Freedom to see market share gains that do not result in aggressive pricing pressure. Freedom offers big data AND lower pricing, which has a decent opportunity to break up some family plans. The Big 3 will offer more and more data hoping to keep the family plans in place without having to lower price. The end result is a fairly healthy market, but not without opportunity for Freedom.

Is 10% share in these markets doable? We think so. Again though, given Freedom's focus on urban/suburban, the actual share for Freedom where it competes would be higher than the 10% target in our 15/10 thesis.

Exhibit 5. Ontario Wireless Market Share (YE 2016)

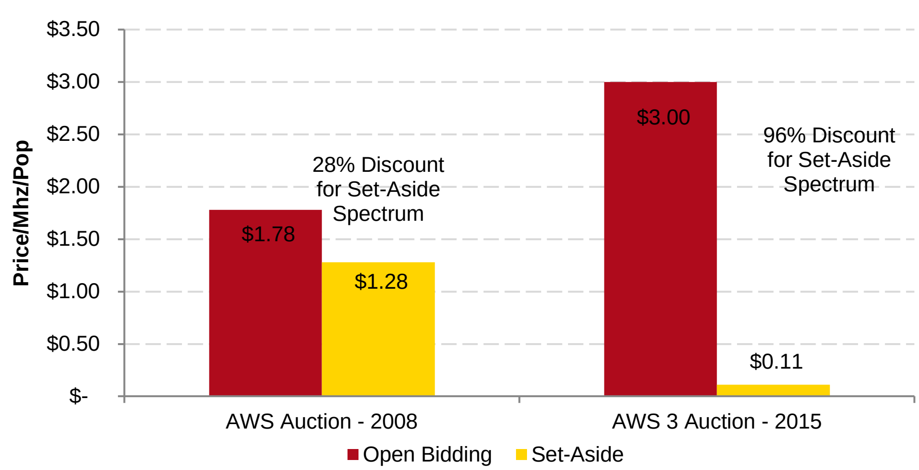


Source: Company reports and CIBC World Markets Inc.

Freedom Is Well-Positioned To Inexpensively Add Spectrum

As a fledgling national wireless player, Shaw/Freedom should continue to have beneficial access to spectrum to further advance its network potential. The upcoming 600 MHz auction next year has again been set up with spectrum set-asides to boost competition to the Big 3. Shaw will benefit by being able to pursue spectrum with only limited competition (especially from a geographic positioning perspective) from other non-national players and other potential new entrants. Looking at recent auctions with similar set-aside characteristics, the discount to non-set-aside spectrum is not immaterial. In the 2015 AWS-3 auction, set-aside spectrum went at a 96% discount to open bidding, and a smaller, but still material, 28% discount was seen in the original AWS 3 auction in 2008 (Exhibit 6).

Exhibit 6. Set-Aside Vs. Open Bidding Spectrum Price/Mhz/Pop



Source: Company reports and CIBC World Markets Inc.

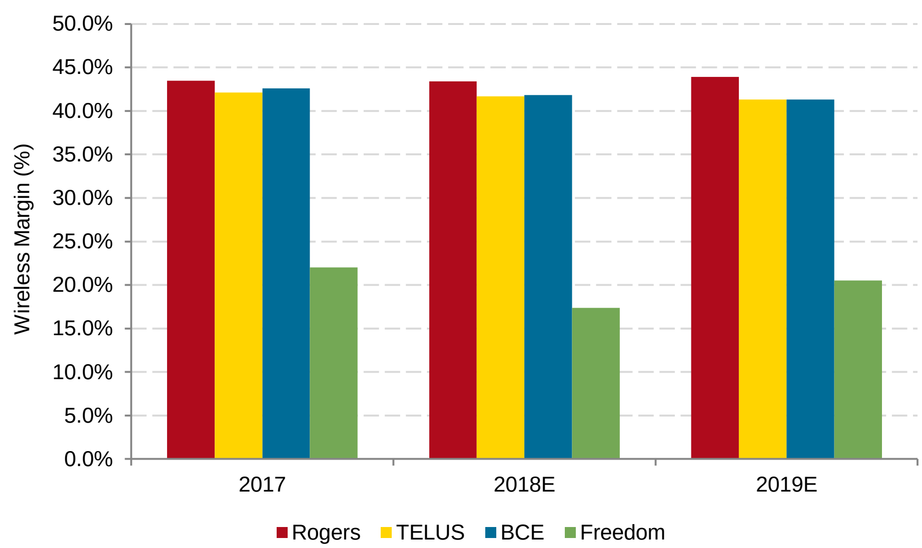
There Remain Headwinds To Success, But We Were Already Accounting For These

It's not to say that Shaw's wireless pursuits are without heavy lifting requirements. The execution needed to achieve a 15/10 forecast, against excellent competitors, in a fluid market, is not a given. In addition, there are other inherent headwinds to success that have not changed.

The lack of a network sharing agreement requires Shaw to spend a great deal more on capex and time to market than would have been the case had an agreement with a Rogers been doable (as benefitted Quebecor). In addition, the Big 3 had long ago monopolized the distribution pipe for wireless retail shelf space, starting back in the Wind/Mobilicity/Public Mobile days and quite recently shored up with the joint purchase of Wireless Wave by Bell and Rogers in 2015. Freedom has its own network of stores and kiosks, and is looking at alternative retail partners, but will always be handcuffed somewhat by this distribution shortfall versus the Big 3.

Given these headwinds, and inherent cost considerations and Freedom's size, our EBITDA expectations for the asset are less than what we would forecast for the Big 3. At the moment, Freedom's EBITDA margins are ~20%, versus the established peers pushing in the 40%-45% (Exhibit 7). Even assuming our 15/10 thesis holds, our expectations for margin at that point remains in the range of 30%-35% given the variables noted above. These are still positive and compelling margins, with some further upside to potential catch-up to Big 3 levels; however, we have a hard time seeing Freedom reaching peer level profitability for now.

Exhibit 7. Freedom Wireless Margins Vs. Peers



Source: Company reports and CIBC World Markets Inc.

That said, these headwinds were known for the past few years, and had played a part in our more modest assessment of opportunity at Freedom. As such, they don't take away from the new positives in our thesis, which we highlight earlier in this section.

In Summary, We Believe The Freedom Opportunity At Shaw Is Material, And Greater Than We Had Previously Thought

Our Wireless Valuation Thesis Has Also Increased - An Additional ~$2.00 Per Share

Shaw Wireless Valuation Targets Remain Complicated At This Stage Of Its Growth Path

Not only have we become more bullish in our wireless forecasts for the Shaw story, but we also believe that we have been underestimating the valuation of these assets within Shaw. Given these are early days for wireless growth, a valuation based on EBITDA (as is our practice with the peer group) does not work. We had, to date, simply attempted to ballpark value in order to reflect wireless potential at Shaw, but we now believe that we have understated value for the story as a result, especially over the longer term.

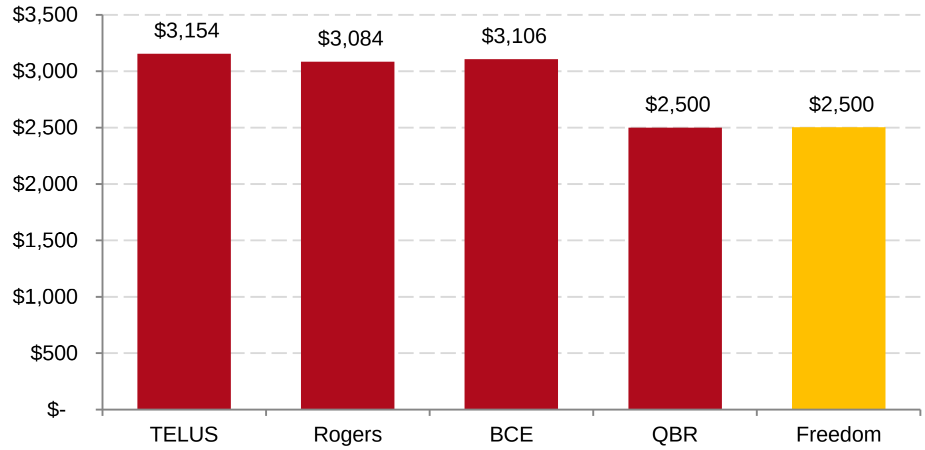
A Discount To Peer Metrics Is Required - Consistent With Our Videotron Treatment

We face a similar issue when valuing the wireless assets within Quebecor. What we arrived at is a valuation thesis based upon current subscriber value versus the Big 3, with a discount that reflects lesser operating statistics/size/network more than offsetting the remaining growth potential for the assets. We have stress tested other similar measures, and this valuation per sub appears to most meet market expectations and reasonableness for Quebecor. We have also run DCF analysis using forecasts that support these same wireless valuation metrics, which is interesting. That said, we prefer not to use DCF as our primary valuation methodology, which is consistent with our entire coverage universe, as DCF has too many flaws to be the go-to analysis on value.

Looking at our target valuations for the Big 3, determined primarily by EV/EBITDA multiples (with a long history of relevance in the market) on next year's EBITDA of 8.25x, the resulting valuation per subscriber (2019E) is remarkably consistent. All three are within a hair of each other at ~$3,150 per subscriber. Given minor model adjustments (and IFRS 15 changes), this is down modestly from roughly $3,250 earlier this year. For Quebecor's Videotron, we established a discount of 25% to this recent $3,250 valuation to arrive at ~$2,500 per 2019E subscriber as a target for wireless. Again, this discount appears to reasonably reflect opportunity and weaknesses against peers and has been supported by Quebecor share behavior over the past few years.

We believe that Shaw's Freedom should represent a similar valuation methodology. Yes, there are differences, such as Videotron's network sharing agreement and Quebec-limited reach, but it is not unreasonable to view these two non-Big 3 players in a similar way.

Exhibit 8. 2019E Wireless EV Per Subscriber



Source: Company reports and CIBC World Markets Inc.

Valuing Freedom Today At $2,500 Per Subscriber, Results In A ~$2.00 Per Share Pickup To Our NAV

Using this $2,500 per subscriber target and our forecast for Freedom's F2019E estimated subscriber base result in a valuation for Shaw's wireless assets of some $4.3 billion. This represents an improvement from our prior assessment of value at $3.2 billion, or roughly $2.30 per share.

Again, we check our assumptions against a DCF using our new forecasts for Freedom (reflecting our 15/10 thesis), and come out confident that this valuation methodology and level make sense.

In Summary: Our Wireless Valuation Estimates Have Also Improved - Our NAV Gained ~$2.00 Per Share

Core Wireline Remains Stable And Mature - Cost Cutting Plan Is The Focus

Our Forecast For Shaw's Core Segment Is Largely Unchanged

In reassessing our Shaw thesis, we have also worked through our outlook and forecasts for the core broadband/video/voice model to see where we might also need an update. In the end, we have made only minor adjustments to these segments, mostly from a subscriber perspective, but again, quite minor.

Broadband Is King, But Overall Outlook Is Quite Mature

We continue to view the core wired segment at Shaw (and its peers) as mature. While there is still some minor broadband growth to be had here and there, the overall outlook (once video and voice is considered) is not for growth from a subscriber standpoint, nor from a financial perspective. There remains some pricing power, again on broadband, such that revenue growth should stay flat for the near term (but ultimately declining), but the real objective for Shaw (and the entire industry) is to keep EBITDA robust by rightsizing the cost base for these mature realities.

Shaw's Aggressive Cost Cutting Plan Is A Bold, But Required, Plan For Wireline

Shaw has undertaken an aggressive plan to materially reduce costs over the next few years through voluntary buyouts that will result in some 25% of its employees (3,300) leaving within the next few years. Virtually none of this cost focus speaks to wireless, it is all an attempt to reduce the wireline (and some corporate) cost structure.

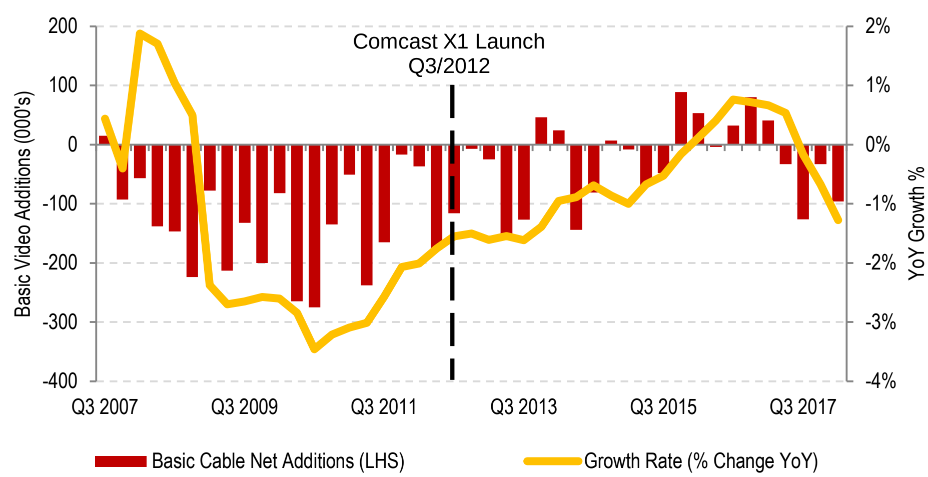
The savings from the plan are material, with run rate expectations of some $48 million in 2018E, up to $150 million in 2019E and settling at about $215 million per annum by 2020E. There are heavy upfront costs related to these moves, as Shaw was very generous with the packages; however, the end result in a year or two will be a significantly lower cost structure that is more in tune with the realities of the mature core business. These moves should help to materially boost margins, and protect absolute EBITDA in the interim, and especially when top line inevitably starts to decline.

Having said all that, to date, we had largely modelled the full benefits of the plan as laid out by Shaw, and continue to believe that its estimates are doable. As such, we have not had to make any adjustments to our wireline financial forecasts as a result of this cost cutting plan.

X1 Benefits Are There, Just Not As Bullish From A Growth Perspective As The Comcast Example

We previously published a "Beyond The Headlines" report in 2017 that looked specifically at the X1 precedent at Comcast, where the cloud-based IP platform at the cableco appeared to contribute to a resurgence in competitive strength for its video product (dragging with it added broadband gains at the same time). Given that Shaw (and Rogers and Videotron) were also on board for rolling out the X1 platform in Canada, we posited that we could expect see a similar positive outcome for the cablecos in Canada, such that perhaps some minor recovery in growth in video, and a boost to broadband, could develop here as well.

Exhibit 9. Comcast Video Subscriber Trends Pre and Post X1 Launch



Source: Company reports and CIBC World Markets Inc.

It would appear that the gains at Comcast were somewhat prematurely extrapolated, and we are again more inclined to think of the X1 opportunity as a defensive offer to shore up against further maturity declines for the video base, while at the same time offering a host of efficiency gains for the operators. As such, it's not so much about X1 bringing a bit of a resurgence in subscribers, but rather helping to add relative stability in subscribers, while capturing efficiency gains.

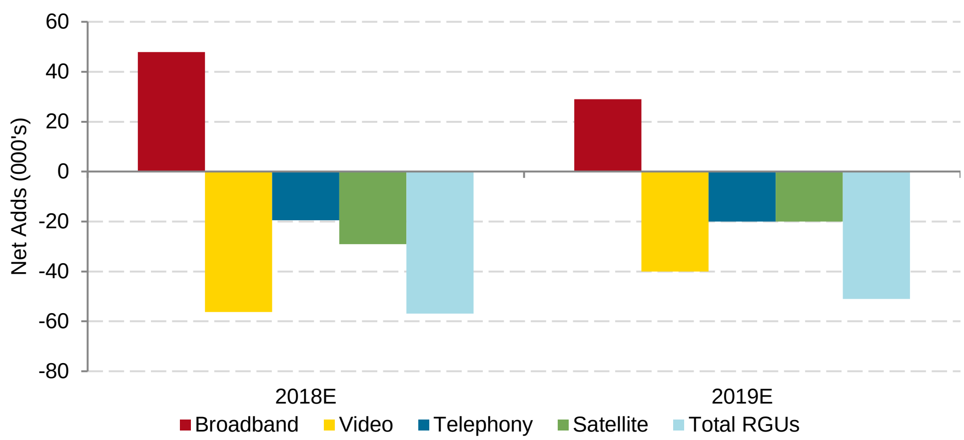
This X1 outcome fits well with how we see the situation at Shaw. We are not looking for a resurgence in growth, but we also recognize that the ability for Shaw to take such aggressive actions on costs for the wired segment is largely made possible by the X1 benefits to the network. This speaks to all areas of the ecosystem, eliminating many of the back office and provisioning needs of historical cable platforms. There once was a time when we had a cost line for "truck rolls" in our cable models, but those days are now long gone and moving even faster, with X1 being a big catalyst.

Net Net, We Haven't Changed Much In Our Wireline Subscriber Forecasts

Again, our wireline financials have not changed, as we had previously reflected the cost cutting benefits (and upfront costs). We had, however, at the margin, reflected some uncertainty in forecasted wired subscriber performance where 25% of the workforce was on their way out. It seemed reasonable to assume that some subscriber execution would suffer somewhere, somehow, given such a drastic change in employees. We had offset this minor negative expectation with the positive elements of our X1 thesis, which saw gains coming on the subscriber front as a result of the X1 effect, ala Comcast.

We have now reversed those views a touch, as the X1 gains are likely not on the table, but at the same time, we are more comfortable that the X1 efficiencies can be utilized in a way that subscriber fulfillment does not suffer. The net effect of this is that our subscriber numbers are largely unaffected by this change in thesis (Exhibit 10).

Exhibit 10. Shaw Wireline Subscriber Forecast



Source: Company reports and CIBC World Markets Inc.

In Summary: Wireline Maturity Is Well Known, And Shaw's Cost-cutting Plan Is A Bold Move To Right-Size

To Conclude, Our Shaw Target Goes To $30 From $28 - Upgrading To Outperform From Neutral

We Have Increased Our price Target To $30 On The Back Of Our Wireless Reassessment

On the back of our reassessment of Shaw's wireless opportunity, and a fine-tuning of our wireless asset valuation, we have increased our 12-18 month target price on Shaw to $30 from $28 previously. We expect continued quarter-over-quarter execution by Shaw to capture these gains, as the wireless opportunity is realized. We expect the core business to remain stable, and benefits from cost-cutting to accrue. There will be noise initially, as the upfront costs of the layoffs take hold; however, we believe that investors should look through this to the realized benefits into F2019 and beyond.

We Are Upgrading To Outperformer – An Implied Premium To Peers Given The Strong Wireless Opportunity

Given our new $30 price target, our forecast total return over the next 12-18 month is ~20%, reflecting reasonable return expectations and a strong dividend in support. Within our cable/telecom coverage list, this expected return profile positions Shaw shares as an attractive buy-and-hold candidate versus peers. Valuations in the space are incredibly tight, and while our new target reflects a premium to Shaw over the group, we believe this makes sense when the full scope of the wireless growth opportunity is considered.

As such, we are upgrading Shaw to Outperformer from our previous Neutral rating.

Price Target Calculation

Our price target calculation for Shaw is based on a hybrid NAV and EV/Subscriber approach. Specifically, we apply a 7.5x multiple against our F2019E Consumer and Business Network Services EBITDA estimate to derive a target value for these businesses. As noted above, we have adopted an EV/Subscriber approach to value Shaw's burgeoning wireless business using a target of $2,500/subscriber. Finally we value Shaw's 38% investment in Corus at market (using recent prices). Using F2019 estimates, our total valuation for Shaw is ~$19.275 billion, from which we subtract our beginning of year net debt estimate to arrive at our 12-to 18-month price target of $30 per share.

Exhibit 12. CIBC Shaw Valuation

Key Risks To Price Target

Technology Risk

The rapid pace of technological change could have a major effect on the level of capital expenditure required by Shaw to stay competitive. A greater-than-expected change to the spending outlook could have a negative effect on our valuation. In addition, new technological developments could drive down demand for Shaw's current service offerings.

Regulatory Risk

The telecommunications landscape is heavily regulated and any changes to the current regulatory environment could negatively affect Shaw's operations.

Competitive Risk

Shaw operates in an increasingly competitive environment dominated by a few large players in most of its operations. This facilitates comparisons between individual companies, and makes relative performance very important.

U.S. MIIs receiving this report from CIBC World Markets Inc. (the Canadian broker-dealer) are required to effect transactions (other than negotiating their terms) in securities discussed in the report through CIBC World Markets Corp. (the U.S. broker-dealer). CIBC World Markets Corp. accepts responsibility for the content of this research report.

This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of Retail investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of wholesale clients of CIBC Australia Ltd.

This report has been prepared by the CIBC group and is issued in Hong Kong by Canadian Imperial Bank of Commerce, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance, Cap 571 (the "SFO"). This report is intended for "professional investors" only (within the meaning of the SFO) and has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Any recipient in Hong Kong who has any questions or requires further information on any matter arising from or relating to this report should contact Canadian Imperial Bank of Commerce, Hong Kong Branch at Suite 3602, Cheung Kong Centre, 2 Queen's Road Central, Hong Kong (telephone number: +852 2841 6111). Orders for Hong Kong listed securities will be executed by Canadian Imperial Bank of Commerce, Hong Kong Branch. Canadian Imperial Bank of Commerce, Hong Kong Branch has entered into an arrangement with its broker-dealer affiliates worldwide to execute orders for securities listed outside of Hong Kong for Hong Kong clients.

This report is intended for distribution in Singapore solely to "institutional investors" (within the meanings of the Financial Advisers Act (Chapter 110 of Singapore)).

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients solely by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

Q2/19: In Line; Wireline Execution Still a Work in Progress

Event: Shaw reported Q2/19 earnings on April 9, 2019.

Bottom Line: Q2/19 earnings were largely in line and neutral from a corporate debt perspective as the quarter largely reflected a continuation of recent trends in wireline and wireless. Leverage remained steady at ~1.9x and the company's strong liquidity position was maintained ($1.3 billion cash on hand and a fully undrawn $1.5 billion credit facility). We recognize the potential for a rating upgrade to BBB from Moody's, but remain cognizant of the ongoing execution risks in the wireline business.

Key Points:

- **Wireline: Still trying to balance profitability and growth amidst tough competitive environment.** Subscriber metrics continued to deteriorate in Q2/19 as ongoing VDP departures weigh and the competitive environment remained intense. Cable net losses of -30K in Q2/19 was elevated from the -18K posted a year earlier. Internet net adds were stronger at +10K (vs. +6K in Q2/18). Revenue remained largely flat at ~$1.1 billion while ongoing cost-cutting initiatives drove a +6.9% y/y growth in adjusted EBITDA to $497 million.
- **Wireless: Growth moderates but still healthy.** Postpaid net adds moderated from recent levels but remained decent at +65K (vs. +94K a year earlier), driven by ongoing demand for premium smartphones and attractive package options. Prepaid net adds declined substantially by -17K in Q2/19, due in part to the migration to postpaid but also due to an increasingly competitive environment in the segment. Postpaid churn was 1.36% vs. 1.66% a year earlier. ABPU growth was slightly below expectations at +7.5% to $41.34 (consensus 9.4%). Financial results were mixed, as overall revenue came in softer than expected on the back of the lower ABPU growth while adjusted EBITDA growth was slightly ahead given significantly lower handset subsidies.
- **F2019 guidance reaffirmed.** 1) Operating income growth of 4-6%, 2) capex ~ $1.2 billion, and 3) free cash flow (as per company and includes distribution from Corus) of ~$500 million.
- **Positive trend remains from Moody's.** We note that the positive trend on Shaw's Baa3 has been in place since June 2017, following the company's sale of ViaWest. The positive trend was maintained in the last annual review in June 2018. An upgrade could be warranted if Shaw delivers 1) consistent and solid execution, 2) positive/stable EBITDA growth in wireline, 3) increasing wireless growth, and 4) leverage remaining between 2.5-3.0x and breakeven FCF/total debt with solid liquidity.

New Issuance

Shaw's liquidity position remained very strong at the end of Q2/19, with $1.3 billion of cash on hand and a fully undrawn $1.5 billion credit facility. Shaw does have a sizable maturity later this year ($1.25 billion) and we expect the company will be quite active in the current 600 MHz spectrum auction. Given the strong liquidity position, we expect any issuance from Shaw for the remainder of the year to be opportunistic (up to $450 million).

Recommendation & Relative Value

Shaw is currently trading ~22bps back of the Big 3 in the mid part of the curve, recovering from the wides of ~35bps at the end of 2018 and largely in line with the past year. In the long end, Shaw is trading ~43bps back of the Big 3. At current levels, we believe spreads are fairly valued, as our expectation for ongoing execution risks related to the turnaround of its wireline business is balanced by the potential for a positive rating action and manageable supply for the remainder of 2019.

Issuer Credit and Sector Credit Recommendation Key (April 22, 2016)

We use the following credit recommendation system definitions:

Issuer Credit Recommendations – Total Return is calculated by reference to the FTSE TMX Canada Universe Bond Index (i.e. price change from the beginning to end of period, including accrued interest).

top pick = Forecast as the analyst's best idea, based on risk/reward, and is expected to significantly outperform the sector from a total return perspective

outperform = Forecast to provide a superior risk/reward and/or total return is expected to be above the sector average

sector perform = Forecast to provide an appropriate risk/reward and/or total return is expected to be in line with the sector average

underperform = Forecast to provide an inferior risk/reward and/or total return is expected to be below the sector average

Sector Credit Recommendations – Total return is calculated by reference to the FTSE TMX Canada Universe Bond Index.

outperform = Forecast to provide a superior risk/reward and/or total return that is expected to be above the average of the index

market perform = Forecast to provide an appropriate risk/reward and/or total return is expected to be in line with the index underperform = Forecast to provide an inferior risk/reward and/or total return is expected to be below the average of the index

Pricing

Pricing in BMO Capital Markets Corporate Debt Research is based on a combination of data sources that may include readily available delayed pricing from BMO Capital Markets that are subsequently optimized to provide indicative pricing only, and should not be used as a basis or representation of current market conditions.

ADDITIONAL INFORMATION IS AVAILABLE UPON REQUEST

BMO Financial Group (NYSE, TSX: BMO) is an integrated financial services provider offering a range of retail banking, wealth management, and investment and corporate banking products. BMO serves Canadian retail clients through BMO Bank of Montreal and BMO Nesbitt Burns. In the United States, personal and commercial banking clients are served by BMO Harris Bank N.A., (Member FDIC). Investment and corporate banking services are provided in Canada and the US through BMO Capital Markets.

BMO Capital Markets is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A, (Member FDIC), Bank of Montreal Ireland Plc, and Bank of Montreal (China) Co. Ltd. and the institutional broker dealer businesses of BMO Capital Markets Corp. (Member FINRA and SIPC) in the U.S., BMO Nesbitt Burns Inc. (Member Canadian Investor Protection Fund) in Canada, Europe and Asia, Bank of Montreal Ireland Plc in Europe, BMO Capital Markets Limited in the U.K. and Australia and BMO Advisors Private Limited in India.

This is Exhibit 78 to the affidavit of Kenneth Mathieu, affirmed remotely by Jonathan Bitran stated as being located in the city of Toronto in the province of Ontario, on the 20th day of October, 2022, in accordance with O.Reg431/20, Administering Oath or Declaration Remotely.

BARCLAYS

Equity Research
28 June 2019

Shaw Communications Inc.

Healthy Wireless; looking for more consistent Wireline

Maintain OW, $33 PT: We believe the F'Q3 results reflect continued progress as management execute to better position the company to capture the growth opportunities in wireless and broadband. While management raised full-year guidance to ~6% EBITDA growth from 4-6%, it was underwhelming given we/Street had been expecting 7% growth and it implied negative EBITDA growth next quarter. Concerns on Wireless from the Big 3's recent launch of unlimited plans appears overdone, in our view. However, we believe management must demonstrate greater improvements and more consistent results in Wireline in F'20 for the stock to move beyond its current trading range. We maintain our OW rating and PT of $33 because we believe the issues in Wireline are manageable, and should not overshadow the opportunity in Wireless.

Wireless well positioned despite Big 3's launch of unlimited plans: Overall F'Q3 Wireless metrics were better than we had expected, driven by the strong postpaid net adds (+61k vs. our/cons +60k/+56k) and record low churn (1.18% vs. our 1.30%, last year 1.36%), which management attributed to network improvements and affordable data plans. ARPU growth was once again the blemish (2.2% vs. our/cons 3.2%/4.0%) due to greater discounting in a "very competitive environment" and increasing mix of BYOD subs. Management has not seen any meaningful impact in F'Q4 from the Big 3's recent launch of unlimited plans, and are optimistic it may help reaccelerate ARPU growth over time. They also expect subscribers on competitor networks coming off 2-year contracts from the iPhone 8 and X launches will increase their subscriber growth opportunity. While the Street assumes the Big 3's launch of unlimited plans will have a net negative impact on Shaw, we believe Wireless remains well positioned to gain subscriber share supported by its 1) improving network; 2) ongoing footprint expansion in W. Canada; and 3) nascent market share. We estimate F'Q4 revenue/EBITDA growth of 15%/60%.

Wireline volatility remains a distraction: Overall Wireline results were slightly below expectations due to weakness in TV (-29k vs. our/cons -30k/-23k) and phone (-16k vs. our/cons -5k/-7k), even though broadband continued to strengthen (+7k vs. our/cons +8k/+5k) we believe helped by an improved offering targeting Internet-only households. Financials were largely in line, excluding the $15m 1x license payment. Management said broadband self-installs increased to 41% and truck rolls are down 30%. However, the updated guidance implies negative EBITDA growth in F'Q4, due to tougher comps and likely ongoing opex investments in Cable. We estimate F'Q4 revenue/EBITDA growth of 0.8%/-7.0%.

Investment Thesis

We believe the F'Q3 results reflect continued progress as management execute to better position the company to capture the growth opportunities in wireless and broadband. While management raised full-year guidance to ~6% EBITDA growth from 4-6%, it was underwhelming given we/Street had been expecting 7% growth and it implied negative EBITDA growth next quarter. Concerns on Wireless from the Big 3's recent launch of unlimited plans appears overdone, in our view. However, we believe management must demonstrate greater improvements and more consistent results in Wireline in F'20 for the stock to move beyond its current trading range. We maintain our OW rating and PT of $33 because we believe the issues in Wireline are manageable, and should not overshadow the opportunity in Wireless.

Our price target is based on 9x (unchanged) our EBITDA estimate using our F'2020 estimates reflecting the strong growth in Wireless and its expected contribution to EBITDA growth in the coming years.

Thoughts from the quarter

Management expect EBITDA growth of 6% and FCF $550m; F'19 on track beyond the noise, in our view

- EBITDA was impacted by a 1x ~$15m IP license related payment. Excluding this and the 1x CRTC roaming benefit payment of ~$13m in F'Q3 2018, EBITDA would have grown ~3.8% to ~$545m.

- VDP related departures were 350 employees in the quarter with YTD net opex and net capex savings of $33m and $25m, respectively. For F'19 total net opex and net capex savings are expected to be $95m and $40m, respectively (largely in line with the total of $140m guided to earlier). VDP payments are expected to be ~$175m over the next 12m.

- $5m of opex savings were reinvested in the business with management continuing to expect reinvesting a total of $10-15m in H2F'19 with ~60% of the spend recurring. F'Q4 reinvestment is expected to be at the same level as F'Q3 or higher.

- Management refined their guidance and now expect EBITDA growth of 6%, capex of ~$1.2b and FCF of ~$550m in F'19.

- During F'Q3, sale of ~39% stake in Corus was completed for ~$525m while ~$492m was spent on the 600MHz spectrum purchase.

Launch of unlimited plans by Big 3 could lead to ARPU growth acceleration opportunities

- Record low post-paid wireless churn of 1.18% with +61k net adds; pre-paid net adds swung back to positive territory (~820) after 5 quarters of mostly negative or flat subs. Management called out that the positive wireless results are due to an improved network, latest devices and affordable data plans.

- Management noted that the lower than expected ARPU growth in the quarter was due to the need for discounting of some plans for new subs in a very competitive environment as well as increased BYOD subs. However, they are still confident on their ARPU growth trajectory and believe that the launch of unlimited plans by the Big 3 may actually create an opportunity for them to accelerate ARPU growth. Further, management sounded an optimistic tone on subs on competitor networks coming off their 2-yr plans from when the iPhone 8 and iPhone X were initially launched noting this event as another potential opportunity.

- Wireless EBITDA growth would have been 37.5% after excluding the 1x CRTC roaming benefit payment of ~$13m in F'Q3 2018. Management noted that they are seeing margin expansion as the Wireless business scales and expect to continue to see gradual margin expansion over F'20.

- Management noted that while the incumbents have followed their strategy and recently launched similar (albeit higher priced) unlimited data plans, they have not seen any meaningful impact and are confident that the Wireless business will continue to perform well.

- Expect wireless capex spend pick-up in F'Q4 as deployment of 700MHz spectrum continues and the service is rolled out in 10 additional communities by the end of August. Total wireless capex is still expected to be ~$400m in F'19 and management do not see that increasing significantly over the "coming years."

Third consecutive quarter of positive internet net adds with focus in video remaining on profitable subs; launch and expansion of IPTV should help

- Management called out the improvement in broadband execution with +7k net adds (vs. -3k in F'Q3 2018) in a seasonally weak quarter (e.g. student disconnects) with self-install increasing to 41% and broadband revenue growth of 6% y/y; management expect the positive trend in self-install to continue and also highlighted the improvement in video churn y/y and truck rolls down by 30%.

- Shaw launched its IPTV service in Calgary recently and expect to roll the service to additional markets over the next several months noting the lower success-based capex associated with the rollout, lower service delivery cost due to self-install and focus on driving profitable video subs growth.

- Wireline EBITDA growth would have been ~1% after excluding the 1x ~$15m IP license related payment in the quarter. Management noted that they continue to see opportunities for margin improvement going forward.

- Management alluded to negative EBITDA growth in Q4'F19 due to a tougher comp from Q4'F18 which benefited from a more significant rate increase (vs. this year with a rate increase in April which was not as significant) so that the impact of the rate increase is not as pronounced as it was last year.

Price (27-Jun-2019)	**CAD 26.74**
Price Target	**CAD 33.00**

Why Overweight? The sale of Media and the acquisition of Wind Mobile makes strong strategic sense and strengthens SJR's long-term growth prospects. In the near term however, years of investments are required to drive growth at Wind, which on top of an already long list of investment priorities will constrain SJR's ability to grow the dividend for the foreseeable future.

Upside case | **CAD 35.00**

The Shaw family is increasingly considering a sale of the company, while the pressures on the cable business begin to moderate as Telus' penetration matures. Our upside case is based on an 9.5x multiple on our 2019 upside EBITDA.

Downside case | **CAD 21.00**

The competitive environment intensifies once again as Telus tries to drive greater TV and Internet penetration, pressuring Shaw's cable business. Our downside case is based on 8.0x our 2019 downside EBITDA.

Valuation Methodology and Risks

Canadian Telecommunications, Media, and Technology
Shaw Communications Inc. (SJR/B CN / SJR-B.TO)
Valuation Methodology: Our price target is based on 9x EBITDA using our F`2020 estimate of CAD 2,335mn.
Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Upside risk: A maturing competitive environment reduces pricing and subscriber pressure on Shaw's Cable business, while regulatory action against the wireless industry further improves the economics for wireless new entrants.
Downside risk: Shaw's Cable business faces intensified competition from Telus' fibre footprint expansion.
Shaw Communications Inc. (SJR)
Valuation Methodology: Our price target is based on 9x EBITDA using our F`2020 estimate of CAD 2,335mn, converted using spot FX.
Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Upside risk: A maturing competitive environment reduces pricing and subscriber pressure on Shaw's Cable business, while regulatory action against the wireless industry further improves the economics for wireless new entrants.
Downside risk: Shaw's Cable business faces intensified competition from Telus' fibre footprint expansion.

Risk Disclosure(s)

Master limited partnerships (MLPs) are pass-through entities structured as publicly listed partnerships. For tax purposes, distributions to MLP unit holders may be treated as a return of principal. Investors should consult their own tax advisors before investing in MLP units.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

Canadian Telecommunications, Media, and Technology

BCE Inc. (BCE)	BCE Inc. (BCE.TO)	CGI Inc. (GIB)
CGI Inc. (GIB-A.TO)	Cogeco Communications Inc. (CCA.TO)	Cogeco Inc. (CGO.TO)
Constellation Software Inc. (CSU.TO)	Corus Entertainment Inc. (CJR-B.TO)	Descartes Systems Group (DSG.TO)
Descartes Systems Group (DSGX)	Open Text Corp. (OTEX)	Open Text Corp. (OTEX.TO)
Quebecor Inc. (QBR-B.TO)	Rogers Communications Inc. (RCI)	Rogers Communications Inc. (RCI-B.TO)
Shaw Communications Inc. (SJR)	Shaw Communications Inc. (SJR-B.TO)	Telus Corp. (T.TO)

IMPORTANT DISCLOSURES CONTINUED

Telus Corp. (TU)

Distribution of Ratings:

Barclays Equity Research has 1503 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 53% of companies with this rating are investment banking clients of the Firm; 75% of the issuers with this rating have received financial services from the Firm.

38% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 48% of companies with this rating are investment banking clients of the Firm; 66% of the issuers with this rating have received financial services from the Firm.

15% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 36% of companies with this rating are investment banking clients of the Firm; 68% of the issuers with this rating have received financial services from the Firm.

Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

Top Picks:

Barclays Equity Research's "Top Picks" represent the single best alpha-generating investment idea within each industry (as defined by the relevant "industry coverage universe"), taken from among the Overweight-rated stocks within that industry. Barclays Equity Research publishes "Top Picks" reports every quarter and analysts may also publish intra-quarter changes to their Top Picks, as necessary. While analysts may highlight other Overweight-rated stocks in their published research in addition to their Top Pick, there can only be one "Top Pick" for each industry. To view the current list of Top Picks, go to the Top Picks page on Barclays Live (https://live.barcap.com/go/keyword/TopPicks).

To see a list of companies that comprise a particular industry coverage universe, please go to https://publicresearch.barclays.com.

Types of investment recommendations produced by Barclays Equity Research:

In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts within Equity Research. Any such investment recommendations shall remain open until they are subsequently amended, rebalanced or closed in a future research report.

Disclosure of other investment recommendations produced by Barclays Equity Research:

Barclays Equity Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays Equity Research in the preceding 12 months please refer to *https://live.barcap.com/go/research/Recommendations*.

Shaw Communications Inc.

Pendulum Towards Profitability in Full Swing

Our view: Q1/21 financial results were in line with our expectations with better wireless loading and wireline margins offsetting weaker wireline RGUs. Following several minor tweaks to our forecast, our $27 target price is unchanged.

Key points:

- **Banking on better days ahead.** We view Shaw as a "value play" with a 7.1x FTM EV/EBITDA multiple adequately reflecting near-term headwinds that include elevated wireless promotional intensity at the incumbent flanker brand level, as well as a recalibration in the wireline growth and profitability balance incorporating both higher Internet pricing and the Shaw Mobile bundle. Potential catalysts include a favourable wireless review decision, accelerating Internet revenue growth, Shaw Mobile traction, a favourable 3500 MHz outcome with the set-aside and a potential sale of Freedom Mobile in Ontario. With now better wireline execution, a strong FCF trajectory, an under-levered balance sheet and active NCIB, we believe Shaw's growth and risk profile has improved considerably.
- **Shaw Mobile traction and the wireless-Internet bundle shifting emphasis to consolidated performance.** Postpaid wireless net additions of +87k in Q1/21 were well ahead of our +56k estimate and up YoY versus +67k in Q1/20 with management attributing the strong loading to accelerating Shaw Mobile traction. As a result of the strong demand for a heavily discounted wireless service that is bundled with premium Internet tiers, wireless ARPU growth declined -1.3% YoY while Internet ARPU growth accelerated to +5% but with Internet net additions down -15k in the quarter. We expect such "distortion" in traditional wireless and wireline KPIs driven by the Shaw Mobile wireless-Internet bundle to naturally shift the emphasis to consolidated performance (not unlike what is already the case with Quebecor given Videotron disclosure).
- **A directional easing in wireless promotional activity helping to "lower the temperature" following an intense Q3/20.** Following an intensely competitive calendar Q3/20 period for the Canadian wireless market, management confirmed the moderation in wireless promotional activity in calendar Q4/20 with a notable step-down since Boxing Day (consistent with our channel checks).
- **Shaw Family remains committed to the company's growth strategy.** Consistent with prior commentary, management indicated that the Shaw Family remains committed to the company's growth strategy with the view that it is still "early days" with respect to fully capitalizing on improving execution, wireless-Internet bundling and scaling the wireless business, albeit also acknowledging there is room for improvement and that time will tell. In our recent January 8, 2021 RBC Telecom Report United We Stand, Divided We Fall, we provide a framework to help investors better assess the nature, timing and likelihood of further M&A within the Canadian telecom industry.

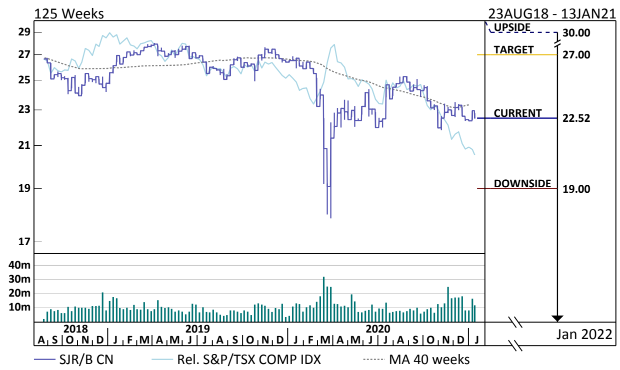
Target/Upside/Downside Scenarios

Exhibit 1: Shaw Communications Inc.



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Price target/base case

Our one-year price target of $27 is based on the average of three approaches: (i) applying an 19.0x multiple to our blended two-year forward adjusted EPS estimates; (ii) applying target EV/EBITDA multiples of 7.00x and 9.00x to our EBITDA estimates for wireline and wireless, respectively; and (iii) discounted FCF through F2025E factoring in a WACC of 8.0% and a terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low-interest rate environment.

Upside scenario

Our upside scenario translates to a $30 value. This scenario assumes greater RGU growth, more robust cable ARPU growth, better-than-expected wireless ARPU and subscriber growth, and a faster re-acceleration in Business Network Services revenue growth.

Downside scenario

Our downside scenario translates to a $19 value. This scenario assumes continued deterioration in the RGU base combined with modest cable ARPU growth, a prolonged wireless drag on FCF and minimal re-acceleration in Business Network Services revenue growth.

Investment summary

We view Shaw as a "value play" with a 7.1x FTM EV/EBITDA multiple adequately reflecting near-term headwinds that include elevated wireless promotional intensity at the incumbent flanker brand level, as well as a recalibration in the wireline growth and profitability balance incorporating both higher Internet pricing and the Shaw Mobile bundle. Potential catalysts include a favourable wireless review decision, accelerating Internet revenue growth, Shaw Mobile traction, a favourable 3500 MHz outcome with the set-aside and a potential sale of Freedom Mobile in Ontario. With now better wireline execution, a strong FCF trajectory, an under-levered balance sheet and active NCIB, we believe Shaw's growth and risk profile has improved considerably.

Potential catalysts for the stock

- Greater-than-expected Internet ARPU growth translating to wireline margin expansion
- Easing of IPTV market share gains resulting in fewer television subscriber losses
- An eventual easing of wireless capex intensity and/or higher wireless net additions and ARPU growth
- Greater-than-expected margin expansion
- Incremental WiFi, Internet, and business market monetization longer term
- A takeout premium

Potential risks for the stock

- Unforeseen direct and indirect COVID-19 impacts
- Greater-than-expected wireless capex and/or the inability to execute on wireless
- Greater-than-expected market share gains from TELUS Optik TV and Internet
- The inability to realize additional annual cost savings
- Greater-than-expected telephony and television substitution
- The emergence of irrational pricing in the residential telephony, television, and/or Internet markets

What is New / What has Changed

- **Shaw Mobile traction and the wireless-Internet bundle shifting emphasis to consolidated performance.** Postpaid wireless net additions of +87k in Q1/21 were well ahead of our +56k estimate and up YoY versus +67k in Q1/20 with management attributing the strong loading to accelerating Shaw Mobile traction. Specifically: (i) initial demand has exceeded internal expectations with >50% of Shaw Mobile loading attributed to port-ins from other operators versus migrations; (ii) loading continues to shift away from the $0 talk-and-text plans initially launched in July to the higher-value $25/$45 unlimited data plans launched in October; (iii) the majority of loading comprises BYOD with households often contributing multiple lines; and (iv) Shaw Mobile customers are skewing premium/higher-value versus Freedom Mobile subscribers. As a result of the strong demand for a heavily discounted wireless service that is bundled with premium Internet tiers, wireless ARPU growth declined -1.3% YoY while Internet ARPU growth accelerated to +5% but with Internet net additions down -15k in the quarter. We expect such “distortion” in traditional wireless and wireline KPIs driven by the Shaw Mobile wireless-Internet bundle to naturally shift the emphasis to consolidated performance (not unlike what is already the case with Quebecor given Videotron disclosure). In this respect, consolidated revenue growth of -0.9% YoY was in line with our forecast when adjusting for equipment revenues, while consolidated EBITDA growth of +3.2% exceeded our +2.1% estimate (consolidated EBITDA margins up a solid +179bps YoY) with management’s focus on higher-value households/customers and churn reduction translating to early NAV accretion.
- **A directional easing in wireless promotional activity helping to “lower the temperature” following an intense Q3/20.** Following an intensely competitive calendar Q3/20 period for the Canadian wireless market, after which management cautioned that incumbent promotional activity against the backdrop of a moderation in the rate of expansion in the Canadian wireless market due to COVID-19 risked deterioration in what has historically been a relatively price disciplined wireless market in Canada, management confirmed the moderation in wireless promotional activity in calendar Q4/20 with a notable step-down since Boxing Day (consistent with our channel checks). While elevated wireless competitive intensity in a still lower-growth market will continue to warrant increased investor scrutiny, we remain optimistic for a levelling off of wireless promotional activity in 2021. Against this backdrop, management attributed the +31bps YoY increase in postpaid churn to 1.81% in Q1/21 to the launch of Shaw Mobile “stirring the pot” with Freedom Mobile incurring most of the churn increase.
- **Internet market expansion key to a return to positive Consumer Internet subscriber growth given Shaw’s renewed discipline.** Management attributed the continued overall choppiness in quarterly wireline results in part to the COVID-19-driven absence of market expansion that has historically enabled all Canadian telecom operators to sustain a healthy balance of growth and profitability. Consumer Internet net additions of -15k in Q1/21 were lower than our estimate of -10k with management attributing the weakness (and a multi-quarter period before returning to positive Consumer Internet subscriber growth) to the combination of little-to-no market expansion in Shaw’s cable footprint (Alberta economic weakness, a distorted back-to-school season), the competitive strengths of TELUS (bundling, execution), the flushing out of promotion hoppers, internal discipline to stick with higher Internet prices, and the renewed pursuit to target and retain higher-value households. On a positive note: (i) management is seeing steady migration to higher-priced Internet plans with >+100k customers now on ≥750 Mbps plans, 30% of migrations taking 1 Gbps and 1.5 Gbps plans and 20% of newly on-boarded customers taking the higher tiers; (ii) gross additions were down -40% YoY in Q1/21 due in part to COVID-19 impacts suggesting a stronger gross loading lever can be pulled

alongside renewed Internet market expansion to assist in returning to positive Consumer Internet subscriber growth once COVID-19 impacts wane; and (iii) management confirmed that base management continues to significantly improve enabling Shaw to more tactically compete both inside and outside of FTTH footprints (which for F2021 at least should see less expansion versus that over the past 6-7 years).

- **Progress on digital, distribution and data analytics re-affirms Shaw's improving execution.** Consistent with the recent data from our RBC Elements sentiment and emotion tracker, management indicated that significant progress has been made on the company's digital and retail distribution capabilities as well as the leveraging of better customer data analytics. Specifically: (i) self-serve/digital and self-install accounted for >20% of gross wireless loading and >70% of Internet installations in Q1/21, respectively, with same-day or next-day capabilities for on-boarding for both; (ii) Shaw Mobile retail locations expanded from 140 to 150 in Q1/21 with management remaining committed to further building out the retail footprint; and (iii) management is now more effectively able to identify, target and prioritize higher-value households and customers leveraging internal customer data analytics.
- **Shaw Family remains committed to the company's growth strategy.** Consistent with prior commentary, management indicated that the Shaw Family remains committed to the company's growth strategy with the view that it is still "early days" with respect to fully capitalizing on improving execution, wireless-Internet bundling and scaling the wireless business, albeit also acknowledging there is room for improvement and that time will tell. Bigger picture, the rejection by Gestion Audem and the Cogeco Board of Directors of the proposed takeout bid by Altice and Rogers in 2020 put M&A firmly into the spotlight. In our recent January 8, 2021 RBC Telecom Report United We Stand, Divided We Fall, we provide a framework to help investors better assess the nature, timing and likelihood of further M&A within the Canadian telecom industry. Given the complex set of multiple and interrelated industry dynamics that typically influence M&A decisions, in this report, we have created an M&A game with a playbook that attempts to untangle and sequence these dynamics in order to better identify M&A catalysts and evaluate logical M&A outcomes.

Q1/21 Financial Results In Line with Our Expectations

Consolidated revenues and EBITDA were $1,370MM (-0.9% YoY) and $607MM (+3.2%), respectively, versus our estimates of $1,378MM and $601MM. Segmented revenues were in line with our estimates while higher wireline EBITDA ($532MM versus $515MM) was offset by lower wireless EBITDA ($75MM versus $85MM). Consolidated EBITDA margins were 44.3% (+179bps YoY), slightly above our estimate of 43.6% (+106bps).

Valuation

Our one-year price target of $27 is based on the average of three approaches: (i) applying an 19.0x multiple to our blended two-year forward adjusted EPS estimates; (ii) applying target EV/EBITDA multiples of 7.00x and 9.00x to our EBITDA estimates for wireline and wireless, respectively; and (iii) discounted FCF through F2025E factoring in a WACC of 8.0% and a terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low-interest rate environment. The total implied return to our price target supports an Outperform rating.

Risks to rating and price target

Risks to our rating and price target include: (i) unforeseen direct and indirect COVID-19 impacts; (ii) greater-than-expected wireless capex and/or the inability to execute on wireless; (iii) greater-than-expected market share gains from TELUS Optik TV and TELUS Optik Internet; (iv) the inability to realize additional annual cost savings; (v) greater-than-expected telephony and television substitution; and (vi) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets.

Company description

Shaw Communications is one of Canada's largest telecom operators with 1.4 million cable subscribers, 2.1 million Internet subscribers, and 1.1 million telephony subscribers in Western Canada. Shaw also provides satellite television and wireless services with 700k satellite subscribers and 1.8 million wireless subscribers.

Required disclosures

Non-U.S. analyst disclosure

Drew McReynolds, Caleb Ho and Riley Gray (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2241 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. RBC Capital Markets has provided Shaw Communications Inc. with non-securities services in the past 12 months.

The class B shares of Shaw Communications Inc. are non voting shares.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.

Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.

As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

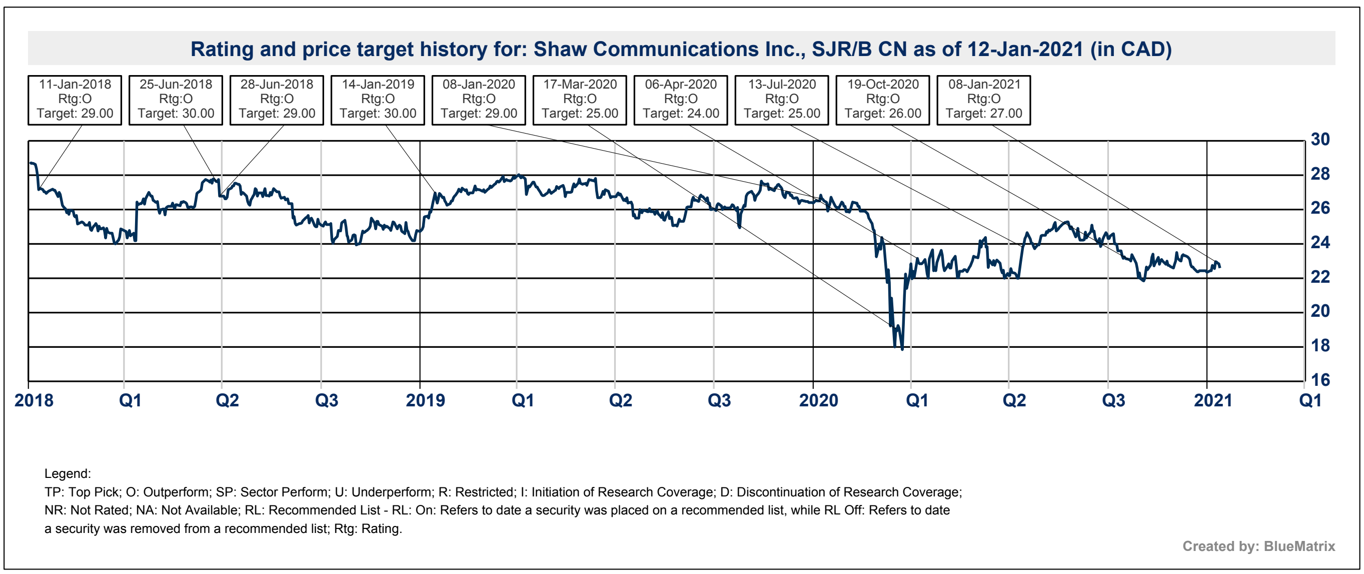
RBC Capital Markets

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Dec-2020

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY [Outperform]	**828**	**54.83**	**299**	**36.11**
HOLD [Sector Perform]	**615**	**40.73**	**166**	**26.99**
SELL [Underperform]	**67**	**4.44**	**12**	**17.91**



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at https://www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Shaw Communications Inc.

Valuation

Our one-year price target of $27 is based on the average of three approaches: (i) applying an 19.0x multiple to our blended two-year forward adjusted EPS estimates; (ii) applying target EV/EBITDA multiples of 7.00x and 9.00x to our EBITDA estimates for wireline and wireless, respectively; and (iii) discounted FCF through F2025E factoring in a WACC of 8.0% and a terminal growth rate of 1.5%. We believe our target multiples are consistent with the company's growth and risk profile and a low-interest rate environment. The total implied return to our price target supports an Outperform rating.

Risks to rating and price target

Risks to our rating and price target include: (i) unforeseen direct and indirect COVID-19 impacts; (ii) greater-than-expected wireless capex and/or the inability to execute on wireless; (iii) greater-than-expected market share gains from TELUS Optik TV and TELUS Optik Internet; (iv) the inability to realize additional annual cost savings; (v) greater-than-expected telephony and television substitution; and (vi) the emergence of irrational pricing in the residential telephony, television, and/or Internet markets.

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
For a list of all recommendations on the company that were disseminated during the prior 12-month period, please click on the following link: https://rbcnew.bluematrix.com/sellside/MAR.action
The 12 month history of SPARCs can be viewed at https://www.rbcinsightresearch.com.

Analyst certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Third-party-disclaimers

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P") and is licensed for use by RBC. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

RBC Capital Markets disclaims all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any statements made to the media or via social media that are in turn quoted in this report, or otherwise reproduced graphically for informational purposes.

References herein to "LIBOR", "LIBO Rate", "L" or other LIBOR abbreviations means the London interbank offered rate as administered by ICE Benchmark Administration (or any other person that takes over the administration of such rate).

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Europe) GmbH, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility.
